CUSTOMS ALLOWANCES: Each crew member is permitted up to 200 cigarettes aboard held out of bond, but is only allowed to take ashore 40 at any time. Only on a *final discharge* would a member of crew be permitted a tobacco allowance of half-a-pound. Each crew member is allowed to keep out of Bond, 1 (one) bottle of wine or spirits, but is prohibited from taking any of it ashore. Each member of crew is allowed tax-free only one-sixth gallon wine and one-sixth gallon spirits *when he is finally discharged.*
CARGO GEAR: Ship's gear.
IDENTIFICATION CARDS: Not required.
REPAIRS: Every type of deck or engine repair is undertaken at Guyana National Engineering Corporation (GNEC) dry dock. Above waterline and engine-room repairs of any type are undertaken on vessels exceeding the dimensions mentioned below while vessel is anchored in the stream. Also see "Dry Docks".
SURVEYORS: Lloyds and Bureau Veritas. No cargo inspectors available.
DRY DOCKS: GNEC Dry dock: A graving dock 210 ft. × 37 ft. 9 in. at entrance situated South of GNEC No. 2 Wharf, which is State owned and operated on normal commercial lines. 198 ft. length of dry dock is on blocks. Breadth: top 46 ft. 4 in., bottom 40 ft. 9 in., depth on sill at HWOST 92 ft.

Government Dry dock: Situated at Mazaruni approx. 40 miles upriver at junction of Essequibo and Mazaruni rivers is a graving dock and has extreme dimensions of approx. 160 ft.×35 ft.
REPATRIATION: Arrangements normally made through ship's Agents.
AIRPORT: Timehri International Airport is situated approx. 30 miles South of Georgetown with highway connection and is served by many intercontinental airlines.
TIME: 3 hours behind GMT. No alterations made to clocks during the year.
HOLIDAYS: New Year (January 1st); *Eid-ul-Ahza; *Phagwah; Republic Day (February 23rd); Good Friday; Easter Monday; Labour Day (May 1st); *Youman Naubi; Caribbean Day (July 5th); Commonwealth Day (First Monday in August); *Deepavali; Christmas Day (December 25th); Boxing Day (December 26th). *Religious holidays are variable.
POLICE/AMBULANCE/FIRE: Tel. 999. There are Police/Ambulance/Fire Stations on the waterfront.
TELEPHONES: Could be arranged through Coast Station 8RB.

BANKS: Chase Manhattan Bank N.A., Bank of Guyana Building, Church Street, Georgetown, P.O.Box 101080, Telex: Chase Bk, GY 2222.

Barclays Bank Int. Ltd., 48 Water Street, Georgetown, Telex: Barclay GY 2248.

STORING: See "Prelims".

(1) Yes. (2) Yes. (3) Yes. (4) Yes. (5) Yes. (6) Yes.

SHORE LEAVE: Granted by Immigration Boarding Officer.

DELAYS: Only when berths are occupied.

AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown. *Tel:* 02-59350. *Cables:* Transport – Guyana. *Contact:* Captain I. N. Roman, Harbour Master.

LINDEN: 06.00 N. 58.17 W.

DOCUMENTS: See "Georgetown".

PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 12 hours in advance to pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

From Georgetown to Linden and Linden to Georgetown, pilotage not compulsory, but advisable to use G.N.E.C. Pilots.

RESTRICTIONS: Governed by depth of water at Demerara River Bar. Entrance normally at HW. Max. speed limit on the river is 10 knots.

ANCHORAGES: Vessels proceeding to Linden in ballast and drawing less than 15 ft. may anchor beyond Southern limit of Georgetown. Depths 16 ft. – 18 ft. MLWS.

MAX. SIZE: Draft 21 ft. 6 in.

HEALTH: Pratique given at Georgetown by Health Authorities. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.

RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz, 24 hours a day. Also SSB 8281.2 kHz.

TUGS: Not available.

BERTHING: There are 2 bauxite berths accommodating vessels of up to 570 ft. One loader for metal grades has an airdraft of 29 ft. 8 in. and a loading rate of 800 t.p.h. The second loader for calcined bauxite has an airdraft of 34 ft. and a loading rate of 350 t.p.h.

The Alumina berth has a travelling tower with an airdraft of 64 ft. and a loading rate of 400 t.p.h. Max. beam of vessel 85 ft.

MEDICAL: Hospital at Georgetown.

DENSITY: 1000, fresh water.

FRESH WATER: Can be supplied.

FUEL: Can be supplied.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.

CONSULS/REPAIRS: At Georgetown.

AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown. *Tel:* 02 – 59350. *Cables:* Transport Guyana. *Contact:* Captain I. N. Roman, Harbour Master.

NEW AMSTERDAM (Everton, Berbice): 06.14 N. 57.31 W.

DOCUMENTS: See "Georgetown".

PILOTAGE: Pilots are stationed at Georgetown. ETA to be given 24 hours in advance to pilot station. Pilotage compulsory. Pilot boards from black cutter 5 cables N.W. of the Outer Georgetown Light.

RESTRICTIONS: The Berbice Bar is composed of fairly hard mud. Vessels may cross the Berbice Bar on even keel loaded to 2 ft. less than the Demerara Bar predictions.

MAX. SIZE: Controlled by Bar draft predictions.

HEALTH: Pratique given at Berbice by Health Authorities. If vessel is suspect or infected, Master to advise Harbour Authority by radio before arrival.

RADIO: Demerara Radio call sign 8RB operating on 2182 kHz. Georgetown Lighthouse operates VHF Channel 16 and HF 2738 kHz, 24 hours a day. Also SSB 8281.2 kHz.

TUGS: Not available.

BERTHING: The Bauxite Berth is about 1,500 ft. long, and has a fixed loading arm with an average loading rate of 500 t.p.h. The airdraft is 36 ft.

There is a strong ebb current of about 4–5 knots, although the flood runs at about 3 knots.

MEDICAL: Hospital at Georgetown.

DENSITY: 1000, fresh water.

FRESH WATER: Can be supplied.

FUEL: Can be supplied.

OPENING/CLOSING HATCHES: By ship's crew.

CUSTOMS ALLOWANCES: Up to 200 cigarettes and 1 bottle wine or spirits per man. Only 40 cigarettes may be taken ashore at any time.

CONSULS/REPAIRS: At Georgetown.

AUTHORITY: Transport and Harbours Department, Battery Road, Kingston, Georgetown. *Tel:* 02-59350. *Cables:* Transport Guyana. *Contact:* Captain I. N. Roman, Harbour Master.

Guyane (French Guyana)

DEGRAD-DES-CANNES (Main Port): 04.51 N. 52.16 W.
LE LARIVOT (Secondary Port): 04.54 N. 52.22 W.
CAYENNE (Secondary Port): 04.56 N. 52.20 W.
KOUROU (Secondary Port): 05.09 N. 52.40 W.
SAINT LAURENT-DU-MARONI (Secondary Port): 05.30 N. 54.02 W.

LOCATION: Degrad-des-Cannes – 15 km. from Cayenne.
Le Larivot – 10 km. from Cayenne.
Kourou – 60 km. from Cayenne.
Saint-Laurent-du-Maroni – 250 km. from Cayenne.

PILOTAGE: Notice of ETA and request for a Pilot no less than 24 hours before ETA at Degrad-des-Cannes Channel Buoy and 48 hours for Saint-Laurent and Kourou.

Station de Pilotage de Guyane, Port du Degrad-des-Cannes, 97300 – Remire. Tel: 31.37.23.

ANCHORAGES:
1. At Sea Buoy at Cayenne.
2. At Sea Buoy at Degrad-des-Cannes.
3. At Salut Island (Iles du Salut).

RESTRICTIONS: Permanent dredging underway. Recommended that vessels approach at high tide.

Depth of water in channels:
Cayenne-Larivot (10 km.): 0.90 m. + height of tide.
Degrad-des-Cannes (15 km.): 2.50 m. + height of tide.

HEALTH: French Regulations apply.
RADIO: Cayenne Radio.
VHF: Harbour Master and Pilot Station on Channel 16.
BERTHING: Berth at Degrad-des-Cannes on the Mahury River, length of concrete wharf is 300 m., max. LOA 160 m. Roll-on/Roll-off facilities available. Discharge of general cargo and containers by ship's gear.
TANKERS: *Degrad-des-Cannes:* Steel wharf with dolphins. Min. LOA 80 m. Max. LOA 130 m.
Le Larivot: Concrete wharf. Max. LOA 100 m. Depth 4.9 m.
FRESH WATER: Available.
FUEL: By road tanker.
REPAIRS: Limited facilities available.
REPATRIATION: Rochambeau Airport. Connecting flights to France, Suriname and Brazil.
TIME: GMT minus 3 hours.
POLICE/AMBULANCE/FIRE: Contact Harbour Office at Degrad-des-Cannes.
GENERAL: Customs and Frontier Police at Degrad-des-Cannes.
DEVELOPMENTS: New berth under construction at Degrad-des-Cannes (length 130 m.).
AUTHORITY: *Port Director:* M. le Directeur, Departemental de l'Equipement, 40 Avenue Leopold Heder, B.P. 338, 97305 – Cayenne, Cedex.

Haiti

GENERAL

REQUIREMENTS CONCERNING DOCUMENTARY REQUIREMENTS PRIOR TO ARRIVAL:

Advice of Arrival: The arrival of the vessel must be announced 48 hours in advance, and in writing, to the Port Captaincy and to the Port Authority, with indication of the vessel's characteristics, the cargo which will be discharged and loaded, and requirements concerning supply of water, etc.

Information Concerning Cargo Intended for the Port: The Agency must receive in good time by air mail 6 copies of the Cargo Manifest and 2 copies of the Bills of Lading. In the event that it is not possible to supply these documents by mail, the information must be provided by telex to the Agency so that the latter may draw them up.

The Cargo Manifests are distributed to the Port Authority, the Haiti Terminal (private concern handling cargo consolidation), to the Ministry of Commerce, the Ministry of Finances and to the Agency.

REQUIREMENTS RELATING TO THE RECEIPT OF THE VESSEL:

Reception Commission: The vessel is received by representatives of the Port Health, Immigration, Customs, International Police, National Port Authority and the Agency.

Documentation Required: On the arrival of the vessel, the following documents are required, OEA/ALALC, IMO and certain other documents being acceptable.

	No of Copies and Distribution					
Type of Document	*Health*	*Immigration*	*Customs*	*Police*	*NPA*	*Agency (a)*
General Declaration	–	–	1	–	1	1
Cargo Manifest (b)	–	–	–	–	1	–
Crew List	1	1	3	1	–	1
List of Passengers	–	1	2	–	–	–
List of Stores	–	–	2	–	–	–
Declaration of Crew Effects	–	–	2	–	–	–
Maritime Health Declaration	1	–	–	–	–	–
Mail List	–	–	–	–	–	1
Arms and Ammunition Manifest	–	–	1	1	–	1

(a) The Agency requires additional copies of the Crew List, the Passenger List, the Stores List, the Arms and Ammunition Manifest, etc., dependent upon the destination of the vessel, in accordance with the requirements of Consular Clearance.

(b) Required in the event that the manifest has been received, or information regarding the cargo, in advance of the arrival of the vessel; if not, the agency requires 4 or 6 copies for distribution amongst the different authorities.

REQUIREMENTS CONCERNING DOCUMENTATION ON SAILING:

Documentation on Sailing: At the request of the Agency, the Customs issue a clearance with which permission to sail is applied for from the Port Captaincy. The latter's permit is used for requesting the services of the Pilot from the National Port Administration.

An Outgoing Manifest is presented to Customs which also contains a sworn statement (sworn statement of the Master of a vessel with cargo, or sworn statement of the Master of a vessel in ballast), and the List of Passengers. If the vessel is sailing with cargo, it is presented in 6 copies; if in ballast, in 4 copies.

CONSULAR INTERVENTION:

Consular Documentation: In accordance with the 1963 Customs Code, Article 119, the Master of a vessel loading cargo for Haiti, or his representative, must sign before the Consul a Declaration sworn as to the truthfulness of the manifest. This article is transcribed as follows:

Quote:

Article 119, *Oath.* Masters of vessels or their representative, at the time of having their manifests visaed, shall give the following oath which shall be transcribed by the Consul at the bottom of the manifest: I swear that this manifest contains exactly the packages shipped on board my vessel, that the quantities are in agreement with those shown on the Bills of Lading. I declare that I will accept all penalties which I may incur for offence against the Customs Law. I give my hand hereto.

Unquote.

In general, Consular Clearance has to be obtained at each port from the first at which cargo is loaded for Haiti. For this purpose, the Consul requires 6 copies of each of the following documents:

General Declaration.
Cargo Manifests or In Ballast.
Crew List.
List of Passengers or Negative.
Stores List.

The Consul returns 3 copies of the documents, which must go with the vessel, and 6 envelopes, i.e. 1 for each of the following Authorities:

General Customs Administration.
Director of Customs.
Department of Commerce.
Fiscal Department.
Finance Department.
Customs Collector.

The 6 envelopes are not always received, and at times only 2 copies of the visaed documents are given back. The Authorities apply a certain tolerance when it is established that the Consular Fees have been paid at the Consulate or at destination.

CAP HAITIEN: 19.46 N. 72.12 W. (See Plan)

GENERAL: For all general information refer to "Port-au-Prince".

APPROACHES: The current is about 3 knots in the entrance to the port when the river is in flood.

ANCHORAGE: Vessels which are unable to moor alongside because of deeper draft are anchored off the wharf.

BERTHING: The wharf at Cap Haitien was constructed by the Compania Industrial Maritima. The construction is in reinforced concrete. It extends for a length of 900 ft. in an Easterly direction and comprises 3 sections. The most important section is 600 ft. long and has berths for deep sea vessels on the South side in depths of 30 ft. The Western section, nearest the shore, is 300 ft. long with variable depths of 7 ft. to 9 ft. alongside, with berths for motor vessels of small tonnage and sailing ships. The central section accommodates the Customs offices. 2 metal warehouses border the East and West ends of the wharf. Between the warehouses is 1 fixed crane of 30 tons capacity.

FRESH WATER: Fresh water is available at Cap Haitien.

FUEL: Available, only in drums.

DEVELOPMENTS: Ro/Ro Berth length 100 m., under construction. Main pier length 250 m., under construction. Cruise ship pier length 170 m., to be constructed.

REPORT: December 1984.

Documents: See "Port-au-Prince".

Approaches: New lighthouse on Pte. Pinolet seen at 30 miles.

Pilotage: Pilots boarded in Lat. 19° 48.8′ N., Long. 72° 10.9′ W. Pilots board from small launch, approx. 5 m. long, with grey hull and yellow decking. The words "Pilote No. 1" painted in black on either side of white housing.

2 Pilots boarded – Senior Pilot/Port Captain: Eugene Magloire.

Restrictions: Channel very well marked – new beacons in positions as shown on "Plan". Least depth encountered in channel 10 m.

Radio: ETA telex sent via satellite to Agents. No radio station available.

VHF: Called pilot station on VHF Channel 16, 2 hours and 1 hour prior to arrival, but received no reply. Shortly before arrival at pilot boarding point, pilot station advised, on Channel 16, that pilot boat was coming out to our vessel.

Tugs: None. Small mooring boat takes heaving lines only ashore.

Berthing: Our vessel, 200 m. long, berthed at the Passenger Berth after swinging to starboard in the basin off the berth (depth 11 m.).

The berth is well fendered (Kleber fenders). Apart from main access to berth, there is also a footbridge for passengers.

Port has recently been reconstructed with modern berthing facilities, adequate mooring points, lighting, warehousing, open storage, etc.

Cargo Handling Equipment: Observed 1 conveyor, no cranes in evidence.

Regulations: Not permitted to take fruit ashore.

Authority: Autorite Portuaire National.

MIRAGOANE: 18.25 N. 73.04 W. (See Plan)

GENERAL: For all general information refer to "Port-au-Prince".

BERTHING: The facilities at Miragoane are 1 small jetty for loading and discharging general cargo with a max. depth alongside of 18 ft.

There is a wharf for loading bauxite, belonging to the Reynolds Company, with a depth alongside of 34 ft. Total annual export about 350,000 tons.

PORT-AU-PRINCE: 18.33 N. 72.21 W. (See Plan)

Also see "General" before first port.

DOCUMENTS:

Shipmasters Report: October 1982.

Clearance from Last Port.
6 Crew Lists.
3 Nil Passenger Lists.
3 Provisions/Stores Lists.
3 Crew Personnel Effects Lists.
2 Ports of Call Lists.
1 Vaccination/Inoculation List.

PILOTAGE: Pilotage is compulsory for all movements of ships in the port. The Pilot boards to the West of the Fairway Buoy and is accompanied by port officials, i.e. Port Doctor and Representatives of Immigration, Police and Customs. These officials insist on using the accommodation ladder to board the vessel. Masters must arrange with their respective Agents the time which they will require a Pilot to leave the port. If they are ready to depart before the hour arranged they may call the Pilot by 3 blasts of the ship's whistle.

Berthing from 0530 hrs. – 2100 hrs. except Sundays and holidays.

APPROACHES: The Port of Port-au-Prince is situated at the extreme S.E. of the bay. It can be approached from the North and from the South by 2 channels.

One may approach from the N.E. by the Saint-Marc channel or from the West by the Gonave channel, between Trou-Forban Point and the village of Ca-Ira. The bay extends between Trou-Forban Point in the North and the village of Ca-Ira about 20 miles to the South. The position of Ca-Ira is 18° 32′ N., 72° 39′ W. From Ca-Ira the South coast of the bay extends about 2 miles N.E. and about 12 miles East to Pointe Lamentin.

ANCHORAGE: Vessels must anchor to the West of the large red buoy No. 29 or at the quarantine buoy, situated about 1.5 mile N.N.W. of buoy No. 29. A bottom of sand over coral is to be found all over this region in depths of 10 to 18 fathoms.

Vessels may anchor or depart at any hour of the day or night.

In order to facilitate the rapid movement of vessels, these are normally anchored in order of arrival.

WEATHER: The Bay of Port-au-Prince is nearly always calm except at certain times of the year; for example, during the months from May to November, occasional strong winds may interrupt normal loading and discharging movements.

A light breeze from the East or N.E. blows after dawn, but in the afternoon a breeze 3 times stronger blows in the opposite direction.

The height of the tide is only 1.5 ft. Currents in the port are almost negligible, except that, when mooring or unmooring a vessel, one should pay attention to a Northerly current of about a quarter of a knot.

RADIO: All deep-sea vessels which enter the territorial waters of Haiti are obliged to advise the Port Radio Station.

The radio station is situated at the Bureau de Port. It is in operation 24 hours a day.

Visual light signalling may also be carried out as far as it is possible to do this.

The following apparatus is used at the radio station:

1. VHF Radio – Channels 6, 12, 16 and 18.
2. Medium frequency, SSB compatible frequencies 2182 kHz, 2738 kHz. Power 150 watts, range about 250 miles.

In addition to the VHF Channels, the Pilots may use radio-telephone on the following frequencies: 2182 and 2738 kHz.

The general call and distress frequency 2182 kHz is monitored continuously.

All messages addressed to the Port Authorities and messages concerning pilotage must be handled at this radio station.

Masters are particularly required to give the radio station, as soon as they arrive, the following information:

Vessel's draft and net tonnage, amount of cargo for discharge by hatch, number of gangs required.

The telephone number of the radio station is 2 – 3235.

48 hour ETA message to APN also to include details of the vessel, expected time of departure, quantity and nature of cargo to be handled.

TUGS: The port has at present a tug of 2,000 h.p. available at all times. The tug is compulsory for ship from 1,000 tons gross and upwards. At all times 2 aluminium launches, each 30 ft. long, are available for Pilot's use.

BERTHING: The New Port facilities are presently in service, located 600 ft. North of and parallel to the existing pier.

Prime features of new facilities are:

Length of berthing space: 1,400 ft.
Width of apron 93 ft.
Container crane on rails on the apron with 30 tons capacity equipped to handle 20 ft., 35 ft. and 40 ft. containers.
Ro/Ro platform.
Depth alongside 32 ft. MLW.

Finger Pier: Length 1,250 ft., width 60 ft. Ro/Ro platform on North side. On the South side there is 1,250 ft. of berthing space, depth 25 ft. – 30 ft. On the North side there is 540 ft. of berthing space, depth 32 ft.

At the outer end of the finger pier there is a dolphin berth for passenger vessel. Length 888 ft., depth alongside 32 ft. Vessels may berth on both sides.

There is an angular portion of 100 ft. between Quays No. 1 and 2 which may not be used for mooring, but which the bow of the ship may overhang. Vessels must be secured by at least 2 mooring cables at the bow and at the stern.

The Port Authorities require for vessels manoeuvring in the port a minimum of 2 ft. of water under the keel. This regulation may be modified by special authorisation of the Chef de Port.

In addition to the public pier, there are 5 jetties belonging to private companies used for handling products in bulk. These jetties belong to the following companies:

A. La Hasco, sugar refinery established at Port-au-Prince.
B. La Minoterie, flour mill situated at Laffiteau.
C. Le Ciment d'Haiti SA, cement factory situated at Fonds Mombin.
D. Jean Ackmed, fuel installation situated at Simonette.

The above jetties are established on the North side of the bay.

E. Installations of Shell Company and Tropigas on the South side of the bay, equipped with their own mooring buoys for tankers.

CARGO HANDLING: For vessels loading and discharging at the public pier, cargo is transported on railway trucks of 25 tons max. capacity.

1 quay is equipped for container ships. 1 quay is equipped to handle Roll-on/Roll-off traffic.

STEVEDORES: Loading and discharging of ships is carried out by gangs of private workers who are engaged by the ship's Agents under the supervision of a chief stevedore. The working gangs use the ship's own equipment for loading and discharge.

Handling rates are normally about 15 t.p.h. for general cargo, or about 25 t.p.h. for heavy articles, such as drums, planks, bundles of steel rods, etc.

Normal working hours in the port are from 0700 hrs. to 1900 hrs. from Monday through Saturday. Overtime is payable for work required at other than these hours and also for work required on Sundays and holidays.

FRESH WATER: Drinking water is available alongside; however, the ship must provide its own connections. Rate of loading varies from 4 t.p.h. to 10 t.p.h.

FUEL: There is no service for coal bunkers. Fuel oil may be supplied by tanker truck.

REPAIRS: There are no proper facilities for ship's repairs although minor repairs may be effected by small private workshops ashore.

AIRPORT: An international airport for jet planes connects Haiti with principle U.S. and Caribbean points. A local air service connects Port-au-Prince with principal towns of the Republic.

MEDICAL: There are adequate medical facilities, pharmacies and hospitals.

FIRE-FIGHTING EQUIPMENT: The Port Authority has a fire fighting squad equipped for early assistance. There is a town fire service organised by the Army and working in close cooperation with the Port.

HOLIDAYS: *Legal Holidays:*

Independence Day (1st and 2nd January); Labour Day (1st May); Flag Day (18th May); Ascension Day; Assumption (15th August); All Saints (1st November); Commemoration Day (13th November); Discovery of Haiti (5th December).

Authorised Holidays:

Lundi-Gras (half-day); Mardi-Gras; Good Thursday; Good Friday; Pan-American Day (14th April); President's Day (22nd June); Dessaline's Anniversary (17th October); United Nations Day (24th October); Fete des Morts (2nd November).

SERVICES: Fresh provisions are obtainable locally.

There are no facilities for refuse collection, but nevertheless it is forbidden to throw refuse, cinders or any other polluting material overboard.

Launches used for the transport of tourists are available at Port-au-Prince and these are operated by private companies. The Port Authority does not take an active part in the traffic of tourist passengers. Those who disembark on the wharf from cargo vessels or cruising liners must make their way on foot to the taxi station to take part in excursion tours. However, the majority of tourists coming on passenger liners anchored in the roads disembark by launches belonging to the Department of Tourism. They disembark at the Quai Colomb, which is under the authority of the Department of Tourism.

SHIPMASTER'S REPORT: 1975.

Documents:

Clearance from last port.
4 Crew Lists.
4 Passenger Lists.
2 Cargo Manifests.
18 Cargo Check lists.
International Declaration of Health.
Vaccination/Inoculation List (1) with valid dates.
International Vaccination Cards, these may be examined by Port Health.

Pilotage: Compulsory, 24 hour service arriving/departing. Require ETA to Agent 24 hours in advance. Pilot Station may be contacted on voice radio 2182 kHz, 2738 kHz and VHF Channels 16 and 12. Pilots board at quarantine anchorage buoy. Pilot boat has yellow hull and superstructure, 2 ft. freeboard. "Pilot" clearly painted on hull.

Anchorages: The harbour affords good anchorage in depths of 5 to 14 fathoms, clear of the entrance ranges southward. The Quarantine Anchorage is located about 2.5 miles East-northeastward of Pointe Lamintin.

Restrictions: See Sailing Directions for Prohibited Anchorages.

Max. Size: This ship is 495 ft. in length, with 69 ft. beam, we were accommodated easily. Passengers ships of 620 ft. in length are regular callers at the port. Maximum depths at the pier is 30 ft. Mean High Water Interval at the port is 8 hours 23 minutes. Spring tides rise 1.5 ft. Currents in the approach set East in the Canal de la Gonave, and Northwest in the Canal de Saint Marc. All buoys, lights, and navigation aids are unreliable.

Health: Pratique is now granted at the dock. Ship displays "Q" flag until cleared.

Radio: ETAs to Agents/receivers are best sent through WNU (Tropical Radio) at New Orleans, Louisiana or ITT station at Lantana, Florida, these stations then telex direct. Port Pilots will relay messages to Agents on voice radio 2738 kHz. Short range reception on voice radio has been experienced.

Berthing: Main pier, has 1,700 ft. of berthing space on its Southern side with depths of 18 ft. to 29.5 ft. Ship's always berth port side to, using the starboard anchor to assist in docking and undocking. A T-head pier with a pipe-line is located 2 miles Westward of the city. Mooring buoys lie off the end of this pier. It has been reported, (unverified) that this pier accommodated a tanker 560 ft. long, with a draft of 31.5 ft. in 1957.

Stevedores: Advise Agent tons per hatch at least 24 hours prior to arrival. Maximum amount of labour is available. Rate of discharging/loading is approximately 18 to 30 tons per gang hour on sacks, bales, cases, general cargo. Work after midnight is overtime with charges quite high.

Medical: Give Agent prior notice for any required medical attention. 3 hospitals available. Minor dental work can be accomplished. International Certificates with Cholera are required.

Density: 1025 as per this ship's test.

Fresh Water: None available at this time.

Fuel: None available at this time.

Developments: A 25 million dollar port expansion and construction project commenced October 1975. This new area is located 800 ft. North of the general cargo pier. From the shore in a Westerly direction the new pier shall extend 1,685 ft. in length, 469 ft. in width, with a working apron on the South side 81 ft. from the end of the ship's side. The pier will contain 2 warehouses; one 207 ft. by 1,101 ft., and the other 180 ft. by 447 ft. The Eastern end shall have 2 separate Roll-on/Roll-off sections. A container crane on rails shall traverse the entire South side working apron, capable of loads not to exceed 30 long tons. Dredging and filling has commenced and they are working towards a 30 ft. maximum depth at completion.

Gangway/Deck Watchmen: Cost unknown, supplied by Agent. Gangway watchman is recommended. If transit cargo is pilferable, I recommend using crew members for cargo hold security.

Hatches: (Automatic hatches) opening/closing normally carried out by stevedores with crew member supervision.

Customs Allowances: Bonded stores were not sealed, store lists were not required. Ship allowed each crew member 200 cigarettes. Local Customs Officials make no special requirements.
Cargo Gear: All loading/discharging by ship's gear. Fork lifts are available. There is a shortage of pallets and railroad flat cars which are used to accept cargo direct from the ship's gear on the dock. Warehouse space is limited.
Identification Cards: Shore passes not required, none issued by local authorities.
Consuls: United States of America; Panama; Lebanon; Taiwan; France.
Repairs: No facilities available.
Dry Docks: None available.
Repatriation: Possible.
Airport: 1 major airport. Located 40 minutes from the port area. Daily flights to North America. (Miami and New York)
Time: GMT plus 5 hours. No alterations to clocks during the year.
Holidays: December 5th (Columbus Exploration Day), Christmas, New Year's Eve, New Year's Day. Cargo work can be arranged on most holidays at overtime rates.
Police/Ambulance/Fire: Utilise Agent for emergencies of this type, or have watchman make use of telephone from dock. "Fire". There are no international hose fittings on the dock, and limited means of handling shipboard fires from ashore.
Telephones: None available for placement on board the ship.
Services: Special services non-existent.
Shore Leave: Crew members are allowed ashore. No curfews, no passes required.
Port Regulations: Nothing unusual or out of the ordinary.
Delays: Possible berthing delays exist due to ship congestion. Delays in discharging may occur due to lack of warehouse space, pallets, or rail cars.
Agents: Agents and most officials including watchmen and stevedore supervisors speak English. All official documents and ship's clearance papers are written in French. The language spoken is predominately French (patois) with inflections that are easy on the ears, but difficult to utilise operationally.

AUTHORITY: Autorite Portuaire Nationale, Port de Port-au-Prince, B.P. 616, Port-au-Prince, Haiti.

NOTES

Please also advise Shipping Guides Ltd.

Honduras

GENERAL

DOCUMENTS:

Consular Documents:

Masters shall submit for certification to the Honduran Consul or Consular Agent residing in the port of loading 4 copies of the general manifest of goods carried for the Honduran port to which it is bound. 3 copies are to be left with the Consul or Agent, and 1 copy, with the certification and receipt to be provided by the Honduran official, is to be retained. The Consul will retain 1 copy in his files, the other 2 shall be sent by the earliest mail to the Secretariat of the Treasury and the Customs Administrator.

Prior to arrival:

Arrival notice:

The Chief of Operations of the National Port Authority (ENP) must be notified in writing no more than 24 hours and no less than 8 hours in advance, of the time and date of the vessel's arrival. This notice is received on working days up to 1600 hrs., but for holidays, the request must be submitted the day before up to 1100 hrs.

The Captain of the Port, Customs, Migration and Maritime Health must be notified of the arrival within the same period indicated above.

Information on cargo for the port:

If available, the following documents must be submitted: 4 copies of the cargo manifest, a set of bills of lading, 3 copies of the cargo list, 3 copies of the container contents list, and information on the cargo to be loaded. In addition, the following copies of the cargo index must be provided, according to the type of goods: 4 to 6 for Customs, 14 to 18 for the National Port Authority; 1 for each depot of the agency to take part, and 1 for general control.

The ENP also allows this information to be submitted after the official visit (boarding party).

Port services request:

The arrival notice submitted to the ENP also serves as a request for pilotage, docking and port services.

On arrival:

Type of Documents	*Number and Distribution of Documents*					
Basic Forms	*Port Captain*	*Customs*	*Migration*	*Maritime Health*	*Agriculture Inspection*	*Total*

Crew List (b)	–	1	–	–	–	1
Passenger List (b)	–	1	–	–	–	1
Ship's Stores List (b)	–	1	–	–	–	1

a. Submitted to the shipping Agent.
b. With Consular visa.

Prior to departure:

Clearance must be requested from the Captain of the Port, on a special form at least 2 hours before the vessel's estimated time of departure. The form must be cleared by the Customs Chief of Exports and the Customs Administrator, therefore copies of the export cargo manifest must be submitted to Customs.

In the case of the terminals of Puerto Cortes, 30 copies of all documents are prepared, of which the vessel carries (aside from the original sailing permit and the maritime health declaration) an original and 24 copies of the cargo manifest (or ballast manifest), the crew list, passenger list, the mail and firearms list, the ship's stores list, and 2 sets of the bills of lading.

In addition, when the ship sets sail, 3 freighted cargo manifests, 2 sets of the bills of lading, a crew list, a passenger list, a mail and firearms list, and a ship's stores list must be submitted to the Chief of Docks. A copy of each of the following documents must be submitted to the Maritime Guard: sailing permit, cargo manifest, crew list, mail and firearms list, and ship's stores list.

When the ship leaves for Guatemala, it should have 34 copies of all documents, because 4 copies are submitted to the Consul.

For ships leaving for the United States, the clearance document is in Spanish, with 6 copies to be distributed locally, plus 18 copies of the cargo manifest, in English, of which 16 are carried on board ship, 1 copy is sent to San Pedro Sula and the other remains in possession of the shipping agency.

Request for pilotage:

Requests for pilotage and unberthing of the vessel are submitted to the National Port Authority at least 2 hours before clearance.

AMAPALA: 13.18 N. 87.39 W.

PORT NO LONGER IN OPERATION.
COMMERCIAL OPERATIONS AT THIS PORT HAVE BEEN TRANSFERRED TO THE NEW PORT OF SAN LORENZO

LA CEIBA: 15.46 N. 86.50 W.

SHIPMASTER'S REPORT: 1979.

DOCUMENTS:

10 copies of Crew List
6 copies of Store List
6 copies of Bonded Stores List
4 copies of Vaccination List
Mail Report
Passenger Report
1 Copy of Derat Certificate.
Zarpe/Clearance from previous port.
14 Copies Cargo Manifest/Ballast Manifest.
3 Copies Bills of Lading.

All the original documents must be legalised by Honduran Consul at the port before calling at Honduras, and should be in Spanish language. If no Consul available, documents should be legalised by Consul of friendly nation or by Chamber of Commerce, stating the facts.

PILOTAGE: Compulsory. Pilot boards 0.5 miles from the pier. 2 hours notice required.

ANCHORAGE: Good anchorage 5 cables, 129° from pier, depth of water 40 ft.

RESTRICTIONS: Vessels able to berth and unberth at any stage of the tide day or night. Limiting factors are length and forward draft of vessel.

MAX. SIZE: Max. LOA 600 ft. However, the after end of the vessel would overhang end of berth (This vessel loaded to 23 ft. draft).

HEALTH: Quarantine Officials operate between 0600 hrs. and 1800 hrs. 2 hours notice of arrival required.

RADIO: HRW – Standard Fruit operate from their own radio station. They handle vessel's traffic on 6350.5, 8560 and 12750 kHz. They also listen on 500 kHz and 8 MHz.

Hours of Operation: (GMT) 1355 – 1410, 1455 – 1510, 1555 – 1610, 1955 – 2010, 2055 – 2110 and 2355 – 0010.

VHF: The Agent is on Channel 16.

TUGS: Not available. Vessel is able to dock and undock without assistance of tugs.

BERTHING: Berth available both sides of finger type pier, South side berth for side-door loading; North side for unrestricted operations. Nature of the bottom of the berth is sand.

Mooring gang (6 men) come aboard with the Pilot to assist. The bananas are loaded direct from the rail cars using spiral elevators. It is usual to load all decks at the same time.

There are no facilities for handling bulk cargoes or Ro/Ro vessels. There are no shore cranes or floating cranes. There is no storage space for breakbulk cargo or palletised cargo.

Fendering: Pier fendered with the usual Standard Fruit type fendering, vertical uprights on a horizontal "V" bellows on horizontal girders.

CHARTS: B.A. Chart No. 513 (Isla Roatan to Puerto Cortes) and U.S.G. 5393 (positions on this chart are 2.5 miles W.S.W. of B.A. chart).

CONSULS: None, however, American Consulate and those of other nations in Tegucigalpa, about 250 miles by road.

SURVEYORS: Lloyd's Agency in Puerto Cortes.

AIRPORT: International Airport "Goloson" with service daily to New Orleans and Miami, served by regular airlines.

SERVICES: Fresh water, fresh provisions, airport, telex, doctor, hospital, groceries and meats all available.

Labour: Shore labour is available for contract work such as scavenge cleaning, hull painting, etc. The work carried out during our stay was satisfactory and the rate for the foreman was US $1.50 per hour and workmen US $1.00 per hour.

GENERAL: *Labour:* Foreman US$3.50, workman US$1.50 per hour.

AUTHORITY: Empresa Nacional Portuaria, Apartado Postal No. 215, La Ceiba, Honduras, Central America. *Tel:* 42-2712 (Superintendent), 42-0297, 42-0394, 42-0397, 42-2044. *Telex:* 8007 Enaporto Ho. *Cables:* Enportuaria. *Contact:* Roberto Dip H., Port Superintendent.

AGENT: Hondutours, Maritima y Transportes, Honduras, S.A., Edificio Comercial Maya, Tegucigalpa, Honduras. Tel: 32-16-57, 32-89-26, 32-89-30. Telex: 1251 Marhond Ho. Cables: Matra, Tegucigalpa.

Mailing Address: P.O.Box T-134, Tegucigalpa, Honduras.

PUERTO CASTILLA: 16.00 N. 85.58 W. (See Plan)

DOCUMENTS:

2 copies Health Declaration.
Zarpe or Clearance from Last Port.
14 copies General Cargo Manifest of all cargo to be discharged in Puerto Castilla or Ballast Manifest.
10 copies Crew List.
10 copies Passenger/Negative Passenger List.
Derat Certificate, only if first call.
10 copies Stores List.
Mail Declaration (negative or positive).
3 complete sets Bills of Lading.
5 copies Hatch List.
15 copies Tally Books (prepared generally by Agent).

All original documents must be legalised by Honduras Consul at port before calling at Honduras, and must be in Spanish language.

If no Consul of Honduras available within 50 miles radius of port, documents can be legalised by statement from local Chamber of Commerce, stating the facts.

PILOTAGE: Not available, but vessel able to dock without such assistance.

ANCHORAGES: Once the vessel enters the bay, if no berth is available, she should anchor at a distance of between 0.5 mile – 1 mile from pier, and await boarding party in order to be granted Free Pratique.

RESTRICTIONS: Vessels may enter the port day or night, but are generally not visited by Authorities between 2000 hrs. and 0600 hrs., except in very special cases. Owing to remoteness of the port, Authorities have to be collected by Agent from villages within 30 miles radius of port.
MAX. SIZE: Vessels with draft up to 36 ft. can safely enter port and moor alongside pier.
HEALTH: Pratique granted after Port Authorities (including doctor) board vessel, between 0600 hrs. and 2000 hrs. Pratique granted if no contagious illnesses on board, otherwise quarantine restrictions imposed. No automatic Pratique when arriving from another Honduran port.
RADIO: Lantana Radio WOE, New Orleans Radio WNU, Limon Radio TIM, Balboa Radio NBA, Miami Radio WAX, messages routed via telegraph station Hondutel in nearby Trujillo, but not considered reliable.

Ship's radio not to be used in port except for communications with Port Authority. Vessel is fined if there is a violation.
VHF: Use Puerto Cortes Radio: Call Sign 'Cortes Radio', Channel 16, if Castilla Radio does not respond (Hours see "Puerto Cortes").
TUGS: None, not required.
BERTHING: The Agent and/or Port Authority to supply information as to berth, and time of docking. Departure should be effected when the despatch documents are on board and operations finished.
Pier: Made of concrete 150 m. long, width 38 m., depth 38 ft., used for all operations. Rubber/wooden fenders.

Directly adjacent to a paved area 300 m.×200 m.

Equipped with 2 open sided warehouses, each 3,000 sq.m.

Electric connections for 190 reefer containers.
CRANES: One each of 40, 50 and 70 tonnes capacity, mobile, on tyres.
TANKERS: Pipe-line for loading of African Palm Oil. A connection of 16 in. exterior diameter, 14 in. interior diameter, reducers available. Pumping rate 200 t.p.h. Storage capacity 20,000 bbls.
DENSITY: 1028/1030.
FRESH WATER: Water available at wharf, and of excellent quality, rate approximately 15 t.p.h.
FUEL: Only Diesel and Bunker "C" fuel available, 24 hours' notice required.
CONSULS: None in port. American Consulate and others in Tegucigalpa, 320 miles by road.
REPAIRS: No facilities.
SURVEYORS: Lloyd's Agency available locally.
GANGWAY/DECK WATCHMEN: Shore watchmen not usually required, and service left to the discretion of the Master.
HATCHES: On liners normally by crew with assistance of stevedores, otherwise according to C/P.
CUSTOMS ALLOWANCES: No restrictions, free use on board. Customs Officials check no sales to shore.
REPATRIATION: Facilities available for effecting repatriation in La Ceiba, by air.
AIRPORT: International airport "Goloson" in La Ceiba, 122 miles from port. Local airport connecting with La Ceiba daily, except Sundays and holidays, located in Trujillo, across the bay.
TIME: GMT minus 6 hours throughout year.
HOLIDAYS: 1st January; 14th April; 1st May; Maundy Thursday; Good Friday; Saturday at Easter; 15th September; 3rd, 12th, 21st October; 25th December. Cargo work can be arranged on those days, except Good Friday, and 1st May.
TELEPHONES: No telephones available in the area. Cable service available in Hondutel office.
SHORE LEAVE: Permitted without restrictions.
IDENTIFICATION CARDS: Must be shown to gate watchmen, when crew members come back on board, and are supplied by Agents.
CERTIFICATES: On first call, Registered Tonnage Certificate.
AUTHORITY: Empresa Nacional Portuaria (E.N.P.), Puerto Castilla.
AGENT: Maritima Y Transportes, S.A./Intermodal, S.A., Edificio Banco Atlantida, Suite No. 1101 – 1103, San Pedro Sula, Honduras. Tel: 51-17-73, 53-32-51, 52-25-11. Telex: 5634 Marhond Ho. Cables: Matra, San Pedro Sula.

Mailing Address: P.O.Box 991, San Pedro Sula, Honduras.

PUERTO CORTES: 15.50 N. 87.55 W. (See Plan)

DOCUMENTS:

Health Declaration, 2 copies.
Zarpe or Clearance Permit from the Last Port.
General Cargo Manifest (in ballast if that is the case) of all the cargo to be discharged in Puerto Cortes, 14 copies.
Crew List, 10 copies.
Passengers in transit, or no passenger declaration, 10 copies.
Derat Certificate, only if first on board call.
Stores List, 8 copies.
Mail Sacks declaration (negative or positive).
Bills of Lading, 3 complete sets.
Hatch list, 5 copies.
Tally Books, 15 copies.

All the original documents must be signed and stamped by the Honduran Consul at the port before calling Honduras and should be made out in Spanish. Documents for cargo destined to any Honduras Free Zones need not be signed by Honduras Consul.

If no consul of Honduras available, documents to be legalised by consul of a friendly nation or by the Chamber of Commerce, stating the facts.
PILOTAGE: Compulsory for vessels over 300 g.r.t. ETA to the Agent, 72, 48 and 24 hours ahead of arrival required. Pilot on VHF Channels 16 and 6.
ANCHORAGES: Once the ship enters the bay, *if no berth space has been notified to the Master,* she should anchor at a distance beyond 0.5 miles from the nearest pier, and wait for the boarding of the official party in order to be granted Free Pratique.
APPROACHES: *Shipowner's Report:* 1983.

Tankers should make their arrival at a position near Lat. 15° 55′ N. and Long. 87° 58′ W., 4 miles North of Punta Caballos and well offshore of the shoal patches near the point. From this position true course 180° takes the ship into the bay in a minimum depth of 10.6 m. (35 ft.) West of the tanker dock and between 2 shallow patches of 8.1 m. (27 ft.) 700 yards and 450 yards W.S.W. of the tanker dock. There are 2 sets of daymarks and 2 buoys marking this approach.

Vessels may also enter the bay about 2 miles off the coast of Punta Omoa. Steer E.N.E. in the natural channel which has a minimum depth of 10.9 m. (36 ft.). 3 buoys mark this channel.

Caution: The above mentioned navigational aids are not all indicated on the charts, and are not reliable. No attempt should be made to enter the bay without a Pilot.

Work is in progress; buoyage and the shape of the coast may have changed. The West entrance will become the main deep water channel when dredging is complete and when leading lights, buoys, and beacons have been installed. An extensive reclaimed land area extends to the North from the mouth of the Rio Medina. The city wharves are being extended West.

The distance from the sea buoy to the Texaco dock is about 4.5 miles. The city wharves are 0.5 miles further to the East. The Texaco refinery tanks, the water tank near Pier 4, the railroad shop, and the Coast Guard Pier are conspicuous in daytime.

The molasses berth of wooden construction throughout, is made of a trestle walkway/pipe run ending in a small hose handling platform. 2 breasting dolphins, spaced about 250 ft. are fendered with truck tyres. Mooring ropes are sent to pipe bollards on the beach and to a mooring dolphin adjacent to the Texaco berth. The spring lines go to the breasting dolphins. 1 tug is normally used for berthing.
RESTRICTIONS: Vessels may enter the port day or night but are not visited by Port Authorities between 2000 hrs. to 0600 hrs., except in special cases.
MAX. SIZE: Dry cargo vessels up to 30 ft. draft. Tankers up to 30 ft. draft.
HEALTH: Pratique granted after Port Authorities (including doctor) board vessel, between 0600 hrs. – 2000 hrs. Pratique granted if no contagious illnesses aboard, otherwise quarantine restrictions imposed. No automatic Free Pratique when arriving from another port in Honduras.

All crew members to be vaccinated against yellow fever. Vaccinations not available in Honduras.
RADIO: Port Authority operates a station HQSU, monitoring 2738 kHz, but by arrangement can reply on other frequencies. Telegrams to be routed via Hondutel, Lantana WOE, New Orleans WNU, Limon TIM, Balbao NBA and Miami WAX.

Ship's radio not to be used in port except for communication with the port authority. Vessel is fined if there is a violation. Also see "VHF".
VHF: Puerto Cortes Radio: Call sign "Cortes Radio". Channel 16.
Hours: Weekdays 0600–2200; Saturdays 0800–1200 and Sundays 0600 – 1200, 1300, 1700, 1800, 2200, every week except January 1st, Good Friday, May 1st and December 25th.
BERTHING: The Agent to supply information as to berth, and time of docking. Pilot will board the vessel and berth it, assisted by a launch to pass ropes. Departure should be effected when the despatch documents are on board and operations finished.

Pier No. 1 (Texaco Pier), for tankers or ships loading diesel or lub-oil; max. draft 30 ft.

Pier 1-A (molasses and bulk liquids), max. depth 32 ft. at rebuilt wooden T-Pier, in front of white and red painted tanks, between Texaco Pier and Banana Pier.

Pier No. 2 (Banana Pier) length 810 ft., depth 24 ft.

Pier No. 3 (General Cargo and Ro/Ro Pier) Length 630 ft., depth 30 ft.

Pier No. 4 (General Cargo and Ro/Ro Pier) Length 1,112 ft., depth 30 ft.

Pier No. 5 (Container Terminal, it also handles dry bulk cargo) length 1,127 ft., depth 33 ft.
CRANES: One P & H 125 ton capacity crane, one Paceco Container Crane 45 ton capacity at No. 5 pier and eight cranes of varying capacities.
BULK CARGO FACILITIES: Pier No. 5 (Container Terminal) is used as a multi-function pier, it is used to handle grain, ores, fertilisers and bulk sugar. It is large enough to be able to handle both operations simultaneously.
STEVEDORES: Vessels must give accurate ETA at least 24 hours in advance to enable Agents order necessary gangs. Gangs ordered 0700 and 2100 hrs. working 12 hours (daytime) and 9 hours (night-time) excluding the meal hours (0600–0700; 1200–1300; 1700–1800 and 2300–2330). No work on Holy Friday, May 1st (Labour Day), on other holidays work is possible with double payment.
MEDICAL: No advance notice necessary for medical attention, except in very urgent cases. At San Pedro Sula (35 miles by road) very good medical service can be obtained but several medical clinics are serving this Port. No inoculations required but Master should possess International Health Cards for each member of crew.
DENSITY: 1028/1030.
FRESH WATER: Water available at wharf face at 100 ft. intervals. Rate approximately 8 t.p.h. – 10 t.p.h.
FUEL: Only Diesel fuel and bunker "C" available, 24 hours' notice required for good service.
GANGWAY/DECK WATCHMEN: Shore watchmen not usually required and this service left to discretion of the Master.
OPENING/CLOSING HATCHES: On liners normally by crew with assistance of stevedores, otherwise according Charter Party.
CERTIFICATES: On first call, Registered Tonnage Certificate; thereafter not required unless gross/net tonnage be changed.

TANKERS: *Terminal:* The Texaco Oil Refinery dock is in the S.E. corner of the peninsula. A pipe trestle/roadway of about 100 yards leads S.S.W. to the hose platform and breasting dolphins. The mooring dolphins are about 100 ft. inshore of the hose platform. The tidal range is 0.5 ft. The current in the manoeuvring area is unpredictable. Most of the time it runs parallel to the berth (110° and 290°). The breasting dolphins have been damaged several times, reportedly due to sudden changes in current.
Berthing: Tankers are moored and unmoored during the daylight hours only. The ship may be turned anywhere South of the refinery berth, then it proceeds to the dock heading either W.N.W. when mooring starboard side to, or E.S.E. when mooring port side to. The ship is stopped, stemming the current, about 100 ft. off the dock for a parallel mooring. A launch runs the head and stern ropes to the mooring dolphins. The spring ropes are either taken to the breasting dolphins by the launch or later by hand. Anchors should be ready. When mooring starboard side to, an anchor may be used to hold the ship against an inshore set. The 1,100 h.p. tug works forward alongside on his own rope. It shifts to amidships, if needed, to push the ship in or to hold her off. Sometimes the tug works the ship's rope on the hook. Pilot and tug use VHF radio (Channels 16 and 6).

Only 5 pile bollards are available for the ship's moorings, of which 3 are for the spring lines. The breast lines may have too much angle. It is recommended that segregated ballast tanks be used to keep the tanker low in the water. It is advisable not to remain alongside during strong Northers.
Facilities: There are no set emergency shutdown procedures. Each breasting dolphin is fendered by steel beams with wooden protection and 4 rubber shock absorbers. 2×8 in. hoses are used for crude oil discharge into an 18 in. pipe-line about 1,500 ft. long to the 360,000 barrels storage tanks. The transfer rate is about 7,000 bbls.p.h. 1×8 in. hose is used for loading fuel oil via a 10 in. pipe-line at a rate of about 3,000 bbls.p.h. Ballast and slop facilities are not available. 1 floating oil spill containment boom is kept in storage at the refinery.
Security: The port area and the Texaco Pier are fenced in and guarded; crewmen must have identification cards.
Services: No. 6 fuel is available at 3,000 bbls.p.h. and light diesel oil at 1,000 bbls.p.h. Fresh water is available at 10 t.p.h. Local machine shops can perform very minor repairs. Divers are available. Hospital, medical, and dental services are available at Puerto Cortes, or at San Pedro Sula.

Crew changes can be made. Small quantities of provisions are available.
Departure: Tankers leave the Texaco Refinery berth during daylight hours. Tug assistance is seldom necessary. Usually the tanker is unberthed either holding the spring ropes forward or aft to ease the vessel off the dolphins.

The Master should consult with the Pilot as to the sailing draft.
Also see "Shipmaster's Report" – June 1981.

CUSTOMS ALLOWANCES: No restrictions, free use on board. Customs officials check no sales ashore.
IDENTIFICATION CARDS: Identification card must be shown to gate watchman when crew members come back aboard.
CONSULS: None in the port. American Consulate and others at Tegucigalpa, 200 miles by road.
REPAIRS: Local marine repair companies can undertake limited repairs of general nature; pre-advice recommended.
SURVEYORS: Lloyd's Agency available locally.
REPATRIATION: All facilities available for effecting crew changes and repatriation by sea or air.
AIRPORT: International Airport Ramon Villeda Morales at San Pedro Sula served by regular airlines. 35 miles by road.
TIME: GMT minus 6 hours, no changes during year.
HOLIDAYS: January 1st; April 14th; May 1st; Thursday, Friday and Saturday in Easter week; August 15th; September 15th; October 3rd, 12th and 21st; and December 25th. Cargo work can be arranged on those days, except on Good Friday, and May 1st (Labour Day).
TELEPHONES: Connections to all countries of the world from the Empresa Hondurena de Comunicaciones, located just outside main port gate, cable services also available.
SHORE LEAVE: Permitted without restrictions.
GENERAL: It appears that many of the stowaways discovered recently, are seafarers with a good knowledge of where to conceal themselves.

Local authorities are taking steps to restrict access to vessels by unauthorised persons, but Masters should take special precautions in this respect.

SHIPMASTER'S REPORT: September 1978.
Pilotage: Pilotage compulsory. Pilot boards 2–4 cables off the berth, advance notice of 72, 48, and 24 hours required.
Restrictions: Vessels can enter and leave at any stage of the tide day and night. Vessels are able to leave the berth in an emergency without use of Pilot if a tug available. Least depth of water in channel from sea to berth about 35 ft.
Max. Size: LOA 600 ft. Depth of water at banana berth is 33 ft. forward and 38 ft. aft. Max. draft 30 ft. There is a shoal patch about 150 ft. ahead of the berth.
Health: Authorities require 72, 48 and 24 hours notice of arrival.
Radio: Radio stations used when approaching the port were "WNU" and "TIM".
VHF: Port Authority, Pilot and Agent on Channel 16. Channel 14 also available.
Tugs: There are 2 tugs available, each 1,250 h.p. Vessels are able to dock and undock without the use of tugs.
Berthing: Banana Pier – Position 15° 50.05′ N., 87° 57.35′ W. Distance from berth to entrance 2 miles. The nature of bottom at the berth is coral, mud and sand. Prior to arrival it is an advantage to have all derricks up as various equipment has to be brought on board.

Always starboard side alongside, starboard side banana lids can be opened on all decks prior to arrival.

The banana elevators are extremely close to the quay side and usually moved to the East end of the berth for docking purposes, but as vessel is making fast they are moved into position. Leave starboard gangway turned in until alongside and elevators moved. It is a good idea to turn in overside light fittings and on no account have a starboard list. The bollards are situated on the edge of the quay. The quay is concrete with wooden face, only about 1.5 ft. above the water.

Fresh water was limited due to recent hurricane and repairs to the water line, however 100 tons was obtained.

Four elevators used for loading. Work carried out around the clock, best hatch rate 48 t.p.h.

Ro-Ro facilities available, vessel moors with 2 anchors and stern to the quay. There are facilities for handling containers. Presently the container area is being expanded.
Currency: Lempiras. Two to the U.S. Dollar. If cable sent in advance U.S. Dollars can be obtained.
Diversion: Agents request, if diverted to a Honduran port, a diversion cable must be sent to the Agents of that port giving time/date/nationality/port of departure/and ETA. (This helps Agents with the documentation).
Medical: Doctor and hospital available.
Tankers: The Texaco Pier accepts tankers with a draft of 30 ft.
Fresh Water: Available.
Fuel: Bunker fuel, diesel oil and lubrication oils available.
Density: 1025.
Repairs: Facilities available for small repairs.
Surveyors: Available.
Services: Fresh provisions, groceries, meats and laundry services available. Contract work such as deck and engine room cleaning and painting can be undertaken, however, prices of contractors should be compared.

SHIPMASTER'S REPORT: June 1981.
Berth: Texaco Refinery.
Arrival Draft: Forward 33 ft. 01 in., Aft 33 ft. 01 in.
Density: 1025.
Hoses: 1×6 in. and 2×8 in. clean products; 3×8 in. dirty products.
Pumping Distance: 4,000 ft.
No. of Berths: One.
Tidal Restrictions: None.
Bunker: Bunker "C" and diesel oil.
Bunkering Rate: 2,000 b.p.h.
Depths at LW: Bow, 33 ft.; stern, 40 ft. (by sounding).
Max. Size: LOA 700 ft., beam 90 ft., draft 33 ft.
Products Handled: Crude oil, fuel oil, diesel, kerosene.
Loading/Discharging Rate: 18,000 b.p.h.
Fresh Water: Limited supplies.
Ballast Facilities: None.
Distance from Sea to Berth: 2 miles.
Channel: Width 2,000 ft., minimum depth 35 ft.
Current: Variable/strong.
Docking/Undocking: Any time.
Tug: One required docking and undocking.
Depth Alongside: Minimum 37 ft.
Silting: Rapid.
Bottom: Sand.
Total Length of Dock: 250 ft. Condition: Good/moderate.
Chart: DMA 28000, 28160, 28162, 28163 or HON. 002 – 003.

SHIPMASTER'S REPORT: August 1981.

Entrance recommended via buoyed channel close to Punta Cabballos light which is normally unlit and has NO radio beacon. Pilot will board one mile North of channel if requested via VHF Channel 16. Large vessels are instructed by Port Authorities to anchor at least 0.75 miles from piers. One tug only is available – 900 h.p. approx.

Fresh water at banana pier strictly limited to 50 tons per vessel. Launch service available to vessels at anchor, cost $10 per trip.

AUTHORITY: Empresa Nacional Portuaria, P.O.Box 18, Puerto Cortes, Honduras C.A. *Tel:* 55-0326. *Telex:* 8007 Enaporto Ho. *Cables:* Enportuaria. *Contact:* Enrique Vitanza F., General Manager.

AGENT: Intermodal, S.A., 2a Calle, 1a. y 2a. Avenida, Puerto Cortes, Honduras. Tel: 55-03-90, 55-03-96. Telex: 8006 Inmodal Ho. Cables: Intermodal, Pto. Cortes.

Mailing address: P.O.Box 1535, San Pedro Sula, Honduras.

SAN LORENZO: 13.25 N. 87.27 W. (See Plan)

LOCATION: On the mainland of the Pacific Coast of Honduras near to the city of San Lorenzo, Valle.
PORT LIMITS: *Port Jurisdiction:* Lat. 13° 21′ 51″ N., Long. 87° 26′ 15″ W. Lat. 13° 24′ 51″ N., Long. 87° 25′ 13″ W.
Laytime: In the opinion of the Agent laytime will commence when vessel received by Port Authorities and Pratique granted. Vessel will be received when docked or at anchorage in the port (but not at pilot station).
DOCUMENTS: List of documents requested on arrival of vessels at the port of San Lorenzo (all documents must be written in Spanish and without these documents serious delay of starting operations on board vessel are foreseen).

Documents 1/2/3/4 – only from last port.

Documents 5/6/7/8/9/10/11/12/13/14 – from all ports where cargo has been loaded.

If the vessel will arrive without cargo for the port of Amapala/San Lorenzo documents as stated Ballast and Manifest (Manifiesto on Lastre) from the last port only before arrival are requested.

Leg.*=Legalized by Honduras Consul – or by consul of a friendly nation.

If there is no consul of any friendly nation, by Port Captain, BUT in this case one copy of each manifest should be sent to: Secretaria de Economia y Hacienda, Tegucigalpa, D.C. Honduras CA and to Administracion de Aduanas, Amapala, Honduras C.A. by airmail and certified.

PILOTAGE: Compulsory. Distance from sea buoy to berth – 16 nautical miles.

Pilot station for San Lorenzo is at last buoys painted black/white in position: Lat. 13° 12′ 03″ N., Long. 87° 35′ 15″ W. Pilot will board the vessel about 1.0 miles – 1.5 miles South of the Sea Buoy, after coming down the Bay from San Lorenzo for about 2 hours' cruise by pilot boat.

Pilot recommends the best arrival time at Sea Buoy to be 3 hours prior to HW.

Two hours before arrival pilot station vessel must call Agent's office at San Lorenzo via VHF Channel 10 in order to send Pilot.

Pilot boat has white and green upper works, black hull with the word "San Lorenzo" on poop. Pilot boat on VHF Channel 16.

ANCHORAGE: Buoy in position: Lat. 13° 12′ 03″ N., Long. 87° 35′ 15″ W.

RESTRICTIONS: All incoming vessels must wait at the Sea Buoy located at the entrance of the access channel, where vessels will be boarded by the Pilot.

The access channel to the Port of San Lorenzo is being provided with light buoys however, vessels may only berth/unberth during daylight hours. This is due to the tide variation and the prevailing fog in the channel at night. The seaward buoy is the pilot station. Depth of access channel at LW is 30 ft., width 122 m., and length 30 km.

MAX. SIZE: Depth alongside 32 ft. at LW. Vessels with draft 23 ft. may enter/sail at any time and vessels with draft 30 ft. – 31 ft. at HW.

HEALTH: If no disease on board reported by Master, no special procedure necessary.

The local authorities require all Crew members of vessels visiting Honduras to have valid vaccination certificates against yellow fever and cholera. Such vaccinations are not available in Honduras and Crew members should be vaccinated at a convenient port prior to calling at Honduras.

RADIO: No radio station at San Lorenzo.

VHF: A continuous watch is maintained in office hours on Channel 16, after hours and on holidays, the watch is intermittent.

All calling should be on Channel 16. Tug works on Channel 12. Intership working is on Channel 6. Agents on Channel 10.

TUGS: One tug available. Tug normally join the ship about half mile from the berth. Use of tug compulsory.

BERTHING: "T" shaped pier with 4 berthing places.

Berth No. 1: 157 m. long. Depth alongside 10.67 m.
Berth No. 2: 139 m. long. Depth alongside 10.67 m.
Berth No. 3: 116.43 m. long. Depth alongside 6.70 m. (Inner).
Berth No. 4: 134 m. long. Depth alongside 6.70 m. (Inner).

Equipment: 2 cranes capacity 30 tons and 25 tons. One additional 140 tonnes crane is planned. 10 fork lifts, 6 × 6,000 lbs.; 4 × 15,000 lbs. 4 yard trucks.

Facilities: General Cargo Warehouse: 2,408 sq.m.; Lumber Shed: 1,204 sq.m.; Piling Sugar Warehouse: 3,072 sq.m. (10 tons capacity); Open Side Warehouse, for cotton: 1,806 sq.m.; 2 molasses tanks, capacity 1 million gallons; open storage 32,913 sq.m.

STEVEDORES: Arranged by Agents, working around the clock with breaks for meals.

Shifts: 0700 – 1200, 1300 – 1700, 1800 – 2300 and 2400 – 0600 hrs.

Cargo Handling Rates:

Resin:	15 tonnes per gang/hour.
Coffee:	30 tonnes per gang/hour.
Lumber:	20 tonnes per gang/hour.
Timber:	25 tonnes per gang/hour.
Cotton:	15/20 tonnes per gang/hour (100 bales).
Molasses:	145 tonnes per hour.
Sugar:	50 tonnes per gang/hour (2 gangs).
Meat:	10 tonnes per gang/hour.
Cars:	15/20 per hour.
General cargo:	8/10 tonnes per gang/hour.
Cement:	30 tonnes per gang/hour (in bags).
Wire/iron bars:	40 tonnes per gang/hour.

MEDICAL: Nearest hospital in Choluteca City, 30 minutes by car. Minor cases can be attended by doctor at San Lorenzo.

TANKERS: No facilities.

FRESH WATER: Good quality potable water available in unlimited quantities.

FUEL: Only if required, and if sufficient notice given to the Ship's Agency.

CONSULS: Consulates exist for the following countries:

Nicaragua, El Salvador in Choluteca City, 30 minutes by car from San Lorenzo.

Consulates for other countries in Tegucigalpa, the capital, (90 km.) 2 hours by car from San Lorenzo.

REPAIRS: Not available.

DRY DOCKS: None available.

GANGWAY/DECK WATCHMEN: Not recommended and not necessary.

HATCHES: By stevedores.

CUSTOMS ALLOWANCES: Tobacco/Wine; spirits are not allowed to be held out of bond.

REPATRIATION: Immigration Offices in town and in Tegucigalpa. Flights leave daily from Tegucigalpa. (90 km. from San Lorenzo).

AIRPORT: In Tegucigalpa, 90 km., 2 hours by car. Connections to Miami/New Orleans/Houston/Panama/Mexico and all Central American countries.

HOLIDAYS: January 1st, April 14th, May 1st, August 10th, September 15th, October 3rd, 12th and 21st, December 25th and Thursday, Friday and Saturday of the Easter week.

Work can be arranged excepting May 1st, September 15th and Holy Friday during Easter week.

SHORE LEAVE: Allowed. Restrictions placed on crew from some countries. Crew members to shore passes.

TIME: GMT minus 6 hours, no alteration during year.

TELEPHONES: None.

STORING: See "Prelims".

1. Vessels are stored by truck.
2. Trucks can proceed alongside the berth.

3/4. Fork lift trucks can be used on the jetty to handle stores. Truck must be hired.

5. There is no Custom Regulation in force regarding storing.
6. Local riggers can be employed to assist with storing.

SURVEYORS: Not locally available but can be called through Agency. Lloyd's Sub-Agency San Lorenzo, c/o Servicios Portuarios SA, San Lorenzo, Honduras, C.A.

EMERGENCY CO-ORDINATION CENTRE: Firstly Port Superintendent must be called using VHF Channel 16. Also Honduran Coast Guard can be called on the same Channel.

BANKS: At Tegucigalpa: Bank of America, Bank of London & Montreal, Banco Atlantida and Banco Ahorro Hondureno.

GENERAL:

Chart: Honduras Chart No. 004.

Tidal Variation: 2.5 m. – 4.0 m.

Prevailing Winds: From South and East.

Flags: Flags required:

1. The country's flag where the ship is registered.
2. The Honduran flag.
3. The yellow (Quarantine) flag (if necessary).
4. The red flag (if necessary).

AUTHORITY: Empresa Nacional Portuaria (E.N.P.), San Lorenzo, Valle, Honduras. *Tel:* 92. *Telex:* To be installed. *Contact:* A. Andres Casco, Port Superintendent.

AGENT: Servicios Portuarios, S.A. (SEPOSA) POB 35 Tegucigalpa, D.C., Honduras. Telex 1183 Uhler Ht or 4003 Seposa Ho. Tel: 22-8000, 22-5409.

TELA: 15.47 N. 87.30 W. (See Plan)

DOCUMENTS:

1 original Clearance
1 „ Health Certificate.
1 „ 12 copies Manifest.
1 „ 11 „ Cargo Book.
1 „ 8 „ Store List.
1 „ 8 „ Crew List.
1 „ 8 „ Passenger List.
1 „ Baggage.
1 „ Voyage Memorandum.

All documents must be in Spanish; Cargo Book should be in alphabetical order.

PILOTAGE: Permanent Pilot not available but can be supplied upon request. There is a small boat that assists docking by handling mooring lines from vessel to wharf. 48 hours advance notice of ETA required.

ANCHORAGES: 1 mile out from wharf, 100 ft. or more; no boundaries.

MAX. SIZE: Max. permissible length 485 ft., breadth no restrictions, draft 30 ft.

Shipmaster's Report: August 1981.

Max. length possible 569 ft. on draft of 25 ft. 6 in.

HEALTH: Agents arrange Pratique; in case of disease or fever aboard, the vessel will be placed in quarantine for a minimum of 5 days.

Valid Vaccination Certificates against yellow fever and cholera required. These vaccinations are not available in Honduras.

RADIO: WNU New Orleans and TIM Puerto Limon via Tropical Radio.

VHF: Base Station call sign "Telarailco Tela". A continuous watch is maintained from 2 hours prior to vessel's arrival. All calling should be on Channel 16.

TUGS: No tug available.

MEDICAL: Hospital facilities available.

TANKERS: Discharging lines only, crude 12 in., diesel 6 in., spray oil 6 in. Berth available for 1 tanker, max. permitted draft 30 ft.

BERTHING: Time for berthing is from 0600 hrs. to 2000 hrs.

General Cargo Berth: East side of pier, starboard side alongside.

Banana Berth: West side of pier, port or starboard side alongside, depending on which side elevator space is required (See "Shipmaster's Report" – 1979). 4 elevators available, type camel back. Rate per elevator 3,500 boxes per hour.

Depths: West side has 35 ft. depth at the Northern Point, 32 ft. in the middle and 27 ft. 6 in. at its Southern end, while the East side has 35 ft. depth at its Northern point, 33 ft. at the middle and 30 ft. at its Southern end.

STEVEDORES: ETA advice should be given 48 hours prior to arrival in order to arrange gangs. Labour rates are subject to surcharge of 25%, 50%, 75% and 100% to cover overtime, depending on hour or day worked.

Gangs: For bananas: 180 men, 3 gangs. General cargo: No restrictions.

DENSITY: Average density in port is 1029.

FRESH WATER: Delivered by hoses at rate of 100 gallons per minute.

FUEL: Available, rate 250 t.p.h.

FIRE PRECAUTIONS: Extinguishers and water hoses available.

GANGWAY/DECK WATCHMEN: Watchmen can be obtained at day-time rates plus 25%, 50%, 75% and 100% to cover overtime, depending on the hour or day worked.

OPENING/CLOSING HATCHES: Work done by stevedores.

CERTIFICATES: Health and Derat certificates needed.

CUSTOMS ALLOWANCES: 1 carton cigarettes and 1 bottle wine or spirits for each man.

CARGO GEAR: Must have current valid certificate for ship's gear.

IDENTIFICATION CARDS: Required.

CONSULS: None.

REPAIRS: Only minor repairs.

REPATRIATION: Repatriation can be made on request by Master.

AIRPORT: Distance from wharf to airport is about 80 km. served by regular airlines; 4 flights per day which connect with Pan Am every day.

TIME: GMT minus 6 hours.

HOLIDAYS: January 1st, work possible; April 14th, work possible; May 1st, not possible; September 15th, work possible; October 3rd, work possible; October 12th, work possible; October 21st, work possible; December 25th, work possible. Thursday, Friday and Saturday of Holy Week – work possible except Friday.

POLICE/AMBULANCE/FIRE: Contact telephone operator.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Ship chandler and launch service available.

GENERAL: Ships must have Honduran flag on board.

SHORE LEAVE: Crew members allowed ashore, providing they do not have any diseases.

DELAYS: Delays can be expected any time there are 2 ships docked.

SHIPMASTER'S REPORT: February 1979.

Contrary to the previous information on this Port, "Vessel" berthed starboard side alongside.

Pilots: None available at present.

Berthing: Used port anchor, head out. The mooring boat meets vessel at the end of the jetty. It is a white painted boat with a small cabin. Very helpful in assisting with the lines, going from forward to aft as required. It is of great advantage to have a mooring rope on the fore deck starboard side, ready to lead forward as due to the Northerly wind and swell, vessel soon drops astern.

The beach shelves fairly fast, and with a ship of this length (575 ft.) a good guide is not to let the bow pass the end of the jetty. A depth of 24 ft. was recorded when sounding round when alongside, only 30 ft. astern of the ship.

The jetty itself has a sprung centre of about 350 ft. long with rubber tyres along same, unfortunately secured by chains which ruins the overside paintwork when the ship surges in the swell.

Additional moorings: The Tela Rail Co. is at present renewing the coir springs on the berth. The shore labour assisted at all times with the moorings as the ship was loaded, also when shifting ship at midnight.

Cargo Gear: The shore side derricks have to be "Doubled up". The existing runners doubled back and shackled to the preventer lug and a snatch block used. It is one straight lift and pulled on board by the single runner on the off-side derrick. The "Hallen" was used at No. 4 hatch but the preference was to use "Double Gear" at No. 3. The "Lift aboard" elevators are 3.7 tonnes, but at the jetty end they run on a steel roller, which is placed on a large steel plate.

Loading: Vessel loaded all hatches, No. 5 being through the side doors and later when No. 1 had finished vessel shifted ahead to give more depth of water aft. Due to a labour shortage we only loaded any three hatches at one time.

Cargo is brought onto the pier by train with several small shunts a shift, very little time lost during shunts.

Fresh Water: Available at slightly differing pressures, rate varies between 5 and 7 tonnes per hour.

Labour: All key personnel speak very good English and are extremely helpful. It is not necessary to keep crew on "Captive Time" for shifting ship during the night, Foreman and labour are only too pleased to assist.

SHIPMASTER'S REPORT: August 1981.

Engines should be kept at immediate notice while alongside, especially from December till May as swell may increase with little warning.

Shore labour for deck/engine room cleaning and painting are readily available.

Two mooring buoys shown on U.S. and B.A. charts to West of piers DO NOT EXIST.

AUTHORITY: Tela Railroad Company, Exportation Department, Tela, Honduras. *Tel:* (504) 48-2108. *Telex:* 448706 TrrexPth Ho.

Contact: F. A. Betancourt, Port Superintendent.

Head Office: Apartado Postal No. 30, San Pedro Sula, Cortes, Honduras, C.A. *Telex:* 5532 Trailco Ht.

NOTES

Please also advise Shipping Guides Ltd.

Hong Kong

HONG KONG: 22.18 N. 114.10 E. (See Plan)

HARBOUR LIMITS: (Approximately): Western Entrance – the N.S. line between S.E. extremity of Tsing Yi Island and the flashing light at S.W. corner of Green Island. Eastern Entrance – the N.E./S.W. line between the on-shore Fl. W. and the Fl. R. lights either side of the Lei Yue Mun Pass.

DOCUMENTS:
Marine Department (Arrival):
Marine Department Shipping Report (Form MO. 618).
Certificate of Registry and/or Tonnage Certificate.
Certificate of Fitness (all vessels carrying chemicals in bulk if applicable).
Passenger ship: Safety Certificate.
Passenger or cargo ship: Load Line Certificate.
Cargo ship: Radio Certificate.
Cargo ship: Safety Equipment Certificate.
Cargo ship: Safety Construction Certificate.
Ship's Articles of Agreement with the crew (if the ship is British, or is a foreign ship belonging to a nation not represented by a consul in Hong Kong).
1 copy Safety Manning Declaration.
Derat Certificate or Derat Exemption Certificate.
1 copy of the ship's Passenger List (if specifically requested).
Clearance Certificate from the Last Port.
1 copy of the Import Cargo Manifest (if specifically requested).
5 copies of the Dangerous Goods Manifest (if applicable).
Compulsory Insurance Certificate (Tankers).

Note: The ship's Articles of Agreement to be submitted to the Mercantile Marine Office, all others must be submitted to the Entry and Clearance Office of Marine Department within 24 hours of a ship's arrival with the exception of the Dangerous Goods Manifests (2) which should be submitted at least 48 hours prior to the vessel's arrival.

In addition to the above, certain types of vessels are required to give notification to the Director of Marine prior to arrival as follows:

(i) The Master of every vessel over 300 g.r.t., address to 'Mardep' using:
(a) W/T communications via Hong Kong Radio (VPS); or
(b) Telex: 63607 Mdpcc HX; or
(c) VHF R/T on Channel 12 (156.6 MHz).
An initial notification of not less than 12 hours before the vessel is expected to enter the waters of Hong Kong, also a confirmatory notification of not less than 4 hours before the vessel is expected to enter the waters of Hong Kong.

(ii) The Master, Owner or Agents of every oil tanker (if carrying more than 2,000 tons of persistent oil bulk), gas tanker and chemical tanker, address to 'Mardep' by Telex: 63607 Mdpcc HX, not less than 48 hours before the vessel is expected to enter the waters of Hong Kong, a tanker arrival notice.

Marine Department (Departure):
Application for Port Clearance (MO 618), 2 copies of Ship's Export Dangerous Goods Manifest.
1 copy of Ship's Export Cargo Manifest (if specifically requested), all relevant documents and trading certificates are same required for the Report of Arrival.

Port Health Officer (Arrival Only):
Maritime Declaration of Health.
1 copy of the ship's Passenger List.
1 copy of the Crew List.
Derat Certificate or Derat Exemption Certificate (whichever is applicable).

Note: The above documents/forms must be produced for the inspection of the Port Health Officer on boarding at the Quarantine Anchorage.

Department of Trade, Industry and Customs (Arrival and Departure):
2 copies of the ship's Import/Export Cargo Manifest. 1 copy for Manifest Check Section, Trade Licensing Branch, 14th Floor, Ocean Centre and the other 1 copy for Manifest Section, Industry and Economic Division, Census and Statistics Department, 20th Floor, Kai Tak Commercial Building.
1 copy of Import/Export Statement in respect of dutiable goods (Forms TIC 309 and TIC 309A).
2 copies of the declaration in respect of dutiable stores required during a vessel's stay in port (Form TIC 303).

Immigration Officer (Arrival):
2 Transit-Passenger Lists.
2 Landing-Passenger Lists.
3 Crew Lists.

Note: The above forms must be produced for the inspection of the Immigration Officer on boarding after the ship has been 'cleared' by the Port Health Officer.

Immigration Officer (Departure):
2 Lists Passengers boarding.
2 Lists Transit Passengers.
2 Crew Lists.

Post Office (Arrival Only):
1 copy of the Ship's Mail Manifest.

Hong Kong Police:
1 copy of The List of Arms and Ammunition on board (Nil return required) to be handed in at the Entry and Clearance Office with Marine Department papers.

ARRIVAL ADVICE: It is mandatory for Shipmasters to cable MARDEP Hong Kong 12 hours (see "Notices" – No. 89/1985) before arrival requesting permission to enter Hong Kong waters and advising ship's name, nationality, type of vessel, total number of persons on board, ETA abeam of Waglan Island and reason for call. It is not permitted to enter Hong Kong waters until permission has been granted. It is mandatory for all vessels over 300 tons gross to carry VHF radiotelephone capable of operating on Hague Plan frequencies and to make contact with the Port Communications Centre on Channel 12 before entering Hong Kong waters and thereafter at specified calling points. They should report their position, ETA at pilot station, final berth, and intended route inwards, East or West. If entering from the East then the vessels mast height above the water should also be reported. (This is needed for information to the airport where the runway extends close North of the Hung Hom Fairway). Shipmasters are also asked to report any other relevant information such as dangerous (including radioactive) goods on board. If the vessel is taking a Pilot, reference should be made to the 'Sailing Directions' in the China Sea Pilot Vol. I, with regard to the positions of the pilot stations, and Pilots should only be embarked or disembarked at these points. Additional radio reports to MARDEP during the vessels inward or outward passage aid in the safe movement of all vessels in the port and approaches.

APPROACHES: A. (Dry-cargo and container vessels): The approaches are reasonably free from hazards and are well marked by day and night. Vessels working at buoys with drafts up to 11.2 m. are requested to enter port via the Western Entrance. Other vessels with drafts up to 10.9 m. may enter via Lei Yue Mun entrance.

B. (Tankers): Tankers without a gas-free certificate are prohibited from transit through Victoria Harbour. Tankers which berth at Tsing Yi Island, Lamma Island, Ap Lei Chau, Tsuen Wan and Tap Shek Kok are requested to use the Western approaches and tankers with drafts up to 10.6 m. for Kwun Tong are requested to use the Eastern approaches. A channel has been dredged at Hongkong Electric Company Wharf at West Lamma Island for the purpose of accommodating vessels at 13.8 m. draft.

C. Buoyage. The system of buoyage used in Hong Kong has been changed from the Uniform to the IALA System.

Compulsory traffic separation lanes are in force for both the East and West approaches. Up-to-date Admiralty charts should be consulted for details.

PILOTAGE: Pilotage is compulsory in the port for certain categories of ships, as described in the Pilotage (Amendment) Ordinance 1985, which came into effect on 1st August, 1985. Pilots are licensed by the Pilotage Authority (Cables: Pilot Hong Kong. Telex: 62062) and are available to board ships at the 3 pilot boarding stations described in the Second Schedule of the above mentioned Ordinance.

The Hong Kong Pilots Association provides pilotage services. Pilots generally board inbound ships using the Eastern Entrance in the vicinity of the Lei Yue Mun 'TC54' Buoy (Lat. 22° 16′ 00″ N., Long. 114° 15′ 40″ E.) and disembark at the same point from outward-bound ships. At the Western entrance, Pilots embark and disembark to the S.W. of Green Island (Lat. 22° 16′ 00″ N., Long. 114° 06′ 36″ E.). It is a contravention of Regulation 21(1) of the Shipping and Port Control Regulations, 1978, for any vessel to pick up or discharge a Pilot within a distance of 1 nautical mile from the centre of either the Lei Yue Mun Pass or the Sulphur Channel. Maximum speed inside Harbour is 8 knots.

Also see "Notices" – No. 53/1985 and No. 95/1985.

ANCHORAGES: Examination anchorages (quarantine and immigration) for clearance inwards are situated within the harbour limits to cover the entry of shipping from East and West. The principal dangerous goods anchorages are situated at the Western end of the harbour and at Pun Shan Sek (tankers), whilst there are others at Junk Bay, Tsuen Wan and Rocky Harbour.

An anchorage for the discharge of logs has been designated. This was necessary because logs, which were being discharged and stored within harbour limits were endangering small craft, waterside installations and navigation.

The Western examination anchorage works 24 hours a day whereas the Eastern examination anchorage works from 0800 – 1800 hrs. Only on request. Ships requiring service in the Eastern Quarantine Anchorage should advise MARDEP on VHF radio Channel 12 when establishing contact prior to arrival.

MAX. SIZE: Largest vessels calling regularly have been, dry-cargo container vessels, length over 292 m., with drafts up to 11.6 m.; tankers length over 274 m., draft 14.6 m. Maximum size governed by draft of vessel. No limit as to length and beam. Draft in harbour: "A" class mooring buoys 6.7 m. to 11.2 m. "B" class mooring buoys 5.3 m. to 8.8 m.

PRATIQUE: *Conditions under which a Vessel may be Granted Radio Pratique:*

(a) The vessel must not have called at a plague infected port within 14 days prior to arrival at Hong Kong.

(b) If the vessel has called at a cholera infected port within 5 days prior to arrival at Hong Kong, the Chief Port Health Officer or his delegated officer has full discretion in the granting of Radio Pratique.

(c) There are not more than 24 passengers on board at the time of arrival.

(d) A vessel carrying more than 24 passengers may be granted Radio Pratique if there is a ship's surgeon on board.

(e) The Master must furnish, through his shipping company or Agent, the following cabled information to the Port Health Office not more than 30 hours and not less than 8 hours before his expected time of arrival at Hong Kong:

(i) Ports of call with dates of departures during the 14 days prior to arrival.
(ii) Numbers of passengers and crew members on board.
(iii) A statement that all persons on board are healthy and in possession of valid International Certificates of Vaccination.

(iv) A statement indicating whether any case of infectious disease has occurred on board during the voyage.
(v) Whether any person on board is sick.
(vi) The date of issue of the Derat or Derat Exemption Certificate.
(vii) Whether the ship is an oil tanker, a cargo ship, a container ship or a LASH ship.
(viii) Whether foodstuffs are carried as cargo on board ship.

Notes:

1. Applications for Radio Pratique must be made by shipping companies or Agents. Application forms should be sent to Port Health Office, Li Po Chun Chambers, First Floor, Des Voeux Road, Central, during normal office hours (0900 – 1700 hrs. on Mondays to Fridays and 0900 – 1300 hrs. on Saturdays).

2. For urgent cases outside normal office hours, shipping companies or Agents may apply for Radio Pratique by telephone to the Port Health Office, Hong Kong Airport (Tel: 3-829284) during the following hours:

Mondays to Fridays	1700 to 2300 hrs.
Saturdays	1300 to 2300 hrs.
Sundays and Public Holidays	0900 to 2300 hrs.

All necessary information together with supporting documents must be submitted later in writing to Port Health Office, Li Po Chun Chambers.

3. No Radio Pratique will be granted between 2300 and 0900 hrs.

4. When Radio Pratique is granted, shipping companies or Agents will be responsible for notifying the Master concerned.

5. The granted Radio Pratique will automatically expire 24 hours after the stated expected time of arrival at Hong Kong.

6. The granted Radio Pratique will no longer be valid if there is any change in the health status on board the vessel concerned during the period from the submission of the application to the actual time of arrival of the vessel at Hong Kong. This means that the Master of the vessel concerned will have either to re-apply through his shipping company or Agent, giving the additional information, or to display the appropriate signal when approaching the Quarantine Anchorages:

Day: International Code flag "Q".
Night: A red light over a white light in a vertical line, 6 ft. apart.

7. Ships granted Radio Pratique will be required to display the following signal when entering Hong Kong waters:

Day: International Code flag "TO."
Night: 3 white lights in a vertical line, 6 ft. apart.

8. Maritime Declaration of Health and Passengers and Crew List will have to be collected by the shipping companies or Agents and delivered during office hours to the Port Health Office, Li Po Chun Chambers within 24 hours of the ship's arrival.

Also see "Notices".

IMMIGRATION: Immigration formalities take place at the Eastern or Western Examination Anchorages after clearance by the Port Health Authorities. Immigration launches are on duty 24 hours a day in the Western Anchorage and from 0630 hrs. to 1800 hrs. in the Eastern Anchorage throughout the year.

RADIO: Cable Agent via Radio Hong Kong call sign "VPS".

Signal Stations. 3 signal stations operated by the Marine Department are situated in the Eastern and Western Approaches to, or within, the harbour limits as follows:

Eastern Approaches: Waglan Island, (Lat. 22° 11′ N., Long. 114° 18.1′ E.). Western Approaches: Green Island (Lat. 22° 17.2′ N., Long. 114° 06.6′ E.).

Marine Department Port Communications Centre, Lat. 22° 17.4′ N., Long. 114° 9.0′ E.

The Marine Department Port Communications Centre can be contacted by telex, by cable and by VHF radio-telephone on Hague Plan Channel 12. Additionally, the above stations are manned 24 hours a day throughout the year and contact can be made by means of international code flags, or by signal lamp. Communication between the stations is provided by teleprinter circuit, land-line telephone and by radio. Telex: Marine Department Port Communications Centre is equipped with telex No. 63607. Answerback: MDPCC HX.

It is mandatory for the Master of every ship arriving within signalling distance of any of the above signal stations to hoist the national colours and (if one shall exist) the house flag and the signal letters of the ship, and to identify the vessel to the signal station by visual signals if requested. On recognition of a ship in the approaches to Hong Kong, the name is immediately relayed by teleprinter to the Port Communications Centre of the Marine Department, and the ship's Owners or Agents can be notified on request.

Wireless Telegraphy: Radio communication apparatus on board a merchant vessel is not permitted to be used while the vessel is within Hong Kong territorial waters except in the following circumstances:

When a vessel is proceeding through Hong Kong territorial waters such apparatus may be used to communicate on minimum power with the nearest coast station or, if communication with the nearest coast station is impracticable and the safe navigation of the vessel so requires, with a more distant coast station or another vessel;

For the purpose of summoning assistance on an occasion of danger to the life of any person or to the vessel;

For the purpose of carrying out experimental tests for which permission in writing must first be obtained.

During the period when tropical cyclone signals 8, 9 or 10 are in force, radio and television stations will extend their hours of operation around the clock, and will undertake broadcasting of tropical cyclone warnings in English and Chinese, at two minutes to the hour and half past the hour. Should the expected local conditions so warrant, warnings will be broadcast at quarter to and quarter past the hour. Warnings in English will be broadcast by individual announcers at each station. Radio Television Hong Kong and Commercial Radio will provide a Chinese announcer to broadcast warnings in Chinese from the broadcasting studio at the Royal Observatory.

If conditions are expected to worsen, tropical cyclone warnings may continue after the normal close down time of the stations, or commence before the usual starting time in the morning even though only the No. 1 signal is in force at that time. After consulting the Director, Royal Observatory, the Director of Broadcasting will decide whether or not to adopt either of these courses. He will inform Commercial Radio, HK-TVB, RTV of his intentions as early as possible.

Frequencies: Radio Television Hong Kong – Radio 1 (Chinese) 640 kHz: Radio 2 (Chinese) 94 MHz, 103.5 MHz, 103.1 MHz; Radio 3 (English) 545 kHz; Radio 4 (English) 91 MHz, 100.5 MHz, 100.9 MHz; Radio 5 (English) 96 MHz, 105.5 MHz. Commercial Radio – English Service 1050 kHz; Chinese Services Channel 1, 850 kHz, Channel 2, 610 kHz.

All ships bound for Hong Kong must obtain permission from MARDEP before entering the waters of Hong Kong. A contravention of this direction will render offending Masters liable to a fine of twenty thousand dollars and to imprisonment of 1 year. When applying for permission to enter the waters of Hong Kong Masters must provide the information required as contained in Marine Department Notices to Mariners No. 39 of 1983 and No. 89 or 1985 (see "Notices"). You are required to answer all signals including those passed from Royal Navy vessels patrolling the approaches to H.K. when approaching Hong Kong – Mardep Hong Kong.

VHF: Port Communications Centre, Marine Department Hong Kong Port Radio call sign "Mardep" Channel 12, 24 hours listening watch. Range up to 35 miles.

Maritime VHF Radio-telephone Service (Hague Plan): This service operates in Hong Kong on 3 international channels, Nos. 16, 26 and 27. Channel 16 (156.8 MHz) is the simplex distress and calling frequency on which contact is made between shore and ship before changing over to either of the public correspondence channels, No. 26 or 27. The latter are duplex channels and Hong Kong transmits on 161.9 MHz and receives from ships on 157.3 MHz for Channel 26; transmits 161.95 MHz, receives 157.35 MHz for Channel No. 27.

Local connection to the service is *via* the Hong Kong Telephone Company and is made in the same way as for overseas radio-telephone calls by dialling "011". The local operator should then be informed that a telephone call is required on "the Maritime VHF Hague Plan Service". The operator will ask for details of the call, such as the name of the ship and the person required, and will then connect the call *via* Cable and Wireless. Calls can also be sent from ship to shore. The range is about 50 miles and the service is available at all times of the day and night.

Harbour telephones: Service is provided by any one of 3 companies – Hutchinson Tel. Co., Tel: 5-66113, Ext. 120 – China Telecom System, Tel: 0-242666, Ext. 109 – Communication Services Ltd., Tel: 5-8288228. Calls may be made between any two ships so equipped and between a ship and any telephone number on the Hong Kong Telephone Company network.

Ship to shore service: Hong Kong Telephone Company will also provide ship to shore telephone service by means of land lines at selected wharf locations. For service at the Container Port call 0-208800.

Also see "Notices".

WHARVES: *China Merchants S.N. Co. Limited:* Berths suitable for coastal shipping:

		Length (ft.)	*Depth (ft.)*
West Point	Berth No. (1) E.	320	35
	Berth No. (2) W.	320	35
H. K. and Kowloon Wharf Co.			
	Ocean Terminal	1,250	35
	Pier No. (3) S.	600	32
	Pier No. (3) N.	600	34
	Pier No. (4) S.	700	32
	Pier No. (4) N.	700	33
	Pier No. (5) S.	800	34
	Pier No. (5) N.	800	36
Kwai Chung Container Terminal			
6 berths	(Sealand – 1 Terminal, Modern Terminals – 1 Terminal, HIT – 3 Terminals)	7,500	40

BERTHING: Berthing of dry cargo vessels alongside wharf can be performed any time during day and night. Berthing at tanker wharf not permissible after sunset, depending on size of vessel or other special circumstances. Ships carrying explosives must obtain permission from the Marine Department before berthing is allotted.

Boatmen: Labour to handle ships' mooring lines when berthing and unberthing at any of the wharves in Hong Kong waters is supplied by the owners of the wharf concerned, the cost being included in the berthing fee. For berthing at a Marine Department mooring buoy it is usual for the ship's Agent to arrange for boatmen to handle the ship's slip wire and anchor cable, unless the ship's crew undertake this task. The services of boatmen are generally obtained through the Hong Kong Pilots Association.

Mooring Buoys: See "Max. Size" All ships are required to secure to Marine Department mooring buoys by their chain cable (vessel to supply shackle). The maximum length of a ship permitted to berth at an "A" class mooring is 183 m., the swing circle encompassing each buoy having a radius of 213 m. The maximum length of a ship permitted to berth at a "B" class mooring is 137 m., the radius of swing circle around such buoys being 167 m. It is therefore within the limits of safety for a vessel, when secured to a Marine Department mooring, to slack out to "1 shackle on the windlass" and still clear ships berthed at adjacent buoys, except in exceptional circumstances. As all Marine Department moorings are of the 1-legged type, it is permissible, should circumstances make it necessary, for a ship, when attempting to secure to a mooring, to drop an anchor at not less than 15 m. from the buoy without fouling the mooring chain. It should be noted, however, that 3 moorings sited within the Naval Mooring Area are either of the 2 or 3-legged type, and it is therefore not permissible to use an anchor when berthing.

44 "A" class mooring buoys and 27 "B" class mooring buoys for ocean going vessels. One "B" class mooring buoy is available at Yam O Bay, Lantan Island, for vessels with cargoes of logs.

TUGS: Available for berthing and unberthing. Advance booking is required. See Table B (page 642).

CONTAINER CRANES: Modern Terminals Ltd. – 7 cranes.

Hong Kong International Terminals – 10 container gantry cranes.

BULK HANDLING FACILITIES: *China Light & Power:*

Location: Castle Peak.

Berth: Length 545 m. Depth 20 m. Max. draft 12.9 m. (limited by channel depth 13.7 m.). Max. Beam 42 m. LOA no restrictions.

Cargo: Discharge rate for coal 15,000 tons per day. Also see "Developments".

Hong Kong Electric Co. Ltd.:

Location: Lamma Island.

Berth: Depth 15.8 m. Max. draft 13.8 m. Max. LOA 270 m. Max. beam 40 m.

Cargo: 2 unloaders for coal, rate 15,000 tons per day.

CRANES: Available up to 700 tons.

STEVEDORES: The following table shows the average handling rates per gang hour:

Cargo	*Place*	*Load tons per gang hour*	*Discharge tons per gang hour*
General	Wharf	12	15
General	Stream	10	12
Bale or bag	Wharf	20	25
Bale or bag	Stream	15	20

Stevedores work 24 hours per day except Mid-Autumn Festival and Chinese New Year Holidays.

TANKERS: Any leaking of oil to water will be subjected to heavy fines. If not gas-freed, not allowed through harbour. See Table A (page 642).

Esso: The Esso Tsing Yi Terminal is situated on the Southern part of Tsing Yi Island in position Lat. 22° 19.7′ N., Long. 114° 06′ E. The facilities are owned by Exxon Storage & Wharfage Company Ltd., and used by Esso Standard Oil Hong Kong Ltd., and are used for discharging dirty and clean products, chemicals and LPG.

Pilots: At the Western entrance, Pilots generally embark and disembark to the West of Green Island (Tsing Chau). By pre-arrangement Pilots can be picked up off Ngan Chau and all tankers are recommended to make use of this service and request the Agent to notify the Pilot Association accordingly.

The Pilots maintain a listening watch on VHF Channel 11. Senior Pilots will usually be assigned to larger tankers.

Pilot launches display the international signals by day and by night and during poor visibility sound the international signals. In addition they may sound an identity signal of 4 short blasts.

Esso Tsing Yi Terminal: The berth consists of a T-head pier having 3 separated areas for handling barges and tankers ranging from 500 – 120,000 d.w.t.

The main loading area is designated Berth No. 1 and consists of a fendered loading platform, 2 fendered breasting dolphins, 4 mooring dolphins and associated equipment such as capstans, quick release mooring hooks for 120,000 d.w.t. tanker, etc. Berth No. 2 is provided by fendering the onshore face of one of Berth No. 1 Eastern mooring dolphins and adding an adjacent breasting dolphin suitable for vessels up to 2,500 d.w.t. Berth No. 3 is a small berth for vessels up to 500 d.w.t. and is located adjacent to the Eastern side of the trestle/access way. In addition there is a small jetty from the shore, inside of the Western side of the T-head, used at the present time by small tankers up to 2,000 d.w.t. and barges loading/discharging FO, ADO and LPG.

Berthing Procedure: At the present time the berthing of tankers exceeding 570 ft. LOA and up to 42 ft. draft is carried out during daylight hours and on flood tide only. Above 42 ft. draft, berthing is carried out at HW slack only and during daylight hours only and on a trial basis, HW neap during daylight hours when no HW slack exist for that day. Tankers not exceeding 570 ft. LOA, draft under 36 ft. can be berthed day and night, but on flood tide. Currents near the berth, up to a distance of approximately 400 ft. off, run parallel to the berthing face. Further out, the ebb tide sets out and the flood tide in towards the North. Vessels always berth port side to. (Maximum tidal current is generally below 1 knot). In addition to the 2 escort tugs used for larger vessels for the passage through the channel from Green Island, usually 2 more tugs are in attendance for berthing larger vessels. Tugs are normally employed in the alongside manner and use their own wire. Pilots bring vessel parallel to the berth, and about 200 ft. off, and then ease her alongside with the aid of attending tugs and mooring lines.

Nearby, approximately 500 ft. Eastward is a new berth owned and operated by China Resources Oil Company. This berth projects further offshore than the Esso Pier. *Caution has to be exercised not to overshoot the Esso Berth.*

Two mooring launches strong enough to handle 120,000 d.w.t. vessel's wire ropes are in attendance. All 4 mooring dolphins are fitted with triple quick release hooks and capstan. The 2 breasting dolphins and 2 corners of the loading platform are fitted with double quick release hooks and capstan. The terminal requires that larger vessels use a minimum of 2 headlines, 2 forward breastlines, 2 forward backsprings, 2 aft backsprings, 2 aft breastlines and 2 sternlines.

Products	*No. and Size of Loading Arm*	*Shoreline* (in.)	*Maximum Pressure* (p.s.i.)	*Average Discharging Rate* (bbls.p.h)
Dark Product	4×10 in.	12/20/24	100	11,000 per load arm
DPK	1×8 in.	10	100	8,000
DPK and other clean products/lubes	2×6 in.	6 and 8	100	2,500/4,000
LPG	Liquid 6 in.	6	350	800
	Vapour 4 in.	4		
Chemical	1×6 in.	6	100	2,500

DENSITY: 1017.

FRESH WATER: Available but the supply is sometimes limited, depending on the storage levels in Hong Kong's reservoirs. The supply to ships is made at commercial wharves and from water boats. See Table C (page 643).

FUEL: Excellent facilities exist for bunkering vessels with fuel oil and coal. Fuel oil can be obtained either at the wharves adjacent to the oil installation, or from harbour oilers owned and operated by the oil companies. Fuel oil from these vessels can be pumped on board without impeding cargo operations. Adequate stocks of good quality bunker coal suitable for coal-fired marine boilers are maintained in the port. Fuel oil available with viscosity up to 1,000 sec. Redwood. 24 hours' notice for supply is required. Also gas oil and marine diesel available. See Table D (page 643).

FIRE PRECAUTIONS: The Fire Services Department operates six fire boats, the largest being the 350 ton "Alexander Grantham". It has an output capacity of 45,000 litres of water and 32,850 litres of foam a minute through a battery of monitors. This vessel is equipped to deal with any type of fire on any size vessel, and is designed to operate both in port and at sea.

GANGWAY/DECK WATCHMEN: Not compulsory but recommended.

OPENING/CLOSING HATCHES: Usually performed by ship's crew.

CERTIFICATES: See "Documents".

CARGO GEAR: Normal routine gear, wire and rope slings, nets, grabs, and floating cranes up to 100 tons available.

Vessel's cargo gear must be used for working cargo at all alongside berths.

IDENTIFICATION CARDS: No identification card is required for crew or passengers going ashore. When the vessel has exceeded a stay of 14 days in port, all crew members must deliver to the Harbour Control Office, Immigration Department through the agents a signed copy of the "Immigration Arrival Card".

CONSULS: The following countries maintain consular offices in Hong Kong:

Australia
Austria
Bangladesh
Belgium
Bolivia
Brazil
Burma
Canada
Chile
China (People's Republic of)
Colombia
Cuba
Cyprus
Denmark
Dominican Republic
Ecuador
Egypt
Finland
France
Gabon
Germany F.R.
Greece
Guatemala
Iceland
India
Indonesia
Iran
Irish Republic

Pakistan
Panama
Paraguay
Peru
Philippines
Portugal
Seychelles
Singapore
South Africa
Spain
Sri Lanka
Sweden
Switzerland
Taiwan
Thailand
Tongo
Turkey
Tuvalu
United Kingdom
U.S.A.
Uruguay
Venezuela

REPAIRS: In addition to ship and engine maintenance and repair work, the dockyards have facilities for many miscellaneous services such as are provided by modern dockyards. These include physical tests on materials such as anchors and cables, for which test certificates can be supplied, chemical analysis, drawing office requirements, chemical cleaning of engines and boilers, shot and sand blasting, zinc spraying to name but a few.

DRY DOCKS:

Hong Kong United Dockyards Ltd. (Tsing Yi): Two floating docks, the largest of which has a lifting capacity of 33,000 tonnes. Length 260 m. Width 38 m. Depth over blocks 8.0 m.

Euro Asia Dockyards Ltd. (Tsing Yi): One floating dock, the lifting capacity of which is 100,000 tonnes.

Yau Lian Dockyard (Tsing Yi): One floating dock and a further floating dock (188 m. × 40 m.) in Tsuen Wan Bay.

SEAMEN: All formalities connected with engagement and discharge on board British ships, and on foreign ships whose flag is not represented by a Consular Officer resident in Hong Kong, are required by law to be conducted at the Mercantile Marine Office of the Crews Branch. Hong Kong continues to be one of the main recruitment centres of Asian seamen and a Seamen's Registry Office, which is an adjunct to the Seaman's Recruiting Office, under the same branch, maintains records of all Hong Kong seamen. The Seamen's Recruiting Office controls the recruitment, selection and supply of Hong Kong Chinese seamen to ships requiring them, and is situated at the Harbour Building, 3/F, 38 Pier Road, Hong Kong.

Seamen's Travel Documents: The Hong Kong Government Seaman's Service Record Book (Seaman's Discharge Book) is issued by the Marine Department and is a record of employment. The Hong Kong Government Seaman's Identity Book is issued by the Immigration Department and enables the holder to return to Hong Kong without a visa during the validity of the book (initially 5 years, with 5 year renewals), and also within 12 months after the expiry of the validity of the book.

A Seaman's Certificate of Nationality and Identity is issued at the Immigration Department only to seamen of British nationality, whereas the Seaman's Discharge Book and the Seaman's Identity Book may also be issued to seamen resident in Hong Kong and no visa is required for return to Hong Kong.

All Crew members signing-off for repatriation must first obtain permission from the Director of Immigration. All crew arriving to join a vessel must produce a guarantee letter through the Agents responsible for all maintenances and other eventual expenses.

Table A. OIL INSTALLATIONS

Company	Location	Length of berth	Depth alongside (Chart Datum)	Grade of oil	Capacity (water tons)	Delivery rate	Hose connection

AIRPORT: Regular International flights. Airstrip is capable of handling any size of jet planes. Transportation from port to airport terminal about 40 minutes bus drive.

TELEPHONES: Available at all alongside berths for connection on board ship.

TIME: Standard time kept in the colony is 8 hours in advance of GMT.

HOLIDAYS: Public holidays in Hong Kong occur mainly on festivals whose date is governed by the lunar calendar.

Every Sunday; First week-day in January; Chinese New Year's Day; Second day of Chinese New Year; Third day of Chinese New Year; General holiday in lieu of that for the Ching Ming Festival; Good Friday; Day following Good Friday (Ching Ming Festival); Easter Monday; Birthday of Her Majesty the Queen; Tuen Ng Festival; First week-day in July; First Monday in August; Last Monday in August, which shall be Liberation Day; Day following Chinese Mid-Autumn Festival Day; Day following Chung Yeung Festival; Christmas Day; First week-day after Christmas Day.

POLICE/AMBULANCE/FIRE: When the services of the fire brigade, immigration, port health or police are required, appropriate signals should be made in accordance with the list of "Hong Kong Port Signals". The Marine Division of the Police is responsible for internal port security. Its fleet of launches maintain constant patrols in Hong Kong's territorial waters.

GENERAL: No waste to be thrown into harbour. A free refuse disposal service is available for domestic refuse. Ship's agents can arrange this through Marine Department. Chain required for mooring to buoy. Unnecessary use of ship's sirens prohibited.

SERVICES: Services available including tank cleaning, painting, washing, compass adjusting, calibration of direction finder, radar repairs, 24 hours' service laundry, supply of stores and provisions, motor-boats service between ship and shore.

SHORE LEAVE: Crew members are usually allowed ashore.

DEVELOPMENTS: The central fairway has been dredged to – 36 ft. Reclamation continues in various areas within the harbour. Additional 'Public Cargo Working Areas' are near completion and others planned.

2 × 1,100 t.p.h. ship unloaders under construction at Castle Peak (finger pier) for China Light and Power.

15 hectares of additional container marshalling area to be reclaimed at Hong Kong International Terminals (HIT), completion 1987.

A 6th container terminal (3 berths) to be built at Hong Kong International Terminal (HIT). Completion expected 1989. 14 gantry cranes will be provided.

NOTICES: Marine Department Notice No. 42 of 1985 (Dated 4th March 1985).

Quarantine Inspection – Eastern Quarantine Anchorage:

1. Masters, Owners and Agents of ships are advised that with effect from 1st April, 1985, a Quarantine Service will be available in the Eastern Quarantine Anchorage between the hours of 0800 and 1800 daily upon request. Ships requiring this service should make a request to the Port Communications Centre when establishing contact on VHF Radio Channel 12 prior to arrival.
2. The existing continuous Quarantine Service in the Western Quarantine Anchorage remains unchanged.
3. Marine Department Notice No. 186 of 1984, concerning arrangements for obtaining the services of the Port Health Doctor at the Eastern Quarantine Anchorage will be superseded with effect from that date.
4. Copies of the Notice may be obtained free of charge from the Entry and Clearance Office, Rumsey Street Multi-Storey Car Park, Connaught Road, Central, Hong Kong.

Signed: Director of Marine.

Marine Department Notice No. 152 of 1984 (Dated 8th August 1984)
Notice to Owners, Agents and Masters of vessels of over 300 gross registered tons calling at Hong Kong:

Owners, Agents and Shipmasters are reminded that Vessels of more than 300 gross registered tons are required to have on board, whilst in the waters of Hong Kong, very high frequency (VHF) radiotelephone equipment. Such vessels are required to make contact with the Port Communications Centre on Channel 12 or 14 of the VHF radiotelephone before they enter the waters of Hong Kong and thereafter to make reports as specified in the Shipping and Port Control Regulations. In addition, a continuous listening watch must be maintained on the radiotelephone, on the specified channels. Failure to comply with these requirements renders the Master liable to prosecution.

Accordingly, Owners and Agents are requested to advise the Masters of vessels enroute to Hong Kong of the foregoing requirements.

The booklet, Hong Kong Shipping and Port Control Laws giving further details is available from the Marine Department Headquarters, Fairmont House, 7/F, Cotton Tree Drive, Hong Kong, price $5. You should obtain a copy of this booklet if you are in any doubt as to the laws applicable in Hong Kong.

Please note that the requirement to comply with these VHF reporting procedures does not apply to any vessel to which Part IV of the Shipping and Port Control Ordinance applies.

Signed: Director of Marine.

Notice to Mariners No. 39 of 1983: *Hong Kong Waters, Approaches to Hong Kong – Permission to Enter Hong Kong Waters:*

1. Agents and Masters are reminded that it is mandatory for ships to obtain permission to enter Hong Kong waters from the Director of Marine. It is in their best interests to give as much prior notice as possible before arrival. Permission to enter is conditional upon the following information being supplied to the Director:

(a) Name and nationality of vessel.
(b) Number of persons on board.
(c) Type of vessel.
(d) Reason for call at Hong Kong.
(e) ETA off Waglan Island.

2. The Director of Marine can be contacted through the Port Control Centre ("MARDEP") in any of the following ways:

(a) By W/T or R/T (HF) via Hong Kong Radio (VPS).
(b) By R/T on VHF Channel 12 (156.60 MHz).
(c) By Telex: 63607 Mdpcc Hx.

Signed: Director of Marine.

Notice to Mariners No. 53 of 1985
Hong Kong Waters, Approaches to Hong Kong – Establishment of Pilot Boarding Stations:

Date: With effect from 1st August, 1985.

Positions:

1. *East Lamma Channel*
Lat. 22° 16′ 00″ N., Long. 114° 06′ 36″ E.
2. *Tathong Channel*
Lat. 22° 16′ 00″ N., Long. 114° 15′ 40″ E.
3. *Urmston Road*
Lat. 22° 23′ 30″ N., Long. 113° 53′ 30″ E.

Areas: N.W., West and S.E. Approaches to Hong Kong.

Details: 3 Pilot Boarding Stations have been established:

(1) Area at the Northern end of the traffic separation scheme in the East Lamma Channel.
(2) Area off the Turning Buoy in the Tathong Channel.
(3) Area off Lan Kok Tsui (Black Point) in Urmston Road.

Remarks: Providing its Master has reported to the Authority in accordance with Section 10E of the Pilotage (Amendment) Ordinance 1985, a ship required to be under Compulsory Pilotage may navigate in the Pilotage Area without a licensed Pilot, if it is on its inward voyage from the time it enters the Pilotage Area to the time it arrives at a Pilot Boarding Station, so long as it is directly proceeding to a Pilot Boarding Station and if it is on its outward voyage under the pilotage of a licensed Pilot, from the time the licensed Pilot disembarks to the time it leaves the Pilotage Area, so long as it is directly leaving the Pilotage Area.

Charts affected: B.A. 342, 938, 1917, 1918.

Signed: Director of Marine.

Notice to Mariners No. 89 of 1985
Hong Kong Waters, Approaches to Hong Kong – Notification to be made to the Director of Marine by Ships Intending to Enter the Waters of Hong Kong:

1. With effect from 1st January, 1986, and with the intention of simplifying communication procedures, the Master of every vessel over 300 g.r.t. who intends to enter the waters of Hong Kong is required to make the following notification to the Director of Marine.

1.1 Not less than 12 hours before the vessel is expected to enter the waters of Hong Kong, an initial notification providing the information specified in *Annex 1* hereto.

1.2 Not less than 4 hours before the vessel is expected to enter the water of Hong Kong, a confirmatory notification providing the information specified in *Annex 2* hereto.

2. The notification specified should be addressed to "MARDEP" and transmitted directly to "MARDEP", using:

2.1 W/T Communication via Hong Kong Radio (VPS); or
2.2 Telex: 63607 Mdpcc Hx; or
2.3 VHF R/T on Channel 12 (156.60 MHz), calling channel (4 hours notice only).

3. Compliance with the foregoing requirement by Masters of vessels over 300 g.r.t. will be considered by the Director of Marine as satisfying all his requirements for routine communication in advance of a vessel's entry into Hong Kong waters in accordance with:

3.1 The Shipping and Port Control Regulations, Regulation 7 (Shipping and Port Control Ordinance, Cap. 313).
3.2 The Pilotage Ordinance (Cap. 84), section 10E(1).
3.3 Notice to Mariners No. 39 of 1983, permission to enter Hong Kong waters, dated 6th July, 1983.

4. Agents and Masters of ships of 300 g.r.t. or under are reminded that they should continue to apply for permission to enter Hong Kong waters in accordance with Notice to Mariners No. 39 of 1983.

5. This notice updates and supersedes Notice to Mariners No. 60 of 1985 which is hereby cancelled.

Annex 1:

No.	*Required Notification*	*Sample Message*
1.	Name of vessel and call sign	Hardship/GABC
2.	Flag	British
3.	Type (Bulk/Tanker/General Cargo/Container)	Bulker
4.	Gross tonnage (as per register)	24123
5.	Length overall (as per register)	168 m.
6.	Total number of persons on board	22
7.	Reason for call	Disch/Change Crew
8.	Estimated maximum arrival draft	9.7 m.
9.	Any defects affecting manoeuvrability or seaworthiness?	Nil
10.	Any Dangerous Goods of IMO Class 1, 2, 3 (Yes/No and Quantity)	Yes. 14 tonnes, Class 3
11.	Local Agent	Silver Lining
12.	Are you taking a Pilot?	Yes
13.	ETA indicated Pilot Boarding Station	091400 Tathong Ch
14.	Last Port	Keelung

Annex 2

No.	*Required Notification*	*Sample Message*
1.	Name of vessel/call sign	Hardship/GABC
2.	ETA Pilot Boarding Station	091515 Tathong Ch
3.	Any changes to Annex 1?	Nil

Signed: Director of Marine.

Marine Department Notice No. 95 of 1985
Compulsory Pilotage:

1. Notice is hereby given that the Pilotage (Amendment) Ordinance 1985 will come into operation on 1st August, 1985, and apply to every ship subject to compulsory pilotage as specified in the First Schedule whilst navigating in the waters of Hong Kong:

1. A ship of 10,000 g.r.t. or over.
2. A ship of 1,000 g.r.t. or over but under 10,000 g.r.t. proceeding to or from any wharf specified in Part I of the First Schedule, and any container terminal specified in the Third Schedule, to the Dangerous Goods (Shipping) Regulations.
3. A ship of 1,000 g.r.t. or over carrying dangerous goods specified in Categories 1, 2 and 5 in the Schedule to the Dangerous Goods (Classification) Regulations.
4. A ship of 1,000 g.r.t. or over but under 10,000 g.r.t. proceeding to or from a Government Mooring Buoy.
5. A ship of 300 g.r.t. or over which:
   (a) is, for any reason, unable to proceed under its own power, manoeuvre with its own steering gear, or work with its own anchors;
   (b) has any part of the hull structure removed, or under repair, which may affect the water-tight integrity of the ship; or
   (c) is at risk of causing injury to persons or damage to property, any other ship of the environment by virtue of the condition of the ship or the nature or condition of its cargo.

2. Copies of the Pilotage (Amendment) Ordinance 1985 (Gazette Notice Ordinance No. 29 of 1985) may be obtained from the Government Publications Sales Centre, Ground Floor, General Post Office Building, Connaught Place, Central, Hong Kong.

Signed: Director of Marine.

SHIPMASTER'S REPORT: October 1984.

Immigration: Notice to Master – Immigration Clearance on Arrival in Hong Kong (Form 1D 245A)

1. (Text) Being the Master of a vessel, you are required, on arrival of the vessel in Hong Kong, to anchor or moor the vessel at an approved Immigration Anchorage (as illustrated on the back page) for as long as may be necessary for Immigration examination, and hoist the Immigration Examination Signal until an Immigration Officer permits you to lower it. The Immigration Examination signal should be, by day, the letters H. N. N. shown by means of signal flags and, by night, 3 lights coloured WHITE in a vertical line one over the other, equally spaced at a distance of not less than 1 m. and visible from any direction at a distance of at least 1 nautical mile. Failure to comply with this requirement is an offence under the Immigration Ordinance, Cap. 115, Laws of Hong Kong and is punishable with a maximum fine of $20,000.

2. This opportunity is also taken to remind you that it is your duty to ensure that no persons leaves or boards your vessel (except a Port Health Officer or a Pilot in the course of his duty) and nothing shall be removed from or taken or placed on board your vessel before Immigration Examination.

NOTES

Please also advise Shipping Guides Ltd.

Master's Remark: Approaching the Western Quarantine Anchorage without a Pilot was difficult, because of an enormous quantity of Chinese and local junks occupying the very narrow roads, waiting for their turn to be cleared. Vessel dropped anchor at 0900 hrs. local time and first persons to board were 2 Customs Officers who came on board by means of lowered accommodation ladder. They were followed half an hour later by the doctor and thereafter by the ship's Agent and shipchandler. As soon as the yellow flag was lowered bumboat people rushed to the ship displaying their merchandise on the aft part of the ship's deck. When Immigration Officers boarded almost 3 hours later they seemed to be very upset and asked me immediately to remove all persons not belonging to the ship's crew and furthermore to write a letter to their office explaining why I let anybody board before Immigration had cleared the ship. Fortunately I had hoisted the signal H. N. N. as per Agent's advice. With few words, they cleared the vessel at 1400 hrs. and I did not have to pay a penalty. They warned me again and told me on my request, after giving me their circular 1D 245A that nobody including Customs Officers shall board the vessel except Pilot or doctor before them and whenever the Customs Officers want to board before (which is the usual case) the Master is to contact MARDEP on Channel 12 VHF, asking to contact Immigration Office to get Immigration's confirmation for the Customs to board the vessel before Immigration have cleared her. They told me furthermore not to lower the accommodation ladder and to repulse any person who tries to board.

No vessel can obtain Pre-arrival Clearance if they have one person among the crew coming from a Communist country.

Sailing without a Pilot was also not very easy and I strongly recommend Masters to take Pilots whenever entering or leaving the port of Hong Kong due to the great amount of traffic in this port.

MARDEP – Reporting Points: Vessels entering Hong Kong must report their passing to MARDEP on Channel 12 VHF at the following points:

Through East Lamma Channel	*Through West Lamma Channel*
Wang Lan Island	Wang Lan Island
Potoi Island	Potoi Island
LCS 1 Lamma Channel Buoy	
Lamma Patch Channel Buoy	Cheung Chau Island
LCS 2 Lamma Channel Buoy	
Green Island	Green Island

Through Tathong Channel
Wan Lan Island
Tathong Point
Hak Kok Tau (Cape Collinson)
Lei Yue Mun

Iceland

AKUREYRI: 65.41 N. 18.03 W. (See Plan)

DOCUMENTS: See "Reykjavik".
PILOTAGE: Not compulsory but available by arrangement with Harbour Master.
APPROACHES: Natural well protected harbour formed by Oddeyri peninsula and the end of the fjord. Entrance to harbour (Pollurinn) has a width of 800 m. and depth of 47 m.
TUGS: One tug available (Damen "Push-Cat 42", 242 h.p.)
BERTHING:

Berth	*Berth Length (m.)*	*Depth at LW (m.)*	*Remarks*
Krossanes	50	6.0	Oil, fish-oil, meat, cement
Drattarbraut			Slipway
Slippkantur	240	6.0	Ship repairs, asphalt tank
Togarabryggja 1	110	6.5	General cargo
Togarabryggja 2	67	6.5	General cargo
Londunarkantur 1	75	6.0	Fish landing
Londunarkantur 2	65	5.5	Fish landing
KEA-bryggja			Oil
Tangabryggja	65	5.5	Cattle feed
Oddeyrarbryggja	140	7.5	General cargo
Torfunefsbryggja	100	5.5	Passenger

STEVEDORES: Working hours: 0800 – 1200, 1300 – 1700.
MEDICAL: Full hospital facilities available without prior notice.
TANKERS: At Oddeyri (KEA-bryggja) and Krossanes, there are oil berths with depths alongside of 5.0 m. – 6.0 m.
FUEL: Coal and fuel by arrangement.
REPAIRS/DRY DOCKS: Two patent slips, one for vessels up to 200 g.r.t and the other for vessels up to 2,000 g.r.t. Ordinary repairs can be effected. Shipyard has a quay 230 m. long with a depth of 7.5 m. Divers available.
AIRPORT: At Akureyri, 2 km. from the port.
AUTHORITY: Akureyrarhofn, Hafnarstjorinn, Strandgata 25, P.O.Box 407, 602 Akureyri, Iceland. *Tel:* 96-23305 and 96-22346. *Contact:* Baldvin Thorsteinsson, Harbour Master. *Tel:* 96-24391 and 96-23664 Guomundur Sigurbjornsson, Harbour Director.

HAFNARFJORDUR: 64.04 N. 21.58 W. (See Plan)

PORT LIMITS: The seaward boundary is drawn as follows:
Line 1: 020°, from Lat. 64° 02.4′ N., Long. 22° 08.0′ W. ("Hraunsnes").
Line 2: 272°, from Lat. 64° 04.7′ N., Long. 21° 59.2′ W. ("Balaklettur").
These lines cross at Lat. 64° 04.9′ N., Long. 22° 05.9′ W.
DOCUMENTS: Documents required for Customs clearance:
3 copies of Cargo Manifest
2 copies of Crew List and Passenger List
1 copy of Crew Declaration to the Customs
1 copy of Store List
Customs Clearance from Last Port.
PILOTAGE: Pilotage is compulsory for all foreign vessels. The Pilot usually boards the vessel 0.5 miles S.E. of the Outer Buoy (Valhusagrunn, red). Smaller vessels and Masters familiar with the port are invited to proceed to the Inner Buoy (Helgasker, green). The buoyage is IALA "System A". VHF communication with the Pilot on Channel 14.
APPROACHES: Vessels, with a draft of 7.0 m. or greater, are warned that shoals exist at Lat. 64° 04.7′ N., Long. 22° 08.8′ W. (1.5 miles×260° from Valhusagrunn Buoy).
ANCHORAGES: For vessels awaiting the Pilot, a good anchorage is to be found 1 mile S.S.E. of the Outer Buoy (Lat. 64° 04′ N., Long. 22° 04′ W.). Smaller vessels may anchor 0.4 miles North of Hvaleyrarhofdi (Lat. 64° 03.9′ N., Long. 21° 59.9′ W.).
VHF: Pilot on Channel 14.
TUGS: Hafnarfjordur Pilot and tugboat 360 h.p. is available. Further tugs can be ordered from Reykjavik.
BERTHING: The inner harbour is enclosed by 2 breakwaters. The Northern one is 200 m. long and the Southern one 450 m. Entrance channel is 150 m. wide, 9.0 m. deep, bottom soft clay.
North Quay: 255 m. long, depth 5.5 m. to 6.5 m., bottom soft clay. For general cargo and unloading fish.
Oseyrar Pier: 130 m. long and 25 m. wide, depth 2.5 m. to 4.0 m. at Southern side and 5.5 m. to 6.0 m. at Northern, bottom clay. Mainly used for fishing vessels.
South Quay: 150 m. long, depth 6.0 m. to 7.5 m. bottom clay. For general cargo vessels.
Finger Pier: 70 m. long, 10 m. wide, depth 5.5 m. to 6.5 m., bottom clay.
Also see "Tankers".
CRANES: Mobile cranes of various capacities are available.
STEVEDORES: Working hours are 0800 – 1700, Monday to Friday. Overtime can be arranged.
TANKERS: *Oil Pier:* Inside the head of the Southern Breakwater is a berth for oil tankers. Depth 8.0 m., bottom soft clay. Max. draft for arriving tankers is 9.5 m.
Restrictions: Tankers are not berthed during hours of darkness. Berthing takes place during daylight only from 3 hours before to 3 hours after HW.

The fjord is exposed to Westerly winds, which cause a fairly heavy sea, though its force is broken by the gradually shelving bottom. Berthing of tankers is normally not attempted during periods of heavy sea or swell.

Berthing and Mooring: Vessels usually approach the harbour entrance at slow speed heading 099° into the white sector light, while the tug is made fast aft using ship's rope. When off the harbour entrance the vessel is swung assisted by the tug, the port anchor is let go and the vessel is towed in, stern first, and moored portside alongside.

As the breasting leads are short and as there are no head ropes, it is important that the port anchor is positioned correctly and a good hold is obtained, and that the aft spring lines are of adequate strength to prevent the vessel from drifting off the berth or surging back where the bottom slopes up towards the South. It is also very important that moorings are tended carefully during the vessels stay alongside.

The tidal range at the berth is about 13 ft. at spring tides and about 9 ft. at neaps.
DENSITY: 1025.
TIDAL VARIATION: Up to 4.5 m.
FRESH WATER: Available at all quays.
FUEL: Available at all quays.
CONSULS: Available at Reykjavik (10 km.).
REPAIRS: Minor repairs can be undertaken.
DRY DOCKS: None. Slipway for vessels up to 300 tons.
SURVEYORS: Lloyd's Agents and representatives for other Classification Societies are available in Reykjavik and Hafnarfjordur.
CUSTOMS ALLOWANCES: 1 bottle of spirits (0.75 litres); 200 cigarettes or equivalent; 24 bottles of beer or 1 bottle of wine.
AIRPORT: Domestic airport at Reykjavik 10 km. International airport at Keflavik 35 km.
TIME: GMT throughout year.
CARGO SURVEYORS: Konnun hf., Ingolfsstraeti 3, 101 Reykjavik. Tel: 91-28422.
DEVELOPMENTS: South Quay: New quay. Length 120 m., depth 7.5 m. – 8.0 m. To be constructed 1986
AUTHORITY: Captain of the Port, Strandgata 4, 220 Hafnarfjordur. *Tel:* 91-50492, 91-53444. *Contact:* S. Hallgrimsson, Captain of the Port.
Board of Direction, Hafnarstjorn Hafnarfjardar, Strandgotu 6, 220 Hafnarfjordur, Iceland.

ISAFJORD: 66.05 N. 23.06 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: TFZ Isafjord Radio 2182 kHz. To call Pilot use VHF Channels 16 and 12 or morse lamps or whistle "G".
ANCHORAGE: In Fjord, depth of 6 fathoms.
MAX. SIZE: Dry cargo vessels up to 4,000 g.r.t. Tankers up to 30 ft. draft.
HEALTH: Inform Agent.
RADIO: TFZ 2182 kHz and VHF Channel 16.
TUGS: Not required.
MEDICAL: Inform Agent 1 hour in advance. Hospital available.
FRESH WATER: Always available through hose-pipes.
FUEL: All grades available advance notice required is 2 hours.
GANGWAY/DECK WATCHMEN: Necessary. Carried out by crew.
OPENING/CLOSING HATCHES: Performed by crew.
CERTIFICATES: All relevant certificates required.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes each crew member, 400 for Master.
Wine/Spirits: 1 bottle for each crew member, 2 bottles for Master.
Beer: 24 bottles for each crew member. 48 bottles for Master.
IDENTIFICATION CARDS: Not required.
CONSULS: British, German F.R., Norwegian, Swedish, Danish.
REPAIRS: All types of repairs possible.
DRY DOCKS: 1 small dry dock available.
REPATRIATION: No facilities exist.
AIRPORT: Distance from port 2 miles, regular flights.
TIME: GMT. No change.
HOLIDAYS: Work carried out every day.
POLICE/AMBULANCE/FIRE: Police: 3258 and 4222. Fire/Ambulance: 3300 and 3333.
TELEPHONES: None available.
SERVICES: Compass adjusting, radar, echomaster, specialists.
SHORE LEAVE: Allowed.
AUTHORITY: Isafjardarhofn, Box 183, Isafjordur, Iceland. *Tel:* 94-3295.

KEFLAVIK-NJAROVIK: 64.00 N. 22.33 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilotage is compulsory for vessels over 100 tons net. Pilot is available for all vessels 24 hours per day and is reached via Reykjavik Radio. Pilot boards vessel 1 mile outside Vatnsnes.
ANCHORAGE: Outside the harbour in depths of 27 m. with good holding ground.
TUGS: Use of tug is not necessary.
BERTHING: Port has concrete pier which will be extended for a length of 110 m., and a wooden quay 45 m. in length. Depth of water in harbour and alongside wharves is 20 ft. to 45 ft. Entrance is easy for access.
STEVEDORES: Working hours: 8 hours per day 0800 to 1700 hrs.
FRESH WATER: Available through hose connection on the quay.
FUEL: Available.
REPAIRS: 2 shipyards available.
AIRPORT: Keflavik International Airport is only 4 km. away.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All Tel: 2222.
TELEPHONES: None available on board.
SHORE LEAVE: Allowed.
AUTHORITY: Harbour Master.

NESKAUPSTADUR, Nordfjordur: 65.09 N. 13.41 W.

DOCUMENTS:
Crew List.
Passenger List.
Customs Documents.
Provision List.
Manifests and Ship's Papers.

PILOTAGE: No Pilots. Road clear, keep in middle of fjord.

ANCHORAGES: Depending wind. With North or N.W. winds anchor towards South coast and well in the fjord. When N.E. off town towards North coast, but keep clear of small boat moorings.

MAX. SIZE: Length/breadth no restriction. Main quay is 70 m. long and it is built right out to the steep bank at the coast. Depth close to jetty 7 m. but increases quickly.

HEALTH: Free Pratique automatic from Customs Officer. Radio for doctor if illness on board.

RADIO: Neskaupstadur Radio 2182 kHz (TFM) 24 hour watch. VHF, Channels 16 and 26. Range approximately 40 miles.

TUGS: No tugs but large motor-boats are normally obtainable if necessary.

BERTHING: No specific requirements unless over 7 m. draft, when fendering required.

STEVEDORES: If possible 24 hours ETA. Preferably before 1600 hrs. for commencing next morning. Load or discharge rates according to goods.

MEDICAL: Always send advance notice of required medical attention. Hospital available, also 3 doctors and dentist.

TANKERS: Diameters of lines 4 in. and 6 in. Oil companies BP and Shell have their own small quays. The third company Esso uses BP jetty.

DENSITY: Normal.

FRESH WATER: Shore line on jetty. No barge.

FUEL: Diesel oil only.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: Ship's Register.

CUSTOMS ALLOWANCES: 200 cigarettes a week while in Iceland. Only 1 allowance of spirit, i.e. on arrival 1 to 3 bottles according to occupation.

IDENTIFICATION CARDS: Not required.

CONSULS: Denmark Tel: 7299, 7430. France Tel: 7119, 7114.

REPAIRS: Limited repairs to engines, hull and deck. Good repairs to radars, sounders, tiller pilots, etc.

DRY DOCKS: None. 1 slipway, 450 tons.

REPATRIATION: Winter flights twice a week or more. Summer every day.

AIRPORT: Distance 3 km.

TIME: GMT, no alterations.

HOLIDAYS: Last Thursday April; 17th June; 1st May; 25th and 26th December; New Year, etc. If work is carried out 31st December, 24th December, Saturday before Easter and Whitsun double pay is claimed.

POLICE/AMBULANCE/FIRE: Telephone office at shore end jetty.

TELEPHONES: No arrangement to place telephones on board.

SERVICES: No tank-cleaning equipment. No discharge of tank-washings. Compass adjusting available.

SHORE LEAVE: Allowed.

DELAYS: None except if berth not available.

DEVELOPMENTS: No expected draft increases. New berths are under construction but will take unforeseen time.

PATREKSFJORDUR: 65.35 N. 23.59 W.

DOCUMENTS: 8 Crew Lists, Passenger Lists, Custom Documents, Health Documents, Manifests, Bills of Lading, Ship's Papers.

PILOTAGE: Pilotage not compulsory, but if needed then contact Radio Patreksfjordur on 2182 M/F.

ANCHORAGE: Anchorage is sheltered by the peninsula.

MAX. SIZE: See "Berthing".

RADIO: Radio Patreksfjordur on 2182 M/F.

TUGS: Available.

BERTHING: The entrance has a depth of 4.7 m. to 4.9 m. (15.5 ft. to 16 ft.) at LLWST. The harbour has a depth of 6.4 m. (21 ft.) at LW, and 10 m. (33 ft.) at HW. 320 m. of quayage with depths from 5.5 m. to 5.8 m. (18 ft. to 19 ft.) alongside. The harbour can be entered by day and night.

STEVEDORES: Working hours 0800 to 1900 hrs.

MEDICAL: Hospital available, contact through radio.

FRESH WATER: Available. No notice required.

FUEL: Available. No advance notice required.

REPAIRS: Machine-shop. General repairs can be effected. Diver obtainable.

AIRPORT: About 26 km. distance from harbour. Regular service, by airlines.

TIME: GMT. No change.

SHORE LEAVE: Allowed.

AUTHORITY: Patrekshofn, Patreksfiroi.

REYKJAVIK: 64.09 N. 21.56 W. (See Plan)

DOCUMENTS:
For the Immigration Office
1 Crew List.
1 Passenger List.
For Customs Authority
Master's Report on vessel's arrival from abroad.
Master's Certificate with Manifests of all goods.
Master's Certificate with Manifests of goods to each port of discharge.
Health Declaration.
List of Provisions and other Stores in ship.

Ordinary procedure at least 5 copies of each manifest (3 for Customs).

PILOTAGE: Pilotage compulsory. Telegraphic address: Harbour Master, Harbour Office, Reykjavik. Desirable advance notice of ETA 24 hours and again notice 3 hours before expected time of arrival. VHF working Channels 12 and 14 at pilot station and pilot boats. 24 hour watch maintained.

Pilot boat: Grey hull with red and white deckhouse. International signals used if necessary. Pilot boat leaves harbour on request and meets vessel up to 1 nautical mile off Grotta (East of Buoy 6). Most frequent boarding place is Buoy 7 Kollafjordur.

ANCHORAGES: Good anchorage at Kollafjordur in 30 to 35 m. water 1.5 miles North of Engey Lighthouse. Anchorage prohibited in neighbourhood of harbour entrance.

RESTRICTIONS: All day service. Draft in old harbour restricted at MLWST to 18 ft. In Sundahofn to 26 ft. No other restriction.

MAX. SIZE: Longest straight quay 280 m. Breadth unrestricted. Depth 26 ft. at MLWST (29 ft. at MLWNT). At present 3 installations for oil carriers to discharge through submerged pipe-lines. Moorings for about 20,000 d.w.t. ships and draft restriction to 21 ft. in the approach to one of these installations.

HEALTH: Pratique obtained through Customs Authorities. In case of suspected disease notify port office or Agent in advance.

RADIO: Reykjavik Radio TFA.

RADAR/VHF: No harbour radar. Pilot office can be contacted by VHF Channel 16. Working Channels 12 and 14.

TUGS: Tugs meet vessels on roadstead. Ship's lines used. One ocean-going tug 1,000 h.p. and 2 smaller tugs available.

BERTHING: Larger vessels preferably handled at high water.

Old Harbour: The Old Harbour is protected by two moles leaving a 100 m. wide entrance. It is divided into the Fishing Harbour (West Harbour) and General Cargo Harbour (East Harbour) where coastal passenger traffic is also served.

In the Old Harbour there are several areas for ship maintenance, the main slipways and a great number of firms specialised in services for the fleet.

Quayage is about 3,300 m. of which there are 600 m. only for smaller fishing craft. Draft at the entrance is 7.0 m. (23 ft.) at MLWST, and depth at quays 5.5 m. to 6.5 m. (18 ft. to 21 ft.). bottom is sand and mud.

Sunda Harbour – Vioeyjarsund: The new harbour area in Vioeyjarsund was opened in 1968. Since then a growing part of the general cargo has been moved through this area with a special quay for grain and a container terminal with Lo-Lo and Ro-Ro facilities. The entrance to the area is not restricted and water depth is more than 8.0 m. (26 ft.) at MLWST. Length of quays is 630 m. with a water depth of 8.0 m. (26 ft.) at MLWST. Bottom is sand and mud.

Sunda Harbour – Kleppsvik: A new harbour area for general cargo is under development in Kleppsvik. The entrance will be a 50 m. wide channel dredged to 7.0 m. (23 ft.) at MLWST. The water depth at the quay will also be 7.0 m. (23 ft.). Length of quay 200 m. 1×32 ton Paceco Portainer with outreach 31 m. available. Ro-Ro Ramp available.

Sunda Harbour – Grafarvogur: The harbour area in Grafarvogur was opened in 1968. This area is used for discharging and storing of cement, gravel and asphalt for industries in the vicinity. Further development is planned for industries with special requirements. An approach channel has been dredged to 4.0 m. (13 ft.) at MLWST and water depth at the quay is 4.5 m. (14 ft.).

Eiosvik: In Eiosvik there is a quay for the State Fertiliser Plant. The entrance is unrestricted with deep water to the quay. Eiosvik offers the best natural site for large ships in the Port of Reykjavik.

STEVEDORES: Stevedoring must be arranged in advance preferably by Agent. Working Hours: 0800 – 1700 hrs. With labour unions permission, work may be carried out until 2200 hrs. and on Saturdays.

MEDICAL: Medical attention available without notice. For hospital stay or surgical operation advance notice desirable, either through Agent or port office.

TANKERS: Submarine pipe-lines diameter for discharging are 8 in. 3 terminals handling vessels of 7,000 – 15,000 g.r.t. Vessels moor to buoys.

DENSITY: Salinity varies from 33.6% to 35.0% giving sea water density about 1027 in average.

FRESH WATER: Water delivered from taps at quay at rate of 20 – 30 t.p.h, on the roadstead delivered by tug with 50 cu. m. water-tank.

FUEL: Grade of fuel oil 200 – 400 per second. Supplied by oil-pipe or by barge. If supplied by barge then 1 day's notice required.

FIRE PRECAUTIONS: Ordinary precautions for handling of dangerous goods applied.

CERTIFICATES:
1. Certificate of Nationality.
2. International Tonnage Certificate.
3. Certificate of Seaworthiness.
4. Cargo Ship Safety Construction Certificate.
5. Cargo Ship Safety Equipment Certificate.
6. Cargo Ship Safety Radiotelegraphy Certificate or Cargo Ship Safety Radiotelephony Certificate.
7. International Load Line Certificate.

Passenger ships must have certificates No. 1, 2, 3, 7 and in addition Passenger Ship Safety Certificate.

GANGWAY/DECK WATCHMEN: Ship's gangway to be used. Watchmen services from ashore not necessary but can be arranged if asked for.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: 200 cigarettes or equivalent. 0.75 litre beverage, 24 bottles beer.
IDENTIFICATION CARDS: Identification card must be carried.

SURVEYORS: Lloyd's Register, Norske Veritas, Germanischer Lloyd and Bureau Veritas.
REPAIRS: All kinds of ship repair possible.
DRY DOCKS: Only slipways available up to 2,000 metric tons weight. Dimensions: Length 85 m., breadth 13.6 m.
REPATRIATION: Can be arranged.
AIRPORTS: Reykjavik Airport within 10 minutes drive. Mostly for local routes. Keflavik Airport 50 km. distance, served regularly by airlines both to Europe and America.
TIME: Icelandic Summertime used all year round and is same as GMT.
HOLIDAYS: January 1st (New Year's Day); Maundy Thursday; Good Friday; Easter Monday; May 1st; Ascension Day; Whit Monday; June 17th (National Day); First Monday in August (Bank Holiday); Christmas Day and Second Christmas Day. On Christmas Eve and New Year's Eve work stops at noon. Dock work goes on on Bank Holiday and by Labour Union permission work may be carried out on Saturday against overtime payment and exceptionally at night until 2200 hrs.
POLICE/AMBULANCE/FIRE: Police (Main station) 11166; Police (Harbour Station) 10145; Ambulance 11100; Fire 11100.
TELEPHONES: Telephone connection can be arranged at some berths in the old harbour and in Sundahofn telephone connections will be at the quay.
GENERAL: Engines may not be run while ship is berthed.
SERVICES: Compass adjusting carried out by private firm as well as tank cleaning.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Normally no delay is to be expected beyond that caused by normal customs clearance.
DEVELOPMENTS: Extension of terminal facilities at Sundahofn under preparation.
AUTHORITY: Port of Reykjavik, Box 382, 121 Reykjavik, Iceland. *Tel:* 354-1-28211. *Telex:* (Via Easylink – London) 051-946240. Ref. 19022255. *Contact:* The General Manager.

SIGLUFJORD: 66.10 N. 18.50 W. (See Plan)

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Compulsory. Pilot meets vessel about 400 m. from harbour entrance.
ANCHORAGE: East of harbour in depths according to draft. Depth 25 m. to 30 m. good holding ground. Gales from North set heavy sea, vessels then seek anchorage in small bay S.W. of Siglunes.
RADIO: Siglufjordur Radio TFX 2182 kHz.
VHF: Channels 16, 24, 26 and 27.
TUGS: None available.
BERTHING: There are several piers and wharves inside the North Mole, 4 quays used by larger vessels have depths up to 23 ft. at LW and lengths from 50 m. to 125 m.
STEVEDORES: Available. Working hours 0700 to 1200 hrs. and 1300 to 1700 hrs.; overtime can be arranged.
MEDICAL: All facilities available.
FRESH WATER: Available.
FUEL: Available in general grades only.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Stevedores normally perform this work.
CARGO GEAR: Ship's own gear (no cranes).
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark Tel. 71672 Sweden Tel. 71440
REPAIRS: For moderate size vessels can be obtained. Diver available.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: All tel. 71170.
SHORE LEAVE: Allowed.
AUTHORITY: Siglufjardarkaupstadur, Granugotu 28, 580 Siglufjordur, Iceland. *Tel:* 71237, 71433. *Contact:* K. Rognvaldsson, Captain of the Port.

SKAGASTROND: 65.50 N. 20.20 W.

DOCUMENTS: As for "Reykjavik".
PILOTAGE: Pilots are available. When approaching port, order Pilot through Agent if required.
MAX. SIZE: Max. draft 19 ft.
MEDICAL: Doctor available but located in Blonduos 20 km. away, doctor visits Skagastrond 3 days a week.
FRESH WATER: Available.
FUEL: Available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
REPAIRS: Small repairs available.
AIRPORT: Nearest 20 km. away in Blonduos.
TIME: GMT. No change.
POLICE/AMBULANCE/FIRE: Police Station and Firemen in the port.
TELEPHONES: Available.
SHORE LEAVE: Allowed.
AUTHORITY: Arnason Berger, Straumnes, 545 Skagastrond, Iceland. *Tel:* 95-4614.

STRAUMSVIK: 64.03 N. 22.03 W. (See Plan)

PORT LIMITS See "Hafnarfjordur".
DOCUMENTS: See "Hafnarfjordur".
PILOTAGE: See "Hafnarfjordur".
APPROACHES: See "Hafnarfjordur".
ANCHORAGE: See "Hafnarfjordur".
TUGS: See "Hafnarfjordur".
BERTHING: This harbour is operated by Hafnarfjordur. Inside the breakwater is a berth, 220 m. long and depth 12.0 m. The entrance channel is 160 m. wide with a depth of 10.0 m.
CRANES: Two 8 ton harbour cranes for handling general cargo.
BULK CARGO FACILITIES: There is a suction unloader for discharging alumina.
DENSITY: Mixed salt and fresh water.
TIDAL VARIATION: Up to 4.5 m.
FRESH WATER: Available.
FUEL: Available.
CONSULS: Available at Reykjavik (10 km.).
REPAIRS: See "Hafnarfjordur".
DRY DOCKS: See "Hafnarfjordur".
SURVEYORS: See "Hafnarfjordur".
CUSTOMS ALLOWANCES: 1 bottle of spirits (0.75 litres); 200 cigarettes or equivalent; 24 bottles of beer or 1 bottle of wine.
AIRPORT: Domestic airport at Reykjavik 10 km. International airport at Keflavik 35 km.
TIME: GMT throughout year.
CARGO SURVEYORS: Konnun hf., Ingolfsstraeti 3, 101 Reykjavik. Tel: 91-28422.

SHIPMASTER'S REPORT: June 1985.
Documents: Immigration: 1 Crew List and 1 Passenger List.
Customs: Form 1. Master's Report on vessel's arrival.
Form 2. A combined form listing alcoholic beverages, other beverages, tobacco, playing cards, arms, radios, typewriters, etc. victuals and ship's equipment (fuel, lubes, paints, wire and rope etc.).
Form 3. Crew Personal Effects Declaration.
Form 5. Health Declaration.
Form 9. Certificate regarding un-manifested cargo.
Form 10. Certificate of Manifested cargo.
Pilotage: This is a satellite port under the jurisdiction of Hafnarfjordur Harbour Authority, who supply Pilots. Prior notice via Agents. Confirm by VHF to "Hafnarfjordur Pilots", but will also answer to "Straumsvik Pilots". Pilot boards 1 – 1.5 miles outside harbour.
Anchorage: A short term anchorage available close off the port, but poor holding. Good holding found 5.5 miles to N.W., in depth of 22 fathoms, 2.5 miles North of Keillinses.
Restrictions: Large ships berthed and unberthed in daylight only.
Max. Size: Normal max. length 210 m. O.A. Beam unlimited. Depth 12 m., and max. draft guaranteed by charterers 37 ft. (11.28 m.).
Berthing: This port is very small, with one berth only on the inner side of the breakwater. Ships handled comprise about 4 vessels a year of up to 60,000 d.w.t. importing Alumina from Australia for the Icelandic Aluminium Company smelter. Also about 65 vessels a year, of less than 3,000 tons load Aluminium ingots for export.
Tugs: On berthing a tug with bollard pull of 10 to 12 tons, which travels from Reyjavik, is used forward, and the pilot boat, with bollard pull of 3 tons is used aft. In the case of large vessels ships berth head in/port side to.

Cargo Operations: One suction unloader discharges Alumina at about 250-300 t.p.h. For 38,000 tons allow 6 days in port. No public holidays are observed while discharging Alumina. Two travelling cranes also available for loading ingots (8 tons at 20.8 m. radius).
Density: Salt water.
Fuel: Not available.
Fresh Water: Available at about 16 t.p.h.
Provisions: Available at high cost from Hafnarfjordur or Reykjavik.
Other Facilities: None. All minor repairs, medical, Agents, etc., will travel from Reykjavik. There is no permanent population at Straumsvik.
Directions: A group of three conspicuous silos, painted red and white, and about 35 m. in height, are located close to the root of the breakwater and are visible from many miles away.

AUTHORITY: Captain of the Port, Strandgata 4, 220 Hafnarfjordur. *Tel:* 91-50492, 91-53444. *Contact:* S. Hallgrimsson, Captain of the Port. Board of Direction, Hafnarstjorn Hafnarfjardar, Strandgotu 6, 220 Hafnarfjordur, Iceland.

VESTMANNAEYJAR: 63.30 N. 20.14 W. (See Plan)

DOCUMENTS:
- Health Certificate.
- Crew List.
- Passenger List.
- Manifest.
- Ship's Register.

PILOTAGE: Pilotage compulsory, day and night service. Ship to advise over Vestmannaeyjar Radio ETA. Pilot always available but 1 hour's advance ETA is required.
ANCHORAGE: There are anchorages with depths from 24 m. to 34 m., good holding ground about 0.5 miles North of harbour and on North side of peninsula in depths of 28 m. to 34 m.; this anchorage is exposed to winds between West and North.
RESTRICTIONS: No restrictions except for largest vessels. They must enter at high tide.
MAX. SIZE: 5,000 g.r.t.
RADIO: Vestmannaeyjar Radio. VHF available.
TUGS: Normally join in-coming vessels at anchorage. The use of tug is optional. 1 Tug, 500 h.p.
STEVEDORES: Available. Ordered by Agent. Working hours: 0800-1700 hrs., Monday-Friday.
CRANES: 2 mobile cranes, capacity up to 15 tons.
MEDICAL: Not necessary to receive advance notice. Hospital facilities and doctors available.
TANKERS: Discharge lines, 7 in. No deballasting facilities available.
FRESH WATER: Shore installations on every berth.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Stevedores.
CUSTOMS ALLOWANCES: For each crew member; 100 cigarettes or 20 cigars or 100 grm. tobacco, and 1 bottle spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: Denmark, Germany F.R., Norway, Sweden and United Kingdom. To be called through Vestmannaeyjar Radio.
REPAIRS: All repairs possible.
AIRPORT: Local airport. Daily connection to Reykjavik.
TIME: Local time GMT.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday; Labour Day (1 May); Ascension Day; Whit Monday; National Festival Day (17 June); Prayer Day; Christmas Day (25 December). No work on New Year's Day, Good Friday, Easter Sunday, Whit Sunday, 17 June, Christmas Day.
POLICE/AMBULANCE/FIRE: All tel. 1666.
SERVICES: Radio, radar services etc. Divers available.
SHORE LEAVE: Allowed.
DEVELOPMENTS: Depth of entrance to harbour to be increased to 6.5 m. New Quays on North Side of harbour to be built in the near future.

SHIPMASTER'S REPORT: August. 1985.
Vessel: Research vessel, length 55 m.
Approaches and Pilotage: Heimaey is the harbour on the largest island in the Vestmannaeyjar Group; off the S.W. corner of Iceland. It is principally a Fishing Port, and is one of the few places providing shelter on the South Coast of Iceland.

ETAs are sent to Vestmannaeyjar Radio.

The Pilot normally boards from a white and red tug, between Heimaey and Bjarnarey Islands, but in S.E. gales a vessel should go to the North side of Heimaey.

A narrow, tortuous channel, with high cliffs on the North side, and a recent (1973) lava flow on the South, leads into an old Volcano crater where a port has been built.
Berths: The quays are modern, and well fendered. We found the harbour full of Fishing Boats, but space is kept for visiting vessels. Turning room is restricted, and high winds could make it difficult. The Pilot Tug assists as required.
Officials/Documents: Icelandic Officials can be very strict.

I prepared: 2 Crew Lists, 2 Ship Store Declarations (British Form C14 was accepted, as this was similar to the Icelandic Form). 2 Lists of Items in Bond – including Beer. 2 Personnel Declarations. 2 Ship's Bar Declarations (Including Beer).
Services: A courteous and efficient service was provided.

Water Supplied ex-quay at 10 t.p.h.

Fuel Delivered by Road Wagon, 5 tons at a time. Both IFO 30 and Gas Oil were available. We were able to alter the stem without any bother.
Provisions: Small quantities available through the Agent on Wednesdays.
Repairs: There are several Slips for fishing vessels.
Cranes: Mobile cranes are easily available.
Communications: Flights are frequent to Reykjavik, and there is a ferry to the Mainland.
Recreational Facilities: The main Tourist Attraction is the Volcano, still smoking from the 1973 eruption.

Good views of the spectacular Harbour and Entrance can be had by climbing up into the surrounding hills. The commercial area, near the Docks, is mainly taken up by the Fishing Industry. There are a few shops, a Bank and a Post Office. Prices are reported to be high.

There are some Snack Type Bars. Beer is Banned! Spirits are available – at a price.
AUTHORITY: Harbour Master.

NOTES

Please also advise Shipping Guides Ltd.

India

GENERAL

COURTESY FLAG: Correct flag to be flown by foreign ships visiting Indian ports is Indian Merchant Navy Ensign (a red flag with a length of one and one half times the width and with National Flag of India superimposed in top quarter next to staff) and not Indian National flag.

SHIP'S OFFICER'S REPORT: Apart from the various forms and Crew Lists, etc., the Customs Boarding Officer also requires a List of Private Property in possession of the Master, officers and crew on Form No. IV in duplicate and the local Agents need 2 more copies of the same for clearing the vessel inward. This procedure is followed when a vessel arrives from abroad or even when she is arriving from an Indian Port. It is common in both the cases.

ALLEPPEY: 09.29 N. 76.23 E.

PORT LIMITS: On the North by a line drawn from the North boundary pillar (white masonry structure) to 7 fathoms of water. On the South by a line drawn from the South boundary pillar, S.W. to 5 fathoms of water and thereon West to 7 fathoms of water. On the West by a line running North to South joining the Northern and Southern boundary lines. On the East by the beach road from the North boundary pillar to a stone on the beach road 220 ft. East of South boundary pillar.

DOCUMENTS:

(a) For Port Office:

Last port clearance (original for verification and return). Ships' Registry (original for verification and return). Load Line Certificate (for perusal and return). Safety Radio Telegraphy Certificate (for perusal and return). Safety Equipment Certificate (for perusal and return). Passenger List (1). Crew List (1). Deck Cargo Certificate (1).

(b) For Customs:

Application for entry inwards. Last Port clearance. Port Office Entry Certificate. Arrival report. Particulars required by Customs in approved form. Favour Parcel Certificate. Gift Parcel Certificate. Health Report. Opium Certificate. Arms and Ammunition Certificate. Import manifest. Passengers list. Stores list, crew list, and private property declaration. Ship's currency declaration. ILH receipt.

PILOTAGE: None. Open roadstead port.

ANCHORAGES: Approach to port free from navigational dangers. The anchorage, 3 miles offshore, provides good holding ground.

MAX. SIZE: Being open roadstead, vessels of any size can anchor according to draft.

HEALTH: Port Health Officer may be contacted by telegram addressed "Cyclone Alleppey" for issue of Pratique certificate. Procedure to be followed in Indian Port Health Rules.

RADIO: Morse system of signalling by light and signalling by International Code flags alone are available. Vessels code can be used as call sign.

TUGS: 2 tugs owned by Port Department render services per requisitions from Agents. Tugs usually approach vessels after anchoring.

BERTHING: No Berths. Electric cranes on the pier.

MEDICAL: Government hospitals available.

DENSITY: 1025.

FRESH WATER: Only available in very small quantities.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Necessary only when crew land ashore.

CONSULS: Nil.

REPAIRS/DRY DOCKS: None.

REPATRIATION: Crew changes are effected subject undertaking by Owners through Agents.

AIRPORT: Cochin, 62 km. North of Alleppey. Internal flights only.

TIME: GMT plus 5.5 hours.

HOLIDAYS: For work on approved closed port holidays and national holidays labourers have to be paid extra in addition to wages.

POLICE/AMBULANCE/FIRE: Emergency (Fire and Police) 100 Alleppey Exchange.

SHORE LEAVE: Crew allowed to land. Foreigners required obtain prior permission of Police authority through Agents.

AUTHORITY: Senior Port Conservator.

BEDI BUNDER: 22.31 N. 70.02 E.

DOCUMENTS:

1 Maritime Declaration of Health.
1 Last Port Clearance.
6 Crew Lists.
6 Passenger Lists.
4 Stores Lists.
4 Private Property List of crew and officers.
4 Certificates of Currency, Arms and Ammunition and Deck Cargo.
1 Same Bottom cargo list.
1 Hazardous Cargo List with categories.

PILOTAGE: Vessels anchor at roads as pilotage not compulsory; however, if requested in advance by Master to "Portal Bedi", ship may be piloted from Pirotan Lighthouse to Rozi Anchorage about 7 miles from port by local Pilot Guide. Pilot boards vessel off Pirotan Island Light (Lat. 22° 36′ N., Long. 69° 57′ E.).

ANCHORAGE: Lighterage port. Vessels anchor at Rozi Anchorage about 7 miles from port, where good anchorage up to 7 fathoms at LW.

HEALTH: Pratique granted on delivering Maritime Declaration of Health to Customs Officer on boarding. Vessels having touched yellow fever area prior to arrival granted Free Pratique by Mosquito Party to be deputed from Kandla, which can only be arranged by prior notice failing which vessel has to proceed either Kandla or Bombay for Free Pratique.

RADIO: Call sign VUK5. Working hours:

0930 – 1130 hrs. 1730 – 1930 hrs.
1330 – 1530 hrs. 2130 – 2330 hrs.

Frequency 600 m. or 500 kHz, working at 429 m. and calling at 500 m.

TUGS: Port tug available for use at anchorage.

BERTHING: No berths.

STEVEDORES: Agents and stevedores require advance ETA of 24 hours for preparing labour gangs. Daily loading is 400/500 tons for bagged cargo.

MEDICAL: 24 hours notice required for medical service. Government hospital at Jamnagar where vaccination/fever injection services available.

DENSITY: 1025.

FRESH WATER: Supplies by barge capacity 50 tons. Possible supply about 50 tons every alternate tide subject adequate supply of water in port area.

FUEL: None.

GANGWAY/DECK WATCHMEN: The services of watchmen are recommended.

OPENING/CLOSING HATCHES: By ship's crew.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Exemption Certificate.
Cargo Gear Certificate.

CONSULS: None.

REPAIRS: No facilities for repairs to ships.

DRY DOCKS: None.

AIRPORT: Jamnagar 7 miles from city. Daily flight Jamnagar-Bombay.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Non-working days and work not permitted even on payment of overtime charges: Indian Republic Day; Bakri-Id; Holi; Muharram; Gokulastami; Dasehra; Diwali; Ramzan-Id.

POLICE/AMBULANCE/FIRE: District Superintendent of Police 100 and 3795; Ambulance/Casualty Department 4444; Fire 101.

SHORE LEAVE: Crew members allowed ashore in emergency or for medical treatment. Necessary police permits take 48 hours.

REGULATIONS: No launch services available for crew. Only 5 ships allowed to work at time at anchorage. Further arrivals wait turn.

DELAYS: Delay expected for loading and discharging in monsoon due to limited number of barges available.

GENERAL: Tidal port and barges loaded and sent out to ship during tide time only. Loading of barges carried out manually.

DEVELOPMENTS: The scheme of creating additional facilities, road connection, transit godowns, electrification and water supply and cranes, etc. near mouth of creek. This newly developed area is completed and connected by good all weather road with city of Jamnagar.

AUTHORITY: Port Officer.

BELEKERI: 14.43 N. 74.15 E. (See Plan)

PORT LIMITS: *North:* A line drawn due West from Kawada Guda Peak into the sea up to 7 fathoms of water starting from a point 50 yards above high-water mark of the shore.

East: Seashore of Belekeri Bay 50 yards above high-water mark from North Boundary Mark to rocky promontory in Lat. 14° 40′ N. including the Belekeri Creek and all branches thereof, as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including Islands. All patta lands and other private sites excluded.

South: A line drawn due West from a point 50 yards above high-water mark of rocky promontory in Lat. 14° 40′ N. into the sea up to 7 fathoms of water.

West: A line joining the two 7 fathom points in the sea.

DOCUMENTS:

8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists.
4 Import Manifests.
Last Port Clearance.

PILOTAGE: Not necessary. Vessels anchor in stream and in open sea. Ships can be manoeuvred under guidance of Port Officer.

ANCHORAGE: The anchorage for shallow draft vessels in open roadstead is with Kukra Island bearing 080°(T) distance about 1.5 miles in depth of 27 ft. to 29 ft. Anchorage for deep drafted vessels is with Kukra Island bearing 080°(T) distance about 2.5 miles in depth 34 ft. to 37 ft.

HEALTH: Medical Officer, Ankola acts as Port Health Officer. Free Pratique to incoming vessels granted by radio. All vessels calling from foreign destination must send radio message addressed "Medical Officer, Ankola", at least 48 hours before entering, giving last port of call, number of crew, health conditions, ETA and requesting Pratique; same message must be repeated to Agents also, on which Pratique granted on shore. Anchoring time is Pratique time. For vessels from Indian ports Pratique not required. Vessels which have taken on board passengers or crew from yellow fever areas within 30 days of departure from such ports will be under quarantine. Free Pratique will not be granted until Mosquito Search Party, from nearest major port (i.e. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship fit for granting Pratique. Master to inform Agent well in advance if arriving from yellow fever area to enable arrange Mosquito Search Party for quick Pratique.
RADIO: Recommended to give ETA or Pratique messages via Goa or Bombay Radio.
BERTHING: No berths.
STEVEDORES: ETA required at least 48 hours prior arrival order Agents advise Shippers and stevedores.
MEDICAL: No hospital but good medical aid given at Karwar, 20 miles distant. In case of inoculations and vaccination at least 2 days advance notice to be given for vaccines to be brought from Hubli or Bombay, distance 100 and 150 miles respectively.
DENSITY: 1025.
FRESH WATER: Can be supplied from Karwar by water barge.
FUEL: None.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Generally done by ship's crew.
CERTIFICATES:
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Vaccination and Inoculation Certificates.
CUSTOMS ALLOWANCES: 200 cigarettes allowed per crew member. Wine and/or Spirit: 1 bottle of light spirit and 1 bottle of hard spirit per crew member.
CARGO GEAR: Valid International Cargo Gear Certificate not more than 12 months old. Validity shall cover whole period of loading and discharging.
IDENTIFICATION CARDS: Not required.
CONSULS/REPAIRS/DRY DOCKS: None.
REPATRIATION: Arranged from Goa or Bombay.
AIRPORT: Nearest airports Goa or Bombay.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Port Authorities. Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).
POLICE: Tel: 49.
SHORE LEAVE: Permission may be obtained (Chinese personnel not allowed to land on shore).
AUTHORITY: Port Conservator, Belekeri, Ankola, Uttar Kannada District, Karnataka State, India. *Tel:* Belekeri 22.

BHAVNAGAR: 21.47 N. 72.08 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Certificate.
Manifest on prescribed form (3 copies).
Declaration of private and personal property.
2 Copies of Crew List.
Customs circulation copy issued by Boarding Officer of last Indian Port of call.
Place and date of Derat Certificate.
PILOTAGE: Pilotage should be arranged in advance through ship's local Agent who may be contacted via the port radio, call-sign VUJ-9. An ETA should be sent at least 48 hours in advance in order to arrange Pilot. Pilotage is compulsory. Pilot boat is normally a tug boat which can be contacted by VHF. Pilot station is 4.5 miles N.N.E. of Piram Island Lighthouse and pilot boat will only be on station when the vessel is scheduled to arrive. Vessels should arrive at pilot station about 2 hours prior to time of HW and are advised not to anchor awaiting a Pilot but to make a reciprocal course until arrival of the pilot boat.
ANCHORAGE: Vessels up to 31 ft. draft are anchored about 3 miles Eastward of Perigee Light Vessel. All vessels at anchorage are loaded and discharged by means of lighters.
Precautionary guidance to the Master of the Ship arriving at Bhavnagar Anchorage:

1. Proper anchorage watch to be kept throughout the period at the anchorage.

2. Engine should be kept on stand-by so as to be made available within 20 minutes in case of an emergency when Spring tides are running.

3. To prevent yawing during Spring tides a second anchor is to be used with about 2 shackles and must be heaved up and dropped well in advance of every turn of the tide, (about 1.5 hours before and after tide change) so as not to foul the anchor.

Suggested routine is as follows:
(a) Heave up the riding anchor to one shackle.
(b) Steer well clear, about 35° to 40° from the leading anchor.
(c) Let go second anchor.
(d) Walk back to get good lead on second anchor.
(e) Let go second anchor 1.5 hours after HW.
(f) Heave up second anchor 1.5 hours before LW.
(g) Let go second anchor 1.5 hours after LW.
(h) Heave up second anchor 1.5 hours before HW.
(i) Never clear the fouled anchors during the middle of the tide, it should be done at slack water, i.e. about 1.5 hours before relevant end of the tide.
(j) In case of violent shearing the steering may be used. Auto-pilot can be made use of to steer a course in between yaw.

MAX. SIZE: Up to 500 ft. length, and up to 65 ft. breadth may berth alongside.
Permissible draft for a particular tide is arrived at by subtracting 13 ft. from predicted height of HW for that particular tide.
HEALTH: Healthy ships are granted Pratique by the Pilot. If the Vessel is coming from a Yellow Fever area or a jigger infected port within the last 30 days then Pratique is granted by the Port Health Officer at Kandla.
RADIO: Bhavnagar Port Radio, call sign VUJ-9 should be used for routing ETA messages, and is also used by Agents in cables to shipping.

Time of operation: 0200 – 0700 hrs.
0800 – 1300 hrs.
1400 – 1800 hrs.
Range: 250 miles.
Calling Frequency: 500 kHz and VHF Channel 16.
Working Frequency: 418 kHz and VHF.

VHF: Port Control available 1100 hrs. to 1800 hrs. on Monday to Friday and 1st and 3rd Saturday of each month.
TUGS: Tug assistance is available for berthing and unberthing vessels in inner harbour. Position where tugs join the vessel is dependent upon prevailing weather conditions. Usually ship's lines are used in connections to tug.
BERTHING: Berthings are as per tides and according to permissible drafts. Port equipped with 3 berths having 6 cranes with 3 tonnes capacity. Cranes available for loading or discharging ship cargo. 3 mobile cranes with capacity up to 18 tons and 1 fork lift also available.
Storage: Concrete Jetty: 16 transit sheds with floor area of 21,205 sq.m.
Steel Jetty: 3 transit sheds with floor area of 4,753 sq.m.
Godowns: Steel Jetty: 51 godowns with 50 partitions. Total floor area of 59,710 sq.m.
In City: 3 godowns with floor area of 2,230 sq.m.
Ample open storage space is available.
Notice for the attention of all Masters and Officers:

A lock gate has been installed at the port. You are perhaps, not aware that, this is not the conventional type of lock gate provided in the vicinity of artificial dock basins.

The Bhavnagar lock gate is a single tension gate, which is lifted vertically above the dock platforms and then slewed to 90° on the dock platforms. In this way the dock entrance is cleared for ship movements. With this arrangement the function of the gate is limited to water impounding and to an extent silt reducing.

The tidal conditions at the port are such that HW heights on successive flood tides vary by as much as 6 ft. 6 in. during Springs. Therefore, at the time of opening the gate water, level on both sides will not be equal. Due to this there is a necessity to slightly lift the gate and flush the channel to equalise the water levels before the gate is finally lifted up. During this period, vessels lying alongside the jetty will have a tendency to surge. Instances have come to the notice of this office where vessels have broken their moorings. Such surgings are by no means violent and with a little care breaking of moorings can be avoided.

All Shipmasters are, therefore, requested to bring this to the notice of their duty Officers. As the flushing may take place any time between 2.5 hours to half an hour before HW. Care should be taken within this period to tend the moorings and to maintain a gangway watch. There is, however, no necessity to remove the gangway. Permissible draft may vary due to siltation.

STEVEDORES: The stevedoring gangs are arranged directly by Agents through approved stevedores.
Working Hours: Day: 0800 hrs. to 1200 hrs. and 1300 hrs. to 1700 hrs.
Overtime: 1800 hrs. to 2200 hrs. and 2300 hrs. to 0300 hrs.
Recess: 0300 hrs. to 0800 hrs. and 1200 hrs. to 1300 hrs. 1700 hrs. to 1800 hrs. and 2200 hrs. to 2300 hrs.
MEDICAL: Medical facilities can be arranged by Master through Agent. Hospital facilities available in city of Bhavnagar which is 13 km. from port.
FRESH WATER: Fresh water supplied alongside jetty as well as at anchorage.
Shipmaster's Report: Water is often in short supply, and ships may be unable to obtain any at all at the anchorage. Ships should not rely upon an evaporator to make water at the anchorage, due to the high mud content of the sea water.
FUEL: Oil bunkering available in limited quantity.
FIRE PRECAUTIONS: Alongside jetty fire-fighting facilities available. At anchorage fire-fighting facility is provided by the tug.
Usual fire precautions applicable.
GANGWAY/DECK WATCHMAN: Gangway and deck watchman are recommended.
OPENING/CLOSING HATCHES: As arranged between the Master and stevedores.
CARGO GEAR: Ships should possess valid Cargo Gear Certificate.

SHIP'S CERTIFICATES: Registration; Safety Equipment; Safety Radio and Telegraphy; International Load Line.
CUSTOMS ALLOWANCES: As per Customs regulations in force from time to time at Indian ports.
CREW IDENTIFICATION CARD: Valid international passport or identification card necessary.
CONSULS: No consulates are at port. Nearest consulates are at Bombay.
REPAIRS: No repair facilities exist for the ship except repairs of minor nature which could be undertaken by private repair firms.
DRY DOCKS: Small dry dock available for repairs of vessel of up to 200 ft. length.
SURVEYORS: Surveyors should be arranged in advance with Agent. Surveyors come from Bombay.
REPATRIATION: Possible.
AIRPORT: Bhavnagar City is served by an airport situated about 7 km. from the Port. Regular flights to Bombay are available daily and to Surat on Monday, Wednesday and Friday.
TIME: GMT plus 5.5 hours.
HOLIDAYS: 8 holidays a year declared by Port Authorities on which working of the ship can be attended at the option of the port.
POLICE/AMBULANCE/FIRE: Police force and ambulance and fire facility available from Bhavnagar City. Limited fire-fighting facility available at port.
TELEPHONES: No facility is available for providing telephones on board the ships.
SHORE LEAVE: Citizens of The People's Republic of China and Pakistan not allowed ashore. All other nationals are allowed to go to Bhavnagar City which is 13 km. from port for which shore passes are issued by Customs Dept.
REGULATIONS: Photography in port prohibited. No crew member allowed to take liquor ashore.
DELAYS: Delays in berthing depend upon number of ships working on berth and awaiting if any. At anchorage generally not more than 2 ships are worked at a time.
DEVELOPMENTS: Intensified dredging operations are proposed to be undertaken for increase in drafts of the vessels berthing.

SHIPMASTER'S REPORT: April 1981.

Bhavnagar discharging anchorage is a dangerous anchorage due to strong currents and an abnormal bottom.

All Shipmasters must make contact by cable 24 hours before arrival and await appointment from Port Authorities and pilot station. VHF not available and radio station working only during daytime.

All ships must arrive at pilot station, maximum 2 hours before HW and only during daytime and in good visibility, otherwise Pilot cannot board.

For many years anchorage was used for discharging, but now closed as about 300 anchor-chains remaining on bottom. In 1981, another anchorage opened, near to the port, and up till April, 4 ships lost anchors due to strong currents and irregular bottom. Contact with shore is very difficult and at night time impossible.

Our vessel was there for discharging and from 0300 hrs. when port anchor broke with 7 shackles of chain, up till 0700 hrs. we were waiting for tugboat from shore to pick up 100 stevedores, but was impossible. At 0700 hrs. we took ship out of dangerous area without Pilot and without any assistance, with 100 stevedores onboard.

To enter Bhavnagar Port, draft no more than 17 ft. and breadth no more than 65 ft., to pass the locks.

AUTHORITY: Port Officer, Gujarat Maritime Board, New Port Bhavnagar, Bhavnagar (Gujarat), India. Pin Code No. 364005. *Tel:* 24302 (office), 26985 (residence). *Telex:* 0162-224 GMB IN. *Cables:* Portal Bhavnagar. *Contact:* Captain H. B. S. Sandhu.

BOMBAY: 18.56 N. 72.49 E. (See Plan)

PORT LIMITS: Vessel is considered to have "arrived" when Pilot is embarked and/or when vessel is required to anchor outside pilotage area awaiting a suitable tide, as in the case of large tankers.
DOCUMENTS: See "Calcutta".

Agents to submit berthing application 15 days prior to vessel's arrival together with cargo documents.

PILOTAGE: Motor pilot vessel *"Venu"* stationed Lat. 18° 51′ N., Long. 72° 49.5′ E. White, buff-coloured funnel, "Pilot" painted black capitals, exhibiting International Signals by day/night. Call sign "ATDZ".

Minimum advance notice 24 hours to Agents and Harbour Master through Bombay Radio (VWB) and 12 hours to pilot vessel on WT. Pilot vessel contacted VHF Channels 12, 14 and 16. In case pilot vessel not on station, vessels advised anchor at pilot station, draft permitting, and wait instructions.

Vessels must not proceed beyond Sunk Rock inwards without a Pilot. Pilot normally boards/disembarks 1 mile E.S.E. of Prongs Reef Buoy. Whenever draft restrictions apply or a berth or anchorage is not available the Harbour Master will advise the correct time at which to approach the pilot station and vessels should stand off until such time. Deep draft vessels normally enter 2 hours before HW.

ANCHORAGES: More than 60 anchorage berths radius 1,000 ft. with depths from 38 ft. to 14 ft.; of these two 38 ft.; 30 between 30 ft. and 35 ft.; 22 between 20 and 30 ft.; remainder below 20 ft. All anchorages safe.

In case of firing practice from Colaba Point, vessels to shift to new anchorage "A" with following co-ordinates:
(1) Lat. 18° 08.2′ N., Long. 72° 28.6′ E.
(2) Lat. 18° 08.2′ N., Long. 72° 33.2′ E.
(3) Lat. 18° 02.0′ N., Long. 72° 34.8′ E.
(4) Lat. 18° 02.0′ N., Long. 72° 31.1′ E.
when so instructed by Port Authorities.

RESTRICTIONS: According to state of tide and draft.
MAX. SIZE: Drafts are subject to dredging, rise of tides. Drafts every month are declared by Deputy Conservator.

Name of Dock		*Max. Normal Dimensions (ft.)*	*Max. Oversize Dimensions (ft.)*	*Remarks*
Indira Dock Basin Berths	LOA	625

Also see "Tankers".

PRATIQUE: The Master of every vessel calling Bombay from a foreign port must send the following particulars by cable to "Quarantine Bombay" 24 hours prior to arrival and request for radio pratique:

> AAA ports of loading BBB last port of call CCC date of departure DDD ETA discharging port EEE vessel's Maritime Declaration of Health is negative and total number of crew on board all healthy FFF vessel has not called at any port in East Africa between Northernmost point of Eritrea and Southernmost point of Tanzania including Zanzibar or any other yellow fever infected area within last 30 days GGG no unusual mortality of rats on board HHH no monkeys III no persons embarked at Aden or Djibouti.

If the vessel is coming from a yellow fever area, then the Port Health Officer boards the vessel for inspection before granting Free Pratique.

RADIO: Bombay Coastal Station, call sign VWB.

Information regarding weather will be broadcast at 0630 hrs. and 1030 hrs. local time on 2,000 metres.

Tankers: Radio Advice: Radio Agents 96 hours before arrival giving Master's name, ETA, draft, ports visited last 30 days, vessel's gross and net tonnage, present loaded displacement, distance manifold from amidships, cargo quantities on board gradewise, and, if Bombay last discharge port, "Load-on-top" data, vaccinations required, men for doctor and dentist, supplies and cash requirements. *Failure to comply with foregoing could incur berthing delays.* Confirm ETA 48 hours before arrival. Any subsequent changes to be notified to Agents.

Note: Agents Offices are closed from Friday 1730 hrs. IST to Monday 0930 hrs. IST. Week-end messages to be in by Friday afternoon.

If wheat, flour, rice or tea required, advise quantity required and balance remaining on board, as these are restricted items in India and notice is required to release them. Radio "Quarantine Bombay" 12 hours before arrival using Standard Quarantine Messages from International Code of Signals, if vessel has called at a Yellow Fever area port within the last 30 days, whether all on board have valid Yellow Fever Vaccination Certificates or if any contagious disease is suspected.

Radio Pilot as soon as possible giving ETA, draft and any subsequent changes in ETA to the pilot vessel; call sign ATDZ Frequency: 500 kHz, working range: 800 miles, watch keeping 0400 – 0600 hrs., 0800 – 1000 hrs., 1200 – 1400 hrs., 1600 – 1800 hrs. GMT on weekdays only. These messages are free of charge.

Bombay Port Trust operates a VHF Service on Channels 12, 14 and 16. Call Sign – "Harbour Control" on a 24 hour basis for berthing control purposes.

Agents can be contacted by Bombay Radio VHF Channel 26, and thence public telephone system.

Where for any reason such as adverse weather, a vessel does not anchor on arrival the Master should ensure that the Port Authority is advised of his arrival as vessels are handled on a first-come-first-served basis.

N.B.: A Naval Signal Station is situated on the extreme south end of Bombay Is. at Colaba Pt. and all ships entering or leaving port are liable to be called up by signal lamp. Masters are required to answer such signals by lamp should their ship be called up.

Also see "VHF".

RADAR/VHF: No port radar service. Shipmaster contacts pilot vessel by ship's radio or VHF on international frequencies. Channel Nos. 12 and 14 also available on VHF.

TUGS: 9 tugs, 900 h.p. – 3,000 h.p. Tugs join vessel when close dock entrance and assist undocking. Ship's and tug's lines used.

BERTHING: *Indira Dock:* 21 berths, able to handle cargo vessels up to 20,000 d.w.t. Average length of berth 150 m. Most berths are equipped with 1×6 ton crane and 4×3 ton cranes.

Victoria Dock: 15 berths, able to handle vessels up to 5,000 d.w.t. Average length of berth 110 m. Most berths are equipped with 1.75 ton and 1.5 ton cranes.

Prince's Dock: Length 1,560 m. of which 1,200 m. is available for handling cargo. There are 8 berths able to handle vessels up to 5,000 d.w.t.

Ballard Pier: Length 244 m., width 110 m., has been converted into a container berth with large back-up area for stacking containers. 2 gantry cranes (35 tonnes each) and 2 transtainers on rubber tyres (35 tonnes each) have been provided.

The extension at Ballard Pier is the new passenger terminal and receives passenger vessels up to 30,000 g.r.t. at any stage of the tide, commensurate with draft.

CONTAINER HANDLING FACILITIES: New container terminal at Indira Dock No. 1 and 12B and Ballard Pier. Total area 12 acres. 2×35 tonnes rubber tyred gantry cranes provided at Indira No. 1 Dock.

CRANES: *Quay side:* Electric and Hydraulic cranes available at Indira, Prince's and Victoria Docks.

Mobile Cranes: 56 mobile cranes with capacities up to 43 tons available.

Heavy Lift: Electric crane of 60 tons and steam crane of 20 ton capacity.

Floating Cranes: 2 available, 60 ton and 125 ton capacity.

STEVEDORES: Supplied by Dock Labour Board. Port Trust supplies shore labour for handling cargo including stacking in sheds.

MEDICAL: Hospital facilities available. Notice in sufficient time, depending on seriousness of case, to arrange for transport, hospitalisation, etc.

TANKERS: Reducing pipe connections available at jetty. Dirty ballast tank available at Marine Oil Terminal. Four berths at Butcher Island and one berth at Pir Pau exclusive to tankers. For draft details see "Max. size".

Pir Pau can handle tankers up to 16,000 d.w.t. and the Marine Oil Terminal at Butcher Island can handle tankers up to 125,000 d.w.t. at one berth, up to 54,000 d.w.t. at two berths and 36,000 d.w.t. at the other berth.

Tugs/Mooring: 2 tugs required for berthing. Conditions at Pir Pau during S.W. monsoon necessitate the use of heavy wire springs which are supplied by the Bombay Port Trust.

Double back springs are required at Butchers Island on account of the Strong Ebb stream experienced there. Prior to the start of the Ebb it must be ensured that both back springs and breast lines are taut.

Normal mooring lay out includes in addition 3 head/stern ropes and 2 breast ropes fore and aft. Moorings must be tended regularly in view of strong currents and unsettled weather and fairly large range during Spring tides.

Loading: Crude oil and refined products handled through 8 in. hoses.

In order to minimise connecting up time on crude oil carriers reducing pieces suitable to receive 10 in. hoses (maximum 4 hoses available) should be fitted to the manifold prior to arrival alongside. The Pilot on request will inform vessel which side to the ship will be berthed.

The shore will accept ship's arrival ullage figures taken without their representatives present if this is necessary in order to avoid delay in commencing discharge.

Loading white oil tankers involves considerable line-clearing.

Handling of packed cargo not permitted during the discharge of Low Flash bulk cargo.

Fuel: Fuel Oil, Diesel Oil and Gasoil available ex-wharf. Lubricants available.

Fresh Water: Unlimited quantity of drinking and boiler water available ex-wharf and by waterboat, loaded concurrently with cargo operations.

	Delivery Rate:
Butcher Island	30 – 35 t.p.h.
Pir Pau	5 – 6 t.p.h.
Alexandra Dock	12 – 15 t.p.h.
1 Port Trust waterboat (250 tons)	25 t.p.h.
4 Privately owned waterboats (150 tons each)	25 t.p.h.

Tank Cleaning/Dirty Ballast: Butcher Island Berth No. 2: Line 16 in. Max, quantity acceptable 4,500 tons. Rate 1,000 t.p.h. Clean ballast may be pumped overboard.

General: During the early part of the S.W. monsoon, when the wind is South of S.W. the sea runs from the South and Masters are advised to keep their ships heading East when making a lee for the Pilot.

Crude oil vessels discharging at Butchers Island are often required to "pump over tide" to reduce their draft before the first Low Water after berthing hence vessel should be in all respects ready to commence discharge once mooring and connecting up are completed. Discharge over the first 4 hours should be planned to reduce vessels draft bodily.

Crew landing passes are issued, and these are to be returned before sailing.

Also see "Report". DATED JUNE 1987 AND SHIP OPERATORS REPORT DATED JANUARY 1987.

Offshore Lightering: Transhipment of petroleum products is carried out from large storage tankers moored in the vicinity of position Lat. 18° 53′ N., Long. 72° 26′ E. to tankers berthed alongside.

DENSITY: The Port of Bombay is essentially a salt water port and major fluctuations in the density occur on account of tide. Density varies mostly in monsoon period June to September.

FRESH WATER: Available all berths. By water-boat in stream, by water-mains in docks.

Ship Officer's Report: Vessel berthed at Ballard Pier, East side. Fresh water availability on pier dependent on capacity of storage tank at the time of call. The water was not available continuously and we had to wait for the tank to be refilled.

FUEL: Arranged by oil companies through Agents. Facilities at berths in docks and Butcher Island berths. No bunker facilities for vessels at anchor.

FIRE PRECAUTIONS: All regulations of Petroleum Rules (chapter 1/50 of BPT Port Rules). Port maintains fire stations, 24 hours per day, both at docks and at Butcher Island Oil Terminal. Special precautions taken for tankers at Marine Oil Terminal at Butcher Island.

GANGWAY/DECK WATCHMEN: No deck watchman supplied. BPT gangways generally available all berths except Butcher Island and Pir Pau.

CERTIFICATES:

International Safety Equipment Certificate.
International Safety Radio Telegraphy Certificate.
International Safety Radio Telephony Certificate.
International Exemption Certificate (Derat).
International Load Line Certificate.

CARGO GEAR: Compliance BPT Port Rules and Docks By-laws essential. Hydraulic Quay Cranes, Electric and Heavy Lift Cranes, Floating, Mobile and Crawler Cranes all available.

IDENTIFICATION CARDS: Necessary for Police/Customs Authorities.

REPAIRS: All repairs possible.

DRY DOCKS: Two: "Merewether" 525 ft. long, 65 ft. 6 in. wide. "Hughes" 1,000 ft. long, 100 ft. wide.

REPATRIATION: Can be arranged, also crew changes.

AIRPORT: International Airport Santacruz, 15 miles from Bombay Harbour.

TIME: Indian Standard Time ahead of GMT by 5 hours and 30 minutes. No alterations to clocks are made any time.

HOLIDAYS: Holidays for the docks (when cargo handling is closed) are fixed every year. Republic Day (January); Bakri-Id (February); Holi (2nd day) (March); Muharram (March); Maharashtra Day (May Day); Buddha Jayanti (follows May Day); Independence Day (August); Ganesh Chaturthi (September); Mahatma Gandhi Jayanti (October); Dasara (October); Diwali (November); Ramzan-Id (December); Christmas Day.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Arrangements for placing a telephone on board ship exist at all transit sheds in Docks.

SERVICES: Tank cleaning equipment is not available. Dirty ballast accepted in tank at jetty at Marine Oil Terminal.

REGULATIONS: Stringent Port Rules and Docks By-laws detailed in "Bombay Port Rules".

DEVELOPMENTS: Satellite port in Nhava/Sheva area approved (port to handle vessels up to 70,000 d.w.t., container and bulk cargoes) also new harbour near Sassoon dock for trawlers drawing 5.5 m. – works in progress.

Linkspan to be installed at the Ferry Berth in mid-1986.

SHIPMASTER'S REPORT: September, 1979. (Updated 1986).

Anchorage: If inner anchorage berths occupied then pilot station will inform of same and vessels to anchor in Anchorage "A" or "B" West of Prongs Reef Lighthouse (see "Anchorage" in main text). The prohibited anchorage area between the zones is due to pipes and cables of the Bombay High Oilfield. Patrol vessels "Sagarika I" and "Sagarika II" inform vessels if they are beyond anchorage limits and vessels should adhere to their instructions.

Radio: Call sign "VWB". 24 hours watch. HF & MF. Vessels with good transmitter can contact Bombay directly from Port Said or Cape Town or Singapore.

Radar/VHF: VHF Channel 16 for contact with Pilots and listening watch. Call Bombay Pilots or Bombay Harbour Control. Channel 12 is port frequency for berthing or shifting.

Hatches: Opening and closing of hatches, beams, hatch covers by Stevedores. All mechanically operated hatches opened and closed by ship's crew. Rigging gangs at Owners expense may be employed for these jobs.

Stevedores: 1st shift (0800 – 1700 hrs.), 2nd shift (1700 – 2300 hrs.), 3rd shift (2300 – 0500 hrs.).

Consuls: U.S.A., Australia, Belgium, A.R.E., France, Greece, Germany F.R., Japan, Liberia, Norway, Sweden, U.K., U.S.S.R. and others.

Medical: Excellent medical facilities and hospitals.

Customs: Weekly allowance of 1 bottle spirit (700 ml.) and 200 cigarettes.

Specialised Cargo Handling Facilities: Ballard Pier Berth specially reserved for container and Ro/Ro vessels. Another container berth and container yard being formed at Berth No. 23 I.D. As Bombay Port not full geared for mechanical handling of cargo, advance information and notice will aid Agents in arranging for specialised services and fork-lifts. Good facilities for LASH system of cargo.

Surveyors: All surveyors available. Standard marine and general surveyors.

REPORT: Pir Pau Jetty (LPG), June 1984.
Pir Pau Jetty: Datum draft 19 ft. 4 in. for Max. LOA 525 ft. Pir Pau Channel datum 13 ft. 1 in. Max. rise of tide approximately 15 ft. No berthing/unberthing between sunset and sunrise.
Pipeline/discharging facilities:

1. Refrigerated cargoes acceptable, but due design limitation of pipe-line/tank volume cargo to be heated to −10°C. before discharge. Sea water temperature at Bombay during year 18° minimum to 23° maximum.
2. Pipe-line length 5 km. diameter 8 in. ASA 300 psi, no vapour return line available.
3. Max. discharge rate 120 tonnes/p.h. at back pressure 14.5 kg/cm. (abs).
4. Vessel to carry suitable hoses making length of 75 ft. for discharge keeping in view items (2) and (3) above and to be equipped with derrick.

AUTHORITY: Bombay Port Trust, Administrative Offices Building, Shoorji Vallabhdas Marg, Bombay-400 038. *Tel:* 268011. *Telex:* 011-2345. *Cables:* Portrust Bombay. *Contact:* Harbour Master.

CALCUTTA: 22.32 N. 88.22 E. (See Plan)

DOCUMENTS:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Port Clearance from Last Port.
Indian Coast Light Dues Receipt (if any).
4 copies of Crew List.
4 copies of Passenger List.
1 copy of Through Cargo Manifest.
4 copies of Stores List.
1 copy of Cargo Manifest with B/Lading for the same.
4 copies of Opium and Dangerous Drugs Certificate.
Cargo Plan.
Cargo on Deck declaration.
4 copies of Certificate of Foreign Currency.
4 copies of Certificate of Arms and Ammunition.
Letter to Assistant Collector of Customs regarding Local Agency.
Letter to Assistant Collector of Customs regarding duty on ships stores.
Application to the Inspector of Police.
3 copies of Arrival Report.
4 copies of Watches and Clock List possessed by each member of the crew.
6 copies Hazardous Cargo, if any.

PILOTAGE: Telegraphic address of Pilot station: VWST "Pilots Sandheads". Radio message should be sent 48 hours prior arrival giving (a) ETA Eastern Channel Lt. Vs.; (b) from . . . to . . . (either Haldia, Budge Budge, or Calcutta); (c) deepest *fresh* water draft; (d) length overall; (e) d.w.t.; (f) whether VHF is or is not on board.

Pilot boards vessel at Sandheads from pilot vessel fitted with W/T, DF, VHF, radar, echo sounder and other navigational equipment, maintains continuous watch on 500 kHz and receives ETA messages of incoming vessels.

As an aid to navigation, navigable channel in river is marked with lights and channel buoys. There is a lighthouse at Sagar and downstream from this point, 2 unattended Light Vessels are stationed at Upper Gasper and Lower Gasper and 2 attended Light Vessels at Intermediate and Eastern Channel Stations. Navigable channel leading to Haldia Port from sea is 63 nautical miles and to Calcutta about 123 nautical miles. There are 15 bars in different reaches of the river, 4 of these are downstream of Haldia and the remaining 11 between Haldia and Calcutta. Since these bars are subject to fluctuations, the river is regularly surveyed and dredged as required. Owing to sharp bends, narrow channel and difficult tidal conditions the navigation of ships between ports and sea requires service of trained Pilots employed by The Port Trust. River Pilots take charge of vessels at Sandheads, navigate to Haldia/Garden Reach as the case may be and then hand over to Harbour Pilots who manoeuvre vessels to Haldia Dock or riverside jetties, moorings, or dock entrance lock at Calcutta. Movement of ships inside docks is guided by Berthing Master.

Shipmaster's Report: December 1983.

Procedure for sending ETA Sandheads Calcutta: Vessels calling at Calcutta should, along with their ETA messages to the Commander Pilot Vessel, Sandheads, also indicate the Owner's/Agent's name and only then will Master's ETA message be recorded, otherwise vessel will not be treated by Calcutta Port Trust on arrival at Sandheads for further coming up river to the port.

ANCHORAGES: Anchorage in River Hooghly at Saugor Roads, Haldia Kalpi, Diamond Harbour, Royapur, Ulubaria and Garden Reach of which Royapur, Ulubaria and Garden Reach utilised only by ships on passage to and from the port in emergency. Depths of anchorages vary on day to day basis according to River Draft Forecast but on average 30 ft. deep.

RESTRICTIONS: Navigation on River Hooghly is carried out only with Pilot on board and according to tide. Speed of vessel important factor and must be declared to Pilot on board, preferably telegraphed 48 hours in advance to Pilot vessel.

MAX. SIZE: Maximum LOA 565 ft. with beam of 80 ft. for Netaji Subhas Docks and 515 ft. LOA with beam of 70 ft. for Kidderpore Docks. A vessel of 535 ft. and over can sail out as "Tide Time Sailing" only and this restricts her draft from Calcutta.

Maximum LOA of tankers for tanker terminal at Budge Budge is 620 ft. Restriction of beam for vessels berthed at Budge Budge is 85 ft. Deepest draft alongside dock berths in Netaji Subhas and Kidderpore Docks 8.70 m. At Budge Budge deepest draft at any berth 9.00 m. Berthing of vessels, depends on prevailing draft of day published in Draft Forecast for month.

PRATIQUE: Procedure for obtaining Pratique: To obtain Radio Pratique incoming vessels communicate by wireless to Port Health Officer, Calcutta, Cable address: "Quarantine Calcutta":

- *(a)* No sickness or death from sickness on board within last 15 days.
- *(b)* No sand, earth, pig, poultry, crew or passenger taken aboard from E. Coast of Africa between Port Sudan and Durban, both ports included.
- *(c)* Ship not touched within last 30 days any port in E. Africa between Northernmost point of Eritrea and Southernmost point of Tanzania, including Island of Zanzibar or any other yellow fever infected area.
- *(d)* No abnormal mortality of rats or mice on board.
- *(e)* No monkey on board.

(Item *(a)* to be sent in code under usual standard quarantine messages required by ships; rest in plain language through local wireless station.)

In case of any suspected disease or fever on board, local Agents may be contacted by cable who arrange for doctor to be sent or for removal of a patient if necessary. Vessels calling at another port in same country are exempted from obtaining Pratique.

RADIO: Calcutta Radio, call sign VWC. R/T. and VHF.

Information regarding weather distributed at 1030 and 0630 hrs. local time on 2000 metres.

Also see "Pilotage".

TUGS: 15 tugs, 550 hp. – 2,200 hp. Tugs used for vessels after passing lock entrances at Netaji Subhas and Kidderpore Docks. Tugs used for vessels to turn. Vessels own lines. At Garden Reach sailing on ebb tide for "Tide Time Sailings".

BERTHING: Vessels brought in for berthing according to tide. Movements from one berth to another inside dock not dependent on tide, but according to convenience of port. Vessels berthed at riverside jetties or river moorings required to have starboard anchor unshackled in order that starboard chain could be tied to buoy on arrival. After first chain is shackled on, port anchor is unshackled and 2 pieces of chain, each 30 fathoms long are removed from port cable and sent aft by boat and made fast to buoys, etc., and tied to stern of ship. The remaining port cable is tied up to another buoy forward. Vessels at river jetties and river moorings if left during Bore Tide are to comply with following:

Half an hour before low water:

- *(a)* Gangway to be hoisted up, if ashore.
- *(b)* Pipe-lines disconnected and triced up (for vessels at Budge Budge Jetty).
- *(c)* Heave tight on forward chains to keep vessel about 6 ft. off jetty or pontoon. Make sure weight is on bore springs and not on chains aft.
- *(d)* Tighten all buoy ropes.
- *(e)* When bores expected, all vessels in stream shall have steam on main engines, windlasses and winches and a sufficient number of officers and crew on board to tend vessel in case of emergency.

After bore made, and vessel stopped ranging, slack forward chains to old mark. Bore springs can be had through Agents from local suppliers.

Budge Budge (oil terminal) on banks of River Hooghly has river jetties, hence above instructions also apply to vessels berthed at Budge Budge Jetties.

At Budge Budge two lengths of chain provided by Port Trust for stern moorings.

Kidderpore Dock: Lock entrance: 580 ft.×80 ft. 19 general cargo berths. 2 coal berths, of which one is fully mechanised. Peak loading rate 400 m.t.p.h.

Netaji Subhas Dock: Lock entrance: 700 ft.×90 ft. 8 general cargo berths, No. 1 Berth equipped with 200 ton heavy lift crane. One oil berth, Berth "C", used for unloading petroleum products. 6 additional berths available.

Garden Reach Jetties: 2 alongside berths for overside cargo work only.

Budge Budge: Also see "Tankers". 5 jetties which can accommodate vessels up to 625 ft. (190.50 m.) LOA.

Jetties were previously used mainly for petroleum products for which large storage tanks are available. With the commissioning of the Indian Oil Refinery at Haldia, movement of products by large tankers has been transferred.

These jetties are presently available for handling bulk liquids like edible oil, vegetable oil, soya bean oil, etc., for which separate storage of 59,000 tonnes capacity is under control of the State Trading Corporation.

BRIDGES: 2 bridges, 1 collapsible, 1 swing, situated inside Kidderpore Dock are open for navigation to suit convenience of port.

STEVEDORES: 48 hours notice of arrival at pilot station required by Agent.

MEDICAL: Masters in need of medical services required cable Agents. Hospital facilities. Ships leaving for foreign port or minor Indian port (where no Port Health Officer) required to ensure officers and crew have valid health certificates (for cholera and yellow fever if proceeding to a yellow fever area).

TANKERS: Not permitted discharge residue into dock (at C berth Netaji Subhas Dock).

S.G.	A.P.I. of local types of oil
0.91 and 0.94	0.9430 varying to 0.9550.

Tanker terminal at Budge Budge 13 nautical miles from Calcutta by river.

BB Jetty No. 1 for accommodating vessels of OAL 620 ft.
BB Jetty No. 2 for accommodating vessels of OAL 430 ft.
BB Jetty No. 3 for accommodating vessels of OAL 230 ft.
BB Jetty No. 5 for accommodating vessels of OAL 620 ft.
BB Jetty No. 6 out of commission.
BB Jetty No. 7 out of commission.
BB Jetty No. 8 for accommodating vessels of OAL 620 ft.

Deepest draft alongside jetty berths 9.0 m., but vessels brought up according to prevailing draft as per forecast.

Berthing: Vessel is moored starboard side to at Budge Budge as follows: Port Anchor to about 6 shackles on the Port bow with the ship's starboard cable shackled to the shore cable on the starboard bow. 2 shore cables made fast round the bitts are used aft. These cables are crossed. An experienced shore mooring gang boards vessels to assist in berthing, and these men require very little help from the Ship's Crew. The operation generally takes about 1.5 to 2 hours.

The sequence is as follows: The Port anchor is dropped well off and up-stream of, the Pontoon, on the first of the Ebb tide. The vessel's bow is then swung into the forward in-shore mooring buoy by a mooring rope. This buoy is then brought close under the bow whilst the starboard ship's cable is made fast to the shore cable. For this purpose, the Shore mooring gang, will, on first boarding, hang off the starboard anchor, through the hawse pipe, leaving the first 15 fathoms of cable flaked on deck. Ship's wire rope (100 mm.), should be available for hanging off, together with 75 mm. rope, quantities will be advised by the Berthing Master for lashing the cable.

When the forward cable is fast, the stern is swung, again using mooring and are made fast round the two bitts. 75 mm. (3 in.) rope lashings will also be used here. On completion of making fast the after cables, the vessel is hove into position by the windlass. The mooring ropes are made fast to the two quarter and two bow mooring buoys and are again used when the shore Gang board to break moorings prior departure. To avoid any chance of delay in mooring, the vessel should ensure that the first shackle of her Starboard cable is free prior to arrival, and should have three joining shackles ready for use in case these are required. One ship's wire will be required forward, for hanging off the anchor, and two aft, for heaving on board the ends of the shore cables. Although the shore mooring gang have their own shackles, etc., at Budge Budge, it is necessary for the ship to provide a drift punch and heavy hammer for breaking the cable.

It should be noted that at Calcutta itself there are not enough shore chains to provide moorings to all vessels using the port, and in these cases vessel's Port anchor cable will be broken to provide the after moorings. All the Budge Budge Berths, however, are supplied with sufficient cables. These latter cables are anchored to swamped moorings at each berth.

During the period of Bore Tides, the above moorings may have to be supplemented by coir ropes supplied by Burmah-Shell. In such cases, and in the event of the cable moorings requiring attention during the vessel's stay at Budge Budge, the local Harbour Master, or his assistants will advise the vessel.

Shore Lines: All products handled through 150 mm. (6 in.) or 200 mm. (8 in.) hoses.

Restrictions: Handling of packed cargo not permitted during the discharge of Low Flash bulk cargo.

Fuel: Fuel oil, diesel oil and gas oil available ex-wharf at Budge Budge and by lighter. Lubricants available.

Fresh Water: Not available.

Tank Cleaning/Dirty Ballast Facilities: Line 100 mm. – 250 mm. (4 in. – 10 in.). Max. quantity acceptable 130 – 170 tonnes. Rate 60 – 100 t.p.h. Limited facilities for various grades. Clean ballast may be pumped overboard.

General: A continuous and strict watch, especially during the hours of darkness, should be kept on the vessel, both when anchored or in the berth, in order to prevent unauthorised persons boarding the vessel.

ALSO SEE 'SHIP OPERATOR'S REPORT' DATED JAN '87

DENSITY: Average density in port is about 1000.

FRESH WATER: Fresh water on application from Masters or Agents and preferable if at least 48 hours' notice given. Supplies through barges and direct from quay line.

FUEL: Redwood 600 – 700 sec. supplied at Calcutta and require at least week's notice for supplying vessels lying inside dock. Fuel also supplied at Budge Budge Terminal, 3 days notice to suppliers and Port Authorities.

FIRE PRECAUTIONS: Usual non-smoking precautions and Master, Owners, Charterers or their Agents of vessels carrying import cargo or intending to load export cargo of hazardous or inflammable nature, furnish 6 copies of list of cargo involved to Traffic Manager in prescribed form, at least 10 days before vessels intend to land or ship cargo. Traffic Manager on receipt of list, categorise items enumerated in list and landing delivery and storage of such cargo be done strictly in accordance with instructions.

GANGWAY/DECK WATCHMEN: Necessary and recommended by Agents at rate of 3 watchmen per shift of 8 hours.

OPENING/CLOSING HATCHES: Normally undertaken by stevedores, unless specifically mentioned that same will be attended to by crew.

CUSTOMS ALLOWANCES: 0.25 lb. tobacco and 200 cigarettes. Wine and/or Spirit: 1 bottle of wine or spirit per head for consumption on board.

CONTRABAND: Regulations provide that a vessel shall be liable to confiscation which is or has been in Indian Customs' waters where constructed, adapted, altered or fitted in any manner for the purpose of concealing goods.

The act also provides for a fine in lieu of confiscation which could in theory be up to the value of the vessel.

Indian Customs Authorities regard vessels as subject to the regulations if they have any alterations to the normal structure of the vessel or its fittings which is not of operational value, e.g. holes cut in panelling (over bulkheads) which are frequently found concealed from view behind cabin furniture such as settees, bunks, desks, wardrobes, etc. Customs invariably impose fines for such cavities even though empty of about Rs. 5,000/- for 1 or 2 cavities and increasing if more cavities are found. Fines would be substantially higher if cavities in fact contained contraband.

To minimise fines it is essential that Shipowners should instruct their Masters to organise periodic anti-smuggling searches of all accommodation and other places in the vessel by ship's officers with a view to locating any cavities or contraband and such searches, and results thereof, should be logged. Furthermore, the Customs Authorities invariably obtain a statement from the occupant of the cabin whether instructions had been issued by the Owners or Master for each officer crew member to search his own cabin for cavities or hiding places or other unusual or irregular tampering with the normal structure of the cabin and to report to the Master any such cavities, hiding-places or such other unusual tampering found at any time whilst serving on the vessel.

If no such instructions have been issued, the Customs generally regard the Owners/Master as failing to take proper anti-smuggling precautions and the risk of increased Customs fines arises.

It is suggested that appropriate instructions should accordingly be issued without delay by all Masters to their officers and crews and that each officer or crew member should acknowledge receipt in writing of such instructions. It is also emphasised that such instructions should also be notified to any officer or crew member who joins the vessel after first issue of the instructions to the existing officers and crew.

CARGO GEAR: Proof of cargo gear tested by a competent authority required.

IDENTIFICATION CARDS: Not necessary if holding seamen's books or passport.

CONSULS: (Telephone Numbers)

REPAIRS: All types of deck and engine repairs undertaken.

DRY DOCKS: 5 dry docks owned by Port Trust available. 3 in Kidderpore Docks and 2 in Netaji Subhas Docks, dimensions as follows:

Dry Dock (Kidderpore) (1) 547 ft.×69 ft.×25 ft. (2) 497 ft.×69 ft.×27 ft. (3) 350 ft.×60 ft.×23 ft. (max. length/beam of vessel allowed. No. 1: 515 ft.×64 ft. No. 2: 500 ft.×64 ft. No. 3: 335 ft.×48 ft.)

Dry Dock (Netaji Subhas) (1) 581 ft.×80 ft.×22 ft. (2) 596 ft.×80 ft. ×22 ft. (max. length/beam of vessel allowed. No. 1: 565 ft.×75 ft. No. 2: 565 ft.×75 ft.)

Netaji Subhas Dry Docks arranged in tandem and used as one dock. Power supply, compressed air and fresh and unfiltered water supply, hydraulic capstans for propeller work and cranage service including heavy-lift available all dry docks. Each dock provided with automatic telephones for use on board ships.

REPATRIATION: Facilities exist for effecting crew changes and arranging any necessary repatriation.

AIRPORT: 12 miles; served by regular international airlines with minimum 1 flight per day.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed Holidays (when no work is permissible): Independence Day, Republic Day, Gandhi's Birthday, Vijaya Dashami and Kali Puja.

Holidays when double wages payable: Saraswathi Puja, Netaji's Birthday; Idul Fitr, Dholjatra, Muharram, Bengali New Year, May Day, Fateh Duaz Dahan, Durgapuja, Guru Nanak's Birthday, Id and Christmas Day.

POLICE/AMBULANCE/FIRE: Police (port) Tel: 45-1701 and ask Port Police or dial 100; Ambulance dial 102 or 45–4163; Fire dial 101 or 45-1701 and ask Fire Fighting Service.

TELEPHONES: No arrangements for installing telephones on board, but use of telephones from Port Trust's/Superintendent's Office on each dock.

GENERAL: *Important:* Masters of vessels in port should ensure that vessel's engines are not immobilised without prior permission of the Harbour Master.

SERVICES: Tank-cleaning equipment with minimum notice of at least 7 days. Discharge of tank-washings not permitted while vessels lying in dock. Compass and radar technicians available.

SHORE LEAVE: Seamen permitted to go ashore after cleared by Immigration Officer boarding vessel on arrival. In case of Chinese, special permission to be obtained from Immigration Authorities, through vessel's Agents.

REGULATIONS: Booklet "Dock and Jetty Handbook" supplied free by Port Trust to incoming vessels.

DELAYS: Delays occur during monsoon.

DEVELOPMENTS:

1. Construction of container terminal (Netaji Subhas Dock) with related facilities has commenced and will take about 3 years to complete. Annual capacity will be 100,000 TEU's as compared with the present 45,000 TEU's.
2. 11 new cranes and 16 fork lifts have been purchased.
3. Dredging (maintainance – deepening) of river to allow deeper draft vessels into Calcutta and Haldia.

SHIPMASTER'S REPORT: September, 1979. (Updated 1986).

Approaches: When approaching Calcutta from South Sri Lanka it would be advisable to pick up False Point Light and then proceed to Eastern Channel Light Float at Sandheads for Pilot. During the S.W. monsoon vessels encounter long spells of overcast skies and rain hence vessels should pick up Dolphin Nose Light at Vishakhapatnam then coast up to False Point Light before branching off to Eastern Channel Light Vessel.

Pilotage: Pilots board at the Sandheads. For picking up Pilots from the pilot vessel, vessels will have to approach close to the pilot vessel's stern with M.M.D. approved type pilot ladder rigged over side. Separate accommodation has to be provided for Pilot.

Restrictions: None for vessels below 22 ft. draft. Those between 22 ft. and 24 ft. 6 in. may have to wait for Spring tide for entrance and departure. However, Hooghly River Authority publishes a booklet every month stating the draft restrictions for entry into Calcutta.

Berthing: Whilst entering locks, passing through cuttings and berthing, vessels should have good fenders rigged 2 ft. above the water to prevent dents and scrapes to the hull. The Port is not equipped with fenders. The coal berths at Kidderpore Docks are old. Masters should exercise caution when coming alongside these berths for waiting or loading. For tying up to riverside moorings both anchors have to be unshackled. Starboard cable lead to port buoy and port cable to starboard buoy in a cross fashion. At the stern vessels with stern cables will have to follow the same as forward. Over and above, ropes and tackles will have to be rigged for taking the initial stress of the bores before strain comes on the cable.

Tying up the vessel to the buoys at the riverside moorings can be aided by experienced shore mooring gangs at Owner's expense.

Radar/VHF: No Radar. VHF Channel 16 for contact with pilot boat or by W/T.

Customs: Very stringent about cargo particulars.

Cranes: One heavy lift quay side crane of 200 tonnes. Berth Nos. 2, 3, 4 and A at NS Dock fitted with 2 tonne cranes. Berth B and D of NS Dock are fitted with 3 tonne electric cranes. Berth Nos. 27, 28 and 29 at K-P Docks are fitted with new 3 tonne electric cranes.

Hatches: Wooden hatch boards and beams by stevedores. Mechanically operated or other hatches by ship's crew. Rigging gangs may be employed at Owners' expense.

Stevedores: 1st shift (0630 – 1530 hrs.) 2nd shift (1530 – 2230 hrs.) 3rd shift (2230 – 0530 hrs.).

Medical: Very good hospitals and nursing homes.

Specialised Cargo Handling Facilities: Containers can be loaded and stuffed aboard. No Roll-on/Roll-off facility.

Surveyors: A.B.S., I.R.S., L.R.S., G.L., N.V. and others. Standard marine, cargo surveyors and general surveyors also available.

General: Vessels navigating the Hooghly River should be very careful about river thieves who will board the vessel whether stopped or at anchor or making way at full speed.

SHIPMASTER'S REPORT: November 1984.

Pilotage: Accommodation is sometimes required for up to 3 Pilots transferring from Sandheads to Haldia/Calcutta or vice versa.

Radio Officer is required on standby during pilotage to send W/T messages as required by the Pilot.

Silting problems at Auckland Bar required a 0.4 m. reduction on published drafts November 1984. Situation not expected to improve.

Radio: Information on weather on 2000 m. not heard.

AUTHORITY: Calcutta Port Trust, 15 Strand Road, Calcutta – 700001, India. *Tel:* 223451 (16 lines). *Telex:* 21-7336 Calp In. 21-7423 Port In. *Cables:* Calpotrust. *Contact:* Director, Marine Department.

CALICUT: 11.15 N. 75.46 E.

PORT LIMITS: The seaward (Westward) limit of the port is the 9 fathom line.

DOCUMENTS:

- Register.
- Articles of agreement in the case of foreign-going vessels staying in port for more than 48 hours.
- Nominal list of crew and passengers and the A & B Certificates.
- Bill of Health in the case of a vessel arriving from an infected port.
- Clearance from last port.
- Port and Light dues receipts.
- Vessel's manifest and any other document, which may be necessary.

PILOTAGE: No pilotage available.

ANCHORAGE: Anchorage is about 3 miles offshore. Mud – good holding ground.

HEALTH: In the case of all infected vessels Health Officer proceeds aboard, and in the case of all other vessels Health Officer may proceed on board and examine vessel. Master shall give every facility for examination of passengers, crew, personal effects, cargo, provisions, water-supply and any part of vessel Health Officer considers necessary to examine. Health Officer may require written declaration from Medical Officer (if any) of vessel or from Master (or from both) stating whether any death or sickness from an unknown or suspicious cause or any case of any disease occurred on board either during voyage or before departure, and whether any unusual mortality has been observed among rats on vessel. If Health Officer satisfied that such deaths or cases of sickness as may have occurred were not due to any of diseases specified he shall permit vessel to proceed to usual place of anchorage or berth in harbour and to discharge passengers and cargo without further restriction. Inspection by Health Officer not between sunset and sunrise except in unusual circumstances.

RADIO: Messages through Cochin Radio or Mangalore Radio.

SIGNALLING: The signal station is situated close North of the lighthouse. The station is manned 24 hours a day.

TUGS: 4 motor tugs for towing lighters.

BERTHING: No berths.

CRANES: Fixed wharf cranes with capacity of 3 tons – 10 tons on the piers.

STEVEDORES: Arranged through Agents and stevedore contractors.

MEDICAL: General Hospital and Medical College Hospital situated about 1 mile and 5 miles away respectively.

DENSITY: Sea water – 1025.

FRESH WATER: Can be supplied by port tug, max. 15 tons per day.

FUEL: Available. Small quantity of 30 tons can be provided, 48 hours notice required.

CERTIFICATES:

- Registry.
- Radio Telegraphy.
- Safety Equipment.
- Load Line Certificate.
- Certificates of Competency of Master and other officers.

IDENTIFICATION CARDS: Necessary.

CONSULS: Nil.

REPAIRS: No facilities.

DRY DOCKS: Small slipway at Beypore.

SURVEYORS: The Port Officer at Calicut undertakes private surveys.

AIRPORT: Construction of airport at Calicut is under consideration by the Government. Nearest airport at Cochin, 150 km. South of the port.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the State Government are holidays for the port. Cargo work can be arranged on holidays.

FIRE/AMBULANCE/POLICE: Police 100; Ambulance 100; Fire 100.

GENERAL: Ship-to-shore signalling is normally by morse light.

SHORE LEAVE: Permitted.

DEVELOPMENTS: Dredging commenced at Beypore and expected to be completed within a year or two and then ships of 18 ft. draft can be berthed alongside. Breakwater under construction and additional wharf under consideration at Beypore.

AUTHORITY: Port Officer, Calicut.

COCHIN: 09.58 N. 76.15 E.

PORT LIMITS: *Seaward Limits:* 9 nautical miles Westwards between the following 2 positions:

(a) Lat. 10° 02′ N., Long. 76° 03′ 27″ E.
(b) Lat. 9° 55′ N., Long. 76° 06′ 00″ E.

DOCUMENTS:

- 7 Crew Lists.
- 7 Passenger Lists.
- 1 Last Port Clearance.
- 4 Store Lists, including List of arms and ammunition.
- 5 Passengers' and Crew Personal Effects Declarations.
- 4 Cargo Manifests.
- 3 Cargo Certificates.
- 3 Deck Cargo Certificates.
- 3 Opium Certificates.
- 3 Currency Declarations.

PILOTAGE: Berthing arrangements, booking of Pilot, etc., normally done by Agent. Advisable send ETA messages at least 48 hours in advance to Agent. Amendments to ETA messages must be sent at least 12 hours in advance. ETA messages may also be sent to Harbour Master, Cochin Port Trust. Messages should contain time and date of arrival at Outer Roads in IST and also draft fore and aft (in salt water). 30 minutes before arrival at Fairway Buoy the Port Control to be contacted on VHF for instructions.

No Pilot vessel on station in Outer Roads. A pilot boat with red hull and white superstructure exhibiting the normal International Pilot Signal comes out to Outer Roads for embarking and disembarking Pilots. No special light or sound signal need be made for Pilots. All ships awaiting Pilot in Outer Roads must have engines ready at all times to enter harbour (unless instructed otherwise). Masters should ensure that a good pilot ladder with 2 manropes is lowered about 2 ft. above water for embarking Pilots. Also while embarking Pilot, lifebuoy must be kept handy, and a good lee given. Pilots must be escorted from and to the bridge, to the embarkation deck. Also see "Restrictions".

ANCHORAGE: Cochin Roads is open anchorage with good holding ground of oily mud. Masters are required to anchor vessels in Westerly area from North to South of Fairway Buoy within radius of 0.5 miles. Deep-drafted vessels may anchor in a Westerly direction from Fairway Buoy within a distance of 0.5 to 1 mile. To facilitate entry and departure of deep-drafted ships, Masters not to anchor in line with direction of main channel, Westward of Fairway Buoy.

RESTRICTIONS: Unless otherwise specifically instructed, vessels not to enter main channel at any time without Pilot on board. Pilotage compulsory for all vessels over 100 tons gross. No night entry for crude oil tankers.

MAX. SIZE: Maximum size of general cargo ships presently handled is 700 ft. LOA with max. draft 30 ft. *salt water*. Such ships taken in only during slack ebb. Tidal Conditions: In Cochin Port ebb and flood begins to run 2 to 2.5 hours after HW and LW. During monsoons, freshets are encountered and there may not be any flood for several days.

New Tanker Berth: Max. size 115,000 d.w.t. with part cargo. Max. draft 35 ft.

PRATIQUE: When a ship arrives at an Indian port, the Pilot who boards to bring vessel into harbour is authorised to give Free Pratique to healthy ships. The only exception to this procedure is if a vessel is arriving in India within 30 days of calling at 'Yellow Fever port' the vessel is put in quarantine and she is granted Free Pratique *only* after the Port Health Officer has boarded and satisfied himself that all persons on board are in possession of valid certificates against Yellow Fever and after conducting Mosquito Survey.

Once a ship has been granted Free Pratique at an Indian port, it is not necessary to apply for Pratique at any subsequent Indian port she may proceed to which is automatic Pratique.

Part I. The complete message comprises two parts. The first part embodying the code group on page 126 (Radio Quarantine Reports) from ships at sea e.g. ZS, ZT, ZU, ZV, etc.

Part II. The second part is in plain language and the following information must be given:

A. (i) Expected time and date of arrival in the port.

(ii) List of ports of call with dates of departure within 30 days period prior to arrival at the Indian port.

OR

'Called at' 'not called at' any port in West Coast of Africa from Senegal to Angola and Ethiopia, Somalia, Kenya or Tanzania, Brazil, Peru and any other countries North of these in South America including Trinidad, Tobago, Venezuela, Panama, Surinam, Guyane, Guatemala, Bolivia, Belize, Colombia, Costa Rica, Ecuador, Guinea, Nicaragua, etc. within 30 days.

(iii) Whether any monkeys on board.

(iv) Whether any person/crew taken aboard at Djibouti or Aden (if the ship has touched either of these ports).

(v) Number of crew and vaccination status.

(vi) Maritime Declaration of Health Questions. Whether negative 'ZT' or positive (indicated by compliments – 'ZU') as the case may be.

(vii) The message must finally embody the phrase 'Request Radio Pratique'.

B. Additional information: Name of Agent. Request for 'Radio Pratique' must also include the name of the ship's Agent in the quarantine message. The message should be sent when the vessel is not more than 12 hours and not less than 4 hours from the Indian port. If the expression 'Request Radio Pratique' is not used but the complete message outlined above has been sent in that specific form Free Pratique will be granted by the Pilot provided that 'all is well' aboard. The message should be complete, timely and specific otherwise Radio Pratique cannot be granted.

In addition to the quarantine message the Maritime Declaration of Health must always be completed and presented to the Pilot, Port Health Officer or other authorised person immediately on arrival. On verification of Maritime Declaration of Health if it is found that quarantine message sent by the Master of ship is defective then Port Health Officer has the right to cancel the Radio Pratique granted earlier.

Port Health Officer usually inspects all incoming ships coming from foreign ports to Indian ports and also carries out health and sanitary inspection and if satisfied gives Free Pratique on board the ship and certificate of clearance to sail out from Cochin port.

Note: Masters are requested to check this information with the Agents in individual Indian ports and advise us without delay, if these instructions are at variance with local requirements.

Special Reservations for India:

1. Ships having other infectious diseases besides diseases subject to the regulations, e.g., Chickenpox, Measles, Mumps (Epidemic Pariotitis), Cerebrospinal Meningitis, Whooping Cough, Malaria, Paralytic Poliomyelitis, Influenzal Pneumonia or any crew/passenger having temperature of 100°F or more for more than 2 days which is accompanied by rash, jaundice, glandular swelling or diarrhoea severe enough to interfere with normal activities should inform 'Quarantine' Cochin by message and to be brought in under QQ flag in day time and red and white light at night. Port Health Officer will board such ships and grant Free Pratique after observing health formalities.

2. Ships having passenger/crew originating from or embarking at ports of Djibouti, Massawa, Aden or Yemen and arriving within 14 days of departure from the said ports should inform 'Quarantine' Cochin and the ship to be brought in under QQ flag. Port Health Officer will board such ships and grant Free Pratique after observing all health formalities.

3. Healthy ships touching Aden or Djibouti and coming to Indian ports within 6 days without any passenger or crew embarking at Aden or Djibouti, should hoist 'Q' flag on approaching the port limit. The boarding Pilot in such cases shall grant Free Pratique to the ship.

If passengers or crew embarked on a ship either at Aden or Djibouti and the ship arrives at Indian ports within 6 days, such ship is required to hoist 'QQ' flag and Port Health Officer is to board the ship to eliminate the risk of Yellow Fever and grant the ship Free Pratique.

Master of such ships should send quarantine message to the Port Health Officer before arrival at the port. This message should be sent not more than 12 hours and less than 4 hours before arrival.

4. Ships carrying monkeys from Yellow Fever area and coming to Indian ports within 31 days to be brought in under 'QQ' flag and Master should send quarantine message positively. Port Health Officer will board such ships and grant Pratique after observing health formalities.

5. Any ship carrying dead body, Master should send cable. Port Health Officer will board the ship to investigate the cause of death whether due to any diseases subject to the Regulations.

RADIO: Cochin Radio operates 24 hours daily, call sign VWN, however its range is limited to about 300 miles only. ETA messages may be routed through Bombay or Madras Radio which stations are directly linked with Cochin telegraphically.

VHF: VHF sets are installed in all port pilot launches, tugs, dredgers and at the Port Control Station in Harbourmaster's Office. Channel 16 is used for calling and Channels 14, 13, 12, 10 and 6 are available for communication. Ships awaiting berthing should maintain listening watch on Channel 16 at all times. Information regarding berthing would be generally available from Port Control at 0600 hrs., 1330 hrs. and 1800 hrs. daily. Cochin Radio maintains a VHF service which can be linked to shore telephones anywhere in India. This facility is available only between 0200 and 1400 hrs. GMT. Contact made on Channel 16 and then Channel 26 for conversation.

TUGS: Presently 3 tugs; one of 1,500 h.p., one of 1,400 h.p. and one of 1,000 h.p. An additional high powered tug, 30 tonnes bollard pull is also available. Tug's wire or ship's rope may be used at the discretion of the Pilot.

BERTHING: If particular ship required arrive at certain time, Agent informed in advance.

CARGO HANDLING: Modern systems of cargo handling such as pre-slinging, palletisation and containerisation are commonly used. The port has at present 24 wharf cranes with capacity varying from 3 tonnes to 10 tonnes, 12 mobile cranes of 10 to 40 tonnes capacity, 49 forklift trucks of 2 to 2.7 tonnes capacity and 1 floating crane of 120 tonnes capacity, 3 high powered tractors each of 180 h.p., 19 semi-trailer chassis, (10 with payload of 40 tons, 9 with payload of 20 tons), 2 heavy duty fork lift trucks with side lift attachment for handling empty containers and 5 ordinary tractors and 11 trailers for cargo handling operations.

There are 8 general cargo wharf berths, 2 coal berths, 1 boat train pier jetty, 3 tanker berths, 1 open berth and 2 low wharves and 11 stream moorings. Interim facilities are also provided for handling fertiliser raw materials pending construction of a mechanised berth. Ro-Ro ships and container ships are also handled. Quay 9 open berth is being converted into a full-fledged container berth with sufficient back up area, power plug points for reefer containers, freight station etc. At present container ships use their own derricks.

STEVEDORES: Booking of gangs undertaken by Agent on receipt of ETA message.

MEDICAL: Medical attention easily available in Cochin. If medical attention required immediately on arrival, Agent to be informed when sending ETA. Valid inoculation and vaccination certificates against Cholera and Yellow Fever are essential.

Medical advices if required on high seas to be communicated to 'Quarantine' Cochin. Harbour Master/Deputy Conservator/Agents of shipping company usually arrange evacuation of serious cases for hospitalisation from anchorage.

TANKERS: LOA limited to 700 ft. at North tanker berth and 560 ft. LOA at South tanker berth. Max. draft 30 ft.

The new oil terminal can accommodate tankers up to 115,000 d.w.t. with part cargo. Max. draft 35 ft. Products Handled: 1×750 mm. line for crude. 2×400 mm. lines for furnace oil and white oils; 4×300 mm. discharge arms. Discharge rate 4,000 tonnes/p.h.

Deep draft tankers berth only on ebb tide and during daylight hours. Ballasted or loaded tankers can sail any time.

All tankers must have fire wire fast and ready fore and aft on side facing channel.

DENSITY: Varies from 1000 to 1020 depending on tidal and weather conditions.

FRESH WATER: Supplied by shore hydrants at Rs. 15/Mt. and Rs. 24/Mt. respectively for coasting and foreign vessels. Rates for supplying through barges range between Rs. 45/Mt. to Rs. 130/Mt. and Rs. 20/Mt. to Rs. 210/Mt. respectively to coasting and foreign vessels according to the position of the vessel and the time of supply.

FUEL: All grades fuel oils normally available. Essential give advance notice to Agent to make necessary arrangements.

GANGWAY/DECK WATCHMEN: Watchmen available at nominal cost. Recommended employ watchmen at gangway, on deck and in holds.

OPENING/CLOSING HATCHES: Opening hatches normally done by stevedores. Topping derricks and removing locking arrangements on hatches must be done by ship's personnel.

CARGO GEAR: All cargo gear must have valid test certificates and all other factory act requirements must be complied with.

IDENTIFICATION CARDS: Shore passes (temporary landing permits) are being issued. Seamens Books cannot be used by foreigners unless with Immigration stamp.

CONSULS: United Kingdom, Norway, Italy and France have consuls at Cochin.

REPAIRS: The Cochin Shipyard now undertakes all types of deck and engine repairs.

In addition there are various other workshops who undertake engine and deck repairs. Exclusive surveyors to Lloyd's and non-exclusive surveyors to other classification societies are also available for hull/engine surveys. Repairs to radio, radar and other electronic equipment can also be arranged.

DRY DOCKS: Port dry dock can handle ships of up to 217 ft. LOA. However, not normally available for foreign craft.

The Cochin Shipyard dry dock can accommodate ships of up to 100,000 d.w.t. with max. size of ship up to 257 m. length and 38.5 m. beam. The dry dock entry draft permitted is 6.5 m.

REPATRIATION: Crew changes are carried out in this port. The Agents execute a bond before the Shipping Master before disembarkation. Repatriation undertaken by the Agents as mentioned in the said bond as well as general bond executed by them in Port Registration Office. Permission to enter India, travelling within India to the International airport through which they are leaving India and permission to leave India through Cochin port are being given by the Port Registration Office.

AIRPORT: Airport about 2 miles from harbour area. Cochin Airport handles internal flights only.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Closed holidays: Republic Day (26th January); Independence Day (15th August); Gandhi Jayanti (2nd October); 1st May and 25th December.

FIRE/AMBULANCE/POLICE: Willingdon Island Fire Station 6555; Willingdon Island Police 6005.

TELEPHONES: Arrangements can be made for telephone connections on board ships on wharf berths only.

GENERAL: Floating crane 120 tons, fire float.

SHORE LEAVE: Temporary landing permits are issued to foreign crew, subject to restrictions as per Government orders, if any.

SHIP SUPPLY SERVICE: "Ship Supply Service" is functioning at Cochin port. The Agents of the vessel arrange ship-to-shore transport of personnel and/or essential stores and/or sick crew members, etc., whenever such services are required. Usually, vessel's Agent gets this work after securing necessary clearance from the concerned Authorities and these are arranged through their ship chandlers or other contractors as the case may be. In cases of such emergencies, helicopter services are arranged by the local Agents with the Naval Authorities in Cochin with the assistance of the Port Health Officer stationed in the area.

DEVELOPMENTS: One of the existing berths (Q-9) is being converted into a fully fledged container berth. Necessary infrastructure facilities like hard-surfaced area, lighting, power plug points, container freight station, etc. have been provided. Tractor-chassis, trailers, heavy duty fork lift trucks, etc. to handle 40 ft. and 20 ft. containers have also been provided. Two transfer cranes have been installed in the stacking yard. Steps have already been taken to provide quayside gantry cranes at the wharf in order to provide fully fledged container terminal facilities for handling cellular container ships at the port in view of the rapid increase of container traffic. Completion of the terminal is expected in 1986.

Fertiliser berth to handle raw materials under construction for ships up to 230 m. in length drawing 35 ft. will be commission shortly.

SHIPMASTER'S REPORT: August 1979.

Hatches: Beams and hatchboards by stevedores and the remainder by ship's crew.

Stevedores: 1st shift 0800 – 1700 hrs., 2nd shift 1800 – 0300 hrs.

AUTHORITY: Cochin Port Trust, Willingdon Island, Cochin 682009. *Tel:* 6871. *Telex:* CN-203. *Cables:* Portrust.

AGENT: G.A.C. Shipping (India) PVT. Ltd., P.O.B. 515, Cochin 682003, Kerala, India. Tel: 69066, 69078. Telex: 885537 ("GAC IN"). Cables: "Confidence", Cochin.

COONDAPUR: 13.37 N. 74.40 E.

DOCUMENTS:

Inward Report.
Valid Certificate of Safety.
Radio Telegraphy.
Safety Equipment.
Safety Construction.
Crew List.

PILOTAGE: Optional. Vessels call at this Port for carrying ore cargo and anchor at open roadstead at a distance of about 1.25 miles to 5 miles depending upon their draft in a holding ground of sand and mud. The Agent of the ship bound for this port reports the vessel's ETA in advance. In the ETA message the name of the vessel, date and time of arrival are included.

ANCHORAGES: Good anchorage in depth over 8 fathoms at a distance approximately 5 miles from the channel bar.

Tippu Sultan Gudda Light bearing 053.5°(T) and Kodi Light bearing 080.5°(T). The Northern approaches to the Port area is rocky and the safest approach to the anchorage is from the South. Tidal range is 5 ft. Depth at bar 7 ft. at LWOST. 8 ft. – 10.5 ft. during HW.

RESTRICTIONS: No restrictions except that vessels calling at the port anchor at open roadstead.

MAX. SIZE: Vessels of smaller draft can anchor in 9 fathoms of water.

HEALTH: The Assistant Surgeon, Government Hospital, Coondapur is the Port Health Officer at the port.

RADIO: There is no radio station at the port. The nearest wireless station is at Mangalore and its call sign is "VWL".

VHF: Not available.

TUGS: There are 2 tugs/launches for towage service of sailing vessels and for special trips.

BERTHING: No berthing facilities available for ships.

1 wharf of 300 ft. in length with small stocking area.

1 RCC sheet piled wharf of 700 ft. length with vast stocking area duly electrified and a stocking platform of 180 ft. length are the only shore facilities at this port.

CRANES: None.

BULK CARGO FACILITIES: None.

STEVEDORES: Advise well in advance of ETA to shippers in order to arrange shore loading. Main cargo – ore.

MEDICAL: No advance notice except in case of serious illness to be included in arrival message. Hospital facilities available at Coondapur.

TANKERS: No facilities.

FRESH WATER: No facilities for supplying water to vessels are available. Sailing vessels crew draw their requirements of fresh water from nearby wells.

FUEL: For ocean going vessels, there is no bunkering facility. There are oil depots at Ganguli, Coondapur from where High Speed Oil can be supplied to small vessels in drums.

CONSULS: None.

REPAIRS: Small workshops where repair work for fishing launches, barge, etc., are undertaken.

DRY DOCKS: None.

SURVEYORS: Ship surveyors of Mercantile Marine Department at Goa and Cochin are available. Private Surveyors are available at Mangalore and Goa.

OPENING/CLOSING HATCHES: Usually by ship's crew.

CARGO GEAR: No shore facilities. Ships anchor at open roadstead and load cargo by ship's gear.

REPATRIATION: No facilities.

AIRPORT: Nearest airport is at Bajpe which is situated 73 miles South of the port.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the Collector of Customs, Bangalore are followed at the port.

POLICE/AMBULANCE/FIRE: Pilot station is located at nearby Coondapur Town, Tel: 338. Ambulance facilities available at Government Hospital and Private Hospitals at Coondapur. Fire station available at Udipi 37 miles South of this port. Tel: 8333.

TELEPHONES: No arrangements exist for placing telephones on board the ship.

SERVICES: No facilities for ocean going vessels.

BANKS: Syndicate Bank and Canara Bank, Ganguli, Coondapur Taluk, South Kanara Dt., S. India. No telex facilities.

SHORE LEAVE: Crew members are allowed ashore subject to Customs formalities.

IDENTIFICATION CARD: Seaman's Book is sufficient and shore passes are issued by Customs.

DELAYS: Delays in loading can normally be expected during bad weather.

DEVELOPMENTS: None.

GENERAL: The Port of Coondapur is a riverine port which is seasonal. Open for traffic from 15th September to 15th May every year. Port is situated at the confluence of the Hadi and Chakianadi rivers at Ganguli village. The Port is 60 miles North of Mangalore which is the nearest railway head.

Charts: B.A. Chart No. 745. Indian No. 2019.

AUTHORITY: Port Officer, Coondapur, Ganguli P.O. Pin Code 576216, Karnataka, India. *Tel:* 72 Ganguli. *Contact:* Captain Mohan Chandy, Port Officer.

CUDDALORE: 11.43 N. 79.46 E.

DOCUMENTS:

8 Crew Lists.
8 Passengers Lists.
3 Forms of Import Manifest of Stores.
3 Lists of articles in slop chest.
3 Private Property Declaration of Crew.
3 Manifests.
3 Bills of Lading.

PILOTAGE: No pilotage. Open roadstead port.

ANCHORAGE: Vessels anchor in 5 to 7 fathoms with Cuddalore Lighthouse bearing 295° to 315°, which is most convenient anchorage for communicating with shore at all seasons of year. Nature of bottom, sand.

RESTRICTIONS: No restrictions regarding entry of vessels during day or night.

MAX. SIZE: Any size of vessel handled.

HEALTH: On arrival, Master to signal Port Health Officer stating all crew well and requesting Free Pratique. In event of any crew member suffering from suspected infectious disease, Master to advise Agents sufficiently in advance to enable Port Health Officer to board vessel on arrrival. No Free Pratique necessary whenever vessels call from another Indian port.

RADIO: No radio station. Cables routed through Madras Radio (call sign VWM).

VHF: Cuddalore Port on Channels 16 and 11. From 0600 hrs. – 1000 hrs. and 1500 hrs. – 1900 hrs. except on Sundays and Government Holidays.

TUGS: There are 2 tugs available. They are utilised for towing the lighters between ship to shore and vice-versa.

BERTHING: No berths.

Lighters: About 120 lighters owned by private individuals are operating for transporting cargo between ship and shore and vice-versa and handle 2,000 tonnes in total for a round trip.

Barges: 3 steel barges are available of 50 tons capacity each for lighterage purposes.

STEVEDORES: ETA advice required 72 hours in advance to enable stevedores to make adequate arrangements for handling cargo.

MEDICAL: No advance notice required unless vessel arrives with crew member requiring immediate medical attention. Seamen can be treated at Municipal Dispensary at Old Town near port and also at Government headquarters hospital in charge of District Medical Officer at New Town about 6.5 km. from port.
DENSITY: Density of water 1024 – 1025. State of tide does not affect density.
FRESH WATER: 1 steel water barge of 50 tonnes capacity is available for supplying fresh water to vessels in the Roads.
FUEL: None.
CRANES: 1 'Coles' 10 ton capacity mobile crane has been purchased for handling cargo in this port. This is a diesel electric crane.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended in interest of ship to avoid pilferage. 3 watchmen night and day per shift of 8 hours.
OPENING/CLOSING HATCHES: By stevedores.
CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Derat Certificate.
Last Port Bill of Health.
Last Port Clearance.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each crew member to be held out of bond. Wine/Spirit, 1 open quart bottle per crew member permitted to be held out of bond.
CARGO GEAR: Register of cargo gear and machinery to be maintained up to date and to be attested by competent authority.
IDENTIFICATION CARDS: Needed.
CONSULS: None.
REPAIRS: Minor repair facilities available.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.
AIRPORT: Nearest airport at Madras, distance 118 miles.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Cargo work arranged on all holidays except Republic Day, Gandhi's Birthday, Pongal Karinal, Masimagam, Pennayar Festival, Independence Day and Deepavali, on payment of overtime.
POLICE/AMBULANCE/FIRE: Tel: Police 24; Fire and Ambulance 99.
SERVICES: Cleaning of hatches after discharging cargo available.
SHORE LEAVE: Crew members permitted to go ashore within municipal limits.
DELAYS: No delay of anchoring of vessels. Cargo work carried out during day. No night work.
GENERAL: Private launches arranged for purposes of crew going ashore. Such launches ply between 0600 hrs. and 1700 hrs. Laundry, provisions, etc., can be arranged.
AUTHORITY: Government of Tamil Nadu, Tamil Nadu Port Department, No. 8 Noworoji Road, P.O.Box No. 2595, Chetput, Madras 31. *Contact:* Captain D. T. Ramachandran, State Port Officer.

HALDIA: 22.00 N. 88.05 E. (See Plan)

Subsidiary deep water modern dock of Calcutta, situated on West bank of Hooghly River and 56 miles downstream of Calcutta.
DOCUMENTS, PRATIQUE: All general information; refer to "Calcutta".
RESTRICTIONS: The lock entrance lead-in jetty – 1,010 ft. (307.84 m.).

Lock: 985.5 ft. (300.38 m.) long and 130 ft. (39.62 m.) wide. Ships up to lengths of 885 ft. (269.75 m.) can be safely accommodated at Haldia Dock.
MAX. SIZE: Capital dredging in shipping channel is in progress and the results being constantly reviewed. Currently actual drafts as per draft of the day. Draft forecasts are issued 6 weeks in advance.
TUGS: 5 tugs available.
BERTHING:

1. An Oil Jetty – to provide berthing accommodation for super-tankers with LOA of approximately 780 ft. and draft up to 35 ft.

See "Tankers".

2. A Finger Jetty – equipped with grab-bridge crane capable of transferring salt, rock phosphate and other bulk cargo from ship to barge, or vice versa at an average rate 5,000 tons per day.

3. A Coal Berth length 270 m. with depth alongside of 45 ft. is capable of loading bulk carriers of the 60,000 d.w.t. class. Mechanical plant capable of loading conventional ships and bulk carriers at a designed rate of 2,000 tonnes/p.h. 2 wagon tipplers, capacity 1,500 tonnes/p.h.; 1 conveyor belt; 2 stacker-cum-reclaimers – stacking capacity 1,500 tonnes/p.h. Reclaiming capacity 1,000 tonnes; 2 Shiploaders, capacity 1,500 tonnes/p.h. per loader.

4. An Ore Berth – rate of loading 5,000 t.p.h. and with provision for increasing to 8,000 t.p.h. Accommodation for carriers up to 80,000 d.w.t. 2×1,500 ton wagon tipplers, 4 stacker-reclaimers with capacity 1,500 tonnes/p.h.; 2 shiploaders, capacity 3,000 tonnes/p.h. This berth can also handle tankers.

5. A Fertiliser Berth – for ships up to 50,000 d.w.t. class.

Mechanical plant for rapid mechanical discharge of finished fertiliser, rock phosphate, sulphur, etc., from bulk carriers and conventional ships at a designed rate of 1,400 t.p.h.; 1 conveyor belt, capacity 1,300 tonnes/p.h. Can be extended up to the Fertiliser Factory; 2 ship unloaders, capacity 700 tonnes/p.h.; covered storage for 30,000 tonnes (with provision for increase to 60,000 tonnes in future) and open storage for 15,000 tonnes, (with provision for increase to 30,000 tonnes in future).

6. Two general Cargo Berths – each with a quay of 720 ft. and 120 ft. wide and back-up area of 18 acres. Both will have adequate cranage, latest in cargo handling machinery and direct rail-road facilities. One berth will have a modern 100,000 sq.ft. transit shed and a 30 ton payload Portainer Crane for handling containers.

7. Container Terminal: The first fully-fledged Container Terminal in India with Portainer Crane for handling containers into or from ships. Back-up area 180,000 sq.ft. (16,722 sq.m.) providing storage space for over 1,000 containers at a time. Equipped with one high-speed transtainer crane capable of serving both rail and road vehicles.
TANKERS: Haldia Oil Jetty extends 180 m. into the deep water channel. The maximum velocity of current during ebb tide is 6 knots. During period March to June, Northwesterly squalls frequently blow up on inshore side of tankers moored at Haldia Oil Jetty, with reported wind speeds of up to 90 km./hr.

Vessels are programmed to berth on HW (daylight only) and port anchor is used to swing vessel for starboard side berthing. The flood stream continues to run 1.5 hours after HW and this provides sufficient time for safe mooring operations. 1 tug is in attendance when mooring. Although there is a hose handling gantry, it is not used during discharge as the hoses are reported to kink when excessive ranging occurs.

In view of the jetty being located in an area where strong tides are experienced, vessels are required to have the following moorings:

Forward	– 5 head ropes	Aft	– 5 stern ropes
	– 3 breast ropes		– 3 breast ropes
	– 3 back springs		– 3 back springs

This gives a total of 22 moorings. Doubling up of mooring ropes is acceptable to provide the above requirement provided all ropes are in good condition and of sufficient length to reach the shore bollards. After the vessel has been securely moored, ropes are turned over and the opposite eye is sent ashore. Mooring wires may be used as back springs.

In the final mooring position, the drift (distance fairlead to shore bollards/hooks) for the various moorings is a as follows:

Head and Sternlines:	Approx. 240 ft. (73 m.)
Breastlines F & A:	Approx. 125 ft. (38 m.)
Springs F & A:	Less than breastlines.

Above drifts apply to a ship with LOA 560 ft. (170.7 m.)
Hose Connections: Midships.
Shore Line System: Handles white oils, fuel oil and crude oil. 30 in. crude line with 3×12 in. connections on jetty. White oil line: 200 mm. (8 in.) to 300 mm. (12 in.) Shore lines: 1.5 km. long. Max. back pressure 7 bar (105 p.s.i.) Average rate 600 tonnes/p.h. (product).
Shore Steam: No facilities.
Bunkers/Lubricants: Not available.
Fresh Water: Available from shore in small quantities.
Tank Cleaning/Dirty Ballast Facilities: No facilities. Clean ballast may be pumped overboard.
General: Continuous and strict watch to be kept on vessel when anchored or in the berth to prevent unauthorised persons boarding.

Due to the remoteness of Haldia it is extremely difficult to arrange the formalities associated with crew members joining or leaving the ship.

In view of current and wind conditions it is recommended that a continuous watch is maintained to ensure that moorings are well tended at all times.
DEVELOPMENTS: A second oil berth is to be built. 2 tugs to be purchased.

SHIPMASTER'S REPORT: November 1984.
Pilotage: Ensure a boat rope is rigged; of good length and well down to the water and Pilot comes out in a small open boat, requiring a good lee and about 4 knots headway.

Also see "Calcutta".
Radio: See "Calcutta".
Tugs: Berthing at Haldia is critical in windy conditions. Tugs are under powered and have high freeboards. New tugs are ordered for 1986/7. Present set up requires clear understanding on Pilot's side of controllable pitch ships where engines run continuously. Tugs slip wires unexpectedly on occasions.
Tankers: Tankers are sometimes berthed on the Iron Ore Berth inside the locked – in dock (11 m. alongside). Good pumping rates, up to 1,600 cu.m.p.h. Hose size 10 in., up to 4 connections. No night movements. If dealing with the India Oil Corporation, be ready for draft survey, independent quantity surveyor and a "standard" letter or protest. Also keep to hand all bunker/water information for arrival at previous port through to departure from present port, for end of passage and full away on passage plus port consumption/liftings.

AUTHORITY: Calcutta Port Trust, Haldia Dock Complex, Chiranjibpur, Haldia, West Bengal.

HONAVAR: 14.16 N. 74.27 E.

DOCUMENTS:

Crew Lists.
Passenger Lists.
Customs Documents.
Health Documents.
Manifests.
Bills of Lading.
Ship's Papers.

PILOTAGE: Open roadstead port. No system of pilotage. Pilot is however available, on requisition by Master or Agent.
ANCHORAGE: Distance off 3 miles, depth of 5.5 fathoms.
MAX. SIZE: No restrictions on length and breadth. Generally up to 34 ft. draft vessels can anchor within 2 miles to 3 miles from entrance.

HEALTH: Port Health Officer grants Pratique as and when necessary, on requisition.
RADIO: Wireless station at Karwar.
BERTHING: No berthing facilities. Ships anchor on open roadstead.
MEDICAL: Proper hospital facilities available only at Karwar about 60 miles North. At least 24 hours advance notice ETA to be communicated to Agents.
DENSITY: Varies 1020/1025.
FRESH WATER: Very small quantities available. No arrangements for delivery to ships.
FUEL: None.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: All ship's papers such as Certificate of Registry, W/T Certificate, Safety Equipment Load Line, etc., to be on board for verification.
CARGO GEAR: Cargo gear Test Certificates, etc., to be produced.
IDENTIFICATION CARDS: Needed, if going ashore.
CONSULS: Nil.
REPAIRS: Nearest workshops undertaking repairs available at New Mormugao. Minor repairs may be carried out at Karwar.
DRY DOCKS: None.
REPATRIATION: Facilities available.
AIRPORT: Belgaum, about 178 miles.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Charter Party Holidays observed. Cargo work can be arranged on holidays. Dates of holidays vary from year to year.
POLICE/AMBULANCE/FIRE: Police 48; Ambulance 32; Fire Kumta 20.
SHORE LEAVE: Crew members are allowed ashore.
DELAYS: Generally no delays are expected.
AUTHORITY: Port Officer.

JAKHAU: 23.15 N. 68.37 E.

LOCATION: In Gulf of Kutch, on Godia Creek about 5 miles inside Arabian Sea. Port is about 7 miles West of Jakhau. Small sub-port exporting salt utilised by foreign-going and coastal traffic. Vessels calling Jakhau anchor in open roadstead about 6 miles offshore. Highest tidal range 14 ft. Current parallel to coast running about 4 knots.
AUTHORITY: Assistant Conservator Jakhau-Kutch.

KAKINADA: 16.56 N. 82.15 E.

DOCUMENTS: *(a)* To be supplied by Master on arrival:

Ship's Register.
Safety Equipment Certificate.
International Load Line Certificate.
Derat Certificate.
Last Port Clearance.
ILH Dues Receipt, if coming from an Indian Port.
Crew List: 6 copies to Agents, 2 copies to Immigration Dept., 2 copies to Customs.
Customs Circulating Copy, if coming from another Indian Port.
Import Manifest of Stores (Store List).
Private Property Statement of crew and officers.

(b) Master to sign following certificates, in prescribed forms, presented by Agents, on arrival:

Port Entry.
Port Clearance.
Customs Entry.
Customs Clearance.
Departure.
Health.

PILOTAGE: No pilotage.
ANCHORAGE: *Allotment of Anchor Berths:*

Masters of vessels calling at the Port of Kakinada should cable the following information to the Port Officer directly, 24 hours before their arrival off the Port:—

(a) ETA (Indian Standard Time)
(b) Total cargo for loading/discharging at Kakinada and nature of cargo.
(c) Hatchwise distribution.
(d) Declaration of hazardous, inflammable and explosive cargo.
(e) Declaration of vessels winches in good working condition.
(f) Draft Fore and Aft.

A specimen cable covering the above is quoted below:

> "Port Officer Kakinada STOP Vessel XXX ETA Kakinada 22/10 0900 Local Time quantity loading 9,500 tonnes rice bran extractions hatch one 1,000 hatch two 2,000 hatch three 3,000 hatch four 3,000 hatch five 500 no hazardous inflammable explosives STOP All winches derricks good working condition draft fore 8 m. aft 9 m."

The above cable sent to the Port Officer (in addition to the cable sent to their Agents as per normal practice) will facilitate proper anchoring instructions from Port Authorities to the Master and avoid difficulties in Port operations.

Masters should also keep watch on VHF Channel 16 to receive instructions from Port Control and contact Port Control on arrival at the approaches to the Port.

Specific instructions will be given by the Port Officer on VHF through Port Control in respect of anchorage positions. When once anchored as above, Masters should not shift their position without specific reanchorage position given by the Port Officer, unless in case of emergency in regard to the safety of the vessel.

Masters of vessels calling at this port are advised to be in possession of the latest navigation chart corrected up to-date. The Indian edition available is 3009 "Approaches to Kakinada Port" with an inset of Kakinada Bay.

Main engines should not be immobilised without specific permission from Port Authorities.

The Godavari Point (sand spit) is extending Northwestwards at a rate of about 170 ft. per annum and a port hand buoy (flashing red) 5 secs. is installed at the tip of the spit.

The holding ground anywhere in the anchorage is considered excellent (soft mud and sand).
MAX. SIZE: No restriction. Vessels any size can enter the port.
HEALTH: Masters have to send standard quarantine message not more than 12 hours and not less than 4 hours before arrival. Pratique will be granted by Port Health Officer basing on the quarantine message, which will be instructed to the Agents. Health inspection of the vessel will be carried out by the Port Health Officer at the earliest convenience. Vessels that have touched ports in the yellow fever endemic area within the last 30 days, should send the quarantine message at least 48 hours before the expected time of arrival.
RADIO: Radio stations are Visakhapatnam and Madras.
VHF: VHF radio station is in the Port Office (Port Control) on International frequency, Channels 16 and 12, communication from ship/Port control and vice versa. If ship requires communication on Channel 12, it should be advised in advance to prepare machine accordingly.

The Port control VHF functions round the clock at the following specified times:–

0045 to 0100 hrs.
0345 to 0415 hrs.
0545 to 0615 hrs.
0745 to 0815 hrs.
1045 to 1115 hrs.
1245 to 1315 hrs.
1445 to 1515 hrs.
1745 to 1815 hrs.
1945 to 2015 hrs.
2245 to 2315 hrs.

All times Indian Standard Time.
TUGS: There are 5 small tugs and 6 Pablo Boats for towing cargo lighters.
BERTHING: 1 wharf, length 300 m. 1 floating crane, capacity 50 tons.
CARGO LIGHTERS: There are 110 cargo boats with total capacity of 9,600 d.w.t. In addition 5 self-propelled mechanised barges each of 250 d.w.t. owned by the Port Authorities.

There are also available 6 mechanised barges each 240 d.w.t. owned by Central Island Water Transport Corporation Ltd., Calcutta.
STEVEDORES: Gangs engaged by party doing stevedoring work. In case of liners, Agents attend. In case of chartered vessels, consignees/shippers attend. Master to give ETA with number of hatches to be worked on arrival. Revised ETA to be sent whenever there is change.
MEDICAL: Government general hospital available with specialists. Private nursing homes also available with efficient physicians and surgeons. Agents arrange medical aid on advance advice. Being roadstead port, launches have to be arranged, hence advance notice of 6 hours necessary through signal station while in port.
DENSITY: Ranging from 1010 to 1025.
FRESH WATER: Of the 5 mechanised barges owned by the Port Authorities, 1 mechanised barge is used for supply of fresh water up to 200 tons. Privately owned self-propelled barge is also available for supply up to 100 tons. Prior arrangements to be made through Agents of vessels 24 hours in advance.
FUEL: No fuel suppliers. In case of emergency small quantities of 10/15 tons, in 205 litre drums, can be arranged from Visakhapatnam, duty paid.
GANGWAY/DECK WATCHMEN: Arranged by stevedores.
OPENING/CLOSING HATCHES: By ship's crew only.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and Spirits: 16 oz. per head per week for those who are eligible for supply by ship.
IDENTIFICATION CARDS: Required.
CONSULS: None.
REPAIRS: No facilities. Only minor repairs to winches, welding work, casting and repairing spare parts.
REPATRIATION: Can be arranged.
AIRPORT: Visakhapatnam 105 miles, Madras 350 miles.
TIME: GMT plus 5.5 hours = IST.
HOLIDAYS: Charter Party holidays are observed. Work is done day and night. Port and Customs also work on holidays and out of office hours on payment of overtime. No work even on overtime payment on following days: Bhogi, Pongal, Kanumu. Optional holidays to labour on Chollangi Amavasya, in January.
POLICE/AMBULANCE/FIRE: Police 3052; Fire 101; Ambulance 3311.
SHORE LEAVE: Shore permits given by Port Registration Officer (Immigration).
SERVICES: Fresh and dry provisions available.
NOTARY: Available for noting protest.
DEVELOPMENTS: Development programmes include canal protection, transport facilities, navigational aids, power supply to loading/discharging points and stacking yards at shore and providing breakwater of 880 m. in length (sea wall) and mooring circle on the West side of the sand-spit known as Hope Island. The breakwater can be extended a further 3.2 km. Eastward for direct berthing of ships to serve long term needs of the port.
AUTHORITY: Port Officer.

KANDLA: 23.00 N. 70.12 E. (See Plan)

DOCUMENTS: To be submitted by Masters on arrival:

Customs: Crew List (3 copies).
Crew Private Property List – this should indicate all items they possess (3 copies).
Ship's Stores List (3 copies).
All valid documents of ship in English for verification of Customs Boarding Officer.
Port Health: Maritime Declaration in duplicate.
Valid crew health cards and Derat Certificate.
Agents: Stowage Plan, Cargo Manifest and Bills of Lading.

Boarding Pilot collects following documents:
4 copies Arrival Report.
4 copies Pilotage Certificate.
2 copies Crew List.

PILOTAGE: Pilot station situated Lat. 22° 49.5′ N., Long. 70° 07′ E. Loaded vessels can cross bar only during high water. Vessel to report at pilot station 2·5 hours before high water. Masters to keep Agents closely advised of ETA and anchoring time. 12 hours advance notice to be given by Agents for Pilot. No pilot ship or telegraphic address for pilot station (Outer Tuna buoy). Vessels can contact Kandla Tower through VHF Channel 16. Pilot station 16 miles away from port. During all weathers vessels have to anchor at above position and await Pilot.

Chart: Indian No. 2059 and 203.

Shipmaster's Report: On calling at Kandla, the Pilot advised that anchorage outside a 2 mile range from the Outer Tuna Buoy and the Pilot having to board there, increases the pilotage dues by 100 per cent.

ANCHORAGE: Vessels can anchor 1 mile S.W. of above anchoring position. Inside harbour, anchorages allotted by Port Authorities, and Pilots anchor vessels at suitable positions.

Vessels can however anchor more than 2 miles from Fairway Buoy but must pick-up Pilot within 2 miles of Outer Tuna Buoy.

RESTRICTIONS: Being a tidal port, entering and leaving of loaded vessels depends on tide, and loaded vessels can cross bar at entrance of channel only during high water. Night navigation has been introduced in a restricted way.

Ships having speed of less than 9 knots through the water will not be moved in and out of the port of Kandla during hours of darkness.

Berthing and unberthing of ships at the moorings will be restricted to daylight only. Daily draft forecast for crossing Kandla Bar published at intervals by the Kandla Port Trust.

No berthing of tankers in hours of darkness; unberthing is permitted. No restriction on berthing and unberthing of cargo ships during hours of darkness.

REGISTRATION: Report: August 1985.

On account of congestion a registration system has been introduced.

When vessel has arrived at the Outer Tuna Buoy and registered with the signal station she will be allowed to proceed to other ports.

It will be up to the vessel to ensure that she is at the Outer Tuna Buoy when her turn comes up.

MAX. SIZE: Max. overall length 740 ft. No breadth restrictions.

For oil tankers max. permissible overall length is 700 ft.

Draft according to water on the bar varies between 30 ft. and 35 ft.

Sogal Channel (Mid Channel) was commissioned in 1984 which has given additional draft of 3 ft. i.e. 14 ft. at Chart Datum.

PRATIQUE: The Masters of all ships arriving at Kandla are required to send the Port Health Officer, Kandla (cable address "Sandgrodh") a wireless message embodying all applicable terms of information set out in the Standard Quarantine message of the International Code of Signals. In addition to the International Code message, Masters are also required to give the following information in plain language:

(a) Whether there is any abnormal mortality of rats or mice.
(b) Whether there is any monkey on board.
(c) Whether touched or embarked at Aden or Djibouti any person.
(d) Names of all ports touched en-route within preceding 30 days, with dates of departure.
(e) Request for Radio Pratique.

Upon anchoring at pilot station, cable again "Sandgrodh" stating time anchored and requesting Radio Pratique.

In cases where the vessel has touched any yellow fever area within preceding 30 days it is necessary for Master to certify that all officers and crew/passengers on board possess valid yellow-fever certificates.

Present practice for granting Pratique is by radio or by Port Health Officer boarding vessels inside harbour.

If the Maritime Declaration is not in order, the Pilot refers the Master to the Port Health Officer who then boards the vessel and grants Free Pratique after his inspection of the vessel.

RADIO: Within a range of 35 hours off Kandla, vessels can contact Kandla Radio on call sign VWK. Before 35 hours off, Kandla can be contacted through Bombay Radio only.

TUGS: Port tugs join ships inside harbour off berth. Ship's wires used.

BERTHING: The cargo jetty provides 6 alongside-berths with total quayage of 4,725 ft. which can accommodate ships drawing up to 30 ft. loaded draft. The cargo jetty is served with 21 electric level luffing cranes, 16 of 3 tonnes, 4 of 6 tonnes and 1 of 10 tonnes capacity for handling cargo from ships.

Additional 4×3 tonne and 1×6 tonne capacity wharf cranes to be installed.

3 mooring berths are available near the cargo jetty. In addition, there are separate moorings for *(a)* ships loading salt, *(b)* deep draft mooring for ships up to 37 ft. draft. Also see "Developments".

The Bunder basin has 3 wharves, two wharves with transit sheds. The South wharf is served with 4 quay electric level-luffing cranes of 3 tons to 10 tons capacity for handling cargo from lighters. The North Wharf is for country craft. The West wharf is provided with a 60 tons capacity electric gantry crane.

Marine unloader with rated capacity of 500 tonnes per hour for discharging bulk fertiliser and its raw materials has been commissioned.

There is a back-up storage area of 30,000 tonnes. Automatic bagging and stitching machines are also available.

STEVEDORES: Minimum 24 hours notice required for arranging stevedoring labour and gangs. Bulk fertiliser – average 650 tonnes per berth/day by conventional method. Grain – 850 tons. General cargo 250 tons per hook, subject congestion prevailing in sheds, wharves, warehouses and clearance, and on number of vessels working at particular period.

Cargo Operations:

1. At this port the unloaded/loaded LASH barges are towed by tugs which are subsequently discharged/picked up by LASH ships (operation suspended at present).

2. Regulations concerning the handling of dry-cargo are applicable to handling of cargo in barges.

3. Trucks can proceed alongside the berth and can park within the reach of the shore cranes. Cargo is loaded/unloaded from trucks directly on the wharf for shipment per vessel.

4. Forklift trucks are used to transport the cargo from the place of unloading to the stacking area and vice-versa.

5. Cargo on board the vessel is handled by Kandla Dock Labour Board workers. Packaged cargo on shore is handled by labour engaged by respective importers/exporters which are drawn from local market. Bulk cargo viz. fertiliser and wheat is handled on shore by departmental labour of Food Corporation of India

MEDICAL: Private Doctors' services available for vessels at berth. For vessels at pilot station or inner anchorages minimum advance notice of 12 hours and 6 hours respectively required. Very limited facilities of private practitioners. No hospital facilities. Inoculation and vaccination carried out by Port Health Officer (a Government body) – minimum 48 hours notice required.

TANKERS: (Also see Port of Vadinar). Tankers with max. overall length of 700 ft., 40,000 tons displacement and 34 ft. draft permitted to berth. 3 main pipe-lines connected to tanks situated about 10 km. from berth, 2 generally used for white oils and one for black oil. White-oil pipe-lines diameter 12 in. and black-oil pipe-line diameter of 16 in. In addition, one 8 in. diameter pipe-line for soyabean oil, one 3 in. diameter pipe-line for acetone and one 4 in. diameter pipe-line for formaldehyde and one 12 in. diameter pipe-line for Phosphoric Acid imported by Indian Farmers Fertiliser Co-operative Ltd.

Berthing of Ammonia Tankers at Tanker Berth No. 1 with loading/unloading arm but restriction depending on the position of manifold.

Shipmaster's Report: Tankers will sometimes be brought in to the port even though a berth may not be available at that time. Such vessel will then be moored to a mooring buoy close to the jetty, awaiting her berth at the tanker pier. Mooring to this buoy is effected by use of the vessel's starboard anchor chain, so that the anchor has to be disconnected from the chain before entering.

In securing alongside the oil-pier, tankers are required to utilise 1 insurance wire fore and aft (not supplied from shore). In addition vessel is required to use all her available ropes and wires owing to strong currents – 4 head-ropes, 2 breast-ropes, 2 springs.

DENSITY: Varies from 1020–1030.

FRESH WATER: Can be supplied through shore pipe connection and barges.

Shipmaster's Report: Water is very scarce and should be ordered at least 3 days prior arrival.

FUEL: Furnace oil (heavy oil) and light diesel oil can be supplied. Usually 12 hours advance notice required for bunkering. In event of oil tanker discharging at berth, bunker supply can only be commenced 18 hours after completion of discharge by tanker. Quantities up to 500 tons supplied by tank trucks, above 500 tons supplied through pipe-lines if berth vacant. However, any quantity can be supplied by tank trucks.

FIRE PRECAUTIONS: 3 sea water fire fighting pumps installed at oil jetty. These pumps are under charge of fire brigade officers and have adequate fire fighting equipment. A tug fully manned with fire fighting arrangements also available at short notice.

GANGWAY/DECK WATCHMEN: All ships engage 2 watchmen round the clock at gangway. To look after mooring lines, 8 mooring men (4 each at fore and aft) are engaged round the clock.

OPENING/CLOSING HATCHES: Unless specified in relative Charter Party to contrary, ship's crew to accomplish this work.

SHIP CERTIFICATES:
Registration.
Safety Equipment.
Safety Radio and Telegraphy.
International Load Line.

CUSTOMS ALLOWANCES: 200 cigarettes per week per person. Wine and/or Spirit: 2 pegs of spirit per person per day or 4 pints beer.

Shipmaster's Report: Very strict Customs supervision, particularly in regard to declaration of foreign currency.

CARGO GEAR: Ships should possess valid Cargo Gear Certificates.

IDENTIFICATION CARDS: Required. See "Shore Leave".

CONSULS: None.

REPAIRS: Minor repairs carried out. Chipping and painting work also carried out.

DRY DOCKS: A floating dry dock to accommodate small craft up to 240 ft. in length, 10.7 m. (35 ft.) beam and 3.1 m. (10 ft.) draft of max. weight 500 m./tons for repairs, available.

SURVEYORS:

M/s. G. P. Dave & Sons, Ramnath Bhavan, 753/754 Saurashtra Society, Sector No. 5, Gandhidham-Kutch.

M/s. J. B. BodaMarine, & General Survey Agents Pvt. Ltd., Bunglow No. 16, Gandhidham-Kutch.

M/s. Metcalfe & Hodgkinson Pvt. Ltd., Jamuna Building, Sector No. 1, Gandhidham-Kutch.

M/s. Navark & Mareng, Mohan Bhuvan, 109 Oslo Society, Sector 4, Gandhidham-Kutch.

M/s. Seascan Services Pvt. Ltd., Bunglow No. 79, Sector 4, Gandhidham-Kutch.

M/s. S.G.S. Ltd., above Arjan Stores, Gandhidham-Kutch.

M/s. T.C.R.C., Alankar Guest House, Gandhidham-Kutch.

REPATRIATION: Adequate facilities available.

AIRPORT: Kandla Airport 20 km. from the port and an additional airport about 70 km. from port.
TIME: GMT plus 5.5 hours.
HOLIDAYS:

	Approximate Date
Republic Day	January 26th
Holi (Second Day)	March 10th
Chetichand	March 26th
Good Friday	April 9th
May Day	May 1st
Id-Ul-Fitr	July 23rd
Janmashtami	August 12th
Independence Day	August 15th
id-Ul-Azha (Bakrid)	September 28th
Mahatma Gandhi's Birthday	October 2nd
Dussehra	October 27th
Muhurram	October 28th
Diwali	November 15th
Diwali (New Year Day)	November 16th
Guru Nanak's Birthday	November 30th
Christmas Day	December 25th

TELEPHONES: Available for tankers and cargo vessels.
GENERAL: Port equipped with 21 electric level luffing shore cranes of 3 tons to 10 tons capacity used for discharging all ships alongside cargo jetty. For discharging tankers with bulk grain port's vacuvators belonging to Food Corporation of India used.

Kandla port is a prohibited area where entry and exit are restricted to those persons having bona fide work only. Masters are requested to exercise a strict check at the gangway in order to ensure that only those persons with bona fide business to transact are allowed aboard. In the event that any unauthorised person is found to be aboard the vessel, the matter should be reported to port officials and the police on duty.

Masters are requested to advise their crew in advance of arrival at Kandla that photography within the port area is strictly prohibited, and it is suggested that all cameras should be left in the safe custody of the Master in order that crew members may not violate this regulation inadvertently and become involved in legal proceedings.
SERVICES: Tank cleaning by shore labourers. Tank washings and residue not allowed to be discharged in port area.
SHORE LEAVE: Possible.
Regulations: Photography in port area prohibited. No crew members allowed to take with them liquor of any kind ashore and not permitted to drink liquor outside port limit.
DEVELOPMENTS: Berths and bar continuously under dredging. Construction of Oil Berth No. 3 completed. Berth in operation.
AUTHORITY: Kandla Port Trust, Administrative Building, P.O.Box 50, Gandhidham-Kutch, India. *Tel:* 20054. *Telex:* 105-208. *Cables:* Port Trust Kandla. *Contact:* Harbour Master.

KARWAR: 14.48 N. 74.06 E. (See Plan)

PORT LIMITS: *North:* A line drawn from Dayamada Point to Parker Rock.
East: Seashore of Karwar Bay from Dayamada Point to Badchidar Point 50 yards above high-water mark including Baithkol Cove, Kalinady and all branches thereof as far as navigable and the shores and banks within 50 yards of high-water mark Spring tides including all islands and thence to Mogera Guda Island (including Mogera Guda Island). All patta lands and other private sites excluded.
South West: A line drawn from Mogera Guda Island through Gudsav Sunv, Westernmost point of Mandal Island to Parker Rock.
DOCUMENTS:
8 Crew Lists.
2 Manifests of Stores.
2 Private Property Declarations.
2 Currency Lists.
1 Maritime Declaration of Health.
3 Passenger Lists (if any).
4 Import Manifests.
1 Last Port Clearance.
PILOTAGE: The approach from Northward is between Oyster Rock Lighthouse and 2 front and rear leading lights on Simshigudda and Kurmagad Islands, respectively, in positions Lat. 14° 50′ 11″ N., Long. 74° 05′ 43″ E. and Lat. 14° 50′ 33″ N., Long. 74° 05′ 59″ E. Vessels approaching from Southward may enter between Oyster Rock Light and Karwar Head. Currents in bay are negligible. Ocean-going vessels are piloted by Departmental Port Officer who is a licensed Pilot. No pilotage charges at present.
ANCHORAGE: Anchorage for shallow draft vessels is with the Port Signal Station, bearing 120° (T), distance 1 to 2 miles, or Oyster Rock Lighthouse, bearing 278° (T), distance 2.5 miles in about 24 ft. to 28 ft. of water. Anchorage for deep drafted vessels is with the signal station, bearing 099° (T), distance 3 to 3.5 miles in depths of 38 ft. to 42 ft.
RESTRICTIONS: No entry restrictions. Karwar Bay may be entered on either side of Sunghiri Island, according to draft and anchorage taken as required. A vessel can enter Karwar either by day or night after having made lighthouse on Devghad Island.
MAX. SIZE: Any size of vessel can be worked as loading and unloading operation done in open sea. Depth at Outer Roads over 7 fathoms increasing accordance distance from land.
HEALTH: District Civil Surgeon acts as Port Health Officer. Free Pratique to incoming vessels from foreign ports granted by radio. All vessels calling from foreign destination must give radio message addressed "Civil Surgeon Karwar" at least 48 hours prior entering port giving last port of call, number of crew, health conditions, approximate time of arrival and requesting Pratique, same message must be repeated to Agents who obtain Pratique on shore. Anchoring time is Pratique time. For vessels calling from an Indian port, Pratique not required.

Vessels which have taken on board passengers or crew from yellow fever areas, within 30 days of departure from such ports will be under quarantine. Free Pratique will not be granted until such time as a mosquito search party, from nearest major port (e.g. Cochin, Goa or Bombay) has inspected, disinfected and certified that ship is fit for granting Pratique.

Necessary for Owners or Masters to inform Agents well in advance in case of vessel arriving from yellow fever area to enable arranging of mosquito search party and quick Pratique.
RADIO: ETA and Pratique messages should be sent via Goa or Bombay Radio as Karwar Radio has been shut down.
TUGS: No tugs necessary as vessels work in stream.
BERTHING: No berth, vessels work in open sea. Baithkol Cove is safe berthing place for lighters. Alongside wharves 10 to 12 smaller vessels can obtain safe berth with depth of 6 ft. to 8 ft.

Also see "Developments".
STEVEDORES: 48 hours notice ETA required order enable Agents advise shippers and stevedores to keep cargo and labourers ready. Main commodity export of ore. Mechanised barge loading operations in port. Ore loading rate up to 4,000 tons per day. General cargo 1,000/1,300 tons per day.
MEDICAL: Good hospital facilities exist. 2 hospitals about 1.5 miles from port. In case of inoculations and vaccination at least 2 days advance notice to be given enabling bring vaccine from nearby town (Hubli or Belgaum) distance 100 miles and 150 miles respectively.
TANKERS: No facilities for tankers.
DENSITY: 1025.
FRESH WATER: Dumb water barge for supply to vessels anchored in open Roadstead.
FUEL: No bunkering facilities for ocean-going vessels. Diesel and petrol storage depots within port for supply to small vessels.
OPENING/CLOSING HATCHES: Generally carried out by ship's crew.
CERTIFICATES:
Ship's Register.
Cargo Gear Certificates.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Derat Certificate.
Vaccination and Inoculation Certificates.
CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle spirits.
CARGO GEAR: Before commencement of loading, Master to present shippers or their Agents with valid international cargo gear certificate, which shall not be more than 12 months old. Validity of said certificate to cover whole period for loading and discharging. Fourth five-year plan includes proposals for mechanical front-end loaders, tipping trucks, mobile cranes and forklift trucks.

A 10 ton mobile crane is available.
CONSULS: None.
REPAIRS: Moderate-sized workshop in town able carry out minor deck and engine repairs.
REPATRIATION: Shipping Master arranges crew changes and necessary repatriation. Crew signing off repatriated via Goa or Bombay.
AIRPORT: No airport, or rail connections. Nearest airports Goa or Belgaum, 60 miles and 150 miles distant respectively. 2 flights per day to Bombay from Goa.
TIME: GMT plus 5.5 hours. Permanent.
HOLIDAYS: Charter party holidays declared and published every year by Honorary Secretary of the Karnataka Chamber of Commerce and Industry, Jaya Chamaraj Nagar, Hubli-20.

Non-working days when work not permitted even on payment of overtime: Republic Day (26th January) and Gandhi Jayanti (2nd October).
POLICE/AMBULANCE/FIRE: Circle Police Inspector 116; City Police Station 33; District Superintendent of Police 7; Reserve Police Headquarters 18; Ambulance 19.
SHORE LEAVE: Crew members are allowed ashore provided not of Chinese nationality.
DEVELOPMENTS: Proposed to develop port of Karwar into all-weather intermediate port, with 2 berths (the jetty 375 m. long) and 1 mechanical berth (ore berth, for vessels 40,000 d.w.t.), an approach channel and turning basin. Intended arrangements include ability accommodate up to 60,000 d.w.t. ore carriers, loading up to 8 million tons ore and 1.25 million tons other cargo per year. Also intended develop fishing harbour with facilities accommodate large-scale deep-sea fishing industry for 1 million tons fish per year. Also see "Cargo Gear".
Provision of Channel Marks:
1 Fairway buoy.
10 channel marking buoys.
Provision of a mooring boat with equipment for maintenance of buoys.
Experimental dredging.
Dredging approach channel and turning basin.
Land acquisition for future expansion.
Diversion of present main road alongside port wharf.
Improvement of Binga/Karwar Road.
Provision of 2 berths and 1 mechanical berth for ocean-going vessels.
Main berth length 172 m., depth 9.75 m. and secondary berth length 122 m., depth 7.5 m. will be ready 1986.
AUTHORITY: Port Officer – Karwar, Port Office, Karwar, Uttar Kannada District, Karnataka State, India. *Tel:* Karwar 342: *Contact:* Port Officer, Karwar.

MADRAS: 13.06 N. 80.18 E. (See Plan)

PORT LIMITS: The seaward boundaries of the Port are lines joining the points F, R, P, Q, M and S with respective co-ordinates as follows:

F	13° 07′ 59″ N.,	80° 17′ 58″ E.
R	13° 09′ N.,	80° 20′ E.
P	13° 09′ N.,	80° 22′ E.
Q	13° 03′ N.,	80° 22′ E.
M	13° 03′ N.,	80° 20′ E.
S	13° 13′ 54″ N.,	80° 17′ 12″ E.

DOCUMENTS:
3 Private Property Lists.
3 Stores Lists (Bonded Stores).
3 Crew Lists.
1 Last Port Clearance.
1 Valid Derat Exemption Certificate.
1 Bill of Health (only if vessel has touched yellow fever areas).
3 Slop Chest Declarations.
3 Currency Declaration.
Passenger List (if applicable).

Ship's Papers:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Ship's articles (if vessel is Indian or Commonwealth flag).

Ship's papers to be handed over to Agent's Representative for final entry of vessel in Customs House. Same returned to Master.

PILOTAGE: Pilotage compulsory, both inward and outward, also for purpose of shifting inside harbour. Master required to advise ETA at least 24 hours before arrival, when local Agents contact Port Authorities for arranging berthing. If any berthing delay, vessel has to anchor at Outer Anchorage – anchoring point below 10 fathom line from breakwater light. Vessels requiring Pilot fly "G" flag by day and 1 white light exhibited on a conspicuous point on ship by night. For departure from berth, vessel must call for Pilot 30 minutes before readiness to sail.

ANCHORAGE: Good anchorage found with breakwater light bearing between 240° and 300° – distance 1 mile to 3 miles.

Wreck: M.V. "Decan Pioneer" sank on 11th November 1985 in position 13° 05′ 52″ N., 80° 19′ 11″ E. (Masts are visible).

RESTRICTIONS: No restrictions of entry, both day and night. In Bharathi Dock berthing of ships more than 50,000 d.w.t. while in a loaded condition is undertaken only during daylight hours, unberthing of ships of all sizes whether loaded or light is undertaken at all times.

Ships are advised to have minimum ballasted drafts as follows when berthing/unberthing.

LOA	*Draft* Forward	Aft
500 ft. (152.4 m.)	10 ft.	15 ft.
600 ft. (183 m.)	15 ft.	20 ft.
700 ft. (213.5 m.)	20 ft.	25 ft.
800 ft. (244 m.)	25 ft.	30 ft.
900 ft. (274.3 m.)	30 ft.	35 ft.

MAX. SIZE: *Maximum Permissable LOA:*
North Quay – 540 ft. (164.6 m.)
West Quays – 2,400 ft. (731.5 m.) (total available length)
South Quay 1 – 720 ft. (219.45 m.)
South Quay 2 – 500 ft. (152 m.)
South Quay 3 – 518 ft. (158 m.)
South Quay 4 – 500 ft. (152 m.)
South Quay 5 – 450 ft. (137 m.)
East Quay – 540 ft. (164.6 m.)
Moorings 1, 2, 3 – 700 ft. (214 m.)

Outer Petroleum Berth: – 900 ft. (274.31 m.)

Jawahar Dock: Total available length 2,150 ft. (654 m.) on the East and West sides respectively with drafts up to 11 m. Breadth of Jawahar Dock entrance is 110 ft. (33.49 m.). It can accommodate vessel up to LOA 750 ft. (228.59 m.) and breadth 105 ft. (32.0 m.).

Bharathi Dock: Max. length 900 ft. (274.31 m.) and draft of 46 ft. (14.02 m.) for oil tankers using Bharathi Dock is in force. A second oil berth in the above dock is functioning since March 1986. Ore berth accepts vessels with draft up to 53 ft. (16.20 m.)

Container Berth: Total available length 1,245 ft. (380 m.), draft 42 ft. (12.8 m.).

Max. draft in the enclosed harbour varies from 26 ft. (7.92 m.) to 35 ft. (10.67 m.).

Details may be obtained from the Deputy Port Conservator, Madras Port Trust, Madras – 600 001.

HEALTH: All vessels arriving from foreign ports have to apply for Pratique through their radio – not earlier than 12 hours and not later than 4 hours before arrival. Pratique message to be addressed "Quarantine Madras" and worded as required by Port Health Authorities.

The Pilot boarding the vessel grants Free Pratique if the vessel is healthy in all respects – answer to all health questions being negative.

In all other cases or if vessel is coming from yellow fever infected area within 30 days of departure or in case of any infectious disease on board, Port Health Officer boards vessel and after due inspection grants Pratique.

Telegrams should take the following form: Name of vessel; ETA, in hours and date. No monkeys on board; answer to all health questions, (ports touched in last 30 days with departure dates). Request Radio Pratique.

Port health require to sight Derat and Vaccination Certificates when vessel due to leave before issuing clearance for Pilot and Customs who then issue port clearance.

RADIO: Coast Station Madras Radio, call sign VWM. VWM operates throughout 24 hrs. Vessels with powerful transmitters can contact VWM on HF from Singapore, Mauritius or Aden. Information regarding weather distributed twice daily. VHF communication with pilot station available around the clock to transmit and receive berthing and other operational messages. Calling frequency Channel 16 and operating frequencies Channels 14, 12 and 10. Channel 12 is the port's working channel.

Weather Radar is installed on top of the new Madras Port Trust Administrative Office Buildings.

RADAR/VHF: VHF communication available, see "Radio".

TUGS: Join vessel just inside breakwater. Vessels usually use own lines. Tugs' lines are also used if required by Pilot.

BERTHING: Vessels berth at all times.

There are in all 18 general cargo/bulk cargo berths and 3 moorings. Drafts of these berths/moorings vary from 26 ft. (7.92 m.) to 35 ft. (10.67 m.).

There are 2 oil berths in the Bharathi Dock with a draft of 46 ft. (12.8 m.).

An iron ore berth with modern mechanical loading facilities is in operation at Bharathi Dock with a draft of 53 ft. and rated capacity of 8,000 t.p.h.

There are two container berths which together have a quay length of 380 m. and a max. draft of 12.8 m.

The Bharathi Dock has the potential for accommodating 2 more berths one of which can be converted into a container berth.

A breakwater has been constructed extending Northwards from the North end of the old breakwater to ensure tranquil sea conditions in turning circle of Bharathi Dock.

BULK HANDLING FACILITIES: There are 4 berths in the Jawahar Dock and 1 in South Quay. Handling of iron ore has been discontinued in Jawahar Dock due to the operation of mechanised iron ore plant at the Bharathi Dock. Instead bulk cargo like barytes is handled.

CONTAINER HANDLING FACILITIES: There are two container berths with a quay length of 380 m. and max. draft of 12.8 m. Two heavy duty gantry cranes of 35.5 tons capacity under spreader have been provided.

The container parking yard has a capacity for stacking 5,200 containers and is served by 2 rubber-tyred transfer cranes of 35.5 tons capacity under spreader.

5 top lift trucks of capacities varying from 25 tons to 35 tons are also available for handling containers.

The container freight station with an area of 6,300 sq. m. has been provided for stuffing and unstuffing operations.

40 reefer plug points for refrigerated containers are available with a standby generator for giving continuous power supply to reefer containers.

RATE OF DISCHARGE/LOADING:
Grains, by hooks/derricks:
Bulk: 400 tons per day per hook.
By Vacs: 250 tons per Vac. per day.
Fertiliser: By hooks/derricks.
Bulk: 250 tons per day per hook.
Bagged: 375 tons per day per hook.
General Cargo: 225 tons per day per hook.
Liquid Cargo: About 150 t.p.h.

CRANES:
North Quay: 1×3 tons and 1×5 tons.
West Quay: 3×3 tons, 3×10 tons and 2×5 tons.
South Quay 1: 1×50 tons and 1×10 tons.
South Quay 2: 1×3 tons, 1×5 tons and 1×10 tons.
South Quay 3: 2×8 tons and 1×10 tons.
South Quay 4: 1×5 tons, 1×8 tons and 1×10 tons.
Jawahar Dock West: 7×3 tons, 1×5 tons and 4×10 tons.
Jawahar Dock East: 3×10 tons and 7×13 tons.
Jawahar Dock South wall: 3×3 tons.
One heavy duty floating crane of 120 tons available.

BRIDGES: There are 2 bridges for pedestrian traffic only. 1 swing bridge at the entrance of Jawahar Dock and another Bascule bridge at the entrance of boat basin.

STEVEDORES: A copy of Manifest for stevedores' required on board.

Working hours: 1st shift, 0600 – 1400 hrs. (Recess 1100 – 1200 hrs),; 2nd shift, 1400 – 2200 hrs. (Recess 1900 – 1930 hrs.); 3rd shift, 2200 – 0600 hrs. (Recess 0200 – 0230 hrs.).

MEDICAL: Advance notice for medical aid useful if vessel anchored/anchoring outside and not coming alongside, as it takes time to arrange for launch, etc. Medical assistance arranged easily if vessel alongside. Various hospitals and private nursing homes with modern equipment available. All crew members to be in possession of valid health cards in respect of inoculations/vaccinations against cholera, etc. Facilities for renewal available.

DENSITY: Varies from 1019 to 1025 according to season. No variation due to state of tide.

FRESH WATER: Available and can be supplied to vessels either through shore connections or by water barges (rate 100 t.p.h.). During Summer months due to scarcity of water, full requirements of vessel may not be possible.

FUEL: Bunkers available, but supply dependent on stock position. At least 48 hours advance notice required. Suppliers should receive nomination from their Head Office. Companies supplying bunkers are:
Indian Oil Corporation Limited.
Hindustan Petroleum Corporation Limited.
Bharat Petroleum Corporation Limited.

Usual rate of bunkering is about 40 t.p.h. to 120 t.p.h. depending on various berths. Grades of fuel available:
Fuel oil, 700 Secs. Redwood No. 1 at 100° F.
L.D.O., 70 Secs. Redwood No. 1 at 100° F.
Gas oil, 30/30 Secs. Redwood No. 1 at 100° F.

Fuel oil can be supplied by pipe-line in all berths. LDO and gas oil are supplied by tank trucks and not possible to supply at moorings in harbour.

TANKERS: There is an oil berth with 46 ft. (14.02 m.) draft at the Outer Harbour with 5 unloading/loading arms, 3 for unloading crude and 2 for handling refined products at a rated capacity of 1,500 tonnes per hour per arm. There are 2 moorings with 30 ft. (9.14 m.) draft in the inner harbour for non-dangerous petroleum products. A second oil berth at the outer harbour in operation March 1986. Max. draft 46 ft.

Manifold is equipped with 300 mm. quick fixing camlock coupling.

Facilities for deballasting the oil tanker are provided.

ALSO SEE "SHIP OPERATORS" PAGE

GANGWAY/DECK WATCHMEN: Services of watchmen are compulsory and they can be engaged from Dock Labour Board.

OPENING/CLOSING HATCHES: Work of opening/closing of hatches usually depends on what Charter Party says and also type of hatches of vessel. Liner Term Vessels:- "MacGregor Type" – These types of hatches are opened/closed by the crew; but, if Owners/Master desires, rigging gangs may be hired for this work at Owner's expense. Ordinary – beams & hatch boards or pontoon type-opening/closing of this type of hatches is done by stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes and half-ounce tobacco per week can be held by each crew member. Wine/Spirit: 1 open bottle of spirit or wine per week can be held by each crew member.

CARGO GEAR: Vessel should be in possession of valid cargo gear certificate issued by competent authority. Port Dock Safety Inspector may inspect cargo gear before or during loading/discharging in spite of vessel being in possession of a valid certificate.

IDENTIFICATION CARDS: All crew members should be in possession of their respective CDC's/Z. Cards/Passports.

CONSULS:

Sri Lanka	Tel. 476751	United Kingdom	Tel. 473136
France	Tel. 472131	U.S.A.	Tel. 473040/478912
Germany F.R.	Tel. 473593/471747	U.S.S.R.	Tel. 71112
Japan	Tel. 665594		

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register, Indian Register and ABS. Standard cargo and marine survey services available.

REPATRIATION: All facilities for effecting crew changes and arranging repatriation exist.

AIRPORT: The Madras Airport (Meenambakkam) about 15 miles from harbour and served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Declared by authorities are observed, but work completely closed on: Pongul, Republic Day, May Day, Independence Day, Mahatma Gandhi's Birthday and Deepavali.

POLICE/AMBULANCE/FIRE: Police 100; Ambulance 102; Fire 101.

TELEPHONES: Can be placed on board, but only on vessels at certain berths. All berths on West Quay, i.e. WQ 1, WQ 2, Centre Berth, WQ 3 and WQ 4, North Quay berth and berths on Jawahar docks (West) only, i.e. JD 1, JD 3 and JD 5.

SERVICES: All services available.

SHORE LEAVE: Crew members allowed ashore after securing shore passes issued by Port Security Officer. However, they must restrict themselves to city limits.

PORT REGULATIONS: Normal Port Regulations. No photography allowed in harbour except with Chairman of Port Trust's permission.

DELAYS: When there is heavy arrival of bulk grain and fertiliser, vessels may expect a delay of about a week or so.

SHIP SUPPLY SERVICE: Madras Port does not operate off-shore ship supply services either by the Port Authority or by private parties. However, certain private firms and individuals have been granted permits to ply their launches within the Port limits for the purpose of transporting ship's personnel, supply of provisions and stores for ships waiting at Outer Anchorage or for transporting sick crew members of ships.

DEVELOPMENTS: Facilities for LASH system vessels available which regularly call at the port.

* Container terminal to be expanded.

AUTHORITY: Madras Port Trust, Rajaji Salai, Madras – 600 001. *Tel:* 560161 and 562201 (24 hours). *Telex:* 041-331. *Cables:* Port Trust, Madras. *Contact:* Deputy Port Conservator.

MALPE: 13.20 N. 74.42 E.

ANCHORAGE: The port is an open roadstead. Anchorage can be obtained at a distance of 0.81 km. N.W. of Daria Bahadur Ghur Island. Depth at Anchorage – 4.5 fathoms.

BERTHING: With the construction of two breakwaters, the channel in between is maintained at about 4.50 m. at LWOST. The maximum tidal range is 1.52m.

Length of Jetties:				
	1st	33.53 m.	3rd	10.10 m.
	2nd	15.24 m.	4th	5.79 m.

FRESH WATER: Not available.

FUEL: There are oil storage depots in the Port area where HSD oil can be supplied to small vessels. For ocean going vessels there is no bunkering facility.

AIRPORT: Nearest at Bajpe (Mangalore).

TIME: GMT plus 5.5 hours.

HOLIDAYS: Holidays declared by the Collector of Customs, Bangalore.

POLICE/AMBULANCE/FIRE: Udipi – Police: Town Police Station Tel: 8444. Fire Tel: 8333.

BANKS: Syndicate Bank and Corporation Bank, Malpe P.O., Via Udipi, South Kanara Dt., South India.

GENERAL: There is a small shed for storage of cargo. Storm warning signals are hoisted on the flagstaff.

AUTHORITY: Port Office, Malpe, South Kanara Dt., South India. *Contact:* Mr. A. Jayakumar, Deputy Port Conservator, *Tel:* 8592 (Udipi)

MANDVI: 22.49 N. 69.21 E.

DOCUMENTS: Arrival: Arrival Report with ship's details, Voyage Memorandum, Crew Lists, Stores Lists.

Departure: Departure Report with ship's details, Export General Manifest, Certificate of Cargo Tonnage Loaded.

PILOTAGE: None. All vessels anchor in stream.

RESTRICTIONS: Vessels anchor in open roadstead in 3 – 5 fathoms, 2 – 2.5 miles from shore. Vessels of 9 ft. draft can reach wharves at HW and vessels drawing 12 ft. can reach Albert Edward Breakwater. Vessels having 750 tons cargo only can enter port during high tide. Highest tidal range 14 ft., average range 10 ft. Current 2 knots during fair season.

HEALTH: Government Medical Officer attends as Health Officer.

RADIO: No radio. All messages delivered through Kandla. Ship to shore radio messages delivered through VHF at stipulated times.

TUGS: Services optional. 3 tugs and 1 launch. Charges based on time and BHP.

STEVEDORING: Arranged by Agent with Port Authority.

MEDICAL: 24 hours notice required of any medical requirements.

FIRE PRECAUTIONS: Fire extinguishers are available at the port. Fire fighter is available at the Port workshops. Smoking strictly prohibited in port area.

WATCHMEN: Arranged through Agents.

HATCHES: Opened and closed by crew.

CERTIFICATES: Non-carriage of dangerous cargo, Cargo Gear Certificates, Statement that no passengers carried.

CUSTOMS ALLOWANCES: No restrictions for crew of coastal vessels. Stocks of tobacco, wine and spirits to be declared to Customs. Wines and spirits prohibited in Gujarat States but Master permitted daily quota by Customs Authorities.

REPATRIATION: No facilities.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Usually possible to arrange work on holidays.

POLICE/AMBULANCE/FIRE: Police 8; Ambulance 32; Fire 10.

SHORE LEAVE: Crew of coastal vessels only allowed ashore subject prior permission from Captain of the Port.

DELAYS: Delays to be expected in supply of cargo at times of lowest water.

GENERAL: Gulf of Kutch Ports, viz. Mandvi, Mundra, Jakhau and Koteswar administered by Chief Executive Officer and Vice-Chairman, Gujarat Maritime Board, Ahmedabad. Mandvi located on Southern coast Gulf of Kutch at mouth of River Bukmavati, seasonable, tidal and intermediate ports.

AUTHORITY: Office of the Deputy Executive Engineer (Civil) and Port Office, Mandvi-Kutch, Gujarat Maritime Board, Mandvi-Kutch, India 320455. *Tel:* 33 (Office), 40 (Residence). *Cables:* Portal Mandvi-Kutch. *Contact:* Port Officer, Mandvi-Kutch.

MANGALORE (Minor Port): 12.55 N. 74.52 E.

PORT LIMITS:

North:	A line drawn due West from the Northern boundary pillar on the seashore about 740 yards from Sultan's Battery to 9 fathoms of water.
South:	The line drawn due West from the Southern boundary pillar to the seashore, about 1,000 yards below the marine yard to 9 fathoms of water.
West:	The 9 fathom line between its intersections with the lines above defined as the Northern and Southern limits.

DOCUMENTS:

Crew Lists (6 copies).
Crew's Declarations for Customs (4 copies).
Store Lists (4 copies).
Currency Declaration (2 copies).
Import Manifest inclusive of Deck Cargo and bottom cargo (3 copies).
Bill of Lading (1 copy).
Ship's particulars inclusive of service stand (2 copies).
Declaration of opium, dangerous drugs, gold, arms, ammunitions and explosives, monkeys on board, last and next port of call (2 copies).
Valid Safety Equipment Certificate.
Valid Construction Certificate.
Valid Radio/Tele. Certificate.
Valid Certificate of Registry.
Derat Certificate.
Vaccination Certificates.
Declaration of Health.
Arrival report and Port and Light dues receipts (2 copies).

PILOTAGE: Compulsory. ETA must be informed at least 48 hours ahead of arrival. In the message of ETA the following information must be included:

(a) Name.
(b) Nationality.
(c) Call sign of the vessel.
(c) LOA (draft, forward and aft), g.r.t. and n.r.t. of the vessel.

ANCHORAGES: Open roadstead. Vessels anchor in 7.32 m. to 10.98 m. due West of entrance and are loaded and discharged by lighters. Bar situated due West of entrance. Depth of bar 2.13 m. LWST.

RESTRICTIONS: No night pilotage.

HEALTH: Vessel arriving from foreign country sends radio message in code or otherwise to respective Agents who contact Port Health Officer accordingly. If vessel from yellow fever area Master should give prior notice to Agent to arrange for Mosquito Party from Cochin to come to Mangalore and board ship on arrival. If suspected or infected, vessel should anchor not less than 0.5 miles from all other vessels and notify Port Authorities of situation either by radio or through signal station.

RADIO: Call sign VWL on 500 kHz and 438 kHz working frequency. Tel: 24300.

TUGS: 1 Port Trust tug (210 h.p.) and 1 launch and 2 private tugs capable of towing over 600 tons each are available.

CRANES: 1×1 ton and 1×5 tons.

STEVEDORES: Stevedores available. Average loading/discharging rates per day:

(a) Iron ore 400 tons per hook (weather permitting).
(b) Fertiliser or wheat bags 200 tons per hook (weather permitting).
(c) General cargo bagged 200 tons per hook (weather permitting).

MEDICAL: 24 hours notice necessary to arrange for a doctor on board. Government Hospital and Nursing Homes available.

DENSITY: Density of 1022/3 throughout year except in September (immediately after Monsoon at beginning of shipping season) when density about 1016.

FRESH WATER: Supplied by water barge at rate of 110 tons per trip with 48 hours prior notice. Cost of supply inclusive of all charges except crew overtime on holidays. Minimum order 35 tons.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.

CERTIFICATES:

Ship's Registry.
Derat Certificate.
Articles of Agreement.
Dock Safety Register (cargo gear).
Radio Telegraphy Certificate.
Load Line Certificate.
Port Clearance from last port.
Bill of Health.
Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 50 grams tobacco per week. Wine and spirits: 950 ml. per week.

CARGO GEAR: Derricks and boat devices to be hoisted in when not required to prevent contact with masts and sailyards of lighters alongside. Advisable that lifeboats be lowered only on non-working side.

IDENTIFICATION CARDS: Shore passes are issued.

CONSULS: None.

REPAIRS: Minor repairs to engines and gear carried out by auto-workshops.

DRY DOCKS: Small dry dock, maximum capacity 450 d.w.t. Dimensions, 110 ft.×30 ft. Depth on sill 8 ft. at MHWS. For minor repairs only.

SURVEYORS: Qualified Cargo Survey Agencies are available.

Surveyors available for Lloyd's Register, American Bureau, Bureau Veritas, etc.

REPATRIATION: Can be arranged by ship's agents or at shipping office for Indian crew.

AIRPORT: Bajpe – 20 km. away. Daily air service available to Bombay to connect with international flights.

TIME: GMT plus 5.5 hours.

HOLIDAYS: 26th January, Republic Day; 15th August, Independence Day; 2nd October, Gandhi Jayanthi; and other local holidays declared by Kanara Chamber of Commerce and Industry.

POLICE/AMBULANCE/FIRE: Tel: 100/102/101.

TELEPHONE: No arrangement for placing telephone on board.

SHORE LEAVE: No restrictions.

DELAYS: Adverse bar conditions necessitate stopping work for bad weather.

EMERGENCY CO-ORDINATION CENTRE: Relay information to Port's Signal Station through New Mangalore Port.

BANKS: State Bank of India, Main Branch, Mangalore 575 001.

GENERAL: *Weather:* During monsoon, mid-May to mid-September no communication with shore and port is officially closed. There is an All Weather Major Port at Panambur (New Mangalore Port) 9 km. North of roadstead.

Tides: Range of tide 1.22 m. to 1.52 m.

Lighters: Approximately 25 lighters are available with average capacity of 45 tons each and 3 motor launches. Depth at quay 2.44 m. LW.

AUTHORITY: Captain A. J. Lobo, Port Officer, Old Mangalore Port, Mangalore 575 001. *Tel:* 26174 (personal), 25031 (residence).

Shri K. S. Shetty, Port Engineer, Old Mangalore Port, Mangalore 575 001. *Tel:* 24814 (personal), 24815 (residence).

MORMUGAO: 15.25 N. 73.47 E. (See Plan)

PORT LIMITS: Roughly up to 10 fathom line running North and South from Cabo to Grand Island. Vessel is considered "arrived vessel" when she comes under direction of Signal Station.

DOCUMENTS:

10 Crew Lists.
10 Passenger Lists, if any.
3 Copies of Manifest.
1 Last Port Clearance.
1 Bill of Lading in case of imports.
3 Stores Lists.
3 Personal Property Lists.
1 Letter of Authority to Agents addressed to Asst. Collector of Customs (prepared on arrival).
1 Arrival Report to Immigration Officer.
1 Customs Declaration.
1 Inward Clearance Certificate.
1 List of Particulars.
1 Deck Cargo Certificate.
1 Arrival Report.

Last 7 items to be signed by Master in port after arrival.

Ship's papers: Documents placed at disposal of port:

Ship's Registry.	Radio Telegraphy.
Derat Certificate.	Indian Light Dues.
Safety Equipment.	Annual Cargo Gear Certificate.
Load Line.	Safety Construction Certificate.

PILOTAGE: Compulsory. ETA required at least 24 hours before arrival to order Pilot. Call Pilot by international code signals on arrival at signal station or contact by VHF Channel 16.

Pilot launch is white launch showing Pilot flag. In fair weather Pilots board West of Fairway Buoys. In bad weather, Pilots guide vessel from launch until boarding possible. Pilot launch leaves from Inner Harbour with Pilot and is not stationed at any particular position. International Regulations for Pilots' ladders applicable. Vessels awaiting Pilot may anchor 2 miles West of Fairway Buoy No. 6.

RESTRICTIONS/MAX. SIZE: Pilotage around the clock during the fair weather season (October – May). Draft restricted. Deep-laden vessels await high tide. Max. draft permissible 12.0 m.

Draft particulars for incoming ships to berths as detailed below.

Berth No.	*Max. Draft* (m.)	*Max. Length* (m.)
3	7.00	168
4	8.23	
5	8.23	
6	8.23	220
8	12.00	248
9	12.80	305

Vessels loading West of breakwater in fair weather: no restriction on size or draft.

HEALTH: International Regulations apply. Pratique automatic when calling from another Indian port. Pratique granted by Port Health Officer by radio. Telegraphic Pratique can also be obtained from Port Health Officer cable address "Quarantine Mormugao".

Master should send quarantine message not less than 4 hours and not more than 12 hours prior to arrival indicating:

1. Name of ship.
2. Expected date and time of arrival.
3. My Maritime Declaration of Health has negative answers to all 6 Health Questions or ZT or My Maritime Declaration of Health has a positive answer to question (indicated by complements) or ZU (indicated by complements 1 – 6).
4. List of ports of call with dates of departure during last 30 days.
5. Have or have not monkey on board.
6. Have or have not any person on board embarking at Aden, Djibouti or Yemen.

Request radio pratique.

RADIO: Goa Radio, call sign VWG. Operating continuously on 500 kHz, 417 kHz, and 2182 kHz. Communication range 100 miles.

VHF radio telephone station at headland signal station, call sign Goa Port, calling Channel 16, working Channel 12.

Ships desiring to contact port on VHF should establish contact by means of *(a)* light signals, *(b)* hoisting "Z" flag, *(c)* blowing "Z" on whistle or siren.

Port VHF station attracts attention of desired ship by hoisting "Z" flag with call letters of ship or by light signalling.

VHF service restricted for port operation, ship's emergencies and movements. All messages to be addressed to Harbour Master. Third party communication not allowed.

TUGS: Tugs usually used inside breakwater. Normally push, but when towing, use ship's lines. One tug, 30 tonnes bollard pull recently acquired.

BERTHING: Deep loaded incoming vessels berthed 2 hours before HW. Vessels also use anchor and quarter line to mooring buoy to keep off berth.

BULK HANDLING FACILITIES: *Ore Berth (Berth No. 9):* Provided with a mechanical loading plant of a rated capacity of 8,000 tonnes/p.h. The facility, presently capable of fully loading 60,000 d.w.t. vessels is designed to cater for 100,000 d.w.t. vessels after further dredging of entrance channel, turning circle and berth. The channel is presently dredged to −13.7 m. and berthing basin to −13.1 m. Synthetic ropes only to be used for mooring.

Berth No. 6: Equipped for mechanical handling of iron ore. Loading rate about 750 t.p.h. At present vessels of 30,000 d.w.t. with a draft of 8.23 m. can be accommodated.

Ore Transfer in Stream: Carried out between October and May (fair weather). Vessels are loaded or topped-off to a draft of 20 m. Four floating storage vessels available, capacity 150,000 tons – 200,000 tons, rates 950 t.p.h. – 3,000 t.p.h.

STEVEDORES: Original ETA of 48 hours and a definite ETA of 24 hours required and Master should indicate stowage and gangs required before arrival, also how derrick booms must be arranged so as to enable stevedores to arrange same on arrival.

MEDICAL: No hospital facilities for any serious sickness but facilities available for first aid, which should be informed 24 hours in advance. Port Ambulance can be obtained during day-time only.

TANKERS: Discharge line 35 cm. No loading facilities. Permissible draft in fair weather 12.0 m. at Oil Berth No. 8. Max. LOA 248 m. In addition, discharge facilities are available at Berth Nos. 4, 5 and 6 with 8.23 m. draft.

DENSITY: Salt water 1025 – slightly fresh during monsoon season.

FRESH WATER: Available alongside berths also from 180 tons capacity barge. Pumped by hose at 20 t.p.h. at berth, and 30 t.p.h. from barge. Sometimes restricted to 50 tons maximum if supply is limited.

FUEL:

Grades	*Viscosities*
High speed diesel oil	Less than 45 Redwood
Light diesel oil	41 ,,
Furnace oil (also known as light fuel oil)	of 623 ,,

48 hours advance notice required.

FIRE PRECAUTIONS: During discharge of oil tanker, great care taken that no naked lights are visible nearby. Movements of unauthorised persons at point of discharge strictly restricted. Ships alongside or up to a distance of 100 ft. are advised not to emit smoke through funnel. Round the clock standby duty carried out by Fire Service, around tanker, till completion of cargo discharge.

GANGWAY/DECK WATCHMEN: Necessary to have watchmen in case of loading general cargo to protect goods. In case of loading iron ore no watchman required.

OPENING/CLOSING HATCHES: Usually by crew, unless contrary to Charter Party.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per crew member per week. Wine and/or Spirit: 4/5ths of bottle per week for each member of European crew. 2/5ths of bottle per week for each member of Asian crew as per practice.

IDENTIFICATION CARDS: Not essential but according to Immigration Rule temporary Police landing pass issued to each crew member going on shore, valid for municipal area of Vasco town; if valid passport is possessed.

REPAIRS: No major repairs. Minor repairs only and no underwater welding facilities.

DRY DOCKS: None.

REPATRIATION: Facilities exist for changing and repatriating crew.

AIRPORT: Approx. 7 km. from harbour. One local flight daily to Bombay. No international flights from Goa and all outgoing foreign passengers have to be repatriated via Bombay.

CARGO GEAR: Certificates to be valid.

TIME: GMT plus 5.5 hours.

HOLIDAYS: New Year's Day, Republic Day, Gudi Padva, Good Friday, May Day, Id-Ul-Fitr, Independence Day, Ganesh Chaturthi, Mahatma Gandhi's Birthday, Idu's Zuha, Diwali, Muharram, Feast of St. Francis Xavier, Goa Liberation Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police 2234 through Postal Exchange; Ambulance (Health Centre) 2454 through Postal Exchange; Fire 222 or 223 through Port Exchange and 2300 through Postal Exchange.

TELEPHONES: No arrangements for installation of telephones on board.

SHORE LEAVE: Crew members allowed to go on shore with Police landing pass.

DEVELOPMENTS: A new multi-purpose general cargo berth with a depth of −11 m. and length 250 m. recently completed.

AUTHORITY: Mormugao Port Trust, Mormugao, Goa, (India) 403803.
Tel: 2911-2916. *Telex:* 0191-219. *Cables:* Harbadmin.
Contact: Captain V. S. Gopinath, Harbour Master.

MUNDRA: 22.54 N. 69.42 E.

LOCATION: In Gulf of Kutch near Navimal Lighthouse, about 2 miles inside Bocha Creek. Port is about 6 miles West of Mundra town. Salt exporting port open for deep sea and coastal traffic. Vessels calling Mundra anchor in open roadstead 2 miles from shore. Vessels of 8 ft. draft can berth alongside jetty. Highest tidal range 17 ft. Current parallel to coastline running about 3 knots.

AUTHORITY: Assistant Conservator.

NAGAPATTINAM: 10.45 N. 79.50 E. (See Plan)

DOCUMENTS: To be completed by Masters of vessels on arrival:

8 Crew Lists.
8 Passenger Lists.
3 Form of Import Manifests of Stores.
3 Lists of articles in slop chest.
3 Private Property Declaration of the Crew.
3 Manifests.
3 Bills of Lading.

To be handed to Agents:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.

PILOTAGE: No pilot station, being open roadstead port. Vessels not piloted to anchorage.

ANCHORAGE: Vessels anchor according draft and prevailing weather conditions. In fine weather, good anchorage in depths of 3.75 to 6 fathoms with lighthouse bearing 281° to 255°. Holding ground, sand and mud, good. Agents, in consultation with Port Authorities, signal Master on arrival of vessel, anchorage position for guidance.

MAX. SIZE: No restrictions. Vessels choose anchorage according to draft.

HEALTH: On arrival Master to signal local signal station, addressed Port Health Officer stating vessel arrived and no sick person on board. Agents then obtain Free Pratique from Port Health Authorities. In event any person having chicken-pox on board, advisable that Master informs Agents sufficiently in advance to enable them make necessary arrangements for Port Health Officer to board vessel on arrival and obtain Free Pratique after Port Health Officer is satisfied that isolation arrangement on board adequate.

RADIO: Madras Radio or Colombo Radio. No radio station locally.

TUGS: 1 tug of 45 h.p. and 1 motor launch of 30 h.p. belonging to the Port Department are available, for towing lighters. Launches owned by private owners are also available for towing lighters.

BERTHING: Open roadstead port. No berths. A mobile crane of 4 tons capacity is available in the port for handling heavy cargoes.

STEVEDORES: Port usually handles fertiliser imported on Government of India account and rate of discharge per day about 750 to 1,200 tons. Advisable that ETA of vessel is passed to Agents at least 2 days in advance to enable them to advise receivers to arrange necessary gangs.

MEDICAL: No advance notice required unless sickness of serious nature when Medical Officer boards vessel on arrival. In case of sickness to officers or crew, Medical Officer boards vessel or if in condition to go ashore, necessary arrangements made to take sick crew to Doctor. District Headquarters Hospital with all medical facilities available. Special wards available for sick members of crew. Vaccination, inoculation against yellow fever, cholera, plague, etc., can be arranged.

DENSITY: 1025.

FRESH WATER: Available in limited quantities and dependent upon port getting continuous supply from municipality. 2 tanks of 14.5 tons capacity placed in lighter are sent alongside vessel and a petrol-driven pump is used to pump up water from tanks into vessel.

FUEL: Diesel oil available in a limited quantity.

GANGWAY/DECK WATCHMEN: In the interest of vessel, 2 gangway and deck watchmen daytime and at night to be employed to avoid pilferage.

OPENING/CLOSING HATCHES: Opening and closing of hatches on arrival of vessel before commencement of discharge and on completion carried out by stevedores. Time used for opening and closing of hatches not counted.

CUSTOMS ALLOWANCES: Tobacco, 1 carton per week per crew member. Wine and Spirit, Whisky or brandy 1 quart each member for a week. No restriction for beer as the issue is based on weather, etc.

IDENTIFICATION CARDS: Needed.

CONSULS: None.

REPAIRS: Minor repairs in engine room and on deck can be effected. Chipping and painting can also be arranged.

DRY DOCKS: None.

REPATRIATION: Facilities available for effecting crew changes and arrangements can be made for repatriation.

AIRPORT: Nearest airport Madras, served by regular airlines.

TIME: GMT plus 5.5 hours.

HOLIDAYS: Observed as declared by Authorities. Vessels work on Charter Party and Government holidays but time not counted. No closed holidays but overtime charged for any work done on Government holidays and on Sundays.

POLICE/AMBULANCE/FIRE: Police 267; Ambulance 299; Fire 299. The Police and Customs Departments maintain their own W/T stations which can be contacted or utilised at times of emergency.

SERVICES: Hatch cleaning after discharge of cargo can be carried out.

BANKS: American and European banks are not available at Nagapattinam town, but are available in Madras.

EMERGENCY CO-ORDINATION CENTRE: The information should be passed on in case of a vessel in distress to the Maritime Operations Room/Sector Search and Rescue Co-ordination Centre as "Life-Saving Call" to Madras Radio for this area.

Call Sign: VWM
MADRAS
RADIO
Frequency: 500 kHz
2182 kHz
Time: Continuous.

STORING: See "Prelims".

1. Ship's stores to be sent to vessels are loaded into lighters from port wharves, as Nagapattinam is an open roadstead port, having no berths for mooring vessels.
2. Stores can be taken from lighters both during loading and discharging.
3. Trucks can proceed only up to the wharves of the port. The approximate distance from wharves to the ship depends upon the place of anchoring of the vessel. It will be about 2 to 3 nautical miles.
4. Fork-lifts are not available.
5. Necessary shipping bills are to be filed with the Port and Customs Offices before taking in stores from the shore to the vessel.
6. Local riggers may be employed.

SURVEYORS:

1. Cargo inspectors not available.
2. Lloyd's Register and American Bureau are in Madras. Salvage Association not available.

SHORE LEAVE: Officers and members of crew allowed to go ashore and necessary passes obtained by Agents.

DELAYS: Usually no delay in anchoring vessels and generally all formalities including survey carried out on vessel's arrival. If vessel arrives between 0600 and 1400 hrs., she commences discharge same day.

GENERAL: No regular launch service between ship and shore. Agents hire out private launch and obtain permission from port office to ply launch between ship and shore, to facilitate officers and crew to go ashore and for Doctor, Agent and Port Health Officer. Port Authorities do not permit plying of launch after 1800 hrs. 3 trips arranged for launch to go to vessel and back from 0600 to 1800 hrs. every day weather permitting.

AUTHORITY: Port Officer and Harbour Master, Port Office, P.O. Box No. 6, Nagapattinam, PIN 611001, Tamil Nadu State, India. *Tel:* 255 (office), 363 (personal), 285 (residence). *Cables:* Port Officer, Nagapattinam. *Contact:* Port Office and Harbour Master.

NAVLAKHI: 22.57 N. 70.27 E.

DOCUMENTS:

Arrival:

Last Port Clearance.
Bill of Health/Maritime Declaration of Health.
Customs Arrival Report.
Port Arrival Report.
Agent's Arrival Report.
List of Same Bottom Cargo.
Crew List (6 copies).
Import General Manifest.
Light Dues Receipts (in case the last port of call being Indian port).
Store List & Private Property List (8 copies each).
Misc. Declaration.

Departure:

Port Clearance (handed over by Customs).
Bill of Health.
Port Departure Report.
Agent's Departure Report.
Income Tax Clearance Certificate (in case of export cargo).

PILOTAGE: Not compulsory. If required an experienced local guide provided by Port Authorities. In such cases Pilot meets vessel at Tuna Buoy station about 19.5 miles from port.

ANCHORAGE: Open roadstead port. Vessels work in stream. 2 vessels can be brought to inner anchorage and work conveniently in good weather. In case a third vessel arrives, it has to anchor at Buoy No. 5 until one of the vessels sails from inner anchorage. During non-monsoon times vessels can be moored at Buoy (Navlakhi) No. 5. Chart of the approaches is No. 2017.

RESTRICTIONS: Night navigation not provided. Generally vessels' movements during daytime high water period. Vessels should arrive Tuna Buoy 3 hours before high water in daytime.

HEALTH: Port Health Officer available at Mahendrasinghji Hospital, Morbi.

RADIO: Radio messages intended for this port should be addressed either through Kandla or Bombay Radio Stations.

VHF: To be installed in the near future.

TUGS: Four tugs available, 150 h.p., 370 h.p., 350 h.p., and 240 h.p.

CARGO HANDLING: Ships lie at anchor in the stream about 2.0 km. from shore and cargo is shipped/landed through lighters. There are 17 barges of 100 tons capacity each. There are 17 godowns of 17,000 sq. m. floor area to store the cargo passing through ports. There are four 3 tonnes capacity cranes two of 5 tonnes capacity, and one of 12.5 tonnes capacity.

STEVEDORES: At least 24 hours notice to arrange gangs. Rate of loading and discharging for grains and fertilisers about 1,600 tonnes a day if 1 ship working; in case 2 vessels working simultaneously, combined average of about 1,600 tons can be maintained in fair weather days.

MEDICAL: Small dispensary exists under control of Medical Officer. Qualified extensive medical facilities available at Morbi which is 44 km. away or Rajkot about 109 km. Health Officer comes from Morbi to attend vessels, if required.

DENSITY: 1025.

FRESH WATER: Supplied only in small quantities. 1 barge with carrying capacity of about 49 tons a trip. Due to very low pressure in pipe-lines, minimum 12 hours to fill barge.

FUEL: None available. Can be arranged by Agents.

GANGWAY/DECK WATCHMEN: Necessary to appoint watchmen on board to avoid possible thefts.

OPENING/CLOSING HATCHES: Depends upon terms of working. Local stevedores generally attend to this operation but charge to vessel (Owners) in case these operations are vessel's account.

CERTIFICATES:

Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Ship's Register.
Derat Certificate.

IDENTIFICATION CARDS: Customs examine and issue pass to land. But if crew go to suburbs (beyond Morbi which is 30 miles away), identity cards should be carried.

CONSULS: None.

REPAIRS: Workshop for repairs to port equipment and urgent repairs of minor nature can be carried out.

DRY DOCKS: Dry dock for repairs to port service units is under construction.

REPATRIATION: Crew being repatriated from this port would be sent to Jamnagar or Rajkot (after Customs examination) where facilities are available.

AIRPORT: Navlakhi not connected by air. In case of emergency, Jamnagar or Rajkot nearest airports.

TIME: GMT plus 5.5 hours.

HOLIDAYS: The port holidays are taken as office holidays and non-working days as Charter Party Holidays. Except for non-working days, overtime work will be carried out on payment of overtime.

POLICE/AMBULANCE/FIRE: Checkpost Police Station without telephone.

TELEPHONES: Few important offices are connected with telephones, and no telephone service can be provided on board vessel.

SHORE LEAVE: The crew members are allowed ashore on showing Identification Cards to Customs and Ports.

DEVELOPMENTS: A new lighter-wharf measuring 102 m. × 8 m. with three approaches in Sue-Side creek is under construction so as to work lighters all round the clock.

AUTHORITY: Port Officer, Port Officer's Office, Navlakhi Port.

NEENDAKARA: 08.56 N. 76.33 E.

SHIPMASTER'S REPORT: July 1985.

Neendakara is a seasonal port and operates only from mid-November to mid-April. About 5 to 6 deep sea vessels load per year. Only export cargo of Mineral Sands is loaded i.e. (Silliminite, Illuminite and Zircon). The shippers are Indian Rare Earths Limited which is a Government of India undertaking.

PORT LIMITS: There is no defined port limit as such. For the purpose of Charter Party a vessel is considered as an "arrived ship" from the time of dropping anchor.

DOCUMENTS: See "Cochin".

PILOTAGE: Neendakara is an anchorage port hence no Pilots available.

ANCHORAGE: There is no defined anchorage. We anchored 2.5 miles due West of the breakwater in a depth of 15 m. Holding ground is good. Care should be taken to anchor the vessel in such a position so as to have at least 5 m. under the keel on expected maximum departure draft as sometimes heavy swell can be experienced. Agents, Customs and Port Officer usually board vessel during daylight hours for clearing vessel. Port Officer usually does the draft survey and also hold inspection prior to loading.

RESTRICTIONS: There are no restrictions on arrival/sailing at night, tide or draft.

MAX. SIZE: No limit.

HEALTH: Radio Pratique not possible. A doctor from local Government hospital is empowered to grant Pratique. The doctor does not come on board vessel. Completed Health Declaration and Vaccination List is taken by the Agents to obtain Pratique. Pratique is automatic if coming from another Indian port.

RADIO: It is best to send ETA messages via Bombay Radio or Madras Radio and Agents kept well informed.

VHF: VHF is installed in the Port Office and watch is usually kept from 0800 hrs. to 2200 hrs. when a ship is loading at anchorage. Also one of 6 harbour tugs is equipped with a VHF set. Port Office keeps watch on Channel 16.

RADAR: No Port Radar.

TUGS: Port has 6 small tugs for towing barges during loading operation of deep sea vessels at anchorage. The tugs are old and some of them are under repair at any one time.

BERTHING: No berths available.

BULK CARGO FACILITIES: Cargo is loaded in bulk and/or bags. It is brought to the ship in bags by barges. The bags are brought on board and emptied into ship's holds. The bags are mostly torn and a lot of cargo is lost overboard or left behind in barges. On completion of loading vessel will usually receive about 6% to 8% less than the shore figures. Hence Master must ask for more cargo.

STEVEDORES: About 100 labourers boarded the vessel and stayed on board throughout the loading except from 2000 hrs. on Saturday to 0800 hrs. on Monday. No work on Sundays. Average rate of loading was about 800 – 1000 tonnes per day. First barge comes alongside the ship at about 0900 hrs. and last barge leaves shore at about 1700 hrs. Loading stops around 2200 hrs. after cargo from last barge has been loaded. Strict watch should be kept on number of bags per sling as the labour tends to overload the slings. Repeated warnings by Ship's Officers made no impact so it became necessary to switch off deck power for about half an hour and only then did they reduce the load per sling.

Vessel must arrive with maximum fresh water and maintain strict rationing during stay at anchorage. Usually overtime work is not possible but to finish the ship they may speed up the loading. While we were loading, there was possibility of strike from a certain date and hence need to complete loading before that date, more labour was placed on board and loading rate went up to about 1,300 tonnes to 1,400 tonnes per day.

MEDICAL: All cases of illness are referred to Benziger Hospital in Quilon. It is preferable to give advance notice to Agents. Dental facilities also available. Cholera inoculations can be arranged.

DENSITY: Salt water.

FRESH WATER: Advance notice to be given to Agents. It is expensive to take fresh water as it is supplied by tugs at the rate of 15 tonnes per trip. There is no water barge available. Approximate cost Rs.100 per tonne.

FUEL: Not available. Nearest port for bunkers is Cochin.

CONSULS: None available.

REPAIRS: No repairs possible.

DRY DOCKS: None.

SURVEYORS: Have to be called from Cochin.

GANGWAY/DECK WATCHMEN: Ship's crew must keep a constant vigil on deck. Keep all stores, accommodation entrances and cabins locked. Try to keep lifeboat gear and fire equipment under lock and key.
OPENING/CLOSING HATCHES: By ship's crew.
CUSTOMS ALLOWANCES: 1 bottle spirits and 200 cigarettes per crew member per week.
CARGO GEAR: Loading by ship's gear only. Ensure that a few gin fall wires and cargo blocks kept ready as same may require changing due to rough handling of cargo gear.
REPATRIATION: Possible. Advance notice should be given to Agents.
AIRPORT: Nearest airports are Trivandrum and Cochin from where domestic flights will connect to Bombay/Madras for international flights.
TIME: Always GMT plus 5 hrs. 30 minutes.
HOLIDAYS: Same as "Cochin".
BANKS: Branches of most Indian Banks in Quilon.
STORING: Should be avoided as labour charge too much to transfer stores from truck into tug and then from tug to vessel at anchorage. Labour does not permit stores to be handled by ship's crew when they are working cargo even if one hook idle or even if vessel has special stores derrick. Thus, it is best to get stores alongside at night when labour has completed loading for the day.

No forklift truck available ashore, but truck can go up to about 75 ft. from the barge. At times the tug allocated for stores may not be able to come alongside jetty but may tie up alongside a barge in which case it is extremely difficult to handle heavy packages as there is no crane available and every item must be carried by hand. Even tug's crew and Port Office personnel expect "complementaries" from the vessel and Agents for allowing use of tug for stores. On shore stores are handled by labour only. No attempt should be made to employ cheap labour from outside by any other means as it will lead to stoppage of cargo loading both on vessel as well as ashore. Provisions are supplied to vessel by ship chandler from Quilon. He has his own launch and will bring provisions onboard after midnight.
SHORE LEAVE: No restriction on shore leave.
IDENTIFICATION CARDS: Not issued. However, every crew member landing ashore must sign a register in the Port Office, giving his particulars and time landed. On returning from shore he must also sign and put down time of return.
DELAYS: No delays. Usually only one deep sea vessel is loaded per month.
GENERAL:
Agents: Chowgule Brothers, P.O.Box No. 508., Willingdon Island, Cochin – 682 003. Tel: 6198, 6041. Cables: Chowship. Telex: 0885 – 371 A/B CHBR IN.

Hormuzd Shipping Corporation, 5th Main Road, Willingdon Island, Cochin – 682 003. Tel: 6630, 6285. Telex: 0885 – 279 AURA IN.

NEW MANGALORE: 12.57 N. 74.48 E. (See Plan)

LOCATION: New Mangalore port is situated at 9 km. North of the existing minor port of Mangalore.
PORT LIMITS: Westward Points:

(a)	Latitude: 12° 53.6′ N.	Longitude: 74° 44.4′ E.
(b)	Latitude: 13° 00.2′ N.	Longitude: 73° 43.1′ E.

DOCUMENTS: *Quarantine:*
Declaration of Health
Derat Certificate
Vaccination Certificate
Customs:
General particulars of the vessel
Declaration of Deck Cargo and same bottom cargo
*Crew List – (8 copies)
Arrival Report – (2 copies)
Departure Report (2 copies)
General Declaration in Form No. 1 – (3 copies).
Maritime Declaration of Health – (5 copies).
*Cargo Declaration in Form No. H – i.e. Cargo for Discharge – (3 copies).
*Vessel's Stores List in Form No. III – (5 copies).
List of Private Property (Property in possession of Master, Officers and crew of vessel) in Form No. IV – (5 copies).
*These items should be prepared in advance before arrival of the vessel. The other documents can be filled in after arrival.
Port Requirements:
General Particulars of the vessel.
Declaration of Deck Cargo and same bottom cargo.
Arrival and Departure Report on Port's Form – (in duplicate).
Declaration to comply with the Regulations of the Port for granting certificate.
Immigration:
Crew List – (2 copies).
Passports for scrutinisation.
PILOTAGE: Compulsory. ETA must be informed at least 48 hours ahead of arrival. In the message of ETA the following information must be included:
(a) Name.
(b) Nationality.
(c) Call sign of the vessel.
(d) LOA, (Draft fore and aft), g.r.t. and n.r.t. of the vessel.

Telegraphic Address of the Pilot Station: New Mangalore Port Control. Tel: 7531/7428.

Pilot Boarding Station:

Latitude: 12° 54′ 55″ N.	Longitude: 74° 45′ 24″ E.

VHF Channel or frequency to be used: Channel 16.
Channel or frequency to be used to contact Pilot Boat: Channel 12.
Description of Pilot Boat: Coloured in red hull and white superstructure.

Berthing and Unberthing:
(a) Berths arranged by the Committee of the Port Trust in advance.
(b) Two small tugs available for berthing and unberthing.
(c) Linesmen and boatmen are arranged through Port Trust.
(d) ETD requires minimum 1 hour advance notice to Port Control/Harbour Master's Office.
ANCHORAGE: Vessels are advised to anchor North of the Fairway Buoy and distances depending on draft of the vessel. Entry into the channel with Pilot is made with 2 transit towers with lights.
NAVIGATION AIDS: Include fairway buoy, front and rear leading lights and channel marking buoys.
APPROACHES: The port has been created by carving out of the mainland a 200-acre lagoon 13.0 m. deep. The lagoon is connected to the sea by an approach channel, 5,400 m. long, 245m. wide, 13.5m. deep and protected by 2 breakwaters each 570 m. long, constructed one on either side of the channel and extends to the 5 m. contour.
RESTRICTIONS: No restrictions. Night pilotage available.
MAX. SIZE: No restrictions on length and beam. Also see "Berthing".
HEALTH: The following radio advice is required:
(a) Name of the vessel and ETA with date.
(b) Request for Radio Pratique.
(c) International Code (ZT).
(d) International Code (ZU).
(e) List of Ports of Call with dates in last 30 days.
(f) Have no monkeys on board.
(g) Have no persons embarked at Aden/Djibouti.
(h) Condition of health of all on board with details of any sickness and whether all vaccinated.
RADIO: Mangalore Radio: Call sign VWL on 500 kHz., 438 kHz. Tel: 24300.
VHF: Communication facilities with Port Control on Channel 16. For Port Operations Channel 12 can be used. On arrival of the vessel general information will be given.
RADAR: No Port Radar Service.
TUGS: 2 small tugs available. Normally tug joins the vessel on base line on entrance to lagoon.
BERTHING: New Mangalore Port provides alongside berths to cater to (1) raw materials import for fertiliser factory (2) chrome ore and manganese ores (3) general cargo, (4) one shallow draft berth for smaller vessels (5) an oil jetty for handling of naphtha and other petroleum products, (6) mechanised iron-ore berth to load concentrates and handle 60,000 d.w.t. ships.
(a) 1 straight wharf of 594 m. in length consisting of 3 berths with a draft of 33 ft., 31ft. and 31 ft., respectively.
(b) 1 shallow draft berth of 22 ft. draft and 115 m. in length.
(c) 1 additional berth of 250 m. in length and a draft of 30 ft. (will be increased to 35 ft. shortly).
(d) 1 iron ore/multi-purpose berth of length 290 m., draft 41 ft.
(e) *Tanker Berth:* – See "Tankers".
CRANES: The following electric level luffing wharf cranes are positioned at the Straight Wharf: 1×6 ton, 3×3 ton and 4×10 ton.

One iron ore loader situated at the Ore Berth for loading iron ore, cement, etc., directly to vessels through chutes.

No cranes available in other berths.

Ship has to use her own gear in those berths.

Two tyre-mounted mobile cranes available for shore operations with capacity up to 18 tons. Similar cranes of lesser (5 ton) capacity available.
BULK CARGO FACILITIES: The Straight Wharf Berths (No. 1 Berth) is reserved for Bulk Cargo Handling. Normally grains, ores, fertilisers, cement, etc., are handled at this berth.
SPECIALISED CARGO HANDLING FACILITIES: This port is not specially equipped for handling containers. But containers are handled by ship's gear and with the limited mobile equipment of the Port. Agents are allowed to use private handling equipment inside port.

At Oil Jetty liquid chemicals/oils/molasses, etc., can be handled. No facility at the moment for LPG carriers.
STEVEDORES: Advise before 0500 hrs. for commencing 0800 hrs. gangs and 1500 hrs. for commencing 1800 hrs. gangs.

Main commodities loaded:
Coffee – average load rate per gang per shift – 150 tonnes.
Sugar – average load rate per gang per shift – 150 tonnes.
Granite stones – average load rate per gang per shift 200 tonnes.
Fruit products and cashew kernels – average load rate per gang per shift – 3,500/4,000 cartons.
Reefer Cargo – average load rate per gang per shift – 3,500/4,000 cases.
Heavy Machinery – average load rate per gang per shift – 120 tonnes.
Iron ore concentrate through mechanised ship loader – 3,000/4,000 tonnes/hr.
Main Commodities Discharged:
Fertilisers – average discharge rate per gang per shift – 200 tonnes.
Cement – average discharge rate per gang per shift – 200 tonnes.
Grains – average discharge rate per gang per shift – 150 tonnes.
Tanker Oil – 400/500 tonnes/hr.
MEDICAL: No advance notice except in cases of serious illness to be included in arrival cable. Ample hospital facilities for treatment are available.
TANKERS: The oil jetty is located in the S.W. portion of the lagoon very near to the approach channel. The draft available at the oil jetty is 33 ft., which affords berthing facilities for 30,000 d.w.t. (length 600 ft.) product carriers and molasses loaders.
DENSITY: 1025.
FRESH WATER: Available at all berths. Direct delivery from shore to vessel.
Cost: Rs.24/– per ton subject to a minimum of Rs.510/– in respect of vessels other than coasting.
FUEL: Oil delivered by Indian Oil Corporation (a Government of India undertaking) by tank trucks in all berths. Major grades bunker fuel/diesel/marine lubricants can be obtained from them.

FIRE PRECAUTIONS: Only normal precautions against fire at berths.
CONSULS: No countries have Consuls at the port.
REPAIRS: Most deck and engine repairs are carried out.
DRY DOCKS: No dry docking facilities at the port.
SURVEYORS:

(a) Qualified Cargo Surveying Agencies are available.
(b) Surveyors available for Lloyd's Register/American Bureau/B.V., etc.

GANGWAY/DECK WATCHMEN: Services are available at port and compulsory. Charges are at Rs.20/– per shift per watchman.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever to ship's advantage.
CUSTOMS ALLOWANCES: 50 grams of tobacco or 200 cigarettes and 950 ml. wine/spirits per person per week.
CARGO GEAR: Cargo can be handled either by ship's gear or shore cranes. Shore cranes are available up to 10 tonnes capacity.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: 15 km. from the harbour and 21 km. away from Mangalore City. Daily air services available to Bombay to connect with international flights.
TIME: Local time is 5 hours 30 minutes ahead of GMT.
HOLIDAYS: 26th January – Republic Day; 15th August – Independence Day; 2nd October – Gandhi Jayanthi.
No work on these days.
POLICE/AMBULANCE/FIRE: Tel: 100/102/101 respectively.
EMERGENCY CO-ORDINATION CENTRE: Relay information to Port Signal Station.
TELEPHONES: No facilities.
SERVICES: Services available for tank cleaning, compass adjusting, radio/radar repairs, etc., with prior arrangements.
BANKS: State Bank of India:
Mangalore Main Branch – Telephone No. 23444/21327.
Panambur Branch: Telephone No. 7312.
STORING: See "Prelims".

(a) By truck.
(b) Barges are normally not used for storing.
(c) Trucks can proceed alongside berth.
(d) Forklifts also used on the jetty while handling palletised or heavy stores.
(e) Customs documentation and regulations are in force.
(f) Private labour is to be engaged for loading stores.

SHORE LEAVE: No restrictions – crew members are allowed to go ashore.
IDENTIFICATION CARDS: Shore passes are issued.
REGULATIONS: No regulations.
DELAYS: Priority berthing for 24 hours port stay are generally allowable for export and import general cargo ships. Otherwise berths are offered according to priority of arrival for long-duration ships.
DEVELOPMENTS: An additional berth of 250 m. now offered for traffic. The present draft of 30 ft. will be increased to 35 ft. shortly. Plans to install heavy shore cranes at berth.

NOTICE: New Mangalore Port Trust, Marine Department Panambur, Mangalore 575 010. No. 4/9/84/MDS-1. Dated 9/11/84. Notice to Mariners No. 1 of 1984.
India: West Coast – New Mangalore Port Trust.
Position: Lat. 12° 56′ N., Long. 74° 43′ E.
Details: A Marker Buoy 6 ft. diameter cylindrical in shape visible height about 5 ft. above water line painted yellow with fixed all-round white light with "Sunlight Sensor" which activates light at dusk and turns it off at dawn with visual range of 2 miles has been laid in the above position in 20 metres depth of water for securing pipe barges with tugs in transit to Bombay High from New Mangalore Port. The position of the Buoy is just outside the N.M.P. limits.
Charts Affected: India West Coast, Chart Nos. 2052 and 217.
Authority: Conservator, New Mangalore Port Trust.

SHIPMASTER'S REPORT: Updated 1982.
Documents: Same as other major Indian ports.
Pilotage: Pilot boards in vicinity of fairway buoy. Pilot boat has pilot flag atop its mast.
Restrictions: Regular night pilotage is provided at 50% surcharge.
Anchorage: North of fairway buoy as South of buoy being used as dumping ground for dredgers.
VHF: Channel 16 for calling and listening. Pilots operate on 12 and 16.
Radar: None.
Tugs: 1 × 12 tons bollard pull and 1 × 30 ton bollard pull.
Hospital: Hospital facilities good.
Hatches: Opening/closing by ships crew.
Drydocks: None.

AUTHORITY: New Mangalore Port Trust, Panambur, Mangalore 575010, South India. *Tel:* 7300 *Telex:* 0842-220 Ponm In. *Cables:* Harbojet. *Contact:* The Chairman.

AGENT: Peirce Leslie India Ltd., Shipping Division, P.O.Box 239, Bunder, Mangalore 575 001, South India. *Tel:* 23381, 23231-3. *Telex:* 0842-205 PLI IN. *Cables:* Peirceship.

OKHA: 22.28 N. 69.05 E.

DOCUMENTS: 5 copies each of Import Manifest, Crew List, Passenger List, Ship's Stores Manifest, Crew Property List.
PILOTAGE: Compulsory. Pilot station Lat. 22° 30.5′ N., Long. 69° 04.6′ E.; 1.35 miles N.W. of Samiani Light Tower.
ANCHORAGE: Roadstead anchorage near pilot station.
MAX. SIZE: 525 ft. LOA during N.E. monsoon and 540 ft. LOA during S.W. monsoon. Max. draft variable, 22 ft. – 27 ft. depending on daily tide.
PRATIQUE: The Master should cable the Port Health Officer (Quarantine Okha) in International Health Code, requesting Free Pratique. If Radio Pratique is not effected, then Masters should present Maritime Declaration to the Customs Boarding Officer who is authorised to grant Free Pratique. If the vessel is arriving from yellow-fever area, the mosquito control team is arranged from Kandla, where the cable address of the Port Health Officer is "Sangrodh Kandla".
RADIO: Post and Telegraph Department Wireless station call sign VWO can be contacted from 0800 to 2000 hrs. I.S.T. for communication to and from Local Agents.
TUGS: Port-owned tugs join vessel while entering port channel and/or vacating it at time of berthing and/or unberthing.
BERTHING: Only daylight hours. Vessels should be ready in all respects to move berth 1.5 hours before high water at pilot station.
Sayaji Pier – East side 27 ft. draft; West side 20 ft. draft.
Dry cargo berth – 25 ft. draft.
CRANES: Vessels use own derricks for heavy lifts. There are 2 electric cranes at the Dry cargo berth each 1.5 – 2.0 tons capacity.
BRIDGES: None.
STEVEDORES: Firm ETA including requirements order avoid delay. *(a) Exports:* Mainly cement, bauxite and chemicals and general merchandise, rate 100/125 tons per shift per hook. *(b) Imports:* Mineral oils average rate about 300 to 500 t.p.h. according to ship's pumping capacity; general cargo same rate as export.
MEDICAL: Port Health Officer always available. Well-equipped hospital at Mithapur under Tata Chemicals at a distance of about 7 miles from port. Medical aid available throughout day and night.
TANKERS: All dry cargo vessels regulations apply for tankers, particularly size, etc. 1 berth, draft 27 ft. No slop facilities.
DENSITY: 1025.
FRESH WATER: Limited. Port supplying water by barge and shore pipe-line. In normal cases 25 tons water supplied per day. In cases of emergency 40 tons water can be supplied per day.
FUEL: Available but arrangement should be made through Indian Oil Corporation; head offices at Bombay.
FIRE PRECAUTIONS: Port Department maintains a small fire station.
GANGWAY/DECK WATCHMEN: Vessel to provide own gangway watchmen. Shore-watchman available for employment on shift basis (8 hour shifts).
OPENING/CLOSING HATCHES: To be attended to by ship's crew, if not contracted with stevedores which may cost extra.
CERTIFICATES: Ship's Register, Load Line Certificate, Safety Equipment, Safety Gear, Radio.
CUSTOMS ALLOWANCES: At Customs Preventive Squad's discretion.
CARGO GEAR: Normal gear supplied by stevedores for hire.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS: Only minor repairs.
DRY DOCKS: None.
REPATRIATION: Necessary formalities to be completed at District Headquarters situated at Jamnagar, a distance of about 110 miles: such as Police, Health (whereas Customs formality can be completed locally).
AIRPORT: Nearest airport Jamnagar about 110 miles connected with Okha by rail and road. Only local service to Bombay daily operated.
TIME: GMT plus 5.5 hours. (I.S.T.)
HOLIDAYS: As declared by Port Authorities, cargo work can be arranged by paying usual scheduled overtime but labour's observed holidays (about 8 days in a year) completely closed.
TELEPHONES: Only for tankers by respective oil installation.
SERVICE: Tank cleaning by manual labour.
SHORE LEAVE: Crew allowed ashore after vessel cleared by immigration officer who boards vessel on arrival.
DELAYS: Delay only encountered if berth or moorings are occupied.
SHIP SUPPLY SERVICE: Off-shore ship supply service operated by J. M. Baxi and Co., Bombay.
GENERAL: Port governed by Gujarat State and all rules and regulations laid down by them in addition to Central Government rules applicable to this port. Port connected with hinterland by rail, motor transport, 300 miles by sea from Bombay, 2 tides in 24 hours, mean high water spring rise about 11.5 ft. and mean low water neap rise 9.5 ft.; current in neap tide is 2 to 3.5 knots. Wind force/direction during April/September S.W. 3/5 and in October/March N.W. to N.E. from 2/4.
AUTHORITY: Port Officer – Okha Port and Superintendent of Customs, Okha (Ahmedabad Collectorate).

PARADIP: 20.14 N. 86.42 E. (See Plan)

PORT LIMITS: When vessel arrives in the Roads, 0.5 miles South of Fairway Buoy in position Lat. 20° 14′ 51″ N., Long. 86° 42′ 19.30″ E.

DOCUMENTS:

8 copies Crew List.
3 copies Ship's Store List (Form No. III).
Crew Private Property List (Form. IV) including Foreign Currency Declaration.
3 copies Currency Declaration.
3 copies Passenger List, if any.
3 copies Cargo Manifest.
3 copies Survey Bottom Cargo Manifest, if any.
3 copies Deck Cargo Certificate.
3 copies Hazardous Cargo Certificate.
3 copies "No Opium" Certificate.
3 copies Arrival Pets Abroad.
3 copies Declaration for "No Monkeys on Board".
3 copies Any other Declaration.

The Master of the vessel should deposit the following documents with the Port Authorities through their Agents.

Ship Registration.
International Load Line Certificate.
Safety Radio Certificate.
Light Dues Certificate.
Safety Equipment Certificate.
Last Port Clearance.
International Health Certificate.
Derat Certificate.
Last 3 Ports Certificate.
Cavities Certificate.
Ballast Certificate.
Vaccination/Inoculation Certificate.
Arms & Ammunitions Certificate.

The Agents will return the documents to the Master before sailing of the vessel along with the Port Clearance.

PILOTAGE: Notice of ETA must be intimated to the Harbour Master by Master or Ship's Agent not less than 24 hours before ETA. Telegraphic Address: Harbourmaster, Portrust, Paradip. Telex: 674-211. Channel 16 VHF is continuously watched. The pilot boat is white and flies Pilot's flag on the mast whenever Pilot is on board. Pilot boarding point is near the Fairway Buoy.

ANCHORAGE: Anchorage particulars given in chart published as "Paradip Anchorage". Vessel can anchor depending on draft, 4 cables from Fairway Buoy, positioned 20° 14.51′ N. and 86° 42.19′ E. Pilot boards during daytime with help of Pilot launch.

RESTRICTIONS: Night navigation facilities are likely to be provided during the end of current financial year. Vessels to have maximum ballast for entering.

MAX. SIZE: LOA 800 ft. and max. draft 39 ft. inward and 42 ft. outward. Also see "Berthing".

– Subject to weather conditions, longer vessels may be berthed.

HEALTH: Send usual quarantine message to "Quarantine Paradipport" 24 hours before arrival for Radio Pratique. Pilot gives Free Pratique on boarding vessel subject to no sick person on board. In case of suspected disease or fever on board, Port Medical Officer visits ship at anchorage/berth and cases of contagious disease are isolated and sent to nursing home.

RADIO: VHF radio installed at signal station in the Harbour Office. Calling Channel 16. Working Channel 9.

Working Hours: every even hour for 10 minutes from 0600 hrs. to 2200 hrs. and when ships are making or leaving the port.

VHF: Vessels are requested to establish contact with the control station when within VHF range (approx. 40 to 60 miles) and before entering, moving in or sailing from the port.

When within VHF range, ships are requested to give the following information:

(1) Name of ship.
(2) Ports of departure, call and destination.
(3) ETA.
(4) Vessels gross tonnage, LOA, breadth, draft and speed.
(5) Number of cases of dangerous contagious diseases on board.
(6) Type and quantity of cargo.
(7) Name of Agents and requirements.

TUGS: Two tugs of 18 tons bollard pull and 1 tug of 30 tons bollard pull are available. Tugs join vessel just inside approach channel. Ship's lines only used.

BERTHING:

Iron Ore Berth: Capable of berthing ships of 800 ft. LOA with 11.89 m. draft. Beam limited to 40 m. for iron ore handling plant.

General Cargo Berth: Length 290 m., draft 10.69 m., beam unrestricted.

Mooring Buoy Berth: Vessels up to 800 ft. with 11.89 m. draft can be moored.

Subject to weather conditions, vessels with larger LOA can be accommodated at Iron Ore Berth and Mooring Buoy Berth.

CRANES:

Type of Crane	*No.*	*Capacity*
Wharf Cranes	3	13 ton
Mobile Cranes	5	12.5 ton
Mobile Cranes	3	30 ton
Cargo Handling Equipment:		
Forklift Trucks	12	3 ton
Front End Loaders	4	2.3 cu.m. to 4 cu.m.
Rear Dumpers	16	4.5 cu.m. to 8 cu.m.
Tractor Trailers	4	5 ton
Tractor Trailer	1	10 ton
Tractor Trailer	1	20 ton
Shovel	2	3.5 cu.yd.
Bulldozer	1	180 h.p.
Tugs	2	49 h.p.

BULK HANDLING FACILITIES: 1 iron ore berth with mechanical loading plants of rated capacity 2,500 t.p.h.

SPECIALISED CARGO HANDLING FACILITIES: Semi-mechanised handling facilities for coal, chrome and other bulk cargoes are available.

STEVEDORES: Stevedores required for loading/unloading at General Cargo Berth and Mooring Berth and at Iron Ore Berth when there is no Iron-ore vessel at the Port. Average loading rates achieved for different cargoes as follows:

Cargo	*Tons per day*
Chrome-ore	1,200
Pig-iron	1,500
Coal	3,000
Iron & Steel	1,000
Foodgrains	1,500
Fertilisers	750
Other General Cargo	750

TANKERS: No facilities available at present.

MEDICAL: A 50 bed port hospital is available at the port. The crew can also be treated at the Government hospitals at Cuttack and Bhubaneswar which are 98/120 km. respectively from Paradip.

DENSITY: Varies from 1018 to 1024 with average of 1021.

FRESH WATER: Water supply is available at alongside berths and through water barges at the moorings. No water supply is given at Roads.

FUEL: HSD and furnace oil can only be procured from Cuttack on duty paid oils only. Arrangements will have to be made well in advance and the port will only provide berthing facilities for taking bunkers.

FIRE PRECAUTIONS: Tugs equipped with fire fighting arrangements are available. No fire station is available at present.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Undertaken by crew only.

CERTIFICATES:

Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Last Port of Clearance.
Derat Certificate.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or Spirit: 1 bottle of 24 ounces per head per week.

CARGO GEAR: Valid cargo gear certificate required.

IDENTIFICATION CARDS: Authorities issue landing pass.

CONSULS: None.

REPAIRS: Minor repair facilities exist.

DRY DOCKS: A 500-ton slipway available.

REPATRIATION: Immigration Office was opened by the Government in 1980. Repatriation of foreign personnel is permitted.

AIRPORT: Nearest airport at Bhubaneswar 120 km. Flight timings are appended below.

Winter Schedule:

I. *IC-497*		*Flight No.*		*IC-498*
2, 4, 6, 7		*Days of Ops*		*2, 4, 6, 7*
1140	Dep.	Delhi	Arr.	1800
1255	Arr.	Varanasi	Dep.	1645
1325	Dep.	Varanasi	Arr.	1615
1435	Arr.	Bhubaneswar	Dep.	1505

II. *IC-277*		*Flight No.*		*IC-278*
Daily		*Days of Ops*		*Daily*
1240	Dep.	Calcutta	Arr.	1350
1330	Arr.	Bhubaneswar	Dep.	1300
1400	Dep.	Bhubaneswar	Arr.	1230
1445	Arr.	Visakhapatnam	Dep.	1145
1515	Dep.	Visakhapatnam	Arr.	1115
1620	Arr.	Hyderabad	Dep.	1010

TIME: Local time GMT plus 5.5 hours.

HOLIDAYS: Charter Party holidays. Normally work carried out on all days.

POLICE/AMBULANCE/FIRE: Police 227; Ambulance 241. No fire service station at present.

TELEPHONE: No facilities for telephones on board.

SERVICES: None available.

SHORE LEAVE: Port Immigration issue shore passes to all foreign nationals excepting Chinese and Pakistanis and with shore passes crew allowed ashore.

DELAYS: Generally no delays. Vessels are given berths on "first come first serve". At the Iron Ore Berth, iron ore vessels are given priority.

GENERAL: *Comments on Shipmaster's Report No. 1:*

Normal Customs formalities are required. No extra attention to Customs Officials is necessary.

Fresh stores including meat and fish are available. Frozen imported meat is not available. Limited quantities of bonded stores are available.

DEVELOPMENTS: Second general cargo berth and extension to the short-arm completed, length 215 m. depth 10.0 m. The work on the third general cargo berth and mechanised raw-fertiliser berth will be taken up shortly. Third general cargo berth and fertiliser berths are expected to be ready by 1986.

The transit sheds and warehousing capacity is being expanded from 13,400 sq.m. to 34,830 sq.m.

The approach and entrance channel is to be dredged from 12.5 m. to a depth of 18.5 m. On completion bulk carriers of 170,000 d.w.t. will be accepted.

SHIPMASTER'S REPORT No. 1: (1975). Suggest vessels follow the normal procedure for Calcutta re-arrival documents.

Customs Officials require the personal attention of the Purser to a greater extent than in any other Indian port.

Stores: Fresh stores about average quality for Indian ports. One is not advised to try to buy meat or fish as these commodites come from Cuttack, a good distance away, and frozen imported meat is not available.

SHIPMASTER'S REPORT No. 2: (1976).
Berths: Apart from 1 iron ore berth and 1 mooring berth there is now a general cargo berth. The long arm has a length of 290.65 m. and a short arm 118.40 m. The depth alongside is 36 ft. 2 ships are normally berthed at the long arm but the ship at the Southern end normally overhangs slightly (when 2 average size ships are berthed).
Stevedores: There are a number of stevedores available at the port. No notice is required.
Services: Fresh provisions are available but 24 hours notice is required for most items. Laundry can also be arranged by Agent.

AUTHORITY: Paradip Port Trust, Paradip Port, District Cuttack, Orissa, India. *Tel:* Paradip 246, 327. *Telex:* 0674-211. *Cables:* Portrust, Paradip. *Contact:* Private Secretary to Chairman.

PONDICHERRY: 11.56 N. 79.50 E.

DOCUMENTS:
Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Last Port Bill of Health.
Last Port Clearance.
Store List with Private Property Declaration in Triplicate.
Crew List (8 copies).
Light Dues Receipt.
Manifest (Import or Export).
Bill of Lading.

PILOTAGE: Not necessary as open roadstead anchorage.
ANCHORAGES: Proper anchorage in line with New Pier. 2 chimneys in line (276°) will provide good transit in day time and at night green/red light in transit with red pier light can be taken.
MAX. SIZE: Anchorage is 7 fathoms within 1 mile from New Pier.
HEALTH: Free Pratique obtained on arrival and Master expected to address message to Port Health Officer, advising that all are well on board. Free Pratique automatic for vessels calling from any Indian ports.
RADIO: Cables routed through Madras Radio (call sign VWM).
TUGS: Tug kept ready at New Pier for towing barges.
BERTHING: No berths.
STEVEDORES: 48 hours notice prior to arrival. Rate of discharge of bagged cargo 800 to 1,000 tons per day.
MEDICAL: No advance notice necessary. General Hospital and Jipmer Hospital available.
TANKERS: Transfer operations are carried out at anchorage 1.5 miles – 2.5 miles offshore.
DENSITY: 1025.
FRESH WATER: Available. Rate 50-60 tonnes per day.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: Services not compulsory, but recommended to avoid pilferage. 3 watchmen day/night.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes permitted for each Crew member to be held out of bond. Wine and/or Spirit, 1 open quart bottle per Crew member permitted to be held out of bond.
IDENTIFICATION CARDS: Not needed if furnished with Crew List.
CONSULS: Only French Consulate General. Tel. 4058.
REPAIRS: Deck and Engine repairs not attended. Special arrangements can be made from Madras. Minor repairs carried out privately.
DRY DOCKS: None.
REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriation.
AIRPORT: Nearest airport is Meenambakam Airport, Madras, (160 km.).
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Authorities but cargo work arranged on all holidays on payment of overtime, except on Republic Day, Gandhi's Birthday, May Day and Independence Day.
POLICE/AMBULANCE/FIRE: Police 100; Fire 101; Ambulance arranged through hospital doctor on duty, Tel: 6008.
TELEPHONES: No facilities to place on board.
SERVICES: Ship chandling and supply of stores available.
SHORE LEAVE: Crew members permitted ashore but have to remain within town limit.
DELAYS: Delays occur only under unavoidable circumstances such as Surf Declaration, Cyclone, etc. Vessels arriving at night, commence discharge operations next morning.
GENERAL: For purposes of crew going ashore, launches arranged between 0600 hrs. and 1800 hrs. weather permitting, hired from private parties. Laundry facilities, supply of fresh vegetables and provisions arranged.
DEVELOPMENTS: Additional berthing facilities for vessels up to 500 d.w.t. to be constructed, completion expected 1987.
AUTHORITY: Government of Pondicherry, Port Department, Pondicherry. *Contact:* Captain N. Selvaraje, Port Director.

PORBANDAR: 21.38 N. 69.36 E.

DOCUMENTS:
Crew Lists (6 copies).
Passenger Lists (6 copies).
Customs Documents to be prepared by Agents and signed by Master (4 copies).
Arms and Ammunition Certificate 4 copies duly signed by Master.
Health Documents: All yellow fever and cholera books should be valid on arrival as well as on departure, if they are not valid on departure Port Health Officer should visit ship and give required injection to persons for completing health books before obtaining Bill of Health.
Port Clearance: Port Clearance of last port to be submitted to Boarding Officer of Customs.
Private Property List (6 copies duly signed by Master).
Store List (4 copies duly prepared by ship's officer).
Currency Declaration (4 copies).
Bills of Lading: Bills of Lading for export cargo generally to be prepared and signed by Agents.

PILOTAGE: Compulsory for inward/outward movements for all vessels and for shifting to and from berths.
ANCHORAGE: Anchor in stream about 1.5 miles off shore. 6 fathoms at low water, with good holding ground.

Outer anchorage is with Rajah's Old Palace, about 1.5 miles South-eastward of lighthouse, bearing 085° and lighthouse bearing 026°, 4.5 fathoms to 5 fathoms sand and rock (or further out as required).
MAX. SIZE: Any size vessel at anchorage. Alongside berth – Max. LOA of vessels up to 177 m. Max. permissible draft 9.00 m. No beam restrictions.

1 mooring buoy – max. draft 7 m.

For roadstead, no restrictions on length or breadth.
HEALTH: If arriving from yellow fever area within 30 days a grant of Free Pratique is necessary. Mosquito Party to be deputed from Kandla, which can only be arranged by prior intimation, failing which vessel would have to proceed to either Kandla or Bombay for Free Pratique.
RADIO: Porbandar call sign VWY, working frequency 462 kHz and watch keeping on 500 kHz.
TUGS: Will join ships for assisting berthing/unberthing.
BERTHING: 1 alongside berth and 1 mooring buoy.
STEVEDORES: 24 hours notice required for Agents to arrange gangs.

Average rate of working – 380 to 400 tons per gang per day for general cargo.

For vessels loading bulk ores 3,000 to 4,000 tons per day with ship's gear.

Export Commodities: G.N. Extraction in bags, bulk ground nut HPS, cotton bales, frozen fish, lime and lime stone, lime powder, abrasive powder, bauxite, white clay, fruits, onion, etc.
MEDICAL: Government hospital available. There are also private hospitals.
TANKERS: Presently no facility for discharging oil.
FRESH WATER: Vessels alongside can be supplied by pipe-line and water tanker. Vessels at anchorage supplied by water barge.
FUEL: Fuel can be supplied by road tankers at berth through Indian Oil Corporation at Okha and Rajkot.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Charter Party terms.
CERTIFICATES: *(a)* Load Line Certificate. *(b)* Safety Equipment Certificate. *(c)* Safety Radio Certificate, all certificates must be valid before departure of vessel
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes permitted for use of each crew member from bonded stores of ship.

Wine and/or Spirit: Customs Officer remains on board from arrival till departure and issues required quantity of wine and spirit from bonded stores. Quota is issued every week.
CARGO GEAR: Tested cargo gear should be used for loading and discharging operations.
IDENTIFICATION CARDS: Necessary.
CONSULS: None.
REPAIRS/DRY DOCKS: A dry dock of 150 ft.×55 ft. for repairs to port crafts. Also port workshop for repairs to shore and marine equipment.
AIRPORT: 3 miles from town, daily flight to Bombay.
TIME: GMT plus 5.5 hours.
HOLIDAYS: Observed as declared by Government of Gujarat and can be worked on payment of overtime charges, but work on non-working days like Indian Republic Day, Independence Day, Holi (2nd Day), Ramnavami, Muhurram, Gokul Ashthami, Dessera, Diwali (New Year) and Ramzan-Id not possible.
POLICE/AMBULANCE/FIRE: Police Station 114; Ambulance/Fire Brigade 244.
SHORE LEAVE: Police, port and Customs permission required before landing.
GENERAL: The port is an "all weather port".
AUTHORITY: Office of the Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, New Mental Hospital Building, Block No. 0/20, Ahmedabad - 380 016. *Tel:* 66610, 45116, 66270. *Cables:* Princport. *Contact:* The Chief Executive Officer and Vice Chairman, Gujarat Maritime Board, Ahmedabad-16.

The Port Officer, Gujarat Maritime Board, Porbandar – 360 575, Gujarut State, India.

PORT REDI: 15.44 N. 73.39 E.

DOCUMENTS: Arrival:
- Maritime Declaration of Health Form (in duplicate).
- Port Clearance from last port of call.
- Ship's Stores List (in triplicate).
- Crew Private Property List (in triplicate), containing full details of every article such as: cameras, radios/transistors, record players, records, watches, all types of currency, other valuable articles, souvenirs, spirits, etc.
- Crew Lists (6 copies).
- Ship's Currency List (in triplicate).
- Arms and Ammunition Declaration.
- Passenger List – if any.
- Through Cargo Manifests.

Departure:
- Medical Inspection or Examination Certificate (Bill of Health).
- Port Clearance.
- Consumed stores list in duplicate (a list of stores consumed during the stay of the vessel at port).

PILOTAGE: Compulsory. Port Officer acts as Pilot. Cable via Bombay Radio to Port Officer, Redi, Cable Address: Port Officer Vengurla, ETA of vessel 48 hours prior arrival (cable should reach Port Officer before 24 hours prior arrival). Anchor off Rairi Point – West of Rairi Point – about 1 to 1.5 miles where Port Officer boards ship to pilot to proper loading anchorage. Pilotage restricted to daylight hours only. Shifting without Pilot not permitted.

On arrival keep gangway or complete pilot ladder with manropes and step-down, ready for Pilot.

No fixed anchorage marked at Pilot station; however, vessel should not proceed beyond 1 mile from Rairi Point (for safety of vessel). Keep engine ready till Pilot boards. If vessel arrives during night hours be ready for shifting next morning.

ANCHORAGE: Anchorage Rairi Point or Redi Point (Lat. 15° 44′ N., Long. 73° 39′ E.) is a flat rocky projection, Western extremity of which is 50 ft. (15.2 m.) high. Foul ground and shoal water extend about 0.75 miles S.S.W. and about 0.5 miles Westward of this point; at Southern side of foul area is Rairi (Redi) Rock which is 36 ft. (11 m.) high and steep. Vessel should not proceed into depths of less than 6 fathoms or within 1 mile Westward in vicinity of this point without Pilot.

Loading anchorages are on both sides of Rairi Point (known as Jetty One anchorage and Jetty Two anchorage).

MAX. SIZE: No restrictions on size. This is a minor port exporting only iron ore, and vessels up to 34 ft. draft load at safe anchorage.

HEALTH: On arrival, Customs Authorities board and grant Free Pratique to ships arriving under normal conditions and on completion of Maritime Declaration of Health Form. Medical Officer, Candy Dispensary, Vengurla, acts as Port Health Officer (Quarantine Officer) for this port, and boards vessel at his convenience before sailing to conduct Medical Examination and grants Medical Examination Certificate (Bill of Health) on day of sailing. Certificate to be collected from Vengurla Office. No facilities for Radio Pratique.

If coming from yellow fever or jigger infected regions within 30 days Port Health Officer grants Pratique after boarding vessel with Mosquito Party deputed from Bombay at Owners' cost. Mosquito Party can only be arranged on advance information failing which, vessel would have to proceed either Bombay and/or Mormugao for Free Pratique. Master and/or Owners to give Agents prior notice to avoid delay in arranging Pratique. Vessels transiting through above infected areas for bunkers or water only do not require Mosquito Party for obtaining Pratique.

Advisable inform Agents prior to arrival of last port of call, crew, and nationality, and if arriving from yellow fever and/or jigger infected regions, whether called only for bunkers or water, or purpose of call and vessel's health condition.

RADIO: Bombay Radio.

BERTHING: No berths. Open roadstead port.

LOADING: Port only exporting iron ore in bulk and suppliers. The Minerals & Metals Trading Corporation of India Ltd., make own arrangements to load cargo on FOB terms. Rate between 3,000 to 4,500 tons per day per vessel if 3 vessels are working and 4,000 to 6,000 tons per day if 1 vessel is working. This rate is being achieved due to increased fleet and improvement of shore loading facilities.

MEDICAL: Preliminary medical aid available at Port Redi/Shiroda. Well-equipped hospitals situated at Savantwadi and Vengurla about 25 and 45 miles away respectively by road. Cholera inoculations done through Port Health Officer and if required this information may be passed on to Agents for arranging with Port Health Officer.

DENSITY: Average 1025.

FRESH WATER/FUEL: None.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: As per Charter Party. However, opening done by stevedores to save their time and commence loading earliest during free time.

CERTIFICATES: All certificates, particularly Cargo Gear Certificate to be in order and valid.

CUSTOMS ALLOWANCES: 200 cigarettes per week of 7 day per crew. Wine and/or Spirit, 1 bottle each per crew of spirit or beer as required.

IDENTIFICATION CARDS: Necessary.

CONSULS: None.

REPAIRS/DRY DOCKS: None.

REPATRIATION: Facilities for crew changes. 4 days advance notice required with full particulars of crew.

AIRPORT: Belgaum and/or Vascodagama 90 miles distant.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Cargo work can be arranged on overtime on all holidays except 26th January, Republic Day; 2nd October, Mahatma Gandhi Birthday; 15th August, Independence Day. On these holidays work not permitted even on overtime.

SHORE LEAVE: Crew of Chinese and Pakistani nationality not allowed land on shore. Other crew permitted land only after obtaining requisite permission from Police Authorities from Ratnagiri, distant about 160 miles and thereafter from Customs Authorities. On arrival, crew list and guarantee duly signed by Master, are furnished to Police Authorities at port and telegram sent to Ratnagiri requesting landing permission from District Superintendent of Police.

Obtaining landing permission takes 3 days; and therefore, Masters requested not to allow crew members to land on shore unless written landing permission sent on board. Crew members not allowed beyond Port Redi limits, without permission obtained from Police Authorities, Ratnagiri.

REGULATIONS: Port Officer conducts Final Draft Survey on completion of loading in consultation with Master. Master's refusal to allow shifting creates complications. Master should not shift vessel without Pilot on board or permission from Port Officer; this does not apply in case of emergency.

DELAYS: Only 3 vessels (i.e. 1 at each jetty) can work at a time on a first come first served basis. Overlapping vessels have to wait turn. Waiting time about 4/5 days.

GENERAL: Regular Post and Telegraph Office about 2.5 miles from jetty.

Vessels on arrival and at departure thoroughly examined by Customs, and Masters therefore requested to ensure that crew private property list is correctly presented to Customs Authorities and its accuracy maintained throughout stay of vessel.

Ship's wireless station not to be used for despatching cables during the vessel's stay.

Discharge of bilge water and/or dirty waste oil or cargo prohibited.

Fresh vegetables, etc., supplied in limited quantity from 90 miles distance.

AUTHORITY: Port Officer.

SIKKA: 22.34 N. 69.42 E.

SHIPMASTER'S REPORT: June 1982.

DOCUMENTS: 8 Crew Lists, 6 each Personal Effects and Stores Lists, 4 Vaccination Lists, 5 Currency Lists, (Customs do like all paperwork properly prepared).

On departure 3 Crew Lists if any changes and 3 Personal Effects Lists for those who remained on board.

For personnel leaving, Customs require Currency Form (Foreign Exchange Act 1947) in duplicate (Indian Form) and International Crew Baggage Declaration (Local Form) in duplicate.

Clearance from Last Port, Register, Load Line, Derat, Safcon, Safequip and Safradio all sighted by Agent but not taken from vessel.

All personal belongings to be recorded with makes, models and numbers.

PILOTAGE: Pilot boards vessel at anchor from tug boat using ship's derrick and tug's basket if weather is rough.

ANCHORAGE: Plenty of room for anchoring with good holding ground. Contact Mother Tanker for anchor position. We, berthing on flood tide, were requested to anchor 2 miles – 069° True from Mother Tanker.

Locally the storage vessel is referred to as the Mother Tanker (MT) and own ship (OS).

RESTRICTIONS: Apparently none, plenty of water. Larger vessels (this vessel 149,000 d.w.t.) are loaded from daughter tankers which go alongside OS.

HEALTH: Free Pratique is granted by Customs Officer.

TUGS: One tug available but not used. Tug used by Pilot and runs lines from OS to MT.

BERTHING: Position off Sikka for cargo operations approximately Lat. 22° 34′ N., Long. 69° 42′ E. Apparently 140,000 d.w.t tankers are the ideal size. They berth alongside MT and can take up to a full cargo without the MT having to top up from a daughter tanker. Operations off Sikka are temporary and from 1st May to end of monsoon. Consult with Pilot about berthing and obtain all details. Vessels berth alongside when tide is running in daylight hours. Usual Yokohama fenders used, 4 for vessels less than 750 ft. LOA and 6 for vessels over 750 ft. LOA. Fenders are made fast on MT. First 2 floatable headlines from OS to MT at least 220 m. long and may require longer. They do not like using '1st ropes ashore' off reels. In our opinion '1st ropes ashore' would be quite adequate and fast enough. Then 2 floatable stern lines from OS to MT. Final moorings were from OS to MT 3 and 2 each end with no breastlines. From MT to OS 2 headlines leading aft, 2 stern lines leading forward, forward 2 springs leading from forward to aft and 2 springs aft leading from aft to forward.

TANKERS: Loading by 2×10 in. ID hoses of ASA 150 standard, 23 m. long.Their discharge rate is quoted as 12,000 t.p.h and OS receives a letter to this effect with a request for OS loading rate. However, hoses restrict rate to about 2,700 t.p.h. overall. Hoses provided by MT, reducers supplied by OS. Only ropes or wires with rope tails used for mooring. Entire operation is guided by the ICS, OCIMF, ISGOTT. Tankers being loaded by daughter tankers should anchor with port anchor and daughter tanker berths starboard side. OS port side derrick and manifolds used alongside MT. Ballast is pumped overside. Ballast draft on arrival to be such that distance from manifold to water line does not exceed 15 m. Ballast trim not to exceed 3 per cent of LOA at any time. Distance of manifold to water line must never exceed 15 m. EDP is used. Samples are taken to Bombay for analysis before B/L figures are given together with cargo quality details. API, loading temperature and pourpoint are given prior to loading. Our API was 39.48 at 60°F and loading temperature will normally be around the same as sea temperature of about 86°F (as during 1st week in June). Cargo was Indian High crude, very thin and apparently quite clean. A Loading Master boards to assist with berthing but does not live aboard. Accommodation and victuals required for Pilot, 2 Cargo Surveyors and 1 Indian Oil Representative. MT normally has 9.5 shackles of cable out. MT does COW but not usual with OS of 140,000 d.w.t. tanker.

RADIO: To local Agent at Jamnagar via Bedi Radio VUK5. The MT (which was m.t. "Koyali") keeps an R/T watch. Would suggest contacting the MT for any advance information as nobody else would give any.
VHF: Call MT on Channel 16. While anchored/approaching Channel 11 is used after initial contact. While double banked Channel 13 is used between MT and OS. Cargo operations are conducted on UHF using MT walkie-talkies. Contact Shipindia Channel 13, who pass messages to and from Agent.
WATCHMEN: Not necessary. The only boats allowed alongside were official boats and no other small boats were observed in the vicinity. There is no gangway between MT and OS.
CUSTOMS ALLOWANCES: 200 cigarettes. The State of Gujarat is 'dry' and no alcohol allowed ashore, except foreigners being repatriated may take one bottle.
REPATRIATION: Possible. Airport at Jamnagar. The boat journey ashore is about 2 hours but boat can only get to or leave jetty about 2 hours either side of high water. Foreigners require a visa otherwise they may travel in India but are not allowed to stay at hotels. This applies to departing and arriving personnel. Indian crew are not allowed Rupee notes of greater denomination than 20 Rupees.
AIRPORT: About 1.5 hours drive by car.
SHORE LEAVE: Possible, but due to length of journey and tidal restrictions it is not recommended.
GENERAL: In June 1982 "VQ" buoy Kachchh was missing, shore authorities were advised. A night approach is better than a daytime approach as the buoys are not easy to sight against the discoloured water (on flood tide) although the buoys and Racons show very well on radar.
DEVELOPMENTS: After the end of the SW Monsoon (1982) work will resume on the oil and gas lines to Bombay from the offshore oil-field. An SPM will probably be positioned off Bombay and this will be used during the SW Monsoon when vessels cannot load at the oil-field.

TUTICORIN: 08.45 N. 78.13 E.

PORT LIMITS: *On the North:* A line drawn due East from the boundary pillar erected to the North at Arasadi along the parallel of Lat. 08° 50′ N., to a position in Lat. 08° 50′ N., Long. 78° 22′ E.
On the East: A line joining a position in Lat. 08° 50′ N., Long. 78° 22′ E. to a position in Lat. 08° 41′ 40″ N., Long. 78° 20′ 20″ E.
On the South: A line due West from a position in Lat. 08° 41′ 40″ N., Long. 78° 20′ 20″ E. to where it meets the point 45.72 m. from the HW mark on the shore.
DOCUMENTS: Required on arrival:

4 Manifests.
2 Bills of Lading.
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Property Declaration.
4 Crew Currency Declaration.
4 Import Manifest of Store List.
2 Health Report Form.

All statutory certificates in respect of vessels in Marine, Traffic, Customs and Immigration.
PILOTAGE: Compulsory within the pilotage zone. At present pilotage is restricted from 0600 hrs. to 1800 hrs. There is no night pilotage. To avoid a delay in obtaining a Pilot, the Owner, Master or Agent of a ship bound for Tuticorin must report via their Agents at least 72 hours earlier. A vessel's ETA at least 24 hours in advance through Agent/Harbour Master. The ETA must be confirmed or amended not less that 6 hours prior to arrival. Time can be either in GMT or IST. The vessels must contact Port Signal Station on VHF Channels 16/12. In message of ETA, the following information must be included:

1. Name/call sign of the vessel.
2. Nationality.
3. Length, draft and g.r.t.
4. Last port and cargo.

Pilot Boarding Station: Vessels are required to approach the Fairway Buoy and the Pilot will board the vessel about 0.5 nautical miles East of Fairway Buoy while underway. The position is approximately 2.5 km. to 3.0 km. away from the entrance to the port basin.
ANCHORAGE: In a sector with the Fairway Buoy as centre circumscribing over an arc of 171° from 009° (T) to 180° (T) at a distance of 0.5 mile to 1.0 mile.

There is also an explosives anchorage in position Lat. 8° 44′ 48″ N., Long. 78° 14′ 22″ E.
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique is issued in normal cases by the Municipal Health Officer, Tuticorin, but in the case of vessels coming from yellow fever area and jigger infection ports with 30 days it is to be issued by the Port Health Officer, Mandapam Camp.
RADIO: When vessel within 24 hours' distance Tuticorin Radio could be used and call sign VWT. Otherwise according to route followed, vessels use Madras or Bombay Radio.
VHF: Signal station stands-by throughout 24 hours on Channels 12 and 16.
TUGS: Tugs (max. bollard pull 30 tons) available for berthing and unberthing inside the harbour. However, if services are required for any special service arrangements have to be made. Ships usually anchor in open roads and enter and sail without tug assistance.
BERTHING: At present 6 alongside berths are available to handle break-bulk and dry-bulk cargoes. Berths No. 1, 2, 5 and 6 are designed for ships of 168 m. length and 9.14 m. draft and berth Nos. 3 and 4 for ships of 192 m. length and 10.67 m. draft. One coal jetty is available at North Breakwater which has been designed for ships of 235 m. length and 10.67 m. draft. Pending completion of dredging in the approach channel, ships with 8.24 m. draft can enter the port at all times. Draft of 9.14 m. will be available on completion of the first phase of dredging work, which is in progress.

The berths are connected with metre gauge railway tracks and roads which are in turn connected with road and railway system to hinterland.

Further, there is an open roadstead available at the Anchorage Port. The loading and unloading operations are carried out by lighters throughout the year. Vessels of any size and draft can be handled.
Floating Craft: Sufficient number of tugs and other floating craft are available for pilotage and other operations.
Cargo Handling Facilities: 3×3 ton wharf cranes: 5×10 ton wharf cranes; 2×6 ton wharf cranes; 7 mobile cranes of 3 tons to 75 tons; 18×3 ton diesel forklift trucks; 4×2.3 cu.m. capacity bucket front end loaders and 2 diesel locos.
Storage:

2 Transit sheds 150 m.×36 m. each.
3 Warehouses 150 m×36 m. each.
1 Dangerous cargo shed 36.23 m.×20.23 m.
1 Fumigatorium 40.50 m.×18.24 m.

15 Covered transit sheds including combustible cargo shed and dutiable cargo shed with a storage capacity of 25,370 tonnes. (In Zone 'B'.)

One open platform for storage of cargo with a capacity of 61,500 tonnes. (In Zone 'B'.)
STEVEDORES: Agents require 24 hours notice of ETA for arranging gangs, and receivers for lighters. General cargo, average rate load or discharge about 1,000/1,200 tons per weather working day.
Working hours:

(i) In respect of working of vessels in the Port, period between 0600 hours to 1400 hours on working day is treated as free time, for levy of night and holiday charges. For periods outside these hours, night and holiday charges are leviable.

(ii) In respect of delivery of import cargo and admission of cargo for shipment, period between 1000 hours to 1800 hours is treated as free time for levy of night and holiday charges. For periods outside these hours on working days night and holiday charges are levied.

(iii) On holidays no free time is permissible either for working of vessels or for delivery/admission of cargo for purpose of levy of night and holiday charges.
MEDICAL: For doctor's visit on board early advice helps to arrange for tug or launch to take doctor from shore. In cases of emergency, medical attention can be arranged but there may be some delay. Hospital facilities available. Personnel should have valid inoculation and vaccination certificates. If certificates expired arrangements made for re-vaccination/re-inoculation and renewal of certificates.
TANKERS: One permanent Oil Jetty to accommodate vessels of lengths from 150 m. to 228 m. and 9.14 m. draft is available for handling petroleum products.

Pipe-lines of 457 mm. diameter for furnace oil and 356 mm. diameter for naptha.

Pending completion of the dredging of the approach channel, only tankers with 8.24 m. draft can enter port.
FRESH WATER: Available from hydrants alongside and by barges at the anchorage when no scarcity of water.
FUEL: Supplied by road tanker.
GANGWAY/DECK WATCHMEN: Engaging watchmen always done at the discretion of Masters. In case required could be engaged.
OPENING/CLOSING HATCHES: By ship's crew. If done by stevedores charges extra.
CERTIFICATES:

Ship's Register.
Safety Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio & Telegraphy Certificate.
Derat Certificate.
Cargo-gear Stability Certificate.

IDENTIFICATION CARDS: Identification cards or seamen's passbook required to be presented to Police and Immigration authorities while coming on shore.
CONSUL: None.
REPAIRS: Minor repairs possible.
DRY DOCKS: A dry dock with workshop facilities has been constructed at the Port for docking and attending to repairs of port's own vessels.
REPATRIATION: Could be arranged via Madras.
AIRPORT: Nearest airport is Madurai, distance 100 miles, which could connect Madras.
TIME: GMT plus 5.5 hours.
HOLIDAYS: New Year's Day, Pongal, Mattu Pongal, Republic Day, Tamil New Year's Day, Good Friday, May Day, Ramzan, Independence Day, Gandhi Jayanthi, Dussehra (2 days), Moharrum, Deepavali, Thirukarthikai, Christmas.
SHORE LEAVE: Crew allowed shore leave but movements limited to municipal limits. Must obtain shore permits from police.
REGULATIONS: Usual regulations. All crew members coming onto shore and returning to ship must report to Customs and Port Police on every trip.
SERVICES: Fish, meat and all kinds of provisions and stores are generally available.
AUTHORITY: Tuticorin Port Trust, Administrative Office, Tuticorin 628004, India. *Tel:* 21790, 21220, 21960. *Telex:* 0444-243. *Cables:* Portrust. *Contact:* The Chairman.

VADINAR: 22.31 N. 69.42 E.

LOCATION: Vadinar is in the Gulf of Kachchh about 40 miles S.W. of Kandla Port. The port has 1 Single Buoy Mooring (SBM) for crude oil tankers.

Position of SBM: Lat. 22° 30′ 34.48″ N., Long. 69° 42′ 4.07″ E.

The deep water channel from Dwarka to SBM is marked by 9 deep sea lighted marker buoys (refer Chart No. 203).

PILOTAGE: Pilotage is compulsory and the Pilots board the tankers at anchorage (Lat. 22° 33′ N., Long. 69° 38′ E.). Tanker should communicate ETA Vadinar to Harbour Master Kandla Port and local Agents, Jamnagar 72, 24 and 12 hours in advance.

VHF: Vadinar Control Tower can be contacted on VHF Channel 12 and 16.

TUGS: Port tugs and the launch join ships at the approach to SBM.

RESTRICTIONS/MAX. SIZE: VLCC's of max. 300,000 d.w.t. can be moored at the SBM. At present berthing of tankers is only in daylight hours but night berthing may start soon. Unberthing can be done during hours of darkness.

FRESH WATER: Fresh water can be supplied only by water barge.

DEVELOPMENTS: Deep water berth planned.

AUTHORITY: The Chairman, Kandla Port Trust, A.O. Building, P.O.Box No. 50, Gandhidham (Kachchh), India. *Tel:* 2001. *Telex:* 001-105-208. *Cables:* Portrust. *Contact:* Harbour Master.

VERAVAL: 20.54 N. 70.22 E.

DOCUMENTS:

Last Port Clearance.
Ship's Stores Manifest (3 copies).
Crew List (5 copies).
Private Property List of Crew (3 copies).
Same Bottom Cargo (3 copies).
Ship and Crew Currency List (3 copies).
Indian Coast Light Dues Receipt (if vessel arriving from Indian port).
Maritime Declaration of Health.
Customs Arrival Report.
Customs Declaration for arms, ammunition, etc.
Port Arrival Report.

PILOTAGE: Not required. Vessels anchor midstream.

ANCHORAGES: Veraval Light exhibited on coast near Political Residency (occ. 15 sec. 110 ft.). Known as New Lighthouse. Breakwater near harbour under 3 fathoms (5.5 m.). No perceptible tide streams in roadstead. During night/neap tide with low water ships suffer cargo feeding for about 5 hours, 4 to 5 days in month.

Anchorage depth 48 ft. to 60 ft. opposite Bhiria Temple. Good anchorage obtained with Veraval Lighthouse Bearing 317°, breakwater end. True Bearing 336.5°, Bhiria Beacon 27°.

However to avoid shifting after anchoring, for a working turn, new working anchorage zone has been suggested as hereunder. Only 3 ships can work at a time and others have to wait for a turn.

No.	*Point*	*Position Lat. Long.*	*Anchorage No.*	*Depth approx.*	*Suggested for a vessel having draft up to*
(i)	A	20° 53′ 27″ North 70° 22′ 40″ East	1	11.50 m.	8.75 m. (28 ft. 00 in.)
(ii)	B	20° 53′ 20″ North 70° 22′ 20″ East	2	12.00 m.	9.25 m. (30 ft. 00 in.)
(iii)	C	20° 53′ 03″ North 70° 22′ 33″ East	3	12.8 m.	10.00 m. (32 ft. 00 in.)
(iv)	D	20° 53′ 14″ North 70° 22′ 48″ East	4	11.00 m	8.25 m. (26 ft. 00 in.)
(v)	E	20° 53′ 16″ North 70° 22′ 33″ East	5	13.00 m.	10.25 m. (33 ft. 00 in.)

Point No.	*Veraval Lighthouse*	*Bhiria Beacon*	*Somnath Temple*
A	311°	036.5°	101°
B	321°	048°	094.5°
C	321.5°	027°	083.5°
D	312.5°	015.5°	088°
E	317.5°	034.5°	092°

RESTRICTIONS: None, day or night anchorage possible.

MAX. SIZE: No restriction.

HEALTH: (a) Bill of Health is being granted by the Resident Medical Officer of the local Hospital.

(b) Free Pratique is granted by the Customs Boarding Officer, on presentation to him of "International Maritime Declaration of Health" by Master.

RADIO: Messages via Bombay Radio or Kandla Radio.

TUGS: 4 tugs, 1×340 h.p., 2×240 h.p. and 1×190 h.p.

VHF: No VHF.

BERTHING: No berths.

There are 4 lighter wharves for vessels working which can provide loading/unloading points, of which 4 have cranage facilities, crane capacity from 1.5 ton to 20 ton for heavy lifts.

Barges: There are 15 barges with 100 tons capacity each and one water/cargo barge with capacity 120 tons.

Storage Facilities:

4 transit godowns – 1,600 tons capacity.
4 platforms – 4,000 tons capacity.
53 storage godowns – 50,000 tons capacity.

STEVEDORING: Particulars of ETA and labour gangs required well in advance. Average loading/discharging:

Loading bagged cargo oilcake, etc.	225/250 tons per hook per day
Loading GN oil in drums	150/175 tons per hook per day
Discharging fertiliser (bagged)	150/200 tons per hook per day
General cargo loading/discharging	150/200 tons per hook per day

Working Hours: Port working hours: 0800 – 1200 hrs. and 1300 – 1700 hrs.

Vessel working hours: Vessels are allowed to work during recess hours and during nights which are 1200 – 1300 hrs. (recess), 1700 – 1800 hrs. (recess), 1800 – 2200 hrs. (night – 1st half), 2300 – 0300 hrs. (night – 2nd half) and 0300 – 0800 hrs. (recess).

MEDICAL: Qualified doctors and hospital facilities.

TANKERS: No tanker berths.

FRESH WATER: Water is required to be obtained from private well and is transported by port tank truck and being supplied by water barge or by tug to vessel on payment of transportation charges from private well to shore and from shore to anchorage excluding cost of water.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Not necessary unless required. Can be arranged through Agents.

OPENING/CLOSING HATCHES: Carried out by stevedores. Ships' derricks worked by crew.

CERTIFICATES:

Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-Telegraphy Certificate.
Derat Certificate.
Ship's Registration Certificate.

CONSULS: None.

REPAIRS: Port is equipped with workshop and dry dock for minor repairs to tugs and barges. Minor repairs are carried out in town.

REPATRIATION: Can be arranged.

AIRPORT: Nearest airport Keshod, 30 miles from Veraval, but motor transport not easily available and advance arrangements have to be made.

TIME: Local Time GMT plus 5.5 hours.

HOLIDAYS: On which work not allowed for loading/discharging: Indian Republic Day, Holi (Second Day), Ramnavami, Mohurram (Ashura or 10th day), Gokulashtami, Dussera Diwali (New Year's Day), Ramzan-Id (Id-ul-Fitr).

POLICE/AMBULANCE/FIRE: Police 3; Ambulance 5; Fire 5.

TELEPHONES: No arrangements for placing telephones on board the ship.

SHORE LEAVE: Crews permitted ashore with permission from Customs and Port Authorities. While coming ashore and returning to ship crew should pass through Customs.

DELAYS: 3 ships can work and fourth vessel if for lifting frozen fish can work during night hours only. Fourth vessel other than frozen fish cargo wait in turn.

GENERAL: Closed for traffic between 15th May to 15th September every year due to monsoon season.

Charts: Plans of Kathinwar – Gulf of Kutch to Vijaydurg 2736. Plans of Veraval Port Roads No. 1321 and 2054.

DEVELOPMENTS: Veraval is being developed as an all weather fishery harbour working under the World Bank Project. There will be extensive facilities available at the Port. The existing breakwater is being extended by about 334 m. and another would be erected in opposite direction for about 3,200 ft. A minimum depth of water in the inner breakwater would be 17 ft. 6 in.

AUTHORITY: Office of the Port Officer, Veraval, Junagadh District, Pin. 362265. *Tel:* No. 1 (office). 256 (residence). *Contact:* Port Officer.

VISAKHAPATNAM: 17.41 N. 83.18 E. (See Plan)

PORT LIMITS: 3 nautical miles East of and parallel to 10 fathoms line of soundings may be taken as the seaward boundary of the port within which a vessel is considered to be an "arrived vessel".

DOCUMENTS:

12 copies of Crew List.
3 copies of Store List.
3 copies of Private Property List.
3 copies of Currency Declaration.
3 copies of watch lists, giving details of make and value, etc.

The vessel must possess following valid certificates:

Ship's Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Telegraphy and Telephony Certificates.
Cargo Gear Test Certificate.
Safety and Survey Certificate.
Derat Certificate.
Last Port Clearance.

PILOTAGE: Vessels generally anchor at roadstead where Pilots board. Signal station contacts all vessels arriving and advises all information about Pilot's arrival, etc. A minimum notice of 48 hours of vessel's ETA required. Pilot ladder to be rigged on the Starboard side.

ANCHORAGE: Anchorage position to be marked with Dolphin's Nose Lighthouse bearing 270° (T) at a distance of 1.5 nautical miles.

RESTRICTIONS: *Inner Harbour:* The Inner Harbour is open to ships of 193.55 m. LOA, 9.14 m. draft and 30.48 m. beam at all stages of tide and ships of 193.55 m. LOA with a max. draft of 10.05 m. on a minimum rising tide of 0.91 m. for arrival and draft of 10.21 m. for sailing. Vessels of LOA 175.26 m. and above with draft of 9.14 m. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from Inner Harbour.

Outer Harbour: Vessels with 270 m. LOA, 42 m. beam, 15.3 m. draft, can sail from the Outer Harbour "OB–1" and "OB–2" berths at all times. The draft for ships entering the Outer Harbour in loaded condition is 14.3 m. No tidal restrictions. The max. permissible draft at oil mooring is 14.3 m., and LOA 260 m.

Vessels of 60,000 d.w.t. and above can enter during daylight hours only. There are no restrictions on account of night navigation for sailing of vessels from ore berths No.'s I and II.

Mooring and unmooring of vessels at Oil Mooring is restricted to daylight hours only.

MAX. SIZE: *Inner Harbour:*

Max. permissible LOA	193.55 m.
Max. permissible breadth	30.48 m.
Max. permissible draft	10. 21 m.

Outer Harbour:

Max. permissible LOA	270 m.
Max. permissible breadth	42 m.
Max. permissible draft	15.3 m.

PRATIQUE: A separate radio Free Pratique message addressed "Quarantine Visakhapatnam" must be transmitted by all vessels arriving from foreign port not less than 4 hours and not more than 12 hours prior ETA.

On information furnished therein Port Health Officer grants Free Pratique. Pilot boarding the ship for bringing her into the harbour has superseding power to cancel radio Free Pratique already granted. However based on information contained in Maritime Declaration Pilot also grants Free Pratique. In case of doubt or in case of inspection, if necessary, Quarantine Officer boards ship for granting clearance. No necessity for vessel to obtain Free Pratique when the vessel arrives directly from another Indian Port.

RADIO: Radio station call sign VWV. Working round clock. Range about 600 miles during daytime and 1,000 miles during night. Better to use Madras Radio Station for all communications in respect of vessels arriving from Madras side. Vessels arriving from Calcutta side, use Calcutta Radio Station. Generally Visakhapatnam Radio station is used for vessels anchored at roadstead. VHF Channel 16.

TUGS: Tugs are available. For ships entering the port, the tugs wait in the lee of the breakwater. Ship's lines and/or tug's lines are used, depending upon the mode of making fast.

BERTHING: The Inner Harbour has 15 berths of which 11 are quay berths, 3 jetty berths and 1 mooring berth, while in the Outer Harbour, there are 2 ore berths and an oil mooring berth. No specific requirements of arrival times for berthing.

CONTAINER HANDLING FACILITIES: Container handling facilities are provided at Visakhapatnam Port.

These facilities include:

Priority berthing;

An earmarked regular quay berth with a draft of 10.06 m. and LOA 168 m.;

50,000 sq. m. open storage space;

3,000 sq. m. of covered storage area;

A 150 tonne floating crane with two 150 tonne flat top pontoons for overside operations;

A 50 tonne gantry crane in the container park;

Two 50 tonne crawler mounted mobile cranes;

Four 25 ton mobile cranes;

Fleet of forklift trucks with extended forks up to a capacity of 8 tons and Truck-trailer units.

CRANES: The Port has 6×10 tonne cranes, 6×6 tonne and 18×3 tonne quay cranes, one 30 tonne stationary electric crane and 1×150 tonne self-propelled floating crane in addition to various mobile equipment such as mobile cranes, forklifts, tractors and trailers and front end loaders.

BULK CARGO FACILITIES: Iron ore is loaded through a mechanical ore handling plant having a rated capacity of 8,000 tonnes per hour into ore carriers of 100,000 d.w.t., at the finger type ore jetty (OB-1, OB-2) in the Outer Harbour.

Fertiliser raw materials (i.e.) rock phosphate and sulphur on account of Coromandal Fertilisers are handled at the fertiliser berth in the bulk form by means of grabs and conveyors into a silo.

Grabs are also used for unloading fertilisers and other bulk cargoes at the Port.

SPECIALISED CARGO HANDLING FACILITIES:

Inner Harbour: *Fertiliser berth:* For the import of fertiliser raw materials vis. sulphur and rock phosphate by grab unloading on to a conveyor belt.

OR-1 and OR-2 Berths: For the handling of P.O.L.

EQ-1 and EQ-2 Berths: For the export of Manganese ore and other ores by semi-mechanical means. Portable flat belt conveyor system for handling bag cargoes.

Use of grabs for unloading bulk cargoes. Poclain Hydraulic excavator and front end loaders for handling bulk cargoes.

Outer Harbour: *OB-1 and OB-2 Berths:* For loading iron ore through a mechanical ore handling plant at a rated capacity of 8,000 tonnes per hour.

STEVEDORES: Agents must give proper notice of vessel's arrival to the stevedores not less than 48 hours to make necessary arrangements for working vessel and also to order sufficient gangs, etc.

MEDICAL: All crew and officers must possess individual international vaccination certificates against cholera before leaving this port for any foreign port. Cholera inoculation facilities available with 24 hours notice. Well-equipped hospital facilities available round the clock.

TANKERS: There are 2 berths in the Inner Harbour for discharging and loading oil. The max. permissible draft at these berths is 10.06 m. at HW. In the Outer Harbour, an oil mooring berth is available to accommodate tankers of up to 100,000 d.w.t. with a draft of not exceeding 14.3 m.

DENSITY: Fluctuates from day to day between 1020 and 1023.

FRESH WATER: Normal quantities available and delivery made by Port Trust both from shore and barges.

FUEL: Indian Oil Corporation and Hindustan Petroleum Corporation supply on request either through pipe-line in some cases or by barges in other cases.

FIRE PRECAUTIONS: Fire precautions are to be observed in the port area. The Port has fire fighting equipment consisting of a fire float capable of combating fires afloat as well as ashore and 3 shore fire fighting units.

GANGWAY/DECK WATCHMEN: Necessary according to demands of local labour unions.

OPENING/CLOSING HATCHES: Stevedores.

CONSULS: None.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes per head per week. Wine and/or spirit: Asian Crew 2/5 units per 3 days. Non-Asian crew 4/5 units per 3 days. Bottle of liquor equals unit.

CARGO GEAR: Valid cargo gear test certificate must be on board all vessels using ships' gear for loading or discharging.

IDENTIFICATION CARDS: Not needed if have valid seaman's books.

CONSULS: None.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: The Port has a dry dock which is 137.2 m. long and 18.4 m. wide for port craft and small ships. It has a depth of 5.6 m. below the low water.

Hindustan Shipyard Limited's services available generally for major ship repairs. It has a dry dock which is 244 m. long and 38 m. wide. It can take in ships of 70,000 d.w.t.

REPATRIATION: Facilities exist to foreign countries via Madras, Calcutta or Bombay. About 3 days delay to obtain travel permit.

AIRPORT: Distance 14 km. Regular daily flights to Calcutta and Hyderabad by Indian Airlines Corporation.

SURVEYORS: Available.

TIME: Indian Standard Time GMT plus 5.5 hours.

HOLIDAYS: Port's closed holidays are: Pongal, Kanumu, Republic Day, Kotha-Amavasya, Vijayadasimi, Independence Day, Gandhi's Birthday and Nagulachaviti, when work not possible even on payment of overtime.

POLICE/AMBULANCE/FIRE: Police Station 62140; Fire Station 64841 – Ext 239; Ambulance 64841 – Ext 213 (Port Hospital), Ext 275 (Ambulance).

TELEPHONES: Arrangements exist for placing telephone on board.

SERVICES: Tank cleaning facilities available.

SHORE LEAVE: Crew members allowed ashore after receiving immigration permits.

DEVELOPMENTS: A Fishing Harbour was constructed in a 24 hectare area as a by-product of the Outer Harbour. The first stage of the Fishing Harbour provides accommodation to 15 trawlers and 150 mechanised boats. The second stage of the Fishing Harbour can accommodate 56 trawlers and 300 mechanised boats.

A slipway facilitating 6 trawlers or 12 boats at a time for repairs is also constructed at the Fishing Harbour.

Construction of an oil berth to accommodate tankers of 150,000 d.w.t. in the Outer Harbour, provision of facilities for handling of import of coal, provision of facilities for export of Alumina and import of caustic soda, construction of a general/bulk cargo berth in the Outer Harbour to accommodate 60,000 d.w.t. vessels, construction of 2 warehouses of a total capacity of 30,000 tonnes, provision of third wagon tippler for the iron ore handling complex, addition of tugs and other floating craft and cranes and other cargo handling equipment are some of the principal developments.

SHIPMASTER'S REPORT: 1979.

Documents: To include 5 copies of Cargo Manifest for cargo being discharged (Agent may be in possession of same). Travelling Manifest of all cargo on board.

Pilotage: Pilot boards 0.75 miles S.E. of Fairway Buoy. Pilot boat exhibits pilot signals by day and night.

Approaching or Departure: Vessels should head for a point 5 miles S.E. of breakwater when approaching or on departure before setting course. This keeps clear of all wrecks in the vicinity.

Radar/VHF: Channel 16. Range approximately 15 miles. Call Vizag Port or Vizag Control. Pilot station at top of the hill will advise accordingly. For departure, pilot station to be called 1 hour before departure. No port radar.

Cranes: Berth "EQ" Nos. 1, 2, 3, and 4 each have 4 cranes of 3 tonne SWL. 1 floating crane "Bheema" of 150 tonne capacity.

Stevedores: 1st shift 0630-1530 hrs.; 2nd shift 1530-2230 hrs.; 3rd shift 2230-0530 hrs.

Specialised Cargo Handling Facilities: For refrigerated frozen frogs legs or shrimps the cargo comes in properly insulated or refrigerated vans.

Surveyors: LRS, ABS, NV, BV, GL and IRS. Standard Marine and Cargo Surveyors available.

Opening/Closing Hatches: Rigging derrick, opening/closing of MacGregor hatches by crew. Rigging gangs may be hired for this type of work at Owners' expense.

SHIPMASTER'S REPORT: September 1983.

Documents: On boarding, Pilot hands Master Arrival Report (in duplicate) with 24 questions to be completed and handed back to Pilot before passing Dutch Battery. The questions relate to the vessel, certificates, cargo and voyage just undertaken and it is quite a lengthy document. Recommend copy should be obtained at previous port to have all completed for arrival.

For security reasons, all cameras must be collected prior to arrival and kept in the safe custody of the Master. Pilot gives Master a Declaration to sign that no photographs will be taken of the Port Area on arrival, whilst berthed, or on departure.

The Indian Authorities are presently having meetings to come up with a single Arrival Form for vessels, to end the present duplication of information between Port Authorities, Customs, Immigration, etc.

Pilotage: On departure, Agents make tentative booking of Pilot with Port Trust, vessel then to hoist International Code Flag 'G' 1 hour before departure.

Radio: Visakhapatnam Radio/VWV workable about 1 day out.

Health: Send Free Pratique message stating no persons embarked at Aden or Djibouti and that there are no monkeys on board. Pilot initially grants Pratique with stamp in Deck Log Book.

Tugs: Four tugs of 32 ton bollard pull available; for deeply laden large vessels passing into Inner Harbour, 2 are required, 1 made fast right ahead, the other made fast starboard shoulder. They are necessary for vessels to negotiate the bends in the Cutting. Tugs join in the Outer Harbour and there is little time to make them fast. Therefore, Pilot asks for Aft Mooring Gang to make one of these tugs fast, as they are not required aft until vessel is in the Turning Basin.

Medical: It is recommended that personnel have Cholera and Typhoid inoculations before arrival. Stocks of these vaccinations are not usually held locally unless there is an outbreak of the disease.

Density: Varies from 1018 to 1023 depending on season and recent rainfall.

Fresh Water: Delivered by barge, hoist International Code Flags 'Y' over 'J' 2 days before required.

Repairs: Below average standard of metal work/welding. Very little assistance and spares available in electronic area.

Opening/Closing Hatches: Automatic/hydraulic type are operated by ship's crew.

Surveyors: Lloyd's (exclusive), ABS, GL, NKK, Korean Register, Int. Cargo Gear Bureau NY (non-exclusive), also Nautical Inspector for Governments of Liberia, The Bahamas and Republic of Panama.

Telephones: No shore telephone was placed on board.

Services: Very few services available.

Shore Leave: Immigration permits/shore passes to be carried at all times, issued for limited period initially.

Indian currency in notes of greater value than Rs 10/- (about US$1) not permitted inside Dock Area.

Security: Local Watchmen not particularly effective and pilfering is rife. Make the accommodation block secure with only one controlled entry/exit. Keep a strict watch over any items which cannot be removed/secured.

SHIPMASTER'S REPORT: November 1984.

We presented Crew List (See Note 1), Passenger List, Stores List (Form 3), Bonded Stores List (See Note 4), Drugs List (Morphine, etc.), Arms and Ammunitions List, comprehensive Customs List Form IV (See Notes 2, 3, and 5 below), Hidden Cavities Declaration List and Vaccination List.

Note 1: The Crew Lists must show passport or discharge book numbers. Not interested in dates of birth. The Immigration Officials issue passes for all on board who wish to go ashore (or just a few blanks, if only 4 or 5 people want to go ashore). These must be returned to Agent before sailing.

Note 2: Endeavour to obtain correct forms prior departing for first Indian port. A complete set of 4 is required for all subsequent Indian ports visited. Ensure that *all* paper money is declared, whatever the amount. (Undeclared currency, cigarettes, gifts, etc. confiscated). Rummage squads are thorough. Also ensure that the term "Dress materials and personal effects" is entered in Column 12 with other listed items.

Note 3: Currency – it is a fine-carrying offence to take high denomination notes ie. Rupees 20, 50, 100 and above, out of the country. Agents usually supply cash in 10 Rupee notes** or less.

Note 4: It is advisable to carry minimum sufficient bonded and slop chest items.

Note 5: Ensure that vessel sails with "travelling copy" handed to Master prior sailing first port for second port and so on for multi-Indian-port calls.

** Where foreign currency is changed ashore, a proper 'encashment certificate' with serial number must be obtained and details of passport given at time of exchange. The jetty duty Customs Official must be informed on return to ship and a supplementary currency declaration form C.B.R. CUS419 filled out showing amount exchanged and new balance of foreign currency in your possession. Both forms must be retained by exchanging person.

Also on arrival, the Health Officials carry out a "Marpol" inspection. (See overleaf.) There are many arrival and departure forms to be completed, including comprehensive pilot information forms. Have some detailed prior arrival to complete same as they are time consuming. Obtain blank sets if trading regularly.

Marpol Inspection:

Government of India
Port Health Organisation
Visakhapatnam
Sanitary Inspection of the Ship under Rule 83(i) of the
Indian Port Health Rules, 1955.

Date of inspection: Nationality:

NOTES

Please also advise Shipping Guides Ltd.

Indonesia

AMBON: 03.41 S. 128.10 E.

DOCUMENTS:

14 Passenger Lists.
7 Crew Lists.
2 Customs Documents.
2 Health Documents.
7 Cargo Manifests.
7 Bills of Lading.
5 Ship's Papers.
Sailing Permit.

PILOTAGE: No pilot station. Apply for pilot boat by calling Ambon Coast Station (Ambon Radio) or fly "G" Flag. Pilot boat located at Ambon Bay. Entrance in all seasons and weathers. All parts of Ambon Bay suitable for anchorage to await Pilot.
ANCHORAGE: Areas of anchorage can take all sizes of vessel.
RESTRICTIONS: Open 24 hours. Tides do not affect entry. But when entering at night ship must anchor and await orders.
MAX. SIZE: Joos Soedarso Pier: length 187 m., breadth 35 m., draft 12 m. Wainitu Pier: length 100 m., breadth 20 m., draft 8 m.
HEALTH: Port Health Officer boards vessel together with Pilot.
RADIO: Ambon Coast Radio, call sign PKE. Operating 24 hours. Frequencies 500–470 kHz, 8472 and 8799 kHz. VHF all Channels used.
TUGS: Normally tugs do not join vessel but when necessary to use tugs call PT "Dock Waijame".
STEVEDORES: Agent arranges. 3 stevedore companies: PT. "Gotong Rojong", PT. "Mastra" and PN. "Varuna Tirta Prakarsa".
MEDICAL: Hospital facilities available. No advance notice required.
TANKERS: Berth at Wainitu Pier. Type of pipe, 6 in. and 8 in. Discharging capacity, 125 t.p.h.
FRESH WATER: Available only at Joos Soedarso Pier. Loaded by pipeline with 25 t.p.h. capacity.
FUEL: Only diesel and marine fuel.
GANGWAY/DECK WATCHMEN: Deck watchmen needed, particularly for tankers.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: Cannot be held out of bond.
IDENTIFICATION CARDS: Needed by Immigration (landing permit).
CONSULS: No consuls available locally.
REPAIRS: Deck and engine repairs available. Floating dock, lifting capacity for 2,000 d.w.t.
REPATRIATION: Possible. Dealt with by Immigration through Jakarta.
AIRPORT: Distance from airport about 7 miles. Regular airline "Garuda Indonesian Airways" (GIA). 4 flights per week from Ambon to Jakarta.
TIME: Local time GMT plus 10 hours.
HOLIDAYS: Port open for 24 hours even in holidays.
POLICE/AMBULANCE/FIRE: Police and Port Health at Port. But when necessary to use fire brigade call by connecting to "Burgomaster".
SHORE LEAVE: All crew members allowed ashore with permission of Immigration.
DEVELOPMENTS: Plans for future developments dependent on Government expenditure.
AUTHORITY: Ambon Port Administration.

ARDJUNA: 05.54 S. 107.44 E. (See Plan)

LOCATION: Ardjuna Marine Terminal is an open, unsheltered mooring in the Java Sea, about 18.5 miles from the nearest point on the North Coast of Java.

The Terminal is approximately North 72° East distant 59 nautical miles from Jakarta.

There are 5 standard type single buoy moorings and 1 rigid arm single buoy mooring situated as follows:

1. A chartered crude oil storage tanker SBM (Buoy No. 1).
   Lat. 5° 54′ 15″ S., Long. 107° 44′ 22″ E.
2. Crude oil export SBM for tankers loading from "Arco Ardjuna" or chartered crude oil storage tanker (Buoy No. 2).
   Lat. 5° 53′ 19″ S., Long. 107° 45′ 18″ E.
3. Crude oil Storage Barge "Arco Ardjuna" SBM (Buoy No. 3).
   Lat. 5° 54′ 10.6″ S., Long. 107° 43′ 45″ E.
4. Crude oil export SBM for loading from "Arco Ardjuna" or chartered crude oil storage tanker (Buoy No. 4).
   Lat. 5° 53′ 29″ S., Long. 107° 43′ 20″ E.
5. Liquefied Petroleum Gas Storage Barge "Ardjuna Sakti" rigid-arm type SBM. (Buoy No. 5).
   Lat. 5° 53′ 10″ S., Long. 107° 44′ 13″ E.
6. Butane SBM for butane export tankers (Buoy No. 6).
   Lat. 5° 52′ 19″ S., Long. 107° 45′ 18″ E.

THE FOLLOWING ITEMS ARE OF PARTICULAR IMPORTANCE:

1. No dirty ballast.
   Tankers with dirty ballast will be rejected and will have to tender a new Notice of Readiness upon second arrival.
2. No shore leave.
3. No crew changes.
   If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.
4. No stores available.
5. No clinic is available.
6. The laws of Indonesia govern this Terminal and all personnel are urged to abide by them.
7. During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.
8. Ardjuna time is GMT plus 7 hours throughout the year.
9. No bunkers are available.
10. Pertamina Directorate of Shipping and Telecommunications Jakarta, handles all Agency matters for tankers.
11. The Unit of Currency is the Indonesian Rupiah.
    The rate of exchange varies from time to time. The Master can obtain the current exchange rate from the Agent.
12. There are no Consulates available at Ardjuna Marine Terminal. However, there are many Embassies and Consulates represented in Jakarta 59 nautical miles S.W. of the Terminal.
13. Language of the port is English and Indonesian.
14. Only authorised personnel or visitors are permitted on the Storage Barges and/or Export Tanker.
15. No fresh water is available.
16. No slop tanks are available.
17. The Crude Oil testing laboratory is equipped to perform the following tests:
    API Gravity, B.S. & W., Pour Point and R.V.P.
    Any additional tests that may be required will be performed in Jakarta.
18. For convenience, mail for personnel on incoming tankers may be sent to the Jakarta Office of THE COMPANY for delivery to the tanker when it arrives at Ardjuna Marine Terminal. Except on an emergency basis, spare parts or other material will not be accepted for delivery to incoming tankers.

DOCUMENTS: The Harbour Master submits a Harbour Report Form for the Master to complete.

The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Life Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate; Derat Certificate or Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and light dues receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance at departure provided clearance is also granted by the other governmental authorities. A Panamanian port clearance for Panamanian flag vessels is not required at Ardjuna.

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the Crew List.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Cargo Documentation: Documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Certificate, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Ardjuna Marine Terminal. When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Signing of these Documents by the Master will take place at the same time final departure clearance formalities are being carried out.

Notes of Protest, if any, should be handed to the Mooring Master for further delivery to Atlantic Richfield Indonesia Inc., Jakarta. Please note that the Mooring Master will acknowledge receipt of the Note of Protest only and is not authorized to accept such letters.

Departure Procedure:

Prior to the vessel's departure, the Immigration Official requires 6 copies of the Crew List to be marked for *"Departure Immigration Clearance"*, and duly signed, it will be distributed as follows:

Master of the vessel	1 copy
Harbour Master	1 copy
Customs	1 copy
Pertamina Agent	1 copy
Immigration	2 copies
Total	6 copies

The Customs Official on duty will issue the Customs 5-B Form which serves as Customs Departure Clearance.

Upon presentation of the Crew List which is signed and marked for Departure Immigration Clearance and Customs Clearance, the Harbour Master will issue the *Port Clearance.*

Final Clearance formalities will be carried out aboard the tanker, either at the Export SBM or alongside the storage barge "Ardjuna Sakti" or in the Anchorage Area, as circumstances dictate.

Before leaving the Terminal Area, the Master should advise the Terminal, the vessel's ETA at destination through the Mooring Master.

PILOTAGE: Under normal conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the vicinity of the mooring area.

Tankers waiting to load shall wait their turn in the recommended anchorage area, and shall maintain radio-telephone contact with the Terminal using the International Marine Calling & Safety Channel 16 for Terminal instructions.

The Mooring Master will act on behalf of the company to sign acknowledgement of tankers' Notice of Readiness. Such notice will not be accepted for a time earlier than:

(a) the Master has received the Mooring Master onboard or
(b) the tanker shall have dropped anchor within the recommended anchorage area, and has advised the Terminal the time of anchoring.

Exception to (a) and (b) will be if the tanker is within the anchorage area awaiting arrival of the Mooring Master and has been requested by the Terminal not to anchor.

In this case N.O.R. will be accepted from the time the Terminal requested the ship not to anchor.

The company reserves the right to decline to berth a specific tanker if its condition or facilities are unsafe for berthing or loading, even though the berth may be open to other tankers.

The decision of the Atlantic Richfield Indonesia Terminal Superintendent or his designated alternate to berth or not to berth a vessel shall be final.

ANCHORAGE: For tankers requested to anchor, the recommended anchorage area is an area Northwestward from the Single Buoy Moorings enclosed by a line drawn through the following positions.

"A"	Lat. 5° 52′ 36″ S., Long. 107° 41′ 36″ E.
"B"	Lat. 5° 50′ 57″ S., Long. 107° 40′ 57″ E.
"C"	Lat. 5° 50′ 06″ S., Long. 107° 42′ 40″ E.
"D"	Lat. 5° 57′ 24″ S., Long. 107° 43′ 19.5″ E.

Prior to their arrival Masters of tankers should contact the Terminal for instructions concerning anchorage positions.

Under no circumstances should the export tanker enter the Restricted Area around the structures without a Mooring Master aboard.

The attention of Masters is drawn to the existence of underwater pipelines in the Restricted Area (see "Plan").

NAVIGATION AIDS:
Approaches: Approach information can be obtained by radio from the terminal. Under normal weather conditions, if a tanker is scheduled to berth upon arrival, the Mooring Master will board such tanker in the close vicinity of the mooring area.

In addition to the single buoy mooring points for export tankers and the storage barges, various oil wells and production structures are located in the immediate vicinity and the areas extending East, South and Westerly from the storage barges which constitute a hazard to navigation for mariners.

SBMs, storage barges and structures within Ardjuna Marine Terminal area display the following visual characteristics:
Export Single Buoy Moorings (Buoy No. 2, No. 4 and No. 6): A white light flashing every second, visibility 5 miles, mounted on the rotating deck of each SBM. Buoy No. 4 and No. 6 are fitted with radar reflectors.
Storage Barges "Arco Ardjuna" and "Ardjuna Sakti" and Chartered Vessel: By day, the black ball as required by the Regulations for Preventing Collisions at Sea. The 2 storage barges at night display the lights for tankers at anchor as required by the Regulations for Preventing Collisions at Sea and are equipped with automatic fog signals at the bow and at the stern.

Each barge has a bell forward as required by the Collision Regulations and gong aft, under the same rules. When visibility is restricted the Fog Signals are continuously sounded. The SBM to which the "Arco Ardjuna" is moored, is fitted with a radar reflector and a white light flashing every second visibility 5 miles. The chartered storage tanker SBM (SBM No. 1) shows a white light flashing every second visibility 5 miles.

The SBM to which "Ardjuna Sakti" is moored, shows a white light flashing alternately for a 3-second period and a 1-second period every 12 seconds, visibility 5 miles.
Crude Oil Production Platforms and Natural Gas Liquids Processing Facilities: There are 5 crude oil production platforms, 16 well platforms, 1 junction platform, 1 natural gas processing facility platform and 1 quarters platform for the natural gas facility within the Ardjuna Marine Terminal area.

"B" (Bravo) Flow Station, situated approximately 0.5 nautical miles South of the "Arco Ardjuna" Barge. Indicated as BB.

"E" (Echo) Flow Station, situated 12 nautical miles Eastward of Bravo. Indicated as platform EA.

"K" (Kilo) Flow Station, located 8 nautical miles S.S.W. of Bravo. Indicated as platform KA.

"L" (Lima) Flow Station, situated 15 nautical miles West of Bravo. Indicated as platform LA.

"U" (Uniform) Flow Station, located 13 nautical miles S.S.E. of Bravo. Indicated as platform UB.

"M" (Mike) Flow Station, located 33 nautical miles West of Bravo. Indicated as platform MX.

"F" (Foxtrot) Flow Station, located 28 nautical miles E.S.E. of Bravo. Indicated as platform FC.

"NGL" The natural gas facility and quarters platforms are joined by a bridge. Their position is:
Lat. 5° 54′ 36″ S., Long. 107° 44′ 01″ E.

In addition to the above specified obstructions and navigational aids, all platforms display interrupted quick flashing white lights. The storage barges, flow stations, LNG facility and quarters platforms will brightly illuminate the areas around them at night through the use of lighting for normal working purposes.

MAX. SIZE: SBM's No. 2 and No. 4 up to 100,000 d.w.t. and 200,000 d.w.t. respectively (for crude oil).

SBM No. 6 up to 50,000 d.w.t. (for butane liquids). Depth of water approximately 135 ft. below mean sea level.

RADIO: *Advice of Arrival by Cable or Telex:* It is important that incoming tankers advise Ardjuna Marine Terminal 72 hours and 48 hours before estimated time of arrival, giving the best estimate of ship's arrival at the Terminal, via:

Cable address: ARDJAK, Terminal Section, Jakarta
Telex number: 011 – 47390, Jakarta.

Time to be used for ETA is "GOLF" Time Zone of GMT plus 7 hours throughout the year.

The first message should also include the following information:

1. Name of tanker and Radio Call Sign.
2. Cargo requirements.
3. De-ballast time. (Note: If a separate/permanent ballast system is fitted on board, ability of ship to load crude oil and discharge ballast simultaneously must be stated.)
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last Port of Call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give whatever information is available as to the possible type of sickness.
9. If cholera inoculation required. If so, number required.
10. Distance in feet from the bow to tanker's loading manifold.

Further ETA messages should be sent to Ardjuna Marine Terminal via above cable address and Telex Number when the tanker is 24 hours and 12 hours distant from the Terminal and any other time, if any appreciable change occurs in the original ETA or those subsequent thereto.

RADIO COMMUNICATIONS:
(1) VHF/FM Radio Telephone: (International Marine Calling & Safety Channel 16, Freq. 156.800 MHz).

Masters are recommended to use this system when they arrive within radio range of the Ardjuna Marine Terminal, particularly when approaching the port. If poor visibility exists the tanker's approach may not be observed. Attention to VHF communications may be the means of avoiding delay in berthing.

During berthing the ship's radio will be under the sole control of the Master, and the storage barge radios will be under the sole control of the Terminal Marine Superintendent or his assistant.

Masters are reminded that if tankers are requested to anchor to await berthing, it is their responsibility to maintain constant listening watch on VHF Channel 16 to receive Terminal instructions.

Any delay due to failure to maintain a constant listening watch on Channel 16 will be for the ship's account, and will not be included in Lay Time calculation.

The Ardjuna Marine Terminal is equipped with VHF/FM Radio Telephone Sets and continuous watch is maintained on Channel 16 (Freq. 156.800 MHz) and Frequency 157.725 MHz.

Tankers approaching the Terminal should make initial contact on Channel 16. For subsequent inter-ship communications within the Terminal a "Handie Talkie" UHF Radio Freq. 157.725 MHz will be used by the Mooring Master.

This frequency will not be used for general purpose, unless clearance is obtained by the Terminal. This is required for safety reasons.

Should all radios on the tanker become inoperative, the emergency signal i.e. continuous blasts on the ship's whistle will be sounded to notify the Terminal of the radio failures. Upon hearing this signal from a loading tanker the storage barges will immediately stop loading to the Export Tanker until communications have again been established.
(2) High Frequency Single Side Band Radio Telephone: A voice message from incoming tankers may be relayed by HF/SSB. Atlantic Richfield Indonesia Inc., located in Jakarta, Indonesia, is interconnected to the Ardjuna Marine Terminal via local communications system and maintain a continuous watch on HF Frequency 7320 kHz (Upper Side Band A3J Mode, 100 Watts, Vertical Whip Antenna, Call Sign 8GJ9).
(3) Pertamina Control Radio Stations – HF/SSB: In the event incoming tankers are not able to contact the Ardjuna Marine Terminal on the foregoing VHF/FM Frequencies, or by HF/SSB, Pertamina maintains coastal radio stations located in Jakarta and Merak.

Pertamina Jakarta Radio, Call Sign PKI 2 may be contacted on HF/SSB per following frequencies and during the following service hours:

Frequency/kHz	*Hours/GMT*	*Keep Watch/kHz*
452	0000–2400	500
8626	0200–0400, 0500–0600, 0700–0800, 1000–1200, 1400–1500, 1700–2000,	8363.2–8364.8

Masters should request the Pertamina Coastal Radio Station to relay the necessary information to Atlantic Richfield Indonesia Inc., Jakarta attention "Terminal Section" by telephone number: 737474 (18 lines) or by Pertamina Internal Telex System number 18 which is the designated number of Atlantic Richfield Indonesia Inc., Jakarta.

HEALTH/IMMIGRATION/CUSTOMS: In accordance with practice in Indonesian ports, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Ardjuna. These signals shall be displayed continuously until clearance is granted. The signals are as follows: Sunrise to sunset: quarantine flag "Q". Sunset to sunrise: signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Harbour Master Officials will board the vessel after arrival to grant clearance.

Each tanker entering the port of Ardjuna must have requested and been granted Flag Dispensation prior to its arrival. At the same time, application is made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the Harbour Authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance.

If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each Crew member should be in possession of an International Vaccination Card.

After the tanker is all secured, the Customs Officer will seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo onboard the tanker and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Ardjuna is granted.

TUGS: There is 1 tug available to assist mooring/unmooring. When berthing at an SBM 1 mooring launch will be used to pass the line to the tanker.

The following mooring Launches will be available for running lines as required, also for transporting Government Officials, Agents and other authorised personnel to and from the export tanker.

	Name and description	*Length*	*Rated HP*
(1)	*Arco Ardjuna III*	40 ft.	260
(2)	*Arco Ardjuna IV*	40 ft.	260
(3)	*Arco Ardjuna V*	40 ft.	275

TERMINAL FACILITIES: For Crude Oil Tankers:

Export SBM's No. 2 and No. 4 are designed, during reasonable weather conditions, to handle tankers up to 100,000 d.w.t. and 200,000 d.w.t. respectively; each SBM is equipped with dual 160 ft./15 in. circumference floating braidline mooring ropes with 22 ft. long anti-chafe chains fitted, so arranged as to avoid chafe to the mooring ropes while tankers are at the buoy.

The crude oil loading hoses are connected to the ship's manifold on the port side of the Export Tanker. Tankers arriving are requested to have the derrick on the port side raised and rigged, ready to lift aboard the Terminal equipment.

Crude oil tankers are loaded through 2 strings of 16 in. I.D. floating hoses extending from the Export SBM's No. 2 and No. 4, connected to the tanker's manifold at the ends by means of the rail hoses of 12 in. I.D. All crude oil tankers not having 12 in. hose connection should provide their own reducers in such a way as not to cause any delay in the hose connecting operation. On SBM's No. 2 and No. 4 the length of the hose strings is 795 ft.

For crude oil tankers intending to load in the Ardjuna Marine Terminal, the distance from the bow to the loading manifold should not exceed 450 ft.

The minimum loading rate at the Ardjuna Marine Terminal for crude oil tankers is 15,000 bbls./p.h.. Any tanker arriving unable to receive crude oil at the above rate may be rejected. Tankers loading crude oil at the SBM's No. 2 and No. 4 can accomplish a maximum loading rate of approximately 30,000 bbls./p.h..

In order to save time as well as to make the berth available for others, it is requested that ships receive crude oil as fast as it can be delivered, with due regard for safety.

Masters are reminded that for safety reasons, it is advisable to have the ship half loaded as quickly as possible. Rate can be reduced for topping off tanks. When requested by the ship to stop, cessation of crude oil flow is almost immediate.

Storage Barge "Arco Ardjuna": The company marine administrative offices, storage and laboratory for testing crude oil stock are located on board a 137,673 d.w.t. Storage barge of Liberian Registry designated "Arco Ardjuna".

Overall length of the barge is 467 ft. 10 in. Total crude oil capacity is 1,022,000 gross barrels, for the "Arco Ardjuna" plus approximately 2,000,000 gross barrels for the chartered crude oil storage tanker.

Loading of crude oil from the storage barge to the tankers will be through A.O. Smith Positive Displacement Meters, of which there are four, each having a maximum capacity of 12,500 bbls./p.h.. "Arco Ardjuna" barge is moored on the SBM No. 3, Lat. 5° 54′ 10.6″ S., Long. 107° 43′ 45″ E.

Chartered Crude Oil Storage Tanker: The storage tanker is located at mooring SBM No. 1, the position of which is Lat. 5° 54′ 15″ S., Long. 107° 44′ 22″ E.

Ardjuna crude oil is available from the above storage tanker, by transfer through the Arco Ardjuna metering system.

Ardjuna Crude Specifications:

API gravity at 60° F	:	35.0 – 37.0
Reid Vapour Pressure	:	6.0 – 10.0 p.s.i.g.
Sulphur, % Wt.	:	0.06 – 0.10
Kinematic, Viscosity at 100°F	:	1.20 – 4.00 CS
Pour Point, °F	:	75+
Carbon Residue, % Wt.	:	0.50 – 1.45
B.S. & W, % Vol.	:	0.05 – 0.15
Flash (TCC), °F	:	Below room temperature.

For Butane Tankers:

1. Vessels arriving in the Ardjuna Marine Terminal to load Butane Plus will be berthed at the SBM No. 6 which is designed, weather permitting, to handle tankers up to to 50,000 d.w.t.

2. Butane Plus tankers are loaded through a 722 ft. long string of 6 in. I.D. floating hose extending from the SBM and connected to the tanker's portside manifold. The floating hose is equipped with a 6 in. ANSI 150, quick release Camlock flange. Tankers not having a 6 in. manifold connection must provide their own reducer to permit the loading. Failure to carry out this obligation may result in rejection of the vessel for loading and nullification of her Notice of Readiness. All costs, charges and expenses incurred therefrom will be for the ship's account.

On arrival at the terminal area, butane tankers are required to have the port derrick ready to lift the equipment necessary for berthing and loading. The weight of the loading hose to be lifted is approximately 1,500 lbs.

3. The quantity of Butane Plus delivered will be determined by the metering system consisting of 2×3 in. A.O. Smith Positive Displacement Meters. These meters are located on the NGL Plant situated approximately 3 miles S.W. of the SBM No. 6.

4. An arriving Butane Plus tanker will not be accepted for loading product if:

a. Oxygen in the tanks exceeds 8.0 mole per cent.

b. Vessel is not adequately equipped with boil-off liquefaction unit capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 115 cu.m./hr.

There is no facility for inerting butane tankers on SBM No. 6, nor is there a ship's vapour return line facility.

Masters of vessels are strongly reminded to ensure that ship's vapour compressors are in good running condition.

Failure to observe such requirement may result in cessation of the loading and any delay so caused will be for the ship's account.

5. Butane Plus tankers intending to load at SBM No. 6 will not be accepted if the bow-to-manifold distance exceeds 400 ft.

6. During the extended loading period of the Butane Plus tanker at the SBM No. 6 it is the responsibility of the vessel to ensure that all mooring lines and loading hoses are properly tended.

The Terminal Mooring Masters may at any time request the ship's securing lines to be tightened or slacked under the direction of a responsible ship's officer. This may be necessary to avoid the ship overriding the buoy. Failure to comply with such a request may result in cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply, will be for the account of the buyer. See also "Mooring/Unmooring".

7. Masters of butane tankers are advised that raising, lowering connecting and disconnecting of butane loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed BY THE SHIP'S CREW DIRECTED BY A RESPONSIBLE OFFICER as required by the Mooring Master. Loading of a butane tanker is through one string of 4 in. I.D. loading hose with 150 ASA flange rating. The weight of the hose is approximately 2.5 tons. All tankers loading butane at SBM No. 6 Ardjuna Terminal must be able to connect their manifolds to the 4 in. hose. Masters are strongly reminded, that it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 4 in.

8. Venting of product while the vessel is within the Ardjuna Marine Terminal is not allowed. Failure to comply with this requirement may result in delay or cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply will be for the account of the buyer.

For LPG Refrigerated Vessels:

Storage Barge "Ardjuna Sakti":

1. The LPG storage facility is a prestressed concrete barge, measuring 461 ft. in length, 136 ft. in width and having a depth of 56.4 ft.

   The barge carries 12 tanks each of which has a capacity of 31,528 barrels giving a total of 378,336 barrels.

   A pumping rate of 20,000 bbls. (1,600 tonnes) per hour can be achieved. The following operating rules have been adopted which shall apply to the lifting of products from the "Ardjuna Sakti".
2. Refrigerated LPG vessels *will not be considered ready for loading* at Ardjuna Marine Terminal *unless and until all LPG tanks contain LPG vapours and are cooled down sufficiently* to permit loading of products nominated.
3. Vessels receiving fully refrigerated products will only be acceptable for loading provided they are capable of receiving the products at their boiling points at 0.5-2.5 p.s.i.g. Such vessels must have a refrigeration system capable of liquefying all vapours coming from vessels tanks resulting from loading at the maximum rate of 20,000 bbls./p.h., and including those vapours formed as a result of heat gained by the vessel's tanks.
4. The "Ardjuna Sakti" is equipped with a vapour compressor and condensing facilities for liquefying vapours, however, no liability of any kind whatsoever, to provide the compressor and or condensing facilities for vessels use is accepted.
5. Provided a vessel has the capabilities described in paragraph (3), at the sole discretion of the Terminal Superintendent or his designated representative, in the event the vessel has difficulties with her refrigeration system, the facilities available on the "Ardjuna Sakti" may be made available to assist the vessel, provided they are operational. There is *no obligation* implied or accepted to continue to assist the vessel with chill down, even if assistance is commenced. In the event that assistance is requested and is provided all charges and expenses incurred shall be paid for by the consignee. Such charges shall include any amount payable in demurrage for all the time that chill down operations causes the vessel to exceed the allowed laytime. The conditions set out in this paragraph (5) for assisting in chill down operations shall apply to purging operations.
6. Ardjuna Marine Terminal has no facilities for inerting arriving LPG tankers. It is imperative that arriving vessels do not arrive with tanks designated to receive product "in air". Vessels arriving to load LPG will not be accepted for loading product if the oxygen in the tanks exceeds 8.0 mole per cent.
7. Loading lines and vapour return lines at the Ardjuna Marine Terminal are fitted with quick release Camlock flanges which are 12 in. ASA 150. Arriving vessels must be able to connect to these flanges. The terminal will have a limited number of spool pieces and reducers available but will accept no obligation or liability to provide them. It is the vessel's responsibility to provide a connection suitable to connect with the Camlock flanges described above. Failure of the loading vessel to present the required 12 in. ASA 150 flange for connection will result in rejection of the vessel for loading and cancellation of her Notice of Readiness. All costs, charges and expenses incurred due to rejection will be for vessel's account.

Should it be necessary to assist a ship with the use of the terminal ship vapour compressor a charge of US$250 will be made for each hour or part of an hour that the terminal ship vapour pressure is used by the ship.

8. Venting of product while the vessel is within the Ardjuna Marine Terminal is not allowed. Failure to comply with this requirement may result in delay or cessation of loading and all costs, expenses or losses due to loss of production caused by such failure to comply will be for the account of the buyer.

MOORING/LOADING/UNMOORING: The Ardjuna Marine Terminal will operate 24 hours a day, 7 days a week. Tankers will normally be berthed during daylight hours, weather and other circumstances permitting. In special circumstances at the sole discretion of the Company Terminal Superintendent night berthing may be allowed if all conditions are favourable. Unmooring will be carried out at any hour.

Tankers to be moored or manoeuvred at the Ardjuna Marine Terminal will be boarded by the Company Mooring Master within the anchorage area.

Under normal weather conditions if a tanker is scheduled to berth on arrival, the Mooring Master will board such vessel in the close vicinity of the mooring area.

All such manoeuvring of ships shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the tanker being manoeuvred shall remain solely responsible on behalf of his vessel's owners for the safety and proper manoeuvring of his vessel.

The ship's Master, or one of his *designated and qualified deck officers, must* be on the navigating bridge at all times while the vessel is being manoeuvred.

The Mooring Master will report unsatisfactory conditions to the company Terminal Superintendent who may in turn, reject the tanker until corrections are fully made. All costs accruing therefrom will be for the vessel's account. The services of the Mooring Master are provided upon the express understanding and conditions that when any Mooring Master provided goes on board a vessel for the purpose of assisting such vessel, he becomes for such purpose the servant of the owners of the vessel and the company shall not be liable for any damage, or injury resulting from any advice, or assistance, or actions directed, or made, by such Mooring Master while on, or in the vicinity of the assisted vessel.

The tanker's cargo tanks are to be inspected by the Terminal Representative, and if suitable for loading crude oil, a signed notation to this effect will be made on the company Dry Certificate.

The Company Terminal Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Ardjuna Marine Terminal. All these factors have to be evaluated before a final berthing decision is made.

Delays to vessels using Ardjuna Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

Request for the terminal to stop the flow of oil at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master, that the company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage barge. The ship's Master will also be held responsible for any oil spills caused by this request.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area.

Unauthorised radio communications will be cause for cessation of all operations, except clearing of the berth, and the vessel's Notice of Readiness will be immediately nullified.

The Master of each tanker will be given a copy of the Conditions of Use of Port of Ardjuna Marine Terminal which he will be required to sign before the vessel proceeds to berth.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Mooring Master, having in mind the hazards of the operation because of the products being handled, weather conditions and any other circumstances requiring special care or caution.

Ships are requested to have a pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach the Mooring Master's launch.

A combination of pilot ladder and ship's accommodation ladder, so arranged that the personnel can first use the pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large tankers. A light line should be ready to take aboard the Mooring Master's equipment.

Tankers will provide a broad lee for the Mooring Master both when boarding and leaving the ship. Adequate explosion proof lighting at night must be provided near the pilot ladder, and manifold connection area. During loading overside lighting must be provided in the vicinity of sea valves and floating hoses.

During a tanker's stay at the Export SBM, emergency towing wires shall at all times be hung over the ship's stern on each quarter of the vessel. These wires shall be secured on the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted.

It is absolutely essential that extremely careful supervision be exercised by officers of all tankers while loading operations are in progress. A responsible ship's officer is required to be on duty continuously while the tanker is being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended on loading tankers. The Mooring Master at any time, may direct an additional ship's line to be secured to the buoy and this line to be hove up or slackened off under the supervision of a responsible ship's officer so as to prevent the vessel overriding the buoy. *At all times sufficient crew must be available* to carry out under the supervision of a responsible officer, instructions given by the Mooring Master.

Masters of loading tankers are advised that raising, lowering, connecting and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with the loading of cargo or maintaining mooring lines in a correct manner will be performed *by the ship's crew directed by a responsible officer* as required by the Mooring Master. Loading of crude oil tankers is through 2×12 in. I.D. hoses with 150 ASA flange rating. The weight of each hose is approximately 2.5 tons. All tankers loading crude oil at Ardjuna Marine Terminal must be able to connect their manifolds to the 12 in. hoses. Masters are strongly reminded, it is the ship's responsibility to provide reducers to make the connection, if the ship's manifold is not 12 in.

Preparations for mooring will be advised by the terminal through VHF communication prior to tanker's arrival or by the Mooring Master before the mooring operation commences.

Crude oil tankers are required to have ready:

1. On the portside: a derrick of at least 5 tons safe working load, rigged, and ready to pick up the mooring and hose connecting gear from the Mooring Master's launch.
   This derrick subsequently will be used for raising, connecting, disconnecting and lowering loading hoses and eventually to transfer the mooring and hose connecting gear back to the launch before the tanker sails.
2. On the forecastle: at least 6 good ship's mooring lines shall be required. Two of them will be used as messenger lines for bringing aboard both terminal mooring lines from the SBM.
   The 4 remaining ship's lines will be laid out 2 and 2 on either side of the foc'sle deck, eyes about 3.5 m distant from the fairleads as advised by the Mooring Master. When the terminal mooring lines have been hove up and anti-chafe chains have been hove about halfway inboard through the fairleads, the eyes of the ship's lines will be shackled onto the end links of the chain, so arranged that in the final position of mooring, the tanker is tied to the SBM using the terminal mooring lines/chains and made fast to the ship's bollards by means of the ship's own lines. This will be backed up by 2 lengths of wire strops each 30 ft. in length and 2 in. diameter.
   These wires will be provided by the terminal to be used as preventer wires. These 2 wire strops will not be used as the permanent mooring system.
   Their purpose is to hold the ship safely moored in the event one or more of the ship's lines part until the crew can replace such lines.
3. Tanker loading Butane Plus at SBM No. 6 will moor in the same manner as crude oil tankers referred to in para. 2 above.

Refrigerated LPG tankers will berth alongside the starboard side of the LPG storage barge "Ardjuna Sakti". The "Ardjuna Sakti" is secured to a rigid arm single buoy mooring system which allows the storage barge to rotate according to direction of wind and tide. There are 5 large Yokohama type rubber fenders aboard the storage barge 4 of which are supported on davits. The fenders are lowered to the water prior to the berthing operation. Each fender is 6.5 m. in length the diameter of the fenders is 3.3 m. Line running launches are available to pass the mooring lines between the barge and the ship.

When secured in position the moorings will be as follows:

5 lines on the forecastle.
4 lines on the poop.
2 springs on the maindeck forward leading aft.
2 springs on the maindeck aft leading forward.

Each LPG tanker loading at Ardjuna Marine Terminal will be required to provide the above ropes. Where tension winches are available they will only be used if they can be locked in a fixed position.

EQUIPMENT: A ship may be rejected if, upon inspection, it is not properly equipped, or if it is not suitably manned, or tanks unsuitable for the cargo, or if in the case of crude oil tankers the ballast is dirty.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in a sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships or partly inoperative ships will be rejected. Should a ship become inoperative or partly inoperative while berthed alongside the storage barge "Ardjuna Sakti" or while secured to a crude oil export single buoy mooring, it will be removed at the ship's expense.

No repairs to main engines or other essential equipment or machinery while alongside the storage barge "Ardjuna Sakti" or while secured to an export SBM may be carried out, unless with the permission of the Terminal Superintendent or his designated alternate.

Crude oil and butane tankers must lift the export hoses from the water to connect with the ship's manifold by means of its *own derricks and using its own crew.*

A vessel must have both bow anchors in good working condition. Both bow anchors and anchor cable must be of a size and standard to meet either "Lloyds" or "A.B.S." requirements, even though they may in fact, be classified by other societies.

All vessels must have ready on deck suitable stoppers for manila, synthetic lines and wires used for mooring purposes.

All vessels must have suitable winches or capstans in good working order.

Such winches or capstans must have sufficient power to heave the ship to the position required by the Terminal Mooring Master. Tankers must have the capacity to heave on the 12 in. and 15 in. braid lines used to secure them to the export SBM's. Power supply to all deck machinery must be maintained throughout the period the ship is secured alongside the storage barge "Ardjuna Sakti" or to the export SBM. Failure to comply with this requirement will result in cessation of loading and delay, and expense so caused will be for the ship's account.

To assist in vessel's turn around, ships should have all necessary gear ready on arrival. Crude oil and butane tankers must have the cargo boom on the port side raised with the cargo gear rigged and ready before the ship is boarded by the Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

Masters of crude oil tankers are reminded that the hose connecting operation will normally be carried out while the ship is deballasting.

The cargo derrick required to raise the hose from the water, must have a sufficient length of strong lifting wire rope on the winch drum to enable the cargo hook to reach the water and still have adequate turns of wire left on the drum to ensure safety.

BALLAST: Owners and Masters are responsible for observance of International Convention Laws and Indonesia Government Regulations concerning pollution of the sea, having particular regard for this area of the Java Sea.

No facilities are available for disposal of dirty ballast. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be for ship's account.

As soon as practical after arrival, all tankers will be inspected by an Ardjuna Marine Terminal Official for dirty ballast. During discharge of ballast, similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If, during inspection, or during progress of loading, it is revealed that the ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading unless satisfactory evidence of repair duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors is submitted. It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, sand, dispersant etc. should be used at all times especially when disconnecting hoses in order to avoid any spillage of oil overboard.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his Notice of Readiness and will lose any priority of position for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum safe ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels in the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the company Terminal Superintendent or his alternate.

Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings on shipboard and treating these washings with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of lifting companies, the terminal will load on top of such slops. This system is highly recommended to avoid pollution of the Java Sea.

Masters are required to certify in writing the quantity of slops remaining on board (if any). If they intend to load crude oil on top of the slops, it must be clearly stated. The Mooring Master will confirm the amount stated in writing by ullaging and calculating the slops to ensure the amount declared is correct.

Provided agreement is reached on the amount of slops the Mooring Master will confirm the amount of slops on the Dry Certificate.

Note: Separate "Slop Certificate" signed by Chief Officer and witnessed by the Mooring Master is required to substantiate calculation.

Masters are warned that inspection of ballast is strict.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately and not be resumed until the oil is cleaned up and removed from the decks of the vessel and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Ardjuna Cargo Controller will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer – in charge of loading.

All spillages of oil must be reported immediately to the Ardjuna Terminal Superintendent, or his alternate, and subsequently a detailed report in writing submitted by the Master of the vessel concerned giving all relevant details.

FRESH WATER: No fresh water is available.
FUEL: No bunkers are available.
MEDICAL: No clinic is available.
CONSULS: There are no consulates available at Ardjuna Terminal. However, there are many embassies and consulates represented in Jakarta about 59 miles S.W. of the Terminal.
CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs' seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars.

Special allowances are made for the Master under special circumstances.

REPATRIATION: No crew changes. If emergency conditions prevail, for humanitarian reasons exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: Ardjuna time is GMT plus 7 hours throughout the year.
SHORE LEAVE: Not allowed.

SAFETY/FIRE REGULATIONS: Safety and Fire Regulations will be strictly adhered to.

The notice "Instructions In Case Of Fire", and the notice "Safety And Fire Regulations" must be posted in prominent positions on board the export tanker by the Master, or by his designated alternate.

The Safety Check List must be jointly completed by a ship's officer designated by the Master, together with the Terminal Marine Supervisor/Mooring Master. After completing and signing the Check List both the ship's officer and Marine Supervisor/Mooring Master will retain copies.

Terminal Safety and Fire Inspections: It is the duty of the Mooring Master to make periodical inspections on board vessels in respect of any breach of the Terminal Safety and Fire Regulations.

For this purpose he must be allowed free access to all parts of the vessel at all times and must be accompanied by a responsible ship's officer to assist him in carrying out such inspections. The Mooring Master will advise the ship's Master when he wishes to make a safety inspection. It is the responsibility of the ship's Master to ensure that the Mooring Master is given every assistance to carry out this duty.

AGENCY:
General Agent: Pertamina Directorate of Shipping and Telecommunication, Pertamina Building, 6th Floor, Jl. Medan Merdeka Timur No. 1A, P.O.Box 327, Jakarta – Indonesia. Cable address: Pertaminaship Jakarta. Tel: 343806, 343781. Telex: 44450, 45348.
Procedure for Appointing Agent: FIRST. Owners should issue a letter of appointment and include a list of tanker(s) under the "Owners" management/control which are scheduled to operate in Indonesian waters and a statement that Pertamina Directorate of Shipping and Telecommunication (Pertaminaship) will be appointed as Agent to attend these vessels when calling at Indonesian ports.

Each letter of appointment must be properly endorsed by an Indonesian Embassy/Consulate. The validity of each letter of appointment is 1 year and letters must be renewed accordingly. Should a vessel, not previously listed, be introduced into service or should vessel's name be changed, a new letter of appointment must be issued for the vessel(s).

This letter of appointment, endorsed by the Indonesian Embassy/Consulate, should be sent soonest to: Pertaminaship Agency Dept., Pertamina Building, 6th Floor, Jalan Medan Merdeka Timur No. 1A, P.O.Box 327, Jakarta – Indonesia.

This SKU/loading or discharging permit application will be made by Pertaminaship to Government Sea – Communication Dept. after getting the L/A (letter of appointment).

SECOND. Owners should telex or cable appointment of Pertaminaship as General Agent to attend the vessel at Ardjuna Marine Terminal and telex/cable should be sent formally 2 weeks prior to vessel's arrival.

The following information should also be given in the telex or cable to enable the General Agent to obtain SKU/In & Out Clearance for the vessel:

1. Name of vessel.
2. Full ship particulars.
3. Port of Registry/Year built.
4. Certificate of Registration number.
5. Name of Master.
6. Number of crew.
7. Last port of call.
8. ETA Ardjuna Marine Terminal.
9. Indonesian ports of call.
10. Cargo figures (quantity to be loaded).
11. Consignee and discharging port.

THIRD. The "Owners" should promptly arrange transfer of advance funds to cover the applicable port charges and advise telegraphic transfer number to Pertaminaship.

Advance Payment: The tanker Owner or Charterer must comply with the Procedure for appointing Agent as mentioned above.

Pertamina Directorate of Shipping and Telecommunication will acknowledge receipt of cable appointment, and will request an advance deposit depending on the size of vessel, to cover the above port charges, not included corporate tax. In addition a sum of US $5,000 is to be paid as advance payment for freight tax.

Advance payment for government charges should be made payable to:

"Pertamina Agency"
Account No. 11.51.006.000.0005
Bank Negara Indonesia
Cabang Gambir
Jalan Kebon Sirih 77A
Jakarta, Indonesia.

To facilitate handling preparation, Owners/Charterers are required to telex "Pertamina Directorate of Shipping & Telecommunications" advising Telegram Transfer (T.T.) Number, the name of vessel and the port(s) of call. Telex number: 44450, 45348.

In those instances where payment exceeds the actual port charges, the balance will be credited to the Owners/Charterers account or remitted by the Agent.

Neither the Agent nor Atlantic Richfield Indonesia, Inc., will be responsible for demurrage or other charges resulting from failure to prearrange obligations in this manner.

OPERATOR: Atlantic Richfield Indonesia Inc.
Principal Offices:

Pertamina Head Office: Jalan Medan Merdeka Timur No. 1A, Jakarta, Indonesia.

Atlantic Richfield Indonesia Inc.: Panin Bank Building, Jalan Jenderal Soedirman, PO Box 63/JKT, Jakarta, Indonesia.

Atlantic Richfield International Oil and Gas Co., 444 South Flower Street, Los Angeles, California 90017, U.S.A.

Reading & Bates, Offshore Drilling Company, 3800, First Place, Tulsa, Oklahoma 74103.

Natomas International Corporation, Jalan Letjen. M.T. Haryono 58, PO Box 2759/JKT, Jakarta, Indonesia.

Independent Indonesian American Petroleum Company: Division of Natomas International Corporation, 601 California Street, San Francisco, California 94108.

Tidewater N.W. Java, Inc.: 1440 Canal Street, Suite 2100, New Orleans, La. 70112, U.S.A.

Warrior Minyak Inc.: 1776 Lincoln St., Suite 80, Denver, Colorado 80203, U.S.A.

Nominations: Tanker nominations for liftings of either Ardjuna crude oil or liquefied natural gas are co-ordinated through Atlantic Richfield Company, Los Angeles, California and Atlantic Richfield Indonesia Inc., Jakarta.

All crude oil and liquefied petroleum gas sales, also tanker chartering are arranged by the following parties in each of their respective locations. Pertamina, Atlantic Richfield Company, Reading and Bates International Petroleum Company, Natomas Company, Tide Water N.W. Java Inc. and Warrior Minyak Inc.

Tanker scheduling is co-ordinated for all of the partners through Atlantic Richfield Company, Los Angeles, California and arranged through Atlantic Richfield Indonesia Inc., Jakarta.

AUTHORITY: Chief Harbour Master/Port Captain – Tanjong Priok, No. 1. Jl. Syahbandar, Tanjong Priok. *Tel:* 021-494381. *Contact:* Captain Leo B. Siahaan, Harbour Master.

BALIKPAPAN: 01.16 S. 116.48 E.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Loading Line Certificate and SOLAS Classification (Hull and Machinery).
Safety Certificate (passengers ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
10 Crew Lists and Passenger's Lists.
2 Stores Lists.

PILOTAGE: Compulsory pilotage. Application for Pilots can be made via Balikpapan pilot station or Radio Station. Vessels arriving by night should anchor off the Outer Buoy and give their call sign to the Pilot Radio Station (VHF Channel 12). Pilot boards in position Lat. 01° 21′ 20″ S., Long. 116° 55′ 00″ E. Vessels should order a Pilot at least 6 hours prior to arrival and when leaving 3 hours before departure or if leaving between 0600 hrs. and 1200 hrs. Pilot should be ordered before 2000 hrs. on the preceding day.

APPROACH: The surrounding land is in general low with few conspicuous hill rows as background. Only the high spit on which Balikpapan is built can be used as a landmark with the regular cone-shaped hill Tokong.

RESTRICTIONS: Vessels with a draft over 11.5 m. only handled during daytime. Vessels with draft of less than 11.5 m. are handled at anytime, weather permitting.

Bar Channel: Length (Buoy No. 1 to Buoy No. 12) 9 miles. Width 150 m. Depth 12.0 m. at LW.

MAX. SIZE: Tankers: Shell normally permit max. LOA of 215 m., draft 12.0 m. and max. d.w.t. 35,000 tons. Drafts are restricted by the bar where the depth below chart datum is 25 ft. 3 in. Minimum keel clearance required is 1 ft. 3 in. Sailing drafts depending on rise of tide up to a max. of 33 ft. salt water.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

TUGS: 2 tugs. 870 h.p. and 1,700 h.p.

BERTHING: 1. Dry Cargo Jetty owned by Port Administration. Length 269 m., depth alongside 10 m. at LWS.

2. Oil Jetties: Berth Nos. 1, 2, 3, 4 and 5. Total length 435 m.

New Oil Jetty: Berth No. 5A Length 80 m., for barges only. Berth No. 5B. Length 200 m. Berth No. 5C. Length 200 m.

TANKERS: Discharge lines are 6 in. and 8 in. 2×50 ton. slop tanks available. When alongside vessels should keep 2 wires ready over the water-side so that vessels can be towed away in case of emergency.

STEVEDORES: Working hours: 0700 – 2000 hrs. Monday to Friday. 0700 – 1500 hrs. Saturdays. Sundays work possible at overtime rates.

DENSITY: 1026.

FRESH WATER: Available in limited quantity. Rate 10 t.p.h. – 15 t.p.h.

FUEL: Fuel oil and diesel oil available at Berth No. 1 to No. 5C (except No. 5A). Pumping rate 150 t.p.h. – 650 t.p.h.

PORT SECURITY: Maintained by Port Security Unit (KPLP) and Police (KP.3). Crew members should be in possession of a shore-pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS ALLOWANCES: It is strictly prohibited to take undeclared foreign currency ashore. Local currency restrictions for shore-going crew may also apply. It is recommended that Masters consult the Agents with the local prevailing Customs Laws with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

GENERAL:
Provisions: Available.
Current: Flows North/South at up to 3 knots.
Nature of Bottom: Mud and sand.
Telephone Numbers:

BANYUWANGI: 08.13 S. 114.23 E.

OLD PORT NOW PRACTICALLY CLOSED FOR SHIPS. (OPENED FOR BOATS AND FISHING BOATS ONLY).

DOCUMENTS: Customs and Harbour Master requires:

Crew List.
Passenger List.
Customs Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Derat Certificate.
Radio Certificate.
Certificate of Registry.

PILOTAGE: Not necessary because anchorage open.

ANCHORAGE: Position: Lat. 8° 12′ S., Long. 114° 23′ 16″ E. Depth 25 m. – 30 m.

MAX. SIZE: No restrictions, vessels must be anchored outside harbour.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: None, moved to Meneng Port.

TUGS: 2 tug boats belong to P.T. Jakarta Lloyd, Banyuwangi Branch.

BERTHING: Distance 500 m. to 750 m. from lighthouse. Anchorage berths only.

STEVEDORES: 6 gangs available. P.T. Jakarta Lloyd, Banyuwangi Branch. 1 gang consists of 13 labourers, 1 gang boss, 1 tallyman, 2 winch drivers and 1 commander.

MEDICAL: Arranged by Department of Health.

FRESH WATER: None available.

FUEL: None available.

GANGWAY/DECK WATCHMEN: None available from shore.

OPENING/CLOSING HATCHES: Arranged by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes each crew member. Packs or tins of tobacco must be open before going ashore. Wine and/or spirits: Enough for own use, if more required must pay import duties.

CARGO GEAR: Ship's gear used. Cargo loading on board by lighter.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: No facilities.

REPATRIATION: Not possible.

TIME: GMT plus 7 hours.

HOLIDAYS: On Sundays and holidays no work carried out, but if necessary, can be arranged. No work when raining.

POLICE/FIRE/AMBULANCE: Police and ambulance available. Fire brigades belong to District and Paper Mill. Phone Nos. 352, 653, 353 and 503.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed.

DELAYS: Possible during loading if it rains.

AUTHORITY: Kepala Pelabuhan (Port Administration).

BANYUWANGI (Port Meneng): 08.07 S. 114.23 E. (See Plan)

NEW PORT FOR LARGE VESSELS.

DOCUMENTS: Customs and Harbour Master require:
Crew List.
Passenger List.
Customs Documents.
Health Certificate.
Port Clearance.
Harbour Report.
Derat Certificate.
Radio Certificate.
Certificate of Registry.
Perfection Certificate.

PILOTAGE: Compulsory pilotage for vessels over 80 g.r.t. Pilots must be ordered by respective Agent at least 6 hours in advance of the time their service is required.

RESTRICTIONS: Mooring and unmooring is restricted to daylight hours only for cargo vessels and tankers.

MAX. SIZE: Draft alongside quay max. 40 ft. Present quay permits max. LOA of 645 ft. Bar 260 m. East of quay, depth below chart datum is 24 ft.

HEALTH: All vessels boarded by Harbour Quarantine on arrival.

RADIO: Name: Department of Sea Communication. Call sign: 8 AD 22 with freq. 8110 kHz, receiver SSB 5316 kHz. (used by Department of Sea Communication).

VHF: Call sign: Meneng Radio, freq. Channel 16, 12, used shore to ship and can be contacted about 25 miles before arriving at Meneng Port.

TUGS: 1 tug × 1,400 h.p. owned by Perumpel III Meneng. 2 tugs × 850 h.p. owned by Pertamina.

BERTHING: Present berth length 260 m. Depth alongside 40 ft.

Pusri: New port located about 0.5 miles South of the Port of Meneng. Operated under Pertamina management for oil off-loading purposes. The open roadstead harbour has a 150 m. long wharf with a 10–12 m. depth. Location of the port which is especially for domestic shipping is Lat.: 8° 08′ 09″ S., Long.: 144° 24′ 03″ E. New jetty owned by PT Pusri. Max. LOA 140 m.

Note:
Max. safe capacity for the jetty:
Cargo jetty No. I max. capacity 5 tons.
Cargo jetty No. II max. capacity 10 tons.
Cargo jetty No. III max. capacity 10 tons.

STEVEDORES: 12 gangs available.

One gang consists of 1 gang boss, 2 winch drivers, 1 Pilot and 13 labourers.

Working Hours: 0800–1600, 1600–2400 and 2400–0800.

Rest Time: 1200–1300, 1800–1900 and 0300–0400.

FACILITIES: *Godowns:* Two transit godowns (20 m.×50 m.) available, owned by Perumpel III. Two godowns max. capacity 10,000 tons, available, owned by PT Djakarta-Lloyd Banyuwangi Branch.

Equipment: 1 mobile crane of 25 tons capacity. 2 forklifts of 3 tons capacity. 3 forklifts of 2 tons capacity.

MEDICAL: Arranged by Department of Health.

TANKERS: One berth operated by Pertamina. Max. LOA 80 m. Max. draft 8.00 m. Max. d.w.t. 15,000.

FRESH WATER: Available. Handled by Harbour Board, with a loading capacity of about 240 tons per day (10 t.p.h.).

FUEL: Not available, but expected to be available in near future.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes each Crew member. Packs or tins of tobacco must be open before going ashore. Wines and/or spirits enough for own use. If more required must pay import duties.

CARGO GEAR: Ship's gear used.

IDENTIFICATION CARDS: Required.

CONSULS: No local representation.

REPAIRS: No facilities.

REPATRIATION: Foreign crew members must go to Immigration Office at Jember City for clearance. Facilities will be available at Banyuwangi in near future.

TIME: GMT plus 7 hours.

AIRPORT: Ngurah Rai Airport 60 miles. Juanda Airport (Surabaya) 125 miles.

HOLIDAYS: On Sunday and holidays no workers available, but if necessary work can be arranged, except Independence Day (17th August) and 1st Sjawal (Idul Fitri/Moslem Holiday).

POLICE/FIRE/AMBULANCE: Police and Ambulance available. Fire Brigade owned by District and Paper Mills.

Police: 110 or 2110. Fire: 113. Ambulance: 118 or 2118.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Allowed, shore pass required from Perumpel III. Tel: (0333) 21638 – 41636.

DELAYS: Possible during loading if it rains.

AUTHORITY: Perusahaan Umum Pelabuhan III, Port Meneng Branch, Jl. Raya Situbondo-Banyuwangi, Banyuwangi, Indonesia. *Tel:* 41636, 21638. *Contact:* Sidi Makmur, Port Manager.

BELAWAN: 03.47 N. 98.41 E. (See Plan)

DOCUMENTS: Upon arrival ships have to fill in the following Forms:
Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
2 Stores Lists.

PILOTAGE: Pilotage for vessels over 500 cu.m. gross is compulsory. Location of anchorage for vessels awaiting a Pilot is Lat. 03° 54′ 50″ N., Long. 98° 45′ 50″ E., near Light Buoy No. 0 (Lat. 03° 54′ 14″ N., Long. 98° 44′ 40″ E.).

The new lighthouse at Tg. Nipa Larangan (Lat. 03° 54′ 00″ N., Long. 98° 40′ 50″ E.) with characteristic Gp. Fl (3) 20 sec. 37M 40m, will assist Masters to approach the anchorage. Before arrival Masters have to contact their Agents via Belawan Radio (PKB) and give Information about: ETA, cargo, LOA, draft etc.

To receive information, Masters may use the VHF radio on Channel 12 calling "Belawan Pilot" or "Pilot Boat".

Pilot's service available 24 hours a day.

Pilot must be ordered by the Agent at least 6 hours in advance of the time their service is required.

A Sea Pilot and Harbour Pilot embark at anchorage when berth has been allotted.

Vessels will proceed when the draft enables vessels to pass through the channel.

The channel is approximately 9 miles in length, 100 m. width and 8 m. depth at LWS with a tidal range about 2 m. and is provided with 7 light buoys and 5 light beacons.

Basin 1,350 m. length. 220 m. width.

Pilot boat is located in the harbour.

When the Pilot is on pilot vessel, "H" flag will be flown in daylight and quick flashing white light at night.

RESTRICTIONS: Bar is silting excessively and continuous dredging is necessary to keep the shallowest part at 8 m. at LWS. Narrowest part of channel is 50 m. wide. Also see "Developments".

Outer Roads about 600 m. square marked by light buoy. No pilot light vessel. This roadstead is approx. 600 m. wide, the centre of which is the range-line of the swept channel. This channel is provided with buoys and beacons.

TUGS: Join the vessels at buoy No. 11 about 1 mile from harbour. Ship's line to be used for towing line.

Port Authority Regulation:
a. Vessels with LOA less than 100 m. assisted by .... 1 tug
b. Vessels with LOA from 100 m. up to 150 m. assisted by ...... 2 tugs
c. Vessels with LOA over 150 m. assisted by .... 3 tugs

Tugs: 2×800 h.p and 1×1,200 h.p.

RADIO: Coastal Radio Station: Call sign PKT; Class A1, Frequency 8714, A2, Frequency 8754.4.

BERTHING:

STEVEDORES: Working hours: Monday-Thursday 0800 – 1200 hrs., 1300 – 1600 hrs. Friday 0800 – 1100 hrs., 1300 – 1600 hrs. Saturday 0800 – 1200 hrs., 1300 – 1500 hrs. Overtime to be applied for from authorities concerned and is usually granted: on working-days during meal-hours, from 1600 – 2000 hrs. and occasionally till 2200 hrs.; on Sundays and holidays, except Independence Day, 1st Ramadhan, Christmas and 1st January.

CRANES: Mobile cranes, 2×15 ton capacity and 3×25 tons capacity. Floating crane 40 tons capacity. 5 shore cranes with 3 – 5 tons capacity. 4 transtainers, 4 straddle carriers and 5 front lifters.
FRESH WATER: Handled by the Harbour Board. Artesian wells all along the Ocean Quay with a loading capacity of about 10 t.p.h. The water is regularly laboratory checked and declared drinkable but boiling before use remains recommended. Barge with 200 tons capacity also available.
FUEL: Coal not available. Oil, at 5 points on the quay alongside godown 18 and 19 for Stanvac diesel and marine fuel oil, applications for which must be made 2 weeks in advance. Pumping capacity about 60 t.p.h. Barge with 200 tons capacity also available.
REPAIRS: Slipways available for small craft only. Machine-shops available for minor repairs. Radio repairs available, viz. the Post Telegraph and Telephone Office. Electronic repairs not available.
PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.
CUSTOMS: It is strictly prohibited take undeclared foreign currency ashore. Local currency restrictions may apply to shore-going crew members. It is recommended that Masters consult the Agents for the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
DEVELOPMENTS: New Quay, length 878 m. and width 25 m. under construction.

To be constructed: 1 wharf, 175 m. long and 11.5 m. depth. 1 wharf, 490 m. long and depth 8.0 m. 1 wharf, 500 m. long (extension) and depth 8.0 m. 1 Fuel Oil Terminal.

Dredging: The Belawan Harbour Master has issued the following guidelines in connection with dredging work being carried out:

Commencing as of September 24th, 1984, the sailing channel of the Belawan Harbour shall be dredged for the length of about 14,000 m. with a depth of 10 m. LWS. The dredger to be used is the mud sucker 'Irian Jaya'. The location of the mud to be deposited 03° 55′ 14″ N., 98° 44′ 48″ E.

All ships passing by the dredger are requested to observe all signals shown.

At the time of passing each other, the manoeuvre should be carefully conducted or it should be avoided passing each other in the middle of the channel.

Please be guided accordingly.

Also see "Shipmaster's Reports" dated October 1985 and December 1985.

SHIPMASTER'S REPORT: 1976: I would inform you that all vessels are now berthed or unberthed on a round-the-clock basis, within the draft limits imposed by the dredged channel, which at present is 8 m. LWS with a tidal range of about 2 m. The Chief Pilot stated that they would berth vessels up to 10 m. draft at HW.

The pilot station is now equipped with VHF and works on Channel 12: they pass berthing information on this Channel to vessels at anchor. They use Channel 12 as a calling-up and working Channel.

SHIPMASTER'S REPORT: October 1985.
During my recent visit to the port, I noticed the following:

Phase 1 construction of port extension at Gabion (3 km. from Ujung Baru):

351 m. of conventional berth with alongside depth of 10 m., wharf apron 22 m. width already completed. 2 transit sheds (total space 12,000 sq.m.) being erected.

500 m. of multi-purpose/container berth (depth alongside 11 m.), wharf apron 25 m. already completed. 2 container quay cranes expected to be installed end 1986. Presently, self-sustained contained feeder vessels have been working at Ujung Baru.

Opening for temporary usage at the new berths at Gabion expected early 1986.

SHIPMASTER'S REPORT: December 1985.
Channel: Pilot advised controlling section now reduced to 40 m. wide and 8.0 m. depth at zero tide or chart datum. Constant silting taking place. Underkeel clearance 1.0 m. required.

One vessel per tide can pass at 7.0 m. plus the predicted height of tide. Imperative to obtain information from Pilot inward, as simply not available from Agents, Port Radio, etc.

Gabion Wharf: This new project is well advanced to completion. The concrete wharf and apron are in use, while surfacing, and services are still proceeding. The Northern portion will be for containers, and the Southern end for general or direct delivery cargoes. However, this wharf appears to be already suffering from silting, and the S.W. berth was found to have a minimum of 7.1 m., increasing to 9.3 m. and 9.1 m. to the N.E. (Any ship visiting an Indonesian port must take soundings immediately on berthing to establish the safety of the berth, and not immobilise until this is done). This wharf extends S.W. from beacon (F.1364) Fl. Y. 3 secs.

Density: 1015 on flood tide, 1012 on ebb tide.

Entry Formalities: The vessel used:

7 Crew Lists, (checked in detail against I.D. Cards).
1 Manifest "nil" cargo.
1 Bonded Store Lists.
5 Personal Effects Lists.
5 Deck, Engine, Bond, Provisions Stores Lists.
5 Animals Lists.
5 Parcel Lists.
5 Armsa and Ammunition Lists.
5 Ports of Call Last Voyage.

Inspection Team: (1) 2 Immigration Officers, 1 Port Health Officer, 1 Harbour Master, (all conveyed by Agent's minibus).
(2) 5 Customs Officers arrived separately.

Departure inspection may be similar. Agent attends with both inspection teams.

Thefts: Forecastle store broken into twice while alongside, padlocks being no deterrent. 2 shore watchmen employed throughout. Shackles stolen from hatch operating gear.

Transport: Normal mode is to ride pillion on a small motorcycle! 4.5 km. to shopping street.

Postage: A letter from Medan post office to Hong Kong reported to take 3 weeks.

Telex: Communications are poor.

AUTHORITY: Departmeen Perjubungan, Direktorat Djendral Perhubungan Laut.

BIMA: 08.25 S. 118.42 E. ~~(See Late Plans)~~

DOCUMENTS:
6 Crew Lists.
6 Vaccination Lists.
6 Stores Lists.
6 Passenger Lists.
PILOTAGE: None available.
ANCHORAGE: 300 m. off the quay in depth of 16 m.
RESTRICTIONS: None, vessel may enter harbour day or night.
MAX. SIZE: Not limited at anchorage.
RADIO: Coastal Radio Station, cable address "Pelni Bima" by Post Office.
TUGS: No tugs available.
BERTHING: Entering and sailing allowed after dark. No berthing facilities except for very small ships.
STEVEDORES: Ordered by Agent. No work allowed on Muslim holidays, New Year and 17th August.
MEDICAL: 1 government hospital available.
~~**TANKERS:** Oil storage vessel "Citra Ayu" (236,465 d.w.t.) will operate at the port in the near future. Operator of vessel is ARCO.~~
FRESH WATER: None available.
FUEL: None available.
GANGWAY/DECK WATCHMEN: None available, Police and Customs officers posted on board.
OPENING/CLOSING HATCHES: Carried out by stevedores.
AIRPORT: Flights from Bima to Sumbawa, Ampenan and Bali by AOA Zamrud (Dakota) every Sunday, Tuesday, Thursday and Saturday.
TIME: GMT plus 8 hours.
HOLIDAYS: Muslim holidays, New Year, 17th August.
TELEPHONES: No phone connections between ship and shore available.
SHORE LEAVE: Crew members are allowed to go ashore and arranged by Agents.
DELAYS: 1 motor-boat, 4 lighters each of 15 tons and 1 lighter of 25 tons. Loading general cargo, live buffaloes and fodder. For heavy cargo max. 7 tons each lift can be handled through lighters.

BITUNG: 01.26 N. 125.12 E. (See Plan)

DOCUMENTS:
4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
3 Cargo Lists.
3 Provisions Lists.

List of Articles new and Customs-barred in possession of each crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Ship's Register.
International Vaccination Certificate for Crew and Passengers.
(Especially for International Travellers.)
Health Book/Maritime Declaration of Health.
Derat Exemption Certificate.

PILOTAGE: Contact Coastal Radio Station Bitung (call sign PKM), telegram address: Bitung Port Administration; advance notice of ETA 24 hours. Pilot boats: 150 h.p. and 300 h.p. light grey. Requiring a Pilot: flag, sound and Morse Signal: "G".

Anchorage for vessel awaiting a Pilot: the area between Southern part of the Lembeh Street at: Lat. 1° 25′ 00″ N., and Lat. 1° 30′ 35″ N. at the Northern part of the street.

Ships have to anchor outside the mentioned Latitude above.

ANCHORAGE: The area between coast of Lembeh Island and coast of Sulawesi: Lat. 01° 27′ N., Long. 125° 12.3′ E.; Lat. 01° 26.2′ N., Long. 125° 13.5′ E. and Lat. 01° 26.3′ N., Long. 125° 10′ E.; Lat. 01° 25′ N., Long. 125° 10.8′ E. Depths: 42 ft. to 114 ft.
RESTRICTIONS: No restrictions on night entry.
Shipmaster's Report: Numerous fishing boats at the port entrance especially at night-time, also fishing sticks, and small fishermen's houses on bamboo sticks built at sea, without lights, dangerous to navigation. Approaching or sailing from port at night-time should not be attempted.
MAX. SIZE: Draft alongside pier, max. 32 ft. L.O.A. 760 ft. or 100,000 B.R.T. (60,000 d.w.t.).
HEALTH: Vessels coming direct from other countries or coming from infected port: "Q" flag to be flown. Pratique procedure and action necessary to obtain Pratique according to the International Sanitary Regulations.

RADIO: Bitung Radio (Call sign P.K.M.) for vessels to route ETA cables to Agents, Receivers, etc.

(MF–Working frequency 438 and 500 kHz, listening frequency 500 kHz, emission A.1., A.2.).

Time Schedule: 0000—0100
0400—0500 G.M.T.
0800—0900

TUGS: 1 tug, 1,160 h.p. also 2 motor launches of 115 h.p.

BERTHING: For ocean-going vessels: 16 ft. – 35 ft. at wharf of 582 m. length.

For inter-island vessels: 17 ft. at wharf of 455 m. length.

STEVEDORES: Arranged by handling Agent.

Handling Rates:
Bulk cargo: 13–18 tons/gang/hour.
Bagged Cargo: 20–35 tons/gang/hour.
General Cargo: 12–15 tons/gang/hour.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance required aboard. Vaccination/fever certificates required, 3 copies.

TANKERS: 1 oil jetty for domestic tankers (not general use). With 7 bunkering points alongside the 582 m. Ocean Going wharf, of which 3 are presently used. Bunker fuel is supplied directly by P.N. Pertamina (state oil company).

DENSITY: About 1030.

FRESH WATER: Available from hose connections on the pier, at a rate of 50 t.p.h., also 1 fresh water barge with the capacity of 200 tons.

FUEL: Not all grades fuel available. Diesel and marine lubricants can be supplied. 48 hours notice required. Rate 50–150 t.p.h.

REPAIRS: Some deck and minor engine repairs are possible at Bitung dockyard. Radar and electronic repair available, but not for big repairs.

DOCKYARD: P.T. IKI and P.T. Dock Surya.

GANGWAY/DECK WATCHMEN: Not needed.

OPENING/CLOSING HATCHES: Normally by crew/stevedores, otherwise according charter party.

SHIP'S CERTIFICATES: Registered Tonnage Certificate and all certificates normally required to be on board.

CUSTOMS ALLOWANCES: 100 cigarettes or 20 cigars or 100 gram. tobacco each crew member; 1 bottle wine or spirits for each crew member.

Passengers: Articles to the value of US$25 per person or US$100 per family.

CARGO GEAR: Loading and discharging by ship's own derricks. Shore crane capacity up to 15 tons.

IDENTIFICATION CARDS: Shore pass issued by the Immigration Office for crew members at Agent's request.

CONSULS: Philippines only.

REPATRIATION: Facilities available.

AIRPORT: About 50 km. from port of Bitung. Regular airlines: Garuda Indonesian Airways (G.I.A.), Bouraq, Merpati and Mandala. All have daily flights to Makassar and Jakarta.

TIME: GMT plus 9 hours, permanent.

HOLIDAYS: New Year's Day; Idul Adha, 1st Muharam; Ascension Day; Birthday of Prophet Mohammad S.A.W.; Good Friday; Proclamation Day (August 17th); Idul Fitri, Waisak and Christmas Day.

POLICE/AMBULANCE/FIRE: Dial 111, 27, 60, 106 and 108.

SHORE LEAVE: Crew members are allowed ashore with a shore pass issued by the Immigration Office.

DEVELOPMENTS: Extension of pier (1,127 ft.) to total length of 2,430 ft.

SHIPMASTER'S REPORT: February 1980.
There is a 300 m. concrete wharf in approx. position Lat. 01° 26.2′ N., Long. 125° 11.6′ E and a naval wharf in approximate position Lat. 01° 26.5′ N., Long. 125° 12.1′ E. Fuel by road tanker is available.

AUTHORITY: Port Administrator of Bitung, Jalan Makassar, Bitung, Indonesia. *Tel:* 60, 106, 27, 105, 108, 56 and 111. *Contact:* Iljas Sudikto, Port Administrator.

CIGADING: 06.00 S., 105.07 E.

SHIPMASTER'S REPORT: January 1986.

LOCATION: The Port of Cigading is situated in position: Lat. 06° 00.3′ S., Long. 105° 57.5′ E. and about 45 nautical miles N.E. of the entrance to Sunda Strait. The port is under the control of Port Merak, which is approximately 15 km. – 18 km. N.E. of Port Cigading.

DOCUMENTS: Crew Personal Effects Declaration, Provisions List, Bonded Stores List, Crew List, Currency List, Seaman's Books, Passports.

PILOTAGE: Pilot station located at Merak. Pilot station on VHF Channel 12. Callsign "Kilo Bravo". Station also guards Channel 16. Pilot boat guards Channel 12.

Ports attended by Pilot at Banten area:

1. Brown & Roots Terminal.
2. Port of Banten.
3. Cigading Terminal.
4. Unggul Indan Corp. Jetty.
5. Dover Chemical Jetty.
6. Prointal Chemical Jetty.
7. Depot Pertamina Terminal.
8. Merak/Ferry Terminal.
9. I.P.I/Tg. Serong Terminal.
10. Suralaya PLTU Coal/Oil Jetty.
11. Polychem Lindon Jetty.

Also see "Radio".

APPROACHES: Vessels can approach this port any time during day or night. But no berthing possible after sunset.

ANCHORAGES: Vessels awaiting berth can safely anchor 4 cables N.E. of the berth in a depth of 22 m. – 24 m. The currents are very strong in this area. The vessel experienced 3–4 knots of current from Northeasterly and Southwesterly directions, changing every 12 hours, depending upon the tide. Vessels are advised to pay out substantial amounts of cable in order to retain the anchor position.

HEALTH: The Health Authorities board the vessel for Pratique. All international health regulations are followed. The officer checks all the vaccination books for inoculations. Ships arriving from African or South American ports are required to have yellow fever certificates. Pratique is granted only after the officials check all the papers and complete formalities.

RADIO: Radio Jakarta 500 kHz. Call sign JKI.

Arrival Advice: 48 hours before arrival at Cigading, it is essential to cable the local Agents, the full details of the vessel and ETA, including the requirements of pilot service for berthing the vessel. The Pilot is stationed at Merak, as and when any vessel calls at Cigading, the Pilot is arranged from Merak. There is only one Pilot supplied from Jakarta for Merak, Cigading and other minor ports. Pilotage is maintained by the pilotage division of the port of Banten.

Chief Pilot/Harbour Pilot: Sukendear Hadi Utomo. Office: 105 Pulorida Street, Merak-West of Java, Indonesia. Tel: 367808/367594, ext. 194 via P&T. Residence: Jl Raya Anyer No. 03, Komplek B.P.P., Tegal Ratu Cigading, West of Java, Indonesia.

24 hour service is available. Masters or Agents are requested to advise the Pilot whenever there is a change in an ETA.

TUGS: There are 4 small tugs, stationed at Cigading, each approximately 800 b.h.p. These tugs are generally used for towing barges and also utilised for ships berthing at Cigading. Vessels are unberthed at any time during day or night.

BERTHING: There is only 1 long berth extending well into the sea, running in a N.E./S.W. direction. The length of the berth is 550 m. and the breadth approximately 55 m. The outer portion of the berth is utilised for discharging iron ore and has 2 unloading arms. It is mobile and rail mounted. Maximum outreach of unloader from fender face is 24 m. The unloader has grabs, each with capacity of 10 tons. Minimum air-draft to be be maintained at berth, 15.9 m. during maximum high tide in ballast condition. The S.W. portion of the berth is utilised for loading sponge iron, and has one loader. During our stay the loader was not operational. Ships were loaded by truck loads. 2 small vessels of 4,000–5,000 d.w.t. capacity can be berthed alongside simultaneously. The inner portion of the berth, particularly the Northeasterly portion, is utilised by general cargo ships of lesser draft and length. The depth of water at the inner berth is said to be 11 m. plus tide. The depth of water at the outer berth is about 14.5 m. plus rise of tide. The inner portion of the berth is angled in the mid-section. The closed conveyor belts and necessary installations running overhead, almost in a Southeasterly direction. A wide road runs below.

The iron ore discharge from the vessel is fed solely through the conveyor to the steel plant. The steel plant is directly connected by the said conveyor. The "Karakatu Steel Plant" or works, (government owned) is situated approximately 7 km. N.E. of the berth.

The discharging rate at the berth is 700 tonnes/h., allowing for the breakdown of the conveyor at times.

Our vessel: LOA 245 m. Beam 32 m. Max. arrival draft 13.70 m. D.w.t.: 76,900 tonnes. Discharged 71,500 tonnes of iron ore pellets from Brazil in 6 days.

MEDICAL: Hospital, doctor and inoculations are available at Cilegon and Merak. Serious cases to be attended to at Jakarta.

DENSITY: 1022.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPAIRS: No facilities available.

GANGWAY/DECK WATCHMEN: Not compulsory.

CUSTOMS ALLOWANCES: Allowances are as per Jakarta requirements. Personal declaration forms are essential. All electronic goods and currency must be declared on the personal property declaration. Beside this, Provisions List and Bond Statement is also essential (1 copy each), along with the Crew List (1 copy).

REPATRIATION: Possible. During repatriation crew baggage is thoroughly checked by the Customs. Any electronic goods in possession of crew is entered in the individual passports.

AIRPORT: Jakarta, 3 hours by road.

BANKS: Banking facilities available at Cilegon. Several Indonesian National Banks have branches at Cilegon. Travellers' cheques are honoured in the shopping complexes.

SHORE LEAVE: No restrictions.

Immigration authorities take away all Seamen's Books/passports into their custody. Identity Cards are issued to each crew member. Seamen's Books/passports are returned to the vessel prior departure.

Shore leave passes to be carried by the crew member when going ashore.

GENERAL:

Provisions: Available.

Currency: US$1.00=1135 Rs. (January 1986).

Agency: Karana Line are the recommended Agents at Cigading. They have an office situated at nearest town – Cilegon. Karana Line have long-term contracts with the Indonesian Government for supply of iron ore to the existing steel works near Cigading.

Head Office: Address. Jl. Kali Besar Timur 30 Jkt. Tel: 679103 (5 lines). Telex: (011) 42727, 42895. Cable Address: Karana Line. P.O.Box 81. Office: Jl. Raya Cilegon No. 31. Tel: 157-7.6378 (K S) Cilegon.
Karana Line have representation on board throughout the ship's stay. Hence communication was excellent and smooth. All other appointed Agents have to come from Jakarta, which is about 130 km. from Cigading. No other Agency has an office near the port.

CINTA TERMINAL: 05.30 S. 106.14 E. (See Plan)

DOCUMENTS: The following documents are required for immediate inspection by the Terminal Officials:

Maritime International Declaration of Health.
Valid Derat or Exemption Certificate.
6 copies of Crew Lists.
Passenger List, if any.
Certificates of Inoculation against any communicable diseases.
Valid Passports and/or Seaman's Certificates for all Crew members or passengers.
Notice of Readiness.
Indonesian Consular Clearance.
1 Crew Declaration of Personal Belongings.
1 Ship's Stores Inventory.
6 copies of Cargo Manifest for Cinta Terminal loading.
1 Copy of Cargo Manifest for Transit Cargo with a Summary.
1 Copy of Passenger Manifest.

Clearance from the last port of call will be required by the Government Authorities. Crew Lists and Crew Declaration of Personal Belongings must be on the approved Indonesian documents. Vessels are advised on their initial visit to the port to obtain sufficient forms for future visits.

In the normal course of events, Cinta Terminal acts as tanker agent and prepares all crude oil documents. No charges are made for these services. A tanker will be considered clear to depart Cinta Terminal when the crude oil loading documents and his outward clearance certificate have been delivered to the Master of the vessel.

EQUIPMENT: A vessel must have both bower anchors and ground tackle in good working condition and in such sizes and amounts as to meet either "Lloyd's" or "A.B.S." standards, although they may be in fact classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry suitable stoppers for all manila or synthetic lines for mooring use.

Vessels to have suitable winches or capstans in good operating condition on the forecastle deck. Constant tension-type winches may not be used except when they can be solidly locked and the constant tension feature not used.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Cinta Terminal will be boarded by Cinta Terminal Mooring Master in the anchorage area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring, unmooring, connection and disconnecting hoses, and all other operations within the Terminal area. Vessels are requested to have a pilot's ladder, safely and securely rigged, ready for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master, both when boarding and leaving. Also a light line should be ready to take aboard the Mooring Master's portable radio.

ANCHORAGE: Position is Lat. 5° 25′ 25″ S., Long. 106° 11′ 09″ E. with a radius of 1 mile which must be used by vessels required to wait at anchor. Anchoring within the Terminal Area is prohibited. Mooring Masters will board arriving tankers in the anchorage area.

The holding area is West of the No. 1 Export SBM with water depth of 18 to 20 fathoms. Holding ground is fairly good. Area is large enough for sufficient manoeuvring and swinging room for several vessels.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is already in the berth, or the Terminal is closed on account of adverse weather, etc.), Master will be advised by radio and requested to anchor.

RESTRICTED AREA: The limits of the restricted area is covered by lines between points of the following positions:

AA.	Lat. 04° 48′ S.,	Long. 106° 12′ E.
BB.	Lat. 04° 48′ S.,	Long. 106° 14′ E.
CC.	Lat. 05° 04′ S.,	Long. 106° 22′ E.
DD.	Lat. 05° 04′ S.,	Long. 106° 27′ E.
EE.	Lat. 04° 56′ S.,	Long. 106° 27′ E.
FF.	Lat. 04° 56′ S.,	Long. 106° 34′ E.
GG.	Lat. 05° 00′ S.,	Long. 106° 34′ E.
HH.	Lat. 05° 00′ S.,	Long. 106° 30′ E.
JJ.	Lat. 05° 07′ S.,	Long. 106° 30′ E.
KK.	Lat. 05° 10′ S.,	Long. 106° 26′ E.
LL.	Lat. 05° 10′ S.,	Long. 106° 25′ E.
MM.	Lat. 05° 26′ S.,	Long. 106° 28′ E.
NN.	Lat. 05° 33′ S.,	Long. 106° 18′ E.
PP.	Lat. 05° 33′ S.,	Long. 106° 14′ E.
RR.	Lat. 05° 37′ S.,	Long. 106° 14′ E.
SS.	Lat. 05° 37′ S.,	Long. 106° 09′ E.
TT.	Lat. 05° 15′ S.,	Long. 106° 09′ E.
XX.	Lat. 05° 15′ S.,	Long. 106° 04′ E.
YY.	Lat. 05° 06′ S.,	Long. 106° 04′ E.
ZZ.	Lat. 05° 06′ S.,	Long. 106° 10′ E.

RESTRICTIONS: Weather permitting, Cinta Terminal will operate on 24 hours per day, 7 days per week. Tankers will be berthed during daylight hours only and unmoored on 24 hours basis provided the berth is not occupied and/or storage is not critical.

MAX. SIZE: *Minimum Size Tanker Acceptable:* The minimum sized tanker acceptable at the Terminal will be not less than 20,000 d.w.t.

Max. Size Tanker Acceptable: The max. sized tanker acceptable at the Terminal calling for a full cargo will be 175,000 d.w.t. Larger tankers may be accepted subject to weather conditions at the time of loading without recourse to IIAPCO for any delays.

NAVIGATION AIDS: There are 4 SBMs, each fitted with 5 nautical mile white flashing light, flashing Morse code (U) at 15 second intervals.

The positions are as follows:

No. 1 Storage SBM: Lat. 05° 26′ 40″ S., Long. 106° 14′ 44.5″ E.

Permanently secured to this SBM is a large 602 ft. long barge "Cinta Natomas" used for storage of crude oil and accommodation, (headquarters of Cinta Terminal personnel). The barge shows lights and shapes as prescribed in the International Regulation for Preventing Collisions at Sea for vessels engaged in underwater operations. The barge is also equipped with a foghorn 5 second on, 55 second off, 5 second on, 10 second apart.

No. 2 Storage SBM: Lat. 05° 26′ 23″ S., Long., 106° 13′ 45″ E.
No. 1 Export SBM: Lat. 05° 25′ 25″ S., Long. 106° 14′ 09″ E.
No. 2 Export SBM: Lat. 05° 27′ 03″ S., Long. 106° 13′ 00″ E.

Platform Co-ordinates:

Cinta-A	Lat. 05° 26′ 24.46″ S.,	Long. 106° 15′ 44.73″ E.
Cinta-B	Lat. 05° 27′ 00.34″ S.,	Long. 106° 15′ 17.72″ E.

RADIO/VHF:

Cable Address: "Iiapco Jakarta".
Telex: 44221-1A.

Operating Schedules and Frequencies: Direct communication by radio telephony between Cinta Terminal (call sign: 6ZFT) and incoming vessels will be by: amplitude modulation (A3, A3H and A3J) operation in the 2, 4, 8 and 12 MHz bands and by International Marine VHF Channel 16 (156.80 MHz).

Cinta Terminal (call sign: 6ZFT) particulars are as follows: operated by: Independent Indonesian American Petroleum Company (IIAPCO). Position: Lat. 5° 26′ 40″ S., Long. 106° 14′ 42″ E. Hours of operation: 24.

Frequencies	*Class*	*Power*	*Mode*
4456.0 kHz	A3, A3H, A3J	150 W	AM

International Marine VHF Channels:

6 – 156.30 MHz	Simplex	
12 – 156.60 MHz	Simplex	
13 – 156.65 MHz	Simplex	
14 – 156.70 MHz	Simplex	
16 – 156.80 MHz	Simplex	
20 – 157.00 MHz	Receive 161.60 MHz	Duplex
26 – 157.30 MHz	Receive 161.90 MHz	Duplex
28 – 157.40 MHz	Receive 162.00 MHz	Duplex

Notes: 6ZFT keeps continuous watch on 4456 kHz. 6ZFT keeps continuous watch on VHF Channel 16.

All communications between ships and Cinta Terminal (6ZFT) will be way of this station except should a vessel be unable to contact 6ZFT, she should send messages through: Singapore Radio/9VG or Pertamina Radio/PKI-2.

Initial Communications: It is most important that ships establish communications with the Cinta Terminal (6ZFT) not less than 72 hours prior to arrival at the Terminal, giving estimated time of arrival. Further ETA information should be sent when the vessel is 48 hours, 24 hours, 12 hours and 4 hours distant or any time a change of one hour in original ETA occurs. These messages should specifically state whether ETA is given in GMT (Z) or local time (K).

Cinta Terminal time is GMT plus 7 hours throughout the year.

The 72 hours signal should include the following:

1. Name of vessel and radio call sign.
2. ETA and date.
3. Cargo requirements.
4. Deballast time.
5. Max. loading rate.
6. Vessels draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold.

On receipt of the first signal from a vessel Cinta Terminal (6ZFT) will transmit a message to her giving preliminary requirements and details as to Terminal. Masters are urged to comply with this in all details in order to facilitate vessel turn-around and Government formalities.

Communications Within 4 Hours of Terminal: Once ships are within the 4 hours distance of Cinta Terminal (6ZFT) communication, valid radio-telephone communications on International marine VHF may be established on Channel 16 (156.80 mHz). This channel is monitored continuously.

Once contact has been made on Channel 16 further conversation will be conducted on a mutually compatible channel.

The 4 hours signal should confirm information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the Terminal.

Communication in Terminal: The Mooring Master will be in direct control of all ship communications while in the Terminal Area. Any unauthorised communications will be cause for cessation of all operations excepting clearing the berth, and the vessel's Notice of Readiness will be nullified immediately.

PRATIQUE: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Cinta Terminal area. These signals shall be displayed continuously until pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port. The boarding officials will attend the incoming vessel from the Cinta Terminal launch.

NOTICE OF READINESS: After arrival in the anchorage area and when the tanker is in every respect ready to load, the Master may tender his Notice of Readiness. Notice of Readiness will not be accepted during periods when the Terminal is closed. The Terminal is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the Terminal will rest with the Terminal Superintendent. Tenders by vessels to load crude oil cargo will be normally accepted and berth assigned to vessels in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast (if any), and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

TUGS: Tugs and/or launches may assist in berthing vessels. These are under the direct supervision and control of the Mooring Master.

BERTH DESCRIPTION: The Terminal and Production Administrative Offices are located on board the 143,000 d.w.t. crude storage barge *Cinta Natomas* permanently moored approximately 8,500 ft. on a line bearing South 22° E. from the First Export SBM. The nearest port with facilities is Jakarta approximately 51 nautical miles South-east.

The single point mooring buoy berth (SBM) is 11 m. in diameter, and designed to handle tankers in the 175,000 d.w.t. class. The buoy is equipped with dual 12 inch floating hose with ASA 150 lb. flanged connections. Both strings must be taken aboard. Loading rates will be from 13,000 to 40,000 barrels per hour range. The SBM is also provided with two permanently attached 15 inch circumference synthetic fibre floating mooring lines. These lines should be held under tension by the vessel at all times.

MOORING: Tankers are requested to have ready on the forecastle head the following:

(a) Messenger lines on the forecastle head for bringing 2 mooring lines aboard from the SBM (mininum 6 in. circumference).
(b) Mooring winches on forecastle head for handling two 12 in. circumference synthetic fibre floating mooring lines from the SBM.
(c) Adequate chafing gear to prevent damage to mooring lines.
(d) Derrick rigged and ready to pick up from launch, mooring shackles, nylon strops and hose connection gear on the port side midships.

On the near approach to the buoy a launch will attach a ship's line to one of the Terminal's floating mooring lines. This will be hove aboard and secured to the towing brackets, if the ship is so fitted, or otherwise secured by a ship's mooring wire and nylon strop previously passed aboard. The same operation will be repeated with the second mooring line.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or mooring buoy or both, or infringement of the Terminal regulations.

HOSES: The Mooring Master along with a ship's officer will direct the ship's crew in the raising, lowering, connecting and disconnecting the oil loading hoses as well as all other labour pertaining to the loading of crude. The Terminal will not provide any labour for work done aboard the vessel.

Vessels must be adequately equipped with boom, blocks, tackle, wire runners and sundry equipment on the port side to hoist the floating hoses from the sea to the loading position. (5 tons minimum hoist size required.) Vessel's loading manifolds should be prepared for two 12 in. ASA 150 lb. Camlock flanged hose connections prior to vessel's arrival at Terminal. Vessel should have adaptors available if their flanges do not correspond to the loading hoses' flanges. For details of Camlock flanges see "Plan". Where no crossover valves exist on loading manifolds it is recommended that loops between loading lines on the starboard side of these manifolds be fitted. 8 in. hose connections to be removed; also, if necessary, "Y" pieces removed so that maximum flow through the 12 in. cargo hoses will not be reduced. To assist in vessel's turnaround, tankers should have all necessary booms and cargo gear rigged and ready before ship is boarded by Mooring Master.

Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

LOADING: Before the loading begins, the Master will ensure that all Terminal and Port Regulations pertaining to the readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive crude, and that all precautions required by the circumstances have been taken.

All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with storage barge *Cinta Natomas* constantly via portable VHF Units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels if the vessel is so fitted.

Should communications with the *Cinta Natomas* fail, loading ceases. An emergency cessation of loading may be effected by a continuous sounding of the ship's whistle.

The max. loading rate will be 17,000 b.p.h. (2,300 long t.p.h.). Loading will commence with one pump; when the vessel advises that the cargo is flowing into the tanks, the loading rate will be increased until the desired rate has been reached.

Vessels shall not close down against the incoming oil flow. Vessels will be held liable for damages resulting from failure to observe this precaution.

The vessel must give 30 minutes notice to the *Cinta Natomas* before starting to "top-off", and shall advise if a decrease in loading rate is desired.

The vessel must give 15 minutes' notice to the *Cinta Natomas* prior to the completion of loading, at which time the *Cinta Natomas* may reduce to one pump.

On completion of loading, all pumps will be stopped, loading hoses disconnected, and blind flanges with gaskets installed on the loading hose before lowering over the side. There should be no leakage. All cargo tank openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

All documentation will be completed as soon as possible after loading is completed.

If during loading it is revealed that oil is leaking from the tanker, so as to constitute a safety or pollution hazard, loading shall cease and the tanker may have to leave the Terminal limits at the sole discretion of the Mooring Master. Completion of loading will only be undertaken if repairs have been carried out to the tanker to the satisfaction of the Mooring Master. A tanker so rejected shall not later be accepted on a subsequent visit for loading until satisfactory evidence of repair is submitted duly certified by ABS, Lloyds or other recognised surveyors.

Notice must be given by the vessel to the Mooring Master 30 minutes before vessel completes deballasting. The Mooring Master will advise the Cinta Terminal.

BALLAST: It is the responsibility of the ship's Master to see that no oil (crude, bunkers, diesel or bilge) or dirty ballast is pumped or spilled overboard from his ship while in the area. Drip pans should be used, especially when disconnecting hoses, in order to prevent spillage overboard.

Before loading commences all overside scuppers shall be made oiltight. At Cinta Terminal there are no slop tanks or facilities for receiving dirty ballast. Tankers must arrive with clean ballast. In the event a tanker does have dirty ballast it will not be allowed to be pumped overboard.

A vessel must have sufficient ballast for safe handling, having due regard to existing weather and sea conditions. Through careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel, the ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, provided approval is first obtained from the Company Mooring Master and provided Government Petroleum Inspector agrees to do so.

Discharging Ballast at Night: When any vessel is discharging ballast in darkness, the sea around the area of discharge will be adequately lighted, so that any pollution will be readily noticeable.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wines, beer, perfume, arms, ammunition and possibly other items will be locked up under customs' seal from time of arrival of ship at the Terminal until the time of leaving territorial waters.

Each person is allowed 20 cigarettes per day of stay or 3 grams of tobacco or cigars in lieu thereof. Each man is allowed 1 litre of beer or 0.5 litres of wine per day. Special allowances are made for the Master under special circumstances.

Indonesian Customs and Immigration Officials will board the vessel as soon as possible after arrival to give inward clearance and pratique service. Indonesian Government Regulations are strictly enforced.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, ammunition, sheath knives and similar weapons or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws.

Masters are requested to inform the ship's officers and crew of the foregoing regulations pertaining to contraband, shore liberty, etc., and to be assured that all personnel completely understand.

IDENTIFICATION CARDS: Visitors must obtain a Special Pass from Indonesian Government Officials located in the Terminal and from the Company's Mooring Masters. It is recommended that visitors be restricted to a minimum due to hazards involved.

REPAIRS: No repairs are to be made while berthing or unberthing, or in the berth. All engines to be on 30 minutes standby and steam on deck at all times.

MEDICAL: At Cinta Terminal, medical and dental services are not available. In emergencies requiring hospitalisation, the patient will have to be flown by helicopter to Jakarta. All expenses will be charged to the ship owner.

TIME: Indonesian local time is GMT plus 7 hours.

SHORE LEAVE: Shore liberty will not be granted except in cases of extreme emergency. Crew members cannot pay off or leave vessel at Terminal.

GENERAL: Safety rules and regulations are strictly enforced. The safety requirements are based upon the provisions of the Code of Safe Practices currently accepted by the Oil and Tanker Industries.

Provisions, spare parts or stores of any sort shall not be loaded from or discharged into any craft while the tanker is in or near the berth.

When a Mooring Master and his launch crew are assigned to a ship on business, it is expected that the ship will supply them with meals at the same time and in the same manner as comparable with personnel of the ship. No special meals or special foods will be required. The Terminal will keep this item to a basic minimum. The ship should also provide shelter and smoking facilities in the same manner as meals. All communictions between Terminal personnel assigned to a ship and ship's personnel should be through the Mooring Master.

AUTHORITY: IIAPCO, P.O.Box 2759, Five Pillars Office Park, Jl. Letjen Haryono M.T.58, Jakarta, Indonesia. *Tel:* 791608. *Telex:* JKT. 47121-IA, 47487-1A. *Cables:* IIAPCO.

DUMAI: 01.41 N. 101.27 E. (See Plan)

IMPORTANT FEATURES:

1. There are 4 CPI Oil Loading Berths, 2 Government Cargo Wharves and 2 Pertamina Refinery Wharves (6 berths) at Dumai. The CPI Oil Loading Berth No. 4 can be utilised for handling refined oil product, Oil Berth No. 4 can also be utilised for discharging crude oil. The Pertamina Refinery Wharves are for sole use of the Refinery. The Government Dry Cargo Wharf No. 1 can handle a vessel with a draft of 8 m. and 20,000 g.r.t., whilst No. 2, which can also be utilised for handling palm oil, is for handling dry cargo vessels with a capacity of 10,000 g.r.t. and a draft of 6 m.
2. Government Pilots moor and unmoor all vessels at Dumai Harbour. CPI supervises the movements of all vessels at the CPI loading berths.
3. Safety rules are strictly enforced. The safety requirements are based upon the provisions of the Codes of Safe Practice currently accepted by the Oil and Tanker Industries.
4. The Indonesian Government maintains a radio station (call letters "PKP") at Dumai. All incoming vessels should establish early contact with this station, in order to transmit ETA data, etc.
5. Shore liberty may normally be granted to ship's officers and crew after clearance of the vessel by Harbour Authorities on a 24 hour basis (subject to change).
6. The laws of the Republic of Indonesia are in force at Dumai; and all personnel, for their own protection, are urged to abide by them.
7. Display of quarantine signals on approach to Dumai must be maintained, until Pratique is granted. By day the flag of Indonesia should be flown throughout the vessel's stay in port.

PORT LIMITS: See "Pilotage" – "Harbour Pilot Area".

DOCUMENTS:

Copy of Agency Agreement Letter of Appointment (SIT LKP).
International Maritime Declaration of Health.
Valid Derat or Derat Exemption Certificate.
12 Crew Lists.
12 Passenger Lists (if passengers carried).
Certificates of inoculation against any communicable diseases.
Valid Passports and/or Seamen's Certificates for all crew members and passengers.
Harbour report/last port clearance.
Load Line, Ship's Registry, Safety Radio, Construction and Equipment Certificates.
For Customs: 1 Crew List, 4 copies Personal Effects List, 4 copies Stores List.

APPROACHES: The Dumai Port installations can be reached by deep draft vessels by proceeding from Malacca Strait into Bengkalis and following a buoyed channel on a Southerly course for a distance of 22 miles to the junction of the Rupat Strait. Vessels must make a turn of approximately 180° to enter the Rupat Strait and thence Westerly for a distance of 33 miles to Dumai. The Bengkalis and Rupat Strait Fairways have been wire-dragged clear to a depth of 24 m. and 18.3 m. LWS respectively.

Last survey was carried out from April to June 1982. Based on that survey, Dumai Sea Communication imposed the maximum draft of vessels passing Rupat Strait in/out bound Dumai Port is 17 m. (55.77 ft.) and LOA of 315 m. (1,033 ft.)

Vessels which have an LOA more than the above should have and obtain special guidance and permit from Government Harbour Master.

PILOTAGE: Harbour pilotage is performed by Government Pilots. The Harbour Pilot will board a vessel at anchorage for berthing or immediately on arrival at Buoy No. 22 when berth is available.

Harbour Pilot Area is:
Lat. 01° 44′ 00″ N., Long. 101° 22′ 50″ E.
Lat. 01° 44′ 00″ N., Long. 101° 26′ 50″ E.
Lat. 01° 42′ 35″ N., Long. 101° 30′ 00″ E.
Lat. 01° 40′ 00″ N., Long. 101° 30′ 00″ E.

Sea Pilots: Sea piloting for the Rupat and Bengkalis Straits is provided by the Department of Sea Communication.

According to the Dumai Port Authority's letter dated June 25, 1974, there are 2 piloting areas for Sea Pilot.

1. Bengkalis Strait and Rupat Strait from Fairway Buoy or Eastern part of Morong Strait to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.).
2. Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area.

Pilotage is compulsory for vessels with a capacity exceeding 105 g.r.t.

6 hours prior to arrival Dumai Harbour area, all vessels should contact CPI through VHF Radio Channels 10 or 16 and 69. At Fairway Buoy all vessels should hoist International Code Flag "I require a Pilot" and contact Morong Pilot Station via Channel 16 for a "request for Pilot".

According to the Dumai Port Authority's memo dated May, 1972, effective on 1st June, 1972, all vessels proceeding to Dumai should hoist the International code flags "H" or "PT" when passing Buoy No. 17 as "requesting for Pilot" and call CPI's radio telephone (VHF) on Channel 12. You will be informed whether or not Pilots are available, if not you may then proceed directly to Dumai Harbour Anchorage Area.

The practice of berthing and unberthing vessels utilising CPI Mooring Masters has been discontinued.

Shipmaster's Report: 1977. Sea pilotage for the Rupat and Bengkalis Straits is now compulsory. The Sea Pilot will board vessels at Fairway Buoy, position Lat. 01° 54.5′ N., Long. 101° 51.5′ E.

Contact with the pilot station "Morong" is allowed on Channel 16.

In case the Pilot is not available, the recommended anchorage area is 0.5 miles N.N.E. from Fairway Buoy.

ANCHORAGE: The Dumai general anchorage area is North and West of oil wharves. Minimum depth of water in this area 43 ft.; 35 ft. shoal spot to East of general anchorage should be noticed. Holding ground in anchorages considered good, bottom clay. Area large with sufficient manoeuvring and swinging room for several vessels of size to be accommodated at oil wharves.

If vessels are not met by the Pilot's launch on arrival, or not instructed by the Dumai Port Control Radio to berth on arrival, it is suggested that they proceed to the recommended anchorage area.

Cargo Ships:		
	Lat. 01° 43′ 20″ N.	Lat. 01° 42′ 50″ N.
	Long. 101° 25′ 30″ E.	Long. 101° 27′ 00″ E.
	Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 10″ N.
	Long. 101° 25′ 30″ E.	Long. 101° 27′ 00″ E.
Ballasted Tankers:		
	Lat. 01° 44′ 20″ N.	Lat. 01° 43′ 34″ N.
	Long. 101° 24′ 30″ E.	Long. 101° 27′ 00″ E.
	Lat. 01° 43′ 36″ N.	Lat. 01° 42′ 46″ N.
	Long. 101° 24′ 30″ E.	Long. 101° 27′ 00″ E.
For Deep Draft or Loaded Tankers:		
	Lat. 01° 43′ 34″ N.	Lat. 01° 42′ 46″ N.
	Long. 101° 27′ 00″ E.	Long. 101° 29′ 50″ E.
	Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 00″ N.
	Long. 101° 27′ 00″ E.	Long. 101° 29′ 50″ E.
Prohibited Area:		
	Lat. 01° 42′ 50″ N.	Lat. 01° 42′ 16″ N.
	Long. 101° 27′ 00″ E.	Long. 101° 28′ 46″ E.
	Lat. 01° 41′ 12″ N.	Lat. 01° 40′ 58″ N.
	Long. 101° 27′ 00″ E.	Long. 101° 28′ 46″ E.

MAX. SIZE: Length 315 m., draft 17 m. Vesels over 315 m. have to have a special permit.

Also see "Approaches" and "Shipmaster's Report" dated October, 1983 – "Circular".

RESTRICTIONS: *Requirements for Entering Restricted Maritime Zone of Sumatra:* For some years, the Rupat-Bengkalis Straits area has been designated a Restricted Maritime Zone by decree of the Government of Indonesia.

A partial exemption from the requirement to secure special Indonesian Consular Clearance before entering this Zone has been granted by the Indonesian Navy to tanker vessels proceeding to Dumai from any port in the world except Singapore. Vessels require only normal clearances from their last port to obtain entry at Dumai. Vessels diverted at sea need only normal clearance from last port and the diversion cable. All vessels inbound to Dumai from the time abreast Raleigh Bank Light Buoy until anchored off Dumai Terminal must display the following recognised signals:

By Day: The International Code Flag hoist "CAL" flown from a single hoist from the signal yard.
By Night: A red light 6 ft. above a white light both visible all around the horizon at a distance of not less than 2 miles.

Vessels should be prepared to answer identification queries from Indonesian Naval Patrol Crafts.

The foregoing is subject to change.

RADIO/VHF:

1. *Means of Communications:* The following communication systems are available for vessels proceeding to Dumai:
   - (a) Dumai Radio Call Letters "PKP" (Government Coastal Radio).
   - (b) VHF Station Channel 16 (CPI and Pertamina operated).
   - (c) Telex CPI No. 44386 Jakarta or 56271 Dumai.
   - (d) Telex Pertamina No. 45348 Perta Jakarta or 49285 Perta Jakarta.

2. *ETA Messages:* Vessels proceeding to Dumai shall send ETA Dumai message as follows:

2.1. When proceeding direct from any port other than Palembang and Singapore:

(a) 96 hours prior to arrival at Dumai, transmit ETA Dumai message by vessel's radio to "Calpaking" Dumai and "Pertaminaship" Dumai through Dumai Radio Station Call Letters "PKP".

(b) Should ETA Dumai change by 3 hours, send an amended ETA message immediately to "Calpaking" Dumai and "Pertaminaship" Dumai.

(c) 24 hours before arrival at Dumai, *confirm* or *amend* ETA Dumai to "Calpaking" Dumai and "Pertaminaship" Dumai regardless of any change in last ETA message sent.

2.2. When proceeding from Singapore:

(a) 96 hours prior to arrival at Singapore, cable ETA Dumai and estimated time of stay in Singapore to "Calpaking" Dumai and "Pertaminaship" Dumai. Include words "From Singapore" in ETA message.

(b) At Singapore, when departure time from Singapore is known, *confirm* or *amend* ETA Dumai to "Calpaking" Dumai and "Pertaminaship" Dumai through vessel's Agent in Singapore.

(c) Immediately upon departure from Singapore, and when vessel's radio can be used legally, re-*confirm* or *amend* ETA Dumai to "Calpaking" Dumai and "Pertaminaship" Dumai.

2.3. When proceeding from Palembang:

(a) At Palembang, when departure time from Palembang is known, cable ETA Dumai to "Pertaminaship" Dumai through vessel's agent in Palembang.

(b) Immediately upon departure from Palembang, and when vessel's radio can be used legally, *confirm* or *amend* ETA Dumai to "Pertaminaship" Dumai.

3. *Operating Schedule and Frequencies:* There is a Government Coastal radio station at Dumai. Any message for Dumai Terminal should be sent through this radio station which operates as follows:

Name : Dumai Radio
Call Letters : "PKP"

Time (GMT)	*Transmits*	*Listens On*
0000 – 0030	448 kHz	500 kHz
0400 – 0500	448 kHz	500 kHz
0800 – 0900	448 kHz	500 kHz
1200 – 1300	448 kHz	500 kHz
1300 – 1400	8726 kHz	8726 kHz
0030 – 0130	8726 kHz	8726 kHz
0230 – 0330	13101 kHz	13101 kHz
0630 – 0730	17184 kHz	17184 kHz
0130 – 0200	2182 kHz	2182 kHz

If contact cannot be made with Dumai Radio, contact Singapore Radio, Call Sign "9VG" and forward ETA message to Amoseas Singapore "RS-21349".

4. *Radio Telephone (VHF):* A CPI operated VHF station is maintained 24 hours a day, and is available for information concerning vessel's port activities.

The following channels are available:

Channel 10 with Frequency : 156.500
Channel 16 with Frequency : 156.800
Channel 69 with Frequency : 156.475

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dumai. These signals shall be displayed continuously until Pratique is granted. These signals are: Sunrise to Sunset, Quarantine flag "Q". Sunset to Sunrise, Signal lights (red over white).

Quarantine Officer and Immigration Officer will come on board to prepare the clearance at anchorage, except when the vessel comes alongside on arrival by issuing berthing permit only (not Free Pratique).

TUGS: At present mooring and unmooring assistance is provided by 5 Government 3200 h.p. diesel tugs which are stationed in the immediate vicinity of the wharves. Tugs lines used. While rendering assistance the tugboats are under orders of the Pilot on duty.

BERTHING: Incoming ships are assigned in accordance with time of arrival, product to be loaded, size of vessels, and loaded draft.

Every effort will be made to berth vessels immediately upon arrival, and to this end Master should maintain radio contact with radio telephone (VHF) Channels 12 and 16.

At Dumai there are 8 wharves. 2 wharves are Government-owned and operated cargo wharves. One wharf is Pertamina owned and consists of 2 berths. A new wharf is Pertamina owned and consists of 4 berths. The other 4 wharves are C.P.I. owned and operated and referred to as Oil Wharf No. 1, Oil Wharf No. 2, Oil Wharf No. 3, and Oil Wharf No. 4. These C.P.I. wharves are utilised for loading/unloading of crude oil. These oil wharves are equipped with docking sonar for monitoring speed and distance of approaching vessels to be berthed at the wharves.

Terminal Official will relay the indicated speed and distance by walkie-talkie radio to the Pilot or Master on board vessel.

(a) C.P.I. Oil Wharf No. 1, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 28′ 07″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,210 ft. Least depth at face of wharf 61 ft. (MLWS). In terms of vessel's size and design this would be an LOA of approx. 1,008 ft., and a draft of 57 ft. Orientation of the wharf parallels the current flow.

(b) C.P.I. Oil Wharf No. 2, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 52″ E. Design capacity 150,000 d.w.t. Length between outer dolphins 1,424 ft. 8 in. Least depth at face of wharf 59 ft. (LWS). In terms of vessel's size and design this would be an LOA of approx. 1,263 ft., and a draft of 55 ft. Orientation of the wharf parallels the current flow. Under certain circumstances in favourable weather conditions, slack tide during day time, this wharf is capable of receiving a VLCC with special arrangements.

(c) C.P.I. Oil Wharf No. 3, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 42″ E. Design capacity 100,000 d.w.t. Length between outer dolphins 1,170 ft. In terms of vessel's size and design this would be an LOA of approx. 940 ft. and a draft of 54 ft. Orientation of the wharf parallels the current flow at 095° – 275° true.

(d) C.P.I. Oil Wharf No. 4, located in approximate position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 31″ E.

Design capacity	: 55,000 d.w.t.
Length between outer dolphins	: 1,005 ft. 6 in.
Least depth at face of wharf	: 51 ft. (LWS)

Orientation of the wharf parallels the current flow.

(e) Government Cargo Wharf No. 2, located in approx. position: Lat. 01° 41′ 14″ N., Long. 101° 27′ 04″ E. Design capacity 16,500 d.w.t. but able to handle 23,000 d.w.t. Length between outer dolphins 750 ft. Least depth at wharf face 34 ft. (LWS). Orientation of the wharf parallels the current flow. Only mobile cranes with a maximum lifting capacity of 5 tons are available. As no heavy lift floating crane or stationary crane is available, heavy lifts must be handled by ship's gear.

(f) Government Cargo Wharf No. 1, located next to Cargo Wharf No. 1, has designed capacity of 10,000 d.w.t.

(g) Pertamina Wharf Nos. 1 – 6.

1. Approximate Location:
   Berth Nos. 1 – 2: Lat. 01° 41′ 12″ N., Long. 101° 28′ 16″ E.
   Berth Nos. 3 – 6: Lat. 01° 41′ 12″ N., Long. 101° 28′ 39″ E.
2. All 6 berths are utilised for loading/unloading refined products, residue, Coke (Berth No. 4 only) and LPG.
3. Design Capacity:

Berth No.	*Max. d.w.t.*	*LOA* (m.)	*Draft* (m.)	*Least Depth at face of wharf at LWS* (m.)
1	100,000	275	17.0	18
2	10,000	125	14.0	15
3	35,000	208	10.6	16
4	25,000	194	10.3	15
5	35,000	208	10.6	16
6	3,000	109	6.0	15

4. Orientation of the berths parallel to the current flow.
5. Put into service:
   Berth Nos. 1 – 2 in 1971, Berth Nos. 3 – 6 in 1984.
6. Wharf Facilities:

Berth No.	*No. of Chiksans*	*Size* (in.)	*Capacity*	*Bunker*	*Fresh Water*	*Deballast Facility*
1	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	16	2,500 l.t.p.h.			
	1	8	600 l.t.p.h.			
2	1	12	1,200 l.t.p.h.	N/A	N/A	N/A
	1	8	600 l.t.p.h.			
3	3	12	1,500 l.t.p.h.	N/A	Available	N/A
4	1	—	600 t.p.h.	N/A	Available	N/A
			500 t.p.h. (coke)			
5	3	12	1,500 l.t.p.h.	N/A	Available	N/A
6	1	4	280 cu.m./hr.	N/A	Available	N/A

Notes: Berth Nos. 1 and 2:

Terminal: Also known as Putritujuh (Seven Sisters), Pertamina Terminal (Berth Nos. 1 and 2) consists of a finger shaped oil jetty with 2 loading berths (Outer and Inner) which are utilised for refined products. A barge pier lies immediately Westward of the oil jetty. All are owned and operated by Pertamina.

At the Outer Berth (Berth No. 1) 3,200 h.p. tugs are being used to berth/unberth vessels at any time and any stage of the tide by using the minimum vessels' engine and working in "lock" position nosing vessel at forward, midship and aft. Mooring boats assist in bringing lines to mooring dolphins. Head and stern lines are sent first.

The Jetty is a steel/concrete piling system with a concrete slab paving. The fendering is very efficient and in good condition and consists of 4 steel framed pads with springs and rubber bumpers chained to the jetty. Ordinary mooring equipment (ropes and/or wires) is requested from the vessel. No shore moorings are provided. Minimum vessel size for this berth is 13,000 d.w.t.

At the Inner Berth (Berth No. 2) mooring and unmooring is restricted to tide flooding current (Eastward), vessels always to berth with starboard side to 2 fendering pads similar to those at the Outer Berth ensure a good berthing. Vessels to provide only the ordinary mooring equipment existing on board. No additional moorings are provided by shore.

(h) General Wharves

Berth	*Length* (m.)	*Width of Apron* (m.)	*Depth* (m.)
Barges Wharf	40	16	9.0
Pilot Wharf	34	6	7.0
Domestic Wharf	60	6	6.0
Domestic Wharf	40	7	6.0
Palm Oil Dolphin	To be completed 1988		12.0

CARGO: There are 4 types of cargo in Dumai at C.P.I. Terminal.

1. Sumatra Light Crude with API gravity 36° approximate. Pour point ±90°F. Solid point ±85°F.
2. Duri Crude with API gravity 22° approximate. Pour point ±60°F. Solid point ±55°F.
3. Pedada Crude. This crude is classified as Sumatran Light Crude.
4. Sumatran Medium Crude (SMC) with API gravity 34.5°. Pour point ±95°F. Solid point ±90°F.

LOADING: The Master or his representative is required to hand to C.P.I. within normal business hours a written Notice of Readiness to load.

C.P.I. Oil Wharf	*Size of arms* (in.)	*No. of arms*	*Size of flanges* (in.)	*Sumatra Light and Medium Crude Peak Capacity*	*Average Capacity*
No. 1	12	4	12	50,000	35,000
No. 2	16 – 12	3	12	75,000	40,000
No. 3	12	4	12	50,000	35,000
No. 4	12	2	12	25,000	15,000

All the loading arms flanges are designed to U.S. standard flanges, faced and drilled. All these wharves have chiksan loading arms. The above peak and average capacity rates are for Sumatran Light and Medium Crudes. For Duri crude the above rate should be reduced to approximately 70%.

In case of low stock position, the average capacity may be reduced to approximately 50%.

Responsibility for Loading Arrangements: All operations in connection with the starting of loading, discharging, switching of tanks and topping off must be directly and personally supervised by a ship's Officer, and sufficient personnel should be on deck at all times to handle the loading and/or unloading operation.

Upon completion of loading and/or unloading, the vessel will be required to leave the wharf immediately after disconnecting hoses to await clearance at the anchorage.

Hose Handling: Wharf crews are on duty to handle loading arms and/or oil hoses on the wharf. Any required reducers and/or elbows to be fixed to ship's manifolds should be handled by ship's personnel (will not be handled by CPI personnel).

Cargo Loading Procedures: Before the loading is begun, the Master will assure that Terminal and Port Regulations pertaining to readiness of the vessel have been complied with; that the vessel is manned and in all respects ready to receive cargo, and that all precautions required by the circumstances have been taken. When the vessel is in all respects ready, the following loading procedure will apply:

(a) The chiksan arms and/or cargo hoses will be swung on board by lifting gear located on the wharves and also with the assistance of the vessel's gear if required.

The required reducers and elbows to fit vessel's manifold must be connected and disconnected and taken from or to shore by ship's personnel.

(b) Notice must be given by the vessel to the Head Wharfman 90 minutes before the vessel completed deballasting.

(c) Loading will commence under gravity or with 1 pump. When the vessel advises that the cargo is flowing into tanks, the loading rate will gradually be increased until the desired rate has been reached.

(d) The vessel must give 30 minutes notice to the wharf before starting to "top off", and shall advise if a decrease in loading rate is desired.

(e) The vessel must give 15 minutes' notice to the wharf prior to completion of loading at which time the Head Wharfman may reduce to 1 pump.

(f) Ship's valves shall not be closed against loading pump pressure.

(g) On completion of loading, loading arms and/or cargo hoses must be drained and disconnected immediately.

(h) All cargo tanks openings and pressure vacuum relief valves must be closed immediately after ullages and samples have been taken.

The vessel will be unmoored immediately after completion of loading as tide and weather condition permit.

Suspension of Oil Handling Operations: Terminal personnel are authorised to suspend oil handling operations in the event any of the safety rules mentioned under "Safety Regulations" are not observed, or in the event of non-compliance with safety rules generally observed by competent tanker personnel. Oil handling operations may also be suspended if any other danger is believed to exist.

Oil Inspectors: There is no independent agency providing oil inspection service at Dumai.

Vessel's Gangways: Vessels shall supply safe gangway from ship to shore, which shall be adequately illuminated during the hours of darkness.

BALLAST: *Pollution of Sea by Oil:* The discharge of dirty ballast within the territorial waters of Dumai Port and entrance passage (Rupat and Bengkalis Straits) is strictly prohibited. Shore facilities for disposal of dirty oily ballast water is available at Dumai, however only for domestic tankers. For safe manoeuvring purposes, it is therefore compulsory that tankers arrive with sufficient clean ballast water on board to meet the requirement for minimum safe manoeuvring draft. All ballast water on board tankers other than domestic tankers loading at Dumai Wharves must be pumped overboard after arrival at berth and prior to loading. If after arriving alongside, a vessel is found to have dirty ballast water on board, such vessel will be sent to sea to accomplish the necessary tank cleaning. Such action will be on the vessel's expense and C.P.I. will not accept responsibility for the resulting delay to the vessel or any claims of the result thereof. A new Notice of Readiness to load must therefore be tendered. "Load-on-Top" procedure is expected to be carried out by each vessel loading at Dumai.

Ballast Requirements: Vessels should arrive with sufficient clean ballast water to enable safe manoeuvring under prevailing weather conditions. The accepted standard of deballasting time is 6 hours.

Deballasting Facility: Deballasting facilities have been constructed in Dumai and connected to all 4 C.P.I. Wharves.

However, this facility is only for domestic sailing tankers. Oceangoing tankers are expected to arrive with sufficient clean ballast water.

Minimum Draft: Minimum draft schedule recommended for various tonnage tankers are as follows:

d.w.t	*Forward*	*Aft*
a. 12,000 – 22,000	12 ft.	20 ft.
b. 22,000 – 32,000	16 ft.	24 ft.
c. 32,000 – 45,000	18 ft.	26 ft.
d. 45,000 – 60,000	19 ft.	27 ft.
e. 60,000 and over	22 ft.	28 ft.

The above is a recommendation only and the Master should use his own discretion in order to have safe manoeuvrable draft on arrival and while berthing.

READINESS: *Notice of Readiness:* The Master or his representative is required to hand to C.P.I. or its Agent at loading port, a written Notice of Readiness to load during business hours (24 hours everyday). Receipt of such Notice of Readiness by C.P.I. does not necessarily imply acceptance.

Every effort will be made to berth and load vessels on arrival in port.

Arrival means anchoring or arrival at anchorage area in Dumai Harbour, see "Anchorage".

Readiness to Load or Unload: The following will apply in regard to Notice of Readiness to Load or Unload.

Notice of Readiness to Load or Unload is a warranty on the part of the Master that the vessel is in all respects ready to load or unload and that all tanks, pumps, pipe-lines and appurtenances of the vessel are fit to receive the cargo to be loaded or unloaded.

STEVEDORES: ETA should be sent to Agency or stevedoring company 2 days before arrival in order that necessary gangs may be arranged. Main commodity rates: Palm oil 200 tonnes/p.h. Sawn timber 25 cu.m.p.h. and bagged cargo 20 – 25 t.p.h.

CRANES: 1×13 tonnes. 1×18 tonnes used for small ships and barges.

FRESH WATER: Fresh water is available in limited quantities at all wharves. A request statement must be submitted to the Port Authority through the vessel's Agent.

FUEL: Not available.

MEDICAL: The Port Health Doctor has only limited facilities for medical treatment. If the services of more complete and/or specialised medical assistance are needed or emergency cases arise on board tankers calling at Dumai, the Port Health Doctor might refer such cases to C.P.I. hospital facilities or Pertamina Hospital. Dental facilities available. However, Masters of all vessels bound for Dumai are requested, if possible, to call at Singapore for medical assistance.

DENSITY: 1020.

FIRE PRECAUTIONS: Perumpel I Dumai Co., Tel: 2469. Caltex, Tel: 261. Pertamina, Tel: 272.

REPAIRS: No repairs shall be carried out to the main propulsion machinery and/or essential auxiliaries while alongside. The vessel's main propulsion machinery shall be in readiness for instantaneous use on short notice. No repair facilities ashore.

CUSTOMS: Ships' bonded stores will be sealed by the Indonesian Customs Officials on arrival and will remain sealed until the vessels leave Indonesian waters.

GANGWAY/DECK WATCHMEN: Strongly suggest that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated.

OPENING/CLOSING HATCHES: By stevedores.

CARGO GEAR:

Forklifts:	3×2 tonnes.
	2×3 tonnes.
	1×5.5 tonnes.
Head Truck:	2×40 tonnes.
Trailers:	2×40 tonnes.
	4×20 tonnes.
Top Loader:	1×40 tonnes.

AIRPORT: Distance to airport 10 km. Jakarta: 3 flights weekly served by Merpati Pelita. Medan: 4 flights weekly served by Merpati Pelita. Batam: 3 flights weekly served by Merpati Pelita.

TIME: GMT plus 7 hours all year round.

REPATRIATION: Due to transportation difficulties and shortage of accommodation, normally no crew members from any vessel are allowed to disembark for repatriation purposes.

In emergency cases such as sickness and accident, however, C.P.I. may at its own discretion and upon request of the Master of the vessel concerned, assist in the repatriation process.

SHORE LEAVE: Shore liberty may normally be granted to ship's Officers and crew after clearance of the vessel by Harbour Authorities. Personnel proceeding on shore liberty should be provided with ship's pass and advised that the C.P.I. compound is out of bounds with the exception of the road from the wharves to the village road. Penalties imposed for violation of Harbour Regulations or local laws have been severe and C.P.I. can not intervene in such cases.

PROVISIONS: There are very limited facilities to handle ship's laundry and supply ship's provisions.

CONSULS: There are no Consuls or other foreign Government Representatives located at Dumai, or in the immediate vicinity.

HOLIDAYS: 12 religious and national holidays.

POLICE/AMBULANCE/FIRE: Tel: 21351 or 381 or 266.

EMERGENCY CO-ORDINATION CENTRE: Tel: 21437 (Coast Guard).

BANKS: 5 National Banks Available.

STORING: See "Prelims".

1. Vessel can be stored by truck.
2. Shipmaster to inform Agency who will contact Ieveransir Company.
3. Distance 4 km.
4. Yes.
5. Contact Agent.
6. Riggers can be employed to assist with storing.

IDENTIFICATION CARDS: I.D. Cards and passports required.

WEATHER: *Tides and Currents:* The tide rise is approximately 8 ft. in the springs and approximately 5 ft. at neaps.

Max. tide currents: Flooding Easterly at 3 knots. Ebbing Westerly at 2 knots.

The general direction of the current is parallel to the faces of the wharves. There is no slack current period in the Rupat Strait during Spring tides and only a very brief period of slack current during neap tides. The current reverses its direction almost immediately. Vessels will always be berthed stemming the current flow.

Winds: The N.E. monsoon is never very steady but is most constant in January when from 20 to 40 per cent of winds are N.E. In November and December N.E. winds are the most frequent. In February the most frequent winds are N.E. The S.W. monsoon begins in late May or early June. From June to September winds in the straits are mainly S.E. but not steady. At this season squalls known as "Sumatra's" occur off the coast; they are most frequent between 2200 and 0200 hrs.

Rain: The rainfall is heavy with yearly average from 80 to 100 inches. The wettest months are October to December or January. There are 2 comparatively dry seasons, February to March and June to August. The most intense rainfalls are in the afternoon but these heavy downpours are often short in duration. The duration of the rain is more evenly spread over 24 hours during the N.E. monsoon than during the rest of the year when rain most likely occurs in the evening and night.

Temperature: The average temperature is a little below 80°. The range in an average year is only 30°, between 65° and 95°. The daily range is from 15° to 20°. The humidity is high (70% – 90%).

SAFETY: While alongside, vessels must have the eye of towing (fire) wires lowered to the water's edge from offshore bow and quarter for emergency use. The eye of the wire should be painted white.

Emergency Facilities: The following shore fire fighting facilities are available at each wharf to assist a vessel in the initial stages of a fire at wharf.

(a) C.P.I. Oil Wharf Nos. 1 – 4:

1 fire pump capacity 750 g.p.m.
1 fire fighting monitor.
6 fire hydrants.
2 fog spray hydrants.
2 revolving nozzles underneath wharf.
1,000 ft. fire hoses of 2.5 in.
16 cans foam compound.
6×20 lbs. safety meter dry chemical powder.
1 set booster hose.
1 set foam equipment.
2×150 lbs. Yamato dry chemical powder fire extinguisher.

(b) Tugboats: Under instructions of Port Authority, equipped with fire fighting equipment and remote controlled nozzles.

Emergency Signal:

(a) The ship should sound an emergency station's signal consisting of a continuous ringing of the ship's alarm bells supplemented by a series of short blasts of the ship's whistle or siren. C.P.I. will then take such action as is necessary.

(b) A telephone is fitted on each wharf. C.P.I. personnel should be telephoned for assistance.

If no C.P.I. personnel are available, ship's personnel may call for emergency assistance by dialing telephone number 222 from each wharf.

After dialing state the following:

1. Your name and name of vessel.
2. The exact location of the fire.
3. The nature of the fire if possible.

(c) Assistance can be summoned on VHF Radio if necessary. Use International Channel 12 or 16 on VHF. Given location and extent of assistance required.

(d) Refer to Fire Instructions Pamphlet as usually given to all vessels alongside the wharves.

(e) The shore signal in the event of an emergency is a fire siren or an alarm.

GENERAL: *Charts and Publications:* Masters of vessels proceeding to Dumai should obtain the latest sailing directions, charts and Hydrographic bulletins for the area.

In this respect attention is invited to the latest editions:

(a) U.S. Hydrographic Office Publication 162, Sailing Directions for Malacca Strait, Cape Rachado to Singapore;
(b) U.S. Hydrographic Office Chart No. 3764, Bengkalis and Rupat Straits;
(c) Netherlands Hydrographic Office Chart No. 18 (East Coast of Sumatra);
(d) British Admiralty Chart No. 795 (Cape Rachado to Singapore);
(e) The Indonesian Hydrographic Office Chart No. 18 covering Bengkalis and Rupat Straits.

Boarding on Arrival: A Government Pilot will board vessel on arrival if Wharf is available and will advise and assist in proceeding to wharves. A representative of the ship's Agent will also board the vessel at anchorage or alongside one of the wharves to deliver publications and forms and will make the necessary arrangements for vessel to load.

Port Officials: The Indonesian Government Port Authorities are located in the Government building situated along Jalan Laksamana (Laksamana Street).

General Cargo: General cargo consigned to C.P.I. is handled at the Government Cargo Wharf at Dumai. Only mobile cranes with a maximum lifting capacity of five tons are available. As no heavy lift floating crane or stationery crane is available, heavy lifts must be handled by ship's gear.

Compulsory Sea Pilot Area: Bengkalis Strait and Rupat Strait from Fairway Buoy or Eastern port of Morong Pilot Station to Eastern limit of Dumai Harbour Pilot Area (Long. 101° 30′ 00″ E.).

Other Areas Requiring Sea Pilot: Rupat Strait and Bengkalis Strait from Eastern limit of Dumai Harbour Pilot area (Long. 101° 30′ 00″ E.) to Northern limit of Sungai Pakning Harbour Pilot Area. (Applicable to vessels bound for Sungai Pakning from Dumai or v.v.).

General: While vessels are at anchor, no physical communication is allowed with shore except in emergency cases and/or with prior approval from the Harbour Authorities.

Lowering of ship's boats is prohibited without the prior approval from the Harbour Authorities.

Pilferage has taken place recently on board tankers at Dumai anchorages and wharves. C.P.I. of course regrets this practice, and strongly suggests that all Masters of tankers calling at Dumai maintain a close security watch while at anchor as well as when alongside, the wharves. It is further recommended that on board the tankers unoccupied rooms should be securely locked and port holes closed before being vacated. C.P.I. also wishes to draw all Masters' attention to the practice of trading with local sampans at the anchorage, which is also a fire hazard, and will not be tolerated by C.P.I. C.P.I. request that all possible steps be taken by ship's personnel to keep sampans away from the vessels while alongside, as loading may be stopped until this hazard has been cleared.

It should be noted that Harbour Authorities prohibited the presence of sampans near alongside vessels.

Contraband: The attention of Masters is called to the strict enforcement of Indonesian Regulations against smuggling. Illegal possession or landing of such items as narcotics, liquor, cigarettes, precious stones and metals, fire arms, ammunition, sheath knives and similar weapons, or other articles of contraband is subject to severe penalty and may result in prolonged delay of the vessel concerned.

All precautions must be taken to prevent the violation of contraband laws. C.P.I. employees are prohibited from bringing firearms, knives, liquor, cigarettes, food stuffs or other articles ashore and shipboard personnel must not offer such items to them. Commissions for the importation of goods from other countries are not to be solicited or accepted.

Compliance: Masters are requested to inform ship's Officers and crews of the foregoing regulations pertaining to contraband, shore liberty, etc., to assure that they are completely understood, and to require the full compliance of all hands.

DEVELOPMENTS: 1 new berth for palm oil under construction, also 3 berths for sawn timber, fertiliser, palm kernels, rubber and general cargo.

SHIPMASTER'S REPORT: October, 1983.

Documents: 14 Crew Lists required and all ship's personnel require passes. Immigration stamp all discharge books and/or passports on arrival and Agent will take them ashore about 1 hour before unberthing for stamping again, when all passes also returned.

Pertamina, as vessel's Agents, have own forms for N.O.R., and Dry Certificates.

Cargo Inspector has his own forms.

Berthing: Vessel (140,000 d.w.t.) berthed at No. 2 Berth, stemming the tide. 3 tugs used, 1 forward, 1 aft and 1 midships with tugs' lines. Moorings 3, 3, 2 each end. Forward headlines first then breasts then springs and aft springs first, then breasts then sternlines. 2 watchmen on board all the time and they are very efficient.

After loading and if on maximum permissible draft, (see "Circular") then vessel unberths and anchors off berth to await HW.

Density: Density varied between 1008 and 1015 depending on state of tide.

Services: Ship Chandler will arrange for a barber to come on board and will also bring on board items for sale such as batik.

A telex message sent through the Agents took 51 hours to reach Singapore.

Identification Cards: All visitors to vessel require a pass issued by Texaco. Also see "Documents".

Circular: To All Agency Tankers Calling at Port of Dumai:

Based on the circular of Dumai Harbour Master dated 14th January, 1982, Ref. No. S.DMI.AL.14/1/1982 regarding the draft limitation for vessels passing Dumai-Morong route, based on the result of the survey carried out by the Sea Communication Team, we herewith inform you that for the sake of your vessel's safety, your vessel's draft should not be more than 17 m. (max. LOA 315 m.) when passing the above mentioned route. Please be advised too, that you are recommended to pass this route during the high tide only.

Hoping you to pay your attention, we remain.

Dumai, 20th January, 1982,
Pertamina of Shipping Dumai.

AGENCY: *General Agency:* All foreign flag vessels loading crude oil in Indonesia must appoint Pertamina (State Oil Company) as their General Agent. The letter of Agency appointment must be legalized by the Indonesian Embassy or Consulate in the country of the party making such appointment. Owner/Charterer to cover disbursements of harbour dues, cash advances for crew, and any tax as applicable to vessel Owner/Charterer under the Indonesian tax regulations.

The addresses of Pertamina Shipping Directorate are as follows:

(a) Pertamina Direktorat Perkapalan dan Telekomunikasi, Jalan Jos Sudarso No. 32 – 34 Tanjong Priok Jakarta, Indonesia. Cable address: Pertaminaship Jakarta (Via Jakarta Coastal Radio "PKI-2"). Telex numbers: 49285/49221/49396 Perta Jakarta. Mailing address: P.O.Box 327.

(b) Pertamina Biro Operasi Tanker/Agency Pertaminaship, Jln. Merdeka Timur No.1, Lantai 6, Jakarta Pusat, Indonesia. Telex numbers: 45348 Perta JKT and 44450 Perta IA.

(c) Pertamina Direktorat Perkapalan dan Telekomunikasi, Perwakilan Dumai, Jala Datuk Laksamana, Dumai, Indonesia. Cable address: Pertaminaship Dumai (Via Radio Station "PKP").

AUTHORITY: Port Administration of Dumai, JL. Datuk Laksamana, Dumai. *Tel:* 21469, 21369, 21325, 21442. *Telex:* 56290. *Cables:* Adpel Dum. *Contact:* H. Simanjuntak, Port Administrator. Tel: 21162.

Note: Pilot Station, 21442-278-372, contact 24 hours.

C.P.I.: 434-261-278. Pertamina: 272-372.

P. T. Caltex Pacific Indonesia. (Head Office), Kebon Sirih 52, Jakarta, Java. *Tel:* 376908. *Telex:* 44386 Caltex IA. *Cables:* Calpacem, Jakarta.

Operating Office: Rumbai, Pekanbaru, Sumatra. *Tel:* 21377. *Telex:* 56112 Caltex PBR, 56271 Caltex DUM (Dumai Terminal Office). *Cables:* Calpacem Pekanbaru.

GEBE ISLAND: 00.03 S. 129.23 E. (See Plan)

LOCATION: Port of Gebe Island is situated in the Halmahera Sea, North Maluku in position Lat. 00° 03′ 50″ S., Long. 129° 22′ 44″ E.

DOCUMENTS: *Documents to be produced upon vessel's arrival:*

14 copies Crew List.
12 copies Passengers List.
5 copies Parcel List.
5 copies Store List.
8 copies Cargo Manifest.
5 copies Narcotic List.
8 copies General Information.
5 copies Personnel Effects List.
5 copies Vaccination List.
5 copies Fire Arms & Ammunition List.
International Load Line Certificate.
Maritime Declaration of Health Certificate.
Derat Certificate.
Last Port Clearance.
Safety Radio Certificate.
Harbour Report.

Ship's Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel has been granted Free Pratique, the Immigration Officer starts checking passports, seamen's book and crew list and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Gebe Island.

Use of ship's radio transmitter is prohibited while lying in port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

PILOTAGE: Pilotage is compulsory and there is a Pilot at Gebe Island.

Pilot boarding position: Lat. 00° 03′ 25″ S., Long. 129° 22′ 10″ E.

ANCHORAGE: Anchorage position for ore loading at Gebe Island is Lat. 00° 03′ 50″ S., Long. 129° 22′ 30″ E. Depth 65 m. LWS.

Chart: Indonesian Sea Chart No. 388.

RESTRICTIONS: Vessels may berth/unberth at any time between 0600 hrs. and 1800 hrs. local time.

Vessel may leave the loading point between 0600 hrs. and 2200 hrs.

RADIO: Cables to Adhiguna, Antam Jakarta and Ternate can be sent through Jakarta Coastal Radio Station, call sign PKE and Ternate Coastal Radio Station, call sign PKE 5.

Arrival Notice: *Owner's Advice:* Owner to advise by cable to Adhiguna and Antam Jakarta and Antam Ternate at least 8 working days notice of vessel's ETA at loading port.

Master's Advice: At least 48 hours before vessels arrival at Gebe Island, Master shall give the following information to Adhiguna and Antam Jakarta and Antam Ternate: Last port of call, draft on arrival, estimated draft on departure, quantity of nickel ore to be loaded, stowage plan, quantity and kind of commodity to be discharged and other necessary information.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience has shown that one cannot rely on telegrams regarding ETA sent by Agents at last port of call to arrive on time, therefore Antam Ternate will wait for the Master's telegram before making the necessary preparations.

TUGS: Available.

CARGO HANDLING:

Lighters: A number of lighters of 120 d.w.t. to 900 d.w.t. are available.

Wharves: No facilities.

Loading/Unloading Facilities for General Cargo: No facilities.

Loading Facilities for Ore Carriers: Loading of nickel ore at Gebe loading point is done by means of ore barges.

Number of Gangs: 4 gangs are usually used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading Capacity: About 2,000 tons/24 hours per vessel depending on the type of vessel, vessel's cargo gear, weather conditions, etc.

Ore Carriers: All types of fully loaded draft ore carriers are acceptable. (Steep bottom sea around the loading point).

Vessels without cranes or derricks are not acceptable.

Minimum capacity of cranes or derricks must be 5 tons.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Stevedoring to be performed by P.T. Antam's personnel. Loading/unloading equipment to be furnished by the vessel.

Working Hours: (WWD SHINC) Loading to be effected on weather working days of 24 consecutive hours, Sundays and holidays included (WWD SHINC), but the following National holidays are excepted:

New Year, Idul Fitri, Idul Adha, Maulid Day, Easter, Independence Day (17th August), Christmas Day (25th December), Waisyak, Nyepi, Ascencion Day, Miradz, The First Muharam.

Despatch/Demurrage money to be paid in accordance with the related contract.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's crew members.

MEDICAL: Hospital, doctor and inoculations are available.

FRESH WATER: Not available.

FUEL: Not available.

TIME: GMT plus 9 hours.

HOLIDAYS: See "Stevedores".

AIRPORT: There are 3 flights per week between Ternate and Gebe served by chartered aeroplane. Flying time is about 60 minutes.

REPATRIATION: Can be arranged. Repatriate/s is/are to be guarded by Immigration Officer from Gebe to Jakarta via Ternate or Manado until his departure from Jakarta to the destined country.

CONSULS: None.

SHORE LEAVE: Shore pass must be carried by the crew during shore visit.

Invitation: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Leaving for Ternate: The crew members are prohibited to leave Gebe for Ternate, except Master and Officers who must be guided by Agents.

Local leave in Gebe is permitted as a concession.

Shore Leave Time: From 0600 hrs. to 1700 hrs. local time.

GENERAL: *Priority:* Ore carriers first come first served.

Flags to be flown by incoming vessels: Vessel's National flag, Indonesian flag, Vessel's numbers, Quarantine & Immigration flag.

Ship Chandler: None. In emergency cases, for a limited quantity, Agents can act as ship's chandler.

Fumigation: No facilities.

Vessel's Disbursement Accounts: All vessel's expenses/disbursement accounts will be charged to the related principals through the General Agents.

Local Currency: Exchange rate used in vessel's disbursement account: US $1.00=Rupiah 950.

Cash in Rupiah: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Although the port was built and owned by PT Aneka Tambang, a state mining enterprise which has been granted the concession to explore and exploit Nickel Ore at Gebe Island region, the port of Gebe Island is supervised by the government. This port has been declared a Special Nickel Ore port.

AGENCY: 1. General Agent for ore carriers:

PT Bahtera Adhiguna Jakarta, Jln. Kali Besar Timur No. 10-12, Jakarta Kota. Cable address: Adhiguna Jkt. Telex: Adhiguna Jkt. 42854. Tel: 676547, 672613.

2. General Agent for non ore carriers: To be nominated by Principals.

3. Sub Agents:

PT Aneka Tambang, Unit Pertambangan Nikel Pulau Gebe, Jln. Mangga Dua, P.O.Box 37, Ternate. Telex: 73153 Antam Ttia. Cable address: Antam Ternate. Tel: 21737.

4. Sub Agent's Head Office:

PT Aneka Tambang, Jalan Bungur Besar 24-26, P.O.Box 3513, Jakarta, Indonesia. Cable address: Aneka Tambang, Jakarta. Telex: Antam Jkt 49147. Tel: 410108

GRESIK: 07.09 S. 112.40 E.

BERTHING: Main jetty with length 284.5 m. and berthing dolphin 50 m. from jetty. Depth of water 15 m. Vessels up to 30,000 d.w.t. able to berth off seaward side and 10,000 d.w.t. on shore side.

CARGO FACILITIES: *Discharge Facilities:* 15 ton grab Kangaroo crane with normal operating capacity of 300 t.p.h. and max. 550 t.p.h.

Multi-purpose conveyor to transport materials from the jetty to TSP plant – 600 t.p.h. capacity.

Pumping system for phosphoric acid from vessel to TSP plant tanks, complete with pump – 300 t.p.h. capacity.

Pumping system for ammonia –33°C from vessel to TSP plant complete with pump – 150 t.p.h. capacity.

FRESH WATER: Available.

SHIPMASTER'S REPORT: July 1984.

Location: Lat. 07° 08.4′ S., Long. 112° 39.6′ E., about 4.8 nautical miles N.W. of Sourabaja.

Documents:

Ship's Register.
Derat Certificate.
Load Line Certificate.
Radiotelegraphy Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Seamen's Books.

These documents will be kept ashore during the vessel's stay at Gresik.

For Gresik:
2 Crew Lists.
2 Store Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
1 Cargo Manifest and/or 1 Bill of Lading.

In addition for Sourabaja:
9 Crew Lists.
2 Store Lists.
2 Crew's Declaration Lists.
1 Maritime Declaration of Health.
1 Vaccination List.
2 Cargo Manifests and/or 2 Bills of Lading.

Customs: The Customs will not seal the bonded stores, but strictly controls the said quantity of narcotics.

Pilotage: Compulsory, same Pilots as for Sourabaja. ETA to be sent at least 24 hours in advance. Normally the Pilot boards the vessel when passing the Karang Jamuang Island (pilot station), but if required, specially for deep draft vessels, the Pilot will board the vessel at the Outer Anchorage.

Anchorage: Position Lat. 06° 51′ S., Long. 112° 45′ E., depth of water between 35 m. and 40 m.

Gresik Anchorage: Position: Lat. 07° 05.7′ S., 112° 39.8′ E., 2.5 cables off the Petro Kimia Jetty. Sandy ground, no safe anchorage.

Restrictions: Maximum depth of water 33 ft. Maximum breadth of channel: 90 m. Official allowed sea water draft 32 ft., but Pilots accept 32 ft. 06 in.

Berth: Petro Kimia Jetty (private berth). Length of berth 320 m. approx., equipped with large rubber fenders every 40 m. Depth of water between 12 m. and 15 m. Height of tide about 2.5 m.

VHF: Call "Sourabaja Pilots" on Channel 12 or Channel 16 if no reply.

If vessel enters the channel without Pilot, a second call before passing Buoy No. 5 is required.

Tugs: Same tugs as for Sourabaja.

Vessel with a length of more than 150 m. has to take 3 tugs, (one of them only for stand by).

Cranes: 2 cranes, but only one used for discharging sulphur. This crane has a discharging capacity of 300 tonnes/hr.

Working Hours: Day and night, even during "Ramadan".

Times: 0800 – 1200
1300 – 1800
1900 – 2400
0100 – 0600

Fresh Water: Available from the jetty.

Fuel: Available by barge at Sourabaja Anchorage only.

Repairs: From Sourabaja.

Medical: In Sourabaja only.

Shore Passes: Given by Agent, to be returned before departure.

General: No Immigration and Port Health board the vessel at this berth. No foreign currency declaration necessary. Crew changes not allowed.

AUTHORITY: Harbour Master.

JAKARTA (Tanjung Priok): 06.10 S. 106.50 E.

(See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Vaccination Certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.

Ship's Arrival and Departure: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services. The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Before departure, port clearance is issued by the Harbour Master, after clearance has been obtained from Customs, the Port Health Service, and Immigration.

Ship's Certificate: The Ship's Certificate should be delivered to the Harbour Master through the Agent. This certificate will be returned to the Ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's manifest should be delivered to the Port Administrator through the Agent.

IMMIGRATION: Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Compulsory. Pilots will board the vessel at the Outer Anchorage, from 0800 – 1800 hrs.

The ship's Owner/Agent has to inform the Port Administration (the Pilotage Division) of the ship's arrival 24 hours in advance.

Walkie-talkie radio with a frequency of 27 MHz is used for communication between the pilot boats and the pilot station.

ANCHORAGE: Anchorage for vessels waiting for the Pilot is outside the breakwater.

RESTRICTIONS: Max. draft is approximately 10 m.

MAX. SIZE:

Harbour	*Length* (m.)	*Draft* (m.)
1st	150	7
2nd	170	8
3rd	170	10
Oil	170	10
Coaster	60	4
Container	400	10

HEALTH:

Quarantine: A vessel is in quarantine and must hoist the quarantine flag (Q, QL, QQ), when it is a vessel:

1. that comes directly from abroad (Q flag),
2. that comes from an infected Indonesian Port (Q flag),
3. that takes passengers or cargo over from vessels mentioned in items (1) and (2) (Q flag),
4. whose Master has declared that a quarantineable disease exists or is suspected on board (QL/QQ).
5. which the Port Medical Officer has declared infected or suspected with a quarantineable disease (QL/QQ).

The concerned vessel is free from quarantine measures when Free Pratique has been obtained. The Free Pratique becomes invalid when a vessel is in quarantine as stated above or a quarantineable disease occurs during the validity of Free Pratique.

The Port of Tanjung Priok is a 1st class Quarantine Port.

At the request of the ship's Owner/Agent, the Department of Health will provide "Provisional Pratique", for vessels calling directly from abroad to any Indonesian port which is not classified as a quarantine port, provided that health conditions on board comply with the required health conditions. This "Provisional Pratique" however does not relieve the vessel from quarantine measures, and it is not to be construed as "Free Pratique".

Accordingly vessels enjoying "Provisional Pratique" are still required to hoist the quarantine flag.

Vaccination/Immunisation: Vaccination and Immunisation against cholera can be carried out by the Port Health Service.

BOARDING AREA: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Outer roads.

RADIO: Coastal Radio Station Call sign PKI Class A1, A2, A3; call sign PKZ Class A3.

VHF:

Harbour Master	Channel 16
Pilot	Channel 12–14
Tugboat Operations	Channel 12
Port Operations	Channel 14
Public Service	Channel 16

TUGS: Tugs are operated by the State-owned P.N. Tunda Bara, Cable address: "Coaltug", which also handle the mooring facilities. Vessels over 80 m. in length have to use at least 1 tug. 10 tugs available from 135 h.p. to 1,500 h.p. 2 tugs are equipped for fire fighting.

BERTHING:

Wharves	*Length* (m.)	*Depth* (m.)
Coaster Harbour	663	3–4
1st Inner Harbour	2,534	5–8
2nd Inner Harbour	1,900

STEVEDORES:

Working hours: The usual working hours at the harbour are:

Monday-Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1330 – 1600 hrs.
Saturday	0800 – 1200 hrs.
	1300 – 1400 hrs.

Overtime is allowed on request.

Shipmaster's Report: Cargo work continuous, 7 days a week. No work for 2 days at the end of Ramadan.

MEDICAL: First Aid at the scene of accident. Medical treatment or advice available on request to the Port Health Service. Hospitalisation available in general and private hospital in Jakarta.

FRESH WATER: Available by pipe-line or barge, rate 50 – 60 t.p.h. Barge capacity 60 – 350 tons.

FUEL: Available by pipe-line or barge, supplier is Pertamina.

REPAIRS: Dry-docking and repairs are carried out by the State-owned P.N. Dock.

Electronic Repair Shop: Repair of electronic navigational aids and radio can be carried out by experts.

Repair and Testing of Navigational Instruments: Carried out by experts of the Hidral (Hydrography of the Indonesian Navy) and those of the P.N. Pelni workshop. Compass can be adjusted by an expert of the above-mentioned Hidral. Testing and issuing of certificates for navigational lamps by the Pelni workshop.

DRY DOCKS: 3 floating docks, max. capacity 17,500 tons, and 7 slipways, max. capacity 3,275 tons.

GANGWAY/DECK WATCHMEN: Available if required.

CUSTOMS ALLOWANCES: Tobacco: Each crew member is allowed to carry 200 cigarettes or 50 cigars or 100 grams of tobacco ashore without paying import duty. Alcohol: There is no allowance for alcoholic drinks. Other commodities: Maximum value of US $100. Each crew member is allowed to bring personal goods in use up to maximum value of US $100.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

SHIP SUPPLY SERVICE:

P.T. Harapan Insani, 25 Jalan Imam Bonjol, Jakarta. Tel: 334-032, 334-084, 334-180, 334-214, 349-971. Telex: 44912 Incate Jkt, 46855 Insani Jkt. Branch: Balikpapan (East Kalimantan).

P.T. Patra Supplies & Services, No. 3 Gedung Patra, Jalan Gatot Subroto, P.O.Box 377/KBY, Jakarta. Tel: 513-955, 511-356. Telex: 44976 Cater Ia. Branches: Balikpapan (East Kalimantan) and Singapore.

P.T. Tata Wisata, Jalan Iskandarsyah Raya No. 1, Kebayoran Baru. Tel: 713-707 (3 lines). Telex: 47331 Tata Ia.

P.T. The First Trijaya, Jalan Tanah Abang II/97, Jakarta. Telex: 45965 Fitric Jkt. Cable: Fitricate.

AIRPORT: Kemayoran International Airport is approximately 8 km. from Tanjung Priok, and Halim International Airport is approximately 25 km. Kemayoran Airport, Tel: 47031.

TIME: The Port of Tanjung Priok is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 105° East Longitude.

POLICE/AMBULANCE/FIRE: Fire 291399; Security 291691/291459; Ambulance 291045/290097.

CREW IDENTIFICATION CARD: Crew members having no passport are required to carry a Seamen Identification Card (S.I.C.).

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

DEVELOPMENTS: Dredging underway. Container berth to be extended by 400 m.

AUTHORITY: Tanjung Priok Port Administration, P.O.Box 98, 9 Jalan Raya Pelabuhan, Jakarta, Indonesia. *Tel:* 492208, 491233. *Telex:* 49282. *Contact:* Port Administrator.

KASIM MARINE TERMINAL: 01.18 S. 131.01 E.

(See Plan)

LOCATION: The terminal is located between the Island of Jef Kasim and the mainland Irian Jaya.

DOCUMENTS:

Certificate of Registry.
Load Line Certificate.
Safety Equipment.
Safety Construction Certificate.
Radio Certificate.
Derat Certificate.
14 Copies Crew Lists.
6 Copies cargo/no cargo declaration by Master
6 Vaccination Lists.
2 Crew Declaration.
2 Stores Lists.

PILOTAGE: Compulsory. Pilot boards in-bound vessels in position 00° 53′ S., 131° 10′ E. Vessels berth and unberth at any stage of the tide during the day.

Accommodation ladder is required. Also see "Anchorage". Vessels must make a lee for Pilot boat in choppy seas.

ANCHORAGES: Recommended anchorage area is 4.5 miles West of Sorong in position 00° 53′ S., 131° 10′ E. Under no circumstances should any vessel enter the restricted area around the structure at Kasim Terminal without a Mooring Master aboard. The area is marked by the dotted lines on the plan. (See "Plan".)

Any vessel arriving in the anchorage area after 1400 hours local time may have to wait in the anchorage area until first light the next morning to transit the Sele Strait to the terminal.

On arrival at anchorage contact "Sorong Control" and Pertamina Sorong Radio on VHF Channel 16 and between hours of 0600 and 1800 contact Kasim Marine Terminal Channel 16.

Note: Terminal Marine Advisors: Ensure that vessels do not anchor within Sorong Port Limits marked on chart. If they do Harbour Master will charge double fee.

It is preferable to anchor just outside the marked area. The anchorage position recommended is outside the harbour area.

RESTRICTIONS:

	Controlling depth (MLW)	*Mean tidal range*	*Velocity of current*	*Nature of bottom*
Entrance:	51 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, mud
Channel:	51 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, hard clay, coral
Anchorage:	120 ft.	Approx. 5 ft.	Max. 7 kt.	Hard clay, sand
Berth:	60 ft.	Approx. 5 ft.	Max. 7 kt.	Sand, hard clay, coral

MAX. SIZE: The channel is swept to a depth of 57 ft. Vessels max. draft is 50 ft. Also see "Berthing".

PRATIQUE: Available night and day. Customs and Immigration board on arrival.

RADIO: *Advice for arrival:* 72 hours prior to arrival at Sorong vessels should advise the Company of their estimated time of arrival by cable sent via "Pertamina's Coastal Radio" Station at Jakarta or Government Radio Station at Sorong. They should also confirm or amend them when they are 48 hours and again 24 hours, distant from Sorong.

Cable address: Pertamina, Unit 5, Sorong.
Cable address: Pertamina – Jakarta.

Name of the station: Pertamina Jakarta Radio. Call signal: PKI-2.

8730 kHz.	AM	0200–0300

The following information should be included in the cable:

(1) Name of vessel and radio call signal.
(2) ETA in GMT and date (local time GMT plus 9 hours).
(3) Cargo requirements.
(4) Deballasting time.
(5) Maximum loading rate.
(6) If there is any sickness on board or clean bill of health.
(7) Flange dimension of vessel's manifold connection.

TUGS: 2 tugs of 45 ton bollard pull each and 2×220 h.p. mooring boats.

BERTHING: Berthing is usually daylight hours but night berthing undertaken if required. It is not unusual to undock with a strong stern tide running.

Kasim Terminal is owned by Pertamina-Petromer Trend. Maximum size of vessel at the berth is, length 1,000 ft., beam 150 ft., and draft 50 ft. Depth of water 60 ft. (LW).

The berth is a standard type of tanker berth with 4 breasting dolphins and a loading platform set back inside the line of breasting dolphins. 4 mooring dolphins are set at intervals along the length of the berth and are fitted with quick release hooks and electric winches to handle light rope messengers.

Loading is through two 16 in. Chiksan loading arms and vessels with non-standard manifolds must provide their own reducers. Max. loading rate 39,000 bbls. p.h.

Loading arms are connected and disconnected by terminal staff.

The Kasim Marine Office is an octagonal wooden structure on piles, situated at the mouth of a small river 300 m. N.E. of the Loading Pier.

A Mooring Master remains on board throughout the vessel's stay and is in radio contact with the tank farm, pump station and Marine Office. The berth has its own gangway which is placed onboard the ship by shore crew.

DRY CARGO BERTH: 370 ft. long with depth of 15 ft. MLWS alongside vertical steel face with rubber fendering. 2 cranes available for discharge/loading with SWL 40 tons and 60 tons.

MEDICAL: Doctor available.

FRESH WATER: Limited supply (100 tons approx.) available at US$2.75 per ton in an extreme emergency only.

FUEL: Not available.

REPAIRS: Can be undertaken at Sorong but not at Kasim Terminal.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits per man.

REPATRIATION: Possible in an emergency.

TIME: GMT plus 9 hours.

STORING: Not possible to store by truck or barge. Customs regulations state that nothing can be moved internally or externally without informing them. No riggers or equipment available.

SHORE LEAVE: No shore leave.

GENERAL: Before sailing it is necessary that Sorong Harbour Master is aboard. No stores but clinic available.

During daylight hours Indonesian flag must be flown.

AGENCY: 2 to 4 weeks before arrival, vessels must appoint as General Agent Pertaminaship, Jakarta 3234 Yos-Sudarso, P.O. Box 327, Tanjung Priok, Jakarta, Indonesia. Telex JKT 2885, Answerback: Pertamina. Tel. 290 312 (Ext. 217).

AUTHORITY: Petromer Trend Corp., Kasim Marine Terminal, Sorong, Irian Jaya, Indonesia. *Telex:* (In Jakarta) 47163 JKT. *Cables:* Trendex JKT. *Contact:* Petromer Trend, Jakarta. L. R. Zeigler, Resident Manager; Captain Manopo Sambow, Marine Superintendent.

Jakarta Office: Five Pillars Office Park, Jalan Letjen, M.T. Haryono 58, P.O.Box 209, Jakarta. *Tel:* 791308. *Telex and Cables:* See above.

Government Authority: Kesyahbandaran Sorong, Direktorat Jenderal, Perhubungangan Laut IX, Sorong, Irian Jaya.

Harbour Master – Sorong, Iln. Jend A. Yani No. 13. Sorong. *Tel:* 21839. *Contact:* Captain Mudahir or Mr. Donggori.

KIJANG: 00.51 N. 104.37 E. (See Plan)

LOCATION: The Bauxite Loading Port of Kijang is situated at the S.E. coast of Bintan Island in the Riau Archipelago, in the position of Lat. 00° 50′ 44″ N. and Long. 104° 36′ 31″ E.

FLAGS: To be flown by incoming vessel:
Vessel's National Flag.
Indonesian Flag.
Vessel's Number.
Quarantine & Immigration Flag. ("Q" and "N").

DOCUMENTS: To be produced upon vessel's arrival:
12 Crew Lists
4 Passenger Lists (if any).
4 Parcel Lists (if any).
4 Store Lists.
4 Cargo Manifests.
4 Narcotic Lists.
2 General Information.
4 Fire Arms & Ammunition Lists.
4 Personal Effects Lists.
2 Vaccination Lists.
1 *Declaration of Health Certificate.
2 *Harbour Reports.
International Load Line Certificate.
Certificate of Registry and Tonnage.
Certificate of Vessel's Nationality.
Safety Equipment Certificate.
Seaworthy Certificate.
Safety Radio Telegraphy Certificate.
Derat Certificate.
Last Port Clearance.
*Forms to be supplied by Agents.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted free pratique, the Immigration Officer checks passports, seamen's books & crew list and issues shore passes.

PILOTAGE: One Government Pilot available. Pilot compulsory.

Pilot's office : c/o Port Administration Tanjung Pinang.

Priority : First come first served.

There are 2 Pilot Stations:

1. Tanjung Tillie:	00° 48′ 12″ N.	104° 35′ 30″ E.
2. Temborak Laut:	00° 49′ 00″ N.	104° 41′ 30″ E.

If vessel wishes to be piloted to the port on arrival day, vessel has to arrive at the desired Pilot Station as mentioned hereunder:
1. Tanjung Tillie: Not later than 1800 hrs. local time.
2. Temborak Laut: Not later than 1600 hrs. local time.

In case vessel is long overdue (3 hours delay after Master's last ETA cable), Perbaki shall charge compensation for keeping labourers waiting, etc.

RESTRICTIONS: The height of vessel from waterline to top of hatch coaming or railing must not exceed 12.00 m. Each side deck breadth from bulwark to king post or mast must not be less than 6.50 m. and from bulwark to hatch coaming must be preferably 7.00 m. min., and 9.00 m. max. Minimum breadth 20.0 m.

MAX. SIZE: LOA 185 m. Max. draft 11.00 m.

Greater than the max. draft and LOA exceeding 185 m. might be possible after consultation with the Pilot/Harbour Master and considering the depth at entrance of the port upon departure.

RADIO: Cables to Perbaki Tanjungpinang can be sent through Dumai Radio Station, Call Sign "PKP" or through Tanjung Pinang Coastal Radio Station, Call sign "PKJ2", with working frequency/time:

8726 kHz 0730 – 0800 hrs. GMT.

Local Time — GMT plus 7 hours.

Arrival Notice: Owner's advice: Owner to advise by cable to Adhiguna, Anekatamang Jakarta and Perbaki Tanjungpinang: at least 8 working days notice of vessel's ETA at loading port.

Master's advice: At least 48 hours before vessel's arrival at desired Pilot Station, Master shall give the following information to Adhiguna and Aneka Tambang Jakarta and Perbaki Tanjung Pinang: Last port of call, draft on arrival, quantity of bauxite to be loaded, stowage plan (hatch division for bauxite cargo), quantity and kind of commodity (ies) to be discharged — if any — and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Perbaki Tanjungpinang waits for the Master's telegram in order to make necessary preparation such as ordering Pilot, etc.

Availability of berthing space: The availability of berthing space will be confirmed by Sub-Agents.

TUGS: Available and compulsory.

BERTHING: Vessels are moored alongside 2 jetties and 7 dolphins with good nylon ropes, 5 fore, 5 aft, 1 forespring, 1 after spring, 1 fore breastline and 1 after breastline. For Spring tide a hercules wire rope (extra) is obtainable.

Same will be carried out from the Southern part of Perbaki's jetty and serves then as additional breastline. If a vessel has not got sufficient lines, same may be hired from Perbaki.

When moored alongside jetties, vessels must take special care of the moorings during hours of ebb-tide, which runs in S-N. direction.

Due to strong current in Strait of Kijang the ship's Master is kindly requested to pay attention to Sub-Agents advices.

Vessels over 20,000 d.w.t. will need extra 2 stern and 2 head lines.

Shifting Ship: Shifting ship will be done during slack water only by utilizing ship's gear and with assistance of tugboat if necessary. But to finalize loading as scheduled in stowage plan, shifting may be done even during flood/ebb tides using vessel's engine.

Jetty: There is no quay. Vessels are moored alongside 7 dolphins and 2 jetties.

Distance between the 2 extreme dolphins is 135 m.

Loading Facilities: Loading installation consists of 2 loading conveyors or stacker. Bauxite is loaded in the hold of vessel by means of conveyor belt.

Stacker can be moved vertically from 13° to 35°, but the maximum position for proper operation is only up to 18° inclination angle.

Each stacker can swing 15.00 m. (7.50 m. to inner side and 7.50 m. to outer side).

Distance between the 2 stackers in parallel position is 50.00 m.

The minimum distance between the end of stacker is 35.00 m. and the maximum is 65.00 m. (if there are king posts near bulwark, these distances might be less).

The length of stackers is 47.79 m. each. At the lowest position (13°) the end of stackers outreach about 10.50 m. from jetty seaward. (In this position the height from water line to the end of stackers is about 13.0 m. HWS).

Loading Capacity: About 400-500 t.p.h. for each stacker, however, it depends on the type of vessel, available cargo space, size of hatches, duration of trimming by bulldozer, etc.

Weighing: The bauxite is automatically weighed during loading by weightometer. The specific gravity of bauxite is around 1.25 and stowage factor around 29.

Unloading: Cargo for Aneka Tambang only.

STEVEDORES: Labourers will be supplied by Perbaki. Making the vessel ready for loading/unloading to be done by vessel's Crew members.

Loading is performed by Shipper's personnel. Loading/unloading equipments to be furnished by the vessel.

If necessary and at vessel's request, trimming of the bauxite can be done by bulldozer, except in deep tanks, cross bunkers, small holds in which bulldozer cannot operate. Weight of bulldozer is 5 tons, so double gear is compulsory when loading, discharging or shifting bulldozer. In hold where bulldozers are going to operate, all beams of upper as well as lower tween decks have to be removed. This has to be done by vessel's Crew members. Loading/unloading and shifting bulldozers (with engine off) to be done by vessel's crew members. The vessel is responsible for any damage to the bulldozers while loading/unloading or shifting.

Working Hours: Loading/unloading to be effected with Customary Quick Despatch (CQD) on weather working days, whereby Sundays, Holidays, Governmental Local Holidays and Saturdays between noon and midnight and Monday between 0000 hrs. and 0800 hrs., are always excepted.

At Shipmaster's request, work on these days can be arranged. The Ordering Party will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available. The nearest bunker station is at Pertamina Tanjung Uban (Bintan Island), North Secton of Riau Strait.

Lubricants: None. In emergency cases, a limited quantity will be made available in drums.

TIME: GMT plus 7 hours.

CUSTOMS ALLOWANCES: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Kijang port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc., to prevent unnecessary difficulties and eventually fines.

REPATRIATION: Can be arranged.

AIRPORT: Domestic airport about 9 miles from Kijang. There are regular daily flights from the said airport to Jakarta. Also a daily ferry service is available from Tanjung Pinang to Singapore. Sailing time about 4 hours.

CONSULS: None.

SHORE LEAVE: *Shore Pass:* Shore pass must be carried by Crew members during shore leave.

Invitation: Vessel's Crew members are strictly prohibited to invite friends, hawkers from shore aboard the vessel.

Anchorage: While lying at anchor waiting for berth no one is allowed to go ashore as long as vessel is not cleared.

It is also prohibited to lower lifeboats or rafts for the purpose of fishing, sailing, visiting nearby islands etc.

Leaving for Kijang and Around: Permitted.

SERVICES: *Cash Advances:* At Master's request can be supplied by Agents in a reasonable amount.
Fumigation: No facilities.
Ship's Chandlers: None. In emergency cases, Perbaki can act as ship's chandler for a limited quantity.

GENERAL:
Depths: Entrance: 10.50 m. LWS; Alongside jetty: 11.00 m. LWS
Current: Direction: At high tide, from North to South; At ebb tide, from South to North.
Velocity: Around 2–6 knots.
Chart: Indonesian Sea Chart No. 42, 44A and 44B.
Nature of bottom: Sand and soft materials.
Density: Approx. 1020.

SHIPMASTER'S REPORT: 1977.
Vessel's Dimension: Length 185.5 m. Beam 25.5 m.

Vessel sailed after loading wet bauxite ore in bulk. Vessel has previously visited the port 3 times and loaded to a draft of 11.2 m., however, due to poor tides loaded draft this voyage was 10.8 m.

Entrance to the port is from the North between Mapor Island and Merapas Island. The channel is clear and swept to 13.5 m. (chart datum) there are no navigational problems and Pilot boards in position 00° 50′ N. and 104° 43′ E. Also one can proceed onwards to the North of Kambat and Rusa Islands and then between Gabi and Riau to Tanjung Tillie anchorage. This is the accepted Pilot boarding ground and pilotage is compulsory and daytime only. The Pilot is accommodated at Tanjung Pinang but drives by car to the bauxite terminal and takes a launch from there to the vessel. He may not board upon arrival of vessel if the tide is unsuitable for berthing, as the ebb tide can reach 8 knots in Selat Kijang. There are 3 tugs available which are small, but quite adequate for berthing. The vessel proceeds past the berth then turns so as to berth starboard-side alongside. Moorings consist of 6 headlines, 1 breast line and 2 springs forward and 3 springs and 6 stern lines aft. Nylon lines are in position and can be hired as needed from the shore. The loading arms are fixed and shifting of the vessel is carried out at slack water.

Communication can be difficult at times. Tanjung Uban functions for 15 minutes in the hour and is not normally raised until day of arrival. All cables are sent through radio "PKI" Jakarta and seem to arrive at their destination. If possible despatch 3 copies of the Crew List to the port in advance as this speeds up clearance on arrival.

AGENCY:
1. *General Agents:* PT Pelayaran Bahtera, Adhiguna. 10-12 Jalan Kalibesar Timur, P.O. Box 1313, Jakarta, Indonesia. Cable address: Adhiguna Jakarta. Telex: Adiguna JKT 42854. Phone: 276547.
2. *Sub-Agents:* PT Aneka Tambang Unit Pertambangan Bauksit, Kijang. Address: Kijang Tanjungpinang. Cable Address: Perbaki Tanjungpinang (through Tanjung Pinang Radio Station Call Sign PKJ2 or Dumai Radio Station Call Sign PKP).
3. *Sub-Agents* (Head Office): PT Aneka Tambang. Jalan Bungur Besar 24–26 P.O. Box 2513, Jakarta, Indonesia. Cable address: Anekatambang Jakarta. Telex: Antam JKT 49147 Jakarta. Phone: 410108.

MPS Tax: So called MPS Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of MPS Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remit advance payment.

The final calculation of the MPS Tax will be made later.

Disbursements:
Advance Payment: At least 14 days before vessel's arrival at Kijang, vessel's Principals have to remit US $4,000 to the account of the General Agents, at Jakarta, as advance payment of the related ship's disbursement.
Vessel's Disbursement Account: All vessel's expenses will be charged to the related Principals through the General Agents.

AUTHORITY: Tanjung Pinang Port Authority, Port Administration, Tanjung Pinang, Riau, Indonesia. *Tel:* Tanjung Pinang 21153. *Contact:* Harbour Master.

LABUANTRING BAY: 08.44 S. 116.04 E.
AMPENAN: 08.34 S. 116.04 E.

DOCUMENTS:
Health Certificate.
1 Vaccinations List (Yellow Fever, Cholera/Typhus).
9 Crew Lists.
7 Passenger Lists (landing/transit).
4 Lists of Personal Effects.
7 Ship's Store Lists.
2 Cargo Manifests (discharge/transit).
4 Dangerous Cargo Lists.
1 Stowage Plan; all to be signed by Ship's Master and/or Chief Officer.

PILOTAGE: Normally not provided. When Pilot required, vessel must request via Agent or via Ampenan Radio at least 24 hours before arrival. Pilot service will then be given by Harbour Master from Ampenan to Labuantring Bay.

ANCHORAGE: Overseas vessels not familiar with Labuantring Bay, normally call Ampenan and await particular information and/or Pilot to enter Labuantring Bay (outer buoy). Good holding ground in about 16 m. Vessels with a draft of more than 6 m. must keep clear from channel to inner harbour. Navigating in channel without Pilot may cause difficulties; channel equipped with buoys, depth approx. 7 m.

APPROACHES: When approaching Ampenan, harbour is marked by light tower. Excellent holding ground in about 16 m.

RESTRICTIONS: Vessel may enter Ampenan and Labuantring Bay (outer buoy) day and night. Vessel not visited by port authorities between 1800 hrs. to 0700 hrs. (local time), exceptional cases allowed. Vessels are not allowed enter into inner harbour (Labuantring Bay) after sunset.

WEATHER: November till April rainy season. Quite heavy winds and rain can affect cargo work.

HEALTH: Pratique granted by port doctor after boarding vessel. Vessels from an infected port have to hoist "Q" flag. If any suspected disease or fever on board, necessary inform Agent by cable or via radio station. Treatment of crew members for illnesses other than quarantinable diseases arranged by Government's practitioners through ship's Agent.

TUGS: 1 tugboat of 125 h.p. 2 motor launches only, for cargo handling purposes.

RADIO: Ampenan Radio. Call sign PKD 9. Freq. 500 kHz and 430 kHz. Times GMT: 0000–0100, 0500–0600: except Friday and Saturday: 0000–0100, 0900–1000. Sunday and holiday closed.

BERTHING: Length of quay at Labuantring Bay approx. 40 m. Vessels with a length of less than 100 m. and a draft of less than 6 m. may berth safely. Berthing at Ampenan (anchorage) for all sizes of vessel.

MEDICAL: Cable or radio before arrival if medical assistance necessary on entry. Government's hospital facilities available. Yellow Fever Certificates inspected on arrival.

TANKERS: Berthing at Ampenan.

FRESH WATER: Not available.

FUEL: Not available.

SHIP'S CERTIFICATES: Registered Tonnage Certificate, Load Line Certificate, Safety Radio Certificate, Safety Equipment Certificate, Light dues Receipt, Derat Certificate, Clearance from previous port, all to be shown on arrival.

IDENTIFICATION CARDS: All crew's passports must be certificated by Immigration Officer on arrival, whereafter to be used as shore passes.

GANGWAY/DECK WATCHMEN: Usually employed during loading and discharging operations.

CARGO GEAR: Wire and rope-slings, nets and net-slings, lighters all supplied by stevedores except rain-tents. No shore cranes available. Loading and discharging using ship's derricks.

STEVEDORES: Ordered by Agent. To enable Agent ordering necessary gangs, vessel must give accurate ETA at least 24 hours in advance. Working on Sunday and holidays allowed by agreement in exceptional cases.

OPENING/CLOSING HATCHES: Normally carried out by stevedores; ship's crew may if required by vessel to do so.

CUSTOMS ALLOWANCES: No restrictions. Custom's Officer supervises opening and resealing of bond.

CONSULS: None available locally.

AIRPORT: Served by regular airlines to Bali and Java.

TIME: GMT plus 8 hours.

HOLIDAYS: 1st January; Independence Day (17th August); Christian, Islamic and Balinese holidays as appointed by the Indonesian Government.

GENERAL: Vessels should not use ship's radio station. Harbour Police and Customs' guards on board during ship's stay in harbour.

SHORE LEAVE: Crew allowed ashore; passports required whilst ashore.

DELAYS: Normally minimal.

LAWI LAWI: 01.27 S. 116.46 E. (See Plan)

LOCATION: The Shore Terminal is situated approximately three miles inshore on the East coast of Kalimantan, Indonesia, in the Makassar Strait. It is about 12 miles South of Balikpapan.

The Single Buoy Mooring is approximately 5.75 miles offshore in position 01° 27′ 30.1″ S., 116° 45′ 37.1″ E. in 85 ft. of water. The submarine line to the SBM sea bed manifold is 30 in. diameter. A double string of 20 in. diameter flexible submarine rubber hoses joins the sea bed manifold to the SBM.

DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique:
Certificate of Registry.
Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Exemption Certificate.
Cargo Certificate.
Derat Certificate.
Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Lawi Lawi Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Flag Dispensation: Each tanker entering the Lawi Lawi Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for Provisional Pratique through the Directorate of Quarantine and if granted a cable advice is sent to the Harbour Authorities. Port Health clearance is issued prior to the tankers arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Customs and Immigration: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian Courtesy Ensign, Quarantine, Immigration, Pilot and Call sign flags must be displayed by all vessels approaching Lawi Lawi. These signals shall be displayed continuously until clearance is granted.

The signals are as follows:—

Sunrise to Sunset : Quarantine Flag "Q"
Sunset to Sunrise : Signal Lights (Red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign, (Signal Letters). This signal may however be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

Indonesian Immigration, Customs and Port Officials will board the vessel to grant clearance.

Each crew member should be in possession of an International Vaccination Card and Passport or Seaman's Book.

PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

READINESS: *Procedure when berth available on arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuverable, mooring ropes on deck, windlasses, winches, etc. in good working order, Notice of Readiness will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Lawi Lawi Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) that it is within the hours of daylight-deemed to be from 0600 hours, local time to 1800 hours, local time.

b) that it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.

c) that the port is open.

d) that vessel's arrival is within her accepted date range.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clause (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep pilots (Mooring Masters) on station in the anchorage.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Delay due to excessive deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Exact arrival time: It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Lawi Lawi Terminal.

Conditions of use of port: The Master of each tanker will be given a copy of the "Conditions of use of Port of Lawi Lawi Terminal" which he will be asked to sign before the Company mooring and connecting equipment is hoisted on board and before any manoeuvre is commenced under the Mooring Master's advice.

ANCHORAGE: *Recommended Anchorage:* If vessels are obliged or instructed to anchor they must do so in the designated anchorage area. On no account is a vessel to anchor North of Latitude 01° 26′ 30″ S. or West of Longitude 116° 47′ E. The depth of water in the anchorage is 30 m. The bottom is mud/clay and the holding ground is considered good.

MAX. SIZE: *Minimum Size Tanker Acceptable:* The minimum size of tanker that can be accepted for loading at the SBM is 15,000 d.w.t.

Maximum Size Tanker Acceptable: With the presently fitted, mooring assembly and hose string length, the maximum size tanker that can be loaded at the SBM is 135,000 d.w.t.

RADIO: *Advice of arrival:* 72 hours prior to arrival at the Terminal, vessels should advise Union Oil of their ETA's by cable sent via "Pertamina" coastal radio station at Balikpapan. They should also confirm or amend them when they are 48 hours and again when 24 hours, distant from the terminal.

Union Oil Company of Indonesia cable address:
Pertamina Tanjungsantan

Pertamina Coastal Radio Stations:

I. Name of Station – Balikpapan Radio
Call Sign – PKN 2
Frequency – Keeps watch on 2182 kHz A3
Answers on: 4415 kHz A3
6520 kHz A3
Class – A3H – A3J
Power – 500 Watt
Service – 24 Hour
Location – Lat. 01° 16′ S.
– Long. 116° 50′ E.

ETA messages sent to PKN2 should be addressed:

Details of cable:

The following information should be included in the cable:

1. Name of vessel and radio call sign
2. ETA in GMT and date (local time is GMT + 8 hours)
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Vessel's draft on arrival.
7. If there is any sickness aboard or clean bill of health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
10. Distance in feet from bow to vessel's loading manifold
11. Flange dimensions of vessel's manifold connection if not to ANSI B16.5, B.S. 1560, Series 150 or equivalent.

VHF: Vessels equipped with VHF radio telephone should contact "Lawi Lawi Control" on the International Maritime Service Channel 16 (156.80 MHz) when in range to request instructions.

Language: The language of the terminal is English and Indonesian.

BERTHING: *Work Crew Service:* Mooring and un-mooring, lifting, lowering, connecting and disconnecting hoses will be done by a Terminal work crew under the direction of the Mooring Master. Assistance from the ship's personnel in operating windlasses, winches, etc. will be required. Ship's crew will assist in hose connection/disconnection/mooring/un-mooring and carrying equipment from deck to forecastle as required. Any vessel whose crew do not give such assistance may be rejected and returned to the anchorage. Costs of such a delay would be for the ship's account.

Mooring: This description is only intended as a general outline and may be varied as to the order in which lines are taken up, etc. according to the circumstances prevailing at the time of mooring.

Moorings required from Tanker: The ship must provide and have ready the following. Two mooring ropes and one rope messenger line on forecastle.

The Approach: The ship approaches the buoy from down tide and wind, taking care to keep the wind right ahead. Adequate ballast must be retained on board to ensure that the vessel retains full manoeuvrability throughout the approach to the buoy and the actual mooring.

Bringing Aboard the Mooring Lines: The vessel will be brought to a position close to the buoy with the vessel stopped in the water and with the buoy fine on the port bow. During the approach to the buoy and while mooring, a Terminal work boat will keep the hoses pulled well clear to port. Under normal conditions the port rope will be the first taken on board. The Mooring Master will advise as to which rope is to be taken first and as to which fairlead this will be taken and the actual work of mooring will be done by a Terminal work crew. The ship will lower a strong messenger line to the mooring boat who will in turn make this fast to the approach rope. The approach rope of 10 in. circumference will be hove aboard and will in turn be hove on until the chafing chain and open links are centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being hove aboard a strong wire strop will be made fast to a set of forecastle bitts. To the end of this strop will be fitted a 50 ton shackle and the strop will be so made fast that the end and the shackle will be about 5 ft. inboard of the fairlead. The approach rope will be hove on until the large link of the chafe chain is sufficiently far inboard for it to be connected to the strop by the 50 ton shackle. When this is done the approach rope will be slacked off until the full weight comes on the strop/chafing chain/buoy rope. The buoy rope is 150 ft. long and is 12 in. circumference nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a preventer.

The second rope is now taken aboard and made fast in the same way. When both the ropes are fast, good ropes or strops, provided by ship, can be made fast to the spare links on the chafing chains to back up the main mooring if required.

Fire Wire: A fire wire must be rigged on the starboard side forward and on the stern. These must be tended throughout the vessel's stay at SBM to ensure that they are kept within 2 to 3 ft. of water. In the case of fire the tugs would connect to these wires to pull vessel clear of the SBM.

Connecting Hoses: When the mooring is completed the work boat holding the hoses clear will bring these alongside the ship in way of the port side manifold.

Strops and Shackles: Strops and shackles will be provided by the Terminal and put on board as the vessel approaches the buoy. The ship must provide 2 mooring ropes at least 8 in. circumference and 100 fathoms long, a 4 in. circumference messenger line, and 2 rope lashings 4 in. in circumference and 15 ft. in length. These lashings should be of Manila or Polypropylene, nylon is not acceptable.

Unmooring: To unmoor from the buoy any extra back-up lines that have been made fast to the chafing chains are slipped first. The approach ropes are then taken to the ship's windlass/capstan and the weight taken on them until the shackle between the strop and chafing chain is undone. With the vessel moving slowly astern the approach ropes are slacked off and finally slipped and allowed to float free. While the ship is unmooring, a Terminal work boat will keep the floating hoses towed clear and will keep them clear until the ship has slipped the moorings and is clear of the buoy.

HOSES: *Hose Lifting Capacity:* Tankers must be equipped with a hose lifting derrick at the port side manifold, with a lifting capacity in conformance with the table shown on page C2 of Appendix "C" to The International Oil Tanker and Terminal Safety Guide. For instance; a 15,000 d.w.t. ship, at ballast draft with smooth sea conditions would have to lift a weight slightly in excess of 3.5 tons. For this purpose it is essential that the derrick is double rigged and that there is sufficient runner wire on the winch for the block to reach the water when hooking the hose on. The winch must be in good working order, the end of the runner securely fastened to the drum end and the winch brake operative. The hoses at the Terminal are 16 in. internal diameter with the tanker rail hoses having an internal diameter of 12 in.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to connect 8 in., 10 in., 12 in. and 16 in. manifolds. Ships manifolds must terminate in flanges of ASA 150 series.

Details of ASA 150 flat face flanges are shown in the "plan" section. Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of sizes and or ratings other than those specified above, will be rejected.

1×16 in. self floating hose is run from the buoy to the tanker. The last 3 hoses of the string, including the tanker rail hose, are 12 in. diameter. This reduction in diameter is made at the tanker end of the string so that the ship has less weight to lift when hoisting the hoses on board.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

LOADING: *Loading Rate:* Maximum loading rate will be about 20,000 bbls.p.h. It is recommended that vessels take maximum flow, with due regard to safety, in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressure which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the vessel will contact the Terminal Despatcher ashore every 30 minutes by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF, the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a Terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a "Shore Stop" will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting "Shore Stop". When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for overload the vessel, it is not possible to pump oil back from the ship to the shore.

Lawi Lawi Crude Oil Specifications:

Gravity at 60°F.:	34 A.P.I. to 39 A.P.I.
Salt Content:	Less than 12 pounds per 1,000 bbls.
B.S. & W.:	0.30 Vol. % or less.
Sulphur:	0.04 – 0.15 Weight %
Pour Point:	15°F. to 20°F.
Viscosity:	1,000 to 2,000 Cst @ 100° F.
Reid Vapour Pressure:	3 to 8 P.S.I.

BALLAST/POLLUTION: *Adequate Ballast:* Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by Governmental Authority for pollution shall be for the vessel's account.

In the event that the Company has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters, all labour and equipment costs for cleaning operations will be to the vessel's account.

REPAIRS: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in the berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission must be obtained before any such increase in revolutions.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs Officer will seal the stores.

FACILITIES: There are no facilities of any kind at Lawi Lawi S.B.M.

There are no engineering repair shops.
No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.

GENERAL: *Charts:*

British Admiralty Charts:

3014	Balikpapan Bay to Pulo Laut.
3031	Plans on the East Coast of Kalimantan.
941 B	Eastern Archipelago Sheet 2 Western Portion.
2637	Strait of Macassar South Port.

U.S. Naval Oceanographic Office Charts:
HO. 3045 Southern Part of Macassar Strait.
HO. 6188 Tanjung Tamarong to Sungai Pasir.

Sailing Directions: Indonesia Pilot Vol II, 1st edition 1976.

Hydrographic Survey: A detailed hydrographic survey including a wire sweep was carried out from November 1975 to February 1976. This survey covers the approach channel, anchorage area and the manoeuvring area in the vicinity of the SBM (See "Plan").

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personal who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel to which any person may be lawfully required to proceed are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor at the SBM and such access shall be adequately illuminated between sunset and sunrise.

Operations: No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or both, or for infringement of Port Regulations. Unsatisfactory conditions will be reported to the Company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient crew members must be immediately available at all times to assit with any or all operations on board the vessel at the terminal.

Floating Logs: Masters are advised to keep a good lookout for partially submerged logs floating in this area. These can be large and a hazard to safe navigation.

AGENCY: *Procedure for appointing Agent:* Owner should cable: Pertamina Ship Jakarta.

The cable should appoint Pertamina as Agent to attend the tanker at Lawi Lawi and should be sent 2-4 weeks prior to vessel's arrival.

AUTHORITY: The installations of this Terminal are owned by P. H. Perusahaan Pertambangan Minjak Dan Gas Bumi Negara (Pertamina), a State Enterprise of the Republic of Indonesia. Pertamina, Jalan Perwira No. 2, Jakarta, Indonesia.

Operator: Union Oil Company of Indonesia, 18th floor Pertamina Tower, Jalan M. H. Thamrin 8, Jakarta, Indonesia. *Mailing Address:* P.O.Box 264/DKT, Jakarta, Indonesia. *Cables:* Petroleum Jakarta *Telex:* 4472, *Tel:* 54583, 54711-13, 54811-15.

LHOKSEUMAWE (Including Hagu, Blang Lancang and Krueng Geukueh): 05.15 N. 97.07 E. **(See Plan)**

LOCATION: The port is situated on the North coast of Sumatra, Indonesia. The port limits (compulsory pilotage) are:

North:	Lat. 05° 17′ 00″ N.	Long. 97° 10′ 00″ E. to
	Lat. 05° 17′ 00″ N.	Long. 96° 58′ 20″ E.
West:	Lat. 05° 17′ 00″ N.	Long. 96° 58′ 20″ E. to the coast.
East:	Lat. 05° 17′ 00″ N.	Long. 97° 10′ 00″ E. to the coast.
South:	Along the coast between East and West limits include Blang Lancang and Krueng Geukueh harbour.	

The sea buoy is in position:

Lat. 05° 15′ 22″ N. Long. 97° 07′ 02″ E. Fl. 8 sec.

Chart and Sailing Directions for the area:

Republik Indonesia Hidral No. 8 Plant Chart No. 25.
Sailing Direction.
Light List.
Special Publication.

Lhokseumawe Harbour is divided into 4 areas:

1. Lhokseumawe Harbour.
2. Hagu Pertamina Special Oil Terminal.
3. Blang Lancang Pertimina Special Harbour (Arun LNG Terminal).
4. Krueng Geukueh Harbour (Fertiliser Terminal and Public Berth).

DOCUMENTS: *Clearance:* Vessels proceeding to Lhokseumawe, Hagu and Krueng Geukueh should carry out document clearance at Lhokseumawe anchorage; vessels proceeding to Blang Lancang at Blang Lancang anchorage.

Cholera Vaccination Certificates for all crew members and passengers (date not exceeding 6 months).

Certificates of Inoculation against any contagious diseases.

Customs, Immigration and Harbour Master will require the following for inspection:

10 Crew Lists.
5 Crew Declaration of Personal Effects.
5 Ship's Stores Lists (inventory).
3 Passengers Lists (if any).
3 Cargo Manifests, with a summary for transit cargo.
Clearance from the Last Port of Call.
Valid passports and/or Seaman's Certificates for all crew members.
International Maritime Declaration of Health.
Valid Derat or Derat Exemption Certificate.
Arms and Ammunition Declaration.
Load Line Certificate, Ship Registry, Radio Safety/Telegraphy Certificate, Ship's Construction Certificate, Safety Equipment Certificate.
U.S.C.G. Letter of Compliance.
General Information.

In accordance with practice in Indonesian ports the vessel's national flag, the Indonesian country flag, Quarantine, Immigration and Pilot flags must be displayed by all vessels approaching Lhokseumawe Harbour. These signals shall be displayed continuously until clearance is granted.

PILOTAGE: Compulsory for any movement of the ship in harbour and within the port limits.

Lhokseumawe Harbour: Pilot will board the vessel at the anchorage.

Hagu Special Oil Jetty: Pilot will board the vessel at the anchorage.

Blang Lancang Harbour: Pilot will board the vessel at the sea buoy or in the Anchorage Area about 3 miles from the breakwater.

Krueng Geukueh Harbour: Pilot will board in the Anchorage Area or one mile from breakwater.

Master, Owner or Agent should request the Pilot 6 hours in advance for berthing and 3 hours in advance for unberthing. The vessel should be stopped when the Pilot is boarding. Call the Lhokseumawe/Blang Lancang/Krueng Geukueh pilot station by VHF on Channel 12 (24 hours). Moving the ship for berthing and unberthing available in good conditions. The limit is: for the wind not more than 10 m./sec. and swell not more than 2 ft./sec. (for CBM) and visibility not less than 1 mile.

ANCHORAGE: A vessel which has been informed by the Agent to anchor on arrival shall proceed to the designated Anchorage Area.

Anchorage Area for Lhokseumawe Harbour and Hagu Special Oil Terminal is in position:

Lat. 05° 10′ 32″ N. Long. 97° 09′ 20″ E. Depth 20 m.

There are two Anchorage Areas at Blang Lancang Pertamina Special Harbour:

1. Anchorage Area for LNG tankers:
   Lat. 05° 15′ 17″ N. Long. 97° 07′ 45″ E. Depth of water 66 m.
2. Anchorage Area for Oil tankers:
   Lat. 05° 15′ 17″ N. Long. 97° 05′ 26″ E. Depth of water 63 m.

No dry cargo ship will anchor in Blang Lancang Special Harbour. All dry cargo ships visiting Blang Lancang Special Harbour should anchor in Lhokseumawe Harbour for clearance and awaiting a berth.

All vessels visiting Krueng Geukueh Harbour should anchor in Lhokseumawe Harbour for clearance and after that move to Krueng Geukueh Harbour and drop anchor 1 mile North from breakwater in position:

Lat. 05° 16′ 00″ N. Long. 97° 01′ 40″ E. Depth of water 42 m.

The holding ground in the Anchorage Area is reported to be poor. All vessels are required to maintain engines on one hour's notice in good weather and 15 minutes' notice when wind speed exceeds Beaufort Scale 4 (moderate breeze).

RESTRICTIONS: If there are two LNG ships alongside the dock no other ship will move in the Blang Lancang Harbour, except P & T marine craft actually assisting the LNG tanker.

No ship will enter the harbour during night time.

No ship will enter Blang Lancang Harbour with ammunition on board.

Vessel not allowed to proceed into the Blang Lancang CBM restricted area without permission.

No ship will berth during night time at Lhokseumawe/Hagu wharf or at Blang Lancang SPM/MBM. Blang Lancang harbour open for 24 hour service. Krueng Geukeuh harbour open for day time only.

MAX. SIZE:

Old Lhokseumawe Harbour: Only barge and tugboats are able to moor at the dock, depth 2.4 m.

Hagu Wharf: Max. draft 6.0 m.

Blang Lancang Harbour:

LNG Dock I (North):	Max. LOA – 300 m. Max. draft – 13 m.
LNG Dock II (South):	Max. LOA – 300 m. Max. draft – 13 m.
West Cargo Dock:	Max. LOA – 180 m. General cargo. Max. draft – 6.5 m.
East Cargo Dock:	Max. LOA – 120 m. Max. draft – 7.0 m.
CBM:	Tanker with LOA – 275 m. Max. draft – 23 m.
SPM:	Tankers – 40,000 – 280,000 d.w.t.

Krueng Geukueh Harbour:

Berth A–AAF	Max. d.w.t. – 10,000. Max. LOA – 169.00 m. Max draft –9.50 m.
Berth B–AAF	Max. d.w.t. – 15,000 Max. LOA – 175.00 m. Max. draft – 9.50 m.
Berth PIM	Max. d.w.t. – 10,000 Max. LOA – 169.00 m. Max. draft 9.50 m.
Public Berth (under construction, will be completed in December 1987).	Max. d.w.t. – 5,000 Max. LOA – 100.00 m. Max. draft – 9.50 m.

HEALTH: In order to obtain Free Pratique vessel must cable name and nationality of the ship; ports of call during the voyage; number of crew and passengers (if any); port of destination and Agent; condition of health of all onboard with details of any sickness and whether all vaccinated.

Officials will board with Pilot. Quarantine flag "Q" and Immigration flag "N" must be flown until clearance is granted.

RADIO: Ships proceeding to Pertamina/Pt. Arun: Call Lhokseumawe Radio Station, call sign PKB 20. (Owned/operated by Pertamina). Open 24 hours. See "List of Radio Signals".

The following information is required.

(a) Name of Owner
(b) Name of vessel and Radio Call Sign
(c) Flag
(d) SDWT
(e) Name of Master
(f) Last port of call and departure date
(g) Discharge port and ETA
(h) Number of crew and passengers
(i) Maximum loading rate in barrels.

Dry cargo ships: Call the General Agent in Belawan. Call Belawan Radio PKB 1. (Owned/operated by Port Authority). See "List of Radio Signals."

VHF: For Lhokseumawe Harbour and Krueng Geukueh Harbour: Call Lhokseumawe Port Administration Channel 16.

For Blang Lancang Harbour: Lhokseumawe Radio PKB 20 Channel 16. Marine Office Channels 16, 9 and 13. Pertamina Channels 16 and 19 (working).

For Pilot Station: Call Blang Lancang Pilot Station Channels 16 and 12.

Language: Indonesian and English.

RADAR: No radar service available.

TUGS: No tugs available in old Lhokseumawe Harbour.

Blang Lancang Harbour: 5 tugs available – 4 tugs with 4,200 h.p. 1 tug with 3,200 h.p. 2 mooring launches 550 h.p.

For Supertanker and LNG: Tanker will use the tug's lines. Tug's line will be charged by Company/Pertamina: Rates will be subject to change in accordance with operation cost and will not be subject to advanced notice.

Cargo ships will use ship's line.

In Krueng Geukueh Harbour: 2 tugs available with 1,000 h.p. Use ship's line. 1 mooring launch, 105 h.p. 1 pilot boat, 250 h.p.

BERTHING: *Old Lhokseumawe Harbour (Lhokseumawe Terminal):* A small pier with length 60 m. Construction: Piles with wood on the top. Depth 2.4 m. Only barges and small vessels under 500 d.w.t. can berth.

Blang Lancang Harbour (Arun Terminal): 2 special LNG docks, 400 m. length each with 10 mooring dolphins and 4 rubber fenders. Depth 14 m. at LWS.

West Cargo Dock: Length of the dock 400 m. Depth 6 m. at LWS.

East Cargo Dock: Length 184 m. Depth 8.0 m.

CBM: The berth which is located offshore is designed for oil tankers ranging from 30,000 d.w.t. to 100,000 d.w.t.

Vessel approaches berth heading 250°T between buoys 6 and 7 (see "Plan").

The CBM consists of 9 cylindrical mooring buoys secured by 3.5 in. stud-link chain to 30,000 lb. anchors. Some of the mooring buoys are fitted with 44 mm.×750 ft. long preventer wires for use with large ships.

Ships using the 16 in. hoses must have a derrick on the port side with SWL of 10 tons with which to lift the hoses from the seabed. The winches of ship for taking on the shore wires on the drum must be able to withstand 35 tons breaking strain.

Engines to be on one hour's notice throughout.

New SPM: Located 1 km. N.W. of CBM in position: Lat. 05° 15′ 18.23″ N., Long. 97° 04′ 03.33″ E.

Kreung Guekueh Harbour (AAF Terminal): Berth A: Special fertiliser in bulk. 200 m. long with 8 dolphins (4 fenders). Depth. 10 m. at LWS. Max. size: 150 m. LOA, able to moor.

Berth B: General cargo berth. Concrete construction 300 m. long with fenders every 20 m. Depth 10 m. at LWS. Max. size 160 m. LOA able to moor.

New PIM Fertilizer Berth: Located S.E. from Berth "Berth A" – AAF berth. (PIM – Puluk Iskandar Muda; AAF – Asean Aceh Fertiliser).

STEVEDORES: Available from Agent.

MEDICAL: Hospital facilities available.

TANKERS: Oil tankers will be berthed at the CBM or the SPM.

The Loading/Mooring Master will provide shore labour for connection/disconnection of the submarine hose strings. He maintains communication links with terminal.

Diameter of load line – 2×16 in. for large tankers.
– 2×8 in. for small tankers.

Ships visiting Blang Lancang should have clean ballast. No dirty ballast or slops facilities available.

API of Condensate 51 and 56.
PVP of 13 PSI. Temperature: 80°F.
Loading Rate: 60,000 bbls./p.h.

LNG tankers. Cargo hose facility arms system.

DENSITY: 1024.

FRESH WATER: Only available for tugs.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Ship's crew maintain deck watch.

Gangways: Cargo and oil tankers use ship's gangway. LNG tankers use shore gangway.

FIRE PRECAUTIONS: No smoking will be allowed on board while the ship is berthed and on the plant site of Arun Terminal, except in places approved by Harbour Master.

CONSULS: No Consul in Lhokseumawe.

REPAIRS: No facilities.

SURVEYORS: Saybolt Surveyor attends at Blang Lancang CBM/SPM/LNG dock.

DRY DOCKS: No facilities.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: Lhokseumawe Mobil Oil Domestic Airport, about 30 km. from Lhokseumawe.

Kreung Mane PT. Arun/Public Airport (Domestic) about 30 km. from Lhokseumawe.

Polonia International Airport located in Medan, about 360 km. from Lhokseumawe.

OPENING/CLOSING HATCHES: By stevedores.

TIME: GMT plus 7 hours.

HOLIDAYS: For LNG and Condensate: No holidays in operation. For other vessels: Idul Fitri – Idul Adha, no operations.

POLICE/AMBULANCE/FIRE: *Police:* Lhokseumawe/Hagu Area: (Sector) Public Tel: 110. (Resort) Tel: 21490.

Blang Lancang Area: Public Phone Tel: 21566 Ext. 1922/1923. PT. Arun Phone (Direct) Tel: 1922/1923 or call PKB 20 on VHF Channel 16.

Blang Lancang Area: PT. Arun (Direct) Tel: 2315 – 2314 or call PKB 20 on VHF Channel 16.

Krueng Geukueh: PT. AAF Plant Site (Direct) Tel: 222. PT. AAF Housing (Direct) 333. PT. PIM Plant Site (Direct) 222.

EMERGENCY CO-ORDINATION CENTRE: Contact "PKB 1" Belawan Radio for Search and Rescue.

TELEPHONES: No ships' telephones except for LNG/LPG ships during berthing.

CUSTOMS ALLOWANCES: 200 cigarettes/10 cigars. 100 grams of tobacco. No spirits to be taken ashore.

IDENTIFICATION CARDS: Shore pass as required by Agent.

CARGO GEAR: At Lhokseumawe Terminal/Hagu no facilities for heavy lifts.

At AAF Cargo Dock/Blang Lancang Cargo Dock, heavy lifts can be handled.

SERVICES: Available.

BANKS: Lhokseumawe/Hagu Area:

Bank Exim Tel: 22407
B.D.N. Tel: 21062

PT. Arun Pioneer Camp (Direct) Tel: 1999

Krueng Geukueh Area:

P.I.M. (Direct) Tel: 341.

SHORE LEAVE: Possible.

DELAYS: Vessels calling at Blang Lancang CBM may be delayed if ship's mooring system is unsuitable or when berth is affected by strong winds and/or swell.

GENERAL: *Post Office:* Lhokseumawe/Hagu Area: Jl. Samudera. Tel: 21026.

Blang Lancang/Krueng Geukueh: Batuphat (PT. Arun Tel: 1949).

Telegraphic Office: Centre or Interlocal: Jl. Merdeka. Tel: 21757.

Port Services: Jl. Pelabuhan Tel: 21181.

Restricted Area: 1.75 nautical miles radius of the centre of the SPM position.

DEVELOPMENTS: LPG berth will be completed in November 1988. Public Cargo Dock, under construction, will be completed at the end of 1987.

SHIPMASTER'S REPORT: April 1981.

Arun Terminal:

Documents: See "Jakarta".

Chart: B.A. 3584.

Berthing: There is a jetty for LNG loading. Position: Lat. 05.15 N., Long. 97.07 E.

This is an open sea loading point located just at the right hand side of the port of Blang Lancang for ships to load condensate cargo only.

Pilotage: Compulsory, Loading Master together with 4 – 6 shore personnel will assist in mooring, Pilot also onboard.

Loading: Vessel should be equipped with 10 ton derrick on port side, manifold 2×12 in. on port side, 2 mooring winches/drums, 1 minimum available at forward maindeck and 1 at after maindeck for serving the preventer wire 44 mm.×750 ft., as breast lines for 2 buoys. Vessel should also be equipped with 14 mooring lines minimum length 210 m. each for 9 mooring buoys. Loading Master will discuss the mooring procedures with Master before mooring.

Shore Facilities: None.

Agent: Pertamina, Blang Lancang, Cable Address: Pertaminaship, Jakarta.

SHIPMASTER'S REPORT: September 1983.

Arun Terminal:

Documents:

On arrival Health, Immigration and Harbour Master's Officer will board with the Agent to issue clearance.

Papers required:

Maritime Declaration of Health.
Vaccination Cards.
Derat Certificate.
Crew List (10-12 copies).
Passports/Seamen's ID Books.
Last Port Clearance.
Arrival Report (supplied by the Agent).

The Agent will require the following documents to take to the Custom House ashore:

Ship's Register.
International Loadline Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Certificate of Financial Responsibility (oil pollution).
Derat Certificate.

Immigration may take some, or all passports/ID ashore.

After these formalities have been completed 4 or 5 Customs Officers will board. They will require:

Ship's Stores List.
Crew Personal Effects List.
Cargo Manifest ('nil' declaration if applicable).

About 4 – 5 copies of each of the above should be adequate. The bond store, and possibly other storerooms, will be checked and some or all cabins will be searched.

Cargo documents should normally be ready by the time the hoses are disconnected, (about 1.25 hours after completion of loading). Return of ship's certificates, passports, and issue of port clearance, can, it is reported, cause some delay. Vessels are not allowed to wait at the berth for documentation.

Pilotage: See "Berthing".

Anchorages: A designated waiting anchorage for tankers lies about 1.25 miles North-Eastward of the berth, in depths of about 60 m. (clay).

Restrictions: Mooring carried out in daylight only; unmooring is allowed day and night.

Max. Size: The tanker berth is designed to accept vessels up to 100 MDWT, with LOA 275 m.

Approaches: Charts: BA 2777; BA 3585.

Apart from an active fishing industry operating in the area there are no navigational hazards in the approaches. There are adequate navigational lights serving Blang Lancang and Pelabuhan Blang Lancang, (although neither the light or racon on the beacon at Ka Geukueh, about 1.5 miles Westward of the terminal were active 9th-15th September, 1983). The storage tanks and gas flares at the terminal are prominent day and night.

Radio: Send ETA 72, 48 and 24 hours in advance to 'Pertaminaship Jakarta'. Additional information regarding the vessel's details, last port, cargo requirements, etc., is not obligatory as far as is known but seems advisable.

Radio Station 'PKB 20', at Lhok Seumawe will handle traffic concerning navigation, cargo, etc., but watch schedules do not appear to be regular. The terminal may, via PKB 20, request information from the vessel regarding cargo requirements, loading rate, deballasting time (if applicable), number/type of mooring lines.

VHF: When within appropriate range the terminal may be contacted on VHF Channel 16; working Channels 9 and 19. The call sign is 'Arun'.

Tugs: Three tugs, each 4,200 h.p., assist the berthing. One tug is made fast forward and one aft; centre leads; tugs' towing ropes. One tug pushes at amidships as required. Two tugs attend during unberthing. Two large mooring boats are employed for mooring/unmooring.

Berthing: The terminal, owned and operated by Pertamina, together with Mobil and Japanese interests, exports Arun Natural Crude and LNG. Tankers load at a multi-buoy berth about 1.5 miles off-shore. Gas carriers load in a small artificial harbour (Pelabuhan Blang Lancang), about 1.5 miles E.S.E of the terminal. The small port of Lhok Seumawe lies about 5 miles S.E. of the terminal.

The tanker berth is located in an open roadstead in depths of 35 m. – 50 m. There are 9 mooring buoys, 2 bow buoys, 2 breasting buoys each side, 2 quarter buoys and 1 stern buoy. The tanker will require 4 bow lines, 4 breast lines and 5 stern lines. Wire ropes are acceptable, preferably with nylon tails. The bow lines should be at least 250 m. in length. Additionally the tanker will be required to pick up a 42 mm. diameter wire rope from each of the breasting buoys. Prior to berthing the vessel's mooring equipment will be inspected by the Mooring Master who will discuss the mooring operation with the Ship's Officers. The Mooring Master and Assistant will board with the Pilot at the time of berthing to supervise the mooring operation.

Accommodation on board is required for the Loading Master and one Mooring Master.

Scuba divers are in attendance to sort out any underwater problems that may occur with regard to the moorings and hoses.

Loading: Arun Natural Crude is a condensate, (akin to naptha), very light and gassy. Approximate quality details are:
API, 55; temperature, 32°C; RVP, 11 psi. Cargo is loaded via two 12 in. flexible hoses. The terminal supplies labour for connecting/disconnecting the hoses. Ship's crew required to assist and operate winch and derrick. Allow for about 6 tons lift on each hose. Maximum loading rate is 65,000 bbls/hour. The terminal meters the quantity of cargo loaded. The meter is proved at each loading and the ship should receive a proving report on completion of loading.

Medical: Treatment available.

Fresh Water: None. (Said to be available at Pelabuhan Blang Lancang).

Fuel: None. (Said to be available at Pelabuhan Blang Lancang).

Airport: There is, reportedly, an air service with Medan, about 150 miles S.E. of Blang Lancang. Medan is said to be served by international flights.

Shore Leave: Not permitted.

Developments: Plans to install an SBM, as an additional berth, have been approved, it is reported.

General: Tides: Refer Lhok Seumawe. Tides are semi-diurnal. Spring range is 1.4 m. Rates appear to be fairly weak. A ship will generally lay windrode at the anchorage.

Weather: November to March winds from N.E. prevail. June to September winds from S.W. prevail. The area is subject to SW'ly squalls May-September, and particularly June-August. Thunderstorms are most frequent March – April and October – November.

AUTHORITY: Lhokseumawe Port Authority, Jln. Pelabuhan No. 1, Lhokseumawe, Indonesia. *Tel:* 21181, 21881 (Port Director). *Telex:* 51309 PPI Lsm. *Contact:* T. Rusly Harun, Port Director; T. Saukata, Harbour Master, Tel. 21485; Dr. Zainal Abidin, Port Health, Tel. 21154; Dr. B. Lirungan, Customs, Tel. 21267, 21054; Aldian Arifin, Immigration, Tel. 21039.

MACASSAR (Ujang Pandang): 05.08 S. 119.24 E.

(See Plan)

DOCUMENTS:

Certificate of Registry
Crew List
Log Book
Certificate of Seaworthiness
Load Line Certificate
Radio Certificate (Solas Certificate)
Health Certificate
Equipment Certificate (Solas Certificate)

Shipping documents as follows:

Manifest of cargo
Bills of Lading
Charter Party (if necessary)

PILOTAGE: Pilotage compulsory for vessels of more than 150 cu.m. in gross volumes.

To order a Pilot:

1. Contact the ship's Agent in this port via Macassar Radio (call sign PKF) by ship's radio or VHF Channel 16.
2. Also contact Macassar Pilot's station tower by VHF Channel 16.

Pilotage Information:

1. Every vessel of 71 m. LOA and over under Pilot's direction for berthing and unberthing is to use the Port Administration tugs.

There are 2 tugs available with initial letters "PA" on their blue funnel,
M.T. "Anggada VII" 800 h.p.
M.T. "Selat Tanakeke" 1,160 h.p.

2. Every vessel of 31 m. LOA and over, under Pilot's direction for berthing and unberthing is to be assisted by Port Administration mooring boat.

ANCHORAGE: The anchorage for vessels awaiting a Pilot is around the position Lat. 05° 07′ 30″ S., Long. 119° 22′ 30″ E. with depth of water 25 m. at LWS.

RESTRICTIONS: Every foreign vessel is to have special permission from Indonesian Government or Directorate General of Sea Communication for entering and should have representatives or handling Agent before entering this port.

Warships should contact the Indonesian Navy Commander of Territory VII (Pangdaeral VII) before entering the port.

MAX. SIZE: No length or beam restriction. Depth alongside is governing factor.

RADIO: See "Pilotage".

TUGS: See "Pilotage".

BERTHING:

Depths of Water:

Main Entrance Channel: 13 m. at LWS.
Soekarno Wharf: 8.5 m. to 9.5 m. at LWS.
Hatta Wharf: 9.5 m. at LWS.
Oil Jetty (Pertamina Jetty): 8 m. at LWS.
Anchorage in the inner waters: 11 m. at LWS.

Special Attention in West Monsoons (November to February):

All vessels alongside Soekarno and Hatta Wharf should use fore and aft mooring lines to buoys which are available, to prevent the beating of ship's hull against the wharf.

STEVEDORES: Stevedoring by Port Labour (UKA). Capacity for discharging: 12 ton gang/hour – General Cargo. 17 ton gang/hour – Bulk Cargo (in bags). Heavy cranes available, capacity 15 tons.

MEDICAL: Doctor and clinic available.

FRESH WATER: Available rate 50 t.p.h.

FUEL: Available, MFO 50 t.p.h.

GANGWAY/DECK WATCHMEN: There are no special deck watchmen services but can be arranged through Agent.

OPENING/CLOSING HATCHES: Work carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco. Only sufficient for personal use (500 grams tobacco or 200 cigarettes for one passenger).

Wine and/or spirits not permitted out of bond.

IDENTIFICATION CARDS: Needed by Immigration Office.

CONSULS: Japan and Norway.

REPAIRS: Minor deck or engine repairs possible.

AIRPORT: Macassar Airport, called "Mandai Airport", distance from town about 23 km.

Services: Macassar–Kendari and Jakarta–Surabaya–Macassar Manado every day (3 times a day). Macassar–Ambon–Jayapura.

TIME: Middle Indonesian Time, GMT plus 8 hours.

HOLIDAYS: Every Sunday; New Year (January 1st); Idul Adha (November 11th); 1st Muharam 1399 H. Isa Almasih (May 15th); Proclamation Day (August 17th); Mi'radj Muhammad (July 3rd); Idul Fitri (September 9th); Maulud Muhammad (February 20th); Santa Maria (May 15th); Christmas Day (December 25th). Work can be arranged at overtime rates.

POLICE/FIRE/AMBULANCE: Police, Fire 4306. Ambulance 7227.

TELEPHONES: No arrangements exist for placing telephones on board.

DELAYS: Caused by rain (bad weather).

DEVELOPMENTS: In near future, Macassar to have bonded warehouse, godown for dangerous cargoes and be able to handle containers.

SHIPMASTER'S REPORT: March 1986.

5 buoys marked swept channel which has been realigned west of Kudingareng Lompo. Most local vessels use the alternative swept channel which passes South and East of Kudingareng Lompo. Mariso Beacon has been replaced by Ujong Pandang Beacon. The windows of the flour mill and silo terminal are the most positive mark for approaching the pilot station. The light beacons close to the entrance are impossible to identify from the city lights behind.

Pilot station has VHF Channels 12 and 16. 24 hour pilotage service is now available. The Harbour is cluttered by a dozen unlit mooring buoys, and great care is needed for ship's propellers.

Standard Indonesian Arrival Formalities soon after arrival. Inspection team consists of 2 Immigration Officers, 2 Customs Officers, Officials from the Harbour Masters Office and 2 Agents.

Vessels loaded crated plywood, standard 8 in. × 4 in. sheets, averaging 1.070 kg. Freight measurement 1.8 cu.m., gross measurement 2.02 cu.m. stowage about 3.06 cu.m. in centre holds. Small fork lift stows 6 tiers high, then lay steel plates and load up to a further 6 tiers. Vessel worked 3 hooks which averaged 50 – 60 crates per hook per hour. Factory 10 km. by road. Special alertness required for closing hatches in sudden torrential rain at night. Also Special precautions required for pilferage, such as removing all pressure gauges from hydraulic systems in deck houses. Long hasp padlocks provide no security at all, being broken more quickly than they can be unlocked.

AUTHORITY: Department of Communication, Directorate of Sea Communication, Port Administration Macassar. 6th Sea Communication Regional Office, Ujang Pandang.

MADURA: 06.51 S. 112.57 E.

SHIPMASTER'S REPORT: December 1985.

LOCATION: The terminal is located 2.5 miles off the island of Madura on the N.W. coast in position: Lat. 06° 50′ 40″ S., Long. 112° 56′ 45″ E., near the entrance of Surabaya Strait.

DOCUMENTS: See "Jakarta".

PILOTAGE: Compulsory within the terminal limits. Pilot boards in the anchorage or if berthing on arrival Pilot will board 2 miles North of the storage tanker "Asoka Nusantara". Pilot comes on board from a tug flying the "H" flag and requires a lee with pilot ladder or accommodation ladder rigged on lee side.

ANCHORAGE: Within a 500 m. radius of position: Lat. 06° 45′ 30″ S., Long. 112° 56′ 49″ E. (2 miles North of storage tanker). Depth of water 32 m.

RESTRICTIONS: Normally daylight berthing only. Unberthing at any time.

MAX. SIZE: Max. LOA 250 m. Depth of water 75 ft.

HEALTH: The Health Authorities come on board after completion of berthing. They come from Surabaya by helicopter.

RADIO: All incoming tankers are to send 72 hours and 48 hours notice of ETA to Kodeco-Madura Marine Terminal, through Pertaminaship Jakarta (Telex: 44450 and 45348) as Agents, giving best ETA. The first message should also include the following information:

1. Name of tanker and radio call sign.
2. Cargo requirements.
3. De-ballasting time; if a separate/permanent ballast system is fitted on board, this must also be stated.
4. Maximum loading rate.
5. Arrival draft, forward and aft.
6. Last port of call.
7. Confirm that vessel has clean Bill of Health.
8. If there is any sickness aboard, give all available information as to the possible type of sickness.
9. Specification, difficulties, defective equipment or gear which could present a hazard or difficulties when mooring/unmooring or during operations.

Further ETA message should be sent (to Kodeco-Madura Marine Terminal via, Pertamina local Agent; Cable address: Pertaminaship Surabaya. Telex: 31390 PSHSB) when the tanker is 24 hours and 12 hours from the terminal and if any significant change occurs in the original ETA or those subsequent thereto.

VHF: The storage tanker keeps watch on Channel 16 throughout 24 hours. The Pilot works on Channel 6.

Whilst in the anchorage vessel is to maintain watch on Channel 16.

TUGS: 2 tugs, "Ogan" 1,700 h.p. and "Semeru" 3,200 h.p. assist in berthing.

BERTHING: The storage tanker "Asoka Nusantara" is of 107,000 d.w.t., LOA 260 m. and is permanently moored to an SBM by a 14 in. line. To load crude oil, the export tanker will be moored alongside the starboard side of the storage tanker. For this purpose 4 Yokohama fenders are laid on the water along the starboard side of the storage tanker. Six ropes are required at each end. Berthing is port side to.

Hose Connection: 2×12 in. rubber hoses with camlock quick release mechanisms. Ship's derrick required and connection is made by ship's crew.

LOADING: The storage tanker has 3×10,000 bbls.p.h. pumps. Maximum loading rate is 30,000 bbls.p.h. and minimum loading rate is 15,000 bbls.p.h.

Madura Crude Oil is as follows:

API at 60°F	46.0 – 47.0
Temperature	85°F – 90°F
Pour point	10°F

FACILITIES:

1. No dirty ballast facilities.
2. No slop tanks available.
3. No fresh water available.
4. No shore leave allowed.
5. No crew changes possible.
6. No stores available.
7. No clinic is available.
8. No bunkers available.

TIME: GMT plus 7 hours.

MALILI: 02.39 S. 120.59 E. (See Plan)
MANGKASA: 02.44 S. 121.04 E. (See Plan)

OPERATOR: P.T. International Nickel Indonesia (P.T. Inco).

LOCATION: Malili and Mangkasa Tanker Terminal are situated in the Gulf of Bone, South Sulawesi about 300 miles N.E. of Ujung Pandang.

Malili:

Malili port is situated in the Gulf of Bone, South Sulawesi about 5 miles from Mangkasa Sea Tanker Terminal.

Vessels arriving at Malili port must remain in the Roads Anchorage, Anchorage Light Buoy (Qk. Fl.) in position Lat. 02° 42′ 30″ S., Long. 121° 01′ 40″ E. Anchorage is to the South of the buoy and having average depth of more than 20 m. (LWS)

This port *is to be assigned for* dry general cargo discharging and loading of nickel ore.

The sea chart to be used is Indonesian Chart No. 319.

Mangkasa Sea Tanker Terminal:

The terminal is located at Lat. 02° 44′ 25″ S., Long. 121° 04′ 00″ E. This terminal is provided for tankers of about 20,000 d.w.t. which are to be equipped with hose lifting derrick at the port side manifold.

The sea terminal itself consists of a four buoy mooring.

The hose has a diameter of 12 in. and fitted with 12 in. × 150 lb. ASA flange. The submarine pipe diameter is 20 in.

FLAGS: In accordance with the practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching the port. These signals shall be displayed continuously until clearance is granted.

The above mentioned signals are:

Sunrise to sunset: quarantine flag "Q".
Sunset to sunrise: signal lights red over white.

The flag "N" should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Pilot boards.

The vessel should also fly its call sign until the vessel is secured in the berth. These call sign flags must be flown again when the vessel is sailing until the vessel is clear of the anchorage area and the Pilot has departed.

The "G" flag should be replaced by "H" flag if the Pilot is already aboard the vessel.

The "P" flag may may be flown if the vessel is going to sail within 24 hours.

DOCUMENTS: Indonesian Immigration, Customs and Port Officials will board the vessel to grant clearance. Each crew member should be in possession of an International Vaccination Card and passport.

The following documents may be required for granting Pratique for the vessels arriving from foreign ports:

Certificate of Registry.
Ship's Construction Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio/Telephone/Telegraph Certificate.
Derat or Exemption Certificate.
Cargo Gear Certificate.

The last Port Clearance and Crew Lists are also required.

Flag Dispensation: All foreign vessels entering Indonesian ports must have requested and been granted Flag Dispensation prior to the arrival at the port. Also a loading or discharging permit must have been applied for from the authority concerned. All this will be done by the general Agent.

PILOTAGE: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided.

MAX. SIZE: The tanker buoy mooring is designed for a vessel of 20,000 d.w.t., 26,700 tons displacement, LOA 600 ft., and max. draft of 31 ft.

RADIO: Vessels arriving between 0700 – 2300 hrs. (local time) should contact "Balantang Base" on VHF Channel 16 four hours before arrival to confirm arrival time.

Notice of Arrival: 72 hours prior to the arrival at Malili or Mangkasa Tanker Terminal, the Master has to cable his ETA to "Inco Ujungpandang" through Ujung Pandang Coastal Radio Station which then, will be passed on to Malili or Mangkasa Coastal Radio Station.

The Master has to reconfirm or amend the ETA 48 hours and 24 hours before arrival at the port.

The cable address of "P.T. International Nickel Indonesia" (P.T. "Inco") of Ujung Pandang is Nikel Indonesia Ujung Pandang.

The coastal radio station of Ujung Pandang has the following particulars:

Name of Station: Ujungpandang Radio.
Call Sign: PKF.
Frequency: 465 – 500 – 8686 – 13101 kHz (A1), and 4409 – 2182 – 6518.6 – 8738.4 kHz (A3).
Power: 1 kW.
Service Hours: See book of Indonesia Coastal Radio Stations.
Geographical Location: Lat. 05° 06′ 30″ S., Long. 119° 26′ 20″ E.

Details of Cable: The information cable should give the following data:

1. Name of vessel and radio call sign.
2. ETA in GMT and date (local time, GMT plus 8 hours).
3. The quantity of cargo to be discharged.
4. Maximum discharging capacity (for tanker only).
5. Vessel's draft on arrival.
6. If there is any sick crew on board or clean bill of health.
7. Last port of call.
8. Any hull, bulkhead or valve leakages which may cause pollution (for tanker only).
9. Distance in feet from bow to vessel's manifold connection.
10. Flange dimensions of vessel's manifold.
11. Any requirements such as provisions, fresh water, etc.

Language: The languages used are Indonesian and English.

BERTHING: Mangkasa Sea Tanker Terminal: Mangkasa Sea Tanker Terminal is an offshore system with 4 fixed anchors connected to buoys which have a quick release mooring system. Buoys are located to suit 20,000 tonners with 2 buoys on the bow and 2 buoys at the stern. These buoys are not lit.

Connection to tank farm is via 12 in. flexible hose joined to 20 in. undersea pipe to the tanks. The flexible hose is fitted with a 12 in.×150 lb. ASA flange.

If the jetty of Mangkasa Tanker Terminal or "four mooring buoys" is unoccupied and has been fixed for certain vessel, the vessel will be boarded by a Mooring Master in the anchorage area providing that the vessel in all respects ready to commence discharging her cargo. The NOR tendered by the Master concerned will be accepted at the time the Mooring Master boards.

Anchoring: A vessel which has to anchor on arrival due to certain circumstances has to inform Balantang Base (VHF Channel 16) of her exact time of arrival at the port. This is important for adjusting the acceptance of the NOR tendered, providing:

1. It is within daylight i.e. 0600 to 1800 hrs. local time. The NOR is considered to be accepted at the time the Mooring Master boards. Should the vessel have been at anchor, NOR is also accepted at the time the anchor is aweigh providing the Mooring Master is already onboard the ship.

2. It is not a public holiday or Sunday, unless the vessel is actually handled on that day.

3. The port is still open.

In addition to the above conditions, vessels arriving at an unreasonable time ahead of their last signalled estimated time of arrival will not be accepted.

Exact Time of Arrival: It is stressed that every Master has to advise the Port Control of his exact time of arrival to avoid unfavourable situations.

Work Crew Service: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches etc., will be required.

Tanker Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on stand-by during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with table shown on Page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Safety: Every vessel which berths at the buoys shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the mooring buoys shall ensure that all parts of the vessel to which any person may be lawfully required to proceed are properly illuminated.

Efficient and easy means of access shall be provided to every vessel at anchor and at the mooring buoys and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems necessary for the safety of the vessel or the moorings or both or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Logistic Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient crew members must be immediately available at all times to assist with any or all operations on board the vessel at the terminal.

MEDICAL: Treatment possible at the Nickel Projects Hospital at Soroako, about 60 km. from Malili.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: None.

REPATRIATION: Crew changes especially foreign crew are difficult to arrange.

REPAIRS: No facilities.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs and sealed from time the ship arrives in port until she leaves territorial waters.

Each person is allowed to bring in 200 cigarettes or equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officials will seal the stores.

SERVICES: Provisions and stores not available.

AIRPORT: P.T. "Inco" operate a charter flight between Malili and Ujung Pandang (formerly Makassar) twice a day with a Twin Otter aircraft, flying time 1 hour.

GENERAL: *Chart:* Chart for the area is the Republic of Indonesian Chart No. 319 (The Gulf of Bone).

Facilities: Malili region in which nickel ore mine exploration is taking place is a newly opened region, isolated in the middle of the jungle. It is, therefore, not surprising if no facilities are available at present.

AGENCY: Owners have to appoint one of the Indonesian shipping companies as their general Agent for Indonesia. This shipping company will then appoint P.T. "Inco" to be their sub-agent for the port of Malili and/or Mangkasa tanker terminal to attend the arriving vessel.

The agency appointment which should be confirmed by official company letter which has to be received at least 10 days prior to the ship's arrival at Malili Port or Mangkasa Tanker Terminal to give the general Agent a chance to arrange the necessary permits from the Indonesian Government.

MUNTOK: 02.04 S. 105.10 E.

DOCUMENTS:

Register Book.
Load-line Certificate.
Derat Certificate.
Harbour Report.
Radio Certificate.
Nationality Certificate.
Safety Equipment Certificate.
Port of Call List.
Last Port Clearance.
Light dues Payment.
Health Book.
6 copies Crew List.
3 copies Store List.
6 copies Passenger List (if any).
Navy Book.
Next Port Manifest from every port.
Vaccination Certificates.
All loading Custom paper from every port.

PILOTAGE: Not available.

ANCHORAGE: Safe anchorage in 10 m.

RESTRICTIONS: None.

MAX. SIZE: 2 m. draft at quay length 100 m., breadth 30 m.

RADIO: Not available.

TUGS: 7 tugboats available for communication between shore and ships, with capacity 340 h.p. each.

BERTHING: Anchorage 165° Tg. Kalian, 2 miles from shore. Only small vessels draft 7 ft. alongside quays.

STEVEDORES: Ordered by Agent.

MEDICAL: Facilities available.

TANKERS: No facilities.

FRESH WATER/FUEL: None.

CUSTOMS ALLOWANCES: 200 cigarettes per man; 1 bottle per man.

IDENTIFICATION CARDS: Not necessary.

CONSULS/REPAIRS/DRY DOCKS: None.

AIRPORT: None.

HOLIDAYS: On Moslem holidays, no cargo work.

SHORE LEAVE: After receiving permit issued by Chief of Police.

REGULATIONS: Customs, Harbour Master, Police Maritime, visit ship on arrival.

DELAYS: Delays due shortage lighter space.

PALEMBANG: 02.59 S. 104.45 E.

DOCUMENTS: Upon arrival ships have to fill in the following Forms:

Harbour Report obtainable from the boarding Pilot, or from the Harbour Master.
Pilot's Certificate.

Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
10 copies Crew List.
6 copies Passenger List.
2 copies Ship's Articles.
2 copies Store List.
Manifests.
Bills of Lading.

Maritime Declaration to be completed by Master upon arrival, obtainable from boarding Quarantine officer, or via Agency.

ARRIVAL: 2 days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs and Security for preparations of services.

Agent/Owners to advise Port Administration (Pilot Division) of vessels arrival 24 hours in advance.

PILOTAGE: Compulsory, consisting of Outer (River) and Harbour Pilot. Applications should be cabled to pilot vessel via Palembang Radio Station. Pilot vessel located at station position Lat. 02° 11′ 08″ S., Long. 104° 57′ 08″ E.

The Pilot may berth the vessel on request of the ship's Agent only after obtaining clearance from the Port Administrator, Harbour Master, Port Health Service and Immigration (foreign vessels only).

Vessels arriving in afternoon and unwilling to navigate the river in darkness should not hoist the pilot signal. The signal station is at the aforementioned pilot vessel, which answers the pilot signal as follows:

By night:

A flare-up light slightly over the railing, or waving with a white light means: Pilot will soon board the vessel. 1 red light vertical over a white light means: No Pilot available, vessel allowed to proceed until Pilot is met.

By day:

1. The international flag signal KYS from the International Code of Signal meaning: Pilot unable to attend due to motor defect or heavy seas. The Pilot can be picked up by ship's motor-boat.
2. The flag signal KKO meaning: No Pilot available, vessel allowed to proceed until Pilot is met.

Use of Harbour Pilot in Palembang is compulsory.

ANCHORAGE: *Musi Bar:* anchorage position Lat. 2° 08′ 30″ S., Long. 104° 58′ 30″ E., in depth of 9 fathoms, used for topping up ocean tankers from river craft.

RESTRICTIONS: Palembang is 54 miles upstream. The main entrance is the river arm between Tg. Tjarat and Tg. Gedeh.

Depths from sea to Palembang:

Outer Bar	45 dm. at mean level
For incoming vessels Channel East of Pajung	42 dm. ,, ,, ,,
For outgoing vessels Channel West of Pajung	45 dm. ,, ,, ,,
Channel South of the light-buoy	48 dm. ,, ,, ,,
South of Pajung	
Bar of Kupang	50 dm. ,, ,, ,,
Bar downstream of Kampung-Peradjen (9 miles from Palembang)	50 dm. ,, ,, ,,
Bar downstream of S. Lais (opposite Kundur)	50 dm. ,, ,, ,,

Incoming ships have priority in passing the Outer Bar from 2 hours to 1 hour prior to HW. From 2 hours to 45 minutes prior to HW, outgoing ships have to wait between Tangjung Gedeh and Tandjung Tjarat.

Channel East of Pajung for incoming ships.

Channel West of Pajung for outgoing ships.

MAX. SIZE: Max. length 185 m. Max. draft 7.5 m.

HEALTH: Vessels arriving from abroad have to apply well in advance from the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port. The provisional Free Pratique is only valid for this port, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO: Call sign PKC.

Time operating (GMT). Frequency 500 – 448 kHz; 0000 – 0100, 0400 – 0500, 0800 – 0900, 1200 – 1300 hrs. Frequency 8706 kHz: A.I 0100 – 0200, 0500 – 0600, 0900 – 1000, 1300 – 1400 hrs. Frequency 8799, 2 kHz: A.III 0200 – 0230, 0600 – 0630, 1000 – 1030 hrs.

VHF Channel 16, 20, 22, 26 and 28. Time operating (local time) 0700 – 1330, 1500 – 1730, 1900 – 2100 hrs.

VHF:

Harbour Master	Channel 14
Pilot	Channel 12
Tugboat Operations	Channel Not known
Port Operations	Channel 12 – 16
Safety/Security	Channel 09 – 12 – 16

TUGS: Vessels over 60 m. length are required to use at least 1 tug. 3 tugs available, 60 h.p., 650 h.p. and 1,100 h.p. 2 fire-fighting tugs at Pertamina, 750 and 850 h.p.

BERTHING: Anchorage in the vicinity of the quay, see chart for prohibited anchorage.

Harbour Board Quay: Berth length 450 m., depth alongside 5.5 m., depth front/middle 6/8 m.

Pusri Wharf (fertiliser plant) Left Bank: Wharf No. 1, length 140 m. No. 2, 116 m. No. 3, 110 m. No. 4, 120 m. Depth alongside, 8 m.

Coal Wharf – Kertapati Quay (Right Bank): Berth length 250 m., depth alongside 5.5 m. Situated 2.7 miles upstream from Harbour board quay.

Pladju and Sungai Gerong:

Wharf No.	Length (m).	Depth (m).

CRANES: *Palembang:* (Mobile cranes). 1 at 7 tons capacity, 1 at 10 tons, 3 at 15 tons, 2 at 18 tons, 1 at 25 tons and 1 at 30 tons.

There are 17 fork-lift trucks available, capacity 2 tons – 15 tons.

Pusri: 2 mobile cranes, capacity 5 & 7.5 tons. 3 shore cranes, capacity 25, 40 and 100 tons.

Pladju and Sungai Gerong: 3 Mobile cranes, capacity 15, 30 and 45 tons. 3 shore cranes, 1 at 15 tons and 2 at 5 tons.

MEDICAL: Hospital and First Aid available.

TANKERS: Pladju Terminal (Right Bank): Downstream of Harbour Board quay operated by P. N. Pertamina Unit II (Pladju) (ex-Shell).

Sungai Gerong Terminal (Right Bank): Downstream of Harbour Board quay, operated by P. N. Pertamina Unit II Sungai Gerong (ex-Stanvac).

DENSITY: 1000.

STEVEDORES: According to the requirements of the vessel concerned, labourers are requested from the U.K.A. (Port Labour Pool).

The usual working hours at the harbour are:

Monday – Thursday	0800 – 1200 hrs.
	1300 – 1600 hrs.
Friday	0800 – 1100 hrs.
	1300 – 1600 hrs.
Saturday	0800 – 1200 hrs.
	1300 – 1400 hrs.

Overtime is allowed on request.

FRESH WATER: Piped water supply is at 15/20 t.p.h., and through water barges is at 50/60 t.p.h. Water barge capacity 100 tons.

FUEL: Obtainable from Pertamina provided payment is arranged in advance through their Head Office in Jakarta. Delivery by pipe-line or barge.

REPAIRS: Facilities available.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

AIRPORT: Talang Betutu Airport is approximately 12 km. from the port.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 100 grams of tobacco. There is no alcohol allowance.

TIME: The Port is located in the zone of Western Indonesian Time, which is based on the time at the meridian of 104° 46′ 36″ East Longitude.

POLICE/FIRE/AMBULANCE: Security – 22386, Fire 20451/22386, Ambulance 22531.

IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.). A re-entry into country if there is no S.I.C.

REPATRIATION: A valid document is needed. A re-entry permit from the country concerned is sufficient, if there is no passport available.

CUSTOMS/NAVY REG.: Upon vessels arrival/departure, boarding team will come on board consisting of:

2 Navy Officers.
2 Customs Officers.
2 Health Officers (in case vessels coming from infected ports or abroad).
2 Immigration Officers (in case vessels coming from abroad only).
3 Clerks from Agents.

Nobody allowed on board until this team declares the vessel cleared.

AUTHORITY: Port Administrator.

PANARUKAN: 07.42 S. 113.56 E.

DOCUMENTS:

Port Clearance.
5 B/Model/Customs Clearances.
Customs papers.
Store List.
Crew List.
Passenger List.
Light Dues Certificate.
Seaman's Book and Health Certificate.
Ship's Registry.
Load Line Certificate.
Safety Radio Certificate.
Derat Certificate.
Certificate of Nationality.
Tonnage Certificate.
Suez Canal Certificate.
Dispensation for Deck and Engineer Officers.

PILOTAGE: Not available.

ANCHORAGE: With bearings: Patjaron Hill, 275°; white light, 128°; red light, 187°. This anchorage leaves ship 300 m. from 20 m. line and over 500 m. from 7.5 m. patch.

RESTRICTIONS: No restrictions, vessel may enter and leave port at any time.

MAX. SIZE: In anchorage position draft permissible up to 15 m.

HEALTH: Pratique will be arranged by Agent and especially if the ship is just coming from a country suspected of special disease or fever, otherwise Pratique is automatic and a quarantine doctor boards.

RADIO: *(a)* Coastal station: Call sign, PKD 2; medium wave, 500 kHz; WF, 474 kHz; working hours GMT, 2400–0100 hrs., 0400–0500 hrs. *(b)* Fixed station: Call sign, 8 AD 3; short wave, 8 MHz; working hours GMT, 0100–0400 hrs., 0500–0600 hrs.

TUGS: Tugs join vessel at anchorage position. Vessel can use tug's lines and the Agent will arrange. Usual charge for use of tug's lines.

BERTHING: There are no berths alongside.

STEVEDORES: 24 hours before ETA advice needed to arrange gangs.

MEDICAL: Hospital facilities available, vaccination/fever Certificates for crew can be issued by authority.

FRESH WATER: No facilities.

FUEL: No facilities.

GANGWAY/DECK WATCHMEN: Available.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: No restriction as long as goods remain on board ship.

CARGO GEAR: All gear supplied by stevedores except rain tent.

IDENTIFICATION CARDS: Needed if crew going ashore.

CONSULS: No local representation.

REPAIRS: No facilities.

TIME: GMT plus 7 hours.

HOLIDAYS: Sundays, 1st January; 17th February; 9th March; 7th May; 18th May; 15th August; 17th August; 28th September; 30th November; 1st December; 25th December. Work cannot be arranged on 30th November and 17th August but on other holidays cargo work can be arranged.

SHORE LEAVE: Can be arranged.

PANGKALAN SUSU: 04.07 N. 98.13 E.

PILOTAGE: Pilot obtainable.

ANCHORAGE: Suitable anchorage for vessels up to 40,000 d.w.t. at outer bar.

TUGS: 2 tugs available, each of 400 h.p.

BERTHING: Alongside wharf max. draft 5 m., overall length 95 m. Depth at LWS 3 m.

TANKERS: Pertamina/Japanese Terminal: A single buoy mooring situated 17 km. offshore in 15 m. depth of water. Mooring designed for vessels up to 150,000 tons. Loading rate 3,000 t.p.h.

SHIPMASTER'S REPORT: December 1978.
Location: Lat. 04° 13′ 05″ N., Long. 98° 24′ 30″ E.
Time: GMT plus 7 hours.
General: Normally weather is fair with moderate variable winds. But from November to March there are very often very strong Northeasterly winds together with heavy rain showers and thunderstorms. There are 2 tides a day, following the coast-line. The current on flood tide sets from N-buoy to S-buoy, the ebb tide sets from S-buoy to N-buoy. The depths around the SBM inside of these buoys are between 18 m. to 25 m. Vessels up to 100,000 d.w.t. are berthed at the SBM. The density is approximately 1023.

For approaching B.A. Chart No. 1353 is used. The Operator of the Terminal is Pertamina, Pangkalan Susu.

Navigation: Agent in Pangkalan Susu is Pertaminaship. Cable address is Pertaminaship Pangkalan Susu. ETA cables should be sent 72, 48 and 24 hours prior to arrival. First ETA should include the requested cargo.

Pangkalan Susu Radio belongs to Pertamina. Call sign is "PKBZ". Frequency 6456.5 kHz, calling band 6 mHz. The working hours are from 0700 to 1900 hrs.

VHF Channel for calling (Susu Radio) Channel 16, working Channel 12, 19, 20 and 24 for information. No Radio Pratique.

On arrival vessel has to anchor 2 miles East of SBM. At the anchorage the Pilot boards with the Loading Master and 7 crew, after the vessel is cleared by the Port Authorities. All stay on board to assist berthing and connecting cargo hose, and vessel has to supply food and accommodation. Regarding food – they are all very strict Moslems. They will also stay until the loading operation is completed.

Pilotage is compulsory (Government Pilot). A vessel will berth only during daylight, but unmooring day and night. After which the vessel has to anchor to await cargo papers.

Vessel must arrive with sufficient clean ballast for berthing at the SBM. Pilot ladder only is required.

Berthing at the SBM is normal SBM procedure with messenger rope from the vessel to pick up 1 rope only from the SBM. Then 3 ship ropes, eyes going from the vessel to the SBM and then back to the vessel again. During the vessel's stay at the SBM one tug is made fast with the ship's rope aft and the tug keeps the vessel clear of the SBM.

Tugs: Three tugs are used as follows:
1 tug 300 h.p. for floating hose.
1 tug 300 h.p. for line handling during mooring.
1 tug 1,700 h.p. for towing the vessel off the SBM and keeping her clear during the whole operation.

Steam turbine vessels have to run their turbine with 3–5 revs astern during their stay at the SBM and the tug aft.

Wharves/Buoys: SBM Pangkalan Susu is situated at Lat. 4° 13′ 05″ N., and Long. 98° 24′ 30″ E. and has a diameter of 15 m. and a height of 4.4 m. The buoy is an orange colour and has a red light with 3 long flashes, also 1 floating hose with 12 in. diameter. The SBM is used for export production of Katapa Crude and North Sumatra Crude. Four buoys are situated around the SBM within 1,000 m. of the SBM. Their positions are as follows:

"N"–Buoy	Lat. 4° 13′ 38.5″ N., Long. 98° 24′ 30″ E.
"S"–Buoy	Lat. 4° 12′ 40.0″ N., Long. 98° 24′ 30″ E.
"E"–Buoy	Lat. 4° 13′ 04.0″ N., Long. 98° 25′ 30″ E.
"W"–Buoy	Lat. 4° 13′ 04.0″ N., Long. 98° 23′ 57″ E.

The depth of water is between 18 m. and 25 m. in this area.

Repairs/Dockyards: No repairs possible.

Supplies/Service: Provision supply possible. But no bunkers, water, deratting certificate, no Consuls, crew change or medical treatment available.

Cargo Operations: Terminal Operator is Pertamina, Pangkalan Susu. Cargo information can be received on Channel 19. Other information on Channel 16 (Susu Radio) 19, 20 and 24. Loading rate 2,000 t.p.h., but can be reduced to 1,600 cu.m. when necessary for topping tanks. One×12 in. cargo hose is connected from SBM to ship's manifold, for connections, ship's derrick is used on portside with minimum 5 tons load (SWL). Seven crew with Loading Master assist for connecting the hose.

API=50.0 Temp.=85°F

One hour and again half-hour before completion of loading the Loading Master is to be informed. He will then stand by for stopping the cargo. All papers are typed on board the vessel and vessel has to supply typewriters, two if possible, to reduce the waiting time. After completion of loading the vessel will anchor about 1 mile off the SBM to wait for the cargo papers to be completed (about 2 to 3 hours).

Rescue/Distress: No salvage or Coast Guard available.

Port Authority: The vessel has to anchor about 2 miles off the SBM and the Custom Officials, Immigration, Quarantine Officer and Agent will board the vessel at the anchorage, about 12 persons in all. The authorities also clear the vessel if she is also bound for Kuala Beukah. For clearance the following are requested:

12 Crew Lists; 2 Vaccination Lists; 3 Stores Lists; 3 Crew Effects Lists; 1 Health Declaration; 1 Ship's Health Book for Indonesian Ports only, if not on board it will be issued by the authorities.

Approaches: The approach is very easy. The coast line gives a very good picture on the radar for navigation. But it is very difficult to pick up the SBM on the radar due to many fishing boats and fishing houses. The fishing boats will also interfere with the approach, especially during the night, many of them are showing no lights, until the vessel is very close.

PANGKALBALAM: 02.06 S. 106.08 E. (See Plan)

DOCUMENTS:
Health Documents:
Maritime Declaration of Health.
Derat Exemption Certificate.
Vaccination Certificates.
Crew and Passenger List.
Health Book.

(a) Port Health Measures: The Port Health Service is responsible for the protection of the port against the introduction or dissemination of quarantinable diseases. This responsibility is based on:
1. The National Quarantine Law.
2. The National Epidemiological Law.
3. International Health Regulations.

(b) Vaccination/Immunisation:
Vaccination and Immunisation against cholera can be carried out by the Port Health Service. Yellow Fever prevention is carried out by the Port Health Service and General Hospital.

(c) Extermination of rats is carried out by the Port Health Service at the expense of shipping Agent.

Ship's Certificates: The Ship's Certificate should be delivered to the Harbour Master through the Agent.

The certificates will be returned to the ship's Master prior to the ship's departure.

Ship's Manifest and Bill of Lading: The copy of the ship's Manifest should be delivered to the Port Administration through the Agent.

Ship's Arrival/Departure:
(a) Two days before arrival of vessel, the ship's Agent has to inform the Port Administration, by completing appropriate forms. Copies of completed forms must also be submitted to the Harbour Master, Port Health Service, Immigration, Customs, and Security for preparation of services.
(b) Before departure Port Clearance is issued by the Harbour Master, after Clearance has been obtained from Customs, the Port Health Service and Immigration.

Immigration: Vessels carrying passengers arriving at Indonesian ports from abroad should have to show the "N" flag.

The Master is required to furnish the boarding Immigration Officer with a Passenger List showing the names of all on board and classified as:
(a) Disembarking passengers.
(b) Transhipment passengers.
(c) Through passengers (from abroad to ports outside of Indonesia).

PILOTAGE: Not available.

ANCHORAGE: Safe anchorage at green buoy, 10 m. Anchorage area: 02.05 S.106.13 E.

RESTRICTIONS: No anchoring at Eliot (red buoy).

MAX. SIZE: Length 140 m., breadth 30 m. Only vessels drafted 8 ft. allowed to discharge alongside the quays.

RADIO: Coastal Radio Station Pangkalbalam Radio, call sign PKC5.
Time Schedule:

Frequencies		*Working Times*	
2182 kHz	A.1	0000–0100	GMT
2690 kHz		0300	GMT
2090 Rx		0600	GMT
2075 Rx		0000–0600	GMT
2085 Rx			
2100 Rx			
2638 Rx			
Channel 16 VHF.			

VHF: Channels 16, 15, 10, 20, and 22.

TUGS: 4 tugboats available, owned by P.N. Djakarta Lloyd, P.T. Samudera-Indonesia, and P.T. Pelni for communication between shore and ships. Capacity 150 h.p. – 350 h.p.

BERTHING: First Wharf: Length 60 m. Depth 3 m. – 4 m.
Second Wharf: Length 60 m. depth 5.0 m.

CRANES: 2×10 tons (Port Authority), 4×10 tons and 1×4 tons (Private), All mobile cranes.

Port Authority has 2×2.5 ton fork lift trucks. 2×2.5 tons (Private) also available.

STEVEDORES: Ordered by Agent. Rates 15/20 t.p.h. per gang.

MEDICAL: First aid available at the scene of accident. Medical treatment or advice available regularly from the Port Health Service. Hospitalisation available at general and private hospital at Pangkalbalam.

FRESH WATER: Not available.

FUEL: Not available.

CUSTOMS ALLOWANCES: *Customs Regulations:* Ports in Indonesia are divided into:
(a) Sea Ports, i.e. ports at which foreign vessels may call without a "Flag Dispensation" from the Ministry of Communications (Directorate General of Sea Communications) and the Ministry of Finance. (Concerning the import and export of goods).
(b) Coastal Ports at which only vessels flying the Indonesian flag may call according to the Regulations.

The Port of Pangkalbalam is a Sea and Coastal Port. Vessels unloading and loading cargoes have to get a Customs Permit. The Cargo Manifest, the Ship's Store List and the List of Crew's Belongings have to be delivered to Customs within 48 hours.

Tobacco Allowance: Each crew member is allowed to carry 200 cigarettes or 100 grams of tobacco ashore without paying import duty.

Alcohol Allowance: There is no allowance for alcoholic drinks.

Other Commodities: Maximum value of US$100.

Each crew member is allowed to bring in goods for personal use up to maximum value of US$100.

IDENTIFICATION CARDS: Crew members having no passport are required to carry a Seaman's Identification Card (S.I.C.)

CONSULS: None.

REPAIRS/DRY DOCKS: None.

REPATRIATION: A valid document is needed, entry permit from the country concerned is sufficient, if there is no passport available.
AIRPORT: Pangkalpinang 14 km. Regular airlines to Jakarta and Palembang every day.
HOLIDAYS: On Moslem holidays, no cargo work.
POLICE/AMBULANCE/FIRE: Police 386 LB; Ambulance 444 OTM; Fire 326 LB.
SHORE LEAVE: After permission by Chief of Immigration.
REGULATION: Every ship on arrival must be passed by; Customs, Harbour Master, Maritime Police, Health service and Immigration Chief.
DELAYS: Due shortage of lighter space.
AUTHORITY: Pangkalbalam Port Administration, Jl. Yos Soedarso No, Pangkalpinang, Indonesia. *Tel:* 21736, 21737. *Contact:* Mr. Soenaryo, Port Administrator.

PANJANG (Lampung), Including Tarahan: 05.28 S. 105.19 E. (See Plan)

PORT LIMITS: The Southern limit of the port is along the parallel 5° 34′ S.
DOCUMENTS:
Quarantine:
Vessels arriving from abroad have to hoist "Q" flag on arrival until boarded and released by Quarantine Officer.
Documents which have to be prepared:
Declaration of Health.
Derat (Exemption) Certificate.
Valid International Vaccination Certificates.
Crew and Passenger Lists showing the validity dates of above certificates.
Immigration:
Immigration, Crew and Passenger Lists.
Crew/Passengers to be cleared.
Customs:
General Declaration of Cargoes Aboard Ship.
(Copies of each Manifest).
Crew/Passenger Lists and Personal Effects Lists.
Ship's Stores List.
Clearance from Last Port.
Harbour Master: After having filled Harbour Report (handed to Harbour Master's Office or Boarding Agent), ships have to prepare the following documents to be kept in custody of Harbour Master during ship's stay in port.
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate(Passenger Ship).
Safety Equipment Certificate (Cargo Ship).
Safety Radio Telegraph/Telephony Certificate, and Ship's Radio-Station Certificate of Approval.
Declaration of Health.
Last Port's Clearance.
Subscription of Light and Harbour Dues and wharfage.
Crew/Passenger List.
PILOTAGE: Compulsory for vessels of 70 g.r.t. and over. Pilots are in Government Service. Pilot signals according the International Code of Signals. Boarding area is on the outer (West) side of a line of reefs, which extends from South to North on the West of the harbour basin. Pilot (7) can be ordered from the Port Administration via ship's Agents not less that 8 hours prior to berthing, and 4 hours prior to unberthing and shifting.

Pilotage information can be obtained from the Pilot Radio Station, Panjang Pilot/Panjang Radio/PKC9. VHF Channels 12 and 14, opened daily from 0030-1200 GMT. Pilotage available throughout 24 hours.
APPROACHES: *Navigational Report:* Approaching Panjang there are numerous small fishermen's houses built on bamboo sticks at sea, some without lights. Therefore approaching or sailing from Panjang at night time should not be attempted.
ANCHORAGE: Panjang Roads; outer (West) side of the reef about 2 miles from the breakwater.
MAX. SIZE: Max. draft 9.5 m.
HEALTH: During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.
Also see "Documents".
RADIO/VHF:
(a) Coastal Radio Station, Panjang Radio, call sign PKC4, working hours:

1. 500/430 kHz A1:	0100 – 0130; 0400 – 0500; 0700 – 0830; 1000 – 1030 GMT.
2. 6355 kHz A1:	0200 – 0230; 0600 – 0700; 0830 – 0900; 1030 – 1100 GMT.
3. 2182/2690 kHz A3H, A3J:	0500 – 0530; 0900 – 0930 GMT;
4. 6215.5 kHz A3H, A3J:	0130 – 0200; 0530 – 0600; 1130 – 1200 GMT.
5. 8808.8, 8/8284,9 kHz A3H, A3J:	0230 – 0300; 0930 – 1000; 1200 – 1300 GMT.
6. VHF Channel 16	0000 – 0600; 0900 – 1200 GMT.

(b) Pilot Radio Station/Panjang Radio/PKC9, working hours:
Channel 12 and 14: 0030 – 1200 GMT.

Vessels are requested to report correct ETA to Pilot Radio Station 2 or 3 hours before arrival and inform the ship's particulars as follows:
Name and Nationality of the vessel.
LOA, g.r.t., draft.
Last Port and Next Port of Call.
TUGS: It is compulsory for ships with a length of 70 m. and over to use tugboats in berthing and unberthing operation.

The port owns 2 tugboats of 800 h.p. and 250 h.p.; 4 other diesel tugboats from 100 h.p. to 230 h.p. owned by the PJKA (2) and the PT. Djakarta Lloyd (2).
BERTHING:
Quay A on the South side, length 172 m., depth 8 m. LW.
Quay B on the East side, length 210 m., depth 7 m. LW.
Quay C on the West side, length 138 m., depth 3 m. LW.
Quay D on the North side, length 200 m., depth 9.5 m. LW.
Oil Jetty on the South side of Quay C, length 20 m., depth 5.5 m. LW.
Oil dolphin of Pertamina in the outer basin, South side of the reefs, depth 6.0 m.

Ocean vessels can also be berthed at 3 buoys in the inner basin (harbour).
Tarahan: Terminal is one mile to the South of Panjang, operated by P.T. Tambang Batubara Bukit Asam. Berth length 170 m., depth 12.0 m., distance between dolphins 240 m. Max. size: 40,000 d.w.t. Max. LOA 179 m., max. beam 27 m., max. draft 8.0 m. Loading rate (coal) 5,000 t.p.h.
LIGHTERAGE: 16 lighters available, capacity between 70 and 170 tons, owned by Port Administration and Shipping Agents, can be hired for loading vessels at anchor or buoys.
STEVEDORES: There are 1,300 registered labourers; working hours 0800 – 1200 and 1300 – 1600 local time. Overtime possible after being granted by the authorities concerned; 24 hours per day working time recommended.

Gang's average capacity 20 t.p.h. for bulk cargo and 15 t.p.h. for general cargo.
MEDICAL: Medical attention can be arranged through the Agents. There is a port doctor. The general hospital is in Tanjungkarang, about 13 km. away, where sick crew members may be hospitalized.
TANKERS: See "Berthing".
FRESH WATER: Supply is handled by the Port Administration to the wharves through pipe-lines. All berths fitted with fresh water connections (6 hydrants). Capacity is normally about 72 t.p.h. No water barge available.
FUEL: Bunkering not available.
FIRE PRECAUTIONS: The Port Administration handles 1 fire-fighting truck and 1 fire trailer.

Smoking strictly prohibited in warehouses, inside the Pertamina yard, on oil-jetty, and on board tankers. During the time a tanker is discharging, fire extinguishers must stand ready on the pier.
CONSULS: No local representation.
REPAIRS: Minor repairs can be carried out.
DRY DOCKS: None available.
SURVEYORS: None available; no Classification Society is represented at the port.
GANGWAY/DECK WATCHMEN: None available.
OPENING/CLOSING HATCHES: Opening and closing of ship's hatches is normally carried out by stevedores.
CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agent about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.
CARGO GEAR: Loading and discharging effected by ship's gear. 6 mobile cranes, between 3.5 tons and 15 tons, are available from the Port Administration, as well as 17 forklifts (between 2 and 15 tons) owned by Port Administration and shipping Agents.
AIRPORT: Branti Airport situated about 34 km. from Panjang. Regular (domestic) flights, Tanjungkarang–Jakarta v.v. 4 times daily.
TIME: GMT plus 7 hours.
HOLIDAYS: Fixed dates are: New Year (1st January); Independence Day (17th August) and Christmas Day (25th December). Other holidays: Idhul Adha, First of Muharram, Maulid of the Prophet Mohammad, Good Friday, Christ's Ascension, Mi'radj of the Prophet Mohammad and Idhul Fitri (2 days).
POLICE/FIRE: Port security is maintained by the state police; tel: 31.228 (Harbour Police). Fire Brigade, tel: 31113 or 52.741.
TELEPHONES: No arrangement exists for placing telephone on board.
SERVICES: Radar and radio repairs possible.
SHORE LEAVE: Crew members are allowed ashore.
IDENTIFICATION CARDS: Shore passes needed, obtained via Agents.
DELAYS: Normal expected delays due to shortage of berthing facilities and rainy weather.
GENERAL: The port's status is general exports (rubber, coffee, pepper, timber, cattle fodder, corn, etc.)

Charts and nautical publications concerning this port are issued by the Indonesian Naval Hydrographic Office (HIDRAL).

All Government offices in the port (Except Customs) keep working hours as follows: Monday to Thursday 0730 – 1430, Friday 0730 – 1100, Saturday 0730 – 1330 (Customs 0700 – 1600).
Ferry Network: Panjang – Merak (West Java) twice a day 2300 hrs. and 1100 hrs. (Government railway ferry). 6 hour voyage.

Panjang – Jakarta: On Monday, Wednesday and Saturday 1300 hrs. by Government Boeing Jetfoil (3 hours voyage).

Srengsem (2 miles South of Panjang) – Merak: twice daily Ro/Ro ferry, 4 hours voyage.

Bakauheni (100 km. S.E. from Panjang) – Merak: Ro/Ro ferry each hour, 1.5 hours voyage. Panjang – Bakauheni 1.5 hours by car.
DEVELOPMENTS: Construction works for the extension of quay D with another 200 m. pre-stressed concrete wharf are under way, and planned for completion in 1986; including transit shed (3,000 sq.m.) directly behind new wharf.

Container – yard (25,000 sq.m.) behind new wharf.
AUTHORITY: Port Perum Branch Panjang, Directorate General of Sea Communication, Communication Dept. (Lampung – Indonesia), Jl. Sumatera Pelabuhan Panjang, Lampung, Indonesia.
Tel: (0271) 31379, 31149, 31146, 31155, 31401 (17 lines). *Telex:* 27391. *Cables:* Adpel Panjang. *Contact:* Administrator Pelabuhan Panjang or Kepala Cabang PERUM II Pelabuhan Panjang.

POLENG: 06.39 S. 112.55 E.

SHIPMASTER'S REPORT: April 1978.

LOCATION: The Poleng Terminal consists of the tanker "Lynda" moored stern first to an SBS. The "Lynda" is a tanker of some 72,000 d.w.t. The position of the "Lynda" is 06° 38′ 42″ S., 112° 55′ 23″ E.
PILOTAGE: Performed by the Master of the "Lynda".
ANCHORAGE: The anchorage position is anywhere North and West of the "Lynda" distance 1 mile. The depth of water is 26 fathoms and 9 shackles of cable is recommended.
RESTRICTIONS: The "Lynda" is moored in 180 ft. of water and there is no restriction regarding the draft or the size of ship that she can accommodate alongside.
RADIO: The Post and Telecommunications Department do not permit the use of the WT/RT on the "Lynda" so all ETA's are sent via Pertaminaship Jakarta.

Once the "Lynda" receives the ETA they then organise the 'opening of the Port' and the officials to clear the ship are ordered from Surabaja. The usual documents are required and 2 Agents come out with the officials.

VHF: The "Lynda" keeps watch on Channel 6 and only monitors Channel 16 when a vessel is expected.
BERTHING: The "Lynda" has 4 "Yokohama" type fenders on her port side for berthing. Six ropes are required at each end. Berthing is port side alongside.

The "Lynda" is loaded direct from the well and the API is 55 with a loading temperature of 84°. Normally, the API is 42-47. The pumping capability of the "Lynda" is 2,000 t.p.h. although we were only able to get 1,557 t.p.h. The cargo is loaded through 1×12 in. hose.

Prior to loading the tanks on the "Lynda" are ullaged in the presence of the Customs and the cargo calculated. This is repeated at the end of the load for the Bill of Lading figures. Clearance is granted from Poleng and all documents are signed prior to sailing. There being no early departure available.

At present they are receiving 1 ship about every 2 months, mainly topping-off operations and it is thought that the vessel may be moved to another position.

FRESH WATER: Not available.
FUEL: Not available.
STORES: Not available.
GENERAL: No Walport film exchange. All shore personnel are accommodated aboard the "Lynda". Some vessels have parted their mooring lines during the Winter months with winds of 25 knots and 8 ft. – 18 ft. seas running.

POMALAA and TANJUNG LEPEE:

04.14 S. 121.32 E. **(See Plan)**

LOCATION: Port of Pomalaa, Kolaka, is situated in the Gulf of Bone, S.E. Sulawesi in position Lat. 04° 10′ 30″ S., Long. 121° 36′ 00″ E.
LOADING POSITIONS:
Berth: Lat. 04° 10′ 30″ S., Long. 121° 35′ 56″ E.
Anchorage position for ore loading at Pomalaa: Vessels of 15,000 d.w.t. and over, Lat. 04° 10′ 00″ S., Long. 121° 35′ 24″ E. Vessels up to 15,000 d.w.t., Lat. 04° 10′ 06″ S., Long. 121° 35′ 30″ E.
Anchorage position for ore loading at Tanjung Lepee: Lat. 04° 13′ 38″ S., Long. 121° 32′ 31″ E.
FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessels numbers; Quarantine & Immigration Flag.
DOCUMENTS: To be produced upon vessel's arrival:

14 Crew Lists
4 Passenger Lists
5 Parcel Lists
5 Store Lists
8 Cargo Manifests
3 Narcotics Lists
3 General Information
5 Personal Effects Lists
3 Vaccination Lists
5 Fire Arms & Ammunition Lists
International Load Line Certificate
Maritime Declaration of Health Certificate
Health Book or Bill of Health
Derat Certificate
Last Port Clearance
Safety Radio Certificate
Harbour Report.

Inspection Team: This team consists of the Port Health Officer, Customs Officer, Harbour Master and Immigration Officer.

After the vessel is granted Free Pratique, the Immigration Officer checks passports, seamen's books and crew list and issues shore passes.

PILOTAGE: Pilotage is not compulsory and there is no Pilot at Pomalaa. Because Pomalaa waters are still declared as uncleared waters, it is advisable that vessels calling for the first time at Pomalaa, use a Pilot.

Pilot can be ordered from Ujung Pandang via Nikel Ujung Pandang not less than 72 hours before vessel's arrival at pilot station.

There are 2 pilot stations: (1) For Pomalaa loading point and berth, Lat. 04° 04′ 03″ S., Long. 121° 28′ 00″ E. (2) For Tanjung Lepee loading point, Lat. 04° 15′ 00″ S., Long. 121° 29′ 00″ E.

If vessel wishes to be piloted to the loading/unloading point on arrival day, vessel has to arrive at pilot station before 1200 hrs. local time for Pomalaa loading point and berth and before 1400 hrs. local time for Tanjung Lepee loading point.

RESTRICTIONS: *Arriving/Departing Hours:* Arrival: from 0600 – 1800 hrs. local time. Departure: 1. Pomalaa loading point and berth: from 0600 – 1600 hrs. local time. 2. Tanjung Lepee loading point: from 0600 – 1800 hrs. local time.
Mooring: The undermentioned vessels can be moored alongside berth: General cargo vessels of max. LOA 135 m. and tankers of max. LOA 110 m.
Depths: Bar channel 11.00 m. (LWS); Alongside berth, North Pier, 5.00 m. (LWS); South Pier, 7.00 m. (LWS). At Pomalaa anchorage or loading point: for vessels of 15,000 d.w.t. and over – 13.00 m. (LWS); for vessels up to 15,000 d.w.t. – 11.00 m. (LWS). At Tanjung Lepee anchorage or loading point – 24.00 m. (LWS).
MAX. SIZE: *General Cargo:* At North Pier: LOA not to exceed 135 m. and fully loaded draft not more than 5.00 m. At South Pier: LOA not to exceed 135 m. and fully loaded draft not more than 7.00 m.
Tankers: LOA not to exceed 110 m. and fully loaded draft not more than 7.00 m.
Ore Carriers: Fully loaded draft not to exceed 11.00 m. Vessels without cranes or derricks are not acceptable. Minimum capacity of cranes or derricks must be 5 tons.
General Cargo at Anchorage: Fully loaded draft not to exceed 11.00 m.
RADIO: Cables to Nikel Ujungpandang can be sent through Ujungpandang (Macassar) Coastal Radio Station, call sign PKF.
Arrival Notice: Information required.

Owner's advice: Owner to advise by cable to Adhiguna, Aneka Tambang Jakarta and Nikel Ujungpandang at least 8 working days before vessel's arrival at loading port.

Master's advice: At least 48 hours (or 72 hours if Pilot's assistance required) before vessel's arrival in Pomalaa waters, Master shall give the following information to Adhiguna and Aneka Tambang Jakarta and Nikel Ujungpandang. Last port of call, draft on arrival, estimated draft on departure, quantity of nickel ore or ferro-nickel ingots to be loaded, stowage plan (hatch division for the respective cargo), quantity and kind of commodity(ies) to be discharged and other necessary messages. Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call in due time, therefore Nikel Ujungpandang waits for the Master's telegram in order to make necessary preparation.

Shipper/Agent's advice: Shipper/Agents shall cable the Master 3 working days before vessel's arrival indicating the loading/unloading position prepared and other necessary messages.

Ship's radio transmitter is not to be used while lying in port.
VHF: Communication by marine VHF possible with the port.
TUGS: Available.
BERTHING: The wharf consists of a concrete quay extending 70 m. seaward and 18 m. breadth.
Priority: Ore carriers. First come first served. Other vessels: Priority to be given to tankers.
Loading/Unloading Facilities for General Cargoes:

Shore facilities: A number of mobile cranes with capacities of 5 tons and 20 tons are available, also forklifts.

Lighters: A number of lighters of 70 d.w.t. up to 120 d.w.t. are available.

Loading/Unloading capacity: About 12 tons per gang per working hour, depending on the type of vessel, available cargo spaces, vessel's cargo gear, kind of cargoes, size of hatches, etc.

Unloading Facilities for Tankers:

Pipe-lines: 1 line of 10 in.×1,600 m. for M.F.O.
1 line of 8 in.×1,600 m. for I.D.O.

Pumps: 3 booster pumps with capacity of 150 cu.m./h. each.

Hoses: 4 pieces flexible hoses of 10 in.×9.40 m. with ASA 150 flanges connections.

Unloading capacity: maximum 200 t.p.h. by ship or shore pumps.

Tank farm capacity: 2×5,000 KL for M.F.O.
1×1,500 KL for I.D.O.

Tank cleaning: Tank cleaning operation is not allowed in Pomalaa waters.

Lay-time: Lay time shall commence 6 hours after N.O.R. tendered.

Loading Facilities for Ore Carriers:

General: Loading of nickel ore at Pomalaa and Tanjung Lepee loading point is done by means of barges.

Number of gangs: Usually 4 gangs are used by vessels equipped with cranes or derricks. If necessary stevedores can provide 6 gangs.

Loading capacity: About 2,000 tons/24 hours per vessel, depending on the type of vessel, vessel's cargo gear, weather conditions, etc.

Unloading: Cargo for Aneka Tambang only.

Vessels without cranes or derricks are not acceptable.

Labourers will be supplied by shipper. Making the vessel ready for loading/unloading to be done by vessel's crew members.

STEVEDORES: Stevedoring is performed by P.T. Aneka Tambang's personnel. Loading/unloading equipment to be furnished by the vessel.
Working Hours: Loading to be effected on weather working days of 24 consecutive hours Sunday and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Buddhist New Year; Hindu New Year; Independence Day (August 17th); Christmas Day (December 25th). Idul Adha, Maulid Day, Easter, and Lebaran determined by Moslem calendar and differ from year to year by international calendar. For definite dates consult Port Administrator.

Despatch/demurrage money to be paid in accordance with the related contract.

Loading/unloading to be effected with customary quick despatch (C.Q.D.) on good weather working days whereby Sundays, holidays, governmental local holidays and Saturdays between noon and midnight and Mondays between 0000 hrs. and 0800 hrs. are always excepted.

At Shipmaster's request, work on these excepted days can be arranged. The principals will pay the overtime charge on these excepted days.

MEDICAL: Doctor, hospital and inoculation services available.

TANKERS: See "Berthing".

FRESH WATER: None. In an emergency water can be supplied in limited quantity (max. 200 tonnes). This supply is intended for special ship which can berth alongside the jetties.

FUEL: Not available.

TIME: GMT plus 8 hours.

CONSULS: None.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

REPATRIATION: Can be arranged. Repatriant is to be guarded by Immigration Officer from Pomalaa to Jakarta via Ujung Pandang until his departure from Jakarta to the destined country.

AIRPORT: There is one flight a week between Ujung Pandang and Pomalaa, served by Merpati Nusantara Airlines (MNA) using Cassa or Oisi Planes. Flying time about 60 minutes.

GENERAL:

Cash Advances: Cash advance at Master's request can be supplied by Agents in a reasonable amount.

Fumigation: No facilities.

Survey On/Off Hire: Can be arranged.

Ship's Chandler: None. In emergency cases, for a limited quantity Agents can act as ship's chandler.

Chart: Indonesian Sea Chart No. 152.

Nature of Bottom: Sand and soft materials.

M.P.S. Tax: So called M.P.S. Tax (freight tax) has to be paid in advance to the Indonesian Tax Office at Jakarta, through the General Agents, Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements.

The amount of M.P.S. Tax (about 2% of the concerned freight earned) will be advised by the General Agents, Jakarta to the Principals, if possible a few days before Principal remits advance payment for disbursements. The final calculation of the M.P.S. Tax will be made later.

Disbursements: At least 14 days before vessel's arrival at Pomalaa, vessel's principal have to remit US$4,000 to the account of General Agents, at Jakarta as advance payment of the related ship's disbursement.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the General Agents.

SHORE LEAVE:

Shore Pass: Shore pass must be carried by crew whilst ashore.

Visitors: Vessel's crew members are not allowed to invite friends, hawkers from shore aboard the vessel.

Visiting Kolaka: Crew members are prohibited to leave Pomalaa for Kolaka, except Master and Officers, who must be guided by Agents. Local leave in Pomalaa concession is permitted.

Shore Leave Hours: From 0600 hrs. to 2300 hrs. local time.

AGENCY:

General Agent for Ore Carriers: PT Pelayaran Bahtera Adhiguna. 10-12 Jalan Kalibesar Timur, P.O.Box 1313, Jakarta, Indonesia. Phone 276547. Cable Address: Adiguna Jakarta, Telex: Adiguna Jkt 42854.

General Agent for Non-Ore Carriers: To be nominated by principals.

Sub-Agents: PT Aneka Tambang, Unit Pertambangan Nikel, Pomalaa. Jalan Dr. Sam Ratulangi 60, P.O.Box 213, Ujung Pandang, Indonesia. Cable address: Nikel Ujungpandang. Telephone 22237 – 22234.

Sub-Agent's Head Office: PT Aneka Tambang 24-26 Jalan Bungur Besar, Jakarta, Indonesia. Phone: 410108, Telex: Antam Jkt 49147. P.O.Box 2513, Jakarta.

AUTHORITY: Port Authority of Pomalaa, Pomalaa, Sulawesi Tenggara, Indonesia. *Contact:* Harbour Master.

PONTIANAK: 00.01 S. 109.19 E.

SHIPMASTER'S REPORT: March 1986.

DOCUMENTS: Inspection team of 2 Immigration Officers and Agent board at anchorage. This was the second Indonesian port of call.

Standard Indonesian Arrival Forms required, soon after arrival at anchorage.

15 copies Crew Lists (8 signed/dated for arrival – 7 signed/undated for departure).
2 copies Vaccination Lists.
Indonesian Health Book.
5 copies Personal Effects Declaration.
2 copies Bonded Stores Lists.
5 copies Deck, Engine, Provisions Lists.
5 copies Ship's Dutiable Goods.
5 copies Narcotics List.
5 copies Ports of Call List.
5 copies Parcel List (even if "nil").
5 copies Arms and Ammunition List (even if "nil").
5 copies Animals List (even if "nil").
5 copies Currency List (even if "nil")./
5 copies Passenger List (even if "nil").
5 copies Import Manifest (even if "nil").
5 copies Transit Manifest (even if "nil").

PILOTAGE: Pilot station at Pontianak City.

ANCHORAGE: Ocean-going ships anchor S.W. of safe water buoy clear of prohibited area. Soundings have been reduced by up to 1.5 fathoms from those charted.

MAX. SIZE: Max. LOA 115 m., max. draft 5.3 m.

VHF: Pilot station on VHF Channels 12 and 16.

LOADING: Vessel loaded plywood crates of standard 8 ft. × 4 ft. sheets, averaging 1.070 kg. to 1.146 kg. Freight volume 1.8 cu.m., gross volume 2.02 cu.m., stowage 3.06 cu.m. centre holds. Vessel worked mostly one hook from a single barge alongside, 50-80 crates per hour. Using 1 forklift truck to stow 6 tiers, then laid steel plates and loaded up to 6 further tiers.

A large barge of 1,200 crates capacity, required 6.5 days to return to factory for a further load. Single tarpaulins on barges leave damp patches after heavy rain. Stevedores lived onboard. 19 miles by launch to city, about 3 hours and $115.00 per trip. Speedboat for 2/3 people about 30 minutes each way and about U.S.$136 per trip.

PULAU SAMBU: 01.09 N. 103.54 E.

DOCUMENTS: Upon arrival ships have to fill in the following forms:
Harbour Report (obtainable from the boarding Pilot).
Pilot Certificate.

Also required from the Masters are:
6 copies of Crew List.
1 copy Stores List.
1 copy Personal Effects List.

PILOTAGE: Pilots are in Government Service. Pilot signals according to the International Code of Signals. Pilots can be ordered direct by cable to the Harbour Master or via the ship's Agent. Pilot boards in position Lat. 1° 10′ 38″ N., Long. 103° 52′ 12″ E.

RADIO: Vessels calling at Pulau Sambu for bunkers should communicate with PKC 2 Pladju Radio or Tunasix Singapore, or direct with Sambu Radio PKJ 51 (A3 Radio Telephone) and VHF Channel 19.

HEALTH: Vessels arriving from abroad have to fly the "Q" Flag (yellow flag) until boarded and released by the Quarantine Officer. Masters have to fill in the Quarantine Form and signed by him and the ship's surgeon, if any, and produce the following:
Health Book or Bill of Health.
Derat (Exemption) Certificate.
Valid International Vaccination Certificates of Crew members and Passengers.
Crew and Passenger's Lists showing the validity dates of above Certificates.

During the time that the "Q" Flag is flying no one is allowed to board or leave the vessel except with the permission of the boarding Quarantine Officer.

TUGS: Available.

BERTHING: Pulau Sambu has an excellent location 8 miles South of Singapore and approximately 3 miles from the International waterway. It has 2 deep water jetties with a max. depth of 36 ft., a max. length of 440 ft., and the length of the navigable channel is 1,500 ft.

FUEL: Ideally, it is necessary to advise suppliers of bunkers required at least 15 days before the ETA of the vessel. The authorities at Pulau Sambu also require the vessel to contact them 24 hours prior to their ETA.

Bunkers available: Fuel Oil, 1000 seconds, and MDO.

CUSTOMS: Masters have to declare all local currency on board. It is strictly prohibited to take local currency ashore. No limitation for foreign currency.

Master should consult the Agent about prevailing Customs regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and fines.

AUTHORITY: Department of Sea Communications.

SABANG: 05.50 N. 95.20 E. (See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Health Book or Bill Health and vaccination certificates.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists with vaccination dates.
Ship's Articles.
Stores List.

Passport or seaman's card remain in Immigration office until cleared and the crew to use shore pass to go on shore, issued by the Immigration.

PILOTAGE: *Approach:*

Vessel should steer on the light of Klah Island and keep at least 1 mile offshore, especially of Ujung Masam owing to an inward drift, until the bay is well open. When entering the bay, the light-buoy South of Ujung Lho Me should be kept on port side.

The Signal Station at Peunimpun reports day and night the arrival of ships, by night an unofficial white light, showing all around is shown, visible at a distance of 12 miles.

Signals by day with flags according the International Code of Signals and by night by signal lamp.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the Port. The provisional Free Pratique is only valid for this Port, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO: Sabang Radio. Call sign: PKA. Frequency: 500 kHz/438 kHz. Time: 0100–0200, 0400–0500, 0900–1000 GMT. 8473 kHz/8686 kHz. Time: 0200–0230, 1000–1030 GMT. 17184.5 kHz Time: 0230–0300, 1030–1100 GMT. VHF – Available. Power – 1 kW.

TUGS: A small tug available for mooring assistance, subject advance notice.

BERTHING: The usual anchorage in the inner roads is the North side of the bay, vessels can approach shore until in 32 m. and 29 m. depth. There is good holding ground. During S.W. or S.S.W. squalls in the West monsoon vessels have to be kept free from the quays by means of the mooring buoys moored off the berths.

Western Coal Wharf: usable berth length 140 m. with depths alongside of 7 m. at LWS.

Eastern Coal Wharf: usable berth length 150 m. depths 6.8 m. at LWS.

Commercial Wharf: usable berth length 150 m. depths 8.0 m. at LWS (length: 220).

At the head of the oil jetty there is a depth of 10 m. at LWS.

FRESH WATER: Available, rate 30 t.p.h. with one hose. Usual to use 3 hoses. Water can be pumped faster if additional water pump used.

FUEL: Available from Pertamina, Jakarta if permit obtained.

REPAIRS: Minor repairs can be carried out at the West end of the Coal Wharf at the repair shop and electrical power station.

CUSTOMS ALLOWANCES: It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

AIRPORT: One domestic flight a day, 15 minutes drive from the Harbour.

AUTHORITY: Department of Sea Communication.

SALAWATI: 01.21 S. 130.59 E. (See Plan)

OPERATORS: Pertamina.

LOCATION: Salawati Marine Terminal is located in the Sele Straits between the Island of Salawati and mainland Irian Jaya, Indonesia

Salawati Marine Terminal Office is located on board the storage barge "Wampum" adjacent to the export tanker mooring.

Mooring system is positioned in Latitude 1° 21′ 18″ S. and Longitude 130° 58′ 39″ E. The minimum water depth in the area of the mooring system is 51 ft.

FLAGS: In accordance with practice in Indonesian Ports, Quarantine, Immigration, Pilot and call sign flags must be displayed by all vessels approaching the anchorage. These signals shall be displayed continuously until clearance is granted. The signals are as follows:

Sunrise to sunset:	Quarantine Flag "Q"
Sunset to sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.

DOCUMENTS: The boarding team, e.g. Agent, Customs, Immigration, Port Health Officers, Harbour Master will board the vessel in the anchorage area to grant clearance.

The Customs Officer will board the vessel to seal the stores. If arriving from a foreign port, the Agent will prepare the General Cargo Declaration form stating the cargo on board the vessel and attaching appropriate shipping documents. If the tanker is arriving from an Indonesian port, the 5-B form issued at the last Indonesian port will be retained by Customs and the arrival clearance at Salawati is granted.

The Harbour Master submits a Harbour Report Form for the Master to complete. The Agent prepares the ship's documents check list form to check the validity of each document. These documents are: Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Cargo Gear Certificate and Derat/Exemption Certificate. This list is then delivered to the Harbour Master with the following documents attached: Last Port Clearance, Crew List approved by the Immigration Officer and Light Dues Receipt if arriving from another Indonesian port. The Harbour Master issues a port clearance on departure provided clearance is also granted by the other governmental authorities (A Panamanian port clearance for Panamanian flag vessels is not required at Salawati).

The Immigration Officer requires 2 copies of the Crew List and will check the Ship's Articles and the passports of the crew. When these documents are found to be in order, an arrival clearance will be marked on the crew list.

If arriving from another Indonesian port the Agent will sign a guarantee if the vessel cannot prove that light dues have been paid.

Prior to the vessel's departure the Immigration Official requires 2 copies of the Crew List to be marked for departure immigration clearance. The Master is given a signed copy by the Immigration official of the Crew List for departure.

Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate/Ullage Report, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal. When the tanker has been loaded, the documents shall be completed and signed by the Master. Final clearance formalities will be carried out aboard the vessel in the anchorage area.

Customs will issue the 5–B form which is for departure clearance of the vessel.

The Master should be prepared to issue:

- 15 copies of Crew List.
- 4 copies of Cargo Manifest.
- 4 copies of Personal Effects.
- 4 copies of Bonded Store List.
- 4 copies of Store List.
- 4 copies Narcotics List.
- 2 copies of Vaccination List.

Before leaving the terminal area, the Master should advise the terminal the Vessel's ETA at destination.

PILOTAGE: The Salawati Terminal Pilot will board the vessel in the anchorage area for passage to the Salawati Terminal. The channel is marked with numerous Navigational Aids to permit safe passage through the Sele Strait. Vessels arriving in the anchorage area after 1400 hrs. local time (GMT + 9 hours) will be berthed at the terminal at Pilot's discretion.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use, and long enough to reach the mooring launch. A combination of pilot ladder and ship's accommodation ladder, so arranged that personnel can first use pilot ladder until part way up the vessel's side, and then transfer to the accommodation ladder is recommended, especially on very large ships. A light line should be ready to take aboard the Mooring Master's equipment. There should be adequate lighting at night. Vessels will provide a lee for the Mooring Master both when boarding and leaving.

ANCHORAGE: If requested to anchor, the recommended anchorage area is 4.5 miles West of Sorong in position Latitude 00° 53′ 00″ S. and Longitude 131° 10′ 00″ E. Under no circumstances should the export tanker enter the restricted area around the structures without the Mooring Master aboard.

RESTRICTIONS: The approach channel has a minimum depth of 49 ft. A minimum under keel clearance of 6 ft, is required, restricting the maximum loaded draft of an export tanker to 43 ft.

Strength of Tide: Up to 4.5 knots.

MAX. SIZE: Salawati Marine Terminal can accept vessels up to 60,000 d.w.t. Under certain weather conditions, vessels up to 100,000 d.w.t., light loaded to the equivalent of a 60,000 d.w.t. vessel may be accepted. Such acceptance is at the discretion of the Area Superintendent or his designated alternate.

The Ship's Master must not permit his vessel to be loaded to a depth of more than 43 ft. deepest draft due to the restrictions of water depth in Sele Strait unless permitted to do so by The Company Area Superintendent or his designated alternate.

HEALTH: Each tanker entering the port of Salawati must have requested and been granted entry permit/agency permit prior to its arrival. At the same time application is made for provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the harbour authorities. Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If provisional pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.

Each crew member should be in possession of an International Vaccination Card.

RADIO: It is most important that incoming tankers contact Salawati Marine Terminal 72 hours before the estimated time of arrival. Further cables should be sent to the terminal 48 hours and 24 hours in advance of arrival, or when ETA changes by more than 3 hours. Communications with Salawati Marine Terminal can be established using one of the following links.

Details of Arrival Cable:

The following information should be included in the cable sent to Salawati Marine Terminal 72 hours in advance of arrival.

1. Name of vessel and radio call sign.
2. ETA in GMT and date (Local time is GMT + 9 hours).
3. Cargo requirements.
4. Deballast time.
5. Maximum loading rate.
6. Arrival draft.
7. If there is any sickness aboard give whatever information is available as to the possible type of sickness, or confirm that vessel has clean bill of health.
8. Last Port of call.
9. Any hull, bulkhead, valve or pipe-line leaks on vessel which could effect loading or cause pollution.
10. Flange dimension of vessel's manifold connection.

Procedure for Appointing Agent:

Owners should appoint "Pertaminaship" Jakarta, as General Agent by cable/telex which in turn will appoint Pertamina Unit V as handling Agent to attend the vessel at Salawati Marine Terminal. Pertaminaship should be notified two weeks prior to tanker's arrival.

General Agents: Pertamina Directorate of Shipping & Telecommunications
Pertamina Building, 6th Floor, 1A, Jalan Medan Merdeka Timur,
P.O. Box 327,
Jakarta Pusat, Indonesia
Cable Address: Pertaminaship Jakarta
Telex No.: DKT 44450 Answerback Pertamina.
Telephone: 343806, 343781 (Tanker Agency & Operations)

Entry Permit or Agency Permit:

Each tanker entering Salawati Marine Terminal must have requested and been granted entry permit prior to its arrival. It is vital that the General Agent receives the following information two weeks before vessel's arrival to obtain agency permit for foreign vessel from the Government/Directorate General of Sea Communication:

1. Name of owners/principals and full address.
2. Name of vessel.
3. d.w.t./Call Sign/Flag.
4. Name of Master/Number of Crew.
5. Last Port of Call.
6. ETA.
7. Destination after loading.
8. Indonesian Ports of Call.

The ship's Master is responsible to ensure that no communication by radio is allowed within the terminal area. Unauthorized radio communication will be cause for cessation of all operations, except clearing of the berth, and vessel's notice of readiness will be immediately nullified.

VHF: Vessels equipped with VHF radio telephone should contact terminal on International Mobile Service Channel 16/156.80 MHz from 0000–2400 hrs. GMT. The language of the terminal is English and Indonesian.

BERTHING: The Company Area Superintendent, or his designated alternate, shall be the sole authority to decide when the port is closed due to unsuitable weather conditions preventing normal working operations.

Various combinations of wind, sea, and tidal conditions, also the size, length, ballasted trim, and handling qualities of a vessel can affect the decision to berth a vessel at Salawati Marine Terminal. All of these factors have to be evaluated before a final berthing decision is made.

After a vessel has been berthed, a terminal official will board to discuss loading arrangements. Before any crude is loaded all ship's scuppers on main decks must be plugged and cemented oil tight. Approved mechanical means of closing scuppers may be accepted. A deck inspection will be made by Salawati officials and if the vessel is suitable for loading crude oil a signed notation to this effect will be made on the Company Dry Certificate.

It is the responsibility of the vessel to ensure that all mooring lines are properly tended. Salawati personnel will constantly check the vessel's mooring and at any time may direct the lines to be heaved tighter or slackened off under the supervision of a responsible ship's officer, as circumstances warrant.

During the vessel's stay at the mooring emergency towing wires shall at all times be hung over the ship's bow and stern. These wires shall be secured to the bollards inboard to enable the vessel to be towed away should the need arise. They must be tended throughout to keep the eye of the wire not more than 2 ft. above the water.

The terminal official will report unsatisfactory conditions to the Company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing therefrom will be for the ship's account.

A ship may be rejected, if, upon inspection, it is not properly equipped, or if it is not suitably manned, or if it has dirty ballast or tanks unsuitable for the cargo as determined by the Company Area Superintendent or his designated alternate.

A vessel is suitably manned if it has a full complement of qualified officers and a crew all of whom are in sober condition, competent and willing to carry out their duties and orders.

A ship must be equipped with a good working propulsion unit as passed by the appropriate survey society. Inoperative ships, or partially inoperative ships will be rejected. Should it become inoperative while at the moorings it will be removed at the vessel's expense.

No repairs are to be made while mooring or unmooring, or at the moorings without the express permission of the Company Area Superintendent or his designated alternate.

A vessel must have both bower anchors in good working condition and in such sizes and amounts as to meet either "Lloyd's or A.B.S." standards although they may be, in fact, classified by other societies. It is strongly recommended that anchors have proper anchor buoys attached to each anchor.

All vessels must carry adequate, synthetic lines used for mooring purposes. No wire ropes should be used for mooring export tankers at this terminal. Each mooring rope must not be less than 100 fathoms in length.

To assist in vessel's turn around, the Mooring Master will advise necessary booms and cargo gear rigged and ready before the ship is berthed.

BALLAST: No facilities are available for disposal of dirty ballast.

Owners and Masters are required to observe International Convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Sele Strait.

It is the responsibility of the ship's Master to see that no oil of any kind is pumped or spilled overboard from his ship. Drip pans, sand, dispersant etc., should be used at all times especially when disconnecting hoses, in order to avoid any spillage overboard.

The categories of pollution include oily water from bilges, crude residual from previous voyages, or any other matter that may result in pollution of the sea.

Any fines imposed by governmental authority for pollution shall be for the vessel's account.

In the event that the Company has to settle any third party claims as a result of damages to property caused by pollution attributable in any way to the vessel, they will have the right to reimbursement by those responsible for the vessel for all expenses incurred.

In the event of oil spillage or pollution of the waters all labour and employment costs for cleaning operations will be to the vessel's account if caused by the vessel.

As soon as practical after arrival, all tankers will be inspected by a Salawati Marine Terminal Official for dirty ballast. During discharge of ballast similar inspections will continue.

If evidence of oil appears at any of these inspections, the ship will be rejected, and will not be accepted again until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, the ship may be rejected or refused further loading.

If the ship's tanks are found to be leaking, it will not be accepted for loading.

A tanker must have sufficient ballast for safe handling having due regard to existing weather and sea conditions and also for safe passage through the Sele Strait. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and terminal, and by a knowledge of the behaviour of his own ship, a ship's Master may come to the terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

In addition to the lights usually displayed, vessels at the moorings discharging ballast or loading cargo during darkness will brilliantly illuminate the sea around the ship, so that any pollution will be noticeable. The lighting will be of an approved and permanent nature.

Tankers equipped with a separate system of ballast tanks will be allowed to discharge ballast, and load oil simultaneously, providing approval is first obtained from the Company Area Superintendent or his designated alternate or independent inspector.

Most responsible ship Owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washings with chemicals. The result is that no oil discharges into the sea and oil separated is collected in a slop tank. The terminal will load on top of such slops unless otherwise directed. This system is highly recommended to avoid pollution of the Sele Strait.

Masters are warned that inspection of ballast is strict.

Any tanker rejected because of dirty ballast or sea pollution will automatically nullify his notice of readiness and will lose any priority of position for loading.

LOADING: It is absolutely essential that extremely careful supervision be exercised by officers of vessels while loading operations are in progress. A responsible ship's officer is required to be on duty continuously at a point near to the tanks being loaded. He will be assisted by an adequate number of ship's personnel in these operations.

Raising, lowering, connecting, tending and disconnecting of oil loading hoses as well as other labours and duties on shipboard connected with loading of cargo or maintaining mooring lines in a correct manner will be performed by the ship's crew directed by a responsible officer as required by the terminal official. Loading of export tankers is through two loading hoses with 10 in. ASA 150 connections.

All ships using Salawati Marine Terminal must be able to connect their manifold to the 10 in. flanges. Masters are reminded that it is the ship's responsibility to provide such reducers as may be required to make the connection and that the hose connecting operation will normally be carried out while the ship is de-ballasting.

The Terminal Official will report unsatisfactory conditions to the Company Area Superintendent or his designated alternate, who may, in turn, reject the ship until corrections are fully made. All costs accruing there from will be for the ship's account.

Request for the terminal to stop the flow of oil cargo at a predetermined tonnage must be in writing. The request must include the statement by the ship's Master that the Company will not be held responsible for any error and that in case of the vessel being overloaded the excess cargo cannot be pumped back to the storage tanker. Ship's Master will also be held responsible for any oil spills caused by this request.

The export tanker must move the loading hoses from the oil storage barge by means of its own derrick and using its own crew. The cargo derrick required to raise the loading hoses from the oil storage barge side must have minimum lifting capacity (SWL) of 5 tons and have a sufficient length of strong lifting wire rope on the drum to enable the cargo hook to reach the oil storage barge side, which is approximately 45 ft. away from the tanker's side, and still have adequate turns of wire left on the drum to ensure safety. Vessels which may consider the lifting capacity of their gear to be marginal should strengthen their gear accordingly. A common way to do so is to rig a second topping lift on the boom.

An A.O. Smith metering system is used to load the export tanker.

Two loading hoses with 10 in. of ASA 150 camlock flange connections are used to load the export tanker. All vessels not having 10 in. connections must provide their own reducers.

A loading rate of approx. 20,000 bbls.p.h. can be accomplished.

If, at any time an overflow of crude oil occurs, loading will be suspended immediately, and not be resumed until the oil is cleaned up and removed from the decks of the vessels, and/or from the surface of the sea, and any damage is repaired and no further danger exists. It is stressed that during loading operations, the Salawati cargo supervisor will immediately slow down the loading rate on receipt of a request for same from the ship's deck officer in charge of loading.

All spillages of oil must be reported immediately to the Company Area Superintendent, or his designated alternate, and subsequently, a detailed report, in writing, submitted by the Master of the vessel concerned giving all relevant details.

CARGO: *Typical Salawati Crude Analysis:*

Gravity at 60°F	41° API
Reid Vapour Pressure	2.0 at 100°F
Sulphur, Wt.%	0.5%
Kinematic Viscosity at 100°F	4.2 cs
Pour Point, °F	+20°F
Carbon Residue	1.3% by weight
B S & W	0.1% by weight
Flash (PMCC),°F	Below 50°F

CARGO DOCUMENTATION: Crude oil loading documents such as Bills of Lading, Quality Certificate, Quantity Certificate, Dry Certificate, Ullage Reports, Time Loading Report, Certificate of Origin, Cargo Manifest and Master's Receipt for Documents/Samples are prepared at Salawati Marine Terminal.

When the tanker has been loaded, the documents shall be completed and be taken aboard the tanker for the Master's signature.

Notes of protest, if any, should be handed to the Company Area Superintendent or his designated alternative for further delivery to Phillips Petroleum Company Indonesia, Jakarta.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: No clinic available.

REPAIRS: No facilities.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beer, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Master should prepare two copies of the store list for Customs use.

CONSULS: None.

REPATRIATION: Not possible. If emergency conditions prevail, for humanitarian reasons, exceptions to the foregoing may be permitted. All expenses incurred will be for ship's account.

TIME: GMT plus 9 hours throughout the year.

SHORE LEAVE: Not possible.

DELAYS: Delays to vessels using Salawati Marine Terminal due to the port being closed because of bad weather conditions shall not be computed as used lay time when compiling vessel's turn around time.

GENERAL: *Advances:*

Owners are to pay advance funds for port charges amounting to US $4,000.00 to US $9,000.00 depending on d.w.t. before vessel arrivals. Settlement should be arranged by telegraphic transfer to "Pertamina Agency" account No. 135. 15.000.000005 with the Bank Negara Indonesia 1946, Cabang Gambir, 77A Kebon Sirih, Jakarta under advice to Pertaminaship.

Logs: Masters are advised to keep careful watch on the approaches for semi-submerged floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Admiralty Chart No. 3744
2. Admiralty Chart No. 3745.
3. Admiralty Chart No. 1416.
4. Indonesian Hydrographic Charts No. 213, 217 & 219.

Winds: Winds can reach a maximum of 75 m.p.h. during local storms and all vessels must make sure they carry sufficient ballast to be manoeuvrable in the restricted waters of Sele Strait during these storms.

Stores: Not available.

Visitors: Only authorized personnel or visitors are permitted on the storage barge and/or export tanker.

Crude Oil Testing: The crude oil testing laboratory is equipped to perform the following tests:

API Gravity, BS & W, Pour Point, R.V.P. and salt content. Any additional tests that may be required will be performed in Jakarta.

Flag: During daylight hours the Indonesian flag must be flown throughout the vessel's stay in port.

SHIPMASTER'S REPORT: August 1978.

General: The loading terminal is located on the East coast of Salawati Island at Sele Strait. Salawati marks the Western part of New Guinea and belongs to Indonesia.

Reference: Refer to B.A. Charts 3744, 3745, 1416.

Coast Pilot 35, Eastern Archipelago Volume III.

Documents: Inward and outward clearance carried out at anchorage. Watches in excess of one, radios, cassette recorders, perfume etc., will be sealed by Customs. Seal will be inspected when receiving outward clearance. Papers required for clearance:

15 Copies of Crew Lists.
4 Copies of Cargo Manifest
4 Copies of Personal Effects
4 Copies of Bonded Store List
4 Copies of Store List
4 Copies of Narcotics List
2 Copies of Vaccination List

Ship's registry taken ashore and returned on outward clearance.

Pilotage: Government Pilot and Mooring Master – usually from Kasim Terminal board at anchorage. Mooring Master acts as Pilot. From the anchorage vessel proceeds through Sangoilin Mon (Heilige Straat) and Sele Strait towards Salawati. Heilige Straat is marked by unlit buoys and beacons, privately maintained by the oil companies. The min. depth is 49 ft., max. sailing draft from Salawati is 43 ft.

Anchorage: Recommended anchorage in position Lat. 00° 53′ S., Long. 131° 10′ E. in approx. 25 fathoms of water.

Restrictions: Usually transit from anchorage towards Salawati is carried out during daylight hours only.

Vessels of 100,000 d.w.t. have been berthed at Salawati.

Health: Radio pratique not available.

Radio: Pertamina office listens on VHF Channel 16 but calls are seldom answered. Kasim Marine Terminal listens on 16 and contacts Pertamina office by telephone.

Advance notice. As per Charterer's instructions to Pertamina, Jakarta.

Tugs: Two tugs are available from Kasim Terminal to assist in berthing and unberthing.

Berthing: Berth is constructed of 2 mooring dolphins and 2 breasting dolphins with storage barge "Wampum" being moored to the Western side of dolphins and export tanker being moored to the Eastern side.

Vessel may berth port or starboard side to, depending on stage of tide. The vessel is moored with 8 ropes forward and 8 aft, ropes being handled by mooring launches.

Two hoses of 10 in. are connected to ship's manifold by ship's crew. The barge is said to have a capacity of about 70,000 LT, the maximum loading rate of Salawati crude is 20,000 bbls./hr.

Vessels not having received inward clearance by 1500 hrs. local time at the latest will have to await the following daylight before proceeding towards Salawati.

Weather/Winds: Uniformly high temperatures, high humidities and abundant rainfall. Winds are usually light, with a seasonal reversal as N.W. and S.E. Monsoon, however, winds can reach a maximum of 75 m.p.h. during local storms.
Tide: Between 2 – 5 knots at berth and in Sele Strait, rise of tide about 2 m.
Repairs: Not available.
Supplies/Services: None available.
Shore Leave: Not possible.

AGENCY: Pertamina Shipping Directorate, Jakarta, handles all Agency matters for tankers.
AUTHORITY: Pertamina, Jalan Yos Soedarso No. 32-34, Jakarta, Indonesia. *Tel:* 62.21.490311. *Contact:* Mr. Indra Kartasasmita.

SANTAN TERMINAL (Attaka): 00.06 S. 117.32 E. (See Plan)

LOCATION: The Terminal is situated on the East Coast of Kalimantan, Indonesia in the Makassar Strait. It is about 80 miles North of Balikpapan.
DOCUMENTS: If arriving from a foreign port the following documents may be required for granting pratique. Certificate of Registry, Ship's Construction Certificate, Load Line Certificate, Safety Equipment Certificate, Safety Radio/Telephone/Telegraph Certificate, Exemption Certificate, Cargo Certificate and Derat Certificate. Also required will be last Port Clearance and Crew List.

Crude oil loading documents will be prepared at the Santan Terminal and when the vessel has been loaded the documents will be completed and final clearance formalities will be carried out on board.

Each Crew member should be in possession of an International Vaccination Card and Passport or Seaman's Book. Indonesian Immigration, Customs and port officials will board the vessel to grant clearance.
Flag Dispensation: Each tanker entering the Santan Terminal must have requested and been granted Flag Dispensation prior to its arrival. At the same time application should be made for provisional Pratique through the Directorate of Quarantine and if granted, a cable advice is sent to the harbour authorities. Port Health clearance is issued prior to the tanker's arrival and is also valid for departure. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the Agent.
Customs and Immigration: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, Pilot and call sign flags must be displayed by all vessels approaching Santan. These signals shall be displayed continuously until clearance is granted.

The signals are as follows:

Sunrise to Sunset:	Quarantine Flag "Q"
Sunset to Sunrise:	Signal Lights (red over white)

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag (request for Pilot) should be flown until the Mooring Master boards. The vessel should also fly its call sign, (signal letters). This signal may however be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag which signifies that the Pilot is aboard. The tanker may fly the "P" flag if it is going to sail within 24 hours.
PILOTAGE: *Procedure When Berth Available on Arrival:* A vessel for which a berth is available on arrival will be boarded by a Mooring Master in the anchorage area and providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the Notice of Readiness will be accepted at the time of the Mooring Master boarding.

If the vessel is not in all respects ready to proceed to the berth, with main engines fully manoeuvrable, mooring ropes on deck, windlasses, winches, etc., in good working order and readiness, it will not be accepted until the Mooring Master is satisfied that all these conditions are met.

Also see "Operations".
ANCHORAGE: If vessels are obliged, or instructed, to anchor, they should do so in the recommended anchorage and on no account are they to manoeuvre or anchor West of Longitude 117° 33.5′ East unless a Mooring Master is on board. The depth of water is 40 m. with a bottom of mud/clay. Holding ground is considered good.

The Southern limit of the anchorage is defined by two buoys Number "10" coloured red and Number "12" coloured red and white chequers. At night both buoys show a white light flashing 1 second every 6 seconds.

The Southerly limit of a reef on the Northern side of the anchorage area is marked with a buoy numbered "11" coloured black. At night this buoy shows a green light flashing green 1 second every 5 seconds. Another buoy coloured with red and black horizontal bands and marked with the letter "A" shows a group flash light showing 3 white flashes every 6 seconds.

All the buoys are fitted with radar reflectors.
READINESS: *Procedure When Instructed to Anchor on Arrival:* A vessel which has been instructed by Santan Port Control to anchor on arrival should, after doing so, inform Port Control of the precise arrival time. According to the practice of the port, acceptance of the Notice of Readiness will coincide with this arrival time, providing:

a) Vessel is within scheduled date range.
b) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
c) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
d) That the Port is open.

An exception to clause (a) above, is when conditions allow night berthing, in which case the vessel will be accepted when the Mooring Master boards, or, should the vessel have been at anchor, when the anchor is aweigh, providing that the Mooring Master is then on board.

In addition to clauses (a), (b) and (c) above, vessels will not be accepted when arriving at an unreasonable time ahead of their last signalled estimated time of arrival. It is not the practice of the port to keep Pilots (Mooring Masters) on station in the anchorage. Santan Port Control maintains a continuous listening watch on Channel 16 VHF.

Notwithstanding anything in the foregoing, Notice of Readiness will not be accepted at a time when it is not the practice of the port to accept it.

Also see "General".
NAVIGATION:
Attaka Reef: The Attaka Reef is marked with a buoy coloured red and yellow chequers. At night it shows a white light flashing 2.5 seconds every 6 seconds.
Ship Approach Channel: The ship approach channel to the Santan Anchorage is marked with 4 buoys and numbered from seaward 2, 4, 6 & 8 respectively. At night they show a white light flashing 0.5 seconds every 2 seconds. The No. 2 buoy is positioned at Lat. 00° 04′ 7.5″ S., Long. 117° 47′ 39.5″ E. Ships should stay to the North of these buoys.
SBM: The SBM is fitted with a radar reflector and at night shows a Qk. Fl. W. light. One of the floating hose strings is fitted with two winker lights.
Inshore Area: Inshore of the SBM area a concrete pile beacon painted red and numbered "16" shows a white flashing light every 6 seconds and marks the Northerly limit of two dangerous reefs.

The work boat canal is marked by 2 buoys, the Northerly one numbered "15" and showing a white flashing light and the Southerly numbered "18" and showing a red light.

There is a beacon on each bank of the canal, at the shore line. The North bank beacon showing a white light and the South bank a red light.
Onshore Area: A radio antenna approx. 150 ft. high is located at approximately Lat. 0° 05′ 24″ S., Long. 117° 26′ 34″ E. The mast shows fixed red air lights by night on the top and midsection.
MAX. SIZE:
Minimum Size Acceptable: The minimum sized tanker acceptable at the Terminal is the T-2 Class or equivalent of not less than 17,000 d.w.t.
Maximum Size Acceptable: The maximum sized tanker acceptable at the Terminal calling for a full cargo is 125,000 d.w.t.
RADIO:
Procedure for Appointing Agent: Owner should cable: Pertamina Ship Jakarta. The cable should appoint Pertamina as Agent to attend the tanker at Santan and should be sent 2-4 weeks prior to vessel's arrival.
Advice of Arrival: 72 hours prior to arrival at the Terminal vessels should advise the company of their estimated times of arrival by cable sent via "Pertamina's" coastal radio station at Balikpapan. They should also confirm or amend ETA when they are 48 hours and again when 24 hours, distant from the Terminal.

Union Oil Company of Indonesia cable address: Pertamina Tanjungsantan.
"Pertamina's" Coastal Radio Stations:

I. Name of station – Balikpapan Radio; Call Sign – PKN 2; Frequency – Keeps watch on 2182 kHz A3, answers on 4415 kHz A3, 6520 kHz A3 (vessel's selection); Class – A3H-A3J; Power – 500 watt; Service – 24 hour; Location – Lat. 01° 16′ S., Long. 116° 50′ E.

ETA messages sent to PKN2 should be addressed:

Pertamina Tanjung Santan =
Message ....
Master...............

As long as no direct contact exists with PKN2, ships send ETAs to PKI2 (See below).

II. Name of station – Jakarta Radio; Call sign – PKI2; Frequency – 500 kHz (operates on 452 kHz), 2182 kHz answers on: 4178, 4280.5, 4363, 4410, 6457.5, 6520, 6516 kHz. 8 MHz (operates on 8628 kHz); Class – A1 500 kHz; A3 2182 kHz; A1 8 MHz; Power – 1 kW, 500 kHz, 500 watt, 2182 kHz; 1 kW 8 MHz.

Service – 500 kHz H24, 2182 kHz 0400 – 0500, 0700 – 0800, 1000 – 1100, 1500 – 1600, 2000 – 2100, 2300 – 2400 hrs. GMT; 8 MHz 0100 – 0300, 0500 – 0600, 0900 – 1000, 1100 – 1200, 1400 – 1500, 1730 – 1900, 2100 – 2200 hrs. GMT.

Location: Lat. 06° 08′ 00″ S., Long. 106° 50′ 00″ E.

ETA messages sent to PKI2 should be addressed:

Pertamina Tanjungsantan via PKN2 =
Message ....
Master...............

Details of Cable: The following information should be included in the cable:

Name of vessel and radio call sign.
ETA in GMT and date (local time is GMT+8 hours).
Cargo requirements.
Deballast time.
Maximum loading rate.
Vessels draft on arrival.
If there is any sickness aboard or clean bill of health.
Last port of call.
Any hull, bulkhead, valve or pipeline leaks on vessel which could affect loading or cause pollution.
Distance in feet from bow to vessel's loading manifold.
Flange dimensions of vessel's manifold connection if not to ANSI B76.5, B.S. 1560, Series 150 or equivalent.

VHF: Vessels equipped with VHF radio telephone should contact "Santan-Control" on Channel 16 (156.80 MHz) when within range to request instructions.
Language: The language of the Terminal is English and Indonesian.

MOORING/UNMOORING: This description is only intended as a guide and may be varied as to the order in which lines are taken up etc. according to the circumstances prevailing at the time of mooring.

Moorings Required From Tanker: The ship must provide and have ready the following: Two mooring ropes and one rope messenger line on the forecastle.

The Approach: The ship approaches the buoy from down tide and wind, taking care to keep the wind right ahead. Adequate ballast must be retained on board to ensure that the vessel retains full manoeuvrability throughout the approach to the buoy and the actual mooring.

Bringing Aboard the Mooring Lines: The vessel will be brought to a position close to the buoy with the vessel stopped in the water and with the buoy fine on the port bow. During the approach to the buoy and while mooring, a terminal work boat will keep the hoses pulled well clear to port. Under normal conditions the port rope will be the first taken on board. The Mooring Master will advise as to which rope is to be taken first and as to which fairlead this will be taken. The actual work of mooring will be done by a terminal work crew. The ship will lower a strong messenger line to the mooring boat who will in turn make this fast to the approach rope. The approach rope of 10 in. circumference will be hove aboard and will in turn be hove in until the chafing chain and triangular plate is centred in the fairlead.

Securing the Mooring Lines: While the approach rope is being hove aboard, a strong wire strop will be made fast to a set of forecastle bitts. To the end of this strop will be fitted a 50 ton shackle and the strop will be so made fast at the end and the shackle will be about 5 ft. inboard of the fairlead. The approach rope will be hove on until the large link of the chafing chain is sufficiently far inboard for it to be connected to the strop by the 50 ton shackle. When this is done the approach rope will be slacked off until the full weight comes on the strop/chafing chain/buoy rope. The buoy rope is 150 ft. long and is 12 in. circumference double nylon of plaited construction.

The approach rope can now be taken to the bitts to act as a preventer. The second rope is now taken aboard and made fast in the same way. When both the ropes are fast, good ropes or strops, provided by ship, can be made fast to the spare links on the chafing chains to back up the main moorings.

Fire Wires: A fire wire must be rigged on the starboard side for'd and on the stern. These must be tended throughout vessels stay at the SBM to ensure that they are kept within 2 ft. to 3 ft. of water. In case of fire the tugs would connect to these wires to pull vessel clear of the SBM.

Connecting Hoses: When the mooring is completed, the work boat holding the hoses clear will bring these alongside the ship in way of the port side manifold.

Unmooring: To unmoor from the buoy any extra back up lines that have been made fast to the chafing chains are slipped first. The approach ropes are then taken to the ship's windlass/capstan and the weight taken on them until the shackle between the strop and chafing chain is undone. With the vessel moving slowly astern the approach ropes are slacked off and finally slipped and allowed to float free. While the ship is unmooring, a terminal work boat will keep the floating hoses towed clear and will keep them clear until the ship has slipped the moorings and is clear of the buoy.

Strops and shackles will be provided by the Terminal and put on board as the vessel approaches the buoy. The ship must provide 2 mooring ropes at least 8 in. circumference and 100 fathoms long, a 4 in. circumference messenger line, and two rope lashings 4 in. circumference and 15 ft. in length. These lashings should be of manilla or polypropylene, nylon is not acceptable.

BERTHING FACILITIES: The Sea Terminal consists of a "single point mooring" loading berth also known as a "mono-buoy" or "single buoy mooring". The berth is located at Lat. 00° 06′ 18.6″ S., Long. 117° 32′ 18.8″ E.

The "single buoy mooring" is approximately 4.33 miles offshore in 28 m. of water. The submarine line to the "single buoy mooring" is 30 in. in diameter. A single string of 20 in. submarine hose connects the submarine line header to the "single buoy mooring". Two strings of 16 in. floating hose connect the "single point mooring" to the tanker rail hoses which are 12 in. in diameter. The hoses are always taken up on the port side.

Hose lifting Derrick Capacity: Tankers must be equipped with a hose lifting derrick with a lifting capacity in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide.

Manifold Connection Sizes: The minimum size manifold connection will be 8 in. The Terminal is equipped with flanged spools to also connect to 10 in., 12 in., and 16 in. manifolds. Tanker manifolds should terminate in ASA Series 150, flat face flanges. Unless the Terminal is given adequate notice, tankers equipped with manifold flanges of other sizes or ratings will be rejected.

BALLAST/POLLUTION:

Adequate Ballast: Due to the exposed location of the crude oil loading berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International Convention Laws and Indonesian government regulations concerning pollution of the sea, having particular regard for this area of the Makassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the SBM or in the anchorage.

Inspection During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

Fines and Claims: Any fines imposed by governmental authority for pollution shall be for the vessel's account.

OPERATIONS:

Mooring Master: A Mooring Master will board the vessel in the anchorage area and advise the Master on all manoeuvres relative to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have a pilot ladder long enough to reach the Mooring Master's launch. At night adequate lighting should be provided. Ships with more than 30 ft. freeboard should rig a pilot ladder to a position 3 ft. above the water and an accommodation ladder so rigged that the Pilot can transfer from the pilot ladder to the accommodation ladder once he is clear of the pilot boat.

Work Crew: Mooring and unmooring, lifting, lowering, connecting and disconnecting hoses will be done by a terminal work crew under the direction of the Mooring Master. Assistance from ship's personnel in operating windlasses, winches, etc. will be required. Ship's crew will assist in hose connection/disconnection/mooring/ unmooring and carrying equipment from deck to forecastle as required. Any vessel whose crew do not give such assistance may be rejected and returned to the anchorage. Costs of such a delay would be for the ship's account.

Tankers Engines and Hose Lifting Derrick: Being an open roadstead, vessels must keep engines on standby during their stay in the berth. No repairs to main engines may be undertaken while in berth. Power must be kept on deck winches in case adjustments to mooring lines are found necessary. Ship's booms and deck winch must be capable of operating with a SWL in conformance with the table shown on page C2 of Appendix C to the International Oil Tanker and Terminal Safety Guide. Vessels with inadequate hose lifting equipment will be rejected.

Only the automatic turning gear should be used. If it should become necessary to turn the propeller(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order that arrangements can be made to ensure that hoses are kept clear. The Mooring Master's written permission *must* be obtained before any such increase in revolutions.

Hanging Off Hoses: Small bitts for hanging off loading hoses should be provided in line with the loading manifold.

Safety: Every vessel which berths at the buoy shall remain under the charge of the Master who will take all steps necessary to preserve the safety and security of such vessel, crew and terminal personnel who may board in the execution of their various duties.

The Master of every vessel at anchor in the designated anchorage or secured to the SBM shall ensure that all parts of the vessel, to which any person may be lawfully required to proceed, are properly illuminated. Efficient and easy means of access shall be provided to every vessel at anchor or at the SBM and such access shall be adequately illuminated between sunset and sunrise.

No person(s) shall be permitted to board or leave the vessel other than by the gangway or other proper means provided for the purpose.

The Mooring Master may require the vessel to unmoor at any time he deems it necessary for the safety of the vessel or the moorings or for infringement of Port Regulations.

Unsatisfactory conditions will be reported to the company's Marine Superintendent, who is empowered to reject a vessel for future calls unless the reported deficiencies have been remedied.

Sufficient Crew members must be immediately available at all times to assist with any or all operations on board the vessel at the Terminal.

LOADING: *Loading Rate:* Maximum loading rate will be about 30,000 bbls.p.h. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible. Care should be taken not to overload, as there is no possibility whatever of pumping back ashore. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in a completely light condition.

Closing Valves Against Oil Flow: Warning is given of the danger of closing valves against an incoming oil stream. This will create excessive pressures which may result in damage to the loading hoses, sea-line and Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Radio Contact: During loading operations the vessel will contact the Terminal Despatcher ashore every half hour by the assigned VHF channel to ensure that radio contact is being maintained. Pumping will be stopped immediately if it is found that radio contact with the ship has been lost.

In addition to the ship's VHF the Mooring Master will carry a portable radio, of approved design, with which he will be able to contact the shore terminal and mooring launches.

Mooring Launch: Throughout the loading operation a terminal mooring launch will be in attendance at the ship to tend hoses etc.

Every vessel requiring a shore stop will be required to inform the Mooring Master at start of loading and sign the form carried by the Mooring Master, requesting shore stop. When requesting a "Shore Stop", Masters must understand that Union Oil Co. of Indonesia accept no responsibility for any errors in the quantity. Should the cargo asked for overload the vessel, it is not possible to pump oil back from the ship to the shore.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances. The Customs officer will seal the stores.

FACILITIES: There are no facilities of any kind at Santan. There are no engineering repair shops; no fresh water; no bunkers available; no provisions or stores; no crane or barge service; no shore leave; no crew changes; no consulates available.

GENERAL: *Exact Arrival Time:* It is stressed that vessels must advise Port Control of their exact arrival time, as failure to do so may lead to loss of their berthing turn.

Lay Time: Lay time will be calculated as outlined in the Crude Off-Take Procedure, Attaka Unit.

Conditions of Use of Port: The Master of each tanker will be given a copy of the Conditions of Use of Port of Santan Marine Terminal, which he will be asked to sign.

Delay Due to Excessive Deballasting: Delays in commencement of loading due to deballasting in excess of 6 hours will be deducted from the laytime.

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

Charts: Charts for the area are as follows:

1. Republic of Indonesia, Chart 130, East coast of Kalimantan, Balikpapan to Muara Berau.
2. Republic of Indonesia, Chart 37, East coast of Kalimantan, Muara Berau Kutie River to Cape Mangkalihat.
3. U.S. Naval Oceanographic office, old Chart H.O. 3044, new Chart N.O. 72014 Borneo East coast. Sandakan Harbour to Sungai Mahakam.
4. U.S. Naval Oceanographic office, old Chart H.O. 6185, new Chart N.O. 72110 Borneo East coast, Tanjung Mangkalihat to Tanjung – Tamarong.
5. British Admiralty, Chart 2636, North part of Strait of Makassar.
6. British Admiralty, Chart 2660, China Sea – Southern Portion.
7. British Admiralty, Chart 941-B, Eastern Archipelago.

Sailing Directions: Sailing directions are in the following:

Eastern Archipelago Pilot, Vol II. 7th Edition, 1961.

Hydrographic Survey: A detailed hydrographic survey was carried out from November 1971 to January 1972, of an area between Lat. 0° 03′ S. and 01° 23′ S. and extended from the shore line to some 20 miles offshore. Charts are available on request from the Terminal showing the results of this survey for the approaches to the Terminal on a natural scale of: 1:25,000 and for the anchorage and loading area on a natural scale of 1:12,500.

SHIPMASTER'S REPORT: 1976

Situated about 80 miles North of Balikpapan on the East coast of Borneo, in 00.07 S. 117.28 E., the only chart available BA.2636 is of too small a scale to advise safe first time entry in darkness. So, after a number of unsuccessful attempts to contact Santan Terminal for instructions – only the latter portion of his transmissions were being received, and very underpowered, it was decided to await daylight, cruising on 118.00 Meridian.

At 0600 hrs. vessel was again in the vicinity of Attaka Buoy, Pilot contacted by VHF 16. He instructed us to proceed 270° T and he would meet us, East of SBM. The SBM is located about 4.5 miles offshore, marked by a QK.FL.W. light, vis. 6 miles, and is impossible to distinguish from Attaka Buoy.

The best approach is to reach a point 4 miles North of Attaka Buoy which has a Ra.Refl. and was identified at just under 12 miles. From thence, subject to the Master's assessment of the situation, and assuming possession of a copy of the Chartlet, to proceed inward on 257° T, which will take him along the Approach Channel. But he should be prepared for quite strong set to North or South – this being my experience, both inward and outward. Pilot states that up to 125,000 d.w.t. can be handled. Originally, the channel had 4 buoys, marking the South side of the channel, but the outer 2 have been withdrawn. Channel has been swept and min. depth shown is 50 m. Each buoy has a Ra.Refl. and with 3.5 mile spacing, are easy to track on radar and visually, once their existence is known, from the Chartlet.

An anchorage area exists between 0.5 and 2 miles East of the SBM, bounded by 3 buoys to West side and 1 to South. These mark Coral Shoals. The Pilot said it was acceptable to come straight in from Attaka Buoy, in ballast, but loaded vessels must stay in Swept Channel, as the possibility of isolated Coral Heads exists, and the area South of the channel has not been fully swept.

A mooring/hose party boards with the Pilot, and takes care of these duties, the vessel only being required to provide an officer and 2 winchmen on the foc's'le and an officer and winchman for connecting the hoses (2×16 in.). A ship's mooring line is lowered to the launch to pick up the port SBM polypropylene line, this finally brings up a chain (approx. 8 in. dia. link). A special very flexible wire, provided by shore, is secured round both Port and Starboard forward bitts on foc's'le head, with an eye at each end projecting forward. The mooring chain is then shackled to this. A stout messenger is acceptable for picking up the starboard mooring, but it is advisable to have a second mooring line available on deck in our opinion. The chain is then shackled to the South eye of the shore wire, which is around the bitts. There is no provision for quick release gear, so letting go in an emergency, e.g. wind, would not be easy.

Hoses are 16 in., but fitted with 12 in. flanges (not reducers) and are bolted to manifold, again no quick release provided. Pilots' estimate of weight of each hose is 7.5 tons. Hoses are hung off on chains passed round manifold supports, instead of cruciform bollards – apparently because of the length of chain used. Hose/mooring party work well and safely.

EDP is not available, and vessel had to lie awaiting papers after leaving SBM for about 40 minutes, after which passage outward along the channel was without problem, with adequate water depths all the way.

Radio messages are sent via Balikpapan PNK2 to Petroleum Balikpapan, but appears to be on only 2 hours a day. But Pilot said they had not received our ETA's, but said this was quite normal. Agents were Pertaminaship Jakarta. No relief facilities, stores, water or bunkers available, and mail both in and out not advised, due uncertain delivery.

SHIPMASTER'S REPORT: May 1986.

Vessel: 95,000 d.w.t.

All papers as per Senipah were required, also transit cargo or 'nil' cargo manifest, in duplicate. Terminal is operated by Unocal 76. Coast Guard boarded with Agent to inspect vessel's documents which were also taken ashore by Agent. Polypropylene rope aft for tow boat.

With reference to Admiralty Chart No. 3040 only No. 8 channel buoy still exists. According to the Pilot the depth of 18.5 adjacent to buoy 'A' is decreasing.

SEMARANG: 06.56 S. 110.25 E. (See Plan)

DOCUMENTS:

Required for inward and outward:

Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Radio Telegraphy Safety Certificate.
Derat Exemption Certificate.
Last Port of Clearance.
Safety Equipment Certificate.
Health Book (used Indonesian Port only)
Crew List (9 copies).
Stores List.
Personal Effects List.
Free Pratique Granted.
Light Dues Bill from last Port of Call.
Customs Cargo Clearance (PU) Import.
Customs 5 B Form from Last Port of Call.
Manifest (25 copies).
Customs Documents Export Cargo (if any).
Customs Documents Transhipment (Model H if any).

Authorities boarding the vessels on arrival:

Immigration Officer.
Customs Officer.
Quarantine Health Officer and Police Officer.

PILOTAGE: Ships with deadweight of more than 900 tons and with draft of more than 3.5 m. must anchor in roads. To enter the Harbour, Pilot required. Pilot can be applied for by raising "G" flag while ship is anchoring/arriving.

ANCHORAGE: Anchorage 3 nautical miles from coast, where depth 9 m. For smaller ships safe anchorages 1,900 m. from pier, where depth 5.0 m. – 7.0 m.

HEALTH: Vessels arriving must hoist "Q" flag. Work can only begin after inspection of security team boarding vessel upon arrival during working hours.

RADIO: Name, Semarang Radio. Call sign, PKR.

Wave Length	*Time GMT*	*Remarks*
500/456	0000 – 1600	A1A A2A
8461 KHz	0100 – 0200	A1A
	0500 – 0600	
	0900 – 1000	A3J
	1300 – 1400	
2182/3180 KHz	0000 – 0100	J3E
	0400 – 0500	
	0800 – 0900	
	1200 – 1300	
	1500 – 1600	
6215 KHz	0200 – 0300	J3E
	0600 – 0700	
	1000 – 1100	
	1400 – 1500	
VHF Channels 16, 14, 20, 26	0000 – 1600	F3E

TUGS: Normally tugs join vessel in roads.

BERTHING: Ships anchoring in roads can anchor any time of day. For berthing alongside quays ships with a draft max. 3.6 m. require Pilot. Entering port guided by a pilot vessel.

There are 2,141 m. of wharves. Depth alongside 1.5 m. – 4.1 m.

STEVEDORES: Necessary to inform Agent exact time of arrival. Labour gangs to be arranged 1 day before. Also details of cargo to be discharged needed to arrange stevedoring materials, especially for ships anchoring in roads.

Gang Capacity:

In Semarang Port there are 1,409 stevedore workers registered at the Labour Pool (Y.U.K.A.) 1 gang labour = 15 stevedore workers.

Working Rates:

(a) From vessel to barges and vice versa:
- Load/discharge general cargo – 12 tons gang hour.
- Load/discharge bulk cargo – 20 tons gang hour.

(b) From barges to Godown and vice versa.
- Load/discharge general cargo – 10 tons gang hour.
- Load/discharge bulk cargo – 18 tons gang hour.

(c) From vessel to Godown and vice versa. (if vessels at the quay).
- Load/discharge general cargo – 15 tons gang hour.
- Load/discharge bulk cargo – 18 tons gang hour.

(d) Discharge glass sheet from vessel to barges; same as general cargo.

(e) Discharge steel bars from vessel to barge – 20 tons gang hour.

Working Hours (normal working hours):

Monday – Thursday 0800 – 0400 hrs.
Friday – Saturday 0800 – 0200 hrs.

EQUIPMENT: One day's notice required for hiring.

Cranes/Forklifts:

P.L.T.U. Projects: 1 shore crane with max. capacity 90 tons. Can be used if not required by P.L.T.U.

Port Administration (Perum Pelabuhan): 3 mobile cranes with max. capacity 10 tons, 10 forklifts max. capacity 2.5 up to 10 tons.

Unit Terminal P.A: 2 mobile cranes with max. capacity 10 tons, 5 forklifts with max. capacity 3 up to 5 tons.

Samudera Indonesia: 2 mobile cranes with max. capacity 3 and 10 tons.

Gesuri Lloyd: 3 mobile cranes with max. capacity 4 tons. 1 forklift max. capacity 2 tons.

Djakarta Lloyd: 2 mobile cranes with max. capacity 3 and 4 tons. 3 forklifts max. capacity 2.5 tons each.

Bahari: 2 forklifts with max. capacity 3 tons.

Godowns:

Trikora Lloyd: 1,960 sq.m.
Djakarta Lloyd: 5,400 sq.m.
Samudera Indonesia: 3,480 sq.m.
Pelni: 3,510 sq.m.
Bahari: 3,000 sq.m.
PN.VTP/Tobacco: 1,780 sq.m.
Unit Terminal PA: 10,520 sq.m.
Dangerous cargo Warehouse: 800 sq.m. (one only)

Open Storage:

Trikora Lloyd: 4,000 sq.m.
Unit Terminal PA.I-II-III.: 15,470 sq.m.
Djakarta Lloyd II.: 1,200 sq. m.
Djakarta Lloyd III.: 1,200 sq. m.

Tugs:

Samudera Indonesia: 4 tugs.
Gesuri Lloyd: 4 tugs.
Pelni: 1 tug 300 h.p.
Trikora Lloyd: 1 tug 120 h.p.
Hesti Kencana Lloyd: 1 tug 120 h.p.
Atrind Marina Graha: 6 tugs.
Bahari: 1 tug.

Lighters:

Samudera Indonesia: 18 lighters (3,955 tons capacity).
Djakarta Lloyd: 12 lighters (1,850 tons capacity).
Pelni: 9 lighters (1,100 tons capacity).
Trikora Lloyd: 11 lighters (1,925 tons capacity).
Bahari: 5 lighters (500 tons capacity).

MEDICAL: Medical assistance can be given upon ship's arrival. First aid can be given by harbour doctor in harbour area. Serious cases taken to hospitals in town. 4 hospitals available. Port Health Officer can issue vaccination/fever Certificates if required.

TANKERS: Buoy mooring in position Lat. 06° 53.6′ S., Long. 110° 25.8′ E.

FRESH WATER: Can be supplied by 60 ton barge once a day. Also available alongside, rate 10 t.p.h.

FUEL: Fuel oil and diesel oil available in limited quantities, only to coasters.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Opening and closing hatches done by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or equivalent in tobacco permitted for each crew member to hold out of bond. Wine and/or spirits, maximum value of U.S. $10.

IDENTIFICATION CARDS: Needed.

CONSULS: No local representation.

REPAIRS: Minor repairs only. Dock for repairing small vessels, tugs and barges.

SURVEYORS: Bulk and general cargo surveyors available.

REPATRIATION: Repatriation of crew members arranged by Agents by contacting Immigration Officer for permits concerned.

AIRPORT: Airport (A. Yani) 5 miles from harbour. Domestic flights only.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Independence Day (17th August); Id el Fitr; Christmas Day (25th December), Waisak.

POLICE/AMBULANCE: Semarang 245 or 726.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore.

DELAYS: Normally the speed of loading of bulk cargo is 20–25 tons per gang/hour. Delays by bad weather during December, January and February, where it is impossible to come out of the inner port to ships anchoring on the roads.

SERVICES: No facilities for underwater repairs, electrical repairs or tank cleaning.

DEVELOPMENTS: New wharf length 605 m. Depth 9.0 m. under construction.

AUTHORITY: Perusahaan Umum Pelabuham Semarang, Jl. Sers. Marinir Usman Janatin No. 8, Semarang, Indonesia. *Tel:* 25721, 26179, 25725. *Telex:* 22305. *Cables:* Kacab Smg. *Contact:* R. Soedibjo, Branch Manager.

SENIPAH TERMINAL: 01.03 S. 117.13 E. (See Plan)

OPERATOR: Total Indonesie.

LOCATION: The Sea Terminal consists of a SBM (Single Buoy Mooring), loading berth also known as "mono-buoy". Berth is located in position Lat. 1° 03′ 05″ S., Long. 117° 13′ 13″ E.

The Terminal is situated about 45 km. N.E. of Balikpapan on East Coast of Kalimantan, Indonesia, at position 0° 58′ 05″ S., 117° 08′ 27″ E.

DOCUMENTS: Indonesian Immigration, Customs, Harbour Master and Port Officials will board the vessel to grant clearance and will require the following for inspection:

2 Parcel Lists.
2 Currency Lists.
2 Arms & Ammunition Lists.
2 Inventory Lists.
2 Vaccination Lists.
2 Animals Lists
2 Narcotics Lists.
8 Crew Lists.
2 Crew Declaration of Personal Belongings.
2 Ship's Store List (inventory).
3 Passenger Lists (if any).
2 Cargo Manifest for Transit Cargo with a summary.
Clearance from the Last Port of Call.
Valid Passport and/or Seaman's Certificate for all crew members.
Certificate of Inoculation against any contagious diseases.

If arriving from a foreign port, the following documents may be required for granting Pratique: Certificate of Registry; Ship's Construction Certificate; Load Line Certificate; Life Safety Equipment Certificate; Safety Radio/Telephone/Telegraph Certificate; Cargo Gear Certificate and Derat or Exemption Certificate. TOVALOP Certificate.

Crude oil loading documents will be prepared at the Senipah Terminal and when the vessel has been loaded, the documents will be completed and final clearance formalities will be carried out on board.

Procedure for Appointing Agent:

Owner should cable/telex: Pertaminaship Jakarta.

The cable/telex should appoint Pertamina as Agent to attend the tanker at Senipah and should be sent 7 days prior to vessel's arrival.

The above procedure is applicable to vessels whose Operators do not have a long term agreement with Pertamina.

Flag Dispensation/Agency Permit:

Each foreign tanker entering Indonesia for lifting from Senipah Terminal must have been granted flag dispensation/security clearance prior to entering Indonesian waters.

At the same time application should be made for Provisional Pratique through the Directorate of Quarantine and, if granted, a cable advice is sent to the Harbour Authorities.

Port Health Clearance is issued prior to the tanker's arrival and is also valid for departure clearance. If Provisional Pratique is not granted a Port Health Officer will be provided. All of the foregoing is arranged through and by the General Agent.

It is vital that TOTAL INDONESIE, Jakarta receives the following information by telex 7 days before the vessel's arrival in order to apply for flag dispensation/security clearance through the General Agent.

1. Name and address of owners.
2. Name of Vessel and radio call sign.
3. Flag.
4. D.W.T., G.R.T. and N.R.T. of vessel.
5. Name of Master.
6. Number of Crew.
7. Last foreign port of call and ETD.
8. Consignee.
9. Destination(s) after Loading.
10. ETA at Senipah Terminal.
11. Quantity and grade to be loaded.

FLAGS: In accordance with practice in Indonesian ports, the vessel's national flag, the Indonesian courtesy ensign, quarantine, immigration, pilot and call sign flags must be displayed by all vessels approaching Senipah. These signals shall be displayed continuously until clearance is granted.

The signals are as follows: Sunrise to Sunset: Quarantine Flag "Q". Sunset to Sunrise: Signal lights (red over white).

The "N" flag should be flown until the Immigration Officer boards the ship. The "G" flag should be flown until the Mooring Master boards. The vessel should also fly its call sign (signal letters). This signal may, however, be hauled down after the vessel is secured to the SBM. It must be flown again when the vessel is sailing and kept flying until after the vessel is clear of the anchorage area and the Mooring Master has left. As soon as the Mooring Master boards, the "G" flag should be replaced by the "H" flag. The tanker may fly the "P" flag if it is going to sail within 24 hours.

NAVIGATION AIDS:

S.B.M.: The S.B.M. has a 360° yellow light, flashing every second, visible for 5 miles under an atmospheric transmissivity of 0.85. This operates from sunset to sunrise.

Oil Platforms: Oil platforms of Bekapai oil field which are situated approximately 17 miles East by North of Senipah SBM, show at night a white light flashing, 2 short and 1 long flash (letter U).

One S.B.M. installed at Bekapai field is used in case of emergency.

PILOTAGE: *Procedure when berth is available on arrival.*

A vessel for which the berth is available on arrival will be boarded by a Mooring Master in the anchorage area and, providing that the vessel is in all respects ready to commence loading (except for the necessary deballasting) the notice of readiness will be acknowledged as soon as tendered to the terminal by the Master of the vessel.

The Mooring Master will advise the Master on all manoeuvres to berthing and unberthing and connecting the hoses.

Vessels are requested to make a lee and have an accommodation ladder long enough to reach the Mooring Master's launch.

At night, adequate lighting should be provided.

When Mooring Master boards all mooring and hose equipment will be lifted on board from the mooring launch.

ANCHORAGE: If vessels are obliged, or instructed to anchor, they should do so in the recommended anchorage area which is centred at position: Lat. 1° 05′ 29″ S., Long. 117° 15′ 01″ E. and has a radius of 1 mile. Water depth is between 40 m. to 45 m. While at anchor they should exercise vigilance and keep in touch with the Terminal by VHF at all times.

Procedure when instructed to anchor on arrival: A vessel which has been instructed by Senipah Terminal to anchor on arrival should, after doing so, inform the Terminal of the precise anchoring time. According to the practice of the Terminal acknowledgement of the Notice of Readiness will coincide with this anchoring time, providing:

a) That it is within the hours of daylight – deemed to be from 0600 hrs. local time to 1800 hrs. local time.
b) That it is not a Public Holiday or Sunday, unless the vessel is actually handled on that day.
c) That the Terminal is open.
d) That cargo is available in accordance with accepted loading date.

In addition to clauses (a), (b) and (c), above, vessels will not be accepted when arriving at an unreasonable time ahead of their last advised ETA. It is not the practice of the Terminal to keep Pilots (Mooring Masters) on station in the anchorage area. Senipah Terminal maintains a continuous listening watch on VHF (Channel 6).

MAX. SIZE:

Minimum Size: Minimum size tanker acceptable at the Terminal is 50,000 d.w.t. However, on an exceptional basis, it will be possible to accommodate tankers of 33,000 d.w.t. minimum size but must be able to use SBM mooring system.

Maximum Size: Maximum size tanker acceptable lifting a full cargo will be 125,000 d.w.t. On exceptional basis, Terminal can consider handling a tanker up to 150,000 d.w.t.

Tankers of a larger size may be accommodated in the future, provided that Senipah is their first port of loading and that they load a part cargo only. These limits are at present under study.

Draft Requirement on Arrival: Vessels arriving at Senipah Marine Terminal should have the following draft:

d.w.t.	Fore	Aft
Under 60,000	19 ft.	27 ft.
Over 60,000	22 ft.	28 ft.

RADIO: *Advice of Arrival:* 72 hours prior to arrival at the Terminal, vessels should advise the Company of their ETA by cable sent via Pertamina's coastal radio stations at Jakarta/Merak/Balikpapan. They should also confirm or amend them when they are 48 hours, and again when 24 hours, distant from the Terminal.

Total Indonesle cable address: Totalindo Balikpapan. Attention: Senipah Marine Terminal and Totalindo Jakarta. Attention: Shipcoord.

Communication for Contacting Agent: Pertamina Jakarta radio/PKI2 (owned and operated by Pertamina).

Note: 1. All messages destined to "Pertaminaship" can be sent to either PKI2, PKQ or PKN2.

Details of Cable: The following information should be included in the cable;

(a) Name of vessel and radio call sign.
(b) ETA and date in local time (GMT plus 8 hours).
(c) Cargo requirements.
(d) Deballast time.
(e) Maximum loading rate.
(f) If there is any sickness aboard or clean bill of health.
(g) Last port of call.
(h) Any hull, bulkhead, valve or pipe-line leaks on vessel which could affect loading or cause pollution.
(i) Distance in metres from bow to vessel's loading manifold.
(j) Flange dimensions of vessel's manifold connection, if not to ASA series 150 or equivalent.

2. For tankers equipped with telex system, can make direct contact to: TI JKT attention Ship-Coord: Telex No. 44108. TI BPPN attention Snp-Term: Telex No. 37101 or 37181.

Failure to advise Terminal of ETA may lead to loss of berthing turn.

VHF: Vessels equipped with VHF Radio Telephone should contact terminal on international mobile service Channel 6 from 0000–2400 hrs. GMT.

Other Channel used is 16.

Language: The language of the Terminal is English and Indonesian.

BERTHING: The SBM is approximately 6 miles (11.1 km) offshore in approximately 28 m. of water.

The SBM is served by 2 submarine lines of 26 in. diameter. Two strings of 20 in. hose connect the SBM to submarine line header. Two 20 in. floating hose strings reduced to 12 in. are connected to Tanker for loading purposes. Hoses are lifted up and connected individually on port side.

Work Crew Service: Mooring, unmooring, lifting, lowering, connecting and disconnecting hoses will be done by ship's crew under the direction of the Mooring Master and assistance of Terminal crew.

Accommodation and meals: The company Mooring/Loading Master and his crew (2 persons) stay on board the tanker during the time of the operations. Free accommodation and meals of the same standards as those of the Tanker's officers (for the Mooring Master) and of the Tanker crew (for company crew) must be provided.

Tanker's Engines: Being on open roadstead, vessels must keep engines on standby during their stay in berth. No repairs to main engines may be undertaken while in berth.

Only the automatic turning gear should be used. If it should become necessary to turn the propellor(s) at revolutions greater than the minimum obtained by the automatic turning gear, application must be made to the Mooring Master in order to ensure that there is no inconvenience to do so.

The Mooring Master's written permission must be obtained before any such increase in revolutions.

MOORING/UNMOORING: *Method of Securing to Buoy:* This description is only intended as a guide and may be varied as to orders of lines etc. according to circumstances and weather prevailing at time of mooring.

When Mooring Master boards all mooring and hose equipment for the job on hand will be lifted from the mooring launch.

The Approach: The vessel will be brought to a position close to the buoy with vessel stopped in water with SBM fine on port bow. During approach to SBM, one mooring launch will keep hoses well clear of vessel. Under normal conditions the port side SBM rope will be the first rope taken on board. Mooring Master will advise which rope will be taken first. Actual work of mooring will be done by ship's crew with assistance from terminal work crew. Vessel will lower a mooring rope with good lashing on eye to the mooring launch which will make this fast to approach rope. The approach rope of 10 in. circumference polypropylene will be hove on board until the chafing chain is approximately centred in the fairlead.

Securing the Mooring Lines: While approach is being made, two 11 in. rope strops will be made fast one on each side to the forecastle bitts. The strop will be attached to a 50 ton shackle with pin removed. This shackle should be lying between 2 m. to 3 m. in board of fairlead.

When sufficient chafing chain has been heaved on board, the rope strops will be shackled on to the end links of the chain. The approach rope will then be slackened off and used as back up to the rope strops. The second rope is made fast in the same manner. When mooring is completed the mooring launch will be made fast by a mooring rope (200 m. long) through the centre lead aft so as to be in position to tow as long as the tanker is in the berth.

Connecting Hoses: When mooring is completed a work boat holding the hoses clear will bring the hoses alongside the port side manifold for connection.

Unmooring: To unmoor from the SBM all extra back up lines that have been secured are slipped first. The approach rope is then taken to ship's windlass/capstan and hove up, both of them together, until sufficient chain is in board to remove both shackles from the terminal strops. When the vessel is moving slowly astern the approach ropes are slackened off into the water slowly and finally slipped until allowed to float free.

LOADING:

Loading Rate: Maximum loading rate will be nearly 40,000 barrels (6,000 metric tons) per hour. It is recommended that vessels take maximum flow with due regard to safety in order to expedite turn around time as well as to provide ballast as quickly as possible.

Care should be taken not to overload, as there is no possibility whatever of pumping back to Terminal. When vessels are equipped with permanent ballast tanks, the ballast in these tanks should be retained on board until the vessel has taken on board sufficient cargo to be manoeuvrable. Vessels not so equipped should examine the possibility of safely loading and discharging ballast simultaneously, as such practice improves turn around time as well as reducing the possibility of breaking out of the berth in bad weather in completely light condition.

Hose Lifting Derricks – Deck Winches: Ship booms and deck winches must be capable of operating with a SWL of 5 tons for tankers to be secured to the SBM. Vessels with inadequate hose lifting equipment will be rejected. Power must be kept on deck winches in case adjustments to mooring lines are found to be necessary.

Manifold sizes: The hoses at the terminal are 12 in. in diameter. The minimum size manifold connection acceptable will be 8 in. Terminal is equipped with flanged reducers to connect 8 in. – 10 in. and 16 in. manifolds.

Tanker manifolds should terminate in ASA series 150. Unless terminal is given adequate notice, tankers equipped with other sizes or ratings will be rejected.

Grades of crude oil available: There are 2 grades of Crude Oil available at Senipah Marine Terminal, namely, Bekapai Crude Oil and Handil Crude Oil. Vessels lifting Bekapai Crude are not required to heat the oil during voyage to the discharge port.

Vessels lifting Handil Crude Oil are required to be equipped with heating coils.

It is recommended, as from commencement of loading of Handil Crude, the vessel should endeavour to maintain a temperature of 105°F or at least a temperature slightly above the pour point (±85°F) until the time the vessel discharges its cargo at the unloading port.

In case a vessel has to load 2 parcels of cargo (i.e. 1 Handil and 1 Bekapai), loading must be stopped between the two parcels for line flushing with the second grade of oil.

Outward Clearance: A tanker will be considered clear to depart Senipah Terminal when the crude oil loading documents have been delivered to the Master.

Any protests by the Master concerning the quantity of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

BALLAST:

Adequate Ballast: Due to the exposed location of the crude oil SBM berth, vessels are required to carry sufficient ballast for safe handling, having due regard to existing weather and sea conditions. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Pollution: Owners and Masters are responsible to observe International convention laws and Indonesian Government regulations concerning pollution of the sea, having particular regard for this area of the Macassar Strait.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipe-lines, pumps and strainers have been flushed out prior to arriving.

The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he deems would cause pollution of the sea area, in which case the vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its notice of readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Bilges: Bilges must not be discharged while at the Terminal.

Inspections During Loading: At night the sea area around the vessel shall be adequately lighted, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution, whatsoever, will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be reaccepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

Cargo hose connections should be inspected during loading, drip-pans should be placed under the manifold, all unused cargo connections should be blanked off, sea-valves should be closed and lashed upon completion of deballasting and all scuppers must be securely plugged.

CUSTOMS ALLOWANCES: Cigarettes, cigars, tobacco, matches, spirits, wine, beers, perfume, arms, ammunition and possibly other items have to be locked up under Customs seal from time of arrival of ship in port until time of leaving territorial waters. Each person is allowed to bring in 200 cigarettes or the equivalent in grams of tobacco or cigars. Special allowances are made for the Master under special circumstances.

The Customs Officer will seal the stores.

SERVICES: There are no facilities of any kind at Senipah:

There are no engineering repair shops.

No fresh water.
No bunkers available.
No provisions or stores.
No crane or barge service.
No shore leave.
No crew changes.
No consulates available.
No clinic available.

GENERAL:

Floating Logs: Masters are advised to keep careful watch on the approaches for semi-submerged or floating logs which may become hazardous to safe navigation.

SHIPMASTER'S REPORT: May 1986.

Vessel: 95,000 d.w.t.

Of the documents listed only crew lists, narcotics lists, crew declarations, and stores lists were required. 2 cargo manifests of 'nil' cargo were required. Ship's documents taken ashore for examination. Cargo papers take at least 1 hour. Pilot boat's full speed only 8 knots. Polypropylene rope required aft for tow boat.

AGENCY: Pertamina Shipping Directorate, 32-34, Jalan Jos Sudarso, PO Box 327, Tanjung Priok, Jakarta, Indonesia. Tel: 491-185 (direct); 494-309, Extension 335-315-225. Telex: 49221-49285 Jakarta.

SOURABAJA (Tandjong Perak): 07.12 S. 112.44 E.

(See Plan)

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's List.
Ship's Articles.
2 Stores Lists.

IMMIGRATION: (Department of Defence and National Security). Vessels arriving from abroad with passengers must hoist the "N" Flag. Masters have to supply the boarding Immigration Officer with Passenger's List of: *(a)* disembarking. *(b)* transhipping. *(c)* through passengers.

No persons are allowed on board until the vessel has been examined and the "N" Flag taken down. Passengers must be in possession of a valid visa: visitor's, entry or a transit visa. Those not having a visa may at the discretion of the Immigration Officer, obtain a landing permit. Members of the crew including the Master must appear in the Articles, in order to get shore permits.

PILOTAGE: Pilots are in Government service. Pilot signals according to International Code of Signals. Pilots have to be ordered by Agent 24 hours before arrival and 6 hours before departure.

Compulsory Pilotage, consisting of sea and harbour pilotage.

Western Channel: The Sea Pilot will board the vessel at the entrance of the Western Channel from pilot launch stationed at Karang Jamuang position Lat. 6° 55′ 43″ S., Long. 112° 43′ 46″ E. Upon arrival at the pilot station by day, ships should hoist the International Code Flag "G" and the Ship's International Call Sign. Pilot station on VHF Channel 12, from 0600 hrs. – 0000 hrs. Pilot boat on VHF 12, 14 and 16. The following local signals regarding Pilots should be observed if shown by the pilot vessel:

(a) By night: a flare-up light (white) or waving a white light above the railing means: Pilot will soon board your vessel.

(b) By day: the First Substitute over the Code Flag "S" means: no Pilot available, vessel allowed to proceed until she meets the Pilot. By night: a red light over a white light.

(c) By day: 2 black cones 1 vertical over the other points downwards or by night: 2 green lights 1 over the other means: no Pilots are available for ships of less than 10,000 cu.m. gross. If this signal is made by the Pilot, vessels do not have to show the pilot signals.

(d) By day: the International Signal GFM or by night: a green light over a white light means: Pilot will board your vessel by row-boat as no motor-boat is available.

Eastern Channel: No pilot vessels. Pilots will board the vessel at the entrance by means of a pilot barge dispatched from Tg. Perak Pilot Station at the Harbour Master's Office.

Sea Pilot will take the vessel up to the Inner Roads, where the Harbour Pilot takes over.

Request for Pilot: Request for Pilot is made by the ship's Agent 10 hours prior to the entry of vessel in port. At least, 6 hours prior to departure, request for Pilot must also be submitted.

This request is submitted to Pilot Division on telephone numbers 293157, 291354.

For information regarding the arrival of a vessel, the Master of the vessel can send a cable to Tanjung Perak Port Administration by way of VHF radio telephone on Channel 12, which is available round the clock.

The Master of the vessel can also send the cable through "PKD", see "Radio".

ANCHORAGE: Waiting anchorage for Pilot within:

Lat. 6° 51′ S., Long. 112° 45′ E.; Lat. 6° 51′ S., Long. 112° 47′ E.; Lat. 6° 52′ S., Long. 112° 47′ E.; Lat. 6° 52.5′ S., Long. 112° 45′ E. Depth 22 m. at LWS.

RESTRICTIONS: There are 2 entrances: Western and Eastern Channels.

Western Channel: Used for deep draft vessels with depth of 12 m. at LWS. Distance to Tg. Perak about 25 miles.

Eastern Channel: Least bar depth through this channel is 2.5 m. – 5 m. at LWS. Distance to Tg. Perak is about 22.5 miles.

Boarding Area: Harbour Pilots, Quarantine Officer and Immigration will board the vessel at the Inner Roads (anchorage).

MAX. SIZE: The max. draft for vessels entering the access channel to the port is 31 ft. 03 in. with a max. LOA of 210 m.

RADIO: Coastal Radio Station call sign PKD.

500/430 kHz, A1/A2 CP. Time: 24 hours. 500 kHz.

2182/2690 kHz, A3H/A3JCP. Time: 0330 – 0430 hrs., 1200 – 1300 hrs. GMT. 2182 kHz.

8461 kHz, A1 CP. Time: 0200 – 0330 hrs., 0730 – 0900 hrs. GMT.

879.4 kHz, A3JCP. Time: 0100 – 0200 hrs., 0900 – 1000 hrs. GMT. 8272.5 kHz.

12704.5 kHz, A1 CP. Time: 0000 – 0100 hrs., 1100 – 1200 hrs. GMT.

VHF: Channel 16, Channel 20, Channel 22 and Channel 26.

Time: 0000 – 1400 hrs. GMT.

Pilot Station Karang Djamuang is also reachable through radio call sign PKW: frequency 500 kHz. This station can also be contacted by VHF Channels 12, 16.

VHF: Pilot boats: Channels 16, 14, 12, 8 and 6.

Tugs: Channels 16, 14, 12, 8 and 6.

TUGS: For poor steering vessels and those with deep drafts, tugs assistance is indispensable from light buoy No. 5 till light buoy No. 4 is passed.

The tug service is provided by the Port Administration for which the Port Administration has 6 tugs. 2 tugs – 1,700 h.p., 2 tugs 1,500 h.p. and 2 tugs – 800 h.p. 5 mooring boats also available.

BERTHING: The total length of effective quay in Tanjung Perak Port is 5,205 m.

Quay	*Length*	*Depth at LWS*
Jamrud Utara	950 m.	9.5 m.
Jamrud Selatan	800 m.	9.5 m.
Jamrud Barat	160 m.	9.5 m.
Berlian Barat	735 m.	9.5 m.
Berlian Timur	780 m.	9.5 m.
Berlian Utara	140 m.	9.5 m.
Nilam Timur	860 m.	9.5 m.
Perak	140 m.	9.5 m.
Mirah	640 m.	7.0 m.

Tanker Terminal:

Government Petroleum Pier	Depth alongside at LWS is	9 m.
Semampir East	,,	12 m.
Semampir West	,,	10 m.

Coal Wharf: Situated at the Southern end of Tambatan Nilam, equipped with 1 transporter and 2 bunker barges with steam operated grippers, owned by P.N. Tunda Bara.

PORT EQUIPMENT:

STEVEDORES: Working hours: Monday-Thursday 0700 – 1200, 1300 – 1500 hrs. Friday 0700 – 1100, 1300 – 1500 hrs. Saturday 0700 – 1200 hrs. Overtime: Monday-Friday 1500 – 1700 hrs. Sundays, holidays 0700 – 1200, 1300 – 1500 hrs. Night work allowed after permission from the Port Authority.

Average for bulk cargo 20 t.p.h. per gang
Average for bagged cargo 27 t.p.h. per gang
Average for general cargo 20 t.p.h. per gang
Average for machinery/iron 8 t.p.h. per gang

MEDICAL: Hospital and Port Health Centre.

TANKERS: See "Berthing".

FRESH WATER: Supply is handled by the Harbour Board to the berths and by 5 water barges. Present capacity about 1,100 tons per day for the whole harbour. Priority is for passenger vessels and application required 48 hours prior to ship's arrival.

FUEL: Fuel can be obtained via pipe-lines to all berths.

REPAIRS: Dry-docking and all sorts of repairs are carried out by the State-owned P.N. Dock. There are floating docks, capable of lifting 15,500, 3,500 and 4,000 tons. There are several slipways for coasters. *Electronic Repair Shop:* All sorts of electronic repairs such as radar, echo-sounder, etc., can be repaired by private contractors.

CONSULS: U.S.A., U.S.S.R., Japan, Great Britain, Belgium, Australia, India, Pakistan, Philippines, France and Netherlands.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agents about local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

BANKS: Bank Negara 1946, Bank Bumi Daya and Bank Rakyat Indonesia.

DEVELOPMENTS: *Developments of the Short Term (1981-85):*

Supply of facilities for inter-state vessels: 8 quays length 640 m., 4 Godowns (area 13,700 sq.m.), 7 stacking areas (area 15,573 sq.m.).

Supply of facilities for container ships by changing part of the berths which are available, so that there is a facility for loading and unloading the containers: 4 quays length 1,200 m., stacking area 66,800 sq.m.

Build CFS (Container Freight Station) at the former Perak Airfield of an area 42,695 sq.m. To have available loading and unloading equipment: 2 multi-purpose mobile cranes, 12 head trucks, 27×40 ft./20 ft. chassis, 12×25 ton top loaders. 2×40 ton transtainers.

Developments of the Medium Term (1986-90):

Supply of facilities for inter-state vessels: 16 quays length 1,280 m., 8 Godowns (area 25,600 sq.m.), 8 stacking areas (area 30,000 sq.m.).

Supply of the facilities for container ships: 2 quays length 500 m., CFS near the quay 20,000 sq.m.

At the former Perak Airfield 200,000 sq.m. To have available loading and unloading equipment: 4 container gantry cranes, 18 head trucks, 32×40 ft./20 ft. chassis, 12×25 ton top loaders and 6×40 ton transtainers.

Developments Long Term (1991-2000):

At this stage a new basin at the West side of the Naval Academy is planned.

In this stage will be prepared: Facilities for inter-state vessels: 40 quays. Facilities for ocean-going vessels: 14 non-container quays, 2 container quays.

AUTHORITY: Port Administration Tanjung Perak, Jalan Kalimas Baru No. 194, Tanjung Perak. *Tel:* 291194, 291364. *Contact:* The Harbour Master.

TANDJUNG UBAN: 01.03 N. 104.13 E.

OPERATOR: P.T. Stanvac Indonesia Oil Terminal.

DOCUMENTS:

- 11 Crew Lists.
- Harbour Report (form to be supplied by the Agent).
- Maritime Declaration.
- Vaccination List.
- 2 Stores Lists.
- 2 Bonded Stores Lists.
- 2 Personal Effects Lists.

PILOTAGE: Agent requests Pilot upon arrival of vessel, 72 hours advance notice of ETA required. Pilot boards vessel in harbour area.

ANCHORAGES: 0.5 – 0.75 miles opposite oil jetties.

MAX. SIZE:	Dock No. 2	No. 4	No. 5
Length	800 ft.	650 ft.	650 ft.
Breadth	any	any	any
Draft	34 ft.	33 ft.	32 ft.

HEALTH: Health Officer will board vessel after berthing. No pratique granted, even for vessel after calling at another port in same country.

RADIO: Tandjung Uban Radio – call sign PKJ.

TUGS: No tugs available.

BERTHING: Agent arranges berthing vessel. Dimension of oil hoses used: 6 in. and 8 in. Very limited slop facilities, depending on available ullage.

MEDICAL: Very limited facilities. Only a clinic with experienced wound dresser available. Valid cholera certificates for crew members required.

DENSITY: 1025.

FRESH WATER: Available ex-pipe-line – 5 t.p.h.

FUEL: Medium fuel oil, viscosity Redwood 1, 600 – 900 seconds; heavy fuel oil, viscosity SSF, 30 – 40. Prior approval from PT Stanvac Indonesia, Jakarta, required for obtaining bunker fuels.

GANGWAY/DECK WATCHMEN: Port Authority provides 1 safety guard during vessel's stay in port.

CUSTOMS ALLOWANCES: Reasonable quantity allowed to be used during vessel's stay in port.

IDENTIFICATION CARDS: Possession of a valid Seaman's Book sufficient.

REPATRIATION: No facilities available.

AIRPORT: Distance to airport, 60 miles. Served by Garuda Indonesian Airline 3 times a week (Mondays, Thursdays and Saturdays) to Jakarta only.

TIME: GMT plus 7 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 55; Clinic, 37 and 58; Fire, 44 and 13.

TELEPHONES: Agents place telephone on board at no cost.

AUTHORITY: Penguasa Pelabuhan (Port Authority).

TARAKAN: 03.20 N. 117.45 E.

DOCUMENTS: See "Djakarta".

PILOTAGE: Compulsory pilotage consisting of Sea and Harbour Pilots. Ships requiring pilot service should notify the Harbour Master at least 24 hours before arriving at outer buoy. Tide: semi diurnal.

Pilots do not normally work at night. The approach buoys and leading lights are frequently extinguished and vessels arriving at night are recommended to anchor at No. 1. Buoy and await a Pilot in daylight.

HEALTH: Vessels arriving from abroad direct in one of the 2nd Class Ports have to apply well in advance to the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad from the 2nd Class Port concerned.

RADIO: Call sign: PKO Class A1. This station also has VHF Maritime Bands working on the same hours as the Short Wave Transmissions.

TUGS: Nil.

BERTHING: The anchorage will hold many ships but very little cargo is worked from the anchorage as most vessels calling are timber ships waiting to load. The very occasional ocean cargo ship usually unloads on to a barge but very occasionally goes alongside the Commercial Jetty.

The Commercial Jetty has a least depth of 4 m. and a length of about 150 m. There is a crane capable of lifting 2 tons on the inside berth. This jetty is very old and dilapidated and normally handles only small craft of local inter-island character.

STEVEDORES: Working hours: 7 hours on normal working days. Overtime can be arranged.

TANKERS: The Pertamina Jetty has a least depth of 8 m. and is about 180 m. in length. This pier is solely for the export of petroleum products in small tankers.

Off the Pertamina Pier is a 6-buoy sea berth to which tankers of 35,000 tons d.w.t. are secured to load oil for export. The loading rate is about 1,000 t.p.h., through two 10 in. hoses. The berth requires a tanker with a derrick capable of lifting 3 tons.

GENERAL: Port doctor available.

Carrying a camera ashore or even on deck of a ship for photography is strictly prohibited.

There is a small hospital. No stores, water, or fuel oil are available. There are no repair facilities at all. Pertamina operates a small hospital and a clinic. There is air communication to other parts of Indonesia through Balikpapan.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

TEGAL, Java: 06.55 S. 109.10 E.

DOCUMENTS: Upon arrival, vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:

Nationality (Registry) Certificates.
Seaworthiness Certificate.
Tonnage Certificate.
Derat (Exemption) Certificate.
International Loadline.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio-telegraphy Certificate.
Vaccination List.
5 Crew Lists.
2 Stores Lists.
2 Crew Baggage's Declaration.
Last Port Clearance.
Health Book.
Custom Clearance and Custom Documents.
Cargo Manifest and Bills of Lading.

When vessels arrive direct from foreign port, Customs and Harbour Police Officials board for search.

PILOTAGE: None.

ANCHORAGES: Vessels drawing up to 25 ft. may anchor in the following location:

Latitude: 06° 48′ 20″ S. to 06° 49′ 20″ S.
Longitude: 109° 09′ 20″ E. to 109° 11′ 20″ E.

RESTRICTIONS: No restriction on night entry, but work is done next day (after 0800 hrs.).

MAX. SIZE: Max. draft for entering the port is 9 ft.

HEALTH: Maritime Declaration of Health needed from Master, if vessels coming direct from abroad. If vessel comes from other Indonesian ports, automatic Free Pratique.

RADIO:

I. Fixed Station:
Call sign 8AC on freq. 5315 kHz at 0100 – 0130 GMT
0230 – 0300
freq. 5165 kHz at 0430 – 0500 GMT
1000 – 1015

II. Coast Station:
Call sign PKD 21 on freq. 2182/2690 kHz at 0030 – 0100 GMT
0400 – 0430
Channel 16 – VHF 156.80 MHz 0100 – 0500 GMT

III. Open every day except on holidays.

TUGS: Only used for towing lighters to vessels on the roads.

BERTHING: None. Anchorage only.

STEVEDORES: Ordered by Agent. If possible before arrival of vessel, some information mainly concerned with requirements of the Shipmaster advises Agents to arrange gangs and available space for Tegal cargo.

MEDICAL: Normally medical attention for crew to be arranged by Agent at order of Master.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Services of watchmen if necessary to be ordered by Master.

OPENING/CLOSING HATCHES: Carried out by crew – sometimes by stevedores.

CUSTOMS ALLOWANCES: Tobacco, wine and/or spirits not allowed to be taken ashore.

IDENTIFICATION CARDS: Necessary.

CONSULS: None available locally.

REPAIRS: Slipways and berths for small vessels, LOA 25 m. and draft 9 ft.

REPATRIATION: Agents arrange necessary repatriation of crew.

TIME: Indonesian Western Time, GMT plus 7 hours.

HOLIDAYS: Only Moslem holidays: Id el Fitr. For 2 days no cargo work can be arranged.

POLICE/AMBULANCE/FIRE: Accident, Police, Tel: 10; First Aid for Ambulance (Texin Hospital), Tel: 387; Fire Departments (Texin), Tel: 17.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Crew members allowed ashore from 0800 up to 2100 hrs. every day. Not allowed to spend night on shore.

REGULATIONS: Crew members not allowed to bring cameras and/or foreign money ashore.

AUTHORITY: Tegal Port Directorate, Syahbandar, Jl. Kesatrian No. 6, Tegal, Indonesia. *Tel:* 61038, 41107.

TELOK AYER: 00.44 S. 109.05 E.

SHIPMASTER'S REPORT: March 1982.

PILOTAGE: Pilot Station in position: Lat. 00° 39′ S., Long. 109° 05′ E. Pilot comes from inner anchorage by small boat, journey time 5 hours.

ANCHORAGE: Vessels approaching Telok Ayer (Telok Airport) drop anchor 5 cables West of Fairway Buoy in position: Lat. 00° 39.5′ S., Long. 109° 05.5′ E.

RADIO: 24 hours notice to Agent to arrange Pilot.

VHF: Call "Padang Tikar Pilot" on VHF Channel 16.

CARGO HANDLING: Depth at loading point is 6 fathoms. Maximum depth in entrance to Padang Tikar River is 7.2 m. at HW. Vessels load plywood and sawn timber.

GENERAL: There are no alongside facilities for ships.

Stevedores, Shippers, Immigration and Customs Officers take full meals and accommodation onboard, during the loading operation, as the nearest town (Pontianak) is 12 hours away by speedboat.

TELUK BAYUR (Padang): 00.58 S. 100.20 E.

FLAGS: *Flags to be Shown by Incoming Vessels:*

Nationality of vessel and Indonesian flag.
Call sign.
"Q" when the vessel comes from an infected port or when calling for a Port Health Officer.
"G" when Pilot is required.
"N" when vessel from abroad carrying Passengers. (Request for Immigration).
"H" when Pilot is on board.
"Y" when mail on board.
"B" when carrying dangerous cargo.

Flag to be Shown when Vessel Leaving Port:

Nationality of vessel and Indonesian flag.
Call Sign.
"H" Flag when Pilot is on board.

DOCUMENTS:

a) The Master must have in readiness for the Harbour Master Officials:

Certificate of Registry.
Certificate of Nationality.
Loadline Certificate.
Radio Safety Certificate.
Derat Certificate.
Safety Equipment Certificate.
Last Port Clearance.
Health Book (Indonesian Health Book) to be used in Indonesian waters only.
Crew List.
Stores List.
Personal Effects List.
Free Pratique.
Light Dues Bill from Port of Call (last Port).

b) Cargo Documents required by the Agent to clear the Vessel through Customs:

Customs Cargo Clearance.
Manifest.
Customs Document (outward cargo AVI and model E3).
Customs Document (inward cargo – AA).
Customs Document of transhipment cargo (model HH).

Authorities boarding the vessel on arrival:

Port Health Doctor (Quarantine Officer):

1. All vessels entering Port of Teluk Bayur from abroad should obtain Free Pratique. Vessel must wait until the Quarantine Officers board the ship before entering.
2. Documents to be shown to the Port Health Doctor:
   Indonesian Health Book.
   Crew List.
   Passenger List.
   Vaccination List.
   International Vaccination Certificate.
   Derat Exemption Certificate.

Customs:

1. It is prohibited during vessel's stay to sell any goods belonging to crew.
2. Foreign vessel, if carrying local cargo must have coasting permit.
3. Documents to be shown to Customs:
   Cargo Manifest.
   Provisions/Stores List.
   Crew List.
   Crew Personal Effects Declaration.
   Last Port Clearance/Custom clearances.

Immigration:

1. All vessels coming from abroad (Indonesian vessels as well as foreign vessels) are to use crew passes.
2. Foreign crew to be repatriated must be accompanied by an Immigration Officer, except if their pass is a visa.
   All expenses (ticket and travelling expenses) are for owner's account.
3. All foreign transit passengers have to fill in an embarkation/-debarkation card.
4. Vessels arriving from abroad carrying passengers; The Master is also obliged to provide the Immigration Officers with a List of the Passengers on board.
5. Documents to be shown to the Immigration Officers:
   Crew List.
   Passenger List.
   Crew Passports/Passengers' Passports.
   Last Port Clearance/Immigration Clearances.
6. Foreign passengers landing at Teluk Bayur Port without visa, *must pay for Immigration Fee.*

Harbour Master:

1. If vessel intends to use their own life/motorboat for rowing exercise, permission should first be obtained from Harbour Master and Coast Guard.
2. Documents to be shown to the Harbour Master:
   Certificate of Registry.
   Certificate of Nationality.
   Loadline Certificate.
   Vessel and Passenger Safety Certificate.
   Radio Safety Certificate.
   Master Roll.
   Crew List.
   Passenger List.

Cargo Documents:
Cargo Manifest covering Teluk Bayur cargo – 7 copies.
Cargo Manifest covering cargo for other Port – 7 copies.
Stores List – 7 copies.
Crew Personal Effects List – 7 copies.
Crew List – 10 copies.

The above apply for a single call. In the event of a vessel arriving from a out-port for re-checking at Teluk Bayur, another se' of copies of the Stores List and Personal Effects List must be re-submitted.

PILOTAGE: Compulsory harbour pilotage. Ships have to wait for Pilot inside the roads limits.(See "Anchorage").

Pilot is available each day from 0000 – 2400 hrs. ETA required 6 hours before arrival. ETD required 3 hours before departure.

ANCHORAGE: Vessels should anchor outside the breakwater until the Pilot comes on board at Position: Lat. 1° 01′ 10″ S., Long. 100° 22′ 10″ E. Distance from the anchorage to the quay/jetty is about 2 miles.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a provisional Free Pratique, as said Pratique has to be cabled to the port. The provisional Free Pratique is only valid for the port and the next port of call must be a First Class Port as no further provisional Free Pratique will be issued, unless the vessel sails directly abroad.

RADIO: Coastal station: Call sign PKP2.

Frequency	*Power*	*Keeps watch*	*Time (GMT)*
500 kHz	1 kw	430 kHz	0000 – 0100 0400 – 0500 0800 – 0900
6518.8 kHz	300 watts	Ch. 605	0100 – 0130 0930 – 1000
6355 kHz	1 kw	6 MHz	0130 – 0200 0530 – 0600
2182 kHz	300 watts	3180	0200 – 0230 0900 – 0930

Arrival Advice: Required before ship's arrival (to be telegraphed 48 hours prior to ship's arrival, however not less than 24 hours via Radio Station).

a. Name of vessel.
b. ETA at the Roads.
c. Draft.
d. Quantity of cargo to be discharged (in tons).
e. Number of passengers disembarking, also dangerous cargo (if any).
f. Ship's requirement (quantity required).
g. Any other information.

TUGS: 1 Tug-boat *Selat Siberut* of 1,700 h.p. is stationed at Teluk Bayur, the use of which is compulsory for incoming and outgoing ocean-going ships. Mooring boat available.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
1st wharf	120	9.0 (under repair)
2nd wharf	108	8.5
3rd wharf	108	6.5
4th wharf	96	6.0
Demaga Beton	150	8.0
Demaga Khusus	98.5	8.0

Mooring Buoys: There are 4 mooring buoys inside the breakwater and one outside.

CRANES: 1 electric crane, capacity 6 tons and 1 mobile crane, capacity 13 tons, both operated by the Port Administration.

Forklifts: Port Administration: capacity 10 tons (one), capacity 7 tons (two), capacity 5 tons (two), capacity 2.5 tons (two).
P.T. Trikors Lloyd: capacity 3 tons (two).
P.T. Samudera Indonesia: capacity 2.5 tons (one)
P.T. Djakarta Lloyd: capacity 2.5 tons (four)
P.T. Gesuri Lloyd: capacity 2.5 tons (two)
P.T. Pelni: capacity 2.5 tons (two)

Lighters: None available.

STEVEDORES: *Working Hours:*
Monday-Thursday: 0800 – 1200; 1300 – 1600 hrs.
Friday: 0800 – 1100; 1330 – 1600 hrs.
Saturday: 0800 – 1300 hrs.

Overtime can be worked at request of the ship on normal days and Sunday/Holidays, are counted as overtime from 0800 – 2400 hrs. and from 0000 – 0600 hrs.

Rest hours (meal time): Monday till Thursday: 1200 – 1300 hrs.
Friday: 1100 – 1330 hrs.
Saturday: 1300 – 1800 hrs.
Day overtime: 1700 – 1800 hrs.
Night overtime: 2300 – 2400 hrs.

Discharging/Loading Rate:
Average speed for:

Discharging: General cargo 10 – 12 tons per gang hour. Bagged cargo 18 – 20 tons per gang hour.

Loading: General cargo 10 – 15 tons per gang hour. Bagged cargo 18 – 22 tons per gang hour.

Number of Men per Gang: Ships gang 15 men. Wharf gang 20 men.

FRESH WATER: Available at wharf, officially at a rate of 8 cu.m. per hour, unlimited quantity during the wet season (September-April). During the dry season with a maximum of 150 cu.m. and a capacity of 4 – 6 cu.m.p.h. Water should be boiled or chemically treated before consumption.

FUEL: Not available.

REPAIRS: Dry dock available for ships up to 500 d.w.t. Machine-workshops for minor repairs available.

SURVEYORS: Available.

MEDICAL: Teluk Bayur has harbour clinic for emergency cases. Hospitals at Padang.

AIRPORT: At Tabing, distance 15 km.

DEVELOPMENTS: Padang Cement have a new bagging terminal in operation.

Existing berths to be reconstructed, new berths to be built and channel and harbour to be dredged.

AUTHORITY: Department of Sea Communications.

TELUK SEMANGKA (Semangka Bay):

05.35 S. 104.37 E.

PORT LIMITS:
Limit of Anchorage:

(a) Lat. 05° 32′ S., Long. 104° 36′ E.	*(c)* Lat. 05° 36′ S., Long. 104° 39′
(b) Lat. 05° 32′ S., Long. 104° 39′ E.	*(d)* Lat. 05° 36′ S., Long. 104° 36′

DOCUMENTS:
7 Crew Lists.
7 Stores Lists.
7 Slop Chest Lists.
3 Customs Declaration Forms.
1 Health Declaration.
1 Master's Declaration provided by Agent on arrival.

PILOTAGE: Pilot and Mooring Master board at the anchorage.

ANCHORAGE: In same area as floating storage vessels in about 30 fathoms of water. There is a gap in the fish traps with Tg. Balang Besi bearing 093° × 6.9 miles. This is about 9 cables from storage vessels.

RESTRICTIONS: No night berthing/unberthing.

MAX. SIZE: 100,000 d.w.t. Depth of water 19 m.

HEALTH: "Q" flag must be flown until Officials have been on board. Port Officials come from Panjang.

RADIO/VHF: ETA etc. to be sent to Pertamina Jakarta.

Agung Radio, which is situated at Kota Agung at the head of the bay, may be contacted on VHF Channels 16 or 9 during office hours.

TUGS: 2 tugs used for berthing/unberthing.

BERTHING: Vessels berth alongside Floating Storage Tankers with Yokohama fenders on starboard side. They are anchored in positions between 2 miles and 4 miles from the head of the bay.

Vessels berth port side alongside. Access is provided by floating storage vessel.

Hose connection amidships. Storage tankers mooring gang connect hose. Ship's crane/derrick required for hose support. 12 in. hoses used, 1 per grade.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: It must be ensured that the STS operation is carried out in accordance with the ICS/OCIMF STS transfer guide and ISGOTT recommendations.

There are approximately 100 moored floating fish traps in the area. They are met with from about 7 miles from the head of the bay. At night, they are well lit with powerful fishing lights and they tend to lie in lines which, with care, allows access to the Anchorage Area.

Accommodation may be needed for Pilot and Mooring Master.

Numerous jellyfish may cause problems with intakes.

SHIPMASTER'S REPORT: January 1983.

Documents: Advisable to have at least 12 copies of Crew List. Harbour Master takes all certificates ashore and returns same prior to sailing.

Pilotage: No Pilots available for anchoring. Mooring Master berths/unberths vessel alongside storage tanker.

Anchorage: Good anchorage in depths of 15 fathoms – 50 fathoms of water in the Northern part of the bay.

Restrictions: Berthing/unberthing carried out during the daytime only.

Radio: PKI 1 and PKI 2 (Jakarta).

VHF: "Kota Agung Radio" keeps continuous watch on Channel 9.

Pertamina, local Agent, Mooring Master and storage tankers can be contacted on Channel 9.

Tugs: Two harbour tugs available for berthing/unberthing.

Tankers: No berths. 2 storage tankers of about 235,000 d.w.t. handling gas oil and kerosene. 4 Yokohama fenders on the starboard side of storage tankers. 12 in. hoses used for cargo transfer.

Fuel: Gas oil available.

Consuls: British Consul stationed in Jakarta (Tel: 330904).

Repairs: Minor repairs possible.

Surveyors: Lloyd's and Indonesian Government Radio Surveyors had to come from Jakarta to carry out vessels Safety Equipment and Safety Radio Telegraphy Surveys.

Airport: Nearest airport at Tanjung Karang, 100 km. away. Several flights to Jakarta daily.

Time: GMT plus 7 hours throughout the year.

Services: Limited stocks of fresh fruits, vegetables and meat available locally.

Shore Leave: Pertamina operates 3 service boats daily for crew to go ashore.

Identification Cards: Not necessary.

Delays: About 7 days – 10 days for discharging gas oil.

AGENCY: Main Agent in Jakarta.

Pertamina Shipping Department, 6th Floor, Jalanmerdeka, Timur 1 A, Jakarta, Indonesia. Tel: 343806. Telex: 44450/45348/49285 Perta Jkt. Cables: Pertaminaship, Jakarta.

TERNATE: 00.46 N. 127.22 E. (See Plan)

DOCUMENTS: The following documents must be ready upon vessel's arrival:
14 copies Crew List.
12 copies Passenger List.
5 copies Stores List.
8 copies Cargo Manifest.
Bills of Lading.
8 copies General Information.
5 copies Personal Effects List.
5 copies Vaccination List.
5 copies Firearms & Ammunition List.
Harbour Report.
Last Port Clearance.
Completed Declaration of Health.
Valid Derat Certificate.
Passports.

PILOTAGE: Compulsory. Notice of ETA and request for a Pilot must be made at least 6 hours in advance to Pilotage Authority through Ternate Radio (Coastal Station) on VHF Channel 16 or direct to Ternate Pilot Station on VHF Channel 12.

Pilotage service address: Dinas Kepanduan Perum Pelabuhan IV Cabang Ternate. Tel: 21574.

ANCHORAGE: Safe anchorage in harbour but better anchorage about 3 cables to the East of wharf in a depth of about 65 m.

MAX. SIZE: Max. draft alongside 9.5 m.

HEALTH: Pratique is normally given by Pilot Station. Any advice on health matters obtainable from pilot service.

RADIO: Ternate Coastal Station, call sign "PKE" on VHF Channel 16. Pilot Station on VHF Channel 12 (Every day during working hours: 0800 – 1500).

TUGS: As required by Pilots, ship's line normally used.

BERTHING: Berth No. 1: Wharf length 248 m. Depth at LWS 10 m.

CRANES: 1 × 25 tonne mobile heavy lift crane.

STEVEDORES: Stevedoring arranged by labour union via Agent.

MEDICAL: Hospital facilities available.

DENSITY: 1025.

TANKERS: Oil Jetty (Pertamina Depot): Located 9 miles South of Ternate. Max. size alongside is 7,000 d.w.t.

FRESH WATER: Available from berth, rate 40 t.p.h.

FUEL: Oil delivered by tank trucks.

GANGWAY/DECK WATCHMEN: Usually ship's crew.

OPENING/CLOSING HATCHES: By stevedores or ship's crew. Whichever to ship's advantage.

DRY DOCKS: No facilities.

AIRPORT: Distance about 5 miles, served by Bourag Air Lines and Merpati Nusantara Airlines.

EMERGENCY CO-ORDINATION CENTRE: Ternate Coastguard Tel: 21143.

TIME: GMT plus 9 hours.

POLICE: Tel: 21164.

SHORE LEAVE: No restrictions.

REPATRIATION: Crew changes and repatriation can be arranged.

HOLIDAYS: National holidays are New Year, Idul Fitri, Idul Adha, Maulid, Easter Day, Waisyak, Nyepi, Ascencion Day, Miradz and the first day of Muharam.

CONSUL: None.

CERTIFICATES: Register, Tonnage and usual Certificates.

GENERAL: *Ship's Inspection Team:* This team consists of the Port Health Officer, Customs Officers, Harbour Master/Immigration Officer. The vessel having been granted Free Pratique, the Immigration Officer starts checking Passports, Seamen's Books and Crew Lists and then issues shore passes.

Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Ternate Port.

The ship's radio transmitter may not be used whilst vessel alongside.

Chart: Indonesian Chart No. 385.

AUTHORITY: The Port Administrator, JL. Jend. A. Yani No. 1, Ternate. *Tel:* 21129, 21206, 21574.

Harbour Master, JL. Jend. A. Yani No. 1, Ternate. *Tel:* 21572.

TJILATJAP (CILACAP): 07.44 S. 109.00 E. (See Plan)

(a) CILACAP PORT.
(b) CILACAP – IRON SAND PORT.

(a) CILACAP PORT.

DOCUMENTS: Upon arrival vessels have to produce the following Certificates and Documents, which will remain in the Harbour Master's custody until cleared:
Nationality (Registry) Certificate.
Seaworthiness Certificate.
Measurement (Tonnage) Certificate.
Derat (Exemption) Certificate.
International Load Line Certificate.
Safety Certificate (passenger ships).
Safety Equipment Certificate (cargo ships).
Safety Radio and Radiotelephony Certificate (cargo ships).
Certificate of Approval (ship's radio station).
Health Book or Bill of Health.
Last Port Clearance.
Subscription of Light and Harbour Dues and wharfage if any.
Crew Lists and Passenger's Lists.
Ship's Articles.
Other certificates and documents as required.
Ship's Stores List.

PILOTAGE: Compulsory. 8 Harbour Pilots available. 6 hours notice required for berthing and 3 hours notice required for unberthing. Pilot available 24 hours for vessels up to 150 m. LOA and daytime only up to 1800 hrs. for vessels over 150 m. LOA.

Pilot station on VHF Channels 12, 14 and 16.

Pilot station position: Lat. 07° 44′ 30″ S., Long. 108° 59′ 46″ E.

APPROACHES: Minimum breadth of new channel 198 m. from Outer Bar to CIB* Jetty. Inner Channel width is 80 m.

Depths: Outer Bar to CIB Jetty . . . 14.5 m. LWS.
CIB Jetty to Area 70 (including Iron Sand Jetty) . . . 12.1 m. LWS.
Area 70 to Cargo Wharf . . . 8.0 m. LWS.
Cargo Wharf to Area 60 . . . 5.7 m. LWS.

*Crude Island Berth.

ANCHORAGES:

Cargo Ships:	07° 45′ 25.0″ S. 109° 02′ 50.0″ E.	and	07° 46′ 26.8″ S. 109° 03′ 07.0″ E.
		To	
	07° 45′ 34.0″ S. 109° 03′ 12.2″ E.	and	07° 46′ 22.5″ S. 109° 03′ 37.0″ E.
Tankers:	07° 45′ 38.0″ S. 109° 03′ 12.2″ E.	and	07° 46′ 22.5″ S. 109° 04′ 28.5″ E.
		To	
	07° 45′ 38.0″ S. 109° 03′ 48.5″ E.	and	07° 46′ 10.0″ S. 109° 04′ 28.5″ E.

RESTRICTIONS: Least depths at the bar and in the channel are 70 dm. at LWS.

Current: Semi-diurnal. By the influence of the Donan River, especially during the rainy season, the duration of the outgoing current is longer than that of the ingoing. In the rainy season the outgoing current can reach 5 knots.

MAX. SIZE:
Cargo Vessels: Max. LOA 186 m. Max. draft at HW 9.5 m.
Tankers: Max. d.w.t. 85,000. Max. LOA 250 m. Max draft 12.0 m.

HEALTH: Vessels arriving from abroad direct have to apply well in advance to the Department of Health (Quarantine Section) for a Provisional Free Pratique, as said Pratique has to be cabled to the port concerned. The Provisional Free Pratique is only valid for the port concerned, the next port of call must be a First Class Port as no further Provisional Free Pratique will be issued, unless the vessel sails directly abroad.

TUGS: 1×870 h.p., 1×1,700 h.p. (twin-screw).

Pertamina: 4 tugs. 2×3,200 h.p. ("Z" peller), 1×4,060 h.p. (twin-screw) and 1×1,740 h.p. (twin-screw).

VHF: Pilot on Channels 16 and 20.

BERTHING: Outer Roads while waiting for the Pilot during the West monsoon a safe anchorage in 12 m. water. During the S.E. monsoon not a safe anchorage. Inner Roads, under all circumstances a safe anchorage in 9 m. water in the vicinity of Nusa Kambangan opposite the quays for small crafts and East of Tg. Sodong. Vessels over 80 m. length have tc moor due to limited swinging space, current and winds.

Name	*Length* (m.)	*Depth at LWS* (m.)	*Remarks*
Wharf No. 1	120	9.0 m.	—
Wharf No. 2	149	9.0 m.	—
Wharf No. 3	50	—	Under redevelopment
Wharf No. 4	71.5	6.0	—
Pusri Jetty	Under Construction		Fertiliser
Aneka Tambang Jetty	—	11.0	See "Section B"
Semen Nusantara Jetty	—	5.0	Cement

TANKERS: *Pertamina Tanker Terminal:*
CIB (Crude Island Berth) designed for 135,000 d.w.t. tankers.
Jetty No. 1: 16.5 m. depth.
Jetty No. 2: 16.5 m. depth.

Area 70:
Jetty Nos. 1 and 2 designed for 35,000 d.w.t. tankers. Depth alongside 13 m. at LWS.
Jetty No. 3 is designed for 17,000 d.w.t. tankers.

Area 60:
Jetty No. 1 specially for lub oil with depth 6 m. at LWS.
Jetty No. 2 specially for bitumen with depth 7 m. at LWS.
Jetty No. 3 specially for LPG with depth 6.5 m. at LWS.
Jetty Nos. 1, 2 and 3 designed for 5,000 d.w.t. vessels.
Also see "Shipmaster's Report".

STEVEDORES: Working hours Monday–Thursday 0730 – 1200 hrs. and 1300 – 1530 hrs. and Saturday. Overtime Friday 0730 – 1130 hrs. and 1300 – 1530 hrs.; Sunday-holidays 0730 – 1200 hrs. and 1300 – 1530 hrs.; Night shift 1700 – 2300 hrs. Gang's capacity: Loading general cargo 12 t.p.h.; bagged cargo 20 t.p.h.; iron sand by conveyor 400 t.p.h. – 500 t.p.h.; bulk cargo 17 t.p.h.

MEDICAL: Pertamina Hospital Service and Public Health Service.

PORT EQUIPMENT:
Cranes: 1 mobile crane with lifting capacity of 15 tons.
Forklifts: 1×10 ton, 1×7.5 ton, 2×5 ton, 2×3.5 ton, 4×3 ton and 3×2 ton.

FRESH WATER: Water is supplied through pipe-lines to the wharves, capacity 10 t.p.h. – 15 t.p.h.

FUEL: Bunkers (M.D.F., M.F.O., H.S.D.) available alongside by pipe-line. Supplier is State Corporation Pertamina. Rate 60 t.p.h.

AIRPORT: Tunggul Wulung Airport. Distance from port 15 km. Served by Merpati Nusantara Airline with daily flights to and from Jakarta.

PORT SECURITY: Maintained by members of the Indonesian Armed Services, usually, Police, Navy or Marine and Army. Crew members should be in possession of a shore pass issued by the Port Authority, accompanied by an identification card when leaving or entering the guarded gates of the Port Area. Shore passes can be obtained via the Agencies.

SHORE LEAVE: Leaving and entering the Custom's Area the crew is checked on the basis of the Crew's List and Identification cards and searched.

CUSTOMS: It is strictly prohibited to take undeclared foreign currency ashore. It is recommended that Masters consult the Agents about the local prevailing Customs Regulations with regard to currency, cigarettes, spirits, etc., to prevent unnecessary difficulties and eventually fines.

Ship's Inspection Team: Consisting of members of the Port Authority. This team will search the vessel, after the ship is cleared by the Port Medical Officer. Prior to mentioned search no Cargo handling is allowed. This Team will search the Store Rooms and Cargo hatches, and subsequently seals the Bonded Stores and Radio Transmitter. Careful attention should be given in making up the Store Lists, as any difference found in the items declared and discovered during the search may lead to difficulties.

DEVELOPMENTS: Wharf No. 3: 50 m. under re-development.
Dockyard for ship repairs under construction.
Pusri Jetty for fertiliser under construction.

SHIPMASTER'S REPORT: August 1985.

Vessel (31,000 d.w.t.) entered Cilacap to load a cargo of gas oil for discharge at Bukom (Singapore). Unfamiliarity together with no chart for the port onboard created some difficulties, but in fact, it is quite an open approach to the port. However, entry into the dredged channel should not be attempted without guidance if the Pilot cannot board the vessel due to strong Southeasterly winds and heavy swell.

Port Limits: Not clearly defined, but assumed to start in area of the Channel Entrance Buoy.

Documents: All officials board after berthing.

Customs were satisfied with 3 detailed copies of Personal Effects and Currency Declarations, plus 3 copies of Bonded and Ship's Provisions Stores.

Immigration require 3 Crew Lists, Agents 2 copies and Customs 2 copies. Port Health also require 2 copies. Immigration also require all Passports (or Discharge Books where Passport not available) to stamp entry and issue Shore Passes. Passports are re-stamped with exit stamp prior to departure and Shore Passes must be returned, before sailing.

2 Officials board from Port Health and require Master to complete and sign Health Declaration and they check Yellow Fever/Cholera Vaccination Certificates (all up to date). If onboard, they also require the Indonesian Health Book.

For the Harbour Master, the Agent will collect the following documents for sighting ashore on signed receipt: Last Port Clearance, Certificate of Registry, Load Line Certificate, Safety Construction Certificate, Safety Equipment Certificate, Radio Safety Certificate, Derat Certificate, Tonnage Certificate, Certificates of Class, Hull and Machinery (both new building and completion of Survey Cycle), I.O.P.P., TOVALOP and Safe Manning Certificate.

Agent also presents cargo manifests for signing for Customs. Bills of Lading for petroleum cargoes are issued on Pertamina Bills of Lading and others cannot be used or Pertamina's endorsed. Issue usual protests as per Charter Party instructions.

Radio/VHF: W/T as per Vol. 6. Station PKR6, very helpful, with good English will contact Agent for vessel – no charges for service. Closer to port, Pilots work Channel 12 and Agents (Pertamina Agency) works on Channel 19.

Pilotage: Refer Pilot Book 34 Vol. II, page 50, Chapter 3.25 – the details re. Tg. Cimiring Lighthouse not applicable to deep draft vessels as too far offshore to see any signals (6 – 8 miles). The lighthouse is also very difficult to spot during the day due to trees. Call on VHF Channels 19/12 as indicated above. Chart coverage of the area is very poor. Tg. Cimiring should not be approached closer than 5 – 6 miles and the headland rounded at this distance, unless local knowledge available. Good depths of water available if Pilot Book directions followed to Channel Entance Buoy shown on B.A. Chart 912. However, B.A. Chart 912 (issued March 1985) is full of inaccuracies. Namely:

1. The buoyed channel has a dredged depth of approximately 11 m. which is not indicated.
2. Some leading line beacon lights are in the incorrect position on the chart, or if correctly charted, do not show the present correct direction of approach.
3. Existing leading beacons bear no relationship to present channel.
4. Several buoys are not shown or position is doubtful. Characteristics, shape and topmarks also vary to those shown on B.A. Chart 912. However, the Approach Channel is reasonably well marked and vessels should experience no difficulties as channel buoys follow IALA system.

Comments in the Pilot Book Chapter 3.26 concerning a black No. 1 Buoy (1.60) and the light beacons (L36-50) should be disregarded. However, the caution re. tidal streams heeded. (L36-50). Our vessel experienced a strong Southeasterly set onto the Channel Entrance Buoy at half ebb despite Southeasterly winds Force 4 – 5. Considerable wallowing in the swell was experienced and a good underkeel clearance should be maintained at all times.

Comments in the Pilot Book re. Pilots boarding in the S.E. monsoon season are correct (R23-28). During the Southeasterly monsoon, the combined wind and seas/swell make boarding in the Outer Roads hazardous and transit via the dredged channel to more sheltered waters between Buoy Nos. 5 and 7 (abeam of Kg. Rempak) is required. However, Shipmasters with little or no local knowledge should request the tug to meet them at the Entrance Buoy and then act as lead boat along the channel (imperative if no local chart onboard). Local Pilots and tugs very competent as Cilacap is quite a busy oil port. The Outer Buoy referred to in Chaper 3.28 on page 51 (lines L27-29) does not exist, but directions given are sound.

Anchorages: Covered in Appendix of 34, Volume II. Several tankers observed at anchor in S.E. Force 5 – 6 winds with swells of 2 m. – 3 m. – no shelter afforded in Southeasterly monsoon weather, but reported as secure anchorage. Mined areas still exist.

Restrictions: Max. permissible draft is 10.5 m. (SW). However, always check. No written information re. depths was available to the Master or table of Tidal Predictions (appeared to have been produced locally) offered, although latter printed. Shipmasters should insist on a copy being placed onboard. Caution is also required on receiving sailing times. We refused to sail on falling tide when instructed and chose to depart at 1 hour before HW. Echo sounder trace indicated a minimum depth average of 4 m. recorded throughout passage to channel, except for one shoal patch abeam of the Ore Jetty, showing 0.3 – 0.6 m. UKC. The predicted tidal range at the times in question was approximately 1.3 m. So on LW, likely UKC would have been 2.5 m. However, the Pilot indicated that the actual depths of water available on the West side of the river are not really known and as vessel has to be swung prior to sailing, it seemed prudent to have as much water as possible. If berthed starboard side to at Cilacap Berths (East side of river), vessel turns bow to jetty on last of flood or bow out on ebb tide. Daylight sailing only if vessel requires to swing prior to sailing. Otherwise, vessel can sail any time. Those vessels berthed on S.W. side of the river (on Nusa Kambangan) appear to berth laden facing upstream and swing in the turning basin S.E. of the Ore Jetty in ballast.

Tugs: 3 vertical screw tugs of 3,500 h.p. plus a smaller unit. Tugs adopt push/pull practice. Very efficient.

Berths: At Cilacap, 3 modern 'T' head jetties with Chicksan loading arms and a storing crane. Use ship's gangway. Terminal security is very good with a Security Guard and shore jetty man in attendance at all times. Entry to the terminal is by pass or written authorisation only. Jetties are designed for vessels in 150 m. – 200 m. length range. There are 2 similar jetties in the S.W. corner of the river downstream in the first bend for larger vessels. There was one vessel of 230 m. length alongside during our visit. Again, modern 'T' head construction with dolphins.

Tankers: Shore present 4×10 in. Chicksan arms. High loading rates achieveable. 1,800 cu.m.p.h. until hastily slowed down as was vessels max. loading rate on one line. Cargo papers take about 4 – 5 hours. Independent Surveyor appointed who was very efficient. No lab available for final density, so it more than 2 shore tanks loaded, surveyor takes mean of 4 – 5 samples drawn from ship's tanks to establish Bill of Lading Relative Density. No final density given by shore.

Density: Lowest recorded was 1022 at half tide flood, but probably lower in the rainy season.

Fresh Water: No details available.

Fuel: No details available.

Fire Precautions: Good check list procedures and detailed tank preparation/loading and discharge instructions given by Terminal Representative.

Surveyors: See "Tankers".

Gangway/Watchmen: See "Berthing".

Customs Allowances: 200 cigarettes and 1 case of beer and 1 bottle of spirits. No rummaging took place.

Time: GMT plus 7 hours all year round.

Storing: (See "Prelims"). Several chandlers available, Pertamina vessels store locally. Believe locally supplied fresh vegetables and fruits of good value. All meats butchered locally.

1. Truck.
2. Not available.
3. Goods would have to be brought to vessel on handcart (nearly 0.5 miles on Jetty 3).
4. Would imagine shipchandler would provide labour.

Shore Leave: Passes essential. Currency regulations not strictly enforced. Local trishaw costs about S$10.00 per person return to town. Locals very friendly. Area best described as rural. Jakarta is 1 hours flight, 4 hours by car and 6 hours by train from Cilacap.

AUTHORITY: Departemen Perhubungan, Perusahaan Umum Pelabuhan 111, Cabang Cilacap, Jalan Laut Jawa, Pelabuhan Cilacap. *Tel:* (0282) 21334, 22651, 22652, 22653. *Contact:* Soeroso Prawirosiswojo, Branch Manager. Sojoto Prawirodirjo, Harbour Master.

(b) CILACAP – IRON SAND PORT.

LOCATION: Iron Sand Jetty (loading installation) is situated at the Port of Cilacap, South coast of Central Java, in position: Lat. 07° 45′ 03″ S., Long. 109° 00′ 51″ E.

FLAGS: To be flown by incoming vessels: Vessel's National Flag; Indonesian Flag; Vessel's Number; Quarantine & Immigration Flag.

DOCUMENTS: To be produced upon vessel's arrival:

15	Crew Lists.
10	Passenger Lists.
5	Parcel Lists.
8	Stores Lists.
8	Cargo Manifests.
3	Narcotic Lists.
5	General Information (if any).
5	Personal Effects Lists.
5	Vaccination Lists.
	Last Port Clearance.
10	Firearms & Ammunition Certificates.
10	Harbour Reports.
5	Crew's Radio & Camera Lists.
	International Loadline Certificate.
	Maritime Declaration of Health Certificate.
	Safety Radio Certificate.
	Health Book or Bill of Health.
	Derat Certificate.
	Safety Equipment Certificate.
	Certificate of Registry and Tonnage.
	Certificate of Vessel's Nationality.

Inspection Team: This team consists of the Port Health Officer, Custom Officer, Harbour Master, Immigration Officer and Police.

After the vessel is granted Free Pratique, the Immigration Officer will check passports, seamen's book and crew list and issue shore passes.

PILOTAGE: Pilotage is compulsory. Two Government Pilots are available.

There is one pilot station in position Lat. 07° 44′ 08″ S., Long. 108° 59′ 34″ E. If vessel wishes to be piloted to Iron Sand Jetty on day of arrival vessel must arrive at the pilot station before 1500 hrs. local time at the latest provided the Pilot is available (information of which will be confirmed by Sub-Agent).

RESTRICTIONS: Vessels served on first come, first served basis. Vessels berth between 0600 hrs. and 1500 hrs. and leave during daylight hours on high water. The depths at LWS are: Alongside wharf, 13.0 m.; Channel Bar 11.30 m.

Vessel's Conditions: The height of vessel from water line to top of hatchcoaming or railing must not exceed 15 m. Each side deck breadth from bulwark to hatchcoaming must be preferably 7 m. minimum and 9 m. maximum.

MAX. SIZE: LOA 186 m. Max. draft 10.40 m. Deeper possible but it depends on depth at the time of passing bar and after consultation with the Harbour Master.

RADIO: Messages to Pasirbesi Cilacap can be sent through Cilacap Coastal Radio Station, call sign PKR 3.

Arrival Notice – Information Required:

Owners Advice: Owner to advise by cable to Adhiguna and Anekatambang Jakarta and Pasirbesi Cilacap at least 10 working days before vessel's expected arrival at the loading port.

Master's Advice: At least 48 hours before vessel's arrival at Cilacap Pilot Station, the ship's Master shall give the following information to Anekatambang Jakarta and Pasirbesi Cilacap: Last port of call, draft on arrival, quantity of iron sand to be loaded, stowage plan (hatch division for iron sand cargo) and other necessary messages.

Final amended arrival time must be sent at the latest 24 hours before arrival.

Previous experience showed that one cannot rely on telegrams regarding ETA sent by Agents at last port of call arriving in due time, therefore Pasirbesi Cilacap waits for the Master's telegram in order to make necessary preparation such as ordering Pilot etc.

Ship's radio transmitter is not to be used while lying in port.

TUGS: Available.

BERTHING:

Mooring: Vessels are moored alongside 1 jetty and 6 dolphins with 4 bollards with good nylon ropes, 4 fore, 4 aft, 1 fore breastline and 1 after breastline. Distance between the two extreme dolphins is 160 m.

Loading Facilities: Loading installation consists of one boom (stacker), iron sand is loaded into the hold of the vessel by means of conveyor belt. Boom can be hoisted vertically from 00° to 60° but the maximum position for proper operation is only up to 15° inclination angle and can swing 26.85 m. (60°) to each side. The length of boom is 33.33 m. The maximum outreach is about 16.33 m. from jetty to seaward.

Loading Capacity: About 400 – 500 t.p.h., however, it depends on the type of vessel, cargo space and size of hatches available.

Weighing: The iron sand is automatically weighed during loading by means of weightometer. The specific gravity of iron sand is around 2.60.

Unloading: Cargo for Aneka Tambang only.

Labourers: Labourers will be supplied by shipper. Making the vessel ready for loading to be done by vessel's Crew members.

STEVEDORES: Loading is performed by shipper's personnel. Loading equipment to be furnished by the vessel.

Working Hours: Loading to be effected on weather working days of 24 consecutive hours, Sundays and Holidays included (WWD SHINC), but the following National Holidays are excepted:

New Year (January 1st); Independence Day (August 17th); Christmas Day (December 25th). Lebaran, Maulid Day and Idul Adha determined by Moslem calendar and differ from year to year by international calendar. For definite dates consult Port Administrator.

CUSTOMS: Vessel's bonded store will be sealed by Customs Officer on arrival and will remain sealed until the vessel leaves Cilacap Port.

Note: It is recommended that ship's Master consult the Agents about the local prevailing Customs regulations with regard to currency, cigarettes, spirits, narcotics, etc. to prevent unnecessary difficulties and eventually fines.

MEDICAL: Doctor, hospital and inoculation service available.

FRESH WATER: Not available.

FUEL: Not available.

TIME: GMT plus 7 hours.

REPATRIATION: Can be arranged. Repatriant to be guarded by Immigration Officer from Cilacap to Jakarta until his departure from Jakarta to the destined country.

CONSULS: None.

SHORE LEAVE:

General: Crew members are permitted only to go to Cilacap. Shore pass must be carried by crew during shore visit.

Going beyond Cilacap is prohibited without special landing permit, which can be issued by the local Immigration Officer through Agents.

Visitors: Crew members are not allowed to invite friends, hawkers from shore aboard the vessel. It is also prohibited to lower lifeboats or rafts for purpose of fishing, sailing, visits to nearby islands, etc.

At Anchorage: While lying at anchor awaiting berth, no one is allowed to go ashore until vessel cleared.

Shore Leave Hours: From 0600 hrs. to 2300 hrs. local time.

GENERAL:

Cash Advance: Cash advance in Rupiah can be supplied by Agents at Master's request.

Fumigation: No facilities.

Nature of Bottom: Sand and hard materials.

Currents: Direction: at high tide, from East to West; at ebb tide, from West to East. Velocity: around 3-5 knots.

Chart: Indonesian Sea Chart No. 108.

Ship Chandlers: None.

MPS Tax: So called MPS Tax has to be paid in advance to the Indonesian Tax Office at Jakarta, therefore Principals are requested to remit the said MPS Tax's funds at the same time with the remittance of advance payment of ship's disbursements. The amount of MPS Tax (about 2% of concerned freight earned) will be advised by General Agents, Jakarta to the Principal, if possible a few days before Principal remits advance payment in paragraph below. The final calculation of the tax will be made later.

Disbursement: Advance Payment: At least 14 days before vessel's arrival at Cilacap vessel's Principal has to remit US$4,000 to the account of General Agents Jakarta, as advance payment of the related ship's disbursement.

Vessel's Disbursement Accounts: All vessel's expenses will be charged to the related Principals through the General Agents.

AGENCY:

General Agents: P.T. Pelayaran Bahtera Adhiguna 10-12 Jalan Kalibesar Timur, P.O. Box 1313 Jakarata, Indonesia. Tel: 276547, Cable Address: Adhiguna Jakarta, Telex: Adhiguna Jkt 42854.

Sub-Agents: P.T. Aneka Tambang, Unit Pertambangan Pasir Besi, Cilacap. Jalan Pandanarang, P.O.Box 24, Cilacap Central Java. Cable Address: Pasirbesi Cilacap. Tel: 22142, 22143. Telex: 22457.

Sub-Agent's Head Office: P.T. Aneka Tambang 24-26 Jalan Bungur Besar, Jakarta, Indonesia. Tel: 410108, Telex: Antam Jkt 49147, Cable Address: Anekatambang Jakarta.

TJIREBON: 06.41 S. 108.33 E.

DOCUMENTS:

Crew List.
Passenger List.
Customs Documents.
Manifest.
Bills of Lading.
Ship's Papers/Certificates.
Health Documents.

PILOTAGE: Not compulsory. Applications made through Agent or to Port Administrator via coast station Tjirebon Radio.

ANCHORAGE: Boundaries of port area are coast line, meridian 108° 35′ 30″ E. and the parallels of 06° 42′ 15″ S. and 06° 43′ 40″ S.

A light buoy on the position of Lat. 06° 42′ 10″ S., Long. 108° 36′ 20″ E. is placed on the guidance line to the entrance of the harbour.

RESTRICTIONS: Tjirebon Roads only accessible for ships of 8 m. max. draft, by taking the Tandkung Sanggarong Light Buoy at port hand. Only ships with 4 m. max. draft can enter Inner Harbour and moor alongside wharves.

All other ships anchor at outer roads. The harbour is open for 24 hours. For vessels entering the harbour, a signal is given from signal station.

HEALTH: Usual international procedures.

TUGS: Tug services available. Order through Agents.

RADIO: Call sign PKZ2. Working freq. 6491.5 kHz and 8799.5 kHz, watching freq. 6265 – 6285 kHz and 8204 – 8249 kHz. Working time 0030 – 0130 hrs. and 0600 – 0700 hrs. GMT.

STEVEDORES: Arranged by Agent.

MEDICAL: Normal hospital facilities available. Agent will arrange for medical attention. Advance notice required.

TANKERS: Berthing for only 300 d.w.t. tankers at special oil jetty.

DENSITY: 1025.

FRESH WATER: Delivered by water lighter. One delivery 75 tons, discharged within 6 hours. For quick delivery 2 days advance notice to Agents required.

FUEL: None available.

GANGWAY/DECK WATCHMEN: Recommended. Arrange with Agent.

OPENING/CLOSING HATCHES: Usually done by stevedores. Appreciated if done by crew.

CERTIFICATES: Port clearance last port of call. Certificates as required by vessel's country of registry and by SOLAS 1960.

CUSTOMS ALLOWANCES: 200 cigarettes per person. Wine/spirits: 1 bottle per person. Bottle opened.

IDENTIFICATION CARDS: Preferably passports, seamen's ID cards (issued by maritime authorities; vessel's country).

CONSULS: At Djakarta, 280 km. from Tjirebon.

REPAIRS: Light repairs only by local dockyard.

DRY DOCK: Graving dock of 600 d.w.t. capacity.

REPATRIATION: Can be arranged by Agents.

AIRPORT: Kemajoran International Airport 257 km. from Tjirebon. Domestic Airport 40 km. from Tjirebon.

TIME: Local time (Western Indonesia Time) is GMT plus 8 hours.

HOLIDAYS: New Year (1st January); Ascension of Christ (15th May); Santa Maria (15th August); Independence Day (17th August); Maulud, Mir'adj and Idul Fitir determined by Moslem calendar and differ from year to year by International calendar. For definite dates consult Port Administrator. Cargo work on Idul Fitir (2 days) not guaranteed due to labour shortage.

POLICE/AMBULANCE/FIRE: Harbour Police 3897; City Police 4466; Ambulance 118; Fire brigade 113.

SHORE LEAVE: Allowed after satisfactory fulfilment of immigration requirements and in possession of crew's Harbour Card.

DELAYS: Bad weather (mostly rain).

DEVELOPMENTS: Surveys being made for extension and development of port with 10 m. deep basins, container facilities and a 10 m. deep channel for accommodation of 10,000 d.w.t. ships and future shipping.

AUTHORITY: Port Administrator.

WAMSASI: 03.33 S. 126.09 E.

Log loading port on the West coast of Buru Island in position: Lat. 03° 33.5′ S., Long 126° 09.5′ E.

Vessels anchor 600 m. (approximately) off-shore in depth of 15 m.

NOTES

Please also advise Shipping Guides Ltd.

Iran

GENERAL

Money/Liquor: Ship's personnel travelling to and from Iran should be warned of the inadvisability of carrying liquor and/or large sums of money, both of which are liable to be confiscated.

Flag: Vessels to fly the new flag of the Islamic Republic of Iran (new flag is green, white and red with a red emblem in the centre).

Bandar Abbas nominated as "Mother Port":
The following information has been received from the Director, Ports and Shipping Organisation, Tehran:–
Quote:
We hereby nominate Bandar Abbas as "Mother Port", and it is required that all ships carrying cargoes for Iranian ports, on passing Ras al Kuh, contact Bandar Abbas in order that they may be allocated an anchorage position within Bandar Abbas port limits.

The diversion thereafter of any vessel to Bushire and/or Bandar Imam Khomeini will take place according to Port and Shipping Organisation planning and programming schedules.

Signed:
Managing Director
Ports and Shipping Organisation
and Assistant Ministry of Roads and Transportation.
Unquote.

Principals should note that in this connection, all Masters are requested to give their arrival notices through Bandar Abbas Port Radio Station (EQI) to the Port Director and Harbour Master.

NOTICES:
B.A. Notice to Mariners No. 34/83:
The Government of Iran has made the following announcements:

1. Vessels proceeding into the Gulf after passing through the Strait of Hormuz should pass at least 12 miles South of the following; Jazirat Bu Musa (Lat. 25° 52′ N., Long. 55° 02′ E.), Jazirat Sirri (Lat. 25° 54′ N., Long. 54° 32′ E.), Cable Bank (Lat. 26° 46′ N., Long. 52° 32′ E.) and thence 12 miles S.W. of Jazirat Farsi (Lat. 27° 59′ N., Long. 50° 11′ E.).
2. After passing Jazirat Farsi vessels should keep West and South of lines joining the following positions:
   (a) Lat. 27° 55′ N., Long. 49° 53′ E.
   (b) Lat. 29° 10′ N., Long. 49° 12′ E.
   (c) Lat. 29° 10′ N., Long. 48° 40′ E.

After passing position (c) vessels may proceed North to Kuwait Harbour.

3. All vessels heading for Iranian ports should report to Bandar Abbas Port Control on passing Ras al Kuh (Lat. 25° 48′ N., Long. 57° 17′ E.) stating their ETA at the Strait of Hormuz and destination. If clearance is not received before passing Bandar Abbas (Lat. 27° 11′ N., Long. 56° 17′ E.) vessels should proceed to the anchorage off that port.
4. Deep draft tankers, loaded and not inward bound for Iranian ports, intending to enter the restricted zone North of a line joining the positions in (1) should request clearance from the Iranian Ports and Shipping Organisation (Telex 212271 BNDR IR) 48 hours before departure giving the following information:
   (a) Last loading port
   (b) Destination
   (c) Route
   (d) Speed
   (e) Time of departure
   (f) Visual identification

The Government of Iraq has made the following announcements:

1. An exclusion zone has been established North of a line joining the following positions:
   Lat. 29° 30′ N., Long. 48° 30′ E.
   Lat. 29° 25′ N., Long. 49° 09′ E.
   Lat. 28° 23′ N., Long. 49° 47′ E.
   Lat. 28° 23′ N., Long. 51° 00′ E.
2. The area North of Lat. 29° 30′ N. has been declared a war zone.
3. Vessels entering waters at the head of the Gulf risk hitting mines or being attacked by the Iraqi Navy.
4. Tankers berthing at Jazireh-ye Khark oil port regardless of nationality may be attacked by the Iraqi Air Force.

Procedures for vessels approaching Iranian Ports: The following information on procedures are necessary.

Masters should:
Contact Bandar Abbas Port Radio on the following frequencies:
HF 8469 kHz
MF 500 kHz
MF 464 kHz
and state:

1. Ship's name.
2. Flag.
3. Kind of vessel.
4. Loading or discharging port(s).
5. ETA Sirri Island (for tankers).
6. Expected time and date of passing Hormuz.
7. Ship's speed.
8. Reason for call/cargo for discharge or to load prior to arrival, and take instructions.

As per latest instructions issued by Iranian Port Authorities, the words "Persian Gulf" should follow the name of Iranian ports in the Persian Gulf in all messages, example: "Kharg Island Persian Gulf".

Tankers should anchor at Sirri Island after passing Bandar Abbas for proper turn when loading at Kharg Island, unless instructed to proceed towards Kharg Island directly.

Upon anchoring Sirri Island vessels should communicate with Sirri Marine on VHF for further instructions.

Masters should send all messages and ETA notices for NIOC Kharg Island, Lavan Island, Sirri Island and other oil loading ports, also for NIOC head office at Tehran, should be sent via Bandar Abbas Port Radio, with copy to Agents.

Arrival Notice – Tankers:
Please instruct all tankers to advise NIOC 72 hours prior to arrival to Kharg Island (P.G.) otherwise Marketing and Export Operation Department has no responsibility, so kindly advise urgently the following information:

1. Ship's deadweight.
2. Arrival loaded displacement.
3. Cargo bunker requirement.
4. Deballasting time.
5. Height of manifold when vessel ready to load.
6. Maximum arrival and sailing draft.
7. Vessel's dimensions.

Please furnish the Harbour Master at Kharg Terminal with above information from now on. Meanwhile it would be much appreciated if you follow the same procedure for other terminals (i.e. Sirri and Lavan) if the vessels are intended to load there.

Report: December 1985.
Iran has warned that any vessel entering without permission a Security Zone declared by Teheran in the Gulf could be seized and possibly destroyed.

Border of the zone, according to Iran's Navy Commander, is a line starting 12 miles South of Sirri Island in the Southern Gulf, and stretching up the middle of the Gulf to "the Western end of the Gulf".

According to reports he did not clarify "Western end," although shipping sources have taken this to mean where the Iraq-Iran border touches the Gulf.

THE FOLLOWING FACILITIES AND OPERATING PROCEDURES WERE AVAILABLE ON 1st SEPTEMBER, 1980.

ABADAN: 30.20 N. 48.16 E.

Port of Abadan situated on right bank of the Shatt-al-Arab, about 47 miles up river from Rooka Buoy.
DOCUMENTS/PILOTAGE: See "Khorramshahr".
ANCHORAGES: On arrival of pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab the following are the recognised anchorages: Kasba Anchorage position about 2 miles above Fao with a max. depth of 35 ft. in fresh water. Bawarda Anchorage position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water. Vessels which are too deep to pass out of the river on one tide will be required to anchor at Kasba.
RESTRICTIONS: The Port is open for day and night navigation with arrival and sailing being controlled by the tide. Vessels normally enter the Bar at 4 hours before high water at the Bar or at 2 hours after high water at the Bar. Those entering 4 hours before, arrive at Bawarda anchorage generally during flood tide, so must anchor for 6 hours awaiting ebb. Those entering 2 hours after high water, arrive Bawarda during ebb tide and berth on arrival, providing berth available, weather conditions permit and outward movements do not delay. Vessels always berth starboard side to stem the ebb tide and without using tugs and leaving Abadan 4 to 6 hours before high water at Bar.
MAX. SIZE: Max. length 600 ft. Max. draft in the Shatt-al-Arab, Abadan and other river ports is 28 ft. 06 in.
HEALTH: Inward clearance is affected on board after receiving Free Pratique. Also see "Khorramshahr" – "Documents".
RADIO: The National Iranian Oil Company Coastal Radio Station call sign EQZ. The station listens for various calls on the normal International Marine Calling frequencies. When close to may be contacted on 500 kHz transferring to 428 kHz for exchange of traffic. Traffic list sent at 5 minutes past odd hours.
TUGS: Not available.
BERTHING: The number of jetties on the Abadan riverside have been reduced to eight. Nos. 3, 4, 7, 9, 11, 16, 22 and 26 have been maintained and are used for bunkering purposes and dry cargo operations.

Ships pass day and night so it is necessary that mooring lines be kept taut at all times to prevent surging on the jetties thereby breaking lines and causing damage to Company property.

Bunkering jetties for those vessels coming only for purpose of taking bunkers are:

Jetty No. 3	Draft alongside	31 ft.
Jetty No. 9	„ „	28 ft.
Jetty No. 22	„ „	25 ft.
Jetty No. 16	„ „	28 ft.

Bunkering jetties for those vessels bringing Oil Company's cargo are:

Jetty No. 7A Jetty No. 7B Jetty No. 7C Jetty No. 7D	Draft alongside between 28 ft. – 31 ft.

MEDICAL: Emergency cases: An ambulance will be dispatched on demand by calling telephone number 5555.

In ordinary cases of sickness or dental treatment: Agents will arrange transportation of patients, and advise Masters regarding necessary medical attention forms. If patient does not speak English he should be accompanied by an interpreter. Only in exceptional cases will a medical officer visit a patient on board.

TANKERS: Deliveries of the refined oil products of Abadan Refinery are effected to ocean-going tankers at Bandar Mahshahr since the inauguration of the products terminal of the National Iranian Oil Company at that port, therefore such shipments are not taking place from Abadan any more.

DENSITY: Fresh water.

FRESH WATER: Available at all jetties and at the anchorage by barge.

FUEL: Ships' bunkers are available; however not all types are available at all jetties, therefore, ship's Master should advise by radio the exact quantity and kind of bunkers required. Bunkers are delivered concurrent with loading unless otherwise requested by Master. Due to heavy bunkering commitments it is mandatory that vessels take their bunkers when convenient for the terminal, any delay incurred by a vessel taking bunkers after loading is the responsibility of the Master.

GENERAL: All other items, see "Khorramshahr".

AUTHORITY: National Iranian Oil Co. Abadan Refinery.

AGENT: Gulf Agency Co. (Iran) Ltd.

All enquiries, telexes, cables, letters concerning Ship's Agency at Iranian Ports should be directed to G.A.C. Shipping (U.K.) Ltd.

G.A.C. Shipping (U.K.) Ltd., 75 Bell Street, Reigate, Surrey, England. Cables: "GACSHIP", Reigate. Telex: 944422 and 8950181 (5 lines). ("GAC UK G"). Tel. (7372) 42255/6/7 and 22111/12/13. Facsimile: 48049.

BANDAR ABBAS: 27.08 N. 56.12 E. (See Plan)

DOCUMENTS:

Quarantine Officer

Crew List (1 copy, also all crew vaccination cards for inspection).

Customs Officer

Crew List (2 copies).
Stores List (2 copies).
List of Foreign Currency in possession of crew.

Port Authority

Crew List (1 copy).

Agents

Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Abbas Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on Manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

Ship's Certificates: The following Circular has been issued to all Agents by General Office of Port Shipping – Bandar Abbas.

Circular No. 19971, dated 22.5.1364 (13.8.85)

Please instruct Master to submit photo copies of all ship's certificates issued by classification Association to this Office upon arrival. Issuance of sailing permit depends on surrendering above certificates.

Signed: PSO Office, Bandar Abbas.

For guidance we are advised that certificates required are as follows:

1. Safety Wireless
2. Certificate of Machinery
3. Load Line Certificate
4. Registration Certificate
5. Classification Certificate
6. Ship's Cargo Gear and Safety Equipment Certificate
7. Derat Certificate

Kindly advise all vessels calling Bandar Abbas Port of the above requirements.

PILOTAGE: Application for Pilot to be made well in advance through Bandar Abbas Port Radio EQI. Agents may also arrange pilotage but should be advised of ETA well in advance.

ANCHORAGE: Approx. position Lat. 27° 04′ N., Long. 56° 14′ E. Depth 36 ft. The distance from the Outer Anchorage at Buoy No. 1 to the port entrance is about 2 miles.

Also see "Notice".

RESTRICTIONS: Entry or departure day or night. Depth of water alongside jetty, minimum 34 ft. and depth in channel approx. 32 ft. at LW. Height of tide at HW about 3 m.

Width of entrance channel is about 150 m. at surface, and 100 m. at seabed.

MAX. SIZE: Port can accommodate vessels up to 600 ft. length with a max. draft of 33 ft.

Max. draft alongside: Jetty Nos. 1, 2 and 3 – 33 ft.; Nos. 4 & 5 – 31 ft.; No. 6 – 30 ft.

RADIO: Bandar Abbas Port Radio EQI – 500 kHz. 24 hour service. Port Telex No. 0362815 BDBA IR.

Radio Officer's Report: December 1984.

Following schedule for opening and working hours has been brought to our attention by the operator of Bandar Abbas Radio.

Quote:

Notice to all ships' Masters in effect from 25th November 1984:

Abbas Radio/EQI will work on the following calling frequencies, GMT time and traffic lists.

From 0330 hrs. to 0830 hrs., Tx 8469 kHz, Rx 8 MHz (Channel 5/6).
Traffic List at 0335 hrs – 0535 hrs. – 0735 hrs. GMT.

From 0730 hrs. to 1230 hrs., Tx 12700 kHz, Rx 12 MHz (Channel 5) and 16 MHz (Channel 5).
Traffic List at 0835 hrs – 1035 hrs GMT.

From 1230 hrs. to 1430 hrs., Tx 6362 kHz, Rx 6 MHz (Channel 5) and 4 MHz (Channel 5).
Traffic List at 1235 hrs GMT.

From 1430 hrs. to 0330 hrs., Tx 4252 kHz, Rx 4 MHz (Channel 5) and 6 MHz (Channel 5).
Traffic List at 1435 hrs – 1635 hrs. – 1835 hrs. – 2035 hrs. – 2235 hrs. – 0035 hrs. GMT.

Please observe the above table for your messages.

Unquote.

It has come to our attention, however, that contrary to the ITU "List of Coast Stations" the call sign instead of "EQI" is

EQI2 for 4 MHz.
EQI4 for 6 MHz.
EQI6 for 8 MHz.
EQI8 for 12 MHz.

Further deviation from the official published information is that the station works in the 8 MHz band on 3 frequencies. Its "CQ" tape runs on the indicated 8469 kHz, however, if a calling ship is heard the answer is given on a less powerful transmitter on 8469.5 kHz. Once contact is established on the ship's working frequency the station shifts to 8463 kHz. If long messages are held for the ship, this has been put on a tape and the ship will be instructed to listen on 8469 kHz again, to receive its traffic.

VHF: Channels 13, 16, 18 and 25. HF call-sign EQI available. Also see "Radio". Tugs on Channels 13 and 16.

TUGS: 2 tugs 1,200 h.p. each, for harbour services, as well as for towage, in case of necessity.

BERTHING: Berthing and unberthing possible throughout 24 hours.

Quay is 1,050 m. in length, 35 m. width and capable of accommodating 6 vessels each of 175 m. LOA.

The Barge Jetty with a depth of 24 ft. can accommodate one vessel for alongside discharge.

There are 2 closed sheds, each having a capacity of 7,500 tons, 1 closed shed with a capacity of 15,000 tons and 6 open sheds having capacity of 100,000 tons.

Ore handling installation. The ore is loaded by conveyor belt and the average daily loading rate is 1,500 tons per day running from 0630 hrs. to 2200 hrs. daily.

Chrome ore loading is carried out at one hatch at a time only, and therefore the vessel has to be shifted by the crew in order to load the other hatches.

Grain discharged at rate of 2,500 – 3,000 tons per day using vacuators. Rate is dependent on receivers ability to arrange transport for direct delivery. No silos. Work continues throughout 24 hours in 2 shifts of 12 hours each.

Also see "Developments" and "Shipmaster's Report".

STEVEDORES: Bagged cargo can be discharged at the rate of 800/900 tons per day, working 5 hooks.

Working hours at the New Port are, 0730 – 1200 hrs., 1300 – 1800 hrs., and 1900 – 2300 hrs., making a total of 3 shifts.

CARGO GEAR: All vessels calling at this port must be capable of loading/discharging with their own gear, including rope, canvas and wire slings as necessary and/or wire or rope nets, etc.

Equipment: Equipment available ashore is as follows:

1 mobile crane of 60 tons; 1 mobile crane of 25 tons; 6 mobile cranes of 10 tons; 7 mobile cranes of 6 tons; 10 forklifts of 2 tons; 10 forklifts of 3 tons; 2 forklifts of 5 tons; 15 tractors, 15 trailers of 30 tons; 19 trailers of 20 tons; 11 trailers of 10 tons.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent of gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: There is a General Hospital with about 100 beds. A number of physicians and dentists are available. Facilities available for vaccinations and inoculations.

FRESH WATER: Fresh water is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fresh water (and bunkers) before or after loading as there is no connection at the ore loading berth. Fresh water also available ex-barge at the anchorage. There may be a shortage during Summer months.

FUEL: Fuel is available at all berths ex-pipe-line excepting the chrome ore berth which is at a separate jetty. Vessels loading chrome ore must take fuel (and fresh water) before or after loading as there is no connection at the ore loading berth.

CUSTOMS: Customs Officer will seal the store-room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for Officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.
REPAIRS: Minor repairs available at private workshops.
WEATHER: With the exception of about 2 months during the Winter, the air is generally wet and humid, but with little rainfall. Temperature seldom falls below 10 degrees centigrade in Winter, and seldom exceeds 40 degrees centigrade in Summer.
AIRPORT: About 15 km. distance from the port. Jet flights to international destinations on virtually a daily basis.
TIME: GMT plus 3.5 hours.
TELEPHONES: May be placed on board.
SERVICES: Survey, repairs, crew changes at sea or launch service to vessels off the port can be arranged. Contact through Agent.
SHORE LEAVE: Provided Security Dept. approves, crew allowed to go ashore by surrendering their seamen's books to port police guard.

U.S.H.O. 62393, 62394.

Notice to Mariners No. 16/64
UNMARKED SHIPS IN BANDAR ABBAS AREA

There are some unlit and unmanned dead ships in Bandar Abbas anchorage area and its vicinity, ships navigating in the area should take special care and are recommended to have local Pilots on board.

GENERAL: *Hotels:* The Gameron is a modern hotel equipped with air-conditioning, swimming pool and having 120 beds. A wooden swimming pier has been constructed on the sea-beach opposite the hotel for the use of residents. The Welcome Inn, a 3-star motel equipped with air-conditioning is used by seafarers.

There is another modern hotel, the Shah Abbas. Second-class hotels, about four in number are also available.
Provisions: There are no ship chandlers at Bandar Abbas, but fresh and canned provisions are available through the ship's Agent.
Transport: Distance between port and the town of Bandar Abbas is about 10 km. and there are private mini-buses and taxis available. Motor-boats are available for attendance upon vessels at anchorage and also at the chrome ore berth which is not approachable by land transport.
Laundry: Subject to time available, can be arranged by ship's Agent.
DEVELOPMENTS: A new Bandar Abbas port (Shahid Rejaie Port) is in operation West of Bandar Abbas.

4 wharves to be used for special cargoes. Length of wharves to be 720 m. with an open area of 60,000 sq.m. and suitable for vessels of up to 30,000 d.w.t. but with future allowance for 60,000 d.w.t. A Bunkering Jetty, length 30 m. and to accommodate vessels of up to 40,000 d.w.t.

A shipbuilding and ship repair yard to be built 20 km. West of Bandar Abbas. Facilities to include dry dock for vessels up to 500,000 d.w.t. and floating dock for vessels up to 70,000 d.w.t.

SHIPMASTER'S REPORT: January 1986.

New port of Shahid Rejaie is now in operation. 24 hours day working except reefer vessels which work from 0700/1100 and 1400/2300 hrs. depending on truck and heat situation. The new port is over 30 km. from city of Bandar Abbas. Repatriation is possible as there are now direct flights from Bandar Abbas to Zurich/Frankfurt and Dubai. Agents require 72 hours notice of incoming and outgoing crew changes in order to arrange visas and formalities. Shore leave normally possible by application day before and only permitted between 1000 hrs.-1600 hrs. No telephones placed onboard so have to go to Agent's office in city of Bandar Abbas. Limited supplies of fruit, vegetables, etc., at moderate prices, obtainable via Agent. Also numerous boats with fish, vegetables, etc., at outer anchorage. Fresh water available from tanker trucks at US$7.00/ton.

Boarding party arrives at anchorage and conducts search of all crew and officers cabins and accommodation areas. No alcohol permitted in anyones possession also strict Islamic laws re calendars, magazines, etc. Papers required – as per "Guide to Port Entry" plus lists of all foreign currency in each crew members possession.

A further search similar to that on arrival is made prior to departure. Essential to advise Coast Guard prior to entering Bandar Abbas approaches via VHF, also Harbour Authorities via W/T Bandar Abbas Radio 24 hours prior to arrival. Bonded store and main W/T transmitter sealed.

AUTHORITY: Port Director.
AGENT: See "Abadan".

BANDAR IMAM KHOMEINI: 30.25 N. 49.05 E.

(See Plan)

DOCUMENTS:
Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bandar Imam Khomeini Agents as far in advance of vessel's arrival as possible:
Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

The names of consignees must be inserted on the manifest at the port of origin. This is due to the fact that names have not been inserted as per Iranian Customs authorities requirements.

In view of the above, Owners are kindly requested to make sure that manifests for Bandar Imam Khomeini are properly made out at loading port with correct names of consignees.
PILOTAGE: Application for Pilot to be made well in advance through Bandar Imam Khomeini Port Radio – EQN – 500 kHz. If Agents required to arrange Pilot they should be informed well in advance.

Pilotage operated by Bandar Imam Khomeini Authorities up to Bandar Imam Khomeini. Pilot vessel approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Approach within 2.5 cables of pilot vessel. During adverse weather pilot vessel may proceed above Bar, in such cases, do not attempt proceed inward without Pilot.
APPROACHES: Shipping channels well marked with lightbeacons and buoys and present no navigational difficulties in clear weather.

Small unlit tide gauge platform located on edge of the shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Approaching vessels should steer for Khor Musa Light Float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa Light Float.
MAX. SIZE: Vessels of 34 ft. draft may enter port at any time. Higher drafts depending on state of tide. Normal rise of tide about 11 ft. Entry permitted day or night.
HEALTH: Medical Officer boards at Bandar Imam Khomeini. Subject no infectious diseases reported on board during voyage, Medical Officer will grant Pratique.
RADIO: Bandar Imam Khomeini Port Radio EQN 500 kHz. Telex: 0612051 Bdho Ir.

Continuous watch on 500 kHz is to be maintained at all times while navigating in Khor Musa Waterway.
VHF: Channels 13, 16, 18 and 25. 24 hours service.
TUGS: Normally not required, but available if necessary due to bad weather. 9 tugs – 900/1,200 h.p. 1 tug – 3,200 h.p.
BERTHING: Eastern Jetty, Berths 1 to 5 – 34 ft.
Western Jetty, Berths 6 to 8 – 34 ft.
Berths 9 to 10 – 34 ft.
Berths 11 to 20 – 34 ft.

1 berth is allocated for grain discharge only. This is done by grain vacuvators.

1 barge harbour with 884 m. length and draft of 21 ft.

Also see "Developments".

BULK HANDLING FACILITIES: Iron Ore Installation, loading capacity about 2,000 tons per day. The loading installation consists of 2 powerful moving cranes with a capacity of 100 t.p.h. on each unit, 2 funnel-shaped containers with a capacity of 30 tons each and a 600 m. long conveyor belt with a capacity of 175 t.p.h.

Sulphur: The shiploader travels the length of the vessel and has a loading rate of 400 t.p.h.

All derricks to be swung away from the shore giving the loader maximum clearance. Radio aerials, and fore and back stays to be removed.

Due to high temperatures, every precaution must be taken to combat risk of fire.

Grain: All berths are available for grain discharge. Grain is bagged in holds and discharged in slings using ship's gear. At only one berth is discharge possible by vacuvators. All discharges into railway wagons and/or trucks supplied by receivers.

All vessels discharging general cargo or grain should be prepared to handle discharge with own gear.

EQUIPMENT: 1 crane of 90 tons; 1 crane of 50 tons; 3 cranes of 35 tons; 6 cranes of 15 tons; 10 cranes of 10 tons; 4 cranes of 8 tons; 2 cranes of 6 tons; 7 forklifts of 5 tons; 14 forklifts of 3 tons; 5 forklifts of 10 tons.

MEDICAL: 24 hours advance notice of requirements to be sent to Agent.

FRESH WATER: There is water supply at Jetty Nos. 1 – 8, and Masters are requested to inform their Agents 24 hours in advance of their requirements, allowing Agents to pay for the water and take turn for supplying water to the vessel.

Fresh water can also be arranged at the Inner Anchorage by barge, and Agents will need 48 hours advance notice in order to obtain barge. Agents will have the barge loaded with water from jetty and deliver to anchorage.

As there is only 1 barge available, when this is out of commission, Agents cannot provide water at the anchorage, and vessels have to wait until they are docked alongside. Therefore it is advisable to arrive with ample water on board.

FUEL: Diesel oil and gas oil available by barge at 2–3 days notice.

HATCHES: Opening and closing by ship's crew.

WATCHMEN: Compulsory.

CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photo ready on arrival at the port to facilitate obtaining shore passes.

REPAIRS: Radio and radar repairs can be arranged from Khorramshahr. At Bandar Imam Khomeini minor technical and mechanical repairs possible by private workshops. Repair shop and slip of 1,500 tons capacity in process of construction.

AIRPORT: Distant 110 km. Regular flights.

TIME: GMT plus 3.5 hours.

DEVELOPMENTS: Depths alongside new jetties when completed will be 13.0 m. – 15.8 m.

Description	*No. of Berths*	*Wharf Length (m.)*	*Completion Date*
Extension of the 4-berth jetty (Container terminal)	4	771	2 cranes in use
Extension of the 10-berth jetty	5	1,051.5	Completed
Extension of the 10-berth general cargo jetty	5	911.2	Completed
Construction of the 14-berth jetty	14	2,552	
Construction of the Lighter harbour	20	880	Completed
Construction of the grain terminal	2	480	
Construction of the ore-loading facilities	1	250	Completed
Ro/Ro berth	1	—	

The container stacking area is about 200,000 sq.m. and equipment ready for use is as follows:

2 gantry cranes, for discharge of containers ex-vessels and 5 transtainers in container area, can accommodate about 12,800 TEU's as well as 630 TEU's of refrigerated containers.

SHIPMASTER'S REPORT:

Congestion: In the event of the port being congested vessels anchor initially in the vicinity of Buoy No. 12. Masters should then cable "Harbourmaster Bandar Imam Khomeini" to register the vessels turn giving: Date and time of anchoring; Gross and Net tonnage; length and draft. Pilot vessel "Azadeh" keeps watch on 2182 kHz and occasional watch on VHF Channels 16 and 13, Call sign "Khormusa Pilots". Vessels subsequently anchor in river to seaward of Bandar Imam Khomeini Jetties to await turn.

No water or stores can be obtained at Outer Anchorage.

At Inner Anchorage water and stores can be obtained by launch but with some difficulty.

AGENT: See "Abadan".

ADD S.M.R.

BANDAR MAHSHAHR: 30.27 N. 49.20 E. (See Plan)

Refined Products Loading Terminal of the National Iranian Oil Company.

FLAG: All vessels required to fly Iranian flag from foremast during daylight hours, while in port.

DOCUMENTS:

8 Crew Lists.
2 Bonded Store Lists.
International Health Form.
If cargo aboard, Manifest certified by Iranian Consulate.
Clearance from Last Port.

GENERAL: Khor Musa is deep tidal inlet at head of the Gulf. Consists of triangular-shaped entrance 35 miles wide and 22 miles long followed by a channel, approximately 14 miles long with average width about 800 ft., ending at Port of Bandar Mahshahr. Khor Musa is entered by deep water approach channel 25 miles long and 0.8 miles wide, commencing at Khor Musa light float, located in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E. At end of approaches channel, near Buoy No. 12, restricted depths and channel widths extend for distance of 8 miles, in vicinity of Khor Musa Bar. A deep water channel then exists up to commercial port of Bandar Imam Khomeini, and to oil port of Bandar Mahshahr, a total distance of 37 miles from end of Bar Channel. Refined products delivered to Bandar Mahshahr Terminal from National Iranian Oil Company's Refinery at Abadan.

TERRITORIAL WATERS: The 12 mile limit of Iranian territorial waters crosses approaches channel in vicinity of Khor Musa Approaches Buoy No. 8, which is approximately 20 miles from Khor Musa light float.

KHOR MUSA APPROACHES:

Navigational Dangers: Numerous shoals and sand banks in Khor Musa with low-lying shore lines and few conspicuous marks. However, shipping channels well marked with light beacons and buoys and present no navigational difficulties in clear weather. A small unlit tide gauge platform located on edge of shoal West of shipping channel in Lat. 29° 42′ 30″ N., Long. 49° 03′ 48″ E., approximately 1.75 miles West of Khor Musa Approaches Buoy No. 4, and shown on Admiralty Chart.

Outer Khor Musa Channel: Approaching vessels should steer for Khor Musa light float, in position Lat. 29° 36′ 32″ N., Long. 49° 34′ 47″ E., and from there a course should be set along marked channel for Buoy No. 12 in position Lat. 29° 56′ 03″ N., Long. 49° 06′ 47″ E., bearing 308° 45′ from Khor Musa light float.

New Khor Musa Channel: Depth of channel is 40 ft. below L.A.T.

Note: Buoys South of and including Buoy No. 12 above are referred to as Khor Musa Approaches Buoys. Buoys North of No. 12 above are referred to as Inner Khor Musa Buoys.

PILOTAGE: Compulsory. Service operated by Bandar Imam Khomeini Port Authorities up to Bandar Imam Khomeini, and by Oil Company between Bandar Imam Khomeini and Bandar Mahshahr. Pilot vessel maintains station approximately 1 mile, 135° from Khor Musa Approaches Buoy No. 12. Vessels requiring Pilot should approach within 2.5 cables of pilot vessel. During adverse weather conditions Pilot may proceed above bar for shelter; in such cases vessels should not attempt to proceed inward without Pilot. Essential that ETA Bandar Imam Khomeini is transmitted to Coastal Radio Station EQZ as soon as possible after Pilot has embarked at Pilot Station. If for any reason a vessel is required to wait at any time at Bandar Imam Khomeini, it will be advised through EQZ. Marine Operation Section, Bandar Mahshahr Terminal, on receipt of ETA Bandar Imam Khomeini, will arrange for Berthing Master to board vessel at Bandar Imam Khomeini anchorage and allocate jetty berth at Bandar Mahshahr.

BANDAR MAHSHAHR APPROACHES:

Navigational Dangers: Khor Musa Channel well marked with buoys and beacons, but attention is drawn to following:

(a) Outer Khor Musa Bar: Lat. 29° 59′ N., Long. 49° 04′ E. and Inner Khor Musa Bar Lat. 30° 02′ N., Long. 49° 01′ E., where restricted channel widths and depths exist and min. depth 40 ft. Buoyed channel over bar is 800 ft. wide, but declared min. depth of 40 ft. only applicable to central half of channel. Towards edges of channel, shallower depths exist.

(b) Qassar bin Siswan: A rocky shoal, in Lat. 30° 12′ N., Long. 48° 58′ E. approximately 10 miles North of Inner Khor Musa Bar, marked by Buoy No. 9 with min. depth 6 ft.

(c) Khor Wastah to Beacon 18: Near sharp bend to East in channel, where tidal streams reach rate of over 4 knots at ebb.

Khor Musa Bar: Reached approximately 5 miles N.W. from pilot vessel, and normally does not restrict passage of inward vessels.

Khor Musa Channel: After leaving bar, channel is followed up Khor Musa for about 32 miles to anchorage at Bandar Imam Khomeini.

Bandar Imam Khomeini: All inward bound ships required to anchor on arrival off Bandar Imam Khomeini, where Pilot disembarks and a Government Medical Officer comes on board to grant Pratique. For this purpose an accommodation ladder should be rigged and ready before arrival.

Bandar Mahshahr Roadstead: Shortly after leaving Bandar Imam Khomeini, the channel to Bandar Mahshahr is entered between the starboard hand Beacon No. 1 (flashing white) and the port hand Beacon No. 2 (temporarily removed). Channel well marked by light beacons to entrance of Bandar Mahshahr, at Beacon No. 4. All port hand lights flash red and all starboard hand lights flash white. Distance from Bandar Imam Khomeini Anchorage to Bandar Mahshahr about 7 miles. Before arriving at Bandar Mahshahr, the accommodation ladder must be taken in and the ship's side cleared for tugs and berthing.

ANCHORAGE: No anchorages in Bandar Mahshahr or Bandar Mahshahr roadstead. Inward bound vessels must anchor on Northern side of Khor Musa Channel, West of Bandar Imam Khomeini, and await arrival of Oil Company Berthing Master.

WIND AND TIDE:
Khor Musa Bar: Classified as Standard Port in Admiralty Tide Tables, Volume II. Tidal predictions considerably affected by strong winds. Variations up to 3 hours in time, and 3.5 ft. in height have been recorded. North-Westerly winds tend to lower level and retard predicted times of high and low waters; South-Easterly winds have opposite effect. At Khor Musa Bar, MHHW has rise of 11.6 ft. and MLHW has rise of 9.6 ft. above chart datum. Rise of tide at bar is also given by automatic tide indicator established near inner Khor Musa Buoy No. 8. Masters may obtain expected depth of water on Khor Musa Bar at any time by telephone to Marine Operations Office, Mahshahr, 4264.
Khor Musa: Tidal range increases between bar and Mahshahr. Maximum tidal velocities in Khor Musa about 3.5 knots on flood and 4.5 knots on ebb, at bend near Inner Khor Musa Beacon No. 18.
At Ports of Imam Khomeini and Mahshahr: Average time high water is 1 hour 35 minutes later, and low water 16 minutes later than on Bar. MHHW has rise of 17.0 ft., and MLHW rise of 14.6 ft. above Mahshahr chart datum.
Mahshahr Terminal: N.W. prevailing winds blow across jetties, from shore. On average, 60% of prevailing winds from N.W., 30% from S.E., and 10% variable. N.W. and S.E. winds frequently reach Force 8, but winds from other directions normally do not exceed Force 4. Maximum tidal range 18.9 ft. At springs, flood tide has velocity of 2 knots and ebb tide velocity 3 knots.
MAX. SIZE: Max. LOA 780 ft. Max. permissible draft at Khor Musa Bar is 40 ft. Depths in tanker berths vary from 37 ft. at Berth No. 4 up to 43.5 ft. at Berth No. 6.

Vessel up to 740 ft. LOA can be berthed day or night at any stage of the tide. Vessels lengths 741 ft. – 780 ft. can only be berthed during daylight hours flood tide and unberthed on flood tide day or night.
HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. Medical Officer boards at Imam Khomeini Anchorage. Subject no infectious diseases reported on board during voyage, Medical Officer will grant Pratique.
RADIO: Oil company has coastal radio station at Abadan, call sign EQZ. Station handles messages to and from oil ports of Mahshahr, Abadan, Kharg Island and Cyrus Terminal.
Nomination and Loading Orders: Signalled by Iranmash on receipt of vessel's first ETA. Vessels should signal tentative ETA Khor Musa Bar, 72 hours in advance, confirming ETA not less than 48 hours before arrival Khor Musa Pilot Vessel Station.
Radio Watches: Continuous watch on 500 kHz to be maintained at all times while navigating Khor Musa waterway, and ordinary listening watches maintained when at anchor.
VHF: Mahshahr Terminal equipped with International Maritime VHF/FM Radio Telephone Service, using standard international frequencies. Masters recommended use this facility when within range of Mahshahr Terminal. Channels available on continuous watch basis:

No. 16 Safety and Calling.
No. 12 Port use, tankers and tugs.
No. 20 Port use, telephone extension.
No. 26 Port use, telephone extension.

Initial contact should be made on Channel 16 and then transfer to Channel 12 for port operations, or Channel 20 or 26 for telephone extension.
TUGS: 3 tugs at terminal, all of 1,500 b.h.p., all fully equipped for fire fighting. Incoming ships are met by tugs in channel about 1 mile below port limits. 2 tugs always used berthing, and 1 or 2 unberthing, according to state of tide and direction of ship's head. Vessels take tug's ropes.
BERTHING: Vessels arriving on flood tide berthed starboard side to jetty, vessels arriving on ebb tide berth port side to jetty. 6 bulk loading jetties, each fitted with Woodfield loading unit. 10 in. loading arms, 6 in. bunker arms. Minimum number mooring ropes or wires required is 14, as follows: (Forward) – 4 head ropes, 2 breast ropes, 1 back spring. (Aft) – 4 stern ropes, 2 breast ropes, 1 back spring. For additional security 1 extra breast line forward and aft should be used. Unless breasts of adequate strength line are used, there is every possibility of vessel when in light condition being blown off jetty by N.W. wind and damaging loading equipment.

Maximum loading rates are:

Liquid propane/butane	1,500 t.p.h.
Aviation gasolines	700 t.p.h.
White spirits (solvent)	400 t.p.h.
Motor gasolines	2,200 t.p.h.
Motor gasoline (over the rail blending)	400 t.p.h.
Naphtha	2,100 t.p.h.
Turbine fuels	1,600 t.p.h.
Kerosines	1,500 t.p.h.
Gas oils	2,500 t.p.h.
Marine diesels	700 t.p.h.
Fuel oils	5,000 t.p.h.

LPG LOADING: Propane and butane gas is loaded at No. 6 Jetty at a rate of 1,500 t.p.h. Propane and butane cannot be loaded simultaneously.

As 16 in. fixed Chicksan liquid and vapour return arms are used for loading, certain ships are limited to one-side berthing only. To avoid delay of vessels, it is advisable to have vapour return connections on both sides of liquid connection on board.

Terminal has available a series of ASA Standard reducers and adapters.

Loading temperature of propane is about minus 48°F., and butane is about minus 23°F.
BALLAST: Tankers may discharge ballast ashore at Jetty Nos. 1, 2, 5 and 6. Ballast received at rate of 2,000 t.p.h. Slops and residues at rate of 200 t.p.h.
MEDICAL: No medical facilities at terminal. Agents may arrange medical attention through Oil Company clinic in Abadan. In event hospital treatment required, patient would be taken to Abadan.
FRESH WATER: Limited supply potable water available all jetties, but supply very limited during months June to October.
FUEL: Fuel and diesel oil available each jetty. 10 in. loading arms connected to 6 in. flexible hoses. Loading rates, fuel max. 500 t.p.h., diesel max. 400 t.p.h. 48 hours notice required.
FIRE PRECAUTIONS: On arrival Imam Khomeini Anchorage, Master is given 6 copies of Fire and Safety Regulations. Fire Station and Emergency tel. 4111.
CUSTOMS ALLOWANCES: Reasonable quantity spirits and tobacco for consumption in port may be issued prior sealing store rooms. Strict supervision imposed by Customs and prohibited items, particularly tobacco and cigarettes, should not be taken ashore in excess of 50 cigarettes, or cigars, or 1 oz. tobacco.
CONSULS: Consulates situated in Khorramshahr.
REPAIRS: No repair facilities at Mahshahr or Imam Khomeini. In emergency, the Oil Company may be able to undertake minor repairs. No main engine repairs whilst alongside loading jetties without permission from Terminal Superintendent.
TIME: GMT plus 3.5 hours.
TELEPHONES: Available at each jetty. If requested, telephone may be placed aboard.
SHORE LEAVE: Restricted to foreshore area only. Recreation centre opposite No. 2 Jetty.
CURRENCY: The unit of currency is the Iranian Rial. It is ilegal to use any other than Iranian currency ashore and heavy fines have been imposed for infringement of this regulation. Masters are requested to bring this matter to the individual notice of their officers and crew. Currency denominations are:

Notes: 10,000, 5,000, 1,000, 500, 200, 100, 50 rials.
Coins: 20, 10, 5, 2 and 1 rial.

AUTHORITY: National Iranian Oil Co. Bandar Mahshahr.
AGENT: See "Abadan".

BUSHIRE: 28.59 N. 50.50 E. (See Plan)

DOCUMENTS:
Quarantine Officer
Crew List (1 copy, also all crew vaccination cards for inspection).
Customs Officer
Crew List (2 copies).
Stores List (2 copies).
Port Authority
Crew List (1 copy).
Agents
Crew List (2 copies).

In order to avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Bushire Agents (via Khorramshahr) as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported as early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.
PILOTAGE: Compulsory. Application for Pilot to be made well in advance through Bushire Port Radio EQM, 500 kHz. Agents may also arrange pilotage but should be advised of ETA well in advance.
ANCHORAGE: In outer port in (approx.) position Lat. 28° 58′ 30″ N., Long. 50° 44′ 50″ E.
RESTRICTIONS: Entry and departure day or night. Depth in outer channel 10.5 m. at LW. Depth of inner channel, 30 ft. at LW and 35 ft. at HW.

The depth alongside the berth is 30 ft. at LW and 37 ft. at HW.
MAX. SIZE: LOA 600 ft. Max. draft in channel is 28 ft.
RADIO: Bushire Port Radio EQM, 500 kHz. Telex number of port 0332108 BDBU IR.
VHF: VHF radio, operating on International VHF Marine Channels 13, 16 and 25. MF call sign EQM available at following zone times: 0500 to 0800 hrs. and 1200 to 1500 hrs.
TUGS: Normally not used. In event of bad weather tug will assist berthing. 2 tugs up to 250 h.p., 2 tugs of 1,200 h.p.
BERTHING: Jetty 360 m. long.
Max. draft No. 1 Jetty – 29 ft.
No. 2 Jetty – 25 ft.
Dolphins – 29 ft.
Navy Jetty – 21 ft.
MEDICAL: 24 hours advance notice of medical requirements to be passed to Agents. Doctor available for vaccinations and inoculations.
FRESH WATER: Available at berths ex-pipe-line.
FUEL: Not available.
HATCHES: To be opened and closed by shore labour.
CUSTOMS: Customs Officer will seal the store room. All liquor and cigarette stocks will be placed under bond and reasonable ship's requirements should be taken from store before sealing.
CARGO GEAR: *Equipment*
2 cranes up to 5 tons
6 cranes up to 5/10 tons
3 cranes up to 10/15 tons
1 crane up to 20/30 tons
1 crane over 50 tons (max. 60 tons).
5 forklifts 2/3 tons
7 forklifts 3/4 tons

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police authorities. All shore passes should bear a photograph of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

CONSULS: None.

REPAIRS: Minor repairs possible by local workshops.

AIRPORT: 7 km. from port. Regular flights.

TIME: GMT plus 3.5 hours.

TELEPHONES: May be connected on board.

SHORE LEAVE: Permitted.

DELAYS: Occasional delays awaiting berth turn.

CIRCULAR: Issued by Ports and Shipping Organisation – Bushire Directorate.

To: Master of MV/MT ....

We would like to draw your kind attention that polluting Iranian territorial waters with garbage or wastes is prohibited (same as other pollutants), therefore reception facilities will be available to collect all waste and garbage from all vessels as follows:

1. Collecting garbage will be carried out 3 times per week.
2. Reception facilities will be available at more than above mentioned times, upon Master or Ships Agencies request.
3. Collected waste and garbage shall be handed to Bushire Port Officials who approach your vessel.
4. Use of said facilities will be compulsory.
5. Related expenses will be charged to all vessels (used/not used) according to Bushire Port Directorate tariff.

The Master shall be responsible for following the provision of this Circular.

Penalty will be charged against those violating this Circular in accordance with Iran's existing legal regulations.

DEVELOPMENTS: A 280 m. pier to be commissioned in the near future.

SHIPMASTER'S REPORT: 1976.

Fresh Water: Available at wharf ex-pipe-line but mains pressure is insufficient to pump water up to deck level of vessels and is therefore only generally available to small craft, e.g. fishing vessels.

Fresh water is also available ex-road tankers (10 tons and 20 tons capacity). Tankers are not equipped with pumps and a portable pump belonging to the Fire Brigade is used.

Identification Cards: Crew members proceeding ashore leave their Seamen's Book or identification card at the wharf check point and collect same on return.

Fuel: Bunker fuels and lubricating oils not available.

Watchmen: Posting of gangway and/or deck watchmen most advisable but recommend these should be provided from crew members.

SHIPMASTER'S REPORT: 1977.

Vessel discharged 726 metric tonnes of crane parts in 2 days (4 hatches).

ETA: To be given at least 7 days in advance through Bahrain Radio as telegrams take 2 days. From the outer anchorage the following Telegram must be sent to "Port Director Bushire" via Bushire Radio EQM 500 kHz: Anchor time, Draft, Length, Breadth, Cargo, Last Port.

Outer anchorage: Buoy No. 2 of fairway bearing 130° and 250° to the prohibited area in 10 m. to 20 m. water. The anchorage is not protected, but the holding ground is good, even in bad weather.

Pilots: The Pilot comes by a fast blue boat to the outer anchorage. There is 1 Pilot, also assistant and 1 docking master with 1 assistant, they only come out in daytime and good weather.

Tugs: There are 2 small and 1 large tugboat, which are used for turning the ship.

Pier: The 360 m. long pier has good wooden and rubber fenders and sufficient bollards. Ships always berth port side alongside. The starboard anchor is used for turning.

Clearance: The following documents are necessary:

5 crew lists.
1 health clearance.
1 vaccination list (cholera/smallpox).
1 store list.
1 crew effects list.

The stores and the radio-room are sealed, beer is not sealed.

Immigration: The immigration officials do not come aboard, the Agent takes all seamen's books ashore and exchanges them for shore passes which are valid from 0600 hrs. until 2200 hrs. while the ship is in port. Before leaving the seamen's books will be returned in exchange for the shore-passes.

Provisions: Fruit and fish can be obtained, good quality and low prices at the local market.

Water: Water from the pier in any quantity and good quality. The pipeline – pressure is only enough for heights of about 3 m. to 4 m., so that some "tricks" must be used by larger ships.

Doctor: 24 hour's advance notice required.

Sea Protest: Notary public available, no consulates.

Bunkers: Not available.

Repairs: Were urgently required by the vessel and confirmed by Agent's, but nobody came on board.

Photographs: Taking of pictures not allowed, as Bushire is Military Base.

Crew-change: Very easy and can be done even on the outer anchorage when the ship has no clearance. The crew coming without delay directly from the airport to the ship in a launch which costs, for 1 trip (4 hours) only, US $71.00.

AUTHORITY: Port Director.

AGENT: See "Abadan".

CHAH-BAHAR: 25.17 N. 60.37 E. (See Plan)

ANCHORAGE:

Latitude: 25° 22′ N.	Longitude: 60° 30′ E.
Latitude: 25° 22′ N.	Longitude: 60° 33′ E.
Latitude: 25° 18′ N.	Longitude: 60° 30′ E.
Latitude: 25° 18′ N.	Longitude: 60° 33′ E.

MAX. SIZE: Max. size 10,000 d.w.t. – 28,000 d.w.t. Max. draft 28 ft. at HHW.

VHF: All ships destinated to the Chah-Bahar Port are requested to call Chah-Bahar on VHF Channel 16 between 0700 to 1900 hrs. local time.

DEVELOPMENTS: Considerable development is taking place, and the port is expected to become of considerable importance in the future. No date for expected completion of various development work being undertaken has been received, but we understand that the following plans have been made:—

A Container Terminal with length of 270 m., a warehouse of 9,000 sq. m. and an open area of 60,000 sq. m., suitable for vessels of up to 30,000 d.w.t.

Two Jetties for general cargoes. Length of jetties to be 360 m. with warehouses of 54,000 sq. m., and an open area of 60,000 sq. m., suitable for vessels of up to 20,000 d.w.t.

One Bunkering Jetty. Length of jetty 300 m. and suitable to accommodate vessels of up to 30,000 d.w.t.

SHIP'S OFFICER'S REPORT: May 1983.

Approaches: The approaches to Char-Bahar from the East, West and South are straightforward, as far as the Outer Anchorage Areas, where a Pilot will embark. There is a buoy in position Lat. 25° 14.8′ N., Long. 60° 29.6′ E., and marks a 16 m. obstruction to the North of it.

There is a Fl. 10s. 16M. light on Damagheh ye Chah-Bahar Point, this is at the present time unlit, and the Racon on the point has not been observed either.

The light on Damagheh ye Puzim is Fl. (1) 15s. 30m. 10M., and working at present.

The coastline also offers a good radar target, on both sides of the bay.

Pilotage: Pilotage is compulsory (to the best of my knowledge), the Pilot boards the vessel at anchor to the South of Damagheh ye Chah-Bahar Point, and takes the vessels to the anchorage within the bay (see Admiralty Chart No. 145).

The pilot boat is merely an open boat. International code flag "G" has to be flown by vessels requiring a Pilot.

Anchorages: The anchorage where vessels have been discharging, is bounded by the following positions: Lat. 25° 22′ N., Long. 60° 30′ E.; Lat. 25° 22′ N., Long. 60° 33′ E.; Lat. 25° 18′ N., Long. 60° 30′ E.; Lat. 25° 18′ N., Long. 60° 33′ E.

The bottom is soft mud, and the minimum charted depth is 10.3 m.

VHF: There is a Port Control Office situated in Konarak, the details are:

Frequency: VHF Channel 16, Channel 14.
Hours: 0600-1330 hrs., 1430-1830 hrs. local time.
Call: Konarak Port Control.

Tugs: There are 2 tugs at the port, however, they appear to be involved in the port construction. No further information is known about size, horsepower, etc.

Berthing: There is extensive work being carried out at Char-Bahar, however at present there are no berths open to vessels, 4 berths are due to be completed within the space of 4 months approximately. When these berths are open the main cargoes to be handled are bagged grain and fertiliser, for distribution within this Southern area of Iran. Vessels are however being discharged at anchor into barges and their contents being taken to Konarak.

Medical: There is a hospital, with limited facilities, at Char-Bahar.

Fresh Water: Not available.

Fuel: Not available.

Repairs: Not available.

Cargo Gear: Ship's gear used at anchorage.

Repatriation: Possible from Char-Bahar and Konarak, however, trouble can be experienced as personnel have to fly to Tehran.

It is, at present, due to the unrest within the country, very difficult for ship's personnel to join a vessel in Iran in general.

Airport: The airport is at Konarak, and has 5 flights to Tehran per week, but not on Sundays and Tuesdays. Flights from Tehran are still daily.

Time: GMT plus 3.5 hours.

Holidays: No work is carried out on Fridays.

Shore Leave: Shore leave is not permitted, any person visiting the vessel, e.g. doctor, has to accompanied by the vessel's Agent.

Regulations: Vessels are not permitted to leave Char-Bahar without clearance papers from the Harbour Master.

Delays: With most Iranian ports now at a standstill, delays of varying lengths can be expected.

General: From approximately mid June all facilities are closed down at Char-Bahar due to the S.W. Monsoon, as the working anchorage is affected by the S'ly swell that develops. Ships waiting here to proceed to Bandar Abbas, will also be despatched as the Agents, etc. also close down, and the whole port set-up is then non-operational.

Ship's stores are not available at Char-Bahar.

Authority: The main Port Administration takes place at Konarak, where there is a Harbour Master's Office and radio station.

Agent: The main Agents at Char-Bahar appear to be Shipping Co., Tehran. There are no telex facilities ashore, however there are no restrictions placed on vessels who wish to use their own radio equipment.

SHIPMASTER'S REPORT: January 1984.
Anchoring: 3 nautical miles East of the buoy at about Lat. 25° 15.5′ N., Long. 60° 29.5′ E. off Ras Pusim.
Port: Unsheltered Port (Port Facilities under development). No bad weather docking. Max. draft 31 ft. Max. length 200 m. Density 1026.0.
Pilot: Pilotage compulsory, will be advised by Port Control and meets vessel at the anchorage. Pilot comes out by tug.
VHF: Char-Bahar Port Control on Channels 16 and 12.
Tugs: 1 tug of 2,500 hp ("Ramassan"). Tug lines available, no line charges.
Documents: 7 Crew lists, 7 Passenger lists, 7 Store lists, 7 Vaccination lists (Cards for inspection, Cholera obligatory), 7 Cargo manifests, last draft survey from loading port for bulk carrier, Ship's safety certificates for inspection (Rats, Cargo, etc.).
Health: From other Iranian ports no clearance formalities necessary. From sea clearance is effected before coming alongside and arrival.
Radio: Via Radio Bandar Abbas EQI.
Discharging: Only by ship's gear. Port Authorities have to be informed about cargo gear type (Cranes or derricks). No shore facilities. In case of emergency 1 crane of 75 tons lifting capacity available. Bulk cargo discharging rate about 2,000 tons per day, will be carried away by lorry. Stevedore chief has to be accommodated and fed.
Jetty: Consists of two pontoons on legs, connected by a bridge. Size of pontoons 150 m. by 30 m., bridge length 90 m. 8 bollards on pontoon ship's side.
Fresh water: Will be delivered by truck, rate about 30 tons max. per day. (Line under construction).
Fuel: Diesel oil by truck. Prices above international rate to keep supply low until Line and Stores are ready (now under construction).
Consul: None.
Repairs: Not possible.
Gangway/Deck watchmen: Supplied by Shore. Rate about 4,000 Rials per day.
Hatches: Opening and closing carried out by crew.
Customs Allowances: Customs Officer will seal all store rooms. Reasonable ships requirements (Cigarettes) should be taken out before sealing. 200 Cigarettes Allowance per week per crew member.
Repatriation: Can be arranged by agent.
Airport: Konarak Airbase. Daily flight from Bandar Abbas and Tehran and back. Konarak lies about 70 km. from Char-Bahar.
Time: Iranian Time 3.5 hours minus UTC.
Medical: Facilities available (Doctor, Ambulance). Emergency cases are sent to Tehran (Inform Port Authorities).
Telephone: Under construction.
Services: Provisions from local market at reasonable prices. Garbage removal available.
Shore Leave: By shore passes (photograph to be included).
Authorities: Port and Shipping Organisation. J. Khalaj (Port Director).

AGENT: See "Abadan".

CYRUS TERMINAL: 29.01 N. 49.28 E. (See Plan)

LOCATION: Open, unsheltered submarine export mooring, Lat. 29° 01′ 27″ N., Long. 49° 28′ 51″ E. Storage barge *(Pazargad)*. Lat. 29° 01′ 57″ N., Long. 49° 29′ 30″ E.
APPROACHES:
Obstructions: In addition to submarine export mooring and storage vessel *Pazargad,* various oil wells and production structures located in immediate vicinity, which constitute hazard to navigation, as follows:

	Lat.	*Long.*
Well C–2A and the Production Stations	29° 03′ 07″ N.	49° 29′ 57″ E.
C–3	29° 02′ 38.7″ N.	49° 27′ 23.1″ E.
C–4	29° 00′ 15″ N.	49° 32′ 00″ E.
C–5	29° 02′ 52″ N.	49° 31′ 34″ E.
C–6	29° 03′ 57″ N.	49° 29′ 57″ E.
C–7	29° 03′ 31.2″ N.	49° 29′ 05.6″ E.
C–8	29° 03′ 31.2″ N.	49° 30′ 48″ E.
C–9	29° 02′ 15″ N.	49° 29′ 57″ E.
C–10	29° 03′ 33″ N.	49° 27′ 22.5″ E.
C–11	29° 04′ 51″ N.	49° 26′ 31″ E.
C–12	29° 03′ 33″ N.	49° 23′ 56.5″ E.
C–13	29° 02′ 41″ N.	49° 25′ 39.5″ E.

Safest and most desirable direction of approach to Cyrus Terminal is from S.E. Due to numerous obstructions noted above any approach should be made with extreme caution.
Navigational Aids. All structures located within Cyrus Terminal area display interrupted quick flashing white lights and sound a fog horn. The storage barge *Pazargad* displays, as required, those day and night signals as prescribed by articles 27 (b) and 30 (a) of International Rules. The 6 mooring buoys for the Cyrus Terminal are not lighted.
DOCUMENTS:
Bill of Health.
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consulate. If vessel is in ballast, no legalisation dues).
Clearance (from last port).
Register.
5 Crew Lists.
Passenger Manifest (if any passengers are on board).
5 Store Lists.
Bonded Store List.

PILOTAGE: Vessels will be boarded by Mooring Master of IPAC within 2 miles, approximately 180° true from *Pazargad.* Mooring Master will advise Master on approaches to berth, mooring and unmooring, connecting and disconnecting submarine hose and all other operations within berthing area. All manoeuvring within loading berth area shall be done only in accordance with advice of an IPAC Mooring Master, subject to understanding that Master shall remain solely responsible for safety and proper manoeuvring. Master or qualified deck officer must be on bridge at all times while ship manoeuvring.

Vessels requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. If at night, adequate lighting must be rigged overside for Mooring Master to approach side of ship and climb ladder safely. Adequate searchlights should also be rigged on both wings of bridge when mooring at night, to assist in running lines to buoys.
ANCHORAGE: Area bound by: 28° 59′ 00″ N. to 29° 01′ 00″ N. between meridians 49° 28′ 00″ E. to 49° 31′ 00″ E. Depth of water 24 fathoms.

Masters cautioned not to anchor North of Lat. 29° 01′ 00″ and East of Long. 49° 31′ 00″ as there are numerous flow lines on sea bed connecting various structures, storage tanker and submarine terminal. During Winter months, November through March, severe South-easterly storms often encountered with little or no indication of impending storm. Vessels at anchor, and loading in submarine terminal, must have engines ready with full power for immediate use. Masters cautioned to use adequate scope of chain while anchored awaiting berth.
RESTRICTIONS: None. Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.
MAX. SIZE: Ship loaded by means of submarine pipe-line and 1 hose at 1 loading berth, located in approximately 140 ft. of water. Mooring buoys numbered 1, 2, 3, 4, 5 and 6. Starting with No. 1 East of mooring and numbered consecutively in clockwise direction. Max. capacity 70,000 d.w.t., max. length 950 ft.
HEALTH: The rules governing quarantine are the same as found in other ports of the world. Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members.
RADIO: *Advice of Arrival:* Incoming tankers must send incoming ETA at least 3 days before arrival. The radio station at Abadan will handle IPAC's radio traffic, pre-arrival messages, etc., for vessels calling Cyrus Terminal. The station call sign is EQZ. Messages for IPAC should be to NIOC Kharg, prefixed "for IPAC" with copy to Agent. Further ETA messages should be sent when vessel 24 and 12 hours distant from Cyrus Terminal and at any other time any appreciable change occurs in original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.
Radio Watches: While at the anchorage off Cyrus Terminal, vessels should maintain normal listening watches on both HF and WT.
VHF: Cyrus Terminal base *(Pazargad)* is equipped with VHF radio telephone and maintains a radio watch. Vessels arriving at Cyrus Terminal may communicate with the *Pazargad* on Channel 6.
TUGS: A charge for each tug movement will be made in accordance with rates established by IPAC. When tug/tugs are standing-by vessel mooring/unmooring, for use if required, the full fee will be charged. IPAC maintains launches to assist in mooring and unmooring.
BERTHING: (Also see "Max. Size"). Tankers to have ready: *(a)* Windlass and deck winches fore and aft. *(b)* 12 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port or starboard side as directed, opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5.5 tons. *(d)* 1 bower anchor ready for immediate use, with minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition. *(e)* Equipped to fit flanges on submarine hoses, which are of ASA standards.

Permanent moorings in the berth consist of 6 steel cylindrical buoys each fitted with a quick release hook to which ship's mooring lines attached by mooring launches. The berth is laid out on a 2 heading basis, using 12 mooring ropes (4 bow, 4 beam, and 4 quarter).
LOADING: Maximum crude oil loading rates for a tanker using one 12 in. deck hose and 20 p.s.i. at ship's rail is approximately 12,000 b.p.h. Requested that ships receive oil as fast as it can be delivered, with due regard for safety, also that any fittings on manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into the ships, be removed before arrival at terminal. Preferable that connections be provided so that a 12 in. deck hose can be used.
MEDICAL: Neither medical nor hospital facilities provided by IPAC. Private doctors and hospital facilities available at Tehran or Abadan. Emergency hospital cases only can be handled on Kharg Island, approximately 53 miles from Cyrus Terminal.
DENSITY: Salinity approximately 20% more than normal sea water.
TIDE/CURRENT: Tidal range between 6 ft. and 8 ft. Currents generally on axis of ship berthed in mooring; however, rotary currents can be expected.
FRESH WATER: No fresh water available.
FUEL: No bunkers or lubricants available.
FIRE PRECAUTIONS: A continuous and efficient fire watch must be kept on deck and in engine room. In event of fire breaking out in any part of a vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid continuous ringing of ship's bell.
CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain a maximum of 50 cigarettes or 1 oz. of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel is subject to a fine.

CONSULS: No consulates at Cyrus Terminal; consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

REPAIRS/STORES: Port is considered an "open roadstead", and under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities for making vessel repairs. No spare parts, stores or supplies should be sent to Cyrus Terminal for delivery to a ship.

REPATRIATION: No facilities.

TIME: GMT plus 3.5 hours.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities. No visitors permitted on tankers loading.

INSPECTION SERVICE AND MARINE SURVEYS:

Petroleum inspection services available at Cyrus Terminal from Saybolt. IPAC also inspects cargoes on specific request of off-taker companies.

GOVERNMENT OFFICIALS: Iranian officials, such as the Customs Officers, Immigration Officer and Quarantine Officer, are available on the barge *Pazargad.* Should Customs Guards be stationed on board vessels while in the moorings, it is expected that ships will provide food for these guards and other officials. All vessels calling at Cyrus Terminal must provide an accommodation ladder, rigged for Iranian Officials.

AUTHORITY: Iran Pan American Oil Co.

AGENT: See "Abadan".

HORMOZE TERMINAL (Valfajr Two): 26.57 N. 56.43 E.

LOCATION: *Location of Storage Vessels:*

Position A:	Lat. 26° 57′ N.	Long. 56° 43′ E.
Position B:	Lat. 26° 53′ N.	Long. 56° 39′ E.
Position C:	Lat. 26° 44′ N.	Long. 56° 42′ E.
Position D:	Lat. 26° 48′ N.	Long. 56° 51′ E.

PROCEDURES: New procedures and charges have not yet been announced, but the same procedures as for Sirri Island STS are expected to be applicable.

SERVICES: *Offshore Supply Service:* In order to service the tankers offshore at the new Hormoze Terminal supply service with fast crew-supply boat in operation at Ras Al Khaimah.

For further details and service in connection with the G.A.C. supply service please contact G.A.C. Dubai. Tel: (971-4) 457555, 457612. Telex: 45448, 45809.

AGENT: Gulf Agency Company will provide full agency service at the new terminal.

Please note that all enquiries, communications, cables, telex, correspondence should be sent to G.A.C. (UK) Ltd. (See "Abadan").

KHARG ISLAND: 29.14 N. 50.19 E. (See Plan)

A. DARIUS TERMINAL. Oil-loading terminal of the Iran Pan American Oil Company.

B. KHARG TERMINAL. Oil-loading terminal of the National Iranian Oil Company. Including Sea Island Terminal.

C. KHEMCO TERMINAL. Loading terminal of Kharg Chemical Co.

GENERAL: (Items common to all Terminals): There are no ballast disposal facilities at Kharg and it is of the utmost importance that all vessels arriving at the anchorage should ensure that all water ballast and pipe-lines are completely clean.

FLAG: All vessels required to fly Iranian Ensign on foremast during daylight hours in Iranian waters. Iranian territorial waters extend 12 miles seaward from mainland and adjacent islands. Iranian flags may be obtained from Agent.

DOCUMENTS:

Bill of Health (certified by Iranian Consulate at port of origin or port of call. If no Iranian Consul available, the legalisation fees are payable at Kharg Island).
Health Declaration (International Health Form to be filled out by Master on arrival).
Manifest (if with cargo certified by Iranian Consul (see "Bill of Health" above). If vessel is in ballast, no legalisation fees due).
Clearance (from last port).
Register.
Crew List.
Passenger Manifest (if any passengers are on board).
Store List.
Bonded Store List.

APPROACHES: Vessels approaching Kharg from South, should keep at least 2 miles to East of Island. Vessels approaching Kharg from North should keep to West of Island, as Khargu Island to the North is very low lying and difficult to see at night until dangerously close-to.

Landfall: 3 high gas flare towers, 2 in the South and 1 to the North of the Island, make a most conspicuous landfall. At night, from a distance, the light from these flares tends to obliterate the various navigation lights. At night the glow from the 3 gas flares is visible from great distance, far beyond the range of any navigation lights. However on occasions, 1 or more or all of the flares may not be burning, making the main navigation lights more readily visible.

Navigational Dangers: Eastern coast is open and free from navigational dangers, except for coral reef, which extends for about 0.25 miles seawards along whole coast line. To S.W. of Island, numerous oil platforms in positions up to 5 miles offshore.

Kharg South Beacon: Lat. 29° 12′ 46″ N., Long. 50° 19′ 15″ E. At Southern end of Island, rotating white light, on steel tower, 295 ft. above MHHW, 2 flashes every 12 seconds, visibility 24 miles. Obscured by high ground and oil tanks between 151° and 215° from seaward. Light beam partly diverged upwards for aircraft. This is the main navigation light for Kharg area.

Kharg North Beacon: Lat. 20° 15′ 02″ N., Long. 50° 18′ 18″ E. At Northern end of Island, white light on steel tower, 261 ft. above MHHW, 2 flashes every 6 seconds, visibility 12 miles. Obscured by high ground and oil installations between 330° and 352° from seaward.

Khargu Beacon: Lat. 29° 20′ 20″ N., Long. 50° 21′ 18″ E. At Northern end of Khargu Island, on a steel tower 59 ft. above MHHW, a white light with 10° red sectors towards Ganaveh and Kharg Island to indicate general directions of submarine pipe-lines, 3 flashes every 8 seconds, visibility, 10 miles red sector, 15 miles white sector. Obscured between 011° and 041° from seaward by Khargu Island. Radar reflectors fitted to North and East sides of tower top.

Ganaveh Beacon: Lat. 29° 35′ 20″ N., Long. 50° 29′ 50″ E. On mainland, at start of submarine pipe-lines to Island, 2 miles N.W. of Ganaveh village, on steel tower, white light with 10° red sector along general direction of submarine pipe-lines, 1 flash every 5 seconds, visibility 10 miles red sector, 15 miles white sector. Light beam partly diverged upwards for aircraft.

South-East Buoy: Lat. 29° 11′ 29″ N., Long. 50° 19′ 51″ E. Red can buoy, white light, 1 flash every 2 seconds. Near edge of reef, S.E. Kharg Island in 54 ft. of water.

North-East Buoy: Lat. 29° 14′ 51″ N., Long. 50° 20′ 10″ E. Red conical buoy, white light, 1 flash every 6 seconds. On Northern boundary of port limits.

Channel Buoy: Lat. 29° 16′ 12″ N., Long. 50° 20′ 27″ E. Red conical buoy, white light, 1 flash every 3 seconds. In Eastern end of channel between Kharg and Khargu Island.

Radio Masts: At South end of Kharg Island a high radio mast painted red and white positioned at Lat. 29° 12′ 47″ N., Long. 50° 19′ 15″ E., approximate elevation 510 ft. Fitted with fixed red lights. Another radio mast, also painted red and white, positioned at Lat. 29° 14′ 10″ N., Long. 50° 18′ 26″ E., approximate elevation 367 ft., fitted with fixed red light.

Dideban Tomb: On highest point of Kharg Island, Lat. 29° 14′ 57″ N., Long. 50° 18′ 29″ E., a small domed building located, elevation 290 ft.

Mir Muhammad Tomb: On N.E. part of Kharg Island at Lat. 29° 15′ 10″ N., Long. 50° 18′ 46″ E., conical shaped tower surmounted by small dome, elevation 165 ft.

Khargu Trees: On Khargu Island at Lat. 29° 18′ 45″ N., Long. 50° 20′ 30″ E., a small group of trees, only ones on island, visible from long distances.

Notice Boards: On North, S.E. coast and S.W. of Kharg Island and along coasts of Khargu Island, large white notice boards indicating prohibited anchorages surrounding submarine pipe-lines.

Port Area: The area within:

29° 12′ 23″ N.	29° 14′ 53″ N.
50° 18′ 36″ E.	50° 21′ 17″ E.
29° 12′ 21″ N.	29° 14′ 53″ N.
50° 21′ 40″ E.	50° 20′ 20″ E.

offshore from Kharg Island has been proclaimed a port area. Port area used by vessels manoeuvring to and from oil-loading terminals. The whole of area within port limits declared a Prohibited Anchorage, and, a Restricted Manoeuvring Area. Vessels must not enter within port limits unless Berthing Master is on Board.

PILOTAGE: Vessels should proceed to Eastern Anchorage, outside port limits (Prohibited Anchorage and Manoeuvring Area) approximately 1.5 miles East of oil loading jetty, and await arrival of Berthing Master.

ANCHORAGE: The approved Anchorage Area is to East of Eastern boundary of Port Limits, where holding ground is good. All vessels on arrival at Kharg must proceed to anchorage area and await instructions.

Prohibited Anchorages: 3 Prohibited Anchorages in the Kharg Area:

(a) Submarine Pipe-lines: Anchorage prohibited in vicinity of submarine oil pipe-lines laid between North coast of Kharg Island and mainland near Ganaveh.

(b) Offshore Oil Platforms: Anchorage prohibited to S.W. of Kharg Island in vicinity of numerous oil wells and drilling platforms extending 5 miles or more out to sea.

(c) Harbour Area (East): The area surrounding the "T" jetty and extending approximately 2.5 km. offshore from the East coast has been declared as a Harbour Area.

(d) Harbour Area (West): The area surrounding the sea island and extending to a distance of approximately 4 km. offshore has been declared as a Harbour Area. The Harbour Area is used by vessels manoeuvring to and from the oil loading jetty. No vessel is allowed to enter or anchor within these areas unless a Berthing Master is on board.

Cautions: (a) Unlit mooring buoys at S.E. of Kharg Island (see Darius Terminal). *(b)* Oil Platforms to S.W. of Kharg Island. *(c)* Aircraft approach lane S.E. of a point mid-way between Naval Boat Harbour and Kharg North Buoy, in N.W. corner of Port Area.

HEALTH: Tankers calling at Kharg Island and requiring Radio Pratique should cable Agents 48 hours prior to arrival advising the following details:

(a) Number of persons on board, including Master and passengers.
(b) Last port of call.
(c) Ports of call during the voyage.
(d) Duration of voyage.
(e) If any person on board requires vaccination against cholera.
(f) If there has been any case of illness of contagious nature.

If approved, the Master will be notified and the vessel will be allowed to enter port without yellow flag or night quarantine signal.

RADIO: OSCO main radio station at Abadan will handle radio traffic. Call sign EQZ. Vessels bound for Kharg Terminal should prefix messages with "NIOC Kharg", and vessels bound Darius terminal should prefix with "NIOC for IPAC Kharg", in both cases with copy to Agents. Terminal on Telex No. 212770.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches on station EQZ on WT, and Kharg Terminal on VHF. Use of the ship's radio station and/or battery-charging equipment prohibited during cargo transfer operations.

Schedule of watch (GMT) (Hours)	*Listening watch frequencies* kHz	*Transmitting frequencies* kHz	*Receiving frequencies* kHz	*Remarks*
Continuous	500	500	500	Distress: Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405–535	Traffic list every 2 hours from 0105 to 2305 hrs. GMT.
0400–0700	8356–8374	8471	8374–8460	
0700–0900	12534–12561	13069.5	12561–12689	*Traffic lists every 2 hours from 0405 hrs. GMT.
1000–1300	12534–12561	13069.5	12561–12689	
1400–1700	8356–8374	8471	8374–8460	
1700–1830	4178–4187	4294	4187–4231	

*During scheduled watches on HF while station/EQZ is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according their schedules of watch.

VHF: Kharg Terminal equipped with VHF radio telephone, using international frequencies. Continuous watch kept on international calling and emergency Channel 16, frequency 156.80 MHz. Other channels, available after contact has been established are: Nos. 4, 12, 14 and 20. Masters recommended use this facility when within range, particularly when approaching port. In poor visibility, when vessel's approach may not be observed from shore, VHF communication may be the means of avoiding delay in mooring/berthing.

MEDICAL: Small hospital with clinic on Kharg operated by National Iranian Oil Company for minor medical treatment. More serious cases may have to be sent by air to Abadan Hospital. Any medical services required should be brought to attention of Medical Officer when he boards vessel to grant pratique.

DENSITY/TIDE/WINDS: Salinity of sea approximately 20% more than normal sea water. Surface temperature of sea ranges from 63° to 97° F depending on season. The extreme tidal range between 7 and 8 ft. with maximum rate of about 1.5 knots. Wind directions and velocity subject rapid change without warning and precautions necessary to avoid difficulties. Heaviest seas and swells while in port are from N.E. through S.E.

Tidal heights	
L.A.T.	=+0.4 ft.
MLLW	=+1.8 ft.
MHLW	=+3.6 ft.
MSL	=+4.1 ft.
LLHW	=+4.7 ft.
MHHW	=+6.5 ft.
H.A.T.	=+8.2 ft.

Heights in feet above Chart Datum

Tidal streams			
Slack water	10.75 hrs.	before	HHW
Ebb (full)	7.75 hrs.	before	HHW
Slack water	4.50 hrs.	before	HHW
Flood (full)	1.50 hrs.	before	HHW
Slack water	1.00 hr.	after	HHW
Ebb (max.)	3.75 hrs.	after	HHW
Slack water	6.50 hrs.	after	HHW
Flood (max.)	9.50 hrs.	after	HHW

Times are approximate only

FRESH WATER: Not available.

STORES: Commissary supplies, as well as steward's stores, in limited quantities, can be arranged through Agent with at least 5 days advance notice.

Not allowed to be placed on board while vessel is berthed, can be taken at anchor or boat comes alongside immediately after leaving jetty. Transfer of bonded stores is permitted, with Customs in attendance, while alongside.

LAUNDRY: No laundry services available.

IDENTIFICATION CARDS: Each seaman will be issued with a pass which will be punched when crossing the jetty limits going out and in, and may be used once only. In addition to this pass, seamen should carry an Identification Card or Vaccination Certificate, bearing the owner's photograph.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain maximum 50 cigarettes or 1 ounce of tobacco or 5 cigars. The balance of all smoking items must be collected and carefully listed prior to arrival. This list will be checked by Customs before sealing locker. If any discrepancies, vessel subject to fine.

CONSULS: No consulates at Kharg Island; however, consular or diplomatic representatives, for most nations, maintain offices in Teheran, and some in Khorramshahr.

REPAIRS: Masters of vessels loading or discharging at Darius Terminal are advised that this port is considered an "open roadstead" and, under no circumstances may engines be shut down for repairs while ships are moored in submarine berth. No facilities at Darius Terminal for making vessels repairs, and it is emphasised that all vessels in submarine moorings must be in condition to clear immediately on instructions to do so. No repairs allowed alongside the Oil Loading Jetty at Kharg Terminal. Ship's main engines must be available at all times while alongside jetty.

AIRPORT: Small airport used by Oil Company aircraft and Iranair flights to and from Abadan. Due security arrangements movement of crew must be programmed through Agent.

TIME: GMT plus 3.5 hours.

A. DARIUS TERMINAL (Additional requirements and details).

Terminal operates 24 hours per day, 7 days a week. Ships moored, loaded and unmoored at any hour, weather and other circumstances permitting. Terminal will never be closed due to religious holidays.

LOCATION: A submarine terminal at S.E. corner off Kharg Island Lat. 29° 12′ 40″ N., Long. 50° 20′ 40″ E.

LANDMARKS: *Jetty:* Approximately 0.5 miles North of the mooring is a "T" shaped wharf for the berthing of Supertankers.

Khemco Jetty: Approximately 0.25 miles West of the terminal is a dolphin type jetty for berthing LPG and sulphur ships.

South Gas Flares: At the South end of Kharg Island, 2 very conspicuous gas flares bearing 277°, 1,900 ft. and 271°, 2,150 ft. from Kharg South Beacon. Approximate elevations: 400 ft.

North Gas Flares: In the centre of Kharg Island 2 very conspicuous gas flares bearing 191°, 3,050 ft. from Kharg North Beacon, elevation 435 ft.

Khemco Gas Flares: On the S.E. of Kharg Island 2 small gas flares burning in the Kharg Chemical Plant.

Note: At night, the glow from the 4 gas flares is visible at great distances. However, on occasions, 1 or more or all of the flares may not be burning.

Also see "Approaches" at beginning of Kharg Island.

RADIO: *Arrival Advice:* It is important that ships establish radio contact with IPAC when 3 days distant from Kharg Island and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hour ETA message to IPAC, giving the best estimate of ship's arrival time at the Terminal. This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to IPAC when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time when an appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival, and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring.

Ship-to-Shore Communication: Kharg Terminal is equipped with VHF radio-telephone, using international frequencies. A continuous watch is kept on the international calling and emergency Channel 16, frequency 156.80 MHz. Other channels which are available after contact has been established are:

Channel	*Frequency in MHz*	*Call sign*
IPAC 14	156.700	IPAC Marine
IPAC 6	156.300	IPAC Marine
OSCO 12	156.600	Kharg Pilot
OSCO 20	157.000	Kharg Pilot

Masters are recommended to use this facility when within range, particularly when approaching the port. In poor visibility, when a vessel's approach may not be observed from the shore, VHF communication may be the means of avoiding delay in mooring. While a ship is in mooring, communication will be by portable VHF radiotelephone units. The Mooring Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units becoming inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Radio Watches: While at anchor off Kharg Island, vessels should maintain normal listening watches with station EQZ on W/T and Kharg Terminal on VHF.

MOORING: Vessel requested to have pilot ladder safely and securely rigged, ready for immediate use, and long enough to reach Mooring Master's launch. Mooring Master will board 2 miles seaward of the Terminal sea-buoy. Adequate searchlights should be rigged on both wings of bridge, when mooring at night, to assist in running lines to buoys.

Raising, connecting, disconnecting and lowering of submarine hoses will be performed by IPAC line handling crew as advised by Mooring Master, who will remain on board while ship in moorings. A capable winchman to be provided by ship.

Mooring buoys for Darius Terminal not lighted. Permanent moorings in berth consist of 5 steel cylindrical buoys each fitted with quick release hook, to which ship's mooring lines are attached by IPAC's mooring launches. The berth is laid out on the one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter and 1 stern). Mooring buoys numbered 1, 2, 3, 4 and 5. Starting with No. 1. East of the mooring and numbers running consecutively in a clockwise direction.

Tankers to have ready: *(a)* Windlass and both bower anchors, each with not less than 120 fathoms of chain. *(b)* 9 good manila or synthetic mooring lines, each not less than 120 fathoms in length, with efficient stoppers for each line. *(c)* On port side opposite ship's manifold, equipment capable of lifting submarine hose safely and expeditiously. Weight of lift 5 tons.

LOADING: Ship loaded by means of submarine pipe-line and 2 hoses at 1 loading berth, located approximately 1 mile offshore in over 65 ft. of water. Crude oil loading hoses lifted on port side. Maximum crude oil loading rate for tanker using two 12 in. deck hoses and 20 p.s.i. at ship's rail is approximately 5,000 t.p.h.

In order to save ship time as well as to make berth available for others, requested that ships receive oil as fast as it can be delivered, with due regard for safety. Also requested that any fittings on ship's manifold such as "Y's", strainers, or mud boxes, which tend to restrict flow of crude oil into ship, be removed before arrival at terminal. It is preferable that connections be provided so that a 12 in. deck hose can be used. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

FIRE PRECAUTIONS AND SAFETY: Full instructions will be given by Mooring Master, but vessel's personnel responsible for safety of vessel and must take all necessary precautions, whether or not so advised by Mooring Master.

During time vessel moored in Darius Terminal, a continuous and efficient fire watch must be kept on deck and in the engine room. In the event of fire breaking out in any part of vessel, however minor it may be, fire alarm must be given immediately. This will consist of a succession of long blasts on ship's whistle, together with a rapid and continuous ringing of ship's bell.

EMERGENCY MEDICAL ASSISTANCE: Vessels requiring emergency medical assistance should hoist international code flag "W" in daylight, and at night send "W" (· – –) on blinker light. To attract immediate attention, the same signal "W" (· – –) should be given on ship's whistle in either day or night hours. The signal should be repeated until acknowledged visually by either another ship in the moorings, or from IPAC launch. As soon as signal is received. Terminal officials will advise Agent as soon as possible of the emergency medical aid required.

FUEL: No bunkers available at submarine mooring. Bunkers may be loaded at main jetty having obtained nomination through NIOC Tehran (Export and Marketing). Tankers loading crude oil at "T"-head jetties have at all times priority for berth, over the vessels lifting bunkers only. Marine lubricants not available, except through marketing representatives by arrangement through Agent.

CURRENTS: Generally on the axis of the ship berthed in the mooring; however, rotary currents can be expected.

SHORE LEAVE: For personnel of vessels loading or unloading at the Terminal is arranged between Agent and Iranian Security Officer aboard vessel. Ship's personnel (other than medical or emergency cases) not allowed to disembark or embark at Terminal. Sufficient personnel must be aboard at all times for letting go lines and clearing moorings immediately.

B. KHARG TERMINAL (Additional requirements and details).

RESTRICTIONS: If arriving with a part cargo vessels will be refused loading by N.I.O.C. if the maximum displacement exceeds 250,000 tons.

OIL LOADING JETTY: "Tee" head with overall length of 6,038 ft. between fender faces. The fender to fender width is 138 ft., for the section South of trestle approach, and 124 ft. for North section. Jetty face is aligned in direction 172° 35′ – 352° 35′. Deck level 22 ft. above chart datum. The jetty, being on Eastern side of Island, is sheltered from prevailing N.W. winds, but exposed to S.E., when during Winter storms, waves of 8 ft. to 10 ft. often occur. A maximum wave height of 15 ft. has been recorded at Southern end of jetty, under such conditions.

Berth	*Depth of water* (m.)	*Maximum capacity* (d.w.t.)*	*Loading and bunker arms*†	*Height limits ship's manifold in metres above chart datum*
1	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
2	19.8	38,000	4×12 in.	3.4 to 18.9
3	21.3	250,000	3×16 in. 2×12 in.	4.3 to 23.8
4	20.1	65,000	5×12 in.	3.4 to 18.9
5	21.3	250,000	3×16 in. 2×12 in.	5.8 to 25.3
6	20.4	120,000	3×16 in. 2×12 in.	4.3 to 23.8
7	18.3	175,000	3×16 in. 2×12 in.	4.3 to 23.8
8	19.2	45,000	5×12 in.	3.4 to 18.7
9	17.4	140,000	3×16 in. 2×12 in.	4.3 to 23.8
10	17.7	90,000	5×12 in.	3.4 to 18.7

* Subject to weather, tidal conditions and lengths of vessels adjacent berths.

† 12 in. Bunker arms at all berths. All Chicksan arm flanges are series 150 API.

Outer Berths: 9, 7, 1, 3, 5. Inner Berths: 10, 8, 2, 4, 6. Berth Nos. 7, 8, 9 and 10 located North of trestle approach.

SEA ISLAND TERMINAL: A 4 berth Sea Island Loading Terminal is in operation on the West side of Kharg Island.

The structure, 1,800 ft. long, is centred in Lat. 29° 13′ 29″ N., Long. 50° 17′ 10″ E., and is aligned in a direction 154°/334°. It is designed to accommodate vessels of approximately 150,000/500,000 tons at No. 11 Berth on the West side, and vessels of approximately 150,000/300,000 tons at No. 12 Berth on the East side.

Unless advised to the contrary, all vessels should proceed to the anchorage East of the Main Jetty.

Vessels instructed to load at the Sea Island are required to rig an accommodation ladder to facilitate the boarding of Customs, Health, and Port Authorities. Agency work and crew changes must also be effected at the anchorage. There is no shore leave from the Sea Island.

The comparatively exposed position of the Sea Island makes additional moorings advisable and vessels should be prepared to use their maximum number of mooring lines. Quick-release hooks are provided for all mooring lines.

Minimum size vessel, about 150,000 d.w.t.

Loading rates of up to 30,000 t.p.h. to one berth can be achieved at the Sea Island.

Only fuel-oil bunkers are available.

Vessels may, if considered necessary, be required to retain on board sufficient ballast while loading cargo to ensure that the loading arms do not exceed their maximum designed elevation.

Berth	*of water* (m.)	*Maximum capacity* (d.w.t.)	*Height limits Loading and bunker arms*	*in metres above chart datum*
11	32.0	500,000	4×24 in. 2×16 in.	6.1 to 33.5
12	29.5	300,000	4×16 in. 2×12 in.	6.1 to 28.3

The Sea Island has been extended to the Northward to create two new berths, 14 and 15.

Berth	*Depth of water* (m.)	*Maximum capacity* (d.w.t.)	*Loading and bunker arms*	*Height limits ship's manifold in metres above chart datum*
14	25.9	300,000	2×16 in. 4×16 in.	6.1 to 28.3
15	27.4	500,000	2×16 in. 4×24 in.	6.1 to 33.5

Loading Arms: Luceat – quick coupling.

Effective Loading Rate: Berth No. 14 – 16,000 t.p.h. Berth No. 15 – 30,000 t.p.h.

TUGS: Vessel normally berthed with assistance of tugs which, together with Berthing Master, meet vessel at port limits. The tugs will come alongside, normally 1 to the bow and 1 to the stern, as far forward and aft as is safe and practical. Tugs' towing equipment will be used on all occasions.

BERTHING: Approaching berth, 2 fibre-rope headlines should be lowered to mooring launch, for transfer to jetty. 2 stern lines are then handled, preferably one at a time, to avoid possible fouling of vessel's propeller. Positioning of vessel's loading manifold in relation to Chicksan loading arms on jetty has to be carried out to a close tolerance, as directed by Berthing Master, to requirements of jetty operator. On inner berths, particularly Nos. 2, 4 and 8, vessels are berthed head outwards, i.e. stern to trestle. In these cases, vessels are towed stern first by after tug's hook wire, with forward tug either alongside or on towing hook, depending on tidal and weather conditions.

Mooring System: Under normal conditions, 12 lines are used to moor a vessel as follows: Forward: 3 headlines, 2 breast lines and 1 spring. Aft.: 3 stern lines, 2 breast lines and 1 spring.

During Winter S.E. storm period, it is usual to use 1 each additional headline and breast line, at each end making a total of 16 mooring lines. Breast lines and springs of wire rope are acceptable.

Berthing Limitations: Various combinations of wind, sea and tidal conditions, also size, length, ballasted trim and handling qualities of a vessel and available berth space, can effect decision to berth a vessel at Kharg. All these factors have to be evaluated before a final berthing decision is made.

Manifold Position: No berthing where manifold of vessel cannot be positioned, within horizontal limits of Chicksan loading unit arms, due to adjacent occupied berths.

Note: On outside berths, very large vessels of light free board in excess of 70 ft., may be required to retain sufficient ballast, to ensure that their manifolds remain within the vertical range of the Chicksan loading arms, until sufficient cargo is loaded.

LOADING: Both Iranian light and heavy crude oils available at all jetty berths. Crude oil is delivered to jetty from Tank Farm, situated on central plateau of sand, by gravity flow through 4×48 in. diameter pipe-lines and to the Sea Island by 2×78 in. shorelines and 2×56 in. sealines. Loading rates of up to 15,000 t.p.h. to one berth can be achieved at Kharg Terminal. Up to 60,000 t.p.h. can be delivered to all 10 berths simultaneously.

FUEL: Bunkering facilities at each berth. 2 grades available, marine fuel oil and marine diesel oil. Bunkers may be loaded up to a maximum rate of 1,000 t.p.h., and bunkering will normally commence before loading cargo. Only fuel oil available at Sea Island berths.

FIRE PRECAUTIONS: A copy of the "Fire and Safety Regulations" notice is given to Master of every vessel by Berthing Master, at Anchorage. 5 additional copies are passed aboard vessel when it arrives alongside jetty. These extra copies must be posted in conspicuous places throughout the vessel. While a vessel is within Port Area a continuous and efficient Fire Watch shall be maintained on deck and in the engine room. In event of fire, however minor it may be, the Fire Alarm shall be given immediately as follows:

On Board Vessel: Rapid and continuous ringing of ship's bell, together with a succession of long blasts on the ship's whistle or siren.

On Jetty or Elsewhere in Port Area: Rapid and continuous ringing of the gongs on the jetty. A push-button alarm system is provided at each berth.

SAFETY:

Amendment to Safety Regulations and Safety Inspections:

To keep Safety Regulations and Safety Inspections in line with current world-wide practice, the following new Rules will be put in force immediately.

1. At least 50% of the crew including sufficient senior officers shall be available on board at all times to deal with emergencies.
2. Two dry powder extinguishers plus 1 fire hose to be available at the manifold at all times.
   Note: This is especially important before connecting lines.
3. Present funnel deck hoses, now only required at inside berths, are now required on all berths including Sea Island.

SHIPMASTER'S REPORT: 1977.

There are 4 loading berths on the Sea Island. There are also maximum displacement limits for coming alongside these berths ballasted or with part cargo. On the inside berths the top limit is 175,000 tons and the outside berths it is 250,000 tons displacement.

Also the outside (seaward) berths can supply 16 in. reducers for loading cargo. Both seaward berths have a maximum depth of 106 ft.

For berthing at No. 15, vessel used 10 lines each end – 2 head/stern lines, 4 breasts and 2 springs. The ship is 330,000 d.w.t. We used 4 tugs, 1 each end on the hook and 2 pushing at the side. I feel Mariners could be warned that these tugs have very heavy wires which takes time and plenty of men to handle.

We also found that we needed 3 Crew Lists.

Ships cannot be berthed if the wind is Northwesterly over 20 knots.

C. KHEMCO TERMINAL: (Additional requirements and details)

OPERATOR: Kharg Chemical Company, Ltd. (Khemco), Tehran, Iran. Cable Address: "Chemkharg" Tehran. Telex: 2402 Khemco Tn.

LOCATION: Khemco Terminal dolphin jetty is located at the S.E. corner of Kharg Island Lat. 29° 12′ 45″ N., Long. 50° 20′ 05″ E.

APPROACHES: Vessels entering Kharg Island Roads must not approach or anchor West of Long. 50° 21′ 30″ E. (being approximately 1 mile East of Khemco Terminal), unless a Company Berthing Master is on board.

PILOTAGE: Company has own Berthing Masters, who will board vessels outside the port area and will pilot and berth the vessel alongside Khemco Jetty. Berthing Masters will also carry out the duties of safety officer.

Vessels with the Berthing Master on board shall display the international flag "H" in a prominent position while manoeuvring under his advice. This flag will be in addition to the "Q" flag, being already hoisted for quarantine purposes.

Vessels are requested to have a clean pilot ladder safely secured on the leeside of the ship for the Berthing Master. The pilot ladder should be long enough to reach the pilot tug or launch. At night adequate lighting for the pilot ladder shall be installed.

Pilotage, berthing, mooring and sailing of vessels will be carried out in accordance with instructions of the Mooring Masters, subject to the understanding that in all circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety, proper navigation and manoeuvring of his vessel. The Master or a qualified ship's deck officer must be on the bridge at all times while the vessel is underway or unmoored.

NOTICE OF READINESS: Notice of Readiness will not be accepted at the time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered as the time the berthing Master boards the vessel or the time that the vessel anchors, whichever occurs first.

RESTRICTIONS: Vessels can be berthed day or night in 2 directions using ship's moorings. Occasionally bow anchor will be used during berthing operation.

MAX. SIZE: Length of pier is 1,180 ft. with maximum of 42 ft. water alongside at MLLW.

RADIO: The main radio station at Abadan will handle Khemco's radio traffic. The station call sign is EQZ. Messages for Khemco should be prefixed with "NIOC for Khemco Kharg", with copy to Agent.

Advice of Arrival: It is important that ships establish radio contact with Khemco, when 3 days distance from Kharg Island, and maintain this contact until just prior to arrival at the terminal. All ships should send a 72 hours ETA message to Khemco, giving the best estimate of the ship's arrival time at Kharg anchorage. The first ETA message should also include a definite statement of the details of manifold dimensions, cargo requirement, Agent and any other necessary information. Further ETA messages should be sent to Khemco when the vessel is 24 hours and 12 hours distant from Kharg Island and at any other time if any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding ship's readiness to load on arrival, and the number of hours required to discharge clean ballast after ship has berthed.

TUGS: Two 2,000 h.p. and one 1,000 h.p. diesel tugs are provided by the Company. Normally 2 tugs are used for berthing and 1 for unberthing, depending on the Berthing Master's discretion. Tugs moorings are provided by the company and vessels are requested to have good heaving lines handy on the deck for picking up the tug lines. All tugs are equipped with fire-fighting equipment, including a foam system, which can be used when required.

MOORING: If, in the opinion of the Berthing Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event shall not be brought into berth until such facilities, lines or gear are deemed satisfactory.

Mooring Launches. 4 powerful mooring launches are provided by the Company and normally 1 is used during berthing and unberthing operations.

Mooring Lines. Under normal weather conditions the following mooring lines are required: forward: 3 head lines, 2 breast lines, 1 spring; aft.: 3 stern lines, 2 breast lines, 1 spring.

All lines to be of 120 fathoms, with the exception of the breast lines, being of shorter length. No wire lines are to be used at Khemco jetty.

During abnormal conditions, especially during Winter periods, some additional 4 lines are required for extra moorings.

In most cases it might be necessary to pass all forward lines from the bow and all stern lines from the poop.

Dolphins. The jetty consists of 1 main and 8 smaller dolphins. 4 on either side of the main dolphin are for ships mooring. The main dolphin is connected to the shore via a trestle and causeway. Head and stern lines are passed to the dolphins by means of line handling launches and others by heaving lines. All mooring dolphins are fitted with quick-release hooks.

BERTHING: A. Berthing Masters. Vessels to be berthed at Khemco jetty will be boarded by a Company Berthing Master at Kharg anchorage and after advising the ship's Master of all port formalities, will normally take 2 tugs (1 to the bow and 1 to the stern), alongside while proceeding to the jetty.

B. Berth Turn. Vessels to load at Khemco jetty will normally be accepted and the berth will be assigned to the vessel in order of arrival and nomination. In the event the berthing is delayed by weather or other reasons, vessels will keep their positions in line. Vessels leaving the port area on account of weather or other reasons should keep in contact with the terminal in order that they will be available when weather moderates. Khemco reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading out of turn does not materially delay the loading of other vessels in line. For example, in the event that weather or other reasons make it necessary for vessels awaiting berth to leave the terminal and put to sea, Khemco may load another vessel after the port opens, but before the return of the vessels waiting in line ahead of it. And further, Khemco reserves the right to decline to berth a specific vessel if its condition or facilities are unsafe for berthing or loading, but berths other vessels "out of turn".

C. Gangway. When alongside the jetty, vessels shall provide an efficient gangway with a net rigged underneath. During the hours of darkness, they shall install adequate safe lighting for the gangway. These lights are in addition to those used for the deck illumination.

D. Sailing. All lines are dropped by means of quick-release hooks, fitted on all dolphins and under normal conditions 1 tug is used on the hook at the bow of the vessel in order to clear her off the berth. Usually the documents are signed before departure, unless the berth is needed for another ship.

BALLAST: A. Rules and Regulations. Vessels arriving at Kharg should maintain a reasonable draft fore and aft for safe manoeuvring and berthing. When conditions permit, the Berthing Master will advise the Master to commence discharging ballast. It is the Master's responsibility to see that dirty ballast, whatsoever, is not pumped or spilled overboard. Only clean ballast or bilge water may be discharged within 50 miles of the coast-line. In the event of contaminated ballast or bilge water, the vessel will be required to divert this material to a ship's slop tank. Otherwise, the vessel may be unberthed and returned to a point not less than 50 miles from the coast line to discharge contaminated ballast.

There are no ballast disposal facilities at Kharg Island.

Masters are requested to arrive at Kharg with clean tanks, pipe-lines, sea suctions, strainers and pumps. Ships will not be accepted for loading if evidence of any dirty ballast is observed.

Any vessel returned to a position at least 50 miles off-shore to discharge dirty ballast, or for any similar reason, automatically nullifies any "Notice of Readiness" already tendered and loses any priority held for loading. The vessel will be entered for loading at the time of second arrival when a new "Notice of Readiness" will be tendered.

B. Loading and Deballasting Simultaneously. Vessels are permitted to load cargo and discharge clean ballast at the same time provided all safety and other aspects are observed.

C. Tank Cleaning. Ship-tank cleaning will not be allowed at the pier. Ships will be allowed to draw sea water ballast while alongside.

LOADING: A. Ship's Gear. Although the jetty is equipped with a boom to handle loading hoses, ships are requested to rig jetty side boom in a proper and safe manner for possible use. Masters will be responsible for ensuring that the ships gear or fittings are in good working order and will not in any way interfere with or hamper the working of the facilities.

B. Inspection. After the vessel has been berthed and all formalities carried out the vessel will be boarded by the loading Master. A joint inspection will be made by an authorised ship's officer and the loading Master after the exchange of information and documents. If the ship's tanks, piping or equipment are in such condition that a potential hazard exists, the ships will be refused permission to load until such hazards are corrected. In any case, the Owners or Charterers of the ship will be notified of any delay or refusal to load because of hazardous conditions and any expense due to such delay or refusal to load will be borne by Owners.

If the ship does not arrive with tanks and/or piping sufficiently cooled to permit loading, the time required to cool down shall not be counted as lay time. Any expenses, including LPG furnished by company, demurrage, etc., involved with the cool-down period and operation shall be borne by the Owners or Charterers of the vessel.

Should the vessel arrive at the loading terminal with inert gas in its tanks, after purging from a previous cargo of ammonia or other gas to prevent contamination of shore lines and facilities, the inert gas should be vented if possible before ship is moored. If the ship's tanks to be loaded previously contained a product different from what is to be loaded, the Master shall verify that the tanks are clean and ready to receive Kharg Chemical cargo.

C. Loading Propane and/or Butane. 1. General Information. No loading will begin until the ship is safely moored with fibre mooring lines, gangway lowered and secured, the ship grounded and ground tested, ship's and shore emergency fire hose pressurised and ready for use, fire wire in place, and ship/shore communications tested and in good working order.

All loading personnel will wear fibreglass hard hats, leather-palmed gloves, cotton long-sleeved shirts, long cotton trousers, cotton socks, and sandals or shoes that do not have spark-generating material, such as steel nails, cleats, toe or heel plates. Non-sparking tools will be used in making hose and ground connections. Silk clothing or headgear will not be permitted due to its affinity for collecting static electricity. Ship's grounds will be tested for continuity to shore before product or vapours pass through hoses.

Since the LPG may not contain an odorant, particular care shall be taken that the atmosphere does not become explosive. If there is no air movement, explosimeter readings will be taken hourly, and if an explosive atmosphere exists, loading shall stop until conditions change. Prior to loading the main cargo a small quantity of propane and/or butane will be loaded or circulated initially for cooling down purposes. The amount set aside for cooling down will depend on whether the cool down is for the ship's lines or ship's tanks. Generally, the ship's lines will be cooled down before loading each parcel.

Although a small amount of refrigerated LPG is normally retained in the bottoms of the ship's cargo tank during the trip to Kharg Island, the tank vapour space and tank walls are warmer. For a period of about an hour while low temperature circulation of the shore lines continues, a small amount of propane may be taken by the ship from cargo holds and sprayed into ship's tanks. This method cools the upper parts of the ship's tanks and vapour spaces. If propane is taken from shore lines, this is replaced from shore tankage as the circulating pump suction is "floating" on the shore tank outlet line.

The enclosed spaces around ship cargo tanks and double bulkheads should be frequently monitored by ship's personnel for cargo leakage.

The measures for dealing with any leakage to prevent the temperature of the hull structure from falling below a safe level depends upon the ship's design. The Master shall have standing orders for dealing with any leakage observed on the ship and shall so inform the Loading Master.

2. Loading Master and Jetty Operator. Once the vessel has been berthed, berth will be manned at all times by an operator, who will be stationed in the immediate vicinity of the berth loading bay. All information and forms will be passed by the Loading Master prior to commencement of loading.

3. Alarms. All alarm systems on vessel and communications between the jetty and control room shall be checked before loading is begun. Masters are requested to make the Loading Master fully familiar with the vessel's alarm systems. Otherwise, confusion may occur between loading alarms and fire alarms.

4. Connecting Loading Hoses. The loading and vapour-return hoses will be well supported and laid along the pier. Each hose and hose valve will be supported by jacks on ship's deck. Hoses will be protected by rope mesh. Once the loading hoses are connected they will be adjusted during loading operations. The shore and ship personnel shall be careful not to kink, stretch or damage hoses. Hoses not used will be blanked. Hose flanges will be completely bolted and shrouded.

Size of Hoses; propane 8 in. (with 8 in. ASA 150 flanges); butane 8 in. (with 8 in. ASA 150 flanges); vapour 6 in. (6 in. ASA flanges).

5. Air. It is most important that no air is allowed to enter either the ship or shore loading lines. All hoses and spools must be purged free of air after being connected.

Provision is made on shore for purging air from LPG and vent hoses on completion of hose connection to ship and for purging LPG vapour from hoses before disconnecting when loading is finished. Provision is made to supply inert gas for this purpose. Provision is also made for disposal of remaining liquid in hoses safely and effectively from shore connection of hoses before disconnecting and gas purging of hoses when loading is finished. Valves and connections are provided for this purpose on the shore end. All ice must be removed from around hose insulating gasket prior to hose disconnection. Cargo hoses shall be blanked and be removed from ship. Ground wires will remain connected until ship's gangway is removed and ship is ready to depart.

6. Loading Pressure. Loading pressure should not exceed 50 p.s.i. at any time.

7. Ship's Compressor. During loading, the ship may pump vapours ashore via the ship's compressor. The Loading Master should be advised before the compressor is started or stopped.

8. Loading Rates. Maximum loading rates for LPG products are as follows:

Propane (2 lines)	10,900 barrels per hour
Butane (2 lines)	7,800 ,, ,, ,,
Propane (1 line, pumping)	7,000 ,, ,, ,,
Butane (1 line gravitating)	3,900 ,, ,, ,,

It is more important that the Loading Master be informed before any changes are made by the ship in the vapour compression operation. He then will inform the shore loading area. Starting and stopping compressors on the ship affect the shore tank pressures and can result in damage to tanks and pumps. Ship's valves should under no circumstances be partially or completely closed against LPG flow without first informing the Loading Master. Pumping rates will normally be adjusted from the shore loading area.

The ship's Master is responsible for his ship at all times. The Company Loading Master will advise the Master in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect their terminal's facilities or to prevent any hazards. Manipulation of ship's valves is the direct responsibility of ship's personnel.

LPG loading will be done on a 24 hours basis; hence the Master of the vessel, while alongside the LPG loading pier, will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading of LPG.

The ship's pipe-lines/vent system and/or liquification system shall be manifolded so that only those pipe-lines connected to the ship's tank being loaded will be open. All other pipe-lines' lines shall be closed and outlets blinded.

All doorways, vents, ports, air-conditioner intakes and other openings into which gaseous vapours could enter shall be closed.

During loading, there shall be no smoking, no open lights and no galley fire on the ship or in the vicinity of the pier.

Packaged goods, bunkers, water, freight and ship stores shall not be loaded or discharged during loading. Visitors will not be permitted on the ship during loading.

Loading of LPG shall be stopped whenever weather or sea conditions are hazardous to the ship, dolphins, LPG hose and manifold, adjacent vessels or personnel. The Senior Terminal Representative and authorised Ship's Officer shall jointly judge if such conditions exist. In case of dispute, the Senior Terminal Representative's judgement shall be followed.

During severe thunder storms, sand storms and electrical storms in the vicinity of the ship, loading shall cease until the storm subsides.

9. Strainer Boxes. It is important that no ice, pipe scale, etc., be allowed into the vessels' tanks. The ship should have strainers placed immediately upstream of the manifold valves. A careful watch must be kept on the pressure to prevent the strainers being blocked and periodically the strainers should be cleaned by using the built-in wiper, which should be turned clockwise only. In case of an absolute blockage loading will have to be suspended and the strainer cleaned, if necessary by removal. If one of the vessel's strainers is blocked, it may be possible to continue on the other hose.

10. Completion of Loading. A reduction in loading rate before topping of the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge. When the vessel asks for a slow rate, the loading pump will be shut-down and valves re-aligned for circulation. The vessel should then complete loading at its own controlled rate off the circulation flow. The terminal might ask for a suspension of loading while re-aligning the circulation pump. When required to stop completely, the Loading Master should be advised.

11. Hose Disconnection. When disconnecting hoses in order to change or clean a strainer at the time of completion of loading, the following points must be remembered:

(a) All ice must be removed from around the hose insulating gaskets prior to disconnecting.

(b) The hoses and hose valves must be secured to the vessel to avoid slipping or twisting. This is best done with rope and/or pulleys.

(c) The hose valves and ship's manifold valves must be shut.

(d) The vessel's vent valves must be open either to the atmosphere or to the vapour return hoses.

(e) The ship's strainer and all pipes and flanges between the hose and manifold valves must be de-iced.

(f) The hose can then be disconnected, but the ship's manifold valves, vapour return valves and hose valves must be shut.

D. Loading of Bulk Sulphur. All rules and regulations concerning LPG loading also apply to sulphur.

1. Inspection. The joint inspection of the ship and the ship's holds to be loaded with sulphur will be made by the Loading Master and authorised ship's officer. If the condition of the ship's holds presents a potential hazard to personnel, sea or shore facilities, the ship will be refused permission to load until conditions are corrected. The Master shall bear the responsibility for notifying the Owners or Charterers of the ship of any delay or refusal to load because of hazardous conditions and any expenses due to such delay or refusal to load shall be borne by them. The Company reserves the right to refuse loading and their decision is final.

If the ship's cargo holds are not clean or are so hot and/or contain residue (such as excessive rust, sand-scrap iron, minerals, or mineral dust) that alone or in combination with sulphur or sulphur dust would contaminate sulphur being loaded, oxidise with sulphur, or cause a fire or explosion of the sulphur cargo, permission to load sulphur will be withheld until this condition is corrected.

2. General Information. Bulk Sulphur is loaded at 500 t.p.h. via a conveyor. The conveyor extends from the shore storage area along the causeway, trestle and finally to the main dolphin close to the ship's holds.

No loading will begin until the ship is safely grounded, moored with fibre lines, fire hoses pressurised, ship-to-shore communications operable and the chute grounded.

In order to minimise movement of fine sulphur dust, cowl ventilators serving hold into which sulphur is being loaded shall be blanked off to prevent circulation of air. Package goods, bunkers, water, freight, ship stores shall not be loaded or discharged during or after sulphur loading.

When sulphur is loaded in a deep hold with general cargo in the tween deck hold above the sulphur, the ship's Master will be responsible for installing a dust proof wooden bulk head enclosure in the hatchways from the over deck of the lower hold to the weather deck forming a tight enclosure to prevent sulphur dust from entering the tween decks during loading. Ceilings shall be tight to prevent sulphur dust from entering bilges. Any chinking at tank tops or bilge will be of non-combustible material.

Masters to maintain sufficient personnel to adjust and maintain chute position, gangways and keep mooring lines taut as ship is loaded.

If sulphur is loaded into a hatch already containing sulphur, representative samples may be requested by the terminal to determine quality.

Since the sulphur loading facility at the pier is fixed the ship will be warped and moored so that various ships holds that will receive sulphur can be loaded.

After each warping the ship will be moored and grounded and chute grounded. The hold to be loaded will be checked with an explosimeter to be certain that the hold is not in the explosive range. Personnel entering cargo holds for inspection must be equipped with life-lines and belts with non-sparking hardware, goggles with green tinted lenses, and self-contained breathing apparatus with a mask covering eyes and nose. The life-lines shall be of sufficient length and strength that 1 line could be used to pull a man out of a hatch. For each man working in the hold 1 man on deck must attend his life-lines. Personnel in the hold must wear gauntlet gloves, high-top shoes, long cotton socks, a fibre glass hard hat with a cotton cap ear flaps covering the head and ears, pants fastened at the cuff and long-sleeve shirts buttoned at the neck and wrists. Silk clothing or headgear will not be permitted due to its affinity for collecting static. Cotton clothing material is preferred.

Only the hatch being loaded with sulphur will be open. All other ship hold hatches must be closed. All doorways, vents, ports, air scoops, air conditioner intakes and other openings into which sulphur dust could enter should be closed during loading. After loading and trimming a hold, the hold hatch cover shall be closed and the next hatch to receive sulphur will be opened. The pier sulphur loading tower can be raised and lowered as well as rotated in order that the cargo hold being loaded can be evenly trimmed with little or no manual trimming. Each time the tower is moved the chute shall be grounded. No hand cargo load trimming will be allowed while the pier loading sulphur tower is in operation. The tower down-spout drop distance will be adjusted to minimise sulphur dusting.

The loading-tower operator will be advised by authorised ship's personnel on the deck by use of agreed hand signals of any hazards such as deck cargo, life boats, aerial guy wires, etc., that can do damage to loading tower. Personnel will work upwind as much as possible to minimise sulphur dust inhalation or sulphur on skin. Eye baths and showers are located at the dock and will be ready for use if needed.

No loading will be done until all personnel are out of ship's cargo holds. The ship's authorised officer shall assign personnel to sweep sulphur dust into cargo holds to minimise pollution of the adjacent sea water. If shovels or scoops are used the shovels must be of a non-sparking material such as monel. Personnel working cargo holds or on deck shall not be permitted to wear shoes with steel nails, or metal heels or toe plates that could cause sparking.

Loading of sulphur will be stopped whenever weather or sea conditions are hazardous to the ship, pier, dolphins, sulphur loading tower, pier equipment, adjacent vessels or personnel.

Sulphur dust, like most poor electrical conductors rapidly acquires a static charge under dry atmospheric conditions. To minimise this hazard the loading tower is equipped with water spray nozzles to humidify the sulphur and reduce dusting. Conveyor hoppers are also equipped with sprays.

During severe weather conditions loading will cease and cargo hold hatches shall be closed until the storm or seas subside.

Sulphur loading will be done on a 24 hour basis. The Master of the vessel while alongside the sulphur loading pier will be responsible for the provision of adequate explosion proof lights, fittings and switches in all parts of the vessel where work is being carried out in any way connected with loading. The Master of the vessel will assign authorised ship's officers and men as deemed necessary for the safe loading of the ship and to adjust mooring lines and keep sulphur dusting to a minimum.

FUEL: Presently no bunker facilities are available at Khemco jetty.

WEATHER: A. Climate. The climate along the coast of Kharg Island is generally mild. The days in mid-Summer are extremely warm and humid with the temperature reaching 117°F. (47°C.) and a relative humidity ranging from 10% to 98%. The Winter months, from November to March, are pleasant with a minimum temperature of about 39°F. (4°C.). Freezing weather is uncommon.

B. Weather Data and Summary.

Average annual rainfall	8 in.
Mean maximum temperature	87°F.
Mean minimum temperature	66°F.
Extreme maximum temperature	117°F.
Extreme minimum temperature	39°F.
Average relative humidity	59%

C. Winds. Wind directions and velocity are subject to rapid change without warning and precautions are necessary to avoid difficulties. The heaviest seas and swells are from the N.E. through S.E. The prevailing wind for most of the year is from the N.W., but during the Winter period strong S.E. storms occur with very little warning. The Khemco jetty is sheltered from the N.W. winds.

D. Tides. The tidal range is between 7 ft. and 8 ft., with a maximum rate of about 1.5 knots. The tidal streams run approximately parallel to the line of the jetty, with occasional cross currents.

E. Sea Temperatures. The surface temperature of the sea ranges from 63°F. to 97°F., depending on the season.

SAFETY: Masters of vessels are responsible for the safety of their vessels including, but not limited to compliance with official precautions, and must take all necessary precautions while the vessels are alongside the Khemco jetty. While the vessels are alongside the jetty, all personnel must comply with all port's safety rules and regulations.

GENERAL: *(a)* Shore Leave. Shore leave at the terminal must be arranged between Master and ship's Agent. Sufficient personnel must be on board at all times for emergencies.

(b) Visitors. Due to hazards involved, no visitors are allowed while the vessel is alongside the Khemco jetty.

(c) Light Dues. A charge of half a Rial per g.r.t. is levied on each vessel for light dues by the Iranian Government. This is in addition to light dues for Middle East Navigation Service. The Company shall have no responsibility in respect of any taxes, dues, or other charges levied by the Iranian Government or any of its departments or agencies.

(d) Painting and Scaling. Painting, chipping, scaling and any repairs on deck or overside is strictly prohibited while vessel is alongside the Khemco jetty.

(e) Garbage. Dumping of garbage and refuse strictly prohibited in port area.

(f) Repairs. No workshops or other facilities for repairs at Kharg Island.

(g) Customs. There are Customs and other official offices on the Island. Vessel will normally be boarded by a Custom Director, Immigration Officer and Director of Ports and Shipping.

(h) Consulates. No consulates on Kharg Island. Nearest consulates or diplomatic representatives are at Khorramshahr.

(i) Marine Surveyor. No marine surveyor on the Island, but can be available at 48 hours' notice through ship's Agent.

(j) Recreation Centre closed.

(k) Supplies. Provisions can be supplied if sufficient notice given. No fresh water is available for delivery to the ships. No laundry services are available at Kharg Island.

(l) Mail. Regular plane services between Kharg Island and the mainland and mail receiving and dispatching can be arranged through ship's Agent.

SHIPMASTER'S REPORT: June 1979 (with further updates in March 1980).

Approaches: Generally not a great deal of traffic. The D/F at the airport is operational and useful. Decca Navigator Chain 5C. Ships anchor at S.E. and S.W. of island.

2 buoys at Southern end of island:

Red Pillar Buoy Gp. Fl. (2) 6 sec. (29° 11′ N., 50° 20′ 24″ E.);

Green Wreck Buoy, conical (29° 12′ 06″ N., 50° 19′ 39″ E.), marks position of tug.

Anchorage: The Eastern anchorage is very exposed to Southerly winds (use Western anchorage if waiting for a long time in Winter). At the present time there are many tankers waiting which means small tankers and LPG vessels either have to anchor themselves in amongst VLCC's or anchor well out – generally about 4 miles East of the "T" jetty (less shipping waiting in March 1980). This seems to be quite acceptable to the Authorities and is more satisfactory as far as engine maintenance and winds are concerned.

Berth: South of "T" jetty owned by Khemco – Kharg Chemical Co. Approximate max. size of vessel 250 m. long; water depth LW 13.6 m. and about 60,000 d.w.t.

Consists of jetty stretching over about 150 m. connected to shore by pier. On the jetty there is a manifold for flexible LPG lines, line derrick with powered winch, sulphur gantry and chute connected by conveyor belt to stockpile ashore.

On either side of jetty there are 2 dolphins with quick release mooring hooks. The jetty and near set of dolphins are faced by shock absorbing fenders.

March 1980: With strong Southerly winds the berth is a hazard. We experienced a force 6 S.E. wind one night which fetched the swell up and caused the vessel to work heavily on the jetty, one release hook gave way (the securing pin snapped), luckily it was on a dolphin that had a catwalk so we were able to change the moorings. As we were port side too facing North into the "T" jetty we had to sit tight and put out extra moorings.

Fenders were very good (about the best that I have seen with large timber faces)

Depth by lead line. After (Southerly dolphin with catwalk) 12 m. at LW, forward dolphin 13 m. at LW.

VHF: Call 'Ipac Marine' on Channel 16, works on Channel 6, only operates office hours and when berthing.

Vessel can call 'Kharg Pilots' 24 hours on Channel 16, working Channel 12, who will try to pass message for you. 'Kharg Pilots' have nothing to do with 'Khemco' jetty.

Pilots: 2 Iranian 'Ipac' Marine Pilots solely for 'Khemco' jetty. They board 2 to 3 miles East of "T" jetty from tug (will use hoist).

Berthing: Generally only in daylight. Will unberth at night. Max. berthing winds Northerly 45 knots, Southerly 10 knots. Visibility 0.5 miles.

We actually ended up with visibility at about 2 cables in a sand storm when approaching the berth. But as all the preparations had been made and little wind, continued on Radar with no problems.

Vessels berth either side alongside (head into tide).

Current: From readings taken off ships log which accurate, current speed corresponds to position "B" on "T" jetty, BA Chart 11.

Tugs: 2 used for berthing and 1 on departure. Tugs lines.

At present 2 hired from Bahrain, one of 3,000 h.p. and 1 of 1,000 h.p. The small one is very manoeuvrable but inadequate pushing, especially in a wind.

Lines: 3 headlines, 2 breast lines and 2 springs each end. 3 headlines to outer dolphins, 2 as breasts to inner dolphins, 2 as springs to jetty ends.

There are quick release hooks but they are jammed up. 1 line boat only who goes backwards and forwards both ends, try to send 3 lines together (Tie up is slow, about 2 to 3 hours).

An exact line up with ends of flexible pipes on jetty with ship's manifold is required because the flexible pipes are not very flexible.

Gangway: Cannot be turned out and landed and must be brought in until before and after connection/disconnection.

It has to be turned through 130° if it is aft facing, or use fixed length. If vessel port side to, it is much easier to use in the conventional fashion.

Manifold: Most particular that manifold is lined up with hoses on quay. Liquid: 2×8 in. 150 ASA. Vapour return: 2×6 in. 150 ASA. Ship's reducers, shore derrick, ship's chain blocks supporting hoses from manifold gantry. Shore personnel connect.

Cargo: Propane and butane only by gravity feed. Max. rate each product 300 t.p.h., generally around 150 t.p.h. when shore tank near the bottom there is insufficient pressure to even gravitate. Vapour return lines available for both.

Cargo Temperatures:

At manifold, Butane – 6°C (B.P. 0.2 bars)

At manifold, Propane – 42°C (B.P. 0.7 bars)

The shore have no thermometers on their lines. Pockets jammed with old probes, all measurement is on pressure.

On my visit to the plant I ascertained the propane to be −43°C and butane −5°C.

Vapour Return Line: 1 flare for each product about half way up jetty on spur jetty, which normally just alight, so when you open up they can immediately see. If used in moderation no difficulties encountered.

No charge directly, but it is the practice to measure shore and ship tanks and check the difference. On our visit this did not happen as shore tanks had not been taken on departure due to being virtually empty.

At the start the vapour return lines were closed so the valve had to be sought.

Loading Master: There is always one on the jetty, tries to be helpful and speaks reasonable English. Best to telephone 441, 442, Mr. Shafiee or Mr. Ayzak who are the managers – very helpful, or telephone Control Room 412 for shift supervisor who will give you tank tonnages in barrels.

Stopping Propane: 1 hour's notice required to ready the pump for stopping and 5 minutes before completion. When you tell them to stop a little more liquid will run down the line by gravity. It was not possible to top off by gravity alone as by this time the shore tanks were very low.

Stopping butane was no problem as they ran out and we were at the end taking it as they were making it until that process came to a halt.

Specific Gravity: Propane: 0.505 60/60.
Butane: 0.574 60/60.

Surveyor: No outside surveyors. Plant chemist does the survey, agrees with Chief Officer. Ship figure on Bill of Lading.

Draft Reading: Difficult to read after draft, best to use binoculars and Aldis Lamp at night.

Tanks on Arrival: Up to Master whether the ship is capable of loading. If loading propane into butane atmosphere or I.G. or vice versa, Khemco require statement to this effect from Master.

The line is normally circulated for 8 to 12 hours before arrival by a small quantity of liquid being bled through to the VRL. Nevertheless, the first "Slug" is warm due to exposed quay section of line.

The lines (flexible) to ship are purged with Nitrogen after connection by a bleed in at the manifold connection. Nitrogen bottles on jetty.

Documentation:

8 Copies Crew Lists.
2 Copies Vaccination List.
1 Copy Stores List.
2 Copies Crew Declaration.
2 Copies Maritime Declaration of Health.

The Agent, Port Authority Representative, Port Health and Customs board arrival berth. Numerous forms have to be completed. Arrival formalities take 45 minutes Clearance is given to Master on arrival.

On departure the 'Khemco' shift manager comes down with all the cargo papers – Manifest, Bill of Lading, Spec., etc., and signed onboard.

We finished cargo at 0900 hrs., and papers came aboard at 1145 hrs. This is normal.

The Agent is always on about E.D.P., it is not the practice on this berth and in any case for the sake of a few hours its best to have all the papers correct and note protest if necessary.

Pratique: Granted at berth.

Notice of Readiness: Generally will only be accepted when first line ashore (not at anchorage).

Note of Protest to be given with all force and Khemco may back down and accept on anchoring if port is not closed due to wind.

Communications: Cable "Chem Kharg" Tehran. Telex 2402 Kemco TN.

All telexes have to be routed via Tehran for international acceptance.

Telephone poor, can hardly get through to mainland.

It became necessary for me to telephone UK so managed at night to get through to 'Kuwait Maritime' about 120 miles away. 24 hour watch not restricted as ALRS. Call Channel 16, generally works Channel 26. After contact vessel can wait about 30 minutes on Channel 16 before operator calls back. Channel 26 very clear.

March 1980. Not possible to contact 'Kuwait Maritime' in Winter months. It is possible to telephone UK from Kharg and from the jetty. A long wait is usual from the jetty and the line very weak, but it can be done with perseverance.

A better method is to get the Plant Manager to take you to the Central Exchange in the township and UK can be contacted via STD, it took about 40 minutes of constantly ringing to get connected and then you run the risk of disconnection, but again communication is possible and reasonably clear.

Telex via the Agent takes about 26 hours to get a reply due having to be telephoned through to Khorramshahr and then telexed to London via Tehran and vice versa.

Alcohol: We arrived with everything sealed. The Customs allowed us to have 6 cans of beer per man per day, no spirits (it depends on the Customs and Master).

Do not drink outside or give Iranians alcohol, the punishment is severe.

Radio Room: The Port Authority wanted to seal this but persuaded them to seal the antenna switchboard only (with chart paper and glue).

Fresh Water: Fresh water main runs to ship's side with meter. We obtained about 40 tonnes. Water is distilled and slightly brown.

Plant: At present about 300 tonnes per day of butane and 500 tonnes per day of propane are being produced which is about 60% of capacity.

Sulphur production is just resuming and is normally about 200 tonnes per day.

Feedstock is taken from IPAC (Iran Pan American Oil Co.) which is, or used to be, 50% AMOCO owned.

Feedstock is in the form of third stage refined well gas taken from 3 local wells, 2 on the island and the Darius field on the S.W. coast. Most of the 'Sour Crude Gas' is extracted before acceptance, what's left is used for making sulphur.

The plant is completely self contained apart from initial feedstock and covers about 1 sq. mile. It is fully automated and staffed by six operators on a shift system.

The gas which comes in H.P. and L.P. form depending on the wells, is fed through in 2 streams which are crossed to accept different Hydrocarbons thereby achieving a no waste system.

The gas is fed through Glycol towers for water absorbtion then heat exchangers to separate the different molecules.

After basic separation vertical separators are employed to further refine the product. This is then led to 3 stage compressors for re-liquefaction then to chillers.

After processing the liquid is fed to receiving tanks for settling purposes then to 2 large atmospheric holding tanks.

The tanks are heavily lagged with bitumen glass wool compound and any boil off being re-liquefied.

The approximate amounts capable of being stored are 120,000 bbls. butane (11,000 tonnes), and 250,000 bbls. propane (20,000 tonnes) which under the original Japanese shipment meant about one 30,000 tonne shipment per month.

Power requirements for the electric motor drives are provided by two 4 MegaWatt Mitsubishi compound turbo generators, 1 being on auto stand by at any one time, supplied with steam from the 2 boilers that also produce sulphur.

Cooling water for the various systems is provided by salt and fresh depending on the plant. Salt by two 3,000 M3 electric pumps situated about two thirds the way down the jetty, these are backed up by a diesel driven auto start pump.

Fresh water is distilled at the rate of 700 tonnes per day by a steam separator and stored in two 1,000 tonne tanks.

A new Glycol plant was commissioned in March 1978 and a new distillation plant supplied last year but not erected. At present it is in polythene sheeting awaiting engineers.

Generally the plant is in a good state of repair and all instruments seemed to be working in the very comprehensive control room. The staff were most helpful but a camera was not allowed.

A product specification can be obtained. One is always given on completion, but with a lot of pressing can be obtained about 12 hours after commencement of loading.

Sulphur loading is slow and by a conveyor belt to a directional chute. The ship has to shift to load individual holds.

Kharg Crew Facilities:

Films: No Walport exchange.

Travel: The Agent said in emergency it could be possible for repatriation to be arranged.

Iran Air have restarted their 737 flights to Abadan, Bushire and Tehran once a day in each direction. Leaves for Abadan about 1000 hrs.

Khemco/IPAC have a flight from Tehran twice a week for their own personnel by Fokker Friendship. I was told it would be possible to get a seat or two on this on a one-off basis, arrangements would have to be made direct to these 2 companies in Tehran.

General (March 1980): Approximately 2 million barrels crude oil per day being exported. About 2 to 3, at maximum, tankers using the "T" jetty at any one time. About 2 tankers per week using the Western Sea Island.

The airport is functioning with regular 737 flights to Abadan, Bushire and Tehran.

The Cyrus field about 40 miles W.S.W. of Kharg has ceased production and the Darius terminal has about 1 ship per month.

The Khemco berth handles 1 sulphur ship per month mainly for African countries and 1 LPG ship every 6 weeks for Japan.

AGENT: See "Abadan".

KHORRAMSHAHR: 30.26 N. 48.10 E.

Khorramshahr lies at confluence of Karoon and Shatt-al-Arab Rivers and is principal commercial port of Iran. Khorramshahr is terminus for Iranian Railway system and regular train service to rest of country is available. Good asphalt road connecting Khorramshahr to other major cities in country.

DOCUMENTS:

(a) Iraqi Quarantine Officer: Vessels arriving Outer Bar (Shatt-al-Arab Pilot Station) will be boarded by Iraqi Quarantine Officer who will check all crew vaccination cards. Masters requested notify Fao Quarantine Office at least 18 hours' prior vessel's arrival Outer Bar giving exact arrival time Outer Bar enabling Quarantine personnel board vessel immediately. Upon arrival Outer Bar, Master should have ready a copy of Crew List and crew vaccination certificates for presentation to Quarantine Officer.

(b) Iranian Quarantine Officer: Upon arrival Khorramshahr anchorage and prior berthing, the Iranian Quarantine Officer will board vessel. He requires 1 copy Crew List, and all vaccination cards should be available for inspection.

(c) Customs Officer: Customs Officer boards ship at anchorage or alongside Khorramshahr Jetty (in case of immediate berthing) and requires following documents:

Crew List (2 copies).
Stores List (2 copies).

(d) Port Authorities:

Crew List plus (1 copy).

Arrival information form of the port Administration will be supplied to the Master in duplicate upon arrival, by a port representative. This form should be filled in and returned to the port Berthing Master.

(e) Agents:

Crew List (2 copies, for arranging shore passes).

Order avoid any delay in entering and discharging, the following documents must be sent by all loading port Agents to Khorramshahr Agents as far in advance of vessel's arrival as possible:

Cargo Manifest (6 copies).
Freight Manifest (2 copies).
B/L Copies (2 copies each).

All cargo shown on manifest must be landed at the port, and it is therefore essential that short-shipments, cancellations, diversions, etc. (if any) be reported early as possible and manifest should be corrected before submission to Port Authorities to avoid payment of fines. Stowage plans and hatch Lists should also be sent ahead, giving ample time to be studied by Cargo Supervisor for unloading arrangements.

PILOTAGE: With exception of ships of Government of Iran or Iraq and sailing craft, pilotage compulsory for all vessels entering, leaving or navigating in the Shatt-al-Arab. Pilotage in river outside harbour limits of Khorramshahr conducted by River Pilot; within limits of Port by Harbour Master.

Vessels entering Shatt-al-Arab boarded by River Pilot from pilot vessel situated in proximity of Rooka Buoy (Lat. 29° 49′ N., Long. 48° 47′ E.), showing a white flash every 6 seconds and equipped with Radar Reflector.

Vessels bound for Khorramshahr are conducted by River Pilot as far as Khorramshahr Anchorage, from where a Harbour Master (Iranian) will board vessel and berth her as necessary.

Pilotage, dredging and other navigational dues are collected by Basrah Port Authorities and must be settled directly with Iraqi Maritime Transport Co. Ltd., Basrah, Iraq.

N.B. Owners having vessels bound for Khorramshahr or Abadan should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir", Basrah, about arranging of Shatt-al-Arab pilotage. Owners should also put Messrs. Iraqi Maritime Transport Co. Ltd. in funds by remittance well in time before vessel reaches the Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues for sailing from Outer Bar to Abadan or Khorramshahr and return.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. in fresh water.

Bawarda Anchorage, position about 2 miles above Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 20 miles above Abadan and 15 miles below Khorramshahr with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 16 miles above Hartha Point and about 14 miles below Basrah (Khora Anchorage) with a max. depth of 29 ft. in fresh water.

MAX. SIZE: Maximum permissible length for vessels calling Khorramshahr is 525 ft. Max. draft for crossing Karun Bar and also at Khorramshahr (Failieth) Anchorage is 28 ft. 6 in., fresh water. Max. draft at Karun Bar in December 1976 was 26 ft. so it is advisable to check before vessel proceeds to the port. The depth alongside Berth Nos. 1 to 3 is 27 ft., Berth Nos. 4 to 7 is 26 ft., and Berth Nos. 8 and 9 is 29 ft.

SPEED RESTRICTIONS: Engine speed must be reduced well in advance so that the vessel's speed when passing jetties at Khorramshahr and Abadan will not exceed 3.5 knots for vessels with more than 20 ft. draft, and 5 knots for all other vessels of over 100 g.r.t.

The same speed restrictions will apply in the Shatt-al-Arab when passing ships at anchor with barges or other vessels moored alongside, tugs with barges or other vessels in tow, and vessels engaged in dredging or other salvage work.

SHIP'S REGISTRATION: Ships have to register upon arrival at outer bar by sending telegram to Port Director Khorramshahr via EQK Khorramshahr Port Radio. At present the vessel, after registering her turn should wait at outer bar. If vessel proceeds to another port for discharging, her registration will not be valid. Vessel after registration of berthing turn for Khorramshahr can however call at Abadan Port during waiting period without losing her turn subject to permission from Harbour Master.

For registration Masters must answer a 14 point registration cable and also advise anchoring time (GMT).

HEALTH: See "Documents". Inward clearance is effected on board after receiving Free Pratique.

RADIO: Khorramshahr Port Radio, call sign EQK, 500 kHz, 2182 MHz.

Khorramshahr Harbour Master can be contacted on VHF Channels 13 and 16, 18 and 25.

Vessels destined for Khorramshahr should send a radio message to the Port Director Khorramshahr and to the ship's Agent 24 hours prior arrival at the Shatt-al-Arab Pilot Station (Outer Bar). Times should be quoted in GMT. Also see "Ship's Registration".

TUGS: The Port Organisation of Khorramshahr owns 2 tug-boats which are used for assisting berthing and unberthing whenever necessary. No tug boats which could be used for long-distance towage. Employment tug-boats is not compulsory.

BERTHING: See "Ship's Registration". Berthing and unberthing performed by Iranian Harbour Masters supplied by Iranian Port Administration, Khorramshahr. Berthing turn, allocation of berth and anchorage space is under the control of Iranian Port Administration, Khorramshahr.

The Port consists of 3,199 ft. long jetty constructed with wooden piles (Berths 1 to 7) plus the new extension covering 1,000 ft., built by steel/concrete piles (Berths 8 and 9) running parallel with river bank. Jetty can receive 9 ocean-going vessels at a time.

CARGO HANDLING: *(a) Jetty.* All cargo handling/operations on shore, under control of Khorramshahr Port Administration. General cargo discharged from ships alongside jetty is received on domestic railway wagons and trailers controlled by Port Administration, and transported to Port Warehouses or open yards. Port Warehouse/Store keepers will later deliver cargo to consignees against clearance papers issued by Customs. There are shore cranes and floating cranes available for the purpose of discharging cargo as follows: 2 floating cranes (50 ton and 100 ton); 2 mobile cranes (80 ton); 3 mobile cranes (50 ton); also additional mobile cranes of 25 tons capacity or less.

The port yard is equipped with 3 cranes (90 ton, 50 ton and 40 ton). All cargo must be discharged by ship's own gear, and vessels calling at Khorramshahr should not accept cargo beyond their gear capacity to discharge.

(b) Barges. (i) General Cargo: Vessels carrying less than 500 tons cargo are permitted to discharge their cargo into barges, in which case all extra expenses and costs of barging, discharging ex barges, etc., are to be borne by the carriers and such operation is entirely at the risk and responsibility of the respective carrier.

(ii) Structural Iron/Steel: Structural iron/steel is always to be discharged in barges for unloading at Failieh Creek. Barges must be arranged by vessel's Agents, who also have to arrange labour for discharging the cargo ex barge at Failieh, sorting of the iron, and delivery to consignees. Agents should also employ watchmen for protecting the cargo while awaiting delivery to consignees, also tally clerk for supervising sorting and delivery of iron to the respective consignees.

(c) Cranes. For use in loading/unloading cargo *in the storage areas,* cranes are all used in the port yard *for unloading cargo ex rail wagons* and loading on to merchants' trucks.

There is 1 electric crane permanently installed at Failieh Creek with lifting capacity said to be 100/120 tons. This crane can be used for discharging cargo from barges at Failieh barge jetty.

(d) Storage. 19 warehouses (goods sheds), plus an open yard between the warehouses used for storing iron goods, as well as cargoes which can be stored in the open.

(e) Wagons/Trailers. For receiving cargo ex-vessels alongside jetty the Authorities have 160 rail wagons and 77 trailers with average capacity of 10 tons, but number of wagons/trailers provided to each vessel not sufficient to last 24 hours work at jetty. Although 24 hours working alongside jetty is compulsory, due to shortage of wagons hardly 12/18 hours work can be accomplished efficiently. A stand-by of 6/7 hours in Summer and of 9/11 hours in Winter is unavoidable.

(f) Delivery of cargo discharged at jetty. Port Authorities considered as direct receivers of the cargo discharged, who in turn deliver same to ultimate consignees against presentation of the carrier's Agents' Delivery Order.

Carrier's responsibility for cargoes discharged in good condition cease under tackle; slings are opened by labourers provided on wagons alongside each vessel. Broken packages are not permitted (by Customs) to be discharged on the wagons, and are therefore collected on board. Once daily, under full control of ship's officer, port supervisor and carrier's supervisor, the broken packages are delivered to Port Authorities and an official Process-verbal will be drawn by respective warehouse-keeper corresponding to remarks noted at the time. This arrangement is to prevent any delay to operations of the vessel.

(g) Overtime Costs. Wages of port staff on board for official hours are borne by port Authorities but overtime and food allowance are paid by carriers.

(h) Port Working Hours. Dayshift: 0700 – 1300 hrs. and 1500 – 2100 hrs. There is no night shift.

24 hour discharging at jetty is compulsory. The only stoppages are for lunch and dinner, 1 hour each. In Summer season, however, due to heat, discharging at jetty is stopped from 1400 hrs. to 1700 hrs.

(i) Liquid Cargo. Due to non availability of tank barges as well as storage area at Bandar Imam Khomeini, vessels carrying liquid cargo are bound to call at Khorramshahr, where consignees have their own tank-barges and storage tanks. This being the case, the Port Authorities do not divert vessels carrying liquid cargo, to Bandar Imam Khomeini.

In the port of Khorramshahr, importers of vegetable oil and other liquid commodities, have arranged their own storage area outside Customs yard, and liquid consignments will be received directly ex-vessel into consignees' barges without any expenses to carrier. (Discharging performed at anchorage.)

Vessels carrying part-liquid cargo can discharge their cargo while awaiting a berth or alongside jetty, whilst unloading other cargo on the pier.

Further to above, whenever Port Authorities divert any vessel to Bandar Imam Khomeini, in the diversion order they indicate "Subject no liquid cargo on board", as vessels with liquid cargo will have to be accepted in the port of Khorramshahr.

Notice of Readiness for vessels carrying liquid cargo, has to be tendered after vessel has anchored at Khorramshahr anchorage (within Khorramshahr port limits). If, due to congestion, there is no space at Khorramshahr anchorage, vessels may have to remain at Shatt-al-Arab Pilot station for 1 or 2 days before entering the river.

(j) *Dangerous Cargo.* Dangerous cargoes are divided in two categories:

1. Acid and flammable cargoes.
2. Explosives such as dynamite, etc.

Vessels carrying acid and flammable cargoes are accepted alongside Khorramshahr berths to unload their general cargo plus dangerous cargo, and Port Authorities unload the dangerous cargo in a yard at Failieh, which yard is mainly used for storing iron joists, but a part is allocated for dangerous cargo.

Vessels carrying explosives are not allowed to berth at Khorramshahr. Recently the Port Authorities have stopped accepting any vessel with explosive cargo on board into the port of Khorramshahr, and those vessels have to proceed directly to Bandar Imam Khomeini before calling Khorramshahr for discharging general cargo, if any. The main port for discharging explosive and special cargoes consigned to Iranian Army is Bandar Imam Khomeini, where the Army have an agreement with the Port Authorities for 1 berth out of the 6 berths. Berth No. 3 is allocated for vessels carrying cargo consigned to Iranian Army, and whenever such vessel arrives at Bandar Imam Khomeini it will be berthed immediately, even if the port is congested; in other words, vessels with Army cargo have priority for berthing.

FREIGHT TAX: Freight tax is payable on any freight earned in Iran for any export cargo loaded at any Iranian port. Per article 90 of Tax Law, freight tax is payable at the rate of 5 per cent on gross freight, regardless of whether freight is collected in Iran or elsewhere. There is no tax on import cargo freight regardless of where the freight is paid. In other words, for cargo discharged in Iranian ports, even if freight is payable at destination to be collected in Iran, there is no tax applicable.

MEDICAL: Private doctors and hospitals located in the town for medical and dental treatment and hospitalisation. Arrangements for patients' visits to the doctors, dentists and hospital will be made by Agents upon request. In case of emergency special medical attendance on board can also be arranged. X-Rays, radiographies, blood and urine tests can also be conducted by equipped hospitals existing in Khorramshahr and Abadan.

DENSITY: Fresh.

FRESH WATER: Fresh water supply alongside berth available by pipelines and at anchorage by barges, capacity 100 tons.

FUEL: Bunkers are not available at Khorramshahr Jetty, however, bunkers (diesel oil and gas oil) can be supplied by barge. All classes of bunkers are supplied at Abadan jetties only. Bunkers could be obtained from Abadan provided arrangement for supply has been made beforehand with NIOC.

AIRPORT: Abadan International Airport about 10 minutes by car.

TIME: GMT plus 3.5 hours.

CUSTOMS ALLOWANCES: After receipt of documents, the Customs Officer will seal the store room. All liquor and cigarette stocks will be sealed and reasonable ship's requirements while in port should be taken from store before sealing. This amount recommended to be assessed and be ready for removal from the stores prior to the vessel's arrival in port. During the stay at the port, and upon request and giving prior notice to the Agents' supervisor on board, arrangements may be made to have the Customs officials open the stores to issue further quantities of stores for crew consumption.

IDENTIFICATION CARDS: According to regulations in force seamen should hold shore pass issued by respective Agents and signed by the Port Health, Port Police and local town Police Authorities. All shore passes should bear a photo of the holder, in order to facilitate checking at exit of port area. It is therefore necessary for officers and crew to have a photograph ready on arrival at the port to facilitate obtaining shore passes.

All officers and crew of ships lying at jetties or anchorage of the Port of Khorramshahr to carry their Seamen's Books with them when going ashore. At the gate, the Seamen's Books will be checked by the Police against the shore pass of each crew member, the Seamen's Book will then be kept by the Police and will be returned to the holder when returning through the gate.

REPAIRS: Minor repairs can be carried out to a limited extent by private workshops existing at Khorramshahr. However due to lack of skilled workers the workshops in question do not undertake any responsibility or guarantee for the jobs performed, and charges are high.

For radar, wireless, echo-sounders, etc. as well as refrigerator and air condition service there are a few engineering groups at Khorramshahr as well as Abadan, and technicians of these groups will attend to the repairs on board both at Khorramshahr and Abadan jetties or at anchorage, upon request.

Ships moored to the jetty are not permitted to disable main power-plants for repairs without prior approval of Marine Department. A port tug will be assigned to stand by alongside ship with tow line attached during entire period while plant is disabled.

DRY DOCKS: None.

SURVEYORS: Lloyd's Register; Det Norske Veritas; Bureau Veritas American Bureau of Shipping; Surveyors for ordinary damage to cargo and/or ship as well as for on-hire/off-hire survey can be arranged by Agents.

TELEPHONES: May be placed on board.

SHORE LEAVE: See "Identification Cards".

DELAYS: The port of Khorramshahr is generally congested, with a waiting time of about 2/5 days. Port Administration sometimes orders vessels to discharge their Khorramshahr manifested cargo in Bandar Imam Khomeini to ease the congestion at Khorramshahr.

PROVISIONS: Fresh provisions in limited quantity can be obtained but large quantities of provisions sometimes may not be possible to arrange due to the fact that the Municipality is controlling the market and sometimes may prohibit the supply of the items which are in short supply. Due to certain formalities involved in supplying provisions to vessels, it is requested that 24 hour notice be given to the shipchandler.

STORES: Local commodities only available. Bonded stores not available.

LAUNDRY: Laundryman can be arranged upon request.

DEVELOPMENTS: As additions to the old 9 jetties, 4 new jetties are in operation with drafts of 26 ft. – 28 ft. suitable for vessels of up to 10,000 d.w.t. Length of jetties will be 720 m., and construction will include sheds of 20,000 sq.m. and an open area of 31,500 sq.m.

In the Failieh Canal, where steel cargo is discharged from barges, the existing jetty has been extended 500 m. This jetty can accommodate 15 barges, and has an open area of 15,000 sq.m. Construction of the extension has been completed, and dredging is taking place to increase the depth available to the barges.

AUTHORITY: Ports and Shipping Organisation. Tehran.

LAVAN ISLAND: 26.47 N. 53.20 E. (See Plan)

LOCATION: Lavan Island is 13 miles long and about 2.5 miles wide. It is situated on the S.E. coastline of Iran in Lat. 26° 48′ N., Long. 53° 16′ E. (Island centre). The Island lies roughly East – West.

PORT LIMITS: Port area limits which are under the control of IOOC, extend between the following points:

Lat. 26° 47.5′ N.,	Long. 53° 22.0′ E.
Lat. 26° 46.4′ N.,	Long. 53° 22.0′ E.
Lat. 26° 47.5′ N.,	Long. 53° 19.4′ E.
Lat. 26° 46.8′ N.,	Long. 53° 19.4′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

DOCUMENTS:

5 Crew and Passenger Lists.
2 Stores Lists.
2 Bonded Stores Lists.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

In Iran, an additional copy of the Bill of Lading is required for all exports from the country. This must be signed by the Master and forwarded to the Customs Authorities, Lavan Island by the ship's Agent.

EARLY SAILING PROCEDURE:

Notice to Masters – Early Sailing Procedure:

In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing System is now in force.

The following documents are prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature upon the ship's arrival at the loading dock.

(A) Nos...... Originals & Nos...... Copies IOOC Bill of Lading.

(B) Nos...... Originals & Nos...... Copies IOOC Certificate of Origin and Cargo Manifest.

(C) Nos...... Originals & Nos...... Copies IOOC Tanker Time and Loading Report.

(D) Nos...... Originals & Nos...... Copies IOOC Report of Cargo and Ship's Ullages.

(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the 'Bill of Lading' and 'Certificate of Origin' forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In cases of disagreement on cargo figures, the Master may,

(1) 'Note Protest' by cable or telex.
(2) Authorise the ship's Agent to 'Note Protest' on his behalf.
(3) Pass a written 'Note of Protest' to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

APPROACHES: Vessels approaching Lavan Island from due South will have a clear approach.

(a) Landfall. There are 5 gas flare towers and 1 ground flare. The most conspicuous flare is in position Lat. 26° 47′ 34″ N., Long. 53° 20′ 39″ E. situated in the vicinity of Port Area. This flare onshore, when burning, makes a conspicuous landfall for Lavan Island, but at night from a distance tends to obliterate the various navigational lights.

The other flares are in position,

Lat. 26° 47′ 41″ N.,	Long. 53° 20′ 19″ E.
Lat. 26° 48′ 25″ N.,	Long. 53° 20′ 03″ E.

(group of 3 flares).

All tanks in the IOOC Tank Farm are painted white. The two front tanks have the word IOOC painted in black on the South side. Tank No. 2 is in position Lat. 26° 47′ 57″ N., Long. 53° 20′ 24″ E. A 1,000,000 bbls. tank has recently been constructed and added to the Tank Farm capacity. It is sited at the rear of the former 6×500,000 bbls. tanks.

(b) Navigational Dangers. South side of Island is open and free from dangers, but care should be exercised approaching from seaward as soundings shallow rapidly near coast with depths of 200 ft. only 4,500 ft. off shore.

(c) Charts covering the operational areas of IOOC are:

USHO 3647, 3648, 3650, 3660.
BA 2837, 2847, 2858, 2887, 2888, 3517, 3707.

PILOTAGE/NOTICE OF READINESS: Vessels must not enter the Port Limits without a Berthing Master on board.

Vessels should wait for the Berthing Master South of the Terminal Buoy, approximately 2 miles S.E. of the loading dock.

The Terminal operates a pilot launch and mooring launch for rope handling.

Pilot Room to be available and ready for the Loading Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.

(b) IOOC "Notice of Readiness" form.

(c) Combined Tug, Pilot, Berthing/Unberthing charge form.

(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affects cargo-worthiness or seaworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the IOOC Marine Superintendent will be final.

NAVIGATIONAL AIDS: *Warning:* The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Lavan Island Terminal Beacon: Located in Lat. 26° 48.1′ N., Long. 53° 21.3′ E. Fitted on top of a steel lattice tower 182 ft. above MLWIS. Light exhibited is Gp.Fl. (3) ev. 12 sec. vis. 15 miles.

Terminal Sea Buoy: Located in Lat. 26° 46.5′ N., Long. 53° 22.1′ E. A white can buoy with lattice tower and radar reflector. Light exhibited is Fl. ev. 5 sec. vis. 3 miles.

Salman Pipe-line Marker Buoy: Located in Lat. 26° 46.8′ N., Long. 53° 20.5′ E. A red can buoy with lattice tower and radar reflector. Light exhibited is Fl.R. ev. sec. vis. 3 miles.

Salman Pipe-line Rear Beacon (Onshore): Located in Lat. 26° 48.0′ N., Long. 53° 20.2′ E. Fitted on top of a steel lattice tower 192 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

Salman Pipe-line Front Beacon (Onshore): Located in Lat. 26° 47.6′ N., Long. 53° 20.1′ E. Fitted on top of a steel lattice tower 115 ft. above MLWIS. Light exhibited is Fl.R. 10° vector, centred over the oil pipe-line, vis. 12 miles.

The Salman Pipe-line lights in transit signify a vessel is over the Salman pipe-line. Anchorage is prohibited within the area covered by the vector outline of the range lights, 10° apart.

Rostam Radio Mast: Located in Lat. 26° 48.2′ N., Long. 53° 19.2′ E. A steel lattice tower, painted red, 408 ft. above MLWIS. Light exhibited is Occ. R. ev. sec. visible 20 miles.

Decca Mast – Station "Green South": Located in Lat. 26° 47.5′ N., Long. 53° 22.4′ E. A steel lattice tower, painted red and white bands, 336 ft. above MLWIS. Light exhibited is Fl.R. vis. 20 miles.

Flares: The following flares are highly conspicuous and tend to obstruct the other navigational aids:

Salman – Located in Lat. 26° 47.6′ N., Long. 53° 20.6′ E.
Rostam – Located in Lat. 26° 48.4′ N., Long. 53° 20.0′ E.
LDC – Located in Lat. 26° 47.7′ N., Long. 53° 21.0′ E.

Radio Beacons: The following radio beacons belonging to IOOC are situated onshore and offshore at the Company's Salman Oil Field:

Signal LD transmitted on 310 kHz. Located in Lat. 26° 47.6′ N., Long. 53° 23.0′ E.

Signal LA transmitted on 397 kHz. Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

ANCHORAGES: Vessels must not enter port limits (which enclose a Prohibited Anchorage Area and Manoeuvring Area). They should proceed to vicinity of suggested Anchorage Area East of Oil Loading Dock and East of Long. 53° 22′ 00″ E., and in suitable depths of water wait for IOOC Berthing Master. The sea bottom is good holding ground. Depth about 40 m.

RESTRICTED AREAS: Salman's Production Facility (Offshore):

Located in Lat. 25° 32.2′ N., Long. 53° 09.0′ E.

The above platform complex, approximately 76 nautical miles South of Lavan Island, is situated in the centre of the Salman Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil is delivered to Lavan Island from offshore oil fields by submarine pipe-line.

From the Salman production complex in Lat. 25° 32.0′ N., Long. 53° 09.1′ E. A 22 in. pipe-line running approximately 008° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.1′ E. From the Rostam production complex in Lat. 25° 45.5′ N., Long. 52° 54.5′ E. An 18 in. pipe-line running approximately 023° T to a shore location on Lavan Island at Lat. 26° 47.5′ N., Long. 53° 20.0′ E.

In addition to the above, a 14 in. submarine pipe-line has been laid from the Balal Oil Field (undeveloped) to Lavan Island. The pipe-line runs approximately 056° T from an offshore location in Lat. 26° 18.8′ N., Long. 52° 32.8′ E., to a shore location on Lavan Island at Lat. 26° 47.6′ N., Long. 53° 19.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

MAX. SIZE: Water depths, adjacent to the dock, at LW are:

Berth No. 1: 68 ft. 4 in. (20.83 m.)
Berth No. 2: 65 ft. 0 in. (19.82 m.)

Keel clearance required by the Terminal is 3 ft. 0 in. at all times.

Tonnage capacity of the loading dock is:

Berth No. 1: 200,000 d.w.t.*
Berth No. 2: 75,000 d.w.t.**

*Vessels in the range 200,000 d.w.t. – 225,000 d.w.t. may be accepted subject to prior approval from IOOC Management which is based on answers to a 14 point questionnaire.

**Vessels are accepted for Berth No. 2 based on tonnage, overall length (maximum 850 ft. = 259 m.), position of the manifold in relation to the bow, and always subject to a maximum loaded draft of 43 ft. 6 in. (13.26 m.). Vessels over 65,000 d.w.t. should always be cleared by IOOC prior to firming up a nomination.

Following is a table of maximum loads that different size tankers can have on board on arrival, and remain acceptable for berthing:

(a) The maximum size vessel that is acceptable for berthing in a fully loaded condition is 100,000 d.w.t. This refers to vessels nominated for bunkers only.

(b) The maximum acceptable arrival load for tankers in the range 101,000 d.w.t. – 120,000 d.w.t. is 90,000 tons (675MB±).

(c) The maximum acceptable arrival load for tankers in the range 121,000 d.w.t. – 170,000 d.w.t. is 85,000 tons (638MB±).

(d) The maximum acceptable arrival load for tankers in the range 171,000 d.w.t. – 225,000 d.w.t. is 70,000 tons.

This schedule to be used in conjunction with the standard 14 point questionnaire for very large crude carriers.

CLEARANCE: *(Arrival)*: After Berthing Master has boarded vessel at Port Limits, and before vessel allowed proceed, Master will be required to sign following forms. *(a)* Condition of use of Port of Lavan Island, *(b)* Tug Requisition.

Master will also be provided with copies of Fire and Safety Regulations and a Safety Inspection form. After Pratique granted, Customs inspection carried out. Master will be required to furnish particulars of vessel including bonded stores, cargo, bunkers, and other information. 5 copies of the crew list and stores remaining on board will be required before clearance is granted. *Customs surveillance is strict.*

The Terminal operates an Early Sailing System covering all cargo documentation. The following documents will be prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(a) B/L. (b) Certificate of Origin and Cargo Manifest. (c) Tanker Time and Loading Report. (d) Report of Cargo and Ships Ullages. (e) Master's receipt for documents.

Official cargo figures will be passed to the Master within 1 hour of his departure for insertion by the Master on the Bill of Lading and Certificate of Origin and Cargo Manifest.

In cases of disagreement over cargo figures the Terminal will accept the Masters "Note of Protest" by telex, by the authorised ship's Agent, or by written note handed to the Berthing Master.

HEALTH: Owners should check with Agent respecting any recent imposition of anti-epidemic regulations and requirements for additional injections for crew members. In the case of tankers, doctor will board when ship berthed at Loading Dock and for cargo vessels after ship has anchored. Should vessel, in either case, arrive from another Iranian port and carry a Clear Bill of Health, doctor will not normally board, and Pratique automatically granted.

Signals to be exhibited for vessels entering from foreign port: by day: "Q" Flag flown at masthead; by night: red all-round light, over white all-round light. If suspected that ship has disease or fever on board, ship will report details by VHF Channel 12 to Lavan Island.

There are occasional outbreaks of cholera. International Certificates of Inoculation/Vaccination are essential.

See Radio, "Free Pratique".

RADIO: Vessels nominated to load at Lavan Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Abadan Radio (EQZ) or Bandar Abbas Radio (EQI) or Lavan Radio (EQV).

IOOC Tehran. Telex: 212598 – 212346 – 212707 "Attn. Marsupt. Lavan".

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Lavan in GMT and last port.
CC Cargo(s) required and Bunker(s) required.
DD Deballast time.
EE Size and number of connections for cargo/bunker.

If bunker connection only one side of maniforld, state location.

Lavan Radio Station, is operating on 500 kHz, call sign EQV, from 0530 hrs. – 1330 hrs. GMT.

IOOC tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Pourandokht I" when passing Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

Radio Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Lavan Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name of all ports called at during the last 30 days.
FF Master's Name.

Coastal Radio Station (EQZ) schedule and frequencies:

Schedule of Watch GMT (hrs.)	*Listening Watch Frequencies (kHz)*	*Transmitting Frequencies (kHz)*	*Receiving Frequencies (kHz)*	*Remarks*
Continuous	500	500	500	Distress Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405-535	Traffic Lists every 2 hours from 0105 to 2305 GMT.
0400 – 0700	8356 – 8374	8471	8474 – 8460	**Traffic Lists every 2 hours from 0405 hrs. GMT.
0700 – 0900	12534 – 12561	13069.5	12561 – 12689	
1000 – 1300	12534 – 12561	13069.5	12561 – 12689	
1400 – 1700	8356 – 8374	8471	8374 – 8460	
1700 – 1830	3178 – 4187	4294	4187 – 4231	

**During scheduled watches on HF while station (EQZ) is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according to their schedules of watch.

VHF: Lavan Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Lavan Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

TUGS: Two modern diesel tugs of 3120 b.h.p. fitted with controllable pitch propellers and a bollard pull of 42 tons are stationed at the loading dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fighting capability, foam, dispersant and fire wires.

Both tugs are on instant readiness throughout the entire time that a vessel is alongside the loading dock. The tugs will answer emergency signals, or can be called on VHF Channel 12, or by telephone (Tel. No. 222).

BERTHING: Vessels should have the following equipment ready for use upon their arrival at the port:

a) Anchors, port and starboard, ready for letting go.

b) Ropes or wires, eight each end, not on automatic tension.

c) Derricks rigged if shore reducers or flexible hoses are required.

d) Manifold blanks removed and reducers fitted ready to connect 16 in. series 150 ASA loading arm flanges.

e) Accommodation ladder lowered together with the pilot hoist or pilot ladder.

Note: Berthing Masters will not board any vessel which does not present a clean safe means of access.

f) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.

The tanker loading dock is constructed of a loading platform in the centre of 4 two-sided jacket piled breasting dolphins, and 4 outlying two-sided jacket piled mooring dolphins.

The dock is 1,240 ft. (378 m.) long, and is connected to the shore by a trestle 1,764 ft. (538 m.) long.

The platform deck is 31 ft. 4 in. (9.55 m.) above Chart Datum (MLWIS).

Maximum reach of the loading arms above Chart Datum is:

Distance Manifold to Ship's Side	*Elevation*
10 ft. (3.05 m.)	76 ft. 6 in. (23.32 m.)
12 ft. (3.66 m.)	75 ft. 9 in. (23.09 m.)
14 ft. (4.27 m.)	75 ft. 0 in. (22.85 m.)
16 ft. (4.88 m.)	74 ft. 0 in. (22.56 m.)
18 ft. (5.49 m.)	72 ft. 9 in. (22.18 m.)

Rigid "Chiksan" hydraulically operated loading arms are situated on both sides of the loading platform.

Berth No. 1	4×16 in.	for crude oil loading.
Berth No. 1	1×12 in.	for product loading – (fuel & gas oil).
Berth No. 2	2×16 in.	for crude oil loading.
Berth No. 2	*1×16 in.	for naphtha loading.
Berth No. 2	1× 8 in.	for product loading (fuel & gas oil).

* Gas oil can also be loaded through this arm.

All loading arms are fitted with a series 150 ASA American Standard outer flange with quick connection coupler.

The Terminal carries a full range of aluminium reducing spool pieces and flexible hoses (15 ft.×8 in.) for crude and product/bunker connections.

Shore gangways are provided for both berths, with a safety net for each gangway.

Fire wires must be rigged forward and aft, of sufficient strength to tow the vessel away from the berth in an emergency. The "eye" of the fire wire must be lowered to within 6 ft. of the water and maintained at this level at all times. The IOOC tugs are equipped with their own towing wires which will be shackled onto the vessel's fire wire.

Rat Guards: All ships berthed alongside must provide rat guards for the ship's moorings.

LOADING: Tankers are loaded at Lavan Island alongside an "L" shape 2 berth jetty, approximately 2,000 ft. offshore. The loading platform is fitted with rigid hydraulic loading arms which have quick connection/release couplers attached to the end flange.

There are 4×16 in. arms on the South Berth (No. 1) for crude loading, and 2×16 in. arms on the North Berth (No. 2) for crude loading.

Crude oil is delivered to the loading platform by gravity through 2×36 in. lines from a 4,000,000 barrel tank farm (Salman), and from a 1,500,000 barrel tank farm (Rostam).

Flow rates under normal conditions, with only 1 vessel loading, are approximately, Berth No. 1 (4 arms) 52,000 bbls./hr., Berth No. 2 (2 arms) 32,000 bbls./hr.

Flow rates with a vessel loading at each berth are approximately, Berth No. 1 (4 arms) 40,000 bbls./hr., Berth No. 2 (2 arms) 24,000 bbls./hr.

The minimum flow rate is 15,000 bbls./hr. All vessels accepting nominations to load at Lavan Island must be capable of loading crude at rates above this figure.

The API of Salman Crude Oil is 34 and the API of Rostam Crude Oil is 35.

The temperature of Salman Crude Oil varies between 91°F and 78°F (Summer/Winter), and the temperature of Rostam Crude Oil varies between 85°F and 66°F (Summer/Winter).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the Consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal provided the Master issues a written request to the Loading Master upon arrival at the loading dock. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Masters should note that in cases of overloading the excess cargo cannot be returned to the shore line.

Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-Top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Salman or Rostam crude oil, provided agreement has been obtained from the Consignor.

Slops should be segregated in a special "slop tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the loading dock and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge en route to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

GENERAL CARGO: Vessels with general cargo for IOOC should wait for instructions from Port Control in the general anchorage area, approximately 2 miles S.E. of the loading dock.

A sea berth has been laid adjacent to the small craft harbour at the East end of the Island to enable cargo vessels to discharge in most weather conditions.

The stern mooring buoy is located in Lat. 26° 47.1′ N., Long. 53° 23.2′ E.

The port anchor drop marker buoy is located in Lat. 26° 46.9′ N., Long. 53° 23.6′ E.

The vessel is secured by port and starboard anchors on a running moor spread together with three stern ropes secured to a stern mooring buoy. The vessel lies in a heading of 225° in such a manner as to provide a lee side against either the N.W. or S.E. prevailing winds.

To assist the vessel to moor, IOOC Berthing Master, tug, and mooring launch are provided without charge.

All cargo vessels shall comply with the Port Rules and Regulations as far as it affects them. Upon arrival, Masters will be issued with and sign for a copy of the official Port Book.

Cargo vessels should use the same procedure of arrival notification as laid down for tankers.

IOOC operates a 300 ton flat top barge which is permanently stationed at Lavan Island to off-load general cargo. As soon as the vessel is moored, the barge will be available alongside and will operate on a 24 hour basis.

Stevedoring is carried out on board by an independent Agent and at the dock side by IOOC.

DENSITY: The temperature of sea water alongside the Loading Dock varies from 71°F. in January to 93°F. in August. The density of sea water alongside the Loading Dock varies between 1023 and 1026.

BALLAST: The Terminal does not have any reception facility for disposal of dirty or contaminated ballast.

TIDE: The mean range of tide is 3 ft. 9 in. (1.14 m.)

The extreme range of tide is 5 ft. 6 in. (1.68 m.)

The highest tide recorded is 7 ft. 3 in. (2.21 m.) above MLWIS.

The lowest tide recorded is 0 ft. 5 in. (0.13 m.) above MLWIS.

A chart reading automatic tide gauge is fitted on the loading dock.

WEATHER: In Summer time from May to September temperature reaching 110°F. (43°C.) and humidity ranging from 10% to 100%. The Winter (November to March) mild and pleasant with minimum temperature approximately 48°F. (9°C.). The wind for most of year from N.W., but sometimes particularly during Winter strong S.E. storms likely to occur lasting for several days. Oil Loading Pier partly sheltered from N.W. winds, but exposed to winds from South.

During Winter storms, waves of 8 ft. to 10 ft. often occur. A max. wave height of 15 ft. has been recorded at the Southern end of the Island.

STEVEDORES: For cargo vessels the Agent requires 4 days Notice of Arrival in order to transport labour from Bandar Abbas. Agent provides labour for working cargo "to the rail" and receiver provides lighterage and labour thereon.

MEDICAL: IOOC operate small clinics on the Island with resident doctors. This facility will be made available for emergency cases only.

FRESH WATER: None available.

FUEL: Bunkers are now available at Lavan Island and can be loaded at both berths of the tanker loading dock through rigid hydraulic operated Chiksan loading arms.

These bunker products are provided by the Lavan Distillation Complex (LDC) which is operated by the National Iranian Oil Company (NIOC). Available bunker products are fuel oil and gas oil.

The plant also produces naphtha.

Bunker Requests:

Requests for information on bunkering should not be directed to IOOC. All questions relating to the bunker facility at Lavan Island will be handled by NIOC Marketing & Exports Division.

The address is:

Marketing & Exports,
National Iranian Oil Company,
P.O. Box 1863,
Tehran, Iran.
Cable Address: Naftmelli Tehran
Telex: 21-2514, 21-2613 and 21-2182
Telephone: 6151 – ask for Marketing.

LDC Tank Capacity is:
Naphtha 53,000 cu.m. (333,360 bbls.)
Fuel Oil 38,400 cu.m. (241,530 bbls.)
Gas Oil 30,800 cu.m. (193,730 bbls.)

LDC loading rates, by pump are:
Naphtha 1,500 t.p.h.
Fuel Oil 500 t.p.h.
Gas Oil 500 t.p.h.

LDC loading arms at the tanker dock are:
Berth No. 1: 1×12 in. supplying both fuel and gas oil.
Berth No. 2: 1×8 in. supplying both fuel and gas oil.
Berth No. 2: 1×16 in. supplying both naphtha and gas oil.

LDC product specifications are:
Naphtha SG at 60°=0.7205 (API at 60° 64.9)
Fuel Oil SG at 60°=0.9560 (API at 60° 16.5)
Viscosity Redwood at 100°=1,440 seconds.
Gas Oil SG at 60°=0.8450 (API at 60° 35.9)

CARGO GEAR: Ship's discharging dry cargo to barges in the cargo ship anchorage use ship's gear.

FIRE PRECAUTIONS: Vessel receives full detailed instructions from Berthing Master. Vessels must have fire-wires and engines not to be immobilised.

CONSULS: No consular representation on Lavan Island. Embassies of most nations are situated in Tehran.

REPAIRS: No repairs allowed alongside oil loading jetty. No workshop or repair facilities available. Ship's main engines must be available at all times while alongside jetty.

MARINE SURVEYS: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas.

AIRPORT: No scheduled or regular air flights to Lavan Island. All aircraft required for transportation of goods or passengers must be made by charter. Airport is used by Oil Company Charter planes only and no other passengers are carried except in an emergency situation.

TIME: Standard zone time for Iran is GMT plus 3.5 hours.

POLICE/AMBULANCE/FIRE: There is a Government Gendarmerie Station on the Island. There are no telephones established for these services. Emergencies will be handled by IOOC staff in case of tankers.

SHORE LEAVE: Ships' crew not allowed to go ashore.

CREW CHANGES: Not permitted.

REGULATIONS: (Miscellaneous): *Painting and scaling.* Painting, chipping, scaling or spray painting on deck or overside *strictly prohibited* while vessel at any jetty berth.

GENERAL: *Flag:* All vessels are required to fly the Iranian Flag in Iranian territorial waters which extend 12 miles offshore.

Garbage: Dumping overside of garbage and refuse prohibited in Port Area.

Sanitation: Government Health Regulations require suitable covers to be fitted over all lavatory discharge outlets, etc., to prevent fouling of jetty or craft alongside.

Damage to Port Facilities: If a Master has reason to suppose that any damage has been caused by his vessel to any Port Facilities, he must agree, in writing, with IOOC Berthing Master as to nature and extent of such damage, and this must be confirmed by IOOC Marine Superintendent. IOOC has standard liability forms which cover both ship and shore, and are issued on every occasion.

Rat-guards: All ships berthed alongside must provide Rat-guards for Ship's Moorings.

No visitors: No visitors allowed on terminal dock, or on board vessels alongside dock, unless by written permission of Marine Superintendent. Only persons having authorised work will be given access to port limits, dock or vessels.

DEVELOPMENTS: Oil storage tank capacity to be doubled to 3.5 million barrels. Construction to commence in 1985.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbasabad Avenue, Tehran – Iran. *Tel:* 624102-5. *Telex:* 212598, 212346, 212707. *Cables:* Falatghareh, Tehran.

Mail Address: P.O.Box 1434.

AGENT: See "Abadan".

RAS BAHREGAN (Norwuz Loading Terminal): 29.43 N. 50.10 E. (See Plan)

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:

Lat. 29° 43′ N., Long. 50° 00′ E.
Lat. 29° 43′ N., Long. 50° 12′ E.
Lat. 29° 40′ N., Long. 50° 10′ E.
Lat. 29° 40′ N., Long. 50° 24′ E.

Vessels must not enter this area without permission from the port control. Anchoring in this area is prohibited.

DOCUMENTS:

5 Crew and Passenger Lists.
4 Stores Lists.
4 Bonded Stores List.
Clear Bill of Health from last port.
4 Bills of Lading.
6 Manifests.

PILOTAGE: Vessels must not enter the Port Limits without a Mooring Master on board. Vessels should wait for the Mooring Masters approximately 2 miles off the SBM.

Prior Arrival: Vessels should have the following equipment ready for use upon their arrival at the port:

(a) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.

NOTE: Berthing Masters will not board any vessel which does not present a clean safe means of access.

(b) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.

(c) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

(d) Under normal conditions vessels will be moored using 6 ship's lines. In rough weather the number of mooring lines will be increased. Therefore each ship to be moored at Bahregan SBM Terminal must be equipped with at least ten good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Two of these mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must also have at least one good messenger line ready for immediate use; anchors, chains and anchor windlass must be in good condition. Vessels must be equipped to fit flanges of floating hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackles and booms to hoist the floating hose, a 5.5 ton lift from the sea to the ship's rail, in a safe, efficient and expeditious manner. If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform the vessel's Master and in such event the vessel shall not be brought into the mooring until facilities, lines, or gear are deemed satisfactory. In this connection, lines cannot be provided by the company.

(e) Before a ship is moored at MBM Terminal, she must be equipped with at least 9 good quality mooring lines, each 120 fathoms or more in length with eyes and tail ropes spliced into each end. Mooring lines should be laid out free for running adjacent to bitts and warping winches. Warping winches must be adequate to handle mooring lines under heavy strain, and efficient stoppers must be readily available to "hang off" mooring lines and transfer same from winch to bitts without loss of tension.

Ships must have both bower anchors ready for immediate use, each with a minimum of 120 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of letting one chain go out on the run while heaving in on the other chain. Vessels must be equipped to fit flanges on submarine hoses, which are of ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the submarine hoses, a 5 ton lift from the floor of the sea to the ship's rail, in a safe, efficient and expeditious manner.

If, in the opinion of the Mooring Master, the vessel is not equipped with adequate mooring facilities, lines or gear, he will so inform vessel's Master, and in such event the vessel shall not be brought into the mooring until facilities, lines or gear are deemed satisfactory.

On Arrival: Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.

(b) IOOC "Notice of Readiness" form.

(c) Combined Tug, Pilot, Berthing/Unberthing Charge form.

(d) Fire and Safety Regulations and No Smoking Notices for posting in approved spaces.

All the above documents must be processed prior to the vessel being berthed.

ANCHORAGE: The SBM is in the open sea with no surface obstructions in the vicinity. However, anchorage is prohibited in the following areas:

(a) Immediate vicinity of the SBM – within a 1.2 mile radius of the SBM.

(b) One mile on either side of 36 in. submarine pipe-line from SBM to Bahregan Oil Centre.

Suggested anchorage area is 2 miles S.W. of the SBM.

NAVIGATIONAL AIDS/PROHIBITED AREAS:

Two flares are located at:
Lat. 29° 50′ N., Long. 50° 15.8′ E.

Nowrouz production facility (Offshore) located in:
Lat. 29° 29′ 55″ N., Long. 49° 24′ 10″ E.

The above platform complex, approximately 50 nautical miles South West of Bahregan, is situated in the centre of the Nowrouz Oil Field.

This area, and 3 miles around it, is prohibited to navigation.

Bahregansar Production Facility (Offshore) located in:
Lat. 29° 56′ 23″ N., Long. 49° 50′ 58″ E.

The above platform complex, approximately 30 nautical miles West of Bahregan. This area, and 3 miles around it, is prohibited to navigation.

RESTRICTIONS: The Bahregan SBM Terminal operates 24 hours per day, 7 days a week. However, mooring or unmooring is only carried out if fair or moderate weather conditions are prevailing.

In the event that berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the terminal area on account of weather (terminal closed) should keep in contact with the terminal via radio in order to be available when weather moderates.

FLAG: All vessels are required to fly the Iranian flag on the foremast during daylight hours. Iranian territorial waters extend 12 miles seaward from the mainland and adjacent islands.

ADVICE OF ARRIVAL: It is important that ships establish radio contact with SIRIP when 3 days distant from Bahregan Terminal and maintain this contact until just previous to arrival at the Terminal. All ships should send a 72 hour ETA message to SIRIP giving the best estimate of ship's arrival time at the Terminal.

Further ETA messages should be sent to SIRIP when the vessel is 24 and 12 hours distant from Bahregan Terminal and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hour ETA should include a positive statement regarding "ship's readiness to load" on arrival and the number of hours that will be required to discharge clean ballast after ship is berthed in mooring, as well as details of the flange size of the manifold.

MAX. SIZE: Water depths at the Terminals at LW are:

SBM 79 ft. (24.0 m.)
MBM 52 ft. (15.5 m.)

Keel clearance required by the Terminal is 3.3 ft. (1 m.) at all times. Tonnage capacity of the Terminals are:

SBM 250,000 d.w.t.
MBM 45,000 d.w.t.

HEALTH: Masters should obtain Free Pratique before arrival at Ras Bahregan by cabling "NIOC Kharg Port Health" via EQZ Oilco Station or "Porthealth NIOC" Kharg.

RADIO: Vessels nominated to load at Bahregan should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Abadan Radio (EQZ) or Bandar Abbas (EQI).

IOOC, Tehran. Telex: 212598 – 212346 – 212707. "Attn. Marsupt. Bahregan".

Arrival messages to be in the following format:

AA	Name of ship.
BB	ETA Ras Bahregan in GMT and last port.
CC	Cargo required/cargo to discharge.
DD	Deballast time/Ballast time.
EE	Size and number of cargo connections.

Ras Bahregan Radio Station, is operating on 500 kHz, call sign BOC, from 0530 hrs. – 1330 hrs. GMT.

Ras Bahregan Radio maintain a listening watch on 2638 kHz. Vessel should commence calling "Bahregan" when passing Kharg Island.

Free Pratique: Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA	Name of vessel and ETA Bahregan (in GMT).
BB	Number of crew and state of health.
CC	Number of vaccinations required for Cholera.
DD	Number of deaths or cases of serious illness in the last 30 days.
EE	Name all ports called at during the last 30 days.
FF	Master's Name.

VHF: Ras Bahregan Terminal maintains a listening watch 24 hours a day on VHF Channels 16 and 13.

Vessels should commence calling "Bahregan" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 13.

NOTICE OF READINESS: The ship's officer responsible for loading or discharging should give IOOC's Mooring Master at least 30 minutes Notice of Readiness to commence loading or discharging.

The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affects cargo worthiness or seaworthiness while under the jurisdiction of the Terminal. In all such situations of dispute, the decision of the IOOC Marine Superintendent will be final.

MBM: MBM Terminal is located 5 miles from coast at:

Lat. 29° 47′ 00″ N., Long. 50° 11′ 30″ E.

The MBM Terminal is connected by a 4.5 mile 18 in. diameter submarine pipe-line to Bahregan Terminal. Bahregan Terminal is located at:

Lat. 29° 49′ 30″ N., Long. 50° 15′ 47″ E.

TUGS: Available and required. One modern diesel tug of 1,000 b.h.p. fitted with controllable pitch propellers is stationed at the Terminal and used for all manoeuvres.

The IOOC tug is equipped for fire fighting, using both water and foam through monitors situated on a fire fighting platform. IOOC tug is on instant readiness throughout the entire time that a vessel is moored at the Terminal. The tug will answer the emergency signal or by calling on Channel 13 VHF.

BERTHING: The Terminal operates a mooring launch and 3 small supply boats.

SBM: The SBM is designed to provide a safe mooring for tankers in most states of weather or sea. When moored to the SBM, tankers can load their cargo while weather-vaning about the Terminal. The moored vessel normally remains head into the wind and sea, riding at its most comfortable position. The SBM consists of a strongly constructed steel vessel securely moored in position by 6 sets of heavy mooring chains, each set is attached to a 3 pile template. The SBM is equipped with a Rotating Mooring Bollard, to which the tanker secures, a Rotating Cargo Manifold which carries the crude flow system from the SBM through the hoses, and a Rotating Balance Arm, which maintains the SBM on an even keel. These 3 components all rotate as one unit as the tanker swings with the sea or wind.

A submerged peripheral fender extending outward from the hull is provided to prevent damage to the floating hoses and SBM, should the tanker ride up against it.

MBM: Permanent mooring in the berth consists of 5 steel cylindrical buoys each fitted with a quick release hook to which the ship's mooring lines are attached by the company's mooring launches. The berth is laid out on a one heading basis, using both ship's bower anchors with 9 mooring ropes (4 beam, 4 quarter, and 1 stern).

The mooring buoys are numbered 1, 2, 3, 4 and 5 starting with No. 1 East of the mooring and numbers running consecutively in a clockwise direction.

HOSES: The Terminal carries a full range of reducing spool pieces and flexible hoses for connections.

SBM: 2×16 in. floating hoses.

After the vessel is securely moored to the SBM, the service launch will tow the end of the floating hoses to a point on the portside of the tanker immediately below the tanker's cargo manifold. The tanker's derrick runner should be ready to lift the hoses which will be secured by the attached chains in such a manner as to allow the ends of the hoses to reach the ship's manifold. The weight of the hose to be lifted is approximately 5.5 tons. The hoses are fitted with 16 in. flanges, and the company will provide reduction pieces to 14 in. or 12 in. or other sizes (as well as gaskets) as required to make connections to the ship's manifold. The hose connection is normally performed by IOOC's loading crew under the supervision of the Mooring Master. However, a ship's deck officer must be present, and must direct the ship's crew as required.

MBM: 2×10 in. submerged hoses.

After the vessel is securely moored, inside the MBM, the submarine loading hose must be lifted to the rail amidships. The 10 in. hose lift is 5 tons. Hoses are lifted by ship's gear on the starboard side. Ships should have manifold fittings aboard to allow connection of the flanges.

Tankers are loaded or discharged at this berth.

LOADING: Crude oil is delivered to the SBM through a 36 in. line and to the MBM through an 18 in. line from a 2,198,000 barrel tank farm.

Flow rate under normal conditions is approximately:

SBM (two hoses) 6,000 t.p.h.
MBM (two hoses) 5,000 t.p.h.

The minimum flow rate is 15,000 bbls./p.h. All vessels accepting nominations to load at Bahregan must be capable of loading crude at rates above this figure.

The initial loading rate is normally about 1,500 t.p.h. while the Loading Master and the ship's officer satisfy themselves that all is in order with the Terminal and the ship's facilities. As soon as this is done, the loading rate is increased to maximum or other rate as requested by the ship.

The API of Bahregan Crude oil is 26.0.

The temperature of Bahregan Crude oil varies between 62°F and 78°F (Winter/Summer).

The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the consignor.

A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal; provided the Master issues a written request to the Loading Master upon arrival at the loading terminal. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Master should note that in cases of overloading, the excess cargo cannot be returned to the shore line. Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes.

The Terminal will accept the "Load-on-top" system of co-mingling tank cleaning oil residue from previous cargoes with the nominated quantity of Bahregan Crude oil, provided agreement has been obtained from the consignor.

Slops should be segregated in a special "Slop Tank" or accumulated in one of the cargo tanks. A sample of the slop must be taken on arrival at the Terminal and kept for any future reference. Exact quantities must be calculated.

Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the Terminal. The ballast may be retained for discharge en-route to the next port, or discharged concurrent with loading, provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur. Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "Permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the Terminal, and discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

PETROLEUM INSPECTORS: Services of the Saybolt Agency available subject to at least 3 days advance notice.

Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas.

MEDICAL: Depending on the availability of the Company doctor, medical assistance can be provided, although there is no hospital available. In cases of extreme emergency, IOOC will arrange transport to nearby towns at the ship's expense and responsibility.

CUSTOMS: A Customs Officer boards each vessel calling at the Terminal.

DENSITY: Salinity is approximately 20% more than normal sea water.

FUEL: Not available.

FRESH WATER: Not available.

STORES: Not available.

TIME: Standard zone time for Iran is GMT plus 3.5 hours.

SERVICES: No facilities for crew change, etc., or any other vessel's requirements, as the Terminal is situated off-shore in the Gulf and there are no transportation facilities other than Oil Company's flights from Abadan which are meant for their own personnel.

REPAIRS: Masters of vessels loading at Bahregan Terminal are advised that this port is considered an "open roadstead" and under no circumstances may engines be shut down for repairs while their ships are moored. There are no facilities at Bahregan Terminal for making vessel repairs.

CONSULS: There are no consulates at the Bahregan Terminal; however, consular or diplomatic representatives for most nations maintain offices in Tehran and some in Khorramshahr.

SHORE LEAVE: There is no shore leave permitted due to lack of facilities.

AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran – Iran. *Cables:* Falatghareh, Tehran. *Telex:* 212598 – 212346 – 212707. *Tel:* 624102-7.

Mail address: P.O.Box 1434.

AGENT: See "Abadan".

SIRRI ISLAND: 25.54 N. 54.33 E. (See Plan)

FLAG: The Iranian flag, green side uppermost, must be flown while the vessel is within territorial waters. Iranian territorial waters extend 12 miles seaward from the mainland and offshore islands.

LOCATION: The loading station is located in the S.E. part of the island of Sirri at:

Lat. 25° 54′ N., Long. 54° 33′ 30″ E.

Landfall on the island presents no difficulty, by day or night, for vessels coming from the Strait of Hormuz or from one of the Gulf Ports. The Island gives a good radar echo at 17 miles.

PORT LIMITS: Port area limits which are under the control of IOOC extend between the following points:

Lat. 25° 55.0′ N., Long. 54° 33.1′ E.
Lat. 25° 55.0′ N., Long. 54° 34.6′ E.
Lat. 25° 52.0′ N., Long. 54° 31.1′ E.
Lat. 25° 52.0′ N., Long. 54° 34.6′ E.

Vessels must not enter this area without permission from the Port Control. Anchoring in this area is prohibited.

NAVIGATIONAL AIDS:

Warning: The following information is for the guidance of ships. IOOC does not guarantee or warrant that the listed aids to navigation are in the stated positions or operating.

Sirri Island Terminal Light located in: Lat. 25° 54′ N., Long. 54° 33′ E. Light exhibited Fl. W. every 7 secs., visible 10 miles.

A lighted buoy, showing Fl. W.(3) every 12 secs. is visible 6 miles, and is located to the West of the S.E. end of the island.

The flare located in: Lat. 25° 54.1′ N., Long. 54° 31.9′ E. is highly conspicuous and tends to obstruct the other navigational aids:

Masters may find it useful to refer to the following documents:

1. French Hydrographic and Oceanographic Department Charts No. 2172 and 6051.
2. French Nautical Instructions, Series L, Volume IV.
3. British Navy Hydrographic Office Charts No. 2837, 2887, 2832 and 3781.
4. Lights and Fog Signals Book, series L.

RADIO/VHF:

1. Vessels nominated to load at Sirri Island should transmit arrival information 96 hours and confirm 48 hours prior to arrival.

Arrival messages should be transmitted to the following address through either Bandar Abbas Radio (EOI) or Abadan Radio (EQZ).

IOOC Tehran, Telex: 212598 – 212346 – 212707.

Attn. Marsupt. Sirri.

Arrival messages to be in the following format:

AA Name of ship.
BB ETA Sirri in GMT and last port.
CC Cargo required.
DD Deballast time.
EE Size and number of connections for cargo.

Abadan Coastal Radio Station (EQZ) schedules and frequencies:

Schedule of Watch GMT (hrs.)	*Listening Watch Frequencies* (kHz)	*Transmitting Frequencies* (kHz)	*Receiving Frequencies* (kHz)	*Remarks*
Continuous	500	500	500	Distress Station is equipped with international Auto-Alarm receiver on 500 kHz.
Continuous	500	428	405-535	Traffic Lists every 2 hours from 0105 to 2305 GMT.
0400 – 0700	8356 – 8374	8471	8474 – 8460	**Traffic Lists every 2 hours from 0405 hrs. GMT.
0700 – 0900	12534 – 12561	13069.5	12561 – 12689	
1000 – 1300	12534 – 12561	13069.5	12561 – 12689	
1400 – 1700	8356 – 8374	8471	8374 – 8460	
1700 – 1830	3178 – 4187	4294	4187 – 4231	

**During scheduled watches on HF while station (EQZ) is not actually working with ships, traffic lists are transmitted automatically and continuously on frequencies 4294, 8471 and 13069.5 kHz according to their schedules of watch.

2. Sirri Island Station, is operating on 500 kHz, and 2182 kHz from 0400 – 0800 hrs. LT and from 1100 – 1400 hrs. LT.

3. Sirri Terminal maintains a listening watch 24 hours on VHF Channels 16 and 12.

Vessels should commence calling "Sirri Island" 4 hours prior to arrival, on Channel 16. When contact has been made, switch to working frequency Channel 12.

4. Sirri tugs maintain a listening watch on 2182 kHz. Vessels should commence calling "Sirri Tugs" when passing Quoin Island. When contact has been made, switch to working frequency 2638 kHz.

5. *Radio Free Pratique:* Vessels requesting Free Pratique by radio are required to transmit the following message through the same Channels as their ETA advice.

AA Name of vessel and ETA Sirri Island (in GMT).
BB Number of crew and state of health.
CC Number of vaccinations required for Cholera.
DD Number of deaths or cases of serious illness in the last 30 days.
EE Name all ports called at during the last 30 days.
FF Master's Name.

PROHIBITED AREAS: Papa Production Facility (Offshore) located in position: Lat. 25° 42′ N., Long. 54° 17′ E.

The above platform complex, approximately 18 nautical miles S.W. of Sirri Island, is situated in the centre of the Sirri "A" oil field.

This area, and 3 miles around it, is prohibited to navigation.

Crude oil from offshore oil fields is delivered to Sirri Island by submarine pipe-line, from Papa production complex.

3 pipe-lines running approximately 182°T to a shore location on Sirri Island at: Lat. 25° 53.4′ N., Long. 54° 32.6′ E.

Vessels are requested not to anchor or carry out any under sea/seabed operations in the vicinity of these pipe-lines.

PILOTAGE: Vessels must not enter the Port Limits without an IOOC Berthing Master on board.

Vessels should wait for the Berthing Master approximately 2 miles off the Loading Dock.

Vessels should have the following equipment ready for use upon their arrival at the Port:

(a) Anchors, port and starboard, ready for letting go.
(b) Ropes or wires, 8 each end, not on automatic tension winches.
(c) Derricks rigged if shore reducers or flexible hoses are required.
(d) Manifold blanks removed and reducers fitted ready to connect 20 in. series 150 ASA loading arm flanges.
(e) Accommodation ladder lowered together with the pilot ladder if a VLCC, otherwise a pilot hoist or pilot ladder.
Note: Berthing Masters will not board any vessel which does not present a clean safe means of access.
(f) Ballast tank lids opened to allow the Berthing Master to inspect ballast water.
(g) Pilot room available and ready for the Berthing Master and also trainee accommodation, should they decide to stay on board throughout the loading.

Immediately upon boarding the vessel, the Berthing Master will present the following documentation to the Master for his signature:

(a) A copy of the Port Rules and Regulations Book receipt and agreement form.
(b) IOOC "Notice of Readiness" form.
(c) Combined Tug, Pilot, Berthing/Unberthing charge form.
(d) Fire and Safety Regulations and No Smoking Notices for posting in approved locations.

All the above documents must be processed prior to the vessel being berthed.

A vessel arriving in light condition must have sufficient ballast on board for safe handling. As the Terminal Dock is located in the open sea, this amount has been set at 33% of the d.w.t. Trim must not be more than 10 ft. by the stern.

Also see "Tugs".

ANCHORAGE: Vessels arriving to load at Sirri may anchor in 60 m. depth of water, 1.5 miles East of the lighthouse of Sirri Island, and take up a holding anchorage at their own initiative, providing they have not received instructions for docking upon arrival.

Prohibited Anchorage: Under no circumstances may vessels anchor in the zone surrounding the dock area, within a one-mile radius.

It is strictly forbidden to anchor in the vicinity of the S.E. end of the island (undersea pipe-lines); anchorage to the North and West of the island is considered unsafe and of poor holding qualities.

MAX. SIZE: The loading station is designed for docking and handling of vessels having a minimum length of 240 m. and a maximum length of 365 m. This normally restricts utilisation to vessels in the approximate size range of 80,000 d.w.t. to 330,000 d.w.t. The maximum authorised draft for these vessels is 24.00 m. (78 ft. 9 in.).

HEALTH: Following mooring and positioning of the vessel's access ladder, Iranian medical authorities or their representative will grant Pratique. Masters are advised to notify by radio any cases of infectious disease which may have broken out aboard.

TUGS: 2 modern diesel tugs of 4,250 b.h.p. fitted with controllable pitch propellers and a bollard pull of 65 tons are stationed at the loading dock and used for all manoeuvres.

The tugs are equipped with their own towing lines, fire fighting capability, foam, dispersant and fire wires.

Launches: The Terminal operates a pilot launch and 2 mooring launches for rope handling.

NOTICE OF READINESS: The Master's "Notice of Readiness" will be rejected if any of the ballast is oily, or if there is any leakage of oil from the vessel during loading, or any unsatisfactory condition on board ship which affect cargoworthiness while under the jurisdiction of the Terminal.

In all such situations of dispute, the decision of the Sirri Marine Superintendent will be final.

The vessel's Owner may bring in a Classification Surveyor, at his own expense, to conduct a survey.

BERTHING: *Port Facility – Tanker Dock:*

1. Vessels are ordinarily docked port side to the dock on a heading of 017°, at mooring piling equipped with "Yokohama" type inflatable fenders. Mooring lines are attached to 6 mooring pilings, equipped with quick-release hooks. The dock comprises a loading platform linked to land by a catwalk. All ships berthed alongside must provide rat guards for the ship's moorings.

2. Water depth, adjacent to the dock, at LW is 28 m.

3. Keel clearance required by the Terminal is 3 ft. at all times.

4. Connection and disconnection of the loading arms is performed by IOOC personnel, with the assistance of the vessel's crew. The vessel's cranes are not used unless absolutely necessary, as in the event of failure of the platform hoisting equipment. The loading arms are of 20 in. size, with hydraulic couplers for 16 in., 14 in. and 12 in. flanges.

Vessels are advised to have their reducers attached to the loading manifold, ready for connection. Before connection is begun, the vessel will be connected to the arc system voltage equalising cable.

5. After the vessel is moored and Pratique issued, an IOOC representative responsible for loading and safety will reach agreement with the vessel as to loading conditions, possible flow rate, and quantities to be handled. The IOOC representative is on watch on the dock at all times. The Master of the vessel must provide him with all the information necessary to ensure proper completion of the loading process. The Master shall designate an officer to be responsible for loading and safety on board, in liaison with this representative, and a crew member who shall be permanently stationed near the manifold for direct communication with the dock. The Master shall be fully responsible for valve operations and safe loading on board. If necessary, the vessel may at any time request a reduction in the pumping rate.

When loading is completed, tank ullages shall be taken by an officer of the vessel, in the presence of the IOOC representative.

The Terminal shall furnish the vessel with samples of the crude loaded, taken by continuous sampling on the loading line. Such samples shall be numbered and sealed, and shall state the origin of the crude.

6. At the end of the loading process, the vessel shall notify the Terminal 0.5 hour, and again 10 minutes, before the planned stop loading.

LOADING: *Loading Facility:*

1. Tankers are loaded at Sirri Island alongside a 1 berth jetty, approximately 600 ft. offshore. The loading platform is fitted with rigid hydraulic loading arms which have quick connection/release couplers attached to the end flange.

Crude is loaded by 4×20 in. loading arms, 2 of which are also used for unloading dirty ballast water from the tanker.

2. The maximum loading rate is 15,000 cu.m./hr. The minimum flow rate is 15,000 bbls/hr. All vessels accepting nominations to load at Sirri Island must be capable of loading crude at rates above this figure.

3. The API of Sirri crude oil is 31.

4. The temperature of Sirri crude oil varies between 93°F and 86°F (Summer/Winter).

5. The Terminal will accept cargo requests 10% above or below the official nominated quantity unless specifically requested otherwise by the Consignor.

6. A shore stop to close off the flow of crude oil to the tanker will be executed by the Terminal provided the Master issues a written request to the Loading Master upon arrival at the loading dock. This request must include the statement that IOOC will not be held responsible for any error in the final quantity loaded.

Masters should note that in cases of overloading, the excess cargo cannot be returned to the shore line.

Masters should also be aware that they will be held responsible for any overflows and pollution caused by their request for a shore stop.

7. An "Early Sailing System" of tanker documentation is operated by the Terminal as standard practice for all cargoes (see "Early Sailing Procedure").

8. Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washing on board ship and treating these washings with chemicals. The result is that no oil is discharged into the sea and the oil separated is collected in a Slop Tank. With the written permission of Off-Taking Companies, the Terminal will "Load on Top" of such slops. To avoid pollution of the Gulf, this system is highly recommended.

9. Vessels which arrive in ballast to load part cargo, should endeavour to place the ballast in such a manner as to allow loading to commence upon arrival at the loading dock.

The ballast may be retained for discharge enroute to the next port, or discharged concurrent with loading. Provided the vessel can show adequate valve separation, this method is accepted by the Terminal, and will be finally confirmed by the Loading Master when satisfied that no pollution or contamination will occur.

Vessels arriving in ballast to load a full cargo, who carry most of their ballast in "permanent ballast" tanks, should also endeavour to arrange the remaining ballast in such cargo tanks as to allow loading to commence upon arrival at the loading dock, discharge concurrent, using segregated lines and pumps. The Terminal will accept this system on the same basis as above paragraph.

10. A 90,000 cu.m. storage reservoir enables vessels to discharge the dirty water ballast from their tanks into IOOC land installations, by means of two of the 20 in. handling arms in the dock installation.

BALLAST: *Ballast Upon Arrival:* Vessels must come in with adequate ballast and proper trim to be able to manoeuvre in satisfactory conditions of safety.

Ballast must not be less than 30% of d.w.t., or 50% of loaded draft; FW, bunkers and stores are not considered ballast. I.O.O.C. reserves the right to leave at anchor vessels not meeting these conditions; the resulting delay will be for account of the vessel.

The Terminal is equipped with a dirty ballast holding tank; ballast unloading is performed by two 20 in. arms. Any discharge of dirty water overboard is forbidden.

Ballast Discharge: A 90,000 cu.m. storage reservoir enables vessels to discharge the dirty water ballast from their tanks into I.O.O.C. land installations, by means of two of the 20 in. handling arms in the dock installation.

Disposal of Ballast: International Law: Ship's Masters are held responsible to observe International Convention Laws concerning pollution of the sea, having particular regard to the Gulf Area.

Disposal of Ballast at Sea: Ship's Masters are warned that no dirty ballast, or bilge water should be disposed of in the sea within 50 miles of the coast of Iran.

When so disposing of ballast, all pipe-lines, sea suctions, strainers, and pumps that are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of sea pollution when the clean ballast is pumped out.

Master's Responsibility: It is the ship's Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his ship.

Categories of Pollution: This includes oil water from bilges, crude residue from previous voyages, or any other matter that may result in pollution of the sea. Any fines imposed shall be to ship's account.

Tank Inspection: As soon as practical after arrival, all vessels' tanks will be inspected for oil in ballast. During discharge of ballast similar inspections will continue.

Ship Rejections: If evidence of oil appears at any of these inspections the ship will be rejected, and will not be accepted until satisfactory evidence is produced that such ballast was disposed of in a proper manner. If during inspection, or during progress of loading, it is revealed that ship's tanks are not tight, or that oil is leaking from the ship, she may be rejected or refused further loading.

Ship Survey: Should the ship's tanks be found leaking it will not be later accepted for loading, unless satisfactory evidence duly certified by Lloyd's or A.B.S. Surveyors, or other recognised Surveyors of repair, is submitted.

Notice of Readiness Rejection: Any vessel rejected because of dirty ballast or sea pollution will automatically nullify his "Notice of Readiness" and lose any priority of position for loading.

On return from sea, ships' Masters should tender a new Notice of Readiness to I.O.O.C. If this is accepted by I.O.O.C. vessels will then be entered for loading at the new time of acceptance. Vessels will be rejected for dirty ballast at all times.

Ballast Quantity: A vessel must have sufficient ballast for safe handling, with due regard to existing weather and sea conditions. Through a careful watch of the weather and sea conditions, frequent exchange of information between ship and Terminal, and by a knowledge of the behaviour of his own vessel a ship's Master may come to the Terminal with a minimum of ballast and thus lessen any possibility of infringement of sea pollution regulations.

Additional Lighting: In addition to the lights usually displayed, vessels in the berth discharging ballast or loading cargo during darkness will themselves illuminate the sea around the ship, so that any pollution will be readily noticeable.

Special Provision: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is first obtained from the Sirri Terminal Superintendent.

Load on Top Method: Most responsible ship owners have adopted a system of tank cleaning using circulatory methods of transfer of tank washing on board ship and treatment with chemicals.

The result is that no oil is discharged into the sea and the oil separated is collected in a slop tank. With the written permission of Off-Taking Companies, the Terminal will "Load on Top" of such slops. To avoid pollution of the Gulf, this system is highly recommended.

EARLY SAILING PROCEDURE: Notice to Masters:

In order to minimise delays to tankers awaiting official documentation after loading at the port, an Early Sailing system is now in force.

The following documents are prepared in advance, *except for cargo figures,* and presented by the ship's Agent to the Master for his signature, upon the ship's arrival at the loading dock.

(A) Nos........ Originals & Nos........ Copies of IOOC Bill of Lading.
(B) Nos........ Originals & Nos........ Copies of IOOC Certificate of Origin and Cargo Manifest.
(C) Nos........ Originals & Nos........ Copies of IOOC Tanker Time and Loading Report.
(D) Nos........ Originals & Nos........ Copies of IOOC Report of Cargo and Ship's Ullages.
(E) Master's Receipt for Documents covering both pre-signed and onsite prepared forms.

Documents for Master's use, and for the Consignee care of the Master will be retained on board. All other pre-signed documents to be returned by the Agent to the IOOC Terminal Office.

Official cargo figures will be passed to the Master by radio *within 1 hour* of his departure. Advice of quantities loaded should be inserted by the Master on the "Bill of Lading" and "Certificate of Origin" forms as prior indicated.

Hand written copies of items (C) and (D) will be passed to the Master for his reference.

In case of disagreement on Cargo figures, the Master may:

1. "Note Protest" by cable or telex.
2. Authorise the ship's Agent to "Note Protest" on his behalf.
3. Pass a written "Note of Protest" to the Berthing Master who will acknowledge receipt on behalf of the Terminal.

IOOC appreciates the co-operation of Masters, Owners, Shippers and Consignees in agreeing to implement this system.

POLLUTION: It is the Master's responsibility to ensure that no garbage, refuse or liquid discharge is allowed to pollute harbour waters.

Adequate covers must be placed over all sanitary and galley discharges to prevent fouling the dock structure.

Ship's Masters are obliged to observe International Convention Laws concerning pollution of the sea.

Rules and Regulations establishing procedure for the Sea of Oman and the Gulf must be strictly observed by all Masters.

IOOC monitors the entire area within their field of operation, and will fully document and report back to NIOC any case of pollution for further action.

MEDICAL: IOOC operates a small clinic on the Island with resident doctors. This facility will be made available for emergency cases only.
TIME: Standard zone time for Iran is GMT plus 3.5 hours.
FRESH WATER: Not available.
FUEL: Not available.
REPAIRS: The island has no repair shop. Repairs may be made at anchorage after loading, subject to approval by I.O.O.C.
REPATRIATION: I.O.O.C.'s air transport to Tehran is not available for the transport of relief crews.
AIRPORT: I.O.O.C. has an air transport service to Tehran.
TIME: Sirri Island is on Iranian Standard Time which is GMT plus 3 hours 30 minutes.
SHORE LEAVE: Crew are prohibited from going ashore, except by special authorisation issued by I.O.O.C., by agreement with the consignees and the local authorities.

Swimming alongside the vessel and the dock is prohibited.

GENERAL: *Weather:* From May to September, very hot and humid conditions prevail with temperatures reaching 47°C (117°F) and relative humidity ranging from 10% and 100%.

The Winter months, from November to March, are mild and pleasant with minimum temperatures of about 4°C (39°F). The average rainfall is approximately 200 mm. (8 in.) per annum, all of which falls during the Winter months.

Throughout the year, the dominant winds are from the W.N.W., with winds of a force greater than 20 knots from November to March. This orientation is approximately 290° at Sirri. This wind, known as the "Shomal", blows particularly in the Summer during a period of forty days (beginning of June to mid-July); in the Winter, the wind comes on abruptly and can reach 30 to 40 knots.

Note: Violent winds from the N.E. reaching 60 knots have been observed in the Winter season.

Tides: In the waters around the island of Sirri, the tides are semidiurnal with diurnal assymetry. High tide occurs approximately 9 hours after the moon passes the meridian of Greenwich. The average water level is 0.90 m. above chart datum and the average tidal range 1.50 m.

The seasonal S.W. wind from April to September causes the water level in the Gulf to rise by 0.30 m.

Sea Conditions: The swell is short and rapidly becomes steep, and it is often out of proportion to the wind force. With the Shomal, it can reach 3.50 to 4.50 m., but the maximum wave height at Sirri is in the range of 1.80 to 3.00 m. The swell subsides rapidly after the wind dies down.

Sea temperature varies from 71°F. (22°C.) in January to 93°F. (34°C.) in August.

Currents: Tidal currents are of the order of one knot, with N.N.E. and S.S.W. major components; thus currents are roughly parallel with the dock alignment.

Sanitary Report: This formality is normally performed after the vessel docks; however, vessels remaining at anchor may, through their Agents, complete customs and health examinations in the roadstead.

Publications and Charts: Masters may find it useful to refer to the following:

a. French hydrographic and oceanographic department charts No. 2172 and 6051.
b. French nautical instructions, Series L, volume IV.
c. Lights and fog signals book, Series L.
d. British Hydrographic Office chart Nos. 2837, 2887 and 2832.
e. Gulf Pilot (63).

Rat Guards: All ships berthed alongside must provide Rat Guards for the ship's moorings.
Territorial Waters: Iranian territorial waters extend 12 nautical miles from the coast and adjacent islands.
Surveyors: Surveyors of the American Bureau of Shipping and Lloyd's are stationed at Bandar Abbas and Abadan.
Consuls: No Consular representation is available at Sirri but the Embassies of most nations are situated in Tehran.
Officials: Customs, Ports and Shipping, and Gendarmerie Officials are stationed on Sirri Island.
Maintenance: Maintenance work such as scaling and painting on deck or from the loading dock, is prohibited at all times while the vessel is alongside the loading dock.
SAFETY: *Safety Watch:* A safety watch is provided on the loading platform by I.O.O.C. personnel, under the orders of the Loading Supervisor.

Throughout the time the vessel is alongside, I.O.O.C. makes the following seagoing facilities available to the vessel:

a. Two 300 h.p. docking escort boats.
b. Two safety tugs with monitor water nozzles, foam generators and anit-pollution spray equipment.
c. Fixed dock equipment (water screens, nozzles).

The Master remains solely responsible for safety aboard his vessel. He shall maintain sufficient crew on board to be able to handle his vessel without hazard, and ensure rapid response with fire fighting equipment:

a. Keep the engines ready for use.
b. Make sure the vessel keeps its station with the dock, so that the loading arms always operate within their designed work-zone.
c. Make sure that the mooring lines provide firm mooring without abnormal strain.

An I.O.O.C. representative shall make sure that these safety provisions are in force throughout the time the vessel is alongside the loading station.

If need be, the standby tug may be called upon for correction of docking position. Loading may be halted, and the arms disconnected.
Preventative Measures: The vessel must show a red flag by day, and by night a red light visible through 360°.

The Master must post a notice at the gangway, absolutely prohibiting smoking, the use of open lights, and access to visitors.

All hull valves shall be closed, except for those handling water circulation.

All main deck scuppers shall be plugged.

Two wire rope emergency tow lines, of adequate length and strength shall be placed on the starboard side, one forward and one aft; the eyes of the tow lines shall be maintained a suitable distance above the water, so that the tugs can couple to them easily.

The access gangway shall be properly positioned on deck.
Fire Protection: Smoking, the use of open lights, and the use of tools liable to produce sparks are prohibited outside the zones where such are normally authorised on a tanker.

In zones classified as dangerous, the use of equipment other than types approved for this use by an official body is prohibited.

Further, in general, the Master is obliged to adhere to international safety regulations.
AUTHORITY: Iranian Offshore Oil Company, 339 Abbassabad Avenue, Tehran – Iran. P.O. Box 1434. *Tel:* 624102-5 *Cable:* Falatghareh, Tehran. *Telex:* 212598-212346-212707. *Contact:* Captain M. H. Salimzadeh, Head of Marine Operations.
AGENT: See "Abadan".

NOTES

Please also advise Shipping Guides Ltd.

Iraq

GENERAL

TANKERS: Please note that all correspondence, cables, and telexes concerning tankers calling at Iraqi terminals are to be directed to following addresses.

Postal address: State Enterprise for Maritime Agencies. P.O. Box 3, Basrah.

Cable address: Tankers Basrah. Tankers Fao.

Telex No.: 7009.

Cables for arrival should be addressed to both "Tankers" Basrah and "Tankers" Fao.

NOTICE: The Government of Iraq has made the following announcements:

Quote:

1. An Exclusion Zone has been established North of a line joining the following positions:

Lat. 29° 30′ N.	Long. 48° 30′ E.
Lat. 29° 25′ N.	Long. 49° 09′ E.
Lat. 28° 23′ N.	Long. 49° 47′ E.
Lat. 28° 23′ N.	Long. 51° 00′ E.

2. The area North of Lat. 29° 30′ N. has been declared a war zone.
3. Vessels entering waters at the head of the Gulf risk hitting mines or being attacked by vessels of the Iraqi Navy.
4. Tankers berthing at Jazireh-ye Khark Oil Port regardless of nationality may be attacked by the Iraqi Air Force.

Unquote.

THE FOLLOWING FACILITIES AND OPERATING PROCEDURES WERE AVAILABLE ON 1st SEPTEMBER, 1980.

ALBAKR TERMINAL: 29.41 N. 48.49 E. (See Plan)

LOCATION: The terminal is 31 miles S.E. of Fao in position Lat. 29° 40′ 36″ N., Long. 48° 48′ 38″ E. Depth of water 29.30 m. at MLWOST.

PILOTAGE: Pilotage is compulsory for all inward and outward tankers using the Khor al Khafja buoyed channel when the draft is over 15.85 m.

NAVIGATIONAL AIDS: 8 lighted buoys define the deep water channel at the 69 ft. (21m.) depth contours in the immediate vicinity of Albakr Terminal. The buoys are battery powered with quick flash characteristics with visibility range of 1 mile. The perimeter of Albakr Terminal is outlined with flashing marine lanterns to define a hazard to marine navigation. The lanterns are battery powered, some are white lens flash with 5 mile range and others are red lens flash with 2 mile range.

The radio tower is equipped with an aviation hazard light (red). It is also equipped with a long range marine beacon (white) located below the red hazard light.

MAX. SIZE: Max. length, 366 m. Max. draft 21 m. Night berthing possible.

TUGS: 3 available, 2 of 4,000 h.p. and 1 of 2,200 h.p.

RADIO: Tankers are requested to contact Albakr Terminal through Basrah Control Radio (YIR) at least 72 hours, 48 hours and 24 hours prior to arrival giving ETA. Prior to docking the tanker must also provide the terminal operator with information required to prepare the "loading order" format, this information should include the type of crude to be loaded, loading rate in barrels, the Registry No. of vessel, nationality, name of Master. The Master will be informed of approach instructions such as location of berth, weather and sea conditions, and the communication channel to be used for vessel docking assistance.

Vessels bound for Iraqi territorial waters should also contact Fao Radio (YIS) at least 24 hours before entering territorial waters requesting free pratique from Medical Officer Fao. The request should indicate the state of health of the crew on board together with relevent information.

Name of Station: Khor al Khafja FC(10) Albakr Terminal FP
Call Sign : Albakr Radio
Service : 24 Hours

The following table shows the details for contacting the Iraqi port coast stations. The number between brackets corresponds to the notes explained below.

Frequency	*Emission Channel*	*Class*	*Power*	*Service Nature*
156.375 MHz (6) (8)	67	F^3	0.02	OT (2) (3)
156.550 MHz (3) (5)	12	F^3	0.02	OT (2) (3)
156.80 MHz (1) (3) (4) (7) (8) (11)	16	F^3	0.02	
161.80 MHz	24	F^3	0.02	

FC	Coast Station
FP	Port Station
OT	Station open exclusively to operational traffic of the service concerned

(1) Transmits urgent Notices to Mariners
(2) Transmits meteorological bulletins (North Arabian Gulf Weather Forecast)
(3) For Navigation and harbour control services
(4) Calling and Safety frequency
(5) First priority working frequency
(6) Second priority working frequency
(7) Weather bulletins at 0630, 1430 hrs. and on request
(8) Used for marine traffic control
(10) Station under the direction of Iraq Administration
(11) Permanent watch

While in Iraqi Territorial waters, ships under way shall maintain watch on Channel 16 (156.80 MHz) and/or (461.5 kHz) to ensure immediate reception of the instructions issued by the controlling authorities.

(a) Khor Al-Khafja, Albakr Terminal Radio, maintains listening watch on Channel 16 (156.80 MHz).
(b) Pilot station (Al-Rasheed Radio YIBE maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(d) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.

Instructions:

(a) Navigation warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).

(b) North Arabian Gulf weather forecast is transmitted by:

1. Basrah Control Radio on:
   440 kHz at 0530, 1330 GMT and on request.
   6493.25 kHz at 0530 GMT and on request.
   8668 kHz at 1330 GMT and on request.
2. Khor Al Khafja, Albakr Terminal Radio, on Channel 16 (156.80 MHz) at 0530 GMT and on request.

(c) Traffic control signal on Channel 16 (156.80 MHz) and on 500 kHz by Basrah Control Radio (YIR).

(d) Traffic control signal on Channel 16 (156.80 MHz) and 500 kHz by Fao Radio (YIS).

(e) Traffic control signal on Channel 16 (156.80 MHz) by Albakr Terminal Radio.

Commercial and Public Correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 MHz) 500 kHz. 4, 6, 12 and 16 MHz. bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

BERTHING: The terminal consists of 2 loading platforms (A) and (B) each loading platform has 2 loading berths. Berth Nos. 1 and 2 of Platform "A" and Berth No. 4 of Platform "B" can accommodate tankers ranging in size from 35,000 d.w.t. to 350,000 d.w.t., Berth No. 3 of Platform "B" can accommodate tankers ranging in size between 85,000 d.w.t. and 350,000 d.w.t., Total length of structure is 975.4 m. and 106.7 m. wide at centre.

LOADING: Storage and pumping facilities on shore are connected to Albakr Terminal by 2×48 in. pipe-lines. The Terminal is capable of loading through either one of the pipe-lines at a time or both.

Capacity of each line varies between 77,000 to 89,000 b.p.h. depending on type of crude (Basrah heavy or Basrah light type). With both lines in operation at the same time loading rate can be increased to max. 141,500 b.p.h. (19,000 M.T.H.). 2 tankers can load with different types of crude at the same time. Loading facilities can be remotely controlled from the Control Room.

Loading will be stopped if any regulations are not observed and in the case of oil spillage.

Loading may be stopped in still air conditions, during severe electrical storms and/or high wind and sea conditions.

Loading Arms: For each loading berth, 3 identical 24 in.×80 ft. long Luceat DCMA loading arms, with hydraulically operated coupling fitted with adaptors to allow automatic and fast coupling to tanker manifold flanges ranging from 16 in. to 24 in. (spools for 10 in., 12 in. or 14 in. to 16 in. are available at the terminal if required).

Gangway: A power operated telescopic personnel gangway is provided at each berth. These gangways can withstand 500 lb. load at mid-span in the extended position.

Meters: 16 in. A. O. Smith positive displacement meters, 16 meters for each platform, capacity of each meter 12,500 b.p.h.

Meter Prover: One 24 in. triple "U" bi-directional mechanical displacement meter prover for each platform. The occurence of each prover is decided bi-yearly utilizing certified volume tanks.

Continuous Crude Oil Gravity Analyzer: There is a number of ARCCO Anulus Model 1-F10 50X liquid gravity analyzers on each loading platform capable of detecting API gravity from 45° to 15°, the output from these analyzers are displayed on the appropriate loading formats and is recorded on charts in the Control Room.

These gravity analysers are to be checked constantly and re-calibrated bi-yearly according to the manufacturer's recommendations.

A responsible member of the crew must be in contact with the terminal officials at all times.

READINESS: Notice of Readiness will be received by INOC representative provided the vessel is ready to load. Lay time will commence 6 hours after receipt of Notice of Readiness berth or no berth.

SAFETY PRECAUTIONS: On arrival at the terminal, INOC Representative will discuss with the Master the "Safety Requirements" letter addressed to him also the Safety Check List.

Attention is also drawn to the Tanker Safety Guide published by the International Chamber of Shipping and to the International Oil Tanker Terminal Safety Guide.

SHIP DOCKING ASSISTANCE SYSTEM: 1 unit for each berth, consisting of speed of approach measuring instrument with fixed wide and narrow beam R.F. heads, a data processor and visual display units when the vessel is within 2 miles of Albakr Terminal. The rotatable R.F. head which is nearest to the vessel shall be aimed at it, during the docking the system will display approaching vessel's velocity.

FRESH WATER: Can be made available by Ports Administration after 24 hours notice from tankers. Water supply is from barges or small water tankers. Notice to be through Agent.

FUEL: May be made available after 72 hours notice through Agent. Supply is direct from small bunker tanker or barges. Bunkering however, not allowed while tanker is on berth and it is allowed only when tanker is waiting for berth or after completion of loading and unberthing.

SHORE LEAVE: Not allowed.

LIGHT DUES: The Iraqi Ports Administration will collect any light dues payable including those due to the Middle East Navigation Aid Service.

REGULATIONS:

(a) Mooring.

"All vessels after arrival, having been moored to the satisfaction of the Harbour Master, shall tend their own anchor cables, ropes, lines and hawsers. It is important for tankers to tend their mooring frequently".

(b) Ship must be ready to move under its own power.

While in berth, ships must be ready to move under their own power in the event of their breaking adrift, catching fire or any other emergency. No repairs are to be carried out while in the berth, which would immobilise the ship or impair her firefighting efficiency.

(c) Cleaning of Boiler Tubes.

Cleaning of boiler tubes alongside the Island Terminal is forbidden.

POLLUTION: No dirty ballast. No oily water or other refuse to be discharged overboard.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master delivered to the representative of the terminal to this effect.

Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

Vessels are subject to heavy fines and liabilities for claims arising.

AUTHORITY: All approaches to Albakr Terminal and Khor al Khafja are controlled by the Iraqi Ports Administration.

Cable MAWANI - BASRAH Telex 7008 Ports

Attention is drawn to port rules and bye laws 1942, Quarantine Regulation No. 28 of 1963 and schedules of dues and charges.

The terminal is the property of Iraq National Oil Company (INOC) and is administered and controlled by the said company to facilitate the loading of tankers with Crude Oil.

Cable Address INOC (Basrah) - PETROLNA BASRAH
INOC (Baghdad) - PETROLNA BAGHDAD

Telex No. INOC (Basrah) - 7003
INOC (Baghdad) - 2204/2295

The sole Agent for all vessels visiting Iraqi ports is The State Enterprise for Maritime Agencies. All requests for services to tankers should be directed to the Agent.

See "General" before first port.

BASRAH (Maqal and Umm Qasr): 30.31 N. 47.50 E.

DOCUMENTS: On arrival at pilot station vessel requires following: Ship's Register, letter from Owner confirming that vessel has not called at an Israeli port, all Health Certificates of Crew must be valid against cholera, 2 copies Crew List, 2 copies Provision List, 2 copies Manifest, Freight manifest for Baghdad Rail cargo, Breakdown list and Stowage Plan, Dangerous cargo and heavy lift list (if any).

PILOTAGE: Compulsory. Owners having vessels bound for Basrah should contact Iraqi Maritime Transport Co. Ltd., Basrah, cables "Bawakhir Basrah" to arrange Shatt-al-Arab Pilotage. Owners should also put Iraqi Maritime Transport in funds by remittance well in advance of vessel reaching Outer Bar of Shatt-al-Arab in order to cover port tonnage dues, pilotage and dredging dues, for sailing from Outer Bar to Basrah and return.

The pilot boat is located usually in position Lat. 29° 45′ 15″ N., Long. 48° 50′ 45″ E. and on arrival vessel should contact pilot boat immediately for instructions. Pilots are available for vessels proceeding to Abadan and Khorramshahr (in Iran) and Basrah (Maqal and Umm Qasr). Providing Master has given Agent 48 hours notice of vessel's ETA Pilot will board immediately providing tide is suitable to allow vessel to continue to destination. Master should use call sign YIR on 500 kHz for Basrah Radio in order to pass messages to Agent. Vessel should listen for messages on 440 kHz from YIR or use VHF on Channels 14 and 12. On boarding the River Pilot will hand Master various forms for completion in respect of Light Dues and River Pilotage. Master to hoist the Iraqi National Flag.

The pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

The Navigation of the Shatt-al-Arab River is under the jurisdiction of the Iraqi Ports Administration which takes in the approaches to Abadan and Khorramshahr in Iran.

MAX. SIZE: For vessels proceeding to Basrah the max. LOA allowed by the Iraqi Ports Administration is 560 ft. There is no restriction on the breadth. The max. draft in fresh water for vessels to and from Basrah is 29 ft. (In April 1980 we received a report stating that the maximum draft was 22 ft. 4 in.). The max. LOA for Umm Qasr is 580 ft.

ANCHORAGES: On arrival off the pilot boat vessel can anchor with no depth restriction. On entering the Shatt-al-Arab River the following are the recognised anchorages:

Kasba Anchorage, position about 2 miles above Fao with a max. depth of 35 ft. fresh water.

Bawarda Anchorage, position about 2 miles below Abadan with a max. depth of 31 ft. in fresh water.

Hartha Point, position about 6 miles above Abadan with a max. depth of 35 ft. in fresh water. Hartha Point is the anchorage to enable vessels to lighten to 29 ft. in fresh water to enable them to cross the Karun Bar.

Abu Flus, position about 12 miles above Hartha Point with a max. depth of 29 ft. in fresh water.

Khora Anchorage, position about 3 miles from Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

Jubailah Anchorage, position at Basrah Silo about 0.5 below Basrah Wharves (Maqal) with a max. depth of 29 ft. in fresh water.

The maximum length between perpendiculars permitted by the Iraqi Ports Administration for vessels in the Shatt-al-Arab River is 560 ft.

RESTRICTIONS: The Iraqi Ports Administration issue a booklet of Tide Tables each year and the movements of vessels in and out of the Shatt-al-Arab River are restricted to the high water tables for vessels using Basrah and Khorramshahr. Movements to and from these ports are only permitted in the hours of daylight. The max. draft for a vessel proceeding to Basrah is 29 ft. in fresh water. If vessel's draft exceeds this lightening takes place at Umm Qasr. Although the draft obtainable alongside the wharves is 31 ft. the max. draft for moving in the river is 29 ft. on account of the restriction at the Karun Bar.

HEALTH: Masters are requested to call the Chief Medical Officer at Fao on 500 kHz, call sign "YIS", requesting Free Pratique 24 hours before vessel's arrival at pilot station. All crew Vaccination Certificates should be valid and available for Medical Officer's arrival on board. He will also expect to find a valid Derat Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine. Special precautions are taken in case of a vessel arriving direct from an epidemic area and even if the crew are holding valid inoculation certificates the vessel may be delayed at the pilot station. The Iraq Government is very sensitive about the spread of cholera. Derat Certificate renewable at Basrah.

RADIO: When a vessel is 3 days away from Basrah, radio contact can be established with Basrah Radio, call sign YIR on HF 4, 6, 8, 12 and 16 kHz bands. When the vessel is within 3 days of arrival, Basrah Control Radio (YIR) can be used (transmitting on 500 kHz and receiving on 461.5 or 440 kHz).

List of Coast Stations (Iraq): Summary of Procedures:

1. Whilst inside Iraq territorial waters, ships under way will maintain watch on Channel 16 (156.80 MHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.

(a) Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 MHz).
(b) Pilot Station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(c) Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(d) Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 MHz) and 461.5 kHz.
(e) Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
(f) Umm Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.

II. Special Instructions:

(a) Navigational Warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
(b) North Gulf Weather Forecast is transmitted by:
  1. Basrah Control Radio on:
  440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs. GMT and on request. 8668 kHz at 1330 hrs. GMT and on request.
  2. Khor Al-Amaya Radio on Channel 16 (156.80 MHz) at 0530, 1330 hrs. GMT and on request.
(c) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Basrah Control Radio (YIR).
(d) Traffic Control Signals on Channel 16 (156.80 MHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
(e) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Fao Radio (YIS).
(f) Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Umm-Qasr Radio (YIU).
(g) Traffic Control Signals on Channel 16 (156.80 MHz) by Khor Al-Amaya Radio.

III. Commercial and public correspondence: Call Basrah Radio (YIR) on Channel 16 (156.80 MHz), 500 kHz, 4, 6, 8, 12 and 16 MHz bands and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Basrah Radio follows the following time-table:

Hours	*Listen on*	*Answers on*	*Traffic Lists*
H24	500	440, 461.5	–
0400–0600	6265.5–6280.5	6493.25	0505
0600–0800	16708–16748	16968	0705
0800–1000	8354– 8374	8668	0905
1000–1200	16708–16748	16968	1105
1200–1400	8554– 8374	8668	1305
1400–1600	12531–12561	12986.5	1505
1600–1800	4177– 4187	4356.5	1705

VHF: Port radar service. VHF can be used to call the Iraqi Port Administration at Basrah on Channel 16.

TUGS: River and sea-going tugs are available. Tug-boat services are offered as and when deemed necessary by port Pilot or Harbour Master, and are available at all times during day and night.

BERTHING: See "Restrictions". All berthing of vessels at Basrah is done during daylight hours only and according to suitable tide. The Harbour Master joins vessel on her arrival at Khora Anchorage which lies about 2 miles from the Maqal Wharves. In the case of Umm Qasr the Harbour Master joins vessel on arrival off the wharves.

Height of pier (quay) at berthing places above mean low water:

(a) Maqal – Plus 12.5 ft. above zero port datum. Port datum is 3.96 ft. above mean zero level at Fao.

(b) Umm Qasr – 24.65 ft. above lowest water of spring tide which is referred to as Umm Qasr Port datum.

Difference between high and low water:

(a) Maqal: A daily variation of 5 ft. between tides and max. of 8 ft.

(b) Umm Qasr: An average of 12 ft. between tides, and max. of 17 ft.

Maqal (Ma'gal): Wharves have continuous frontage of 2,000 m. depth alongside 9.15 m. Max. length of vessel, 171 m., berthing for 12 vessels.

Umm Qasr: The port is situated at the South end of the Khor Zubair, where it joins the Khor Abdullah. The sea approach to Umm Qasr is some 103 km. in length along the Khor Abdullah, commencing in deep waters of the Gulf near the mouth of the Shatt-al-Arab.

A navigation channel the lowest part of which is 9 m. at LLW and of ample width is well marked with beacons and light buoys from the Shatt-el-Arab entrance pilot vessel to Umm Qasr. Loaded vessels with a draft of 9.75 m. will be able to sail on 2 tides each day to and from Umm Qasr. Pilot and Harbour Master services are compulsory.

The wharves are of reinforced concrete with a continuous frontage of 640 m. and depth of 9.75 m. at LLW. They are able to accommodate 3 cargo ships at one time. Each berth is 183 m. long. The wharves are provided with a total of 10 electric shore cranes from 3-15 tons capacity. In addition there is a 100 ton floating crane, 2 sea-going tugs and an ample number of mobile cranes, forklifts, eel trucks, tractors, trailers, etc. The Umm Qasr wharves are directly connected with roads and railway lines of the Iraqi Republican Railways.

There are also 2 mooring buoys 247 m. apart.

Fresh water available directly from mains on wharves.

A new project for building more berths is in hand. 5 of these berths are under construction.

3 new steel jetties at Abu Flus directly North of the Fertilizer jetty have been completed. These jetties are served by 6 electric shore cranes of 5 tons capacity. Vessels up to 171 m. long and 8.84 m. draft can lie alongside.

Grain Silo: Capacity 65,000 tons, loading capacity into ship's holds, 1,050 t.p.h. jetty 213 m. long, available for berthing ships up to 183 m. long with a draft of 8.84 m. for loading and unloading of grain.

Muftiyah Jetties: One wooden jetty with limited length owned by Port Authority for distribution of oil products and for the purpose of handling crude and refined oil for local consumption, also for exporting oil products outside Iraq. Also a further new concrete jetty available for berthing vessels 175 m.

Fertilizer Wharf: A modern concrete wharf situated on the banks of Shatt-al-Arab river at Abu Flus with a total length of 100 m., width 10 m., can accept vessels with length 182 m. and draft 8.84 m. It is allocated for the exportation of fertilizers by the State Co. for Fertilizers.

Mooring Buoys: There are also 13 mooring buoys, 7 at Ashar, 4 at Sunger and 2 at Abu Al Khasib, 220 m. apart.

CRANES: The wharves are served with 60 electric shore cranes from 1.5 tons to 15 tons capacity and 1 electric shore crane of 60 tons capacity, in addition there are 2 floating cranes one of which is 100 tons capacity capable of lifting direct from ships to railway trucks on the wharves, and the other of 20 tons capacity capable of lifting cargo at a distance of 30 m. from the centre of the jib. Also about 200 pieces of various type of mechanical and electrical handling equipment.

BRIDGES: There are no bridges across the river from the entrance to Basrah Wharves (a distance of about 80 miles).

STEVEDORING: Information of the numbers of gangs required on board on vessel's arrival should be passed to the Agent together with vessel's ETA through Basrah Radio. The average rate of discharge of general cargo at Basrah (Maqal and Umm Qasr) is 6 tons per ganghour per 16 hour day. Contractors will place labour on board to discharge or load cargo but at the risk of the vessel as a Contractor will not accept any responsibility for damage done by labour.

Unloading of vessels basically carried out from vessels to wharves by Port cranes or ships' derricks. Heavy lifts and some dangerous cargoes are discharged overside into barges. Loading from jetty is by crane directly into ships. Loading at midstream is by lighters.

Bulk Cargoes: Discharged by grab direct to the Dock at Umm Qasr and by suction to the silo at Basrah. The equipment at Basrah is rated at 2,500 L/tons per day discharge and 5,000 L/tons per day loading, but under favourable conditions discharge rate may exceed 3,000 L/tons per day.

MEDICAL: For a vessel in to Basrah (Maqal and Umm Qasr) no advance notice is required, in order to obtain medical attention. Hospital facilities available at the new port hospital and other local hospitals.

For arrival at Basrah it is necessary to hold valid cholera certificate.

TANKERS: See "Khor-al-Amaya".

FRESH WATER: Fresh water is available at the wharves at Maqal and Umm Qasr but where a vessel is moored in midstream and requests water there is the additional charge for the hire of the water tanker.

FUEL: Only 1 grade of fuel oil available from the Basrah Refinery, a fuel oil viscosity 200 to 210 Red. No. 1, SG 0.920. Diesel oil also available.

Fuelling is direct if taken alongside Muftiyah Refinery jetties, otherwise by barge. No coal bunkers available.

GANGWAY/DECK WATCHMEN: It is recommended that vessels moored or anchored in the river employ Gangway/Deck Watchmen.

OPENING/CLOSING HATCHES: This work is normally done by crew, but if the labour on board are asked to do it they should be supervised by an Officer.

CUSTOMS ALLOWANCES: (Tobacco) The Ship's Bond is sealed on arrival but prior to the sealing each member of the crew can have 200 cigarettes. The Bond will be opened by the Customs on the request of the Master at any time during vessel's stay in Basrah. (Wine and/or Spirit). Each crew member is permitted to have 1 litre out of Bond. On sailing from Basrah the Master is required to wait till vessel has cleared the Shatt-ai-Arab River before opening the Bond. This does not apply when vessel calls at Khorramshahr or Abadan on the way down river.

IDENTIFICATION CARDS: All crew members are required to carry with them some form of identification when going on shore.

CONSULS:

Belgium	Tel: 3666	Portugal	Tel: 4469
Denmark	„ 3205	Saudi Arabia	„ 3219
Greece	„ 3601	Sweden	„ 3511
India	„ 4824	United Kingdom	„ 4251
Kuwait	„ 2235	U.S.A.	„ 4231
Norway	„ 3511	U.S.S.R.	„ 5410
Pakistan	„ 3598		

REPAIRS: All types of repairs except major engine repairs can be carried out.

DRY DOCKS: Floating dock available, capacity 4,000 tons. Also slipway, capacity 700 tons.

REPATRIATION: No difficulties in arranging the repatriation of crews from Basrah. Emergency visas are easily obtained for joining and departing crews.

AIRPORT: The Basrah Airport formerly an International Airport is now used only as a domestic airport and is situated about 2 miles from the Maqal Wharves but 50 miles from Umm Qasr. There is a daily flight to Baghdad to connect with International flights, also 3 flights per week to Kuwait to connect with International flights.

TIME: Iraq time is 3 hours ahead of GMT and there are no alterations made to clocks during the year.

HOLIDAYS: The official holiday of the week in Iraq is Friday. The other holidays are: 3 days Id-el-Fitr; 4 days Id-el-Adha; Al Hijaa; Ashura; Birth of the Prophet Mohammad; New Year 1st January; Army Day, 6th January; 8th February; 21st March; 1st May Labour Day; 14th July; 17th July.

POLICE/AMBULANCE/FIRE: A call to 7601 or 7606 will connect to the department required.

TELEPHONES: Telephone is placed on board a vessel as soon as secured alongside wharf.

GENERAL: The rain season in Basrah is between November and April and during the Summer months from May to October the temperature can be as high as 55° C. It is important that crew members keep the backs of their necks covered whilst working on deck during the heat of the Summer. The use of salt tablets are recommended during the heat of the Summer.

SPECIAL SERVICES: There is a laundry service available.

SHORE LEAVE: There is no restriction on crew members going on shore but it is important that they carry a form of identification.

REGULATIONS: The Port Authority have requested that no photography takes place from the ship whilst passing naval or military installations.

DELAYS: As the port of Basrah is considered very well equipped, cargo vessels usually receive a very quick despatch and it is very seldom that a vessel experiences waiting time for a berth for discharging, loading or bunkering. All discharge takes place at the wharves and all loading takes place in midstream at mooring buoys. Where a vessel can load whilst discharging, this is permitted.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

AGENT: The business of Shipping Agencies relating to all ships calling at Iraqi Ports is entrusted solely and exclusively to State Enterprise for Maritime Agencies, P.O. Box 3, Basrah.

General Cargo: Cable address: Maragent. Telex No. 7009.

Tankers: Cable address: Tankers. Telex No.: 7009.

FAO: 29.58 N. 48.29 E.

DOCUMENTS: On arrival at pilot station, vessel requires the following:

Ship's Register.

Letter from Owner confirming that vessel has not called at Israeli Port.

Health Certificates of Crew must be valid against cholera.

2 copies Crew List.

2 copies Provision List.

2 copies Manifest.

Dangerous Cargo List, if any.

PILOTAGE: The pilot boat is located in position Lat. 29° 46′ 45″ N., Long. 49° 48′ 37″ E., and on arrival vessel should contact Pilot boat immediately for instruction. VHF Channels 14 and 12. Provided Master has given Agent 48 hours' notice of vessel's ETA, Pilot will board immediately. The pilot boat is called *Al Rasheed* and on both sides amidships the word "Pilot" is painted in white.

ANCHORAGE: On arrival of the pilot boat vessel can anchor with no depth restriction.

MAX. SIZE: *Tankers:* 675 ft. LOA. Vessels may load to a max. draft of 35 ft. (10.65 m.) depending on the tidal conditions at the time, otherwise to a draft suitable to cross the bar with safety.

HEALTH: Masters are requested to call the Port Medical Officer at Fao on 500 kHz, call sign "YIS4", requesting Free Pratique between 8 and 12 hours before vessel's arrival. All crew vaccination certificates should be valid and available for the medical officer's arrival on board. He will also expect to find a valid Derat Exemption Certificate on board. Anyone boarding the vessel ahead of the Medical Officer whilst the "Q" Flag is still hoisted is liable to a fine.

Special precautions are taken in the case of a vessel arriving from an epidemic area and even if the crew are holding valid vaccination certificates the vessel may be delayed at the pilot station. The Republic of Iraq is very sensitive about the spread of cholera.

RADIO: Basrah Radio, call sign "YIR" on high frequencies 4, 6, 8, 12 and 16 bands. Fao Radio, call sign "YIS", traffic control signals on Channel 16, and 500 kHz. Also see Khor-al-Amaya.

Tankers should establish contact with Iraqi National Oil Co. 48 hours before arrival. Call sign RNT. Frequency 6493 kHz.

TUGS: Available on request.

BERTHING: There are 4 loading jetties with a depth of 10.95 m. alongside at LWST. Each jetty has one 60 cm. crude oil delivery line with four 25 cm. flexible hoses. Jetties are floodlit and fitted with fire monitors and four 3 ton SWL cranes. Lengths of berth, 205.75 m. each. Max. draft 10.65 m. Night berthing possible. Loading rates Nos. 2 and 4 jetties average 4,000 t.p.h.

FRESH WATER: Available, rate approximately 10 t.p.h.

REPAIRS: Minor repairs possible.

MEDICAL: No advance notice is required in order to obtain medical attention. Medical units are present at Fao, Umm Qasr and Maqal. A modern hospital containing all the essential units is found at Maqal. Crew in need of special attention or admission may be referred to it by the medical units.

TIME: 3 hours ahead of GMT.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

KHOR-AL-AMAYA: 29.47 N. 48.49 E.

OPERATORS: Basrah Petroleum Company Limited.

LOCATION: Island Terminal about 17 miles out in the Gulf from the mouth of the Shatt-al-Arab River.

ADMINISTRATION: All waters of the Shatt-al-Arab and of the approaches to Khor-al-Amaya are controlled by the Iraqi Ports Administration.

APPROACHES: *(a) Lights.* One white all-round navigation light has been fitted to the top of the radio mast on the centre piled structure at a height of 153 ft. above MHWS. Character: flashing every 5 seconds, visible for 18 miles: candlepower 7,400.

Red lights are fitted at the 4 extreme corners of the structure which is 1,300 ft. long. Character: fixed red visible 2 miles.

Additionally there are several aircraft warning lights (red) on various parts of the structure marking the upper extremities of towers and other erections including the central radio tower.

The channel between the entrance to the Shatt-al-Arab and the Khor-al-Amaya Sea Island Oil Terminal is marked by buoys and the Shatt-al-Arab Light Vessel (refer to relevant notices issued by the Iraqi Ports Administration, M.E.N.A.S., and Admiralty Notices to Mariners).

(b) Tides. High water at the Terminal may be expected to occur about 20 minutes before high water at the Shatt-al-Arab, Outer Bar. This may vary due to local meteorological and spate conditions. Tidal streams in the vicinity are rotatory and are not likely to exceed 2 knots. The maximum streams are generally along the berthing faces of the Terminal, but at certain states of the tide, cross sets, at right angles to the berthing faces, may be experienced. These are unlikely to exceed 0.75 knots.

DOCUMENTS:

Crew List (5 copies).
Store List (2 copies).

PILOTAGE: Compulsory. Masters of vessels bound for Khor-al-Amaya Terminal should contact the Pilot vessel which cruises in an area about 2 miles S.E. of the Terminal. They will receive instructions as to whether to lie off, anchor or proceed towards the Harbour Master's launch.

(a) All vessels using Khor-al-Amaya buoyed channel are reminded that loaded tankers outward bound from Khor-al-Amaya Terminal have top priority in navigating the buoyed channel and all other vessels are to keep clear in all cases.

(b) All inward-bound vessels are to contact Khor-al-Amaya Harbour Master on VHF Channels 16 and 14 before entering Khor-al-Amaya channel for information regarding deeply laden tankers using the restricted channel, and for berthing and anchoring instructions.

(c) Pilotage is compulsory for all inward and outward bound tankers using the Khor-al-Amaya buoyed channel when the draft of the tanker is 15.85 m. (52 ft.) or over.

(d) Tankers arriving to load at Khor-al-Amaya with draft in excess of 15.85 m. (52 ft.) must give their ETA at Shatt-al-Arab Light-vessel at least 12 hours in advance by contacting the Pilot station or Khor-al-Amaya Terminal.

ANCHORAGES: Anchorage areas have been established bounded by lines joining the following positions:

(a) *Anchorage "A"*
- (i) Lat. 29° 32′ 08″ N., Long. 48° 58′ 59″ E.
- (ii) Lat. 29° 31′ 24″ N., Long. 48° 58′ 06″ E.
- (iii) Lat. 29° 32′ 53″ N., Long. 48° 56′ 56″ E.
- (iv) Lat. 29° 33′ 14″ N., Long. 48° 57′ 20″ E.

(b) *Anchorage "B"*
- (i) Lat. 29° 44′ 03″ N., Long. 48° 49′ 34″ E.
- (ii) Lat. 29° 43′ 52″ N., Long. 48° 49′ 12″ E.
- (iii) Lat. 29° 42′ 08″ N., Long. 48° 50′ 18″ E.
- (iv) Lat. 29° 42′ 21″ N., Long. 48° 50′ 45″ E.

(c) *Anchorage "C"*
- (i) Lat. 29° 45′ 39″ N., Long. 48° 48′ 41″ E.
- (ii) Lat. 29° 44′ 28″ N., Long. 48° 47′ 38″ E.
- (iii) Lat. 29° 44′ 06″ N., Long. 48° 49′ 31″ E.
- (iv) Lat. 29° 43′ 35″ N., Long. 48° 48′ 28″ E.

(d) *Temporary Lightering Anchorage*
- (i) Lat. 29° 46′ 00″ N., Long. 48° 48′ 28″ E.
- (ii) Lat. 29° 45′ 40″ N., Long. 48° 48′ 39″ E.
- (iii) Lat. 29° 45′ 34″ N., Long. 48° 46′ 35″ E.
- (iv) Lat. 29° 44′ 06″ N., Long. 48° 47′ 18″ E.

Note:
- (i) Anchorages "A" and "B" are for deep-draft vessels of 12.19 m. (40 ft.) and upwards.
- (ii) Anchorage "C" is to be used by tankers (laden or in ballast) whose draft does not exceed 12.19 m. (40 ft.).
- (iii) The temporary lightering anchorage is for the exclusive use of lighters. No other ships or vessels are to anchor within this area.

MAX. SIZE: 330,000 d.w.t. loading part cargo. Max. LOA: 1,200 ft. Max. draft 69 ft.

HEALTH: Quarantine Officer boards after berthing. Vaccination Certificates required.

RADIO: Procedure for contacting Basrah Petroleum Company. Vessels are requested to establish contact with Basrah Petroleum Company Limited, Basrah, 48 hours prior to arrival, and to re-establish contact 48 hours after departure. Telegraphic Address: (Baspetco Basrah), (Baspetco Fao). Position: Lat. 30° 35′ 36″ N., Long. 47° 48′ 32″ E. Call sign "HNT" (FC). (a) Transmission 8,582 kHz. (b) Reception, tankers call on 8,356 – 8,374 and work on 8,374 – 8,457.5 kHz. Periods 0400 – 0430 hrs., 0800 – 0830 hrs., 1200 – 1230 hrs., 1600 – 1630 hrs. All times GMT. Services: C.V. Class of Operation: C.W. Class of Emission: A1.

Vessels should indicate their date and time of arrival, quantity of cargo required and whether in a state to receive cargo. In the event of vessels being unable to establish direct wireless contact with Basrah Petroleum Company Radio Station, messages should be passed through the Iraqi Ports Administration.

Procedure for Contacting Iraqi Ports Coast Stations

1. Summary of Procedure. Whilst inside Iraqi territorial waters, ships under way will maintain watch on Channel 16 (156.80 MHz) and/or 461.5 kHz to ensure immediate reception of instructions issued by the controlling authorities.
- *(a)* Khor Al-Amaya Radio maintains listening watch on Channel 16 (156.80 MHz).
- *(b)* Pilot station (Al-Rasheed Radio YIBE) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(c)* Fao Radio (YIS) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(d)* Al-Wasiliyah Radio (YIT) maintains listening watch on Channel 16 (156.80 MHz) and 461.5 kHz.
- *(e)* Basrah Control Radio (YIR) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.
- *(f)* Umm-Qasr Radio (YIU) maintains listening watch on Channel 16 (156.80 MHz) and 500 kHz.

II. Special Instructions.
- *(a)* Navigational warnings are transmitted on 500 kHz by Basrah Control Radio (YIR).
- *(b)* North Gulf weather forecast is transmitted by: 1. Basrah Control Radio on: 440 kHz at 0530, 1330 hrs. GMT and on request. 6493.25 kHz at 0530 hrs., GMT and on request. 8668 kHz at 1330 hrs., GMT and on request. 2. Khor-al-Amaya Radio on Channel 16 (156.80 MHz) at 0530, 1330 hrs. GMT and on request.
- *(c)* Traffic Control Signals on Channel 16 (156.80 MHz) and on 500 kHz by Basrah Control Radio (YIR).
- *(d)* Traffic Control Signals on Channel 16 (156.80 MHz) and 461.5 kHz by Al-Wasiliyah Radio (YIT).
- *(e)* Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Fao radio (YIS).
- *(f)* Traffic Control Signals on Channel 16 (156.80 MHz) and 500 kHz by Umm-Qasr Radio (YIU).
- *(g)* Traffic Control Signals on Channel 16 (156.80 MHz) by Khor-al-Amaya Radio.

III. Commercial and Public Correspondence. Call Basrah Radio (YIR) on Channel 16 (156.80 MHz), 500 kHz, 4, 6, 8, 12 and 16 MHz bands, and after initial contact has been established change to one of the working frequencies as instructed to pass messages.

Frequencies instruction to pass messages time table 1200 – 1400 hrs. listen on 8354 – 8374 answer on 8668 traffic lists 1305.

Note: All messages are changeable except those concerning navigational aids, distress, pratique and medical advice messages.

TUGS: 3 tugs of 4,000 b.h.p. are available to assist in berthing and unberthing.

BERTHING: The Terminal consists of a piled structure, in 22 m. of water, having 1 tanker berth on one side and 2 berths on the other side with suitable mooring dolphins and platforms ahead and astern which are connected by cat-walks. The orientation is 320°/140°. The max. loading rate, with only 1 berth in use, is 9,000 t.p.h.; with 2 berths in use the max. loading rate at each is 4,500 t.p.h. Fire-fighting towers are provided, also a helicopter platform. Loading by "Woodfield" flow booms offering 4×16 in. and 2 or 4, 12 in. hoses. Vessels of the order of 120,000 d.w.t. can be accepted at berths 5 and 6 and 330,000 d.w.t. max. draft 21 m. at berth No. 7.

The S.G. and A.P.I. and temperature of the crude oil will be supplied to the Master on radio request.

Berthing of tankers: MENAS NOTICE No. 114/74.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth or unberth at the existing Wharf No. 7 in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at Wharf No. 7 and in the S.E. Direction.

No tanker of draft exceeding 17.68 m. (58 ft.) shall be permitted to berth at the proposed Wharf No. 8 and in the N.W. Direction.

No tanker of draft exceeding 17.00 m. (56 ft.) shall be permitted to berth at the proposed wharf No. 8 and in the S.E. Direction.

MEDICAL: An Iraqi Ports Administration Medical Dresser will always be available to attend to quarantine matters, derat certificates, etc. A doctor can be made available, through vessel's Agent, upon prior request, but necessary to give 24 hours notice to arrange.

FRESH WATER: Available with 24 hours notice.

FUEL: Not available ex-wharf.

CUSTOMS ALLOWANCES: During vessel's stay at Terminal, 1 carton of cigarettes only allowed to each crew member.

SAFETY REGULATIONS: Safety regulations and fire fighting procedures will be discussed with the Master on arrival.

GANGWAYS: Ships must supply their own gangways when alongside. Accommodation ladders and other ship side ladders are not suitable.

REPAIRS: Basrah Petroleum Company has no facilities to undertake ship repair work of any description.

AGENCY: Masters of tankers should contact the Agent through Basrah Radio Station prior to arrival. Agent's representatives are not housed on the island. Ship's documents for port clearance purposes are passed by them to the Agent for action. Stores and provisions will be sent out by the Agent, given sufficient prior notice.

See "General" before first port.

AUTHORITY: President, State Organisation of Iraqi Ports, Basrah.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Ireland

BANTRY BAY: 51.41 N. 09.27 W. (See Plan)

DOCUMENTS:
1 Crew List.
1 Stores List.
1 Crew Declaration.
1 Maritime Health Declaration.
Ship's Register (tonnage).
British Light Dues (receipts).
Clearance from Last Port.

APPROACHES: The approaches to the Bay are marked by the Sheep Head Light, visible 18 miles, Roancarrig More Light, visible 12 miles, and Whiddy Island Light, visible 3 miles.

Buoy No. 9 is now the only buoy on station.

PILOTAGE: Pilotage compulsory for tankers. Not compulsory for other vessels. Pilot launch available for tankers through VHF at Oil Terminal Control. Pilot launch available for other vessels if requested through Valentia Radio to their local agents at Bantry. First time users of the port are advised to use a Pilot or at least not to attempt a night entrance without one. Pilots disembark when and where requested. Contact with Pilot launch is through VHF radio. Tankers using the Oil Terminal should send ETAs to their appointed agents and also to the Oil Terminal, Bantry. Cargo vessels using Bantry Inner Harbour/Pier should send ETAs to their local Agents.

Request for Pilots may be made to Murphy and O'Connor. Tel: 027-50001. Telex: 75870. FAX: 027-50024.

ANCHORAGE: For smaller vessels, the East end of Whiddy Island (10 fathoms) and Bantry Harbour (25 ft. depth).

MAX. SIZE:
(a) Bantry Harbour – draft not more than 25 ft.
(b) Bantry Pier – 150 ft. length with draft 12 ft.
(c) Oil Terminal – Operations suspended pending repairs.

HEALTH: All vessels must exhibit quarantine signals until quarantine formalities completed or Free Pratique granted. By day, International Code Flag "Q"; by night, red light over white light.

No person other than Pilot is allowed to board any vessel either alongside jetty or at anchorage until pratique has been granted. Pilot to be informed when any suspected disease or fever on board.

RADIO: Messages and ETAs through Valentia Radio, Land's End or any UK station.

VHF: A 24-hour VHF service is maintained at Oil Terminal Control, operating on Channels 16, 14 and 11. This service is normally for use by tankers using the Oil jetty, but may also be used by ships using Bantry Inner Harbour and Pier.

Note: The Oil jetty is out of commission as the result of an explosion in January 1979.

BERTHING: Berthing at Bantry Pier depends on size of vessel and state of tide.

Ascon Jetty: Located on South side of Oil Terminal, this berth can accommodate small vessels up to 200 ft. in length and a max. draft of 17 ft.

A 6 in. manifold loading/discharge is situated midway along this jetty for small diesel tankers and mobile cranes can be provided for small vessels discharging cargo for the Terminal.

OIL TERMINAL: (The Terminal was damaged by a disaster in January 1979 – it is non-operational at the moment, the only navigational buoy still on station is, the West Ground, No. 9). The sea island is still standing and is 1,600 ft. in length and situated approx. 1,300 ft. offshore. The island jetty is comprised of a centre platform and mooring dolphins.

STEVEDORES: Available; 24 hour advance notice to Agent required.
Stevedores: Murphy and O'Connor Ltd., Bantry. Tel: 027-50001. Telex: 75870.

MEDICAL: Medical attention is available on arrival and in an emergency on a 24 hour basis. Vessels should give instructions regarding medical attention through Agents who will make the necessary arrangements for emergency medical attention either on board or at Bantry Pier.

FRESH WATER: Available at Bantry Pier.

FUEL: Gas oil and fuel available at Bantry Pier in road tenders of 20 tons.

REPAIRS: Local repair firms can undertake limited repairs, but nearest dockyard available for major repairs is at Cork.

SURVEYORS: Ship's surveyors available subject to 24 hours notice through Agent.

DENSITY: 1025.

CUSTOMS ALLOWANCES: Tobacco: Depending on stay in port. Approximately 80 to 100 cigarettes per man for 2 to 3 days. Wine and/or Spirits: half litre per man.

IDENTIFICATION CARDS: Required.

REPATRIATION: There are facilities for crew repatriation.

CONSULS: Spanish Consul (Murphy and O'Connor Ltd.). Tel: 027-50001.

AIRPORT: Situated 48 miles away at Cork. Frequent International flights.

TIME: GMT plus 1 hour during Summer months. GMT from October to March.

HOLIDAYS: Cargo work can be carried out on most holidays, except Christmas.

POLICE/AMBULANCE/FIRE: Dial 999.

EMERGENCY CO-ORDINATION CENTRE: Marine Co-Ordination Service Shannon Airport – Tel: 061-61969 and 61219.

TELEPHONES: No arrangements for placing telephones on board.

SHORE LEAVE: Permitted.

BANKS: Allied Irish Bank. Tel: 027-50008.
Bank of Ireland. Tel: 027-50377.

SERVICES: Vessels requiring any of the following services should advise Agent prior to arrival, giving fullest possible details.
Divers: Services of divers available to vessels for inspection and freeing fouled propellers.
Provisions: Normal supplies of most categories available. Ample time should be given to ship chandler.
Laundry: Large amounts sent to Cork (24 hrs. return service), but rather expensive.
Storing: Vessels can be stored by truck at Bantry Bay.

GENERAL: All vessels required to fly Irish Ensign on foremast during daylight hours. Irish territorial waters extend 12 miles seaward from mainland.

AUTHORITY: Bantry Bay Harbour Commissioners, c/o Cork County Council, Wolfe Tone Square, Bantry, Co. Cork. *Tel:* 027-50058. *Contact:* Hon. Secretary.

CASTLETOWNBERE: 51.41 N. 09.54 W. (See Plan)

LOCATION: See Admiralty Chart No. 1840 (plan insert) "Bantry Bay Blackballhead/Shot Head".

Castletownbere is a Fishery Harbour Centre. Owned and controlled by the Department of Fisheries & Forestry, Fisheries section, major harbours.

DOCUMENTS: Health Certificate, Crew List, List of Bonded Stores, Vessel's Register, Logbook, Crew Passports.

Also valid Load Line Certificate. Safety Equipment Certificate, Radio Safety Certificate, Safety Construction Certificate, Cargo Gear Book.

PILOTAGE: Not compulsory. If Pilot required, contact Harbour Master for local Pilot.

ANCHORAGES: Bearhaven Sound. (See Admiralty Chart No. 1840), a large well sheltered anchorage adjacent to port.

MAX. SIZE: Always afloat. Dinish Island Wharf. 17 ft. MLWS. Length 305 ft.
Mainland Wharf East. 12 ft. MLWS. Length 426 ft.
Mainland Wharf West. 12 ft. MLWS. Length 557 ft.
All berths are accessible for wagons/containers, etc.

HEALTH: Customs grant pratique if vessel is clear, if not Doctor will be notified.

VHF: Harbour Master's Office on Channel 16.

TUGS: None.

BERTHING: In accordance with Harbour Master's instructions. Berthing day or night.

STEVEDORES: None. Local labour available if required.

MEDICAL: No advance notice necessary. Hospital facilities available.

FRESH WATER: Available at all berths.

FUEL: Available at all berths, no notice required (diesel only) and all berths accessible to tanker wagons.

REPAIRS: Syncrolift for vessels with max. weight 270 tons and 100 ft. LOA. Carriages and bays for 3 vessels.

Local machine shops/engineers for repair work available. Electronics engineer available.

GANGWAY/DECK WATCHMAN: Not required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: As per current regulations.

IDENTIFICATION CARDS: Not required.

AIRPORT: Cork airport 80 miles, served by regular airlines.

TIME: GMT plus 1 hour, reverting to GMT from October to March.

HOLIDAYS: Cargo work can be arranged on holidays.

POLICE/AMBULANCE/FIRE: Tel: Police 70002. Ambulance 70004. Fire station 70049.

TELEPHONES: Not available for placing onboard.

SHORE LEAVE: Allowed.

BANKS: Allied Irish Bank Ltd., Castletownbere. Tel: 027-70025.

GENERAL: Castletownbere is designated as a fishery harbour centre, for the import/export of fish, fish products and processed fish, from local plants. Also for landing of fish from local fishing fleets. The mainland wharf has an ice making plant, for supply of ice to fishing vessels.
Stores/Provisions: Available locally.
Bonded Stores: Available from Cork.
Customs and Excise: Office in harbour office building. Tel: 027-70102.

AUTHORITY: Department of Fisheries and Forestry, Harbour Office, Castletownbere, Co. Cork. *Tel:* 027-70220. *Contact:* Captain W. H. Jones, Harbour Master. Tel: (after hours) 027-70128.

CORK (including Cobh, Whitegate): 51.50 N. 08.17 W. (See Plan)

PORT LIMITS: Line joining Cork Head and Power Head.

DOCUMENTS:
3 Crew Lists.
2 Passenger Lists.
1 Health Declaration.
3 Customs Manifests.
For Shore Formalities
Ship's Register.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Light Dues Certificates.
Derat Certificate.

PILOTAGE. Minimum 24 hours notice of ETA and draft to Agent. Accurate ETA's are vital as Pilots only go afloat on this basis. When within VHF range, contact should be established through "Cork Harbour Radio" (see "Radio"). This station combines Port Operations and Information service and co-ordinates the pilotage service. The pilot launches are also fitted with VHF Channels 6, 12 and 16.

For large deep-drafted vessels, Pilot usually boards up to 2 or 3 miles South of Roches Point. Compulsory river pilotage area extends upstream from Spit Bank Light.

ANCHORAGES: Safe deep-water anchorages as arranged with Pilots.

RESTRICTIONS: Navigation by night and day. Ships of 5.0 m. draft can make passage of river to Cork at any stage of tide.

Bridges: Near Albert Quay and Andersons Quay.

MAX. SIZE: *Cork:* Max. length 152 m. Draft fresh water on Spring tides 8.7 m. on Neap tides 7.8 m.

Whitegate: Tankers up to 275 m. length. 11.6 m. draft. Max. draft 12 m. at highest tides.

Ringaskiddy: Max. size 60,000 d.w.t. Max. draft 13.0 m.

HEALTH: Health Declaration form is presented to Customs Officer or Port Health Inspector and Pratique issued without delay. In cases of disease on board notify Agents who inform Health Authorities.

RADIO: Coast Station – Valentia Radio. W/T and R/T. R/T link call facilities available. Telex fitted. In U.K., Coast Stations also relay messages direct to Agents.

VHF: Harbour Radio: VHF Channels 12, 14 and 16, 24 hour watch maintained. Call sign "Cork Harbour Radio". A Port Operations and Information Service is provided and it is through this organisation that the requirements of the Harbour Master will be made known.

Vessels underway are required to maintain a VHF watch on Channel 12 or 14 as instructed.

RADAR: No Port Control Radar. Pilot boats equipped with radar.

TUGS: Deep draft vessels take tug assistance from Horse Head to Cork and vice versa. Tug's lines are used. Tankers use two to three tugs for berthing at Whitegate Terminal.

BERTHING: The quays at Cork afford good accommodation for vessels up to 152 m. LOA, on fresh water drafts of 7.8 m. on Mean Neap tides and 8.7 m. on Mean Spring tides with 8.8 m. alongside quay. The Deep Water Quay at Cobh is 189 m. long and vessels of 6.0 m. draft can berth with safety. The deep water berth at Ringaskiddy can accommodate vessels up to 60,000 d.w.t. with max. draft 13.0 m.

SPECIAL CARGO FACILITIES:

Grain: 1 mobile suction discharge plant at South Jetties, discharge rate up to 120 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft on spring tide. Storage capacity 80,000 tons.

1 suction unit×150 tonnes per hour. Silo capacity 7,000 tons at South Deepwater Quay.

Coal/Fertiliser/Sulphur: 1×6 ton level luffing grab crane discharge rate up to 90 t.p.h. Max. ship size 152 m. LOA, 8.7 m. draft.

Containers: 1×30 ton travelling transporter container crane backed up by 2×30 tonne straddle carriers. Length of berth 122 m. Max. depth at 7.3 m. L.A.T.

Roll-on/Roll-off Berth "Tivoli": Max. height of link span 8.6 m. above LWOST. Min. height of link span 2.7 m. above LWOST. Max. loading 65 tons. Distance from side of berth to centre line of link span 11.4 m. Max. ship size 137 m. LOA. Berth dredged to 5.2 m. L.A.T.

Roll-on/Roll-off Berth Ringaskiddy: Length of linkspan 42.1 m., width of linkspan 7.2 m. spadehead at outer end 14 m.×14 m. Max. LOA permissible 158.5 m. Berth dredged to 9.4 m. LAT.

Livestock loading Ramp and Lairage: Max. ship size 106.7 m. LOA. Berth dredged to 5.2 m. L.A.T.

Pfizer Jetty: Length between dolphins 259.2 m. Max. draft 10.8 m. on all tides.

Molasses discharge rate, 1,000 t.p.h.
Fuel Oil discharge rate, 600 t.p.h.
Sulphuric Acid discharge rate, 200 t.p.h.

Bananas: Automatic banana discharge equipment at Horgan Wharf.

CRANES:

Location	*No.*	*Capacity Tonnes*
South Jetties	1	6

STEVEDORES: Labour hiring times. Week-days 0800, 1000 and 1130 hrs. Gangs for week-end working must be hired at 1700 hours on Fridays. ETA advice could include number of gangs workable.

MEDICAL: All medical and hospital services available at short notice.

TANKERS: Irish Refining Co. Terminal at Whitegate is situated on East side of Lower Harbour. Two deep water berths for tankers. Max. size, 55,000 d.w.t. or 90,000 d.w.t. partly laden. Slop reception facilities available.

Length between dolphins, 366 m.
Crude discharge rate up to 4,000 t.p.h.
HFO loading rate up to 1,700 t.p.h.
Gas Oil loading rate up to 700 t.p.h.
Petrol loading rate up to 600 t.p.h.
LPG loading rate up to 20 t.p.h.

Diameter of Hoses:

Berth No. 1: Crude and Black Oils 10 in. ASA.
Clean Products 8 in. ASA.
Berth No. 2: All Products 6 in. ASA.

N.E.T. (Nitrigen Eireann Teo.). At Marino Point. Overall length dolphin to dolphin 375 m. Dredged to 10.2 m. at L.A.T. to accommodate Ammonia tankers of up to 15,000 d.w.t. and bulk or general cargo vessels of up to 25,000 d.w.t. (Partly loaded). Vessels of up to 186 m. LOA and 9.5 m. draft will be acceptable.

DENSITY: Average density of water in river 1008.

FRESH WATER: Available at all quays ex-hydrants – delivery rate 25 t.p.h.

FUEL: Major grades of bunker fuel and diesel as well as marine lubricants can be obtained through suppliers. Delivery by road or river tanker.

WATCHMEN: Recommended but not compulsory.

OPENING/CLOSING HATCHES: Crew must perform this work as dockers decline to do it.

CUSTOMS ALLOWANCES: 200 cigarettes per man, and 1 bottle spirits per man.

CARGO GEAR: No special local requirements. Regulations similar to British Board of Trade safe working requirements. 1×30 ton container crane and 1×6 tonne level luffing portal crane are provided by Cork Harbour Commissioners. A number of mobile cranes up to 100 tonnes capacity are available from local plant hire firms and stevedoring firms.

IDENTIFICATION CARDS: Not required.

CONSULS: *Norway:* B. J. Foley, c/o Marine Transport Services, Atlantic Quay, Cobh. Tel: 811485. *Belgium:* G. Jones, c/o Celtic Coasters, 33 St. Patricks Quay, Cork. Tel. 504018. *Italy:* P. Cali, University College, Cork. Tel. 26871. *Germany (F.R.):* M. Corkery, Solicitor, Camden House, Camden Quay, Cork. Tel: 509367. *France:* F. Zatellier, c/o Eurotranslations, 6 Sullivans Quay, Cork. Tel. 26093. *Spain:* F. Ronayne, c/o Ronayne Shipping Ltd., Monaghan Road, Cork. Tel: 964444. *Sweden and Finland:* W.H. Sullivan, 6 St. Patricks Quay, Cork. Tel: 500588. *Denmark:* T. Halpin, c/o Beamish and Crawford Ltd., South Main St., Cork. Tel: 276841. *Netherlands:* G. Van Der Puil, Glanmire House, Lower Glanmire House, Cork. Tel: 504200.

REPAIRS: All types of deck and engine repair facilities available.

DRY DOCK: Verolme Cork dockyard main dry dock can take vessels up to 158.5 m. in length. Floating docks of 2,000 and 10,800 tonnes lifting capacity, also 4×40 tonne cranes. Able to carry out repairs to ships afloat of any tonnage using the port.

SURVEYORS: Lloyd's Surveyor at Cork.

REPATRIATION: Can be carried out without difficulty.

AIRPORT: 5 miles from city. High frequency scheduled flights to Irish, British and continental airports.

TIME: GMT from 0200 hrs. on Sunday following 3rd Saturday in October to 0200 hrs. on Sunday following 3rd Saturday in March (unless latter is Easter Saturday, in which case to 0200 hrs. on Sunday following 2nd Saturday in March).

One hour ahead of GMT (i.e. Standard European time) for remainder of year.

HOLIDAYS: New Years Day, St. Patrick's Day (March 17th); Good Friday; Easter Monday; First Monday in June; First Monday in August; Last Monday in October; Christmas Day (December 25th); St. Stephen's Day (December 26th).

POLICE/AMBULANCE/FIRE: 999 is emergency number for all services. Actual: Police 273161; Fire 966333; Ambulance 966333.

EMERGENCY CO-ORDINATION CENTRE: Port Operation and Information Station will provide this service and will raise the alarm in the event of a major marine emergency. Tel: (021) 811380, VHF Channels 12 and 16. Outside the port area, emergency services will be co-ordinated by Shannon Marine Rescue Co-ordination Centre, Tel: (061) 61219, 61969, 61509 or 61233 Ext. 251 or 252 or through Cork Air Traffic Control during opening hours at (021) 965326.

BANKS:

Allied Irish Banks Ltd., 66 South Mall, Cork. Tel: 276811.
Bank of Ireland Ltd., 32 South Mall, Cork. Tel: 276712.
Northern Bank Ltd. 89 South Mall, Cork. Tel: 508422.
Ulster Bank Ltd. 54 South Mall, Cork. Tel: 274381.

STORING: See "Prelims".

1. Vessels can be stored by truck.
2. No restrictions on storing. Barge storing not applicable.
3. Trucks may proceed alongside for storing.
4. Fork lifts may be used for storing.
5. Bonded stores authorised by Collector of Customs, Government Buildings, Sullivans Quay, Cork.
6. Local riggers may be employed to assist with storing.

SERVICES: All tanker services available at Whitegate. Otherwise, various general services required by ships available at Cork.

SHORE LEAVE: No restrictions on shore leave.

DELAYS: Except waiting for tide there are very few occasions on which entry to or departure from the port is subject to delay.

DEVELOPMENTS: The deepwater berth at Ringaskiddy became operational in August 1986, thus concluding the first phase of the creation of the largest deepwater industrial complex in Ireland. Ringaskiddy has a fully serviced 1,000 acre area owned by the Industrial Development Authority. Cork Harbour Commissioners have reclaimed a further 155 acres for use as operational and storage areas. Ringaskiddy is serviced by the Cork City and Harbour Water Supply Scheme. This will provide 30 million gallons of water per day. The first stage of the scheme has been completed and 10 million g.p.d., are now available. The Irish Government has enacted legislation to set up a freeport at Ringaskiddy which will enhance the attractiveness of Cork Harbour.

A natural gas field of 1,350 billion cu.ft. has been developed 30 miles due South of Cork Harbour. A pipe-line to Ringaskiddy has been built to serve new and existing industry. The gas is being used in a 270 m. Watt power station by N.E.T., an ammonia/urea plant at Marino Point and domestically in Cork City.

In 1985 the Commissioners completed work on a rail siding at Tivoli giving direct access to the national railway system from the container compound.

AUTHORITY: Cork Harbour Commissioners, P.O.Box 53, Custom House Street, Cork, Ireland. *Tel:* (021) 273125-9. *Telex:* 75848. *Contact:* P. Keenan, General Manager. B. O'Sullivan, Harbour Engineer. Captain P. Mullan, Harbour Master.

DUBLIN: 53.21 N. 06.16 W. (See Plan)

PORT LIMITS: Port of Dublin includes all water between Rory O'More Bridge (over River Liffey) and imaginary line drawn from Martello Tower at Sutton on North side of Dublin Bay to Sorrento Point at Dalkey on South side, but excluding Dun Laoghaire Harbour.

DOCUMENTS:

Forms C. 1 or C. 2 Customs report form (actually a copy of Manifest).
Form CU. 35 Victualling Bill (note covering Bonded Stores to be loaded Dublin).
Form CU. 7 Entry Outwards in ballast (for vessels sailing light).
Form CU. 10 Entry Outwards with cargo.
Form CU. 25 Entry Outwards (details of previous and forthcoming voyages).
Health Form.
"Jerque" Note (list of bonded stores on board on arrival).
Crew List must also be presented with personal declarations of dutiable possessions (i.e. radios; T.V.s; record players, etc.).

PILOTAGE: Limits of Dublin Pilotage District are waters of River Liffey between Butt Bridge and of sea Westward of Sixth Meridian between parallels of latitude passing through Bailey Lighthouse on North and through Sorrento Point on South including all bays, creeks and harbours and all tidal and closed docks within such area. Following classes of ships exempted from compulsory pilotage if not carrying passengers:

(1) Ships trading coastwise of not more than 200 tons gross tonnage.
(2) Home trade ships (including ships trading coastwise), of not more than 450 tons gross tonnage, excluding ships carrying petroleum or explosive cargo.

Incoming Vessels: Pilots board incoming ships from black-hulled pilot cutter in Dublin Bay. Cutter only cruises when vessels are expected, and accurate ETA requested to avoid delay.

ETAs should be given 12 hours before arrival and amendments may be made up to 2 hours before original ETA.

ETAs and any subsequent amendments should be passed by radiotelephone (VHF Channel 12; call sign Dublin Harbour Office) or radiotelegram to "Harmaster Dublin".

Holders of Dublin Pilotage Certificates should indicate this by flashing single letter signal "C" when approaching pilotage area between sunset and sunrise.

Vessels Outward Bound or Shifting: Order for Pilot should be made early as possible through Harbour Office Tel: 748771 or Telex: 25476 during office hours (0900 – 1700 hrs.); and Tel: 748779 outside office hours. Following details should be given: name and situation of vessel, destination, draft, time of departure. It must be stressed that such orders must be made in sufficient time making due allowance, particularly at night, for accessibility of vessel. A minimum of 1 hour's notice is necessary for inward or outward Pilot.

ANCHORAGES: Scotch Bay – S.E. Dublin Bay and just East of Dun Laoghaire 10 m. LAT – 12 m. LAT.

RESTRICTIONS: Draft restrictions: 10.0 m. HW Neap Tides; 10.2 m. HW Normal Tides; 10.5 m. HW Spring Tides. Vessels drawing 6.5 m. or less can enter at any state of tide.

Maximum speed in river in vicinity of berths is 4 knots.

ENTRANCE: Approach well lighted and easy of access. Inner Channel of Harbour, formed by almost straight channel of River Liffey from entrance at Poolbeg Lighthouse to Alexandra Basin, is 215 m. wide for greater part of length and maintained at depth of 7.8 m. LW. From Alexandra Basin entrance, River is quayed for a distance of nearly 3.2 km. to Butt Bridge in centre of City.

MAX. SIZE: State of tide governing max. draft, no breadth restriction, overall length restriction of approx. 200 m.

HEALTH: Pratique automatic for movements Ireland/U.K. area. Maritime Declaration of Health indicates requirements. This declaration must be submitted on arrival by Master of ship coming from foreign port. This requirement does not now normally apply to vessels trading *solely* between the Republic and ports in West Germany, Belgium and Netherlands, Atlantic and Mediterranean coast of France, Italy and Greece. Other requirements mentioned on Maritime Declaration of Health form still apply to such ships.

"Foreign Port" is port situated elsewhere than Ireland and UK.

Master of foreign-going ship may be asked to produce valid Derat Certificate or Derat Exemption Certificate in respect of vessel. Travellers (passengers and crew) may be requested to produce valid certificates of vaccination. Ships may be subjected to sanitary inspection by inspectors of Port Health Service.

Swill must not be landed from vessels which trade outside Ireland.

Granting of Pratique by radio not practised at Dublin, But is under consideration at present.

RADIO: Valentia Radio, Ireland. Portishead Radio, U.K. Anglesea Radio, U.K.

TUGS: Normally meet vessels at North Bank Lighthouse (roughly half-way mark of main channel) 1 mile West of Poolbeg Lighthouse. Tugs rope optional but recommended.

BERTHING: The following berthage is available to shipping using the port.

North Side of the River, from Talbot Memorial Bridge to North Wall Light, available as berthage, 2,244 m., depth 4.6 m. – 6.5 m. LAT. Cranes: 1×50 tonnes (fixed), 1×6 tonnes and 7×4 tonnes.

Alexandra Basin, South and East sides: Length of berthage 520 m., depth 7.1 m. – 7.7 m. LAT. Cranes: 1×6 tonnes, 4×4 tonnes.

Alexandra Quay West (North side of Alexandra Basin): Length of berthage 375 m. depth 9.8 m. – 10.3 m. LAT. Cranes 1×6 tonnes, 6×4 tonnes.

Alexandra Quay East: Length of berthage 360 m., depth 10.3 m. LAT. Cranes: 5×4 tonnes, 1×30 tonne container crane (privately owned).

Ocean Pier West (East end of Alexandra Basin): Length of berthage 418 m., depth 9.7 m. LAT. Cranes: 1×10 tonnes, 7×4 tonnes, 1×35 tonne derrick.

Ocean Pier South: Length of berthage 142 m. depth 9.5 m. LAT.

Ocean Pier East: Length of berthage 244 m., depth 10.3 m. LAT. Cranes: 4×4 tonnes.

South side of the River, from Talbot Memorial Bridge to Ringsend Gut, available as berthage 1,598 m., depth 4.6 m. – 6.5 m. LAT. Cranes: 6×4 tonnes.

South Bank Quay: Length of berthage 205 m., depth 8.5 m. LAT.

Container Handling Berths:

B+I Terminal: Length of berth 229 m., depth 5.9 m. LAT (incorporates No. 4 Ro/Ro). 1×30 tonne transporter crane. 1×28 tonne derrick cranes.

Sealink Terminal: Length of berth 145 m. depth 5.9 m. LAT. 2×30 tonne transporter cranes and 2×30 tonne Goliath cranes.

Southside Terminal: Length of berth 567 m., depth 7.7 m. LAT (incorporates No. 3 Ro/Ro). 2×30 tonne transporter cranes, 1×32 tonne derrick crane and 1×10 tonne portal crane.

Ocean Pier West: Length of berth 183 m., depth 9.5 m. LAT. 1×35 tonne derrick crane.

North Wall Extension: Length of berth 122 m., depth 6.5 m. LAT. 1×50 tonne crane.

Roll-On/Roll-Off Facilities:

North Side:	No. 1 Ramp – Length of berth 140 m., depth 5.9 m LAT.
	No. 2 Ramp – Length of berth 242 m., depth 10.3 m. LAT.
	No. 4 Ramp – Length of berth 200 m., depth 5.9 m. LAT.
	No. 5 Ramp – Length of berth 215 m., depth 11.0 m. LAT.
South Side:	No. 3 Ramp – Length of berth up to 520 m., depth 7.7 m. LAT.

BULK HANDLING FACILITIES:

Dry Bulk Jetty in Alexandra Basin: Length of jetty 247 m. depth 9.45 m. (North side) and 10.5 m. (South side). This jetty is equipped with a bulk ore conveyor and ship loading system for export of ore concentrates. 2×10 tonne grabbing cranes. It is also equipped with pipe-lines for liquid sulphur, ammonia and molasses. The jetty is also used for coal imports with a separate conveyor system linking the jetty with a back area coal storage site. A 9.15 m. approach section leading to the jetty has special facilities for small acid tankers.

Coal/Dry Bulk Quay, South Side: Length of quay 358 m., depth 11.0 m. LAT. This quay, with storage areas, hoppers, conveyor belts, 2×4 tonne and 2×10 tonne grabbing cranes is one of the most sophisticated bulk handling berths in Western Europe.

STEVEDORES: ETA required by Stevedores before 1500 hrs. Monday to Thursday for work the following day, and by 1500 hrs. Friday for work Saturday, Sunday or Monday.

Average discharge rates: *Grain:* 3,000 tons per day. *Timber:* 30 standards loose per gang/day. 120 standards packaged per gang/day. *General:* Bagged cargo and fast general, including paper, 250 tons per gang/day. *Other Generals:* 90 tons per gang/day.

Stevedores for deep-sea section: Dublin Cargo Handling Ltd., East Wall Road, Dublin 1. Tel: 745023. Telex: 30903.

TANKERS: No slop residue discharge facilities.

Tanker Berths	*Max. Draft*	*Length*
No. 1, West Oil Jetty, West Side	10.4 m.*	226 m.
No. 2, West Oil Jetty, East Side	10.7 m.*	235 m.
No. 3, East Oil Jetty, West Side	10.1 m.*	207 m.
No. 5, East Oil Jetty, East Side	6.5 m.	110 m.
South Bank Quay (E.S.B.)	8.5 m.*	213 m.
South Bank Quay (Poolbeg)	11.3 m.*	198 m.

*Time suitable for navigation in approaches – 1 hour before High Water for deepest draft.

Common User Oil Pipe-line System: This system provides 21 pipe-lines to Eastern Oil Jetty and 15 pipe-lines to Western Oil Jetty. Cargoes of tankers berthed at these jetties can be discharged to storage installations of any of the oil companies.

E.S.B. (Electricity Supply Board): At Poolbeg Jetty (formerly known as "Pigeon House 'B' Jetty"). Max. size 35,000 d.w.t. with the aid of tugs. Present depth sufficient for vessels of this size.

DENSITY: 1025 at all stages of tide.

FRESH WATER: Available at all berths by 2.5 in. hose line – 8/10,000 g.p.h. per hydrant.

FUEL:

Grades of Fuel Oil	*Viscosities*
Heavy Fuel Oil	3,500 sec. max.
Inter. Fuel Oil	1,500 sec. max.
Medium Fuel Oil	950 sec. max.
Light Fuel Oil	200 sec max.

Advance Notice required. Bunkering by pipe-line depends on availability of Oil Berth. Bunkering by Oil Barge normally a.m. notice on day required. Bunkering by Road Tanker – 24 hours notice.

FIRE PRECAUTIONS: Port By-Laws; Harbour Master's orders/Letters to Masters. Ref.: International Maritime Dangerous Goods Code.

Packed Petroleum: IMO recommendations on the safe transport, handling and storage of dangerous substances in port areas.

Fibrous Cargoes: See Directives No. 2 and 3 to Masters. Jute, hemp and sisal must be removed ex-ship from port area.

Cotton, cocoa fibre, kapok, etc., must be removed ex-ship to Hazardous Goods Shed.

General: Harbour Police-Watch obligatory during handling of all hazardous or inflamable cargoes, and on tankers during vessels' stay in port. No smoking permitted in Oil Zone, sheds, etc.

GANGWAY/DECK WATCHMEN: If no watchmen from crew, then shore watchman is recommended.

OPENING/CLOSING HATCHES: Patent hatches by crew; other hatches with some assistance from dockers.

CERTIFICATES:

Certificate of Registry.
Radio Safety Certificate.
Load Line Certificate.
Current Trinity House light bills.
Safety Equipment Certificate.

CUSTOMS ALLOWANCES: Tobacco per 8 days: 200 cigarettes – Master; 150 cigarettes – Officers; 100 cigarettes – Crew. Wine and/or Spirits: quarter pint per day per man.

REPAIRS: All classes of repairs carried out by Independent Companies located in the Port area.

DRY DOCKS: Graving Dock No. 1: Length overall 125 m.; width at entrance 21.3 m.; depth over sill at HWOST 5.25 m., depth over blocks at HWOST 4.57 m. Equipment – one 6 ton EP crane.

Graving Dock No. 2: Inside length with caisson gate in: Extreme outer position 202 m.; normal outer position 194 m. Centre position 112 m.; inner position 78 m. Width at entrance 24.4 m.; depth over sill at HWOST 7.62 m. Depth over blocks at HWOST 6.8 m.

The intermediate positions for the caisson gates make it possible to operate inner section so as to accommodate a small or medium-size vessel independently of remainder of dock.

Equipment: One E.P. crane, 25 tons at 22 m. radius to 5 tons at 30 m. radius. Seven power capstans of 5, 10 and 15 tons pull. Fresh and salt water hydrants at dock sides.

Patent slips: No. 1 – Length of cradle 23 m. for vessels up to 200 tons displacement. No. 2 – Length of cradle 51 m. for vessels up to 350 tons displacement.

REPATRIATION: May be arranged by ship's Agent through Department of Justice.

AIRPORT: Dublin Airport, 6 miles North of city centre, served by regular services direct to U.K., Europe, U.S.A. and Canada.

TIME: GMT plus 1 hour. Reverting to GMT between October and March.

HOLIDAYS: New Year's Day (1st January); St. Patrick's Day (National Holiday) (17th March); Good Friday*; Easter Monday†; Spring Bank Holiday† (1st Monday in June); August Bank Holiday† (1st Monday in August); Last Monday in October; Christmas Eve, half holiday (24th December); Christmas Day (25th December); St. Stephen's Day (26th December).

*Not a port holiday, but all other offices closed.

†These days can be worked at Sunday rates and conditions.

POLICE/AMBULANCE/FIRE: Contact Harbour Police patrol or at Dock Gates, or dial 999 on public telephone for all emergency services.

Port fire alarm system is linked via fire panel at Alexandra Road to local fire station.

TELEPHONES: Coin-box telephones available near Oil Berths. No rental charges; normal coin-box rates.

SERVICES: No facilities for tank cleaning; discharge of tank washings in small quantities to road tankers.

SHORE LEAVE: No port restriction on crew's shore leave.

GENERAL: Masters' cash requirements for week-end must be notified to Agent by noon on Friday.

AUTHORITY: Dublin Port and Docks Board, Port Centre, Alexandra Road, Dublin 1. *Tel:* 722777 – 748771. *Telex:* 25476. *Cables:* Harbour Dublin. *Contact:* Mr. R. N. Hayes, General Manager. Captain C. J. Lawless, Harbour Master.

DUN LAOGHAIRE: 53.18 N. 06.08 W. (See Plan)

PORT LIMITS: As defined by Dublin Port and Docks Board, as ships have to pass through their pilotage area. The limits of Dun Laoghaire Harbour are defined in its bye-laws as per its fairway extending beyond its pierheads.

DOCUMENTS: See "Dublin".

PILOTAGE: See "Dublin".

ANCHORAGES: See "Irish Coast Pilot".

RESTRICTIONS: See "Irish Coast Pilot".

MAX. SIZE: Fairway dredged to 5.0 m.

HEALTH: See "Dublin".

RADIO: See "Dublin".

VHF: The Harbour Office operates on Channels 16, 14, 12, 9 and "M", Call sign "Dun Laoghaire Harbour Office". Call sign for "Sealink", is "Dun Laoghaire Pier".

TUGS: None.

BERTHING: Harbour formed by 2 breakwaters, East Breakwater length 1,290 m. West Breakwater, length 1,548 m. Width at entrance between breakwaters, 232 m. Depth at entrance 6.2 m. – 7.9 m.

	Length (m.)	*Depth* (m.)
Mail Boat Pier, E. side	139+24*	5.2
Mail Boat Pier, W. side	130+24*	5.2
Car Ferry Pier, E. and W. side	142+11*	5.2
Traders Wharf, outside	149	3.5
Traders Wharf, inner side	131	2.5

Ice Plant: Traders Wharf supplies ice to fishermen.

**Note:* These piers are rounded at the seaward end.

The lengths given for the berths are the straight edge of the pier, the extra length given is the additional length continued along the straight line that meets the tangent to the pier.

CRANES: 1×2 ton and 1×5 ton crane, available for fitting out yachts near Traders Wharf.

SPECIALISED CARGO HANDLING FACILITIES: Three Ro/Ro ramps. Ramps are to M.O.T. loading requirements, width of ramps – 3 m.

BRIDGES: None.

STEVEDORES: None. Sealink arrange gangs.

MEDICAL: See "Dublin".

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: Arranged by Agent.

FIRE PRECAUTIONS: Only usual non-smoking precautions.

CONSULS: See "Dublin".

REPAIRS: See "Dublin".

DRY DOCKS: See "Dublin".

SURVEYORS: As per Lloyd's Shipping Agents, Dublin.

GANGWAY/DECK WATCHMEN: The ship's watch.

CUSTOMS ALLOWANCES: As per E.E.C. regulations.

REPATRIATION: See "Dublin".

AIRPORT: Dublin Airport (Collinstown) 20 km.

TIME: As United Kingdom.

HOLIDAYS: Nine (9) Bank Holidays each year.

POLICE/AMBULANCE/FIRE: Available locally. Police, Tel: 801285 Fire Brigade and Ambulance, Tel: 801903.

TELEPHONES: None on board visiting ships.

SERVICES: None.

SHORE LEAVE: Possible, Seamen's I.D. card sufficient, shore passes are not issued.

REGULATIONS: Nothing unusual.

DELAYS: There are no delays.

SHIP SUPPLY SERVICE: No service. However, there is a helicopter landing pad in the Western section of the Harbour.

AUTHORITY: Office of Public Works, 51 St. Stephen's Green, Dublin 2. *Tel:* (01) 767541. *Cables:* Oibre.

Harbour Office Dun Laoghaire. *Tel:* 801130. *Contact:* Captain J. P. Carter, Harbour Master.

DUNMORE EAST: 52.09 N. 06.59 W.

LOCATION: Dunmore East is situated on the West side of the Waterford Estuary, 14.5 miles from the Port of Waterford. It is a major fishing harbour centre.

APPROACHES: Width at entrance 280 ft.

PILOTAGE: See "VHF".

VHF: Not used in the harbour. However, Waterford Harbour Commissioners operate a pilot station on the high ground East of the Harbour and can be contacted on Channel 16.

BERTHING: The Harbour is formed by 3 piers as follows:

East Pier 480 ft., West Wharf 510 ft., South Jetty 300 ft.

CRANES: None. However, cranes can be hired locally.

FRESH WATER: Available on all 3 piers.

FUEL: Fuelling facilities for diesel operated engines are laid on to 3 points on the East Pier.

REPAIRS/DRY DOCKS: Syncrolift at the S.W. corner of the harbour capable of lifting a vessel 100 ft. in length; 230 tonnes SWL.

Grid on the West side of the Syncrolift, can take an MFV up to 75 ft. long. Vessels drawing in excess of 12 ft. can only use both the Grid and the Syncrolift during Spring tides.

SERVICES: There is an ice plant in the harbour operated by Bord Iascaigh Mhara.

AUTHORITY: Office of Public Works, 51 St. Stephen's Green, Dublin, 2. *Tel:* (01) 613111. *Telex:* 90160. *Contact:* Lt. Cmdr. J. J. Grannell, Harbour Master. *Tel:* 051-83166. Mr. S. J. Sheil, Chief Engineer. *Tel:* (01) 764071.

FENIT: 52.17 N. 09.53 W.

PORT LIMITS: All waters East of a line from Kerry Head to the Westernmost point of the Magharee Islands.

DOCUMENTS: See "Dublin".

PILOTAGE: Pilotage is not compulsory, but is recommended. ETA at least 24 hours before Pilot required. VHF to Pilots and Harbour Master is available.

ANCHORAGE: Included in Pilotage duty. The area recommended is W.N.W. of Samphire Lighthouse.

RESTRICTIONS: Deep draft vessels berth some 2 hours either side of high tide.

MAX. SIZE: Vessels of 400 ft. have no difficulty in berthing. Maximum draft 20 ft. to be afloat.

HEALTH: Pratique procedure as in other Irish Ports.

RADIO: Valentia Radio Station will accept and forward W/T messages.

VHF: Harbour Master and Pilots listen on Channel 16 and switch to Channel 12 for passing messages.

RADAR: No service available.

TUGS: Not necessary.

BERTHING: 328 ft. of berthing space.

CRANES: There are two cranes available on the pier, 20 ton electric gantry and 15 ton diesel jib crane. Extra cranes may be hired.

STEVEDORES: There are 4 stevedores for the Port:

R. McCowens & Son, Edward St., Tralee – 066-21033
I. T. I. Ltd., Dock Rd., Limerick – 061-313088
Tralee Seabase Ltd., 10 Nth. Richmond St., Dublin 01-786377
Argosea Services Ltd., Foynes.

MEDICAL: Regional Hospital in Tralee (8 miles).

TANKERS: Not to exceed max. draft 18 ft.

FRESH WATER: Supplied from hydrants on quay side at 20 t.p.h. Cost £1.25 per ton.

FUEL: Bunkers available from oil terminal on the pier.

Contact: Kerry Petroleum Clash, Tralee. Tel: 066-21155
or Estuary Fuels, 23 O'Curry St., Limerick. Tel: 061-313362

REPAIRS: May be arranged on a limited scale.

AIRPORT: Local airport at Farranfore (15 miles) and International Airports at Shannon and Cork (80 miles)

AUTHORITY: Tralee & Fenit Pier & Harbour Commissioners, The Harbour Office, the Pier, Fenit, Tralee, Co. Kerry. *Tel:* 066-36293. *Contact:* Lt. Commander J. Barrett, Harbour Master. *Tel:* 066-36103. K. Lawlor, Secretary. *Tel:* 066-36293.

GALWAY: 53.16 N. 09.03 W. (See Plan)

DOCUMENTS:

1 Crew List (official form).
1 Passenger List (official form).
1 List of Articles (dutiable) in Possession of Crew (official form).
1 Stores List (to include bonded surplus stores for seal, firearms, ammunition, animals, radio transmitting and receiving sets) (unofficial form).
Maritime Declaration of Health (official form).

Documents, etc., required by Agent for Customs Purposes:

Ship's Register.
Load Line and Safety Certificates, etc.
Receipt for previous payments of light dues if any.

PILOTAGE: Compulsory. Pilots board incoming vessels only at "tide times" (approx. 2.5 hours before HW until HW); vessels arriving at times outside this period should anchor and await Pilot. Safe anchorages at Inner Roadstead or near Margaretta Buoy according to tonnage and draft, Pilot will board at either. Application for Pilot should be to Agent with notice of ETA. International light and sound signals may be used. Pilots. Tel: Galway (091) 61874/623-29.

ANCHORAGES: During S.W. gales safest anchorage is at Black Head.

RESTRICTIONS: Entry from 2 hours before HW until HW only.

MAX. SIZE: Governed by depth on sill of 28 ft. at springs and 24 ft. at neaps: width of dock gates, 65 ft. and length of turning area 480 ft.

HEALTH: Master of ship arriving from foreign port must deliver Maritime Declaration of Health in order to obtain pratique. An oral declaration will suffice for ships trading solely between Republic of Ireland and Belgium, Holland and European France. Pratique will be granted or withheld depending on answers given to questions put in Health Declaration.

In event of a suspected disease or fever on board, vessel is detained pending arrival of Medical Officers of Health. No unauthorised person is allowed to leave ship without authority of Chief Medical Officer.

Pratique is automatic when vessel arrives from ports in Great Britain, Isle of Man, Northern Ireland and Channel Islands or another port within Eire.

RADIO: ETA cables to Agents, etc., through Valentia Radio if approaching from South or Malin Head if from North. Valentia has telephone link service. Port VHF on Channel 16.

TUGS: No tugs available.

BERTHING:

Berth	Length (m.)
Mulvoy Quay	209
Breatnach Quay	176
Dun Aengus Dock – North	164
Dun Aengus Dock – South	161
New Pier	134

CARGO HANDLING FACILITIES: Grain, coal, bulk fertilisers, etc. are all handled by grabs, discharge rates 1,500 t.p.d. per crane.

4×25 tonne cranes for grab discharge.

STEVEDORES: Agents arrange after receipt of ETA.

MEDICAL: No special port medical requirements. Ships medical requirements should be included in ETA signal.

TANKERS: 2 berths. No special requirements.

DENSITY: 1012 (average).

FRESH WATER: Available by hose in unlimited quantities. Rate up to 50 t.p.h.

FUEL: All grades available.

GANGWAY/DECK WATCHMEN: Open quays – watchmen recommended.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: Wine, Spirits and Tobacco: Members of a crew who remain out on a vessel during her stay in port are allowed to retain in their own possession, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days)	*Spirits in any form* (to cover 4 days)	*Wine* (to cover 4 days)
The Master 8 oz.	1 pint	1 gallon
Officers (i.e., Mates, Engineers, Wireless Operators, Ship's Surgeons, Pursers, Chief Stewards or Serangs) 6 oz.	1 pint	1 gallon
Other Crew members 4 oz.	1 pint	

IDENTIFICATION CARDS: Not needed.

CONSULS: T. McDonogh & Sons Ltd., Merchant's Road, Consul for France and Belgium only. No others in Galway.

REPAIRS: Deck and engine repairs carried out afloat.

DRY DOCKS: No dry dock.

REPATRIATION: Crew changes and repatriation can be effected.

AIRPORT: Dublin (140 miles) and Shannon (55 miles). Airports served by regular flights.

TIME: GMT plus 1 hour. Reverting to GMT from October to March.

HOLIDAYS: Christmas Day; St. Stephen's Day (26th December); St. Patrick's Day (17 March); Easter Monday; Whit Monday; First Monday in August.

POLICE/AMBULANCE/FIRE: Police Tel: 63161. Ambulance Tel: 24222. Fire Tel: 999.

TELEPHONES: No arrangements exist for placing telephones on board.

SERVICES: Compass adjusters available in Dublin. 24 hours notice to Agent.

SHORE LEAVE: Allowed.

DELAYS: Apart from tidal, none.

SHIP SUPPLY SERVICE: Arranged by ships Agents: City of Galway Shipping Co. Ltd. and Kelly Shipping Ltd.

The occasional call for landing sick/injured seamen could be effected by the Lifeboat Service (R.N.L.I.) or on occasion by the Harbour Authorities' Pilot Launch.

AUTHORITY: Galway Harbour Commissioners, 49 Dock Street, Galway. *Tel:* 091-62329 and 61874. *Telex:* 28895. *Contact:* Captain F. W. Sheridan, Harbour Master & Pilotage Superintendent (Home Tel: 091-63920).

KILLYBEGS: 54.38 N. 08.26 W. (See Plan)

DOCUMENTS: See "Dublin".

PILOTAGE: No permanent Pilot but one can be acquired on request.

ANCHORAGE: Very safe anchorage.

RADIO: Malin Head Station.

VHF: Link calls through Malin Head VHF Channel 16.

BERTHING: Large fishing fleet has to be accommodated.

MEDICAL: Necessary to send advance warning re illness or injury to a Crew member.

FRESH WATER: Available.

FUEL: Fuel oil available.

IDENTIFICATION CARDS: Not needed.

SHORE LEAVE: Crew members allowed ashore.

DEVELOPMENTS: Major harbour scheme has commenced – dredging has been completed.

AUTHORITY: Department of Tourism, Fisheries and Forestry, Leeson Lane, Dublin 2. *Tel:* 600444. *Telex:* 90253 FFWS. *Contact:* Captain P. J. Hodgman, Harbour Master (Tel: (073) 31032).

KINSALE: 51.42 N. 08.31 W.

PORT LIMITS: Straight line drawn due West of Hangman's Point ("Arrived Ship Line").

DOCUMENTS: See "Dublin".

PILOTAGE: 12 hours notice of ETA required. Pilot operates on VHF Channels 16 and 14. Pilot boards at Bulman Buoy (WP). Pilot station tel: 021-72300 and 72303, telex: 28491.

ANCHORAGE: 4 cables South of Bulman Buoy or off Lower Cove in line with Charles Fort. Depth 6.7 m. LW.

RESTRICTIONS: Berthing at HW only. Bar, depth 3 m., 2 to 3 cables South of Charles Fort. All vessels lie aground at LW. Tides 1.5 knots.

Also see "Berthing".

MAX. SIZE: Vessels up to 80 m. LOA, draft 4.5 m. and 2,000 d.w.t.

VHF: Vessels approaching the port call pilot station on Channel 16 and then switch to Channel 14. Call sign "Kinsale Harbour Radio".

BERTHING: Berthing starboard side to at HW on Southern side of Pier Head (Customs Quay); length 60 m. Depth MHWST 6.10 m., MLWNT 2.74 m. All vessels lie aground at LW.

CRANES: Mobile grab cranes of 25 tons – 35 tons capacity available.

STEVEDORES: Working hours 0800 – 2000 hrs., Monday to Friday.

FRESH WATER: Available ex-hydrant on berth.

AIRPORT: Cork Airport 14 miles.

TIME: GMT; Summertime GMT plus 1 hour (March to October).

AUTHORITY: Kinsale Harbour Commissioners, The Pier, Kinsale, Co. Cork. *Tel:* 021-72503. *Telex:* 28491. *Contact:* E. Hurley, Harbour Master.

LIMERICK: 52.40 N. 08.38 W. (See Plan)

PORT LIMITS: The Port of Limerick extends from Sarsfields Bridge in Limerick City to a line joining Loop Head and Kerry Head. It includes Limerick City Dock and Quays, Dernish Island Jetty (Shannon Airport), Aughinish Marine Terminal, Foynes Island Jetty, Tarbert Island Jetty and Money Point Jetty but *not* Foynes Harbour and Cappa Pier Kilrush.

According to custom and practice, smaller vessels "arrive" as they pass Scattery Island Lighthouse and larger vessels at the outer anchorage.

DOCUMENTS:

EEC Arrival Form for tankers over 1,600 tons gross (to be presented to boarding Pilot).
2 Crew Lists.
2 Passenger Lists.
3 Custom's Manifest (Tobacco List).
Deck Cargo Declaration.
Health Declaration.
Ship's Register (Tonnage Certificate).
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Receipt for last previous Trinity House Light Dues payment (if any).
Derat Certificate.

PILOTAGE: Compulsory from Scattery Island (52.35 N., 09.31 W.) to Limerick for all vessels and from Kilcredaun for vessels in excess of 3,000 n.r.t. Large vessels with drafts of 13.0 m. and over are advised to embark their Pilots West of Kilcloher. ETA for Pilots passed in advance by Agents. Masters may call Pilots (Scattery Pilot Station – Channel 16 VHF) or by normal International Code sight or sound signals. ETA to be sent 24 hours in advance and amended as necessary. Pilots watch only when vessels are expected inwards or outwards.

ANCHORAGES: Vessels normally wait tide to Limerick at Scattery Roads; Beighcastle Anchorage depth over 60 ft. (52.40 N. 08.57 W.) about 18 miles downstream off Limerick is nearest deep-water anchorage; now disused as lightening place for bulk grain cargoes. Larger vessels (over 10,000 d.w.t.) anchor 2.5 to 3.0 miles West of Scattery Lighthouse.

RESTRICTIONS: Entrance to Limerick Dock is limited to 2 hours preceding HW; vessels over 3,000 d.w.t. berth on daylight tides only.

MAX. SIZE: Dependent on tide. Up to 20 ft. draft on Spring tides (neap tides about 16 ft.) Vessels of 500 ft. × 65 ft. beam have berthed Limerick Dock on suitable draft. Such vessels are subject to weather delays.

HEALTH: If no infectious diseases on board, pratique granted by Customs Preventive Officer on arrival on presentation of Health Declaration of Master. Landing of dogs and cats from outside British Isles strictly forbidden.

RADIO: Irish Stations; Valentia Radio VHF or R/T (link-calls available) or Malin Head Radio, or any U.K. Radio Station. Agents have special arrangements with Valentia Radio and Malin Head Radio, cables passed by direct telex to Agent's office.

Telex in Harbour Master's Office No. 70248 HABR EI.

VHF: Masters can call Scattery Pilot Station on Channel 16, or Limerick Harbour Radio – same, working on Channels 12 and 13.

TUGS: 2 tugs each of 22 tons bollard pull are available in the estuary in addition to one small tug of 5 tons pull and a dredger fitted with towhook.

BERTHING: In Limerick Dock there are 10 berths of which only 1 (Shell berth) is reserved exclusively for tankers. The cement berth is also used for tankers when required. Drafts on all berths approx. tidal gauge plus 1 ft. Extensive berthage on tidal quays now used by fertiliser vessels up to about 1,000 d.w.t. lying safe ground on mud berths.

TANKERS: Apart from Limerick Dock tanker berths Dernish Oil Jetty situated approximately 1 mile South of Shannon Airport. Jetty head (Lat. 52° 41′ N., Long. 08° 55′ W.) 150 ft. long. Distance between head and stern buoys 430 ft. Depth alongside LW 26 ft. Jetty designed for vessels of up to 6,000 d.w.t., assuming manifold amidships. Aviation fuel pumped direct to airport.

STEVEDORES: Sole stevedores Limerick Cargo Handling Ltd. (as a result of rationalisation scheme). ETA per Agent before 1600 hrs. each day Monday to Thursday for labour next day. Master to state number of gangs/workable hatches. Crew open and close hatches. Normal work 0800/1700 hrs. but overtime can be worked 24 hours per day, Saturday and Sunday included. Requisition for labour for weekend work and 0800 hrs. Mondays by 1600 hrs. Friday.

Discharge rates: Bulk cargoes 1,000 tons per day.
D.B.B. 60 standards per day.
Packaged timber 150 stand. per gang day.
Bagged cargoes (palletised in hold) 400 tons per gang day.
Generals 130 tons per gang day.
All cargoes by crane discharge.

CONTAINER HANDLING FACILITIES: A 32 ton Gantry Container Crane at Limerick Docks.

MEDICAL: All medical facilities available at short notice.

DENSITY: 1000 in Limerick Dock, except in certain late Summer conditions.

FRESH WATER: Available at all berths in Limerick ex-hydrant. Average rate 7.5 t.p.h.

FUEL: All grades available in reasonable quantities per road truck on 24 hours notice. (Non-bunker port prices).

WATCHMEN: Watchmen from crew, or if none available shore watchmen available.

HATCHES: Opening and closing of hatches, setting up derricks, shifting of hatches, beams, patent hatches, etc., all to be done by ship's crew with no assistance from shore gangs.

CONSULS: Belgium, Denmark, Finland, France, Germany (Fed. Rep.), Netherlands, Spain, Sweden.

CUSTOMS ALLOWANCES: (Tobacco per 8 days). Master 200 cigarettes; Officers 150 cigarettes; Crew 100 cigarettes. Wine/Spirits: quarter pint per man per day.

REPAIRS: Limited facilities. Dry dock available for vessels up to 40 ft. beam and not exceeding 15 ft. draft.

SURVEYORS: Nearest Marine Surveyor is Captain E. Hayes. Tel: Limerick (061) 43606 (office) and 62502 (home). Telex: 28224.

Also Cabet Brett, Belfast; Cargo Superintendents, Dublin; P. B. Harrison, Dublin; Casebourne & Turner, Dublin.

Lloyd's Register Offices are at Rushbrook, Cork, Tel: 021 – 811831. A.B. and B.V. are represented by P. B. Harrison (Dublin) Tel: 01 – 895878.

Salvage Association are represented by Mullock & Sons (Limerick Foynes) Lloyd's Agents, Tel: 061 – 54044, Telex: 26911.

REPATRIATION: No difficulties. Shannon International Airport 15 miles from Limerick. Daily flights world-wide destinations.

TIME: As U.K. GMT or GMT plus 1 hour (Summer Time).

HOLIDAYS: (For dock working), New Year's Day (1st January); St. Patrick's Day (17th March); Easter Monday; First Monday in June; First Monday in August; half-day 24th December, 25th December, 26th December (Christmas Day and St. Stephen's Day).

IDENTIFICATION CARDS: Seaman's Book sufficient.
GENERAL: Leading lights for No. 3 berth are fixed red, 120° visible over and arc of 90° from 079° to 169° surmounting yellow diamond shaped daymarks.

Lighthouse on main pier end, 50 ft. flashing W.R.G. every 5 seconds.

New pier built 1980. Overall length 152 m. Berth No. 1 is reserved for future developments. Berth No. 2 in operation, Mardev Linkspan (Ro/Ro). Depth 6 m. LOWST. Light pier end. QK Fl. white. Leading lights occ. white 3 secs. 146°.

DEVELOPMENTS: New car/coach Customs Examination Hall completed 1986.

New terminal building work to commence January 1987.

AUTHORITY: Coras Iompair Eireann, Heuston Station, Dublin.

Rosslare Harbour, Co. Wrexford, Ireland. *Tel:* (053) 33114. *Telex:* 80730. *Contact:* W. Walsh, Port Manager. Captain G. Livingstone, Harbour Master.

SHANNON ESTUARY: (See Plan)

(a) Foynes Harbour: 52.36 N. 09.06 W.
(b) Foynes Island: 52.37 N. 09.07 W.
(c) Tarbert Island Oil Terminal: 52.35 N. 09.21 W.
(d) Money Point Generating Station: 52.36 N. 09.25 W.
(e) Aughinish Island Alumina Plant: 52.38 N. 09.03 W.

(a) FOYNES HARBOUR

DOCUMENTS: See "Limerick".

PILOTAGE: Compulsory from Scattery Island to Foynes Buoys. Pilot may be taken off Kilcredane Head about 9 miles farther West as an optional extra (usually by vessels over 5,000 d.w.t.). ETA for Pilots passed in advance by Agent. Masters may call Pilots (Scattery Pilot Station, Channel 16 VHF) or by normal International Code sight or sound signals. Foynes Harbour Pilot boards at Foynes Buoys. Call Foynes Harbour Radio VHF Channel 16.

ANCHORAGE: Vessels waiting to enter Foynes normally anchor Foynes Roads (West of Foynes Buoys).

RESTRICTIONS: No restrictions by day or night on vessels under 4,000 d.w.t.

MAX. SIZE: Vessels up to 190 m. length and 10.5 m. draft with restriction on beam of 30 m. Ore cargoes of up to 22,000 tons have been loaded and tankers up to 32,000 tons have discharged.

HEALTH: See "Limerick".

RADIO: See "Limerick".

VHF: As for Limerick except for "Limerick Harbour Radio" substitute "Foynes Harbour Radio".

TUGS: 1 tug (1,250 h.p.) at Foynes Harbour.

BERTHING:

West Pier: 10.5 m. LWOST. 106 m. quay with mooring buoys ahead and astern. For tankers, crude ore (loading by conveyor system) and other cargoes. See "Stevedores".

East Pier: 11.3 m. LWOST. 104.5 m. quay with mooring buoys ahead and astern.

Inner Berth, East Jetty: 6.5 m. LWOST. Length 131.1 m.

East Jetty Extension: 11.3 m. LWOST. 115 m. of quay.

Two other berths where vessels up to 2,000 d.w.t. lie safe aground on soft mud during low water.

CRANES: Four 40 ton mobile cranes are available and controlled by the harbour, other cranes can be hired from local firms if and when required. A local firm based in Foynes has a fleet of 80 forklifts, and 5 Bob-Cats which are also available at the Port.

STEVEDORES: ETA to Agent before 1600 hrs. Monday/Thursday for labour next day 0800 hrs., before 1600 hrs. Friday for labour Saturday or 0800 hrs. Monday. For cargoes other than bulk ore or concentrates in bulk Masters should state number of gangs/workable hatches.

Crude Ore: West Pier Conveyor: 500 t.p.h. loaded normally on continuous basis, day and night, commencing on berthing (16,000 tons in 28 running hours).

Packaged D.B.B.: 120 stds. per gang day (pre-slung).

Packaged D.B.B.: 70 stds. per gang day (shore slings).

Bulk Fertilisers: 1,000 tons per day (mobile grab crane).

Bag Fertilisers: 400 tons per gang day (shore mobile cranes).

Bagged Barytes, bagged cement and other bagged commodity: 400 tons per gang day (ship's gear/mobile crane).

Storage Facilities: 15 acres of open landing ground and 45,000 sq.ft. of covered storage.

Weighbridge: There are 6 modern weighbridges (max. 60 tonnes) located throughout the Harbour Lands, and further weighing facilities will be installed as required.

MEDICAL: Emergency facilities available at short notice locally. Full general hospital facilities at Limerick, 25 miles distant.

DENSITY: Variable on season and tidal conditions between 1008/1020.

FRESH WATER: Available at all berths. Industrial water also available.

FUEL: Available East Pier from adjacent installation.

WATCHMEN: Normally crew watchmen.

HATCHES: See "Limerick".

CUSTOMS ALLOWANCES: See "Limerick".

REPAIRS: Limerick facilities – no dry dock.

REPATRIATION: No difficulties – Shannon Airport 34 miles.

TIME: See "Limerick".

HOLIDAYS: See "Limerick".

POLICE/AMBULANCE/FIRE: Dial 999.

SHORE LEAVE: No restrictions.

Messrs. James Scott & Co. (Shannon) Limited Hartstonge House, Hartstonge Street, Limerick.

AUTHORITY: Foynes Harbour Trustees, Harbour Office, Foynes, Co. Limerick. *Tel:* Foynes (069) 65111 and 061-92380. *Contact:* J. F. O'Malley, Secretary.

Harbour Master's Office, *Tel:* (069) 65244.

(b) FOYNES ISLAND

LOCATION: Cement Limited Oil Jetty is located on N.W. side of island, which is not connected to mainland. Buoyed moorings for tankers up to 60,000 tons (length 950 ft.). Vessels lie alongside breasting dolphins off pipe trestle in 50 ft. min. LWOST.

DOCUMENTS: See "Limerick".

PILOTAGE: Compulsory from Scattery Island to Foynes Island for all vessels but for vessels over 3,000 n.r.t. it is compulsory from Kilcredaun (otherwise as Limerick). Harbour Master advises vessels over 5,000 d.w.t. to take Pilot at or near Kilcredaun.

ANCHORAGES: Vessels normally wait in Outer Anchorage 2.5 miles – 3.0 miles West of Scattery or at anchor in Cahircon Anchorage N.E. of Foynes Island Jetty waiting daylight early flood tide for berthing.

RESTRICTIONS: None for vessels up to 60,000 d.w.t. subject daylight movements berthing flood tide and departures during flood tide.

Mooring lines required: at least 4×120 fathoms and 6×90 fathoms polypropylene or similar.

MAX. SIZE: Min. depth alongside 50 ft.

RADIO:
VHF: } See "Limerick".
HEALTH:

TUGS: 2 tugs available (each 22 tons bollard pull).

MEDICAL: No facilities on island. See "Foynes" and "Limerick".

TANKERS: Flexible hoses 2×8 in. passed by derrick from pipe trestle to ship. Connections – PCD 11.75 in., 8 holes.

DENSITY: 1013 (average).

FRESH WATER: None available.

FUEL: None available.

CUSTOMS ALLOWANCES: See "Limerick".

REPAIRS: None except via Foynes or Limerick.

SURVEYORS: See "Limerick".

REPATRIATION: See "Limerick".

TIME: See "Limerick".

HOLIDAYS: As Limerick. Vessels normally discharge without regard to holidays.

TELEPHONES: Shore telephone placed on board for ship's use with cargo hoses. Tel.: 069-65226.

EMERGENCY CO-ORDINATION CENTRE: See "Limerick".

BANKS: See "Limerick".

STORING: Island location. All stores must be conveyed by launch.

SHORE LEAVE: Restricted to daylight hours as launch service only then available. No access to mainland except by launch.

AUTHORITY: Limerick Harbour Commissioners. (See "Limerick").

(c) TARBERT ISLAND OIL TERMINAL

LOCATION: Electricity Supply Board power station and Jetty located on N.W. shore of Tarbert Island (with road access from the mainland) 52.35 N., 09.21 W. Berth 48 ft. draft LWOST overall length including outer mooring dolphins 1,050 ft. with berthing face of 300 ft.

DOCUMENTS: See "Limerick".

PILOTAGE: Compulsory from Scattery Island to Tarbert for all vessels but for vessels over 3,000 n.r.t. it is compulsory from Kilcredaun (otherwise as Limerick). Harbour Master advises vessels over 5,000 d.w.t. to take Pilot at or near Kilcredaun.

ANCHORAGES: Vessels normally wait 2.5 miles West of Scattery for daylight flood tide for berthing.

RESTRICTIONS: None for vessels up to 70,000-80,000 d.w.t. on suitable draft, berthing daylight flood tide, departure on flood tide in daylight or darkness (subject good weather).

MAX. SIZE: The berth has 48 ft. alongside at low water.

RADIO:
VHF: } See "Limerick".
HEALTH:

TUGS: Available. One tug usually used at this berth.

MEDICAL: No facilities. Nearest doctor at Glin, Co. Limerick (6 miles), See "Limerick".

TANKERS: 2 Marine Arms – 10 in. PCD 14.15/16 in. Outer diam. 16 in., inner diam. 11 in. Holes, 12 of 0.75 in. diam.

DENSITY: 1025, except in very exceptional conditions.

FRESH WATER: Available.

FUEL: None available. Jetty head approached from shore by footway (4.5 ft. wide×650 ft. long), therefore no direct access to berth from shore for road transport.

WATCHMEN: Watchmen from crew.

CUSTOMS ALLOWANCES: See "Limerick".

REPAIRS: None locally. Nearest Limerick 40 miles distant or Foynes, 7 miles distant. Difficulty of access should be noted.

SURVEYORS: See "Limerick".

REPATRIATION: See "Limerick".

TIME: See "Limerick".

EMERGENCY CO-ORDINATION CENTRE: See "Limerick".

STORING: A narrow viaduct 650 ft. long makes storing impossible from trucks alongside. Small four wheeled hand trolleys are used.

SHORE LEAVE: No restrictions.

TELEPHONES: At jetty head.

AUTHORITY: Limerick Harbour Commissioners. (See "Limerick").

(d) MONEY POINT GENERATING STATION:

LOCATION: On North shore, 3 miles East of Scattery Island. 52° 36′ N. 9° 25′ W.

DOCUMENTS: See "Limerick".

ANCHORAGES: Vessels normally anchor 2.5 miles – 3.0 miles West of Scattery when conditions allow. Vessels over 13.0 m. draft may be required to remain West of Loop Head in very bad weather. For these large vessels Pilots will normally board inside Loop Head.

RESTRICTIONS: Contact Port Control.

PILOTAGE: Compulsory from Scattery. Vessels over 3,000 n.r.t. take a Pilot from Kilcredaun.

MAX. SIZE: 180,000 d.w.t. Max. draft 17 m.

RADIO/VHF/HEALTH: See "Limerick".

TUGS: Available. Number as directed by Harbour Master.

BERTHING: Length of berth 380 m. Depth alongside 25 m.

CARGO GEAR: 2×40 tonne ship unloaders will give a coal discharge rate of 1,500 t.p.h. 1 H.F.O. Marine Arm.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Available from road tanker.

CUSTOMS ALLOWANCES: See "Limerick".

REPAIRS: Limited repair facilities.

REPATRIATION: See "Limerick".

TIME: See "Limerick".

SHORE LEAVE: No restriction.

TELEPHONE: At jetty.
EMERGENCY CO-ORDINATION: See "Limerick".
STORING: No restrictions provided adequate notice is given to E.S.B. Money Point.
SURVEYORS: See "Limerick".
BANKS: See "Limerick".
AUTHORITY: Limerick Harbour Commissioners (See "Limerick").

(e) **AUGHINISH ISLAND ALUMINA PLANT:**
LOCATION: On South side of estuary, 2 miles N.E. of Foynes Island. 52° 38′ N. 9° 03′ W.

"L" Shaped Jetty with outer and inner berths. Outer berth: 12 m. draft LWOST, length of jetty head 275 m., plus 68 m. to dolphin.

Inner berth: 11 m. draft LWOST. Berth 230 m. long. Inner berth worked only on flood tide.

DOCUMENTS: See "Limerick".
ANCHORAGES: Vessels normally anchor 2.5 – 3 miles West of Scattery.

Anchorage also at Cahircon opposite Foynes Island if awaiting tide.

PILOTAGE: Compulsory from Scattery. Vessels over 3,000 n.r.t. take a Pilot from Kilcredaun.
RESTRICTIONS: Contact Port Control.
MAX. SIZE: Outer berth 70,000 d.w.t. Inner berth 30,000 d.w.t.
RADIO/VHF/HEALTH: See "Limerick".
TUGS: Available. Number as directed by Harbour Master.
CARGO GEAR: *Outer Berth:* 1 Bauxite Unloader (Krupp) 18,000 tons per 24 hr. day. 1 Alumina Loader (Claudius Peters) 24,000 tons per 24hr. day.
Inner Berth: 1 HFO Marine Arm 12 in. connection to 18 in. shore line and 1 Caustic Marine Arm 10 in. to 12 in. shore line.
DENSITY: Average 1013 – varies with tidal and seasonal conditions.
FRESH WATER: Available.
FUEL: Not available in bulk.
CUSTOMS ALLOWANCES: See "Limerick".
REPAIRS: Limited repair facilities.
REPATRIATION: See "Limerick".
TIME: See "Limerick".
SHORE LEAVE: No restriction other than company security controls.
TELEPHONE: At jetty.
EMERGENCY CO-ORDINATION CENTRE: See "Limerick".
STORING: No restrictions provided adequate notice is given by Chandler to Aughinish Alumina (Tel: 061-49488).
SURVEYORS: See "Limerick".
BANKS: See "Limerick".
AUTHORITY: Limerick Harbour Commissioners (See "Limerick").

SLIGO: 54.16 N. 08.28 W.

STEVEDORES: 24 hours notice required. Average discharge rate: Coal and timber 150 t.p.h. Fertilisers in bags 2 gangs, 500 tons per 8 hour day.
MEDICAL: Large regional hospital.
DENSITY: 1004, high tide.
FRESH WATER: Available by hose, at 12.5p ton.
FUEL: All grades available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES:
Register.
Articles.
Light Dues Certificate.
Derat Certificate.

CUSTOMS ALLOWANCES: (May be changed to metric in near future). Members of crew who remain on a vessel during stay in port allowed to retain, under certain conditions, the following quantities of the undermentioned goods:

Tobacco in any form (to cover 8 days): Master 8 oz. 200; Officers 6 oz. 150; crew members 4 oz. 100.

Spirits in any form (to cover 4 days) 1 pint (1 bottle each). Wine of any strength, allowed in place of spirits at rate of one pint wine to 0.5 pt. spirits. In addition, an allowance of 1 quart of beer or 1 pint of wine per man per day.

Members of a crew of whatever rank finally leaving vessel allowed take ashore, free of duty, for own personal consumption, following quantities of undermentioned goods, when they form whole of their unconsumed stores:

(a) If from ports in Great Britain, Northern Ireland or the Isle of Man, or continental ports between the Elbe and Brest (except vessels crossing at regular and frequent intervals): Tobacco in any form 4 oz. Spirits (ordinary drinkable) 0.25 pint. Spirits (Cordials or perfumed) 0.25 pint.
(b) If from any other port, double the quantities specified at *(a)*.
(c) Irrespective of the port from which arriving.

IDENTIFICATION CARDS: Required.
CONSULS: Netherlands Vice-Consul, Sligo 2622.
REPAIRS: Welding and light repairs.
REPATRIATION: Facilities exist.
AIRPORT: Strandhill, Sligo.
TIME: GMT plus 1 hour. Reverting to GMT between October and March.
HOLIDAYS: St. Patrick's Day (17th March); Easter Monday; Whit Monday (1st Monday in August); Last Monday in October; 25th and 26th December. Not usual to work on any of these days.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: None available for placing on board.
GENERAL: In N.W. gales, shelter available at Killybegs, Donegal Bay. In Southerly gales shelter in Killala Bay.
SHORE LEAVE: Allowed.
AUTHORITY: Sligo Harbour Commissioners, Harbour Office, Custom House Quay, Sligo, Co. Sligo. *Tel:* 071-61197. *Contact:* Secretary.

WATERFORD: 52.15 N. 07.07 W. (See Plan)

DOCUMENTS:
3 Manifests.
1 set Bills of Lading.
1 Crew List (aliens).
1 Ship Stores List.
1 Passenger List.

PILOTAGE: Compulsory. Tel. Address "Waterford Pilots" 24 hours ETA if possible. Tel. Dunmore East 83119. VHF call sign "Waterford Pilots". Channel 16 calling up, Channel 14 working.

Pilot boat black hull with words "Pilots" in white on sides. Location off Dunmore East Pier.

In event bad weather a vessel is directed to Passage East by VHF where a Pilot will board in smooth water.

ANCHORAGE: Good anchorage on Eastern Shore at entrance to Harbour in Easterly winds. 30 ft. LWOST.
RESTRICTIONS: Draft restricted by 2 bars. At Duncannon, a sand bar with a low water depth of 14.5 ft. The other at Cheekpoint with low water depth 11.5 ft.

Vessels of deeper draft await tide at Dunmore East Anchorage.

MAX. SIZE: 450 ft. LOA normally; 475 ft. LOA by arrangement. Draft 22 ft. neap tides; 24 ft. spring tides. 5,000/7,000 d.w.t. or 10,000 d.w.t. partly laden.
HEALTH: Vessels fly "Q" flag, pratique given by Customs. Infectious diseases to be notified to Agent before arrival.
TUGS: No tugs available.

Also various Pontoons, etc., for Livestock loading.
There are various other cranes – 10 ton mobiles, forklifts, travel-lifts up to 28 tons, etc., available.

RADIO: Messages through Land's End or Valentia Radio Stations.

VHF: Harbour Commissioners have VHF station at Dunmore East, Channel 14 for calling, Channel 16 working. A watch is kept at the station during the following hours: 0000 to 0100 hrs., 0400 to 0500 hrs., 0800 to 0900 hrs., 1200 to 1300 hrs., 1600 to 1700 hrs. 2000 to 2100 hrs.

The geographical position of the R.T. Station is: Latitude 52° 08′ 45″ North. Longitude 6° 59′ 30″ West.

BRIDGES: Times of passing through Redmond and Suir Bridge for National Board and Paper Mills Berth and for vessels proceeding upriver to Fiddown, to be arranged by Ship's Agent.

STEVEDORES: Agent arranges discharge upon receipt of ETA.

Grain discharge: 2,400 tonnes per day (300 t.p.h.).
Coal discharge: 600 tons per gang per day.
Sugar discharge: 800 tons per gang per shift of 8 hours.
Fertiliser discharge: 400 tons per gang per day.
Timber discharge: 30 standards per gang per day.

MEDICAL: Hospital and ambulance available. Arrangements made by ship's Agent.

TANKERS: Great Island Jetty, used by Electricity Supply Board. Max. design size 20,000 d.w.t. However approach channel of river and Duncannon Bar not yet dredged for this size.

DENSITY: 1008 at LWOST.

FRESH WATER: Available by hose 15 t.p.h.

FUEL: Supplies available by road tanker.

GANGWAY/DECK WATCHMEN: Day watchmen not necessary. Night watchmen at Master's request.

OPENING/CLOSING HATCHES: By crew.

CERTIFICATES:

Register.
Freeboard Certificate.
Tonnage Certificate.
Derat Certificate.
Radio Certificate.
Life-saving Appliance Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco: Master 8 oz. Officers 6 oz. Crew 4 oz. Wine and/or Spirit: 1 pint spirits.

CARGO GEAR: Not beyond ordinary Factory Act requirements.

IDENTIFICATION CARDS: Not needed.

CONSULS: Belgium, France and Netherlands: Mr. D. Hannigan, Bell Lines Ltd., Tel. 051-77021.

Spanish – Mr. I. Farrell, c/o Nolan, Farrell & Goff, Newtown, Waterford, Tel. 72934.

REPAIRS: Minor repairs.

DRY DOCKS: No dry docks available.

REPATRIATION: Facilities exist.

AIRPORT: Waterford 5 miles, Dublin 100 miles, Cork 75 miles, Shannon 75 miles. Served by regular airlines.

TIME: GMT plus 1 hour. Reverting to GMT in Winter months.

HOLIDAYS: St. Patrick's Day; Easter Monday; August Bank Holiday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: Police 74888; Ambulance 73321; Brigade 75555.

TELEPHONES: None available for placing on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Consideration being given to deepening the approach channel. The extension of the deep-water berths will have 25 ft. 8 in. alongside at LWST.

A new container crane under construction for Bell Lines.

AUTHORITY: Waterford Harbour Commissioners, Harbour Office, George's Street, Waterford, Ireland. *Tel:* 051-74907/8. *Contact:* M. F. McQuillan, General Manager. Captain J. A. O'Connor, Harbour Master.

WICKLOW: 52.59 N. 06.02 W.

PORT LIMITS: The seaward limits of the harbour are defined by a line drawn across the harbour entrance.

DOCUMENTS: Usual documents for Irish ports.

PILOTAGE: Pilotage is not compulsory. Should a Pilot be required, arrangements can be made through the Agent or the Harbour Office.

ANCHORAGES: A safe anchorage can be found anywhere in Wicklow Bay, except in N.E. or Easterly gales. A good anchorage can be found about 1 mile off the harbour entrance.

RESTRICTIONS: Deep draft vessels must dock at HW (see "Berthing"). Deep draft vessels lie safely aground at LW, the bottom consisting of soft mud.

MAX. SIZE: Max. length 91 m., max. draft 5 m.

HEALTH: See "Dublin".

RADIO: Anglesey Radio.

VHF: Calling – Channel 16, Working – Channel 14. Channels 2, 6, 7, 8, 26, 27 and 28 are also available.

Reception of port VHF only extends to about 10 miles offshore in a Northerly and Easterly direction and to about 4 miles offshore in a Southerly direction due to the signals being blocked by Wicklow Head. It is hoped to overcome these restrictions in the near future by raising the height of the aerial.

RADAR: No Port Radar.

TUGS: None.

BERTHING:

East Pier: 91 m. long, depths HW 5.2 m., LW 3.1 m. Not often used as the pier is exposed to North-Easterly winds and is only 7.3 m. wide.
Packet Pier: 93 m. long, depths HW 5.2 m., LW 3.1 m. Most used berth. Timber, bulk cement and bulk cargoes generally worked here.
North Quay: 130.1 m. long, depths HW 4.7 m., LW 2.8 m. Paper is worked at Northern end and the Southern end is in general use.
South Quay: 126.22 m. long, depths HW 4.9 m., LW 3.0 m. This quay is used for the export of woodchips in bulk.

CRANES: Mobile cranes are hired from local firms by stevedores or Agents. Max. lifting capacity is about 8 to 10 tonnes. For heavier lifts Agents or stevedores should be consulted.

BULK CARGO: Usually worked at East Pier or Packet Pier.

SPECIALISED CARGO-HANDLING FACILITIES: For bulk cement only.

BRIDGES: None.

STEVEDORES: Working hours 0800 – 1700 hrs. Overtime worked when required.

MEDICAL: Full medical facilities available. It is desirable if possible to give advance notice of any medical attention that may be required.

TANKERS: There are no tanker berths.

DENSITY: Varies between 1012 at LW to 1025 at HW.

FRESH WATER: Available at all quays.

FUEL: Gas oil is readily available and is brought to the ships' side by road tanker. Other types of fuel would need to be specially ordered.

FIRE PRECAUTIONS: Normal precautions only.

CONSULS: Nearest at Dublin.

REPAIRS: Only small repairs can be carried out.

DRYDOCKS: None.

SURVEYORS: Cargo surveyors can be contacted at Dublin or locally if necessary.

Lloyds' Register of Shipping, 2 Lower O'Connell Street, Dublin 1.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Operated by vessel's crew.

CUSTOMS ALLOWANCES: As per European Economic Community (E.E.C.) Regulations.

CARGO GEAR: Shore cranes or vessel's gear may be used.

REPATRIATION: Arranged by Agents.

AIRPORT: Dublin, 40 miles away.

TIME: GMT, Summertime GMT plus 1 hour (March – October).

HOLIDAYS: See "Dublin".

POLICE/AMBULANCE/FIRE: Dial 999 or Police Tel: 2107/2287, Ambulance Tel: 2108, Fire Tel: 2371, Harbour Office Tel: 2455.

TELEPHONES: No facilities for placing telephones on board ship.

SERVICES: By contacting the ship's Agent all services are available. There is a waste oil disposal service. Nearly all services like radio and radar repairs, nautical publications, etc. are supplied from Dublin.

BANKS: Bank of Ireland Ltd., Main Street, Wicklow. Tel: 0404-2376. Allied Irish Banks Ltd., Abbey Street, Wicklow. Tel: 0404-2311 and 2051.

STORING: See "Prelims".

1. Stored by Truck.
2. Barge storing at Harbour Master's discretion.
3. Trucks can proceed alongside the vessel.
4. Fork lift trucks can be used.
5. Normal Customs Regulations in Ireland. Consult local Officer.
6. Local people can be employed.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Seaman's book is sufficient.

DELAYS: Tide restrictions only.

SHIP SUPPLY SERVICE: Contact: R. F. Conway & Co. Ltd., North Quay, Wicklow: Tel: (0404) 2210/2019. Telex: 25719. Telegram: Conway, Wicklow.

DEVELOPMENTS: Recently an uncovered storage area of approx. 1,162 sq. m. has been added to the Packet Pier area.

AUTHORITY: Wicklow Harbour Commissioners, North Quay, Wicklow, Co. Wicklow, Ireland. *Tel:* 0404-2455. *Contact:* Captain R. F. Flood, Harbour Master and Secretary.

Israel

GENERAL:

All vessels bound for the ports of Haifa, Ashdod and Ashkelon have to send a position report when they arrive at a distance of 50 miles from the Israeli coast. Such position reports shall be sent to "SVC IMOT" and shall contain the following information: (a) Date and time; (b) Ship's name; (c) Position; (d) Course; (e) Speed; (f) Destination.

ASHDOD (Inc. Ashkelon): 31.49 N. 34.39 E. **(See Plan)**

DOCUMENTS:

3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.
Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 72 and 48 hours before arrival holds workable and gangs required also draft forward and aft on arrival.

PILOTAGE: ETA through Haifa Radio 4XO addressed to Agent at least 12 hours before arrival. Pilot station and boat equipped VHF Channel 14 and 16 contact station for instructions. Pilot boards about 0.5 miles off port entrance between W. to N.W. from breakwater head (green light).

In bad weather, when boarding impossible, vessel is guided into harbour by VHF or tugboat waiting at entrance, at Master's consent.

Pilot ladder as per Safety of Life at Sea. Vessel should head about 4 points off the wind. Recommended 2 life-lines running along ladder, 1 each side, ropes 2.5 in. – 3 in. circumference.

ANCHORAGE: All area open sea, no recommended safe anchorage, but vessel should avoid anchorage near fairway and too close to oil installation buoys.

Masters are advised to keep the decks well lit in view of the strong lights ashore which may cause the anchor lights to be seen with difficulty by approaching vessels.

Vessels moored to the breakwaters shall have their anchor lights burning.

RESTRICTIONS: Pilotage available 24 hours. Enter according arrival time or berths available. Vessels at anchorage awaiting berth keep watch Channels 14 and 16.

MAX. SIZE: Draft limitations at Bulk Pier: Summer, 11 m. Winter, 10.5 m. Draft limitations at other piers: 9.8 m. No. limits length or breadth. Also see "Tankers".

HEALTH: Free pratique is requested via Haifa, address, "Quarantine Haifa".

RADIO: Haifa Radio 4XO, also see "Haifa".

TUGS: 1 of 1,500 h.p., 1 of 1,000 h.p. and 1 of 2,800 h.p. Each charge included in pilotage charge for normal berthing attendance. Tugs wait at port entrance and act on Pilot's instructions. Vessel's lines are requested.

BERTHING: Container terminal in operation.

TANKERS: Terminal situated at Ashkelon where tankers load crude oil by under-water pipe-lines. Size of vessel is unlimited due to the depth of water. The loading rate is about 30,000 tons in 12 hours. All services such as supply of bunkers, provisions, water, crew changes, must be carried out at Ashdod roadstead where health and immigration officials board. Vessels not requiring any services at Ashdod may call directly at Ashkelon, only paying light dues and anchorage dues.

FRESH WATER: Fresh water supplied by hydrants at 220 t.p.h.

FUEL: Supplied by trucks, or supplied by special barges. 24 hours advance notice required.

CONSULS: All Consulates in Tel-Aviv approx. 40 km. Available by telephone.

REPAIRS: No dock, but minor repairs effected.

GANGWAY/DECK WATCHMEN: Private companies supply gangway watchmen, obtainable through Agent.

OPENING/CLOSING HATCHES: Performed by stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of GMT.

AIRPORT: Lod Airport, served by regular airlines, distance 35 km.

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; The 2 days of the Jewish New Year (Rosh Hashana); The Day of Atonement (Yom Kippur); The first and the last day of the Feast of Tabernacles (Sucot); The first and the last day of Passover (Pesah); Pentecost (Shavuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

POLICE/AMBULANCE/FIRE: Police, Ambulance, Fire Services, telephone 22222.

REGULATIONS:

Stand-by for Moving Vessels: The Master or person for the time being having charge of a vessel shall ensure that adequate officers and crew are available and that the main propelling machinery of the vessel is maintained for moving the vessel at 1 hour's notice.

No vessel may drop steam, dismantle engine or otherwise interfere with the propelling power of the vessel, nor may the vessel be left unattended by responsible officers and crew unless permission to do so is first obtained in writing from the Harbour Master.

Photography: Photography in the Port Area is strictly forbidden without a written permit issued by the Security Officer of the Port.

Swimming: Swimming in Ashdod Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of Ship's Boats: The use of ship's boats is forbidden in Ashdod Port. Launch service is available for the convenience of ship's personnel.

Shore Leave: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police.

All breakwaters are out of bounds to crews of merchant vessels.

SHIPMASTER'S REPORT: 1978.

Pilotage: Compulsory. Pilot boards off the breakwater. Pilot requires 1 hours notice of vessels arrival.

Anchorage: Outside breakwater.

Restrictions: Vessels able to berth and unberth at any stage of the tide day or night.

Health: Radio pratique possible. Quarantine officials require 12 hours and 24 hours notice of vessel's arrival.

Radio: Haifa Radio.

VHF: Channels 16, 12 and 14. Pilot and Port Authority use Channel 14.

Tugs: Tugs available and are used depending on berth.

Berthing: Vessel berthed at berth No. 4/190. Exact location is No. 1 North pier. Conditions at the berth poor due to swell and undercurrent. Nature of the bottom sand/mud. Bulk handling facilities for handling phosphate available in the port. There are 30 quay cranes available. Ro/Ro facilities available. There is ample mechanical equipment for handling of palletised cargoes. There is also adequate storage space for breakbulk and palletised cargoes. There are 3 gantry cranes available for handling containers, also ample storage space for containers. Accommodation ladder required.

Density: 1025.

Identification Cards: Crew members to have passport photograph for landing pass (this is best carried out at previous port).

Services Available: Fresh water, fresh provisions, repair facilities, machine shop, Lloyd's Surveyor, Salvage Surveyor, laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats.

SHIPMASTER'S REPORT: 1979.

Documents:

1 Police Condition Slip
1 Customs Condition Slip
3 Crew Lists
1 List Ship's Stores and Bond

Pilotage: Compulsory. Pilot boards 0.5 miles from breakwater.

Restrictions: Vessels may berth and unberth at any stage of the tide day or night.

Health: 24 hours before arrival request radio pratique from "Quarantine Haifa".

Radio: Haifa 4X0.

VHF: Pilot and Port Authority on Channels 16 and 14.

Tugs: 3 tugs available 1×3,000 h.p., 1×1,500 h.p., 1×1,000 h.p. The use of tugs depends on which berth used and also which direction the vessel will be heading.

Berthing: North Quay: Berths 101, 102, 103: berths located just inside the breakwater, max. draft permitted 10 m., density alongside 1029. Accommodation ladder required.

Bulk Handling Facilities: Phosphate loading facilities available.

Cranes: 9×30 tons at 15 m. (15 tons at 25 m.).
9× 8 tons at 15 m. (4 tons at 25 m.).
Ample mobile cranes available.

Special Cargo Handling Facilities: Ro/Ro facilities available. 3 container gantries available. Ample storage space for breakbulk cargoes, palletised cargoes and containers.

Stevedores: Labour normally refuses to rig derricks or handle hatches.

Working Hours: Sunday to Thursday (inclusive):
First Shift 0630 and 1400 hrs.
Second Shift 1500 and 2145 hrs.
Friday: First Shift 0630 to 1300 hrs.
Second Shift 1300 to 1530 hrs.
Saturday — No work.

Services Available: Fresh water, fresh provisions, repair facilities, machine shop, Lloyd's Surveyor (from Haifa), Salvage Surveyor (from Haifa), laundry services, bunker fuel oil, diesel oil, lubricating oil, doctor and hospital, groceries and meats. Nearest airport is at Tel-Aviv.

AUTHORITY: Israel Ports Authority, Port of Ashdod, P.O.Box 9001, Ashdod, 77191 Israel. *Tel:* 55 – 28280, 55 – 21106. *Telex:* 371818. *FAX:* 5524956. *Cables:* Ashnam – Ashdod. *Contact:* Harbour Master.

AGENT: Carmel Shipping Ltd., Port Area, Block 9, P.O.Box 4020, Ashdod, Israel. Tel: 055-21334, 055-24811, 055-31022. Telex: 381183 Cisas IL. Cables: "Carmelship Haifa".

EILAT (Elath): 29.32 N. 34.57 E. **(See Plan)**

DOCUMENTS:

For Customs:

Customs Questionnaire, Crew Customs Declaration, Stores List, Crew List, Passengers List, Foreign Currency List, Narcotics List, Arms List, Import Cargo Manifest, Transit Cargo Manifest.

For Quarantine:

International Quarantine message may be sent, addressed "Quarantine Eilat" via Haifa Radio (4XO), to obtain free pratique. Maritime Declaration of Health, Valid Vaccination Certificates for all crew and passengers, Derat Exemption Certificate.

For Border Control (Immigration):

1 Police Questionnaire, 2 Crew Lists, 2 Passenger Lists, Seamen's Books and travelling documents of passengers.

PILOTAGE: Compulsory, ordered through Agent. When unable to contact Agent, Pilot can be ordered by contacting Harbour Master by Haifa Radio, or by VHF Channel 14. Vessel due to berth awaits opposite oil installations located approximately 2.5 cables South of the main jetty. Vessels requesting Pilot for anchoring stop opposite the North end of the main jetty. Tankers waiting Pilot for oil installations to stop 0.5 miles South of oil installations. Pilot motor launch, red hull, green superstructure amidships stationed at North end of main jetty. Pilot ladder complying with all safety regulations and properly lighted during dark hours is necessary. Vessels awaiting Pilot should anchor only in designated area.

ANCHORAGES: Boundaries of area marked by lines connecting following positions;

(A)	Lat. 29° 32′ 51″ N.,	Long. 34° 57′ 19″ E.
(B)	Lat. 29° 32′ 26″ N.,	Long. 34° 58′ 34″ E.
(C)	Lat. 29° 31′ 40″ N.,	Long. 34° 58′ 27″ E.
(D)	Lat. 29° 32′ 31″ N.,	Long. 34° 57′ 06″ E.

Average depth 25 fathoms. If arriving at port for first time, do not try anchoring anywhere outside anchoring area.

Anchorage positions will be alloted by Port Control – call sign "Yamit" on VHF Channel 14.

Anchorage Positions:

(1)	Lat. 29° 32.62′ N.,	Long. 34° 57.37′ E.
(2)	Lat. 29° 32.49′ N.,	Long. 34° 57.64′ E.
(3)	Lat. 29° 32.37′ N.,	Long. 34° 57.97′ E.
(4)	Lat. 29° 32.25′ N.,	Long. 34° 58.31′ E.
(5)	Lat. 29° 32.37′ N.,	Long. 34° 57.34′ E.
(6)	Lat. 29° 32.17′ N.,	Long. 34° 57.70′ E.
(7)	Lat. 29° 32.06′ N.,	Long. 34° 58.04′ E.
(8)	Lat. 29° 31.96′ N.,	Long. 34° 58.37′ E.
(9)	Lat. 29° 32.22′ N.,	Long. 34° 57.02′ E.
(10)	Lat. 29° 32.02′ N.,	Long. 34° 57.29′ E.
(11)	Lat. 29° 31.82′ N.,	Long. 34° 57.65′ E.
(12)	Lat. 29° 31.69′ N.,	Long. 34° 58.06′ E.

MAX. SIZE: For berthing alongside main cargo jetty, length 528 m., max. draft up to 39 ft.

Additional cargo jetty length 170 m., max. draft up to 19 ft.

North Oil Jetty accommodates tankers up to 125,000 d.w.t. with draft of 56 ft.

South Oil Jetty can accommodate tankers up to 500,000 d.w.t. Depth of water alongside 94 ft.

HEALTH: Free Pratique may be requested by cable via Haifa or via Eilat Radio from Quarantine Authorities. If suspected disease or fever on board immediately advise Quarantine Eilat with all details.

RADIO: Communication via Haifa Radio 4XO. Full details working hours and frequencies found in "Admiralty List Radio Signals" and similar publications. Good radio connection with Eilat can be obtained also via Haifa Radio, call sign 4XO, operating continuously.

TUGS: Tugs meet vessel off quay. Lines not usually used as tugs usually push. When needed, ship's lines used. 1 tug 2,750 h.p., 1 tug 960 h.p., 1 fire-fighting tug 280 h.p. and 5 tugs 100 – 180 h.p.

BERTHING: No difficulty except at times of strong Southerly winds when small vessels may have to leave quay and proceed to anchorage or sea, due to strong swell.

Additional cargo quay 662 ft. in length with max. draft alongside of 22 ft. completed and brought into operation.

BULK HANDLING FACILITIES: Bulk elevator for bulk loading (Phosphate & Potash) capacity 800 m.t.p.h.

Storage Area:

Sheds – 17,000 sq.m.
Open storage – 55,000 sq.m.
Cold storage warehouse – 500 tons.
Bulk potash shed – 80,000 tons.
Phosphate bulk shed – 35,000 tons (3,300 sq.m.)

CRANES: 1 electric driven crane S.W.L. 50 tonnes. 1 electric driven crane S.W.L. 35 tonnes. 4 electric driven cranes S.W.L. 25 tonnes, when coupled S.W.L. 48 tonnes per couple. 1 diesel/electric driven crane S.W.L. 15 tonnes. 1 diesel driven crane S.W.L. 60 – 80 tonnes. 6 diesel driven cranes S.W.L. 7 – 13 tonnes.

Port is fully equipped for container handling. Container traffic exceeds 39,500 TEU's.

STEVEDORES: Booked by ship's Agent. All details of cargo distribution and storage to be cabled in advance to Agent.

Port Working Hours:

Summer: (May 16th – October 15th)
Sunday – Thursday 0530 – 1330 and 1600 – 2300 hrs.
Friday 0530 – 1230 and 1400 – 2000 hrs.
Winter: (October 16th – May 15th)
Sunday – Thursday 0600 – 1400 and 1530 – 2230 hrs.
Friday 0630 – 1300 and 1400 – 2000 hrs.

MEDICAL: Hospital facilities available.

DENSITY: 1028 (Winter), 1030 (Summer).

FRESH WATER: Available in unlimited quantities and supplied at all jetties. No facilities for supplying fresh water at anchorage.

FUEL: All grades supplied in any quantity by barge.

OPENING/CLOSING HATCHES: Normally by stevedores.

CUSTOMS ALLOWANCES: Every Crew member is permitted to keep 200 cigarettes or equivalent amount of other tobacco, out of bond. Every crew member is permitted to keep 1 bottle of spirits and 1 bottle of wine, out of bond.

IDENTIFICATION CARDS: Every crew member going ashore should have a shore leave pass. Shore leave passes will be received from the border control officer after the vessel is cleared.

CONSULS: There are no consulates in Eilat. All consulates are in Jerusalem or in Tel-Aviv.

REPAIRS: All afloat deck and engine repairs can be performed by local workshops.

DRY DOCKS: Syncrolift with lifting capacity of 1,200 tons.

REPATRIATION: There are facilities for arranging repatriation or crew changes.

AIRPORT: Eilat Airport is used at present for internal traffic only. There are 8 flights daily from Eilat to Tel-Aviv except on Saturdays. From Tel-Aviv there is good transportation to Lod International Airport.

TIME: Local time is GMT plus 2 hours; no Summer time is kept.

HOLIDAYS: No cargo work is usually performed during official holidays or Saturdays. The official holidays are: Passover (2 days during April); Independence Day (1 day end April/beginning May); First Harvest Day (1 day end May/beginning June); Jewish New Year (2 days, September); Day of Atonement (1 day end September); Feast of Tabernacles (2 days, October). No cargo work is usually performed during 1st of May although it is not an official holiday.

TELEPHONES: At present there are no facilities to arrange telephones on board ships.

TELEPHONE NUMBERS:

Eilat Port Management	059-72191/8
Harbour Master	059-71319 (office) 059-76868 (after office)
Oil Pipe-line	059-76171
Immigration	059-72590
Hospital	059-73151

SHORE LEAVE: Crew members are granted shore leave.

DELAYS: Normally vessels arriving after midnight are berthed only at daybreak, before the beginning of the morning shift.

GENERAL: Meteorological: Weather warnings if any are issued and delivered to vessels upon receipt.

AUTHORITY: Israel Port Authority, Port of Eilat, P.O.Box 37, Eilat, Israel. *Telex:* 07721. *Cables:* Namsuf Eilat. *Contact:* D. Segal, Port Manager – Tel: (office) 059-72916, (home) 059-72387. Captain P. Earon, Acting Harbour Master.

AGENT: Carmel Shipping Ltd., P.O.Box 1015, Haifa 31009, Israel. Tel: 04-530041-2, 04-515396. Telex: 46550 Carml IL, 46821 Carml IL. Cables: "Carmelship Haifa".

HADERA: 32.28 N. 34.53 E. (See Plan)

LOCATION: About half-way between Haifa and Tel-Aviv. The terminal is used for the importation of coal for the adjacent power station.

PILOTAGE: Compulsory. Also see "General".

ANCHORAGE: See "General".

APPROACHES: *Lights and Shore Features:* The 2 Power Station Buildings which are about 80 m. high, the twin chimneys which are 254 m. high and the pier with its 2 gantry cranes are very outstanding features on the otherwise rather flat coast. The pier is a very conspicuous radar target.

A vessel approaching in darkness will be able to distinguish the port by the set of red and white lights on the chimneys, and a fixed red light at the Western extremity of the pier. The Mount Carmel Light and Mikhomoret Light will also be in sight.

There are red and green flashing lights at the entrance to the cooling-water basin, and a flashing white light on the North-Westerly buoy of the multi-buoy installation.

VHF: VHF radio installed to communicate with ships, tugs and other craft on matters relating to the port's operation.

TUGS: 2 tugs, about 40 tons pull each, with fire-fighting equipment 2 boats function as mooring, passenger and pilot boats.

BERTHING: The port's installations consist of:

1. An off-shore coal unloading terminal consisting of a pier (300 m.×24 m.) which is constructed 1.8 km. from the Shore Line. It is connected to the shore by an approach jetty on piles.

Minimum water depth at the pier – 20 m. It is designed for ships of up to 180,000 d.w.t.

The height of the pier above MSL is 14 m. There are 11 breasting and mooring dolphins along its North side, their height above the sea is 4.5 m. Quick-release hooks installed where applicable.

Ships are moored to the North side of the pier with their bow to seaward.

Discharging the ship's cargo is done by 2×35 ton gantry cranes.

2. A cooling water basin for the supply of sea water to the station condensers is also used by the port's craft. The water's depth in the navigable area is 5 m.

MEDICAL: First aid is given at the Regional Hospital at Hadera.

TANKERS: There is a fuel oil unloading terminal, about 1.5 km. North of the coal pier, where tankers are made fast to a multi-buoy system and fuel is pumped ashore through a 32 in. submarine pipe-line. Water depth is 18 m. and ships of 70,000 d.w.t. can be accommodated.

FRESH WATER: Available to the pier.

FUEL: Arranged by Agent.

REPAIRS: Arranged by Agent.

STORES: Arranged by Agent.

GENERAL: *Instructions to Ships' Masters:*

1. Please keep the port informed of your ETA, any changes in your original notice should be communicated to your Agent.

2. Your VHF Channels 16 and 10 should be used for radio contact with the port when approaching and when your ship is anchored.

3. The Pilot will prefer to board your vessel when in a position 1 mile North of the jetty, and bow Southward; the same position is also the best for anchoring if your ship does not berth on arrival.

4. Your pilot ladder should be as directed by IMO Regulations, properly cleaned and secured.

5. Due to the exposed position of the berth, constant and thorough attention to the mooring lines should be carried out. Generally the moorings will consist of:

A. Forward:	B. Aft:
4 Head Lines.	4 Stern Lines.
2 Breast Lines.	2 Breast Lines.
2 Springs.	2 Springs.

All head and stern lines must be fibre ropes-polypropylene or others. Breast lines and springs, if not made of fibre must have fibre tails, 15 m. – 20 m. long. Starboard anchor with about 8 shackles will also be used.

6. When the ship is moored to the jetty.
   (a) Main engines, steering, windlasses etc., should be in working order. Any fault or damage to be repaired immediately and the port to be informed.
   (b) The ship shall always have sufficient officers and crew onboard so as to be able to leave the jetty in an emergency.
   (c) Mooring lines should be continuously checked for wear, load distribution, etc., and any irregularity tended to.
   (d) All ballast tanks, including holds designed for water ballast, to be filled as soon as possible.
   Cargo holds into which water ballast will be pumped should be the first to be emptied of cargo.
   (e) The vessel to keep herself informed on expected weather conditions.
   (f) Constant – tension winches should not be in operation for head and stern leading lines simultaneously.
   (g) Do not change your mooring lines nor re-arrange them, unless the Duty Pilot is consulted.

7. Oily water should not be pumped, nor garbage be thrown overboard.

For ships that have to pump out oily water of any source, there is a reception tank and a separator on the jetty.

Ship's garbage should be put in plastic bags and loaded into a supplied container.

8. You have to get permission before doing:
   (a) Welding work, anywhere on the ship.
   (b) Diving work at the ship's hull.
   (c) Lifeboat exercises.

9. The ship has to inform the Port immediately about any accident, fire, explosion, leakage etc. on or near the ship.

10. The above instruction to Masters are based on the Ports' Ordinance and Regulations, issued by the Israeli Ministry of Transport.

SHIPMASTER'S REPORT: December 1982 (Updated 1986).
Documents: See "Haifa".
Pilotage: Compulsory. Pilot joins vessel approximately 1 mile off jetty.
Anchorage: Recommended approximately 1 mile 345° of end of jetty.
Max. Size: 200,000 d.w.t. Least depth of water alongside 20.0 m.
Radio: See "Haifa".
VHF: Continuous watch on Channels 16 and 10, working on Channel 10.
Health: See "Haifa".
Tugs: Two available, 4,000 h.p. (approx.).
Berthing: Ships moor port side alongside, head out to sea.
Bulk Handling: Coal: 2 large overhead gantry cranes with grabs of approximately 20 tonnes capacity having an outreach of approximately 40 m. and at present discharge coal by endless conveyor belt system, rate approximately 28,000 tons per day. During 1985 3 million tons were discharged from 22 vessels.
Tankers: There is a tanker mooring consisting of six buoys and an underwater pick up/discharge point close North of the jetty.
Density: 1030.
Medical: Facilities available, via Tel Aviv or Haifa.
Fresh Water: Laid onto jetty. Ship to supply own connections and hoses.
Fuel: Available via lighter from Haifa. Small quantities can be delivered by truck.
Repairs: Limited, via Haifa.
Surveyors: Cargo inspectors and surveyors of most associations available, arrangements via Agent.
Stevedores: 24 hours per day except Saturdays and holidays.
Gangway Watchmen: Not required. Very strict watch kept at installation gates.
Opening/Closing Hatches: Mechanical hatches by crew.
Customs: See "Haifa".
Identity Cards: See "Haifa".
Airport: Tel Aviv Airport approximately 50 km.
Holidays: Same as "Haifa".
Shore Leave: See "Haifa".
General: All ships proceeding to Israeli ports report as per "Admiralty List of Radio Signals" Vol. 6, Part II, Page 320 and "Guide to Port Entry".

Documents, etc. as for Haifa, from which Port Immigration/Customs/Police etc. cover Hadera. Vessel will be cleared at anchor on arrival if berth is already occupied.

Hadera is a new port constructed to serve a new power station in position Lat. 32° 28′ 08″ N., Long. 34° 53′ 10″ E. Two conspicuous grey cement chimneys, with red lights at night together with the power station and a jetty extending a mile out to sea make the place easy to identify. No difficulties in the approaches. The port has been in operation since April 1982. First vessels being discharged at anchor by derrick barge, but since September has been accepting vessels alongside the new jetty extending 1 mile out to sea into deep water. There is a new small boat harbour on the North side at the root of the jetty, equipped with quay and cranes.

Berthing, approach jetty from the North, letting go starboard anchor when approximately 1 cable off to assist in swinging and for heaving off when sailing. Two tugs used for berthing, they are based in the small boat harbour, only one used when sailing. Use tug's ropes.

Working part of jetty is 300 m. long and is 14 m. above sea level, is on two levels. Lower level (Skeleton) is for moorings, which are adequate and fitted with remote control quick release gears in case of bad weather in Winter as jetty is very exposed. (Vessel before this vessel had to vacate berth for 40 hours, due to swell.) Good fendering.

No pedestrians allowed along jetty. Transport is arranged with Agents/Power Station Authorities.

Shore gangway provided.

Stores/Laundry can be taken/delivered by a truck via jetty.

Hatch "cleaning" is by contract labour. If started early enough they make a reasonable job to re-deliver 'shovel clean'. Notice of Readiness accepted as of the time vessel anchored awaiting berth.

Crew change facilities exist via Tel Aviv Airport. Incoming report to Haifa Immigration Control and deposit passports for passes. Homegoing members have to be in possession of air tickets before leaving vessel.

SHIPMASTER'S REPORT: October 1985.

1. Agents, Harbour Master and Pilots are very co-operative.
2. There is always 1 Pilot and 1 tug on duty in case of rough weather.
3. Master receives a weather report twice daily from Harbour Master.
4. A "Supervisor" of National Coal stays on board to assist discharging when office is closed.
5. Agent (National Coal), Harbour Master (Hadera Port), Pilot (Hadera Pilot) and boat service (Solmar) all listen to VHF Channel 10 (call signs in brackets). If necessary at night Solmar will telephone the Agent at his home, and he will then call vessel on Channel 10.
6. Due to deck arrangements of our vessel the shore gangway could not be used. Vessel's gangway used and landed on fender.
7. The final trimming of cargo is poor and leaves lots of cleaning remaining for vessel's crew.
8. Due to distance to jetty (good fenders) it is not possible to use the transverse crane of the vessel for storing.
9. National Coal employs 4 time-chartered bulkers of 120,000 – 160,000 tons to supply the power station of Hadera with coal. The station consumes about 10,000 tons daily. About 5 more shiploads are needed yearly. Mostly panamax bulkers from U.K.

AUTHORITY: Port of Hadera, P.O.Box 314, Hadera, Israel. *Tel:* (063) 32976, 32250. *Telex:* 46272 Nph II. *Contact:* Port Manager or Captain Y. Braker, Harbour Master.

HAIFA: 32.49 N. 35.00 E. (See Plan)

DOCUMENTS:

1 Photograph of each member of the crew.
3 Crew Lists, and Crew Passports or Seamen's Books.
1 Provisions List.
1 List of Articles in possession each Crew member – cameras, binoculars, radios, cigarettes, tobacco, etc.
Master to declare firearms and rounds of ammunition.
4 Passenger Lists.

Stowage Plan and Manifest to be mailed in advance, preferable Master to cable 72 and 48 hours before arrival holds workable and gangs required, also draft forward and aft on arrival.

PILOTAGE: Compulsory for all merchant and foreign naval vessels. Pilotage service is rendered round the clock. Vessels are boarded by Pilot seaward of the main breakwater.

ANCHORAGE: Vessels shall not anchor within the prohibited areas and must keep clear of the fairways of the main harbour and Kishon Zone.

MAX. SIZE: The width of the entrance channel to the main port, between the main and lee breakwaters, is 183 m. The depth of the entrance is 12 m. The width of the entrance to the Kishon Harbour is 70 m., with a min. depth of 8.50 m. Vessels of max. draft 35 ft. can be safely accommodated in the main port: in the Kishon Harbour accommodation is limited to vessels of 27 ft. draft. Depth in both harbours are maintained by dredging at regular intervals.
Tankers: Up to 50 ft. draft at buoy moorings.

RADIO: Radio-telephone service from ship-to-shore and vice versa via Haifa Radio, call sign 4XO. Ships in port may also be connected to the Israeli telephone system.

The port has a signal station equipped with a modern 60 kw VHF installation, working on Channels 12, 14 and 16. The station is licensed for port operation only and is in continuous service. For all other ship-to-shore communication contact Haifa Radio, call sign 4XO.

The Israeli Meteorological Service broadcasts twice daily the weather forecast in English for East Mediterranean area over Haifa Radio.

Vessels approaching the coast of Israel shall report their position to the Israeli Authorities in accordance with the following procedure:

(a) Every foreign vessel bound for the ports of Haifa, Ashdod or Ashkelon shall send a position report to the Israeli Ministry of Transport (IMOT) via Haifa Radio (4XO). Such position report should be sent in the form of a free of charge service cable when the vessel arrives at a distance of 50 miles from the coast and it shall contain vessel's name, position, course, speed and destination.

(b) In addition to the report, in *(a)* above and according to the Ports' Regulations, every vessel (foreign or Israeli) entering the Israeli territorial waters shall send a position report which shall contain vessel's name, position, course, speed and destination and which shall be sent at the time the vessel enters territorial waters (6 miles) to:
(1) The nearest Port Operation Services, by means of VHF;
or
(2) The IMOT via Haifa Radio (free of charge service cable) in cases where VHF communication with the nearest port cannot be established.

HEALTH: Free Pratique by radio is granted on request by the International Quarantine Message to the Quarantine Station round the clock (including holidays) via Haifa Radio, call sign 4XO on 500 kHz.

Medical advice by radio for all ships may be obtained through Haifa Radio 4XO free of charge. Call "Medico Haifa".

There is no special quarantine anchorage.

TUGS: Vessels obtain tug assistance, if required, for entering or leaving the harbour and for shifting. 2 tugs of 1,500 h.p. and of 1,000 h.p.

BERTHING: Ships moor normally to wharves and jetties, and to a lesser extent stern to the main breakwater and alongside dolphins.

Main Harbour

The main harbour is situated on the Southern shore of Haifa Bay at Lat. 32° 48′ N., Long. 35° 01′ E. It is protected by 2 breakwaters: the main breakwater, 2,826 m. long, in the North, and the lee breakwater, 745 m. long, in the East.

The harbour basin covers an area of 1,038,000 sq.m. (about 255 acres). The main port's land area amounts to 642,000 sq.m. (about 158 acres).

Kishon Auxiliary Harbour

To the East of the main port, around the lower reaches of the Kishon rivulet, lies the Kishon Auxiliary Harbour. It consists of an outer harbour basin that is protected by 2 breakwaters of 600 m. and 350 m. length respectively, and a main channel of 1,045 m. length, of which the first stretch of 700 m., measured from the entrance to the outer harbour basin, has a depth of 8 m. while the second stretch of 345 m. has a depth of 6.50 m. A side channel, 213 m. long and 4 m. deep, which branches off the main channel toward the East, serves as a fishing dock. Another side channel 350 m. long and 8 m. deep serves as holding basin of the shipyard and the Chemicals Terminal.

Wharves	*Length (m.)*	*Depth (m.)*
Main Port		
Main Wharf	110	5.00
	120	5.40
	110	7.30
	500	8.60
	180	10.00
	290	10.70
	210	11.00
Cargo Jetty A	205	6.80
C	107	6.80
Oil Jetty	350	10.00
East Lighter Wharf	110	4.20
Kishon Zone		
Cargo Wharf	355	8.50
	285	8.50
Fishing Dock	213	4.00
Chemicals Wharf	325	8.50

BULK HANDLING FACILITIES: *Coal:* Coal imports are usually handled by grabs fixed to shore cranes.

Grain: 2 mobile elevators on main wharf with combined unloading capacity of 590 t.p.h. A third elevator has a nominal capacity of 600 t.p.h.

Chemicals: Chemicals in liquid bulk unloaded and loaded at chemical tank farm in Kishon Zone. Terminal jetty suitable for tankers up to 20,000 d.w.t. with draft 22 ft. 6 in. Storage capacity 45,000 cu.m.

Containers: Presently containers are discharged and loaded in the Western area of the port and Kishon Harbour, having all facilities to handle 20 ft. and 40 ft. containers. A container terminal is in the process of being established in the Eastern part annexed to the Oil Dock Breakwater. All container handling equipment available.

CRANES:

	No.	*Capacity (Tons)*	*Radius (m.)*
Floating Derrick	1	100	—
Portal Cranes	2 (Koks)	35	—
	12	5	25
	3	15	30
	6	25	30
Mobile Cranes	5	5–6.5	—
	9	8–13	—
	7	7	—
	7	15–16	—
	2	30	—
	4	42	—
Fork Lift Trucks	95	—	—

CONTAINER HANDLING EQUIPMENT:

	No.	*Capacity under spreader (tons) (20′ – 40′ containers)*	*Reach from quay (m.)*	*Height of lift (m.)*
Container Quay	1	35	32	22
Gantry Cranes	1	35	32	26.5
	No.	*Capacity (tons)*		
Rubber-tyred	2	30.5		
Portal Cranes	3	40		

STEVEDORES: Enable Agent order gangs, important obtain 48 hours advance accurate ETA from vessel. Failure give precise ETA may result in ship losing 12/24 hours, also cost gang waiting time. No work on official holidays.

Working Hours: Work is usually carried on in 2 shifts: the first shift is from 0630 to 1430 hrs., on ordinary working days, or from 0630 to 1330 hrs. on the eve of Saturdays and holidays. The second shift is from 1530 to 2230 hrs. on ordinary working days and from 1330 to 2030 hrs. on the eve of Saturdays and holidays. Occasionally, in order to complete work on a ship or for special cargoes, a third shift is worked.

TANKERS: Up to 4 oil tankers can be accommodated at one time at the Oil Jetty, one on each side (draft 28 ft.–33 ft.).

In the Roadstead.

There are 3 submarine oil loading and unloading berths, connected to a submerged pipe-line.

Berth No.	*Situation in relation to harb. entrance*	*Diameter*	*Extension from shore*	*Direction*	*Depth under water*
1	1.75 m.	12 in.	4,200 ft.	307°	52 ft.
2	1.75 m.	12 in.	4,500 ft.	290°	52 ft.
3	0.50 m. N.E.	32 in.	10,000 ft.	319°	58 ft.

The signal station ashore opposite Berth No. 3 has 2 signal masts. Vessels moor with their own 2 anchors ahead and mooring lines to 2 buoys astern. The oil company's Mooring Master supervises the connecting and loading or discharging, remaining aboard until sailing time.

Throughput Rates

Vessels load or unload up to 1,000 t.p.h. through 10 in./12 in. pipe-lines on the Oil Jetty. The 32 in. pipe-line berth is destined for loading or unloading supertankers at the rate of up to 2,000 t.p.h.

MEDICAL: Hospital facilities available. Agent will board vessel with company doctor if so required by the Master.

FRESH WATER: Drinking water is plentiful and of satisfactory quality; no treatment is needed as water is frequently examined and chlorinated when required. The water is supplied by hydrants from shore or by water-barge at a delivery rate of 30–50 t.p.h. Boiler water not available.

FUEL: The following grades of oil are available for supply as bunkers:

Heavy Fuel Oil	1,500 secs. Red. 1 at 100°F.
Light Fuel Oil	450 secs. Red. 1 at 100°F.
Marine Diesel Oil	Standard Grade

The oil is supplied direct from Oil Dock or from barges. Bunkers are normally supplied between 0700 and 1515 hrs. on working days; at any other time by special arrangement. Delivery rate from Oil Dock is up to 500 t.p.h. (3,500 bbls.) and from barges up to 150 t.p.h. (1,000 bbls.)

REPAIRS: Israel Shipyards Ltd. run a modern shipyard, situated in the Kishon Zone, capable of building ships of up to 20,000 d.w.t. and to handle hull repairs, conversions, engine repairs and repairs of electric equipment.

The yard operates 2 floating docks with a lifting capacity of 7,500 tons and 1,100 tons respectively.

Vessels which need no dry docking can be repaired at the shipyard's quay, totalling 400 m. length with 7m. – 8 m. depth.

Ogen Ltd. also undertake ship repairs.

Floating Dock with lifting capacity of 24,000 tons.

GANGWAY/DECK WATCHMEN: Not compulsory. Port guard keeps gangway watch.

OPENING/CLOSING HATCHES: Performed by Stevedores. Mechanical hatch covers operated by crew.

CUSTOMS ALLOWANCES: 200 cigarettes, and 1 open bottle of spirits per person.

IDENTITY CARDS: Issued by port police on arrival.

TIME: Local standard time is 2 hours ahead of G.M.T.

AIRPORT: International air connection from Lod Airport, 105 km. from Haifa.

CONSULS:

Austria
Belgium
Denmark
Finland
France
Greece
Guatemala
Ivory Coast
Liberia
Netherlands
Norway
Panama
Spain
Sweden
Yugoslavia

HOLIDAYS: Port business is suspended on the following holidays: Saturdays; the 2 days of the Jewish New Year (Rosh Hashana); the Day of Atonement (Yom Kippur); the first and the last day of the Feast of Tabernacles (Succot); the first and the last day of Passover (Pesach); Pentecost (Shavuot); Independence Day. The first of May is observed by the port workers as Labour Holiday and therefore no work is done in the port on that day.

SHORE LEAVE: Shore leave passes are obtainable at the Frontier Control Section of the Port Police Station. Applications for the passes shall be filed with the Boarding Officer, Port Police. All shore leave passes must be surrendered to the Boarding Officer before departure of the vessel.

GENERAL:

Persons Boarding Vessels: No person shall be allowed on board any vessel unless he is in possession of a boarding pass which must be shown on demand to the police officer at the gangway.

Passes for boarding cargo vessels on business are issued by the Port Management; passes for boarding cargo vessels for any other purpose and passes for boarding passenger vessels are issued by the Frontier Control Section of the Port Police.

Swimming: Swimming in Haifa Harbour is strictly forbidden and Masters should instruct their crews accordingly.

Use of Ship's Boats: The use of ship's boats is forbidden in Haifa Port. A public motor-launch service is available for the convenience of ship's personnel. Call the motor-launch by day and night on VHF Channels 18 and 16.

Photography: Photography in the port area is strictly forbidden without a written permit issued by the Commander of the Port Guard.

DEVELOPMENTS: *Developments in progress:* Two projects, running concurrently, form the first stage of the development. One of the projects refers to the construction of a new Container Terminal within a specially designed containerships basin outside the existing breakwaters. The second project deals with the deepening and extension of the Kishon Basin.

The Container Terminal will consist of 620 m. of quay front, with water depth reaching 14 m. below M.S.L. and a land area covering over 30 hectares.

AUTHORITY: Israel Ports Authority, Haifa Port Management, P.O.Box 33539, Haifa. *Tel:* 04-518111. *Cables:* Malhof. *Contact:* Port Manager or Captain I. Ben-Menachem, Harbour Master.

AGENT: Carmel Shipping Ltd., P.O.Box 1015, Haifa 31009, Israel. Tel: 04-530041-2, 04-515396. Telex: 46550 Carml IL, 46821 Carml IL. Cables: "Carmelship Haifa". FAX: 515886.

Italy

GENERAL:

HEALTH: *Shipmaster's Report:* March 1983: Radio Pratique granted 12 hours prior to arrival.

If vessel applies 24 hours prior to arrival she will be requested to re-apply 12 hours prior to arrival.

TANKERS: All tankers of more than 1,600 g.r.t. carrying crude oil and petroleum products as well as gas carriers, chemical carriers, full or partly loaded, empty but not in gas-free condition, and which, prior to entrance to territorial waters of any Italian port, shall advise the port authorities of the following details:

(a) Vessel's name and international call sign,
(b) Vessel's nationality,
(c) Vessel's LOA and draft,
(d) Port of destination and accurate ETA,
(e) Quality/quantity of cargo and
(f) IMO Certificate if carrying dangerous chemical cargo in bulk.

Furthermore, the Master should hand over to the Pilot a detailed list concerning all vessel's data, safety equipment, safety class and other certificates, together with crew list, etc.

Also see "Augusta" – "Agent's Report".

Tankers over 1,600 gross tons, entering or leaving Italian ports or carrying, or with uncleaned tanks which last carried petroleum, gas or chemical products, are required to make a comprehensive report to the appropriate Port Captain. See *Admiralty List of Radio Signals, Vol. 6.*

Such tankers must establish and maintain radio contact, preferably by VHF R/T, with the Port Captain, advising him immediately of any incidents or defects which may affect the safety of navigation or cause pollution. Pilots should be employed outside the areas of compulsory pilotage whenever the nature of the cargo or navigational conditions, including reduced visibility, require.

CREW CHANGES: In Italian ports, signing on of crew on to ships whose flag is not the flag of the citizenship of said crew (for instance of a Norwegian crew member signing on a Liberian vessel, a Danish crew member signing on a Swedish vessel, etc.) should be aware that from now on Italian Port Authorities will strictly require copy of the contract showing that the crew member was engaged out of Italy. It is also required that the contract be signed and stamped by the Consul (of the flag of the ship) of the place where the crew member is engaged. If Consulate is not available, by the National Authorities of the place. In no instance will the signature of the engaging company be accepted as substitute of the signature and stamp of Consul or Authorities.

STRAIT OF MESSINA:

Regulations:

1. Passage of the Strait is prohibited to vessels of 50,000 tonnes deadweight or over carrying pollutants.

2. Pilotage is compulsory for vessels of:
(a) 15,000 tonnes deadweight and above;
(b) 6,000 tonnes deadweight and above if carrying pollutants.

3. Vessels in (2) should pass the following information at least 12 hours in advance via Messina Radio:

Name.
Nationality.
Call Sign.
Deadweight tonnage.
Type and quantity of pollutant carried.
ETA at Capo Peloro or Punta San Raineri.
ETA should be confirmed at least 1 hour in advance.

Vessels other than those in (2) should pass the same information by VHF Channel 16 at least 2 hours in advance.

4. Vessels passing through the strait should keep to starboard of a line joining:

(a) Lat. 38° 16.5′ N., Long. 15° 43.5′ E.
(b) Lat. 38° 14.0′ N., Long. 15° 36.6′ E.
(c) Lat. 38° 10.8′ N., Long. 15° 36.0′ E.

5. Vessels on passage through the strait should keep engines ready for immediate manoeuvring and should maintain constant watch on VHF Channel 16.

Pilotage: Pilots for vessels on passage through the strait embark 3 miles North of Capo Peloro or 2.5 miles S.E. of Punta San Raineri.

Pilots for vessels entering Port of Messina embark 1.25 miles North of Punta San Raineri.

NOTE: Tankers with no cargo on board from 6,000 up to 14,999 g.r.t can pass Messina Strait without Pilot. Tankers over 50,000 g.r.t. with no cargo on board can pass Messina Strait (pilotage compulsory).

ANCONA: 43.37 N. 13.32 E. (See Plan)

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the Roads 1 mile from the red light located at the end of Mole and also when, in the case of a vessel of large tonnage she anchors a further mile out and communicates her time of arrival.

DOCUMENTS: Immediately after arrival and shortly prior to departure, the Master must complete the arrival and departure forms supplied and send them to the Maritime Authority.

When the Pilot is on board, the Master must submit to the other authorities, Customs, Police and Health the following further documents:

4 Copies Crew List.
1 Copy Provisions List.
1 Copy B/L for every set.
1 General Cargo Manifest.
3 Copies of Crew Dutiable Articles.
5 Copies Passenger List (in transit or otherwise).

PILOTAGE: The Ancona Port Pilots listen 24 hours a day on VHF Channel 12. Telegraphic address: Piloti – Ancona. Telephone: 071/54297. Pilotage, compulsory for all tankers and all vessels over 500 g.r.t. Pilotage starts within a radius of 1 mile from the port entrance.

There are 4 pilot cutters operated by the Pilots' Association. Vessels waiting for a Pilot must hoist the "G" flag of the International Code of Signals and await him in the roads.

The pilots' station is in a building located near the angle between Berths 1 and 2. There are 4 Pilots available.

ANCHORAGE: In the Roads at the Master's discretion. The advice of the Pilots may be sought via VHF. Anchorage in the roads is safe with winds coming from the 2nd and 3rd quadrants.

RESTRICTIONS: Vessels may enter and leave port day or night. The entry and departure of vessels of large tonnage and draft is governed by the tide which has an approximate range of 2 ft.

Normally, tankers carrying petrol or vessels carrying hazardous goods in category "A" are not allowed to enter port.

MAX. SIZE: In the port of Ancona, the entry of vessels up to 250 m. length is permitted. At the oil installations located outside the port, tankers over 300,000 d.w.t. can berth in water depth 33 m. At the oil installations located closer to the coast, tankers of 27 ft. to 40 ft. draft can berth. (See "Tankers").

HEALTH: There is a maritime health station in the port. Free Pratique may be granted to an anchored vessel by radio (by calling up "Sanimare Ancona" 12 to 6 hours prior to arrival) for vessels coming from countries not affected by health strictures. If fever is suspected aboard a vessel, she must anchor in the roads, hoisting the appropriate International Code of Signals flag, and waiting for the port doctor to come on board.

RADIO: Ancona Radio "ICA" uses calling frequency 500 kHz and a working frequency of 489 kHz. Radio telephone: Ancona Radio P.T. "ICA" on 2182 kHz. VHF: calling up Channel 16 and working Channels 25, 26 and 27. Station maintains 24 hours watch.

RADAR: There is no radar station in the port.

VHF: Port Authority on VHF Channel 16 from 0800–2200 hrs.

TUGS: Use of tugs in port is not compulsory but may be requested by Pilot or ordered by the Port Authority if necessary. From 0700 to 1700 hrs., there are always 3 tugs available, and from 1700 hrs. there is 1 tug available.

Requests for additional tugs can be made via the ship's Agent a few hours prior to the vessel's entry in port, this order to be made to Sadar S.p.A. Telegraphic address: Sadar S.p.A. Telephone: 071/24696/7/8. Tugs wait for vessel 1 mile from the port entrance and work on VHF Channel 12.

SPECIAL CARGO HANDLING FACILITIES: Berth No. 15 has a multi-purpose electro-hydraulic crane particularly suited for containers up to 40 ft. and for lifting conventional cargo up to 42 tons. The quay space behind is currently used as a container terminal.

A new handling area at Berths Nos. 23, 24 and 25 will come into operation with an area of 15 hectares and whose berths will have cranes particularly suited to container handling.

Adjacent to the port, in the Ancona Port Industrial Zone, there is a private area with Customs sheds for retention and movement of containers. This area covers 16,000 sq.m.

For Ro–Ro traffic there is no special equipment, but this type of traffic can be handled at almost all the berths.

CARGO HANDLING FACILITIES: Normal working times for mechanical equipment is from 0800 to 1200 hrs. and from 1330 to 1730 hrs.

Mechanical handling equipment on the quays consists of:

1 multi-purpose Paceco crane, of 42 tons capacity for containers and various goods.
4 De Bartolomeis 20 ton electric cranes with retractable jib.
6 electrical cranes of 6 tons capacity, with retractable jib.
2 electrical unloading platforms of 8 tons capacity.
1 electrical unloading platform of 10/12 tons capacity.
3 automatic De Bartolomeis of 20 tons capacity.
1×5 ton automatic.

It is possible to attach electro-hydraulic grabs to the quay cranes for the discharge of scrap iron.

BRIDGES: None have to be negotiated when entering the port.

STEVEDORES: The Compagnia Lavoratori Portuali operates in the port. Telephone: 071/28095. Telegraphic address: Compagnia Lavoratori Portuali Ancona. Requests for labour are made via the ship's Agent at least 24 hours prior to commencement of operations.

MEDICAL: There is an Italian Naval hospital in the port area close to Berth No. 10. It is reserved for personnel of the Italian Navy. Telephone number (M.M. exchange) 201392. There is a permanent service available.

Apart from this, there are in the town a main hospital "Umberto 1°" with 1,000 beds, a 400-bed pediatric hospital, a cardio-rheumatological hospital, 2 geriatric hospitals, a neuropsychiatric provincial hospital, and a hospital specialising in tumours. There are also two private clinics with medical and surgical facilities.

BERTHING:

Berth No.	Location	Length (m.)	Depth alongside at distances from quay face		Max. size g.r.t.	Utilisation	Cranes
			Distance	Depth			
1	Clementino Mole	250	1 m. – 5 m. – 10 m. –	9.14 m. 9.44 m. 9.90 m.	75,000	Load/discharge Dry goods, lumber, coils, palletised cement.	2×6 tons 2×10–20 tons

TANKERS: *SFIR Mooring:* Mooring dolphins for tankers up to 10,000 g.r.t. Products handled: Refined products.

API – Island Terminal: Berth Position: Lat. 43° 40′ 03.7″ N., Long. 13° 24′ 21.6″ E. It is a single berth for tankers up to 90,000 d.w.t. with draft not exceeding 40 ft. Ship moored with her port side alongside the berth. Mooring manoeuvres permitted in daylight only. Unmooring manoeuvre permitted anytime.

Fittings for Loading/Unloading: 3 loading arms. 10 in. quick connections. 7 sea-lines (1×8 in., 1×12 in., 2×14 in., 2×16 in., 1×24 in.) for loading/unloading various grades of oil products and crude oil. The 24 in. sea-line is electrically heated (skin effect) for fuel oil and high viscosity crude oil.

Water Ballast: Water ballast to be discharged ashore by sea-line. Vessels on arrival for loading, when notifying their first ETA to Falconara, must communicate to the refinery the quantity of ballast to be pumped ashore.

Bunker and Water Supply: All grades of bunkers and undrinkable fresh water are available by pipes.

API Buoy Field: The buoy field that was positioned about 600 m. Westward of the Island Terminal for unloading crude oil, has been dismantled.

API Jetty: It is a pier of 1,308 m. in length with 4 berths: 3 for loading/unloading tankers and the other, closer to shore, for service boats.

Berths:

Head Jetty: (Position: Lat. 43° 38′ 52.2″ N., Long. 13° 23′ 38.4″ E.) For tankers with draft not exceeding 27.5 ft.

Berth No. 1: For tankers with draft not exceeding 18 ft.

Berth No. 2: For tankers with draft not exceeding 16 ft.

Landing Stage: For service boats – water depth 10 ft.

Tankers are moored with the stern to the jetty and two anchors. Therefore ships must be fitted with cargo stern-line.

Fittings for Loading/Unloading: One derrick for each berth for connecting flexible hoses (4 in., 6 in., 8 in., 10 in.). Seven pipe-lines (3×8 in., 2×10 in., 2×12 in.) for loading/unloading various grades of oil products and crude oil.

Water Ballast: Water ballast to be discharged ashore by pipe-line. Vessel on arrival for loading, when notifying their first ETA to Falconara, must communicate to the refinery the quantity of ballast to be pumped ashore.

Bunker and Water Supply: All grades of bunker and undrinkable fresh water are available by pipes.

API Sea Terminal

The API Sea Terminal consisting of a single steel platform mooring for vessels up to 300,000 d.w.t. and is located off Ancona Harbour in position: Lat. 43° 44′ 37″ N., Long. 13° 31′ 20″ E.

It has a minimum depth of water of 98 ft. at LWS. The platform, fixed on 6 steel piles sunk into the sea bottom is connected to the shore tanks by an underwater sea line 40 in. diameter.

On the platform there is a cardan joint from which 2 floating hoses 24 in. diameter depart and converge into a single line 24 in. diameter (average discharging rate 7,000 cu.m.p.h.) at the top of which are connected 2 lines of 16 in. diameter that end with 2 conic hoses 16 in./12 in. diameter (Tanker MS-GI) for connection to the ship.

Each tail hose is fitted with a quick closing valve to prevent risk of pollution.

The platform has a diameter of 82 ft. and is fitted with special rubber fenders.

Platform Light:

Light: White – Code Letter: "U" – Height a.s.l.: 39 ft. Period: 15 sec.

Light Characteristics:

1) Light:	0.5 sec.	4) Eclipse:	1 sec.
2) Eclipse:	1 sec.	5) Light:	2 sec.
3) Light:	0.5 sec.	6) Eclipse:	10 sec.

Range: 6 miles

Foghorn: Code Letter "U" – Range: 3 miles.

Characteristics:

1) Blast:	1 sec.	4) Silence:	2 sec.
2) Silence:	2 sec.	5) Blast:	2 sec.
3) Blast:	1 sec.	6) Silence:	22 sec.

The platform is equipped with radar reflector.

Weather and Currents:

Weather is generally good from May to the end of September. During the Winter time bad weather prevails from N.E.

The N.E. wind commonly named "Bora" is the strongest and the most frequent. The Easterly sea, which does not occur often, is generally strong. The Westerly winds generally cause fog or mists which, particularly in Winter, is very thick.

For approximately 8 to 9 months of the year the current sets in a S.E. direction whilst for the rest of the year, it is running in opposite direction.

The strength of the S.E. current is variable from 2 to 3 knots, therefore, in consideration of these facts neither engine repairs nor engine maintenance are permitted during the time the vessel is secured to the API platform and the main engine must be on permanent standby and ready for manoeuvring.

Radio/VHF:

Vessels bound for Falconara must send their ETA to Apioil – Falconara 72, 48 and 24 hours before their arrival.

In the last message the following information must be reported:

1) Maximum lifting capacity (s.w.l.) of derricks
2) Distance between bow and manifolds.
3) Diameter and type of manifolds flanges.
4) Whether the cargo tanks are equipped with inert gas system.

5/6 hours before arrival VHF contact can be established with the refinery maritime office on Channel 12.

Anchoring:

Vessels waiting for berth may anchor in a position approximately 1.5 miles Eastward off the platform. Ideal position for anchorage is: Lat. 43° 45′ 00″ N., Long. 13° 33′ 00″ E. or as otherwise instructed. Vessels are warned to anchor only in the recommended position because of the existence of submarine pipe-lines in other areas.

On Arrival:

The refinery operator, together with a gang of 4 skilled workers, will board the vessel before berthing to coordinate the discharging operations and they leave after completion of unmooring. Masters are therefore kindly requested to arrange for food and accommodation for the whole period of their stay aboard.

Mooring Operations:

Mooring operations will be undertaken with favourable weather conditions. The vessel shall proceed at a reasonable speed to the platform and generally shall start mooring by heading into the sea current or wind or swell.

As soon as the vessel is a proper distance from the platform she will run out 2 mooring ropes (1 on each side) which will be secured to the platform ropes by mooring crew. These ropes will then be heaved on board in order to pull up the platform ropes which will be secured on the bitts of the forecastle. The platform mooring ropes comprised of nylon rope, chain and polypropylene rope and pelican hooks will be used as stoppers for the chains.

4 mooring lines (2 for each side) must be ready on the forecastle for joining before manoeuvring to the platform.

The refinery operator shall not fail to give to the deck officer on duty on the forecastle all requested information concerning mooring operations as well as API's installation. All winches and windlass must be in perfect working condition with sufficient power and ready to work during the whole of the vessel's stay at the API platform. A good mooring rope of sufficient length must be ready aft and passed to the supply vessel enabling her to assist the tanker from the end of mooring up to few seconds before unmooring. Mooring operations will be carried out by the crew, under the Master's responsibility and according to the Pilot's suggestions.

During the ship's stay at the platform, the crew and API personnel will keep a constant watch on the mooring ropes and the platform. During the night the forecastle and mooring ropes must be brightly lit.

Unmooring:

The unmooring operations, except during unfavourable weather conditions, are quite simple. As soon as the 2 hoses have been disconnected, it will be sufficient to let go the supply vessel, heave up, as quickly as possible, the stern rope, then let go the 2 platform ropes, and put the main engine astern (if necessary). Masters are warned that as soon as the hoses are disconnected the service of the supply vessel will no longer be required.

Hose Handling:

On arrival both derricks must be rigged and ready to lift up the maximum permissible weight.

Throughout the period of time when the hoses are hoisted up, connected, disconnected or lowered overboard, 1 deck officer and 1 Crew member are required to coordinate and operate the winches. Lifting, connecting, lowering and other handling of hoses will be performed by API's gang under the Receiver's representative control.

Discharging Operations:

The Receivers' representative will advise the Master on all matters concerning the discharging speed, manifold pressure, or eventual hazards, but will not direct the discharging operations except if it may be necessary to protect the facilities or any Receivers' properties or apparatus.

Pollution:

The Master is fully responsible and must ensure that no petroleum or other contaminated products are discharged, or spilled overboard.

During the vessel's stay at the API installation, all deck scuppers and all overside deck openings shall be securely closed and oiltight. All pipelines not in use, must be blanked off.

Drip-pans must be in place at all times under manifold connections. An adequate supply of sandbags, or other anti-pollution chemical products, must be available at all times for immediate use.

Under no circumstances shall bilge water, oil, waste, or contaminated products be discharged overboard.

The Receivers will take any action or steps necessary to clean up or remove the contamination of the sea and the terminal structures if any. The vessel and/or her Owner, will be responsible for all expenses and all damage in connection with the contamination.

Italian Authorities are very strict and severe about pollution. It is worthwhile to remind Masters of the eventual penal implications against them for pollution.

Safety:

During the vessel's stay at the API terminal a sufficient number of crew members must remain on board to be ready for any kind of emergency. Crew members going ashore are warned that in case of bad weather it might not be possible to return on board until weather conditions have improved.

All fire equipment and hoses must be, at all times in perfect working condition and ready for use. A number of portable fire extinguishers must always be ready by the discharging manifolds and the breathing apparatus must be ready by the pump rooms for immediate use.

Main Engine and Auxiliaries:

Should the main engine and/or auxiliaries be temporarily out of use, the discharging operations will immediately be stopped, and vessel unmoored, until everything is once again in order. In such a case all expenses, delays and/or all arising damages will be to the account of vessel and/or her Owner.

Tending Mooring:

A crew member must be stationed at the bow of the ship while the vessel is at the platform to keep a constant watch on the moorings.

During the hours of darkness moorings must be illuminated.

Winches:

During the stay of the vessel at the terminal all deck winches must be ready to operate.

Supervising Discharging Operations:

The receivers' personnel will remain on board for the whole time. A qualified deck officer must always be available. It is recommended that the duty officer always carries with him a portable VHF in order to keep close and constant contact with Receivers' representative.

Supervising Floating Hoses:

Whilst the vessel is secured to the platform a sharp lookout on floating hoses must be ordered by the Master. Every abnormal situation in this respect must be immediately notified to Receivers' representative.

Washing Floating Hoses:

When discharge is completed, if requested, the vessel will pump water for a few minutes before disconnecting hoses, in order to displace crude-oil from the floating-lines. The Receiver's representative will advise the Officer on duty about this manoeuvre as well as pumping time.

Communications Between Ship and Shore:

Normally communications between ship and shore are maintained by API's representative. Masters are kindly requested to authorise the use of vessel's VHF when requested.

Boilers:

Boiler tubes must not be blown whilst at anchor or secured to the API platform.

Garbage:

Garbage and refuse must not be thrown overboard while the vessel is at anchor or secured to the API platform.

Bunkers:

Weather permitting, bunkers can be supplied by barges. API can supply all grades of fuel oil, marine diesel, gasoil and all grades of API's marine lube oils.

For bunker requirements vessels must cable to Apioil – Falconara 72 hours before their arrival (holidays, Saturdays excepted) stating qualities and quantities required. (No limitations for supplying).

Fresh Water:

Available only by tugboats with favourable weather conditions, and to be requested through vessel's Agents.

IMPORTANT WARNING

All vessels with a draft up to 40 ft. scheduled for API platform but not duly equipped to operate thereat, will be moored, if possible, at API conventional berths. All expenses, time lost and/or damages arising from the above will be to account of and charged to vessel/owners.

Report: *Crude Oil Washing:*

To carry out crude oil washing operations (COW) the vessel must be fitted with the following equipment:

(a) An inert gas system capable of supplying gas containing not more than 5% oxygen to all cargo tanks during all discharging and washing operations. Such systems must be fitted with an automatic alarm signal which will operate if the oxygen content of the gas rises above 5%.

(b) A tank cleaning machine permanently installed in the cargo tanks and connected to the cargo/wash system by permanent steel piping.

(c) A remote reading tank gauging system to ensure that the liquid levels in the cargo tanks can be monitored at any time, without having to open any ullage ports.

(d) The tank cleaning lines must be completely separate and isolated from the fire fighting system.

The procedures to be followed are listed below:

1. Prior to vessel arrival at the discharge port, the following test will be carried out:

All cargo discharge lines and wash system lines must prove to be tight and free of leaks. The test will be effected with crude oil, to a pressure ranging between 150 p.s.i. and 175 p.s.i.

The main cargo pumps safety devices, i.e.: pump casing and bearing temperature gauges and high temperature alarms, pump overspeed trips, remote emergency stops, pump reverse rotation alarms, cargo pump trip for low inert gas pressure, must be tested and found fully operational.

2. All openings to all cargo tanks must be securely closed and the pressure/vacuum valves set in the operational position.

3. All in and out valves of sea water heater must be closed.

4. The crude supply for the washing system will be secured directly from the main discharge lines or from separate tank cleaning lines connected directly to the main cargo pumps.

The pressure used for "COW" will be 140 p.s.i. maximum. In the case of vessels equipped with washing system supply coming direct from the main discharge lines, such back pressure of 140 p.s.i. will be achieved by closing down completely on manifold valve or two manifold valves, if necessary.

In the case of vessels equipped with a separate tank cleaning line, the 140 p.s.i. back pressure will be achieved by controlling the main cargo pump revolutions and it will not be necessary to close any manifold valves.

Whichever manifold is used the shore hoses, or hard arms, will not be pressurised for crude washing purposes.

5. Before commencing crude washing any tank, the oxygen content of the inert gas supply must be checked and must not be more than 5%. In addition the atmosphere in the tank to be washed must be checked and must not be more than 5%.

The inert gas system must be capable of supplying positive pressure to all cargo tanks during all discharging and crude washing operations. In the event that pressure in the cargo tanks falls to 4 in. W.G. the system will automatically stop all cargo pumps. Before crude washing each tank, its pressure must be checked and must not be lower than 20 in. W.G.

6. The tanks will be washed in two stages:

Top Wash: When the level in the tank is down to 15 ft. innage the top two/thirds of the tank will be washed, using all machines in the tank simultaneously, on a pressure of max. 140 p.s.i. The washing pattern will be from 40° to 120° elevations. During top washing the tank will continue to be pumped out on the main cargo pumps.

Bottom Wash: The top wash cycle will normally be completed when the tank is draining out on the main cargo pumps. The washing machines will be stopped and reset to the bottom wash pattern (from 0° to 40° elevation). The tank main suction will be closed and the stripping suction opened.

When the tank is dry, bottom washing will commence using a maximum of four machines in the tank to ensure good drainage throughout the bottom wash cycles.

On completion of the bottom wash cycles, the machines will be stopped and the cargo system will revert to normal discharge operations.

7. The whole "COW" operation will be carried out under the direct supervision of a responsible Officer well acquainted with "COW" and tank cleaning, who will be assigned to this supervision task by the Master.

The necessary personnel will be put at the disposal of the responsible Officer by the Master, to carry out "COW" operations and, in particular, one man equipped with VHF radio will be stationed at the manifold throughout discharge operations.

Before commencing "COW", the responsible Officer supervising the operation will discuss, in detail, the whole operation with Receivers' Representative and will carefully observe any provisions issued by Port Authorities and by Receivers in relation to "COW".

If during "COW" operations the Master and/or the responsible Officer judge, at any time, that the operational conditions do not ensure total safety, all "COW" operations will be stopped at once.

DENSITY: The average salinity of the water in the port of Ancona is 17.5 gr. per litre of chloride.

FRESH WATER: Along all the quays are numerous supply points with rates varying from 15 to 25 t.p.h. Vessels in the roads can be supplied with drinking water via the port tugs.

FUEL: Vessels moored at berths can be supplied by tanker barge. The supplier is S.P.A. API from their marine refinery at Falconara.

Requests for bunkers must be submitted to that company, via the ship's Agent at least 24 hours in advance, Saturdays and holidays excepted. The company's telephone number is 910901. Any type of product can be supplied.

FIRE FIGHTING FACILITIES: Apart from the water hydrants along the quays, which, if need be, can be used for coupling to hoses for fire fighting purposes, the port of Ancona has a fire brigade equipped with fire engine, together with other means on land and water.

The fire brigade is near the marine station at Berth No. 13. Apart from facilities on land, there are 2 craft available, one of which is highly sophisticated. Telephone: 201715.

If necessary, at very short notice, the town fire brigade can be called to the scene, their equipment consists of a fire engine with pumps and ladders and other modern means of efficient fire fighting. Telephone: 22222.

In port, there are the following maritime means for combating fires:

a) A motor launch of the port captaincy with fire fighting hoses and also the ability to spray foam.

b) 2 motor barges with pumping facility operated by the port fire brigade, having the following characteristics:

Vessel "VV.F.207" – speed 11 knots, equipped with 2 fire fighting pumps each capable of delivering 6,000 litres per min. at a pressure of 10 atmospheres and driven by 2 Fiat Aifo 260 h.p. engines each; 2 liquid foam pumps; 2 foam projectors; 2 foam tanks with a total capacity of 5,800 litres; 20 delivery pipes with 70 UNI unions, 400 m. overall; 16 delivery pipes with 45 UNI unions, 220 m. overall; 1 comet portable projector, 2 fixed foam projectors; 16 UNI 70 hose attachment points; 2 UNI 150 ditto; 2 double tube cannons for mixed usage (water and foam); 1 electrical compressor giving 5 atm. pressure; 2×500 watt projectors of which 1 is portable with 100 m. of cable; 1 retransmitter apparatus attached exclusively to the apparatus operated by the fire brigade.

6 port tugs having the following characteristics:

Tugs "Luisella and Tiziana" – TSL 485 – speed 14 knots – equipped with 2 exhaust pumps in the deck on starboard and port sides; regulation fire fighting equipment; 2 motor driven pumps; for internal use 2 pumps connectable to those on deck; international attachments and points; equipped with radar, radio and echo sounder.

Tug "Katria Prima" – TSL 140 – speed 12.5 knots – equipped with 1 monitor; 4×45 mm. swivel guns; thermo-mechanical electric pump of 60 t.p.h. capacity; foam tank – fitted with radar; radio; echo sounder.

Tug "Luisa Davanzali" – TSL 238 – speed 12.5 knots; equipped with 1×30 t.p.h. fire fighting pump; 2 exhauster pumps of 50 t.p.h. and 1 of 200 t.p.h. capacity; radar, radio, echo sounder, gyroscopic compass.

Tug "Cesare Davanzali" – TSL 364 – speed 14 knots – equipped with 2 electrical pumps of 200 cbm/hr. capacity for delivery purposes and capable of attachment to Minimax equipment for fire fighting purposes using foam with 2 cannon type projectors; in the deck are 14 points for attachment of hoses; 2×1000 kW. adjustable projectors; 1 motor compressor of the low pressure type working at a pressure of 8 atm.; equipped with radar, radio, echo sounder.

Tug "Nuovo Ancona" – TSL 148 – engine power 1,014 h.p. equipped with 2 fixed exhauster pumps of total capacity of 500 t.p.h. driven by 2×40 h.p. electric motors; 2 fixed fire fighting pumps, of capacity of 250 t.p.h. total, driven by 2×40 h.p. electric motors; equipped with foam plant and projector; fire fighting pipes have 4 points with 70 mm. unions; 1 portable exhauster pump of about 150 t.p.h. capacity – speed 12 knots – equipped with diving equipment – radio.

CONSULS:

Sweden: Tel. 202223.
French Consular Agency: Tel. 22879.
Netherlands: Tel. 22614.
Denmark: Tel. 202223.

REPAIRS: It is possible to effect repairs of all types at yards within the port, and at the large electrical and mechanical repair undertakings in the town.

Cantieri Navali Riuniti (for large construction). Tel: 5951.
Cantiere Morini (also has available a floating dock for vessels up to 1,000 g.r.t. and slipways). Tel: 202224.
Cantiere Castracani (slipway). Tel: 55663.
Cantiere Riparazioni Navali (pleasure craft). Tel: 204323.
Cantiere Tecno-Matic (fibreglass units). Tel: 53643.
Cooperativa Metallurgica G. Tomassi (only for steel vessels). Tel: 204303.
Ditta EL.ME.A. (marine electrical equipment). Tel: 29409.
Ditta Schiavoni (marine electrical equipment). Tel: 55731.

DRY DOCKS: There is only one small floating dock in which it is possible to carry out repairs to vessels up to 1,000 g.r.t. The dock is owned by Cantieri Navali Morini. Tel: 204303.

SURVEYORS: In Ancona the Registro Italiano Navale has a town office at via Marsala No. 8. Tel: 202204. R.I.N. acts for the following foreign classification bodies: Germanischer Lloyd, Nippon Kaiji Kyokai, Jugoslavinski Registar Brodova and Register of Shipping of the U.S.S.R.

GANGWAY/DECK WATCHMEN: This service is advisable but not compulsory. In Ancona is a security firm "Istituto di Vigilanza Urbana e Campestre" di Dattilo Salvatore. Tel: 201784.

HATCHES: Hatches are opened by the crew where they are of the automatic type, and by the port labour force where they are of the conventional type. Hatches are re-closed in the event of rain.

CUSTOMS ALLOWANCES: On arrival in port, all goods under Customs exemption must be placed under seal. At the completion of Customs inspection, the Master may request the Customs officers permission to supply the following goods:

50 cigarettes for each Crew member.
1 kg. of salt for every 50 persons.
50 grams of sugar per person per day.
15 grams of coffee per person per day.
Liquor – small quantities to be agreed with the Customs officials according to the time of year.

SPECIAL REGULATIONS: Vessels of draft greater than 30 ft. mooring at berths on the South mole are secured a short distance off the quay by means of dolphins.

REPATRIATION: It is possible to effect exchange of foreign Crew members on board foreign vessels since there is in the port an office of the Frontier Police.

For repatriation purposes, the following travel connections are available:

Train: Via the Ancona/Bologna/Rome line; via the Ancona to Rome direct line and via the Ancona/Pescara/Bari line.

Air: Departures from the Falconara Marittima Airport which is 10 km. from the port and reached by bus. There is a daily departure to Milan and 1 to Pescara.

Sea: the following lines are available:

From 1st January – 31st December, Wednesdays (1330 hrs.) and Saturdays (2200 hrs.) to Patras by Greek vessel "Mediterranean Sea". From 1st October – 30th May, Mondays (0900 hrs.) Tuesdays (0030 hrs.) and Fridays (1700 hrs.) to Zara and Spalato by Italian vessel "Tintoretto". From 1st June – 30th September daily departure to Zara by Jugoslav vessel "Illirija". From 1st June – 30th September every Thursday (1300 hrs.) and Sundays (2200 hrs.) to Patras by vessel "Mediterranean Sky". From 1st June – 30th September every Saturday (2200 hrs.) per Panamanian vessel "Neptunia" to Patras, Corfu and Haifa. From 1st June – 30th September every Tuesday (2200 hrs.) to Patras per Greek vessel "Patris". From 1st June – 30th September every Wednesday (1300 hrs.) and Saturday (2200 hrs.) departures to Patras and Higoumenitza by Greek vessel "Ionian Star". From 1st June – 30th September every Tuesday (1700 hrs.) departures to Dubrovnik by Italian vessel "Tintoretto".

TIME: GMT plus 1 hour. From 29th March to 26th September, GMT plus 2 hours.

HOLIDAYS: Every Sunday, 1st January (New Year); the Monday after Easter; 25th April (Liberation); 1st May (Labour Day); 4th May (Town's Patron Saint's Day); 15th August (Assumption); 1st November (All Saints); 8th December (Immaculate Conception); 25th December (Christmas); 26th December (St. Stephen's).

Work is possible on all these days, but at an increased rate.

POLICE/AMBULANCE/FIRE: Port Police 201030. Town Police 202860. Yellow Cross Ambulance 55622. Red Cross Ambulance 22680. Port Fire Brigade 201715. Town Fire Brigade 22222.

TELEPHONES: It is not possible to connect telephone lines on board vessels. In the port there are numerous telephone boxes for national and local communications and where it is possible to telephone to any part of the world.

SERVICES: The following special services are available in Ancona:

Tank washing at Falconara Marittima by the "crude oil washing" system, compass adjusting, repairs to radar or other electronic instruments on board and underwater work.

SHORE LEAVE: Foreign Crew members may go ashore from 0800 until 0200 hrs. the next morning provided they have a pass stamped by the Port Police. Beyond 0200 hrs. a special permit from the police is necessary to allow an overnight stay outside the port area.

DELAYS: No delays.

NOTICE: *Regulations concerning navigation, fishing and anchoring in vicinity of API installations:*

1. It is forbidden for any vessel or craft whatsoever, with the exception of vessels intended to operate at the API installations:

a) to transit, remain or anchor within a radius of 1,000 m. centred on the installations;

b) to anchor and fish by whatever means within a radius of 1,000 m. centred on the installations quoted;

c) to anchor, engage in bottom fishing or engage in any activity on the sea bed within the area limited by the following points:

A – Lat. 43° 40′ 20″ N., Long. 13° 24′ 57″ E.
B – Lat. 43° 44′ 28″ N., Long. 13° 30′ 42″ E.
C – Lat. 43° 44′ 12″ N., Long. 13° 31′ 09″ E.
D – Lat. 43° 39′ 42″ N., Long. 13° 24′ 57″ E.

2. In the areas of the sea mentioned in No. 1, all vessels and craft in general which accidentally become entangled with anchors, fishing equipment or similar, underwater pipe-lines, must obligatorily abandon such equipment on the bottom in order to obviate damage to it and inform as quickly as possible the Maritime Authority.

3. Regulation No. 134/81 of 23.12.1981, mentioned above, is abrogated.

4. Those contravening this current regulation, provided that their action does not constitute the cause of a serious reaction, will be pursued within the terms of Article 1164 of the Navitagion Code and must compensate for the damage caused. It is obligatory for all entities whatsoever to observe and cause to be observed the terms of the present regulation.

Signed: The Commandant of the Port of Ancona.

Date: 22nd February 1986.

DEVELOPMENTS: There is in hand the development of new zones for Cantieri Navali Riuniti in the stretch of sea behind the North Breakwater. In that area will be built a construction basin for supertankers.

AUTHORITY: Capitaneria di Porto Ancona, Banchina N. Sauro 12, 60100 Ancona, Italy. *Tel:* 071-51697. *Cables:* Compamare Ancona. *Contact:* Mario Depalo, Il Commandante.

ARBATAX, Sardinia: 39.57 N. 09.42 E. (See Plan)

SHIPMASTER'S REPORT: September 1980.

PORT LIMITS: A vessel is considered to have "arrived" when she anchors in the roads 5 – 7 cables Northwards of the light of East Breakwater. Pilot leads vessel to the place for anchoring and also delivers on board all local documents and forms for completing for arrival clearance.

PILOTAGE: Not compulsory, but only available in daytime for entering. On leaving port the Pilot is available day and night. VHF Channel 16. Pilot boat black hull, about 6 m. in length, white house, on which is painted "Pilotti"; vessel awaits the Pilot Northward of the light of East Breakwater between breakwaters and Isola D'Oliastra Islet in position: Lat. 39° 57.24′ N., Long. 09° 42.95′ E., depth on roadstead from 10 to 30 m., good holding ground.

MAX. SIZE: Vessels of 200 m. length and max. draft 25 ft. 00 in. have entered.

HEALTH: Free Pratique may be requested by radio to "Sanimare Arbatax" between 12 to 6 hours prior to arrival, advising vessel's name, nationality, last port, number of crew and passengers and state of health on board. If from another Italian port Free Pratique is granted automatically.

TUGS: One tug with sufficient power for assisting in manoeuvres is available, ship's lines used. Tug takes lines in the roads and accompanies vessel to the port. Prior to mooring vessel drops anchor with about 3 shackles, tug turns the stern of the ship towards the pier, after which the ropes from fore and aft are transported and secured on the pier, tug pushes vessel alongside the pier on the port-side. The chain is slackened until 5-6 shackles out.

BERTHING:

Banchina Ovest – length 450 m. – depth 25 ft.
Banchina Postal – length 100 m. – depth 15 ft.
Banchina Centrale – length 100 m. – depth 15 ft.
Banchina Sud – length 80 m. – depth 15 ft. (for Roll-on/Roll-off ships only).

CRANES: One private mobile crane, 6 tons capacity, for discharging pulpwood at Banchina Ovest.

MEDICAL: Advise Agent of any requirements.

DENSITY: 1025.

FRESH WATER: Only from water barges.

FUEL: Pipe-line 250 mm. in diameter from store tanks on shore to the terminal at the head of the West pier.

HATCHES: Opening/closing is normally carried out by ship's crew. Winchmen from stevedoring company or ship's crew.

CUSTOMS ALLOWANCES: Depends on flag of vessel.

REPATRIATION: Regular line of ferry boats, train to Cagliari close to which there is an airport.

TIME: GMT plus 1 hour from 29th March to 26th September, GMT plus 2 hours European time.

HOLIDAYS: 1st January (New Year's Day), 25th April (Liberation Day), 1st May (Labour Day), 15th August (Assumption), 1st November (All Saint's Day), 8th December (Local Religious Holiday), 25th December (Christmas Day), 26th December (Boxing Day).

IDENTIFICATION CARDS: Special shore passes issued by local police, against passports.

DEVELOPMENTS: Present basin will be dredged to 9 m., new basin close to present one will be constructed with depth of up to 10 m.

AUTHORITY: Ufficio Circondariale Marittimo, 08041 Arbatax, Sardinia, Italy. *Contact:* Antonio Camboni, Port Commandant.

AUGUSTA (including Priolo and Melilli): 37.13 N. 15.14 E. (See Plan)

LOCATION: Augusta – Position refers to Torre Avolos Old Lighthouse in position Lat. 37° 12′ 37″ N., Long. 15° 13′ 34″ E.

Priolo – Same position as Augusta, Priolo lays on Southern part of harbour including a chemical pier outside the breakwaters.

Melilli – Correct name is Siracusa Santa Panagia, located 6 miles South of Augusta. Lat. 37° 06′ 30″ N., Long. 15° 15′ 40″ E.

Largest scale charts: B.A. 181-187. U.S. 53000-53200-53201. Italian 270-271.

PORT LIMITS: A line drawn between Santa Croce Lighthouse and Magnisi Lighthouse defines the seaward limits of the Port of Augusta.

A line drawn between Punta Magnisi and Punta Santa Panagia defines the seaward limits of the port of Santa Panagia.

DOCUMENTS: Ship's information must be sent by telex to Compamare Augusta, or to Compamare Siracusa for Santa Panagia, 24 hours before arrival (see examples below) in accordance with instructions issued by European Economic Community No. 79/116.

Crew Lists (at least 4 copies).
Custom Manifest.
Passenger Lists (4 copies).
Maritime Declaration of Health.
Bills of Lading.
Vaccination Certificates.
The following documents must be sent to Harbour Master's Office:
Certificate of Registry.
Civil Liability Certificate (for tankers only).
Information Note of Arrival.
Additional Declaration of Departure.
Cargo and Gear Safety Certificate.
Safety Construction Certificate.
Italian Light Dues.
Tanker Check List (to be presented to Pilot for acknowledgement).

In addition ships bound for the Esso Terminal must also radio the refinery, Rafinesso Augusta, via Roma Radio (IAR) 72 hours and 48 hours before arrival, giving ETA in local time and following advice:

Bill of Lading quantities in long tons, metric tons, gross bbls./net bbls.

Slop quantity, water percentage, tank number. If slop mixed with cargo, advise quantity cargo in slop tank.

Arrival draft.

Temperature of cargo for vessel carrying atmospheric residues and catfeeds.

For tankers calling to load: 72 hours prior arrival send cargo layout, preferred order of loading and number of grades ship can load at same time.

Examples: Messages sent to vessels:

Vessel Over 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessels data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 60/74.

CLC data, IGS yes/no, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull machinery in good order.

Vessel under 20,000 g.r.t.:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 60/74.

CLC data, Paris memo issued date prescriptions, if any, last port and confirm if all apparatus, hull, machinery in good order.

Chemical Carriers:

Please send the following information cabling Compamare Augusta. Telex: 912336. Vessel's data, ETA Pilot, reasons for call, cargo/ballast details, if SOLAS Certificates 60/74.

CLC data, Paris memo issued date prescriptions, if any, certificate of fitness/IMO yes/no, last port and confirm that all apparatus, hull, machinery are in order.

Vessel's reply:

To: Harbour Master, Augusta.
Telex: 912336 Compau I

Vessel Features	Capo Argento, IBMX, Italian Flag, g.r.t. 2,976, d.w.t. 4,500, LOA 100 m. max. draft 5.95 m.
ETA Pilot	Pilot Augusta, 2nd December, 0600 hrs.
Agent	Mayflower Shipping Agency
Reason of Call	Unloading 1,400 tonnes Ethylene
Cargo	Ethylene 1,400 tonnes
SOLAS	Available SOLAS 74/Prot 78
IOPP	Expiring 30th April, 1986
CLC	Expiring 20th February, 1986
Paris Memo	Athens 19th September, 1985/No Prescription
IMO	Expiring December 1985
Last Port	Porto Torres
Remarks	In good order
	Master Capo Argento

PILOTAGE: Compulsory for vessels over 500 g.r.t. – 24 hours service – Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above. Weather permitting, Pilot boards about 1 mile East of port main entrance – In case of bad weather, the pilot boat will station itself just inside the entrance and instructions to proceed will be given to vessels by VHF. Upon request, to facilitate vessels, or for other special reasons, Pilot can board up to 3 miles off the normal embarkation point.

Pilot charges vary with vessel's g.r.t., for hours between sunrise to 0800 hrs. and 1700 hrs. to sunset, for night hours, for Sundays and holidays, for flammable and explosive cargo and for boarding over 1 mile from main breakwater.

ETA to be confirmed 1 hour before arrival, calling "Augusta Pilot Station" on VHF Channel 12. In case of no radio contact, vessels must stop about 2 miles Eastward of the breakwater and hoist or flash the international code signals.

The pilot boat has a black painted hull with a white band and white superstructure with the word "Piloti" painted on both sides.

For Santa Panagia (Melilli), Pilot will board 1 mile seaward from Punta Santa Panagia for vessels incoming from South and 1 mile seaward from Punta Magnisi for vessels incoming from North. Pilot should be contacted on VHF Channel 14. Second Pilot recommended by Local Authorities for vessels of 60,000 g.r.t. or above.

APPROACHES: There are 2 entrances: the main one is situated between the central and northern breakwaters, with leading lights on a heading of 273° 51′ – Entrance is about 400 m. wide, with a depth over 36 m. in the middle, and may be used day and night.

Note: Vessels entering should be lined up on the leading lights/marks 1 mile before entrance and ship departing 0.5 miles before exit. In case of controversy Harbour Master will ask for documentation of above positions.

Santa Panagia is an open road and berthing to ISAB Terminal is allowed in daytime only.

A current may cross the entrance after prolonged periods of windy weather. The leading lights/marks are sometimes obscured by smoke from the industrial plants in the Southern part of the harbour. Naval vessels and outbound traffic have the right of way when passing through the harbour entrance.

Santa Panagia:

(a) Masters are cautioned when approaching Santa Panagia by night as there are no navigational aids in this area. Only 2 lighthouses (Murro di Porco Lighthouse to the South and Cape S. Croce Lighthouse to the North) can be used to fix the position of the vessel. In the landfall however, their bearings are opposite and therefore useless. Radar must be in good operating condition.

(b) Tunny nets are laid down in the area and marks can be temporarily missing and small fishing boats engaged in net fishing may be encountered up to 8 miles from the coast; these boats carry no special marks or lights to indicate that they are using nets.

(c) Naval ships quite often exercise off the East coast of Sicily, particularly in an area including Augusta to the North and extending well South of Syracuse.

Two submarine exercise areas are close to this part of the coast.

(d) A current may cross the entrance of the bay as well as the terminal area after prolonged periods of windy weather.

ANCHORAGES: Pilot compulsory inside and outside the breakwaters within the port limits.

The Inner Anchorage has a central zone with a depth of water not less then 22.4 m.

Outside it is recommended to anchor South of Main Entrance, because North of it there are many limitations.

For Santa Panagia Pilot compulsory inside the harbour limits – vessels anchoring outside of this line are not considered to be in port and consequently without port dues.

MAX. SIZE: VLCCs can enter the harbour with tug assistance, with the following limitations: 69 ft. draft for operations in the road (bunkers – provisions – crew changes) and 66 ft. 10 in. with a max. displacement of 450,000 tons to moor alongside SELM Priolo Supertanker Jetty. For Santa Panagia no limitations.

HEALTH: Vessels arriving from countries not suspect of epidemical diseases can ask and receive Free Pratique by radio, sending a telegram not more than 24 hours before arrival to "Sanimare Augusta" via Roma Radio (IAR) or "Sanimare Siracusa" for the port of Santa Panagia. Arrivals from Italian or EEC Ports are considered clear.

It is necessary to request Free Pratique by radio because Health Officers do not board vessel from sunset to 0800 hrs.

RADIO: Augusta Radio P.T. Listening on 2182 kHz. Working on 1643 and 2260 (24 hour service).

VHF: Augusta Radio P. T. Call Channel 16, working Channels 26 and 27 (24 hour service).

Harbour Master (Channel 16).
Pilots (Channel 12). Working 24 hours.
Tugs and Line Handlers (Channel 8). Working 24 hours.
Taxi-boats (Channel 10) From 0600 to 2330 hrs.
Agents Connection (Channel 9). Office hours.
Traffic Control (Channels 9 and 12). Working 24 hours.

TUGS: There are 6 tugs available in the harbour. 2×2,000 h.p., 1×2,400 h.p., 2×2,500 h.p., 1×1,300 h.p. and 1 tug on stand-by/emergency of 2,600 h.p.

Harbour service: 6 tugs on duty from 0700 – 1200 hrs. and from 1300 – 1800 hrs. 3 tugs available from 1800 – 2200 hours and 2 tugs available from 2200 – 0700 hrs.

Tugs' charges vary with vessel's g.r.t., for hours between 0001 – 0800 hrs, 1200 – 1300 hrs., 1700 – 2359 hrs., for Saturday, Sunday and holidays, for service exceeding 1 hour, for operations at SELM – Priolo Terminal.

For Santa Panagia there are 3 tugs available, 1 tug can be employed from Syracuse Harbour – additional tugs can be supplied from Augusta Harbour.

Use of tugs is compulsory for berthing and unberthing. The number of tugs allocated is decided by the Harbour Authority according to gross tonnage. Because of tug crew duty rosters, the most suitable tugs may not always be available. Tugs make fast on the hook after the vessel has cleared the entrance, using ship's ropes. Pilots communicate with tugs via VHF portable radios which they bring on board with them.

Line Handlers: Service is performed with 1 launch for vessels of less than 10,000 g.r.t. and 2 launches for vessels above 10,000 g.r.t.

Wires are not accepted but may be used when provided with a 5 m. Manila or other fabric end tail with eye.

Charge varies with vessel g.r.t., flammable and explosive cargo, rain, waiting time (1 hour delay), overtime from 0600 – 0800 hrs., 1200 – 1300 hrs., 1700 – 2000 hrs., night hours, Saturday, Sunday, holidays, lines above the total of 8 and mooring on dolphins/buoys.

BERTHING: *MACET:* Berth Nos. 1, 2 and 3 are at a finger jetty. Berth Nos. 1 and 3 used only by coasters and bunkering barges. Depth 12 ft. Berth No. 2 used by vessels up to 25,000 d.w.t. on stern discharge. Depth 28 ft. (see "Plan").

Enichem Augusta: Punta Cugno – Berth Nos. 3, 4, 5 and 5bis.

Berth No. 3 Northern Jetty used by Enichem Augusta for discharging and loading chemical products. Berth accepts vessels up to 3,000 d.w.t. mooring alongside. Depth 17 ft. 9 in.

Berth No. 4 (Mid Jetty) used by Enichem Augusta for barges.

Berth No. 5 (Southern Jetty) used by Enichem Augusta for vessels up to 30,000 d.w.t. moored by stern for loading/discharging black/white products and chemicals. Depth alongside 30 ft.

Berth No. 5bis used by Enichem Augusta. It is a steel island connected to Berth No. 5 for vessels up to 5,000 d.w.t. for loading/discharging black/white products and chemicals. Depth alongside 22 ft.

Esso: Pier No. 1: Length of pier about 1,050 m. Heading 110°.

Berth No. 6: Used only by bunker barges.

Berth No. 7: For vessels up to 10,000 d.w.t. 3 pipe-lines with connection of 6 in. Loading rate 150 t.p.h. Loading of gasoline, gasoil, bitumen, fuel oil. Gangway ashore. Stern loading only.

Berth No. 8: For vessels about 38,000 d.w.t. 4 pipe-lines at berth with connections 8 in. (2 for white products and 2 for black products). Loading of same products as No. 7. Gangway ashore. Deballasting pipe-line available for all berths. Diameter 14 in., rates from 700 to 2,000 t.p.h. Shore capacity 20,000 tons.

Pier No. 2: Length of pier about 1,150 m. Heading: 110° ending in a steel platform. Large tankers discharge crude oil on either side of the platform at rates of up to 6,000 t.p.h.

North side, No. 10, receiving tankers up to 90,000 d.w.t. Loading of gasoline, gasoil, fuel oil, lube oil. Connections: 6 in. for bunker, 10 in. for black and white products, 10 in. for lube oil. Gangway ashore.

South side, No. 11, depth 54 ft., receiving tankers up to 140,000 d.w.t. Loading of all products as No. 10 except lube oil. Connections 10 in. No night-time movements for vessels over 60,000 g.r.t.

At about 400 m. from end platform there are 2 smaller platforms (Berth No. 9 and 12).

Berth No. 9: Receiving tankers up to 10,000 d.w.t. Loading of gasoline, gasoil, fuel oil, lube oil. 4 pipe-lines with connections of 8 in.

Berth No. 12: For tankers up to 12,000 d.w.t. Connections of 6 in. Loading of same products as No. 9. Alongside the pier pipe-lines are of diameter of 18 in. to 24 in. for crude oil, 16 in. to 20 in. for fuel oil, 14 in. for diesel and gasoil, 10 in. for kerosene, 8 in. for gasoline, 10 in. for naphtha and JP4. There is also a 14 in. pipe-line for deballasting and 8 in. lines for lube oil. All berths are provided with gangway. At Nos. 10 and 11 vessels may use wire ropes only if the eyes are made of either manila or nylon.

Cement: A finger jetty. Berth Nos. 13 and 14 with depths of 23 ft. used by small vessels carrying cement in bulk. Operations are through a conveyor-belt system, with a handling rate of about 300 tons per day.

N.A.T.O. Pier: Berth Nos. 15 and 16 in depths of 35 ft. and 36 ft. respectively. Used for loading and discharging petroleum products, but being a Navy jetty, berthing is subject to priority being given to Navy requirements.

SELM-Priolo: Supertanker Jetty: For vessels up to 420,000 d.w.t. Berth Nos. 17 to 24. SELM Jetty: Berth Nos. 25 and 26, depth 38 ft. Steel Island: Berth No. 27, for vessels up to 20,000 d.w.t. which are moored by the stern, and secured to 4 buoys with bow anchors down. Berth used for chemical and petroleum products. All the berths have a deballasting pipe-line. Connections: 16 in. for crude and 8 in. for products.

SELM concrete jetty: Both dry and liquid chemicals are handled at this jetty. Berth No. 28, for small vessels whose length is not more than 80 m. moored by the stern. Berth No. 29, for vessels up to 15,000 d.w.t. Berth No. 31, for vessels up to 20,000 d.w.t. Bagged cargo at a rate of 2,000 tons per day, and bulk cargo up to 4,000 tons per day, load or discharge. Berth No. 30 used by bunker barges. Berth No. 32, for small tankers only.

ENICHEM – ANIC: (Carichi Liquidi): Is situated in Priolo's cove. Chemical products are handled. Berth No. 33, for vessels up to 3,000 d.w.t. Berth No. 34, for vessels up to 15,000 d.w.t. Berth No. 35 and No. 36 used by small vessels only.

Also see "Shipmaster's Report" – April 1985.

Santa Panagia: *Berthing Procedure:* At all berths vessels are berthed so as to head outwards. The vessel approaches the berth almost perpendicularly to the pier and with the aid of tugs (generally 6 for a VLCC) and swung seaward, to approach the berth with an angle of about 45°. When at safe distance from the berth and almost in position, the vessel is then swung parallel to the berth and pushed alongside.

No anchor is used, however, both must be ready for any emergency. The following are the maximum landing speeds:

Berth No. 1: 25,000 d.w.t., 22.5 cm./sec.
50,000 d.w.t., 17.0 cm./sec.
Berth No. 2: 10,000 d.w.t., 25.0 cm./sec.
30,000 d.w.t., 30.0 cm./sec.
Berth No. 5: 250,000 d.w.t., 14.5 cm./sec.
50,000 d.w.t., 21.0 cm./sec.
Berth No. 6: 385,000 d.w.t., 13.5 cm./sec.
50,000 d.w.t., 21.0 cm./sec.

Cautionary Advice: Masters are cautioned that prevailing strongest winds and the resulting swell can affect their stay alongside. It is therefore very important that vessels, particularly high freeboard ships pay particular attention to moorings. The most efficient moorings are all wire moorings – mixed moorings of different stretch characteristics and breaking strain should be avoided, particularly in breast lines and springs.

Moorings reeled on winches must be held by brakes hardened up to full torque. No self-tensioning devices should be used. The mooring must be reeled in such a direction as to assist the break. Where split drum winches are used, a maximum to 2 layers should be on the working drum when the mooring reaches the shore bollard/mooring hooks. Brake must be in good condition.

There are limits applicable to freeboard from a windage point of view. This together with maximum operable wind speeds will be discussed with Master's of VLCC by a Terminal Supervisor. The vessel must be held firmly against the fenders at all times. It is unnecessary and dangerous to slack away lines, even if they appear taut, if the ship is not hard against the fenders.

The minimum recommended is 2 spring lines and 2 breast lines at each end.

Melilli: *Operator:* Industria Siciliana Asfalti and Bitumi (ISAB).

The terminal is situated 6 miles South of Augusta, 5 miles North of Syracuse, Sicily. The Marine Terminal is connected to the Refinery storage through 5 lines for LPG and 18 large diameter pipe-lines for Crude and Products which allow for high unloading and loading rates.

All berths are equipped to ensure rapid and safe operations.

Clean and dirty ballast discharge facilities, including ballast reception tanks of 100,000 cu.m. (0.6 million barrels) are available.

A sheltered harbour accommodates service boats and 3 modern 2,000 h.p. tugs are permanently available.

When more tugs are required, additional units are supplied from nearby Augusta.

Bunkering facilities are available on all berths and sea-going barges are operating from the Terminal and from a sheltered harbour equipped for bunkering purposes.

Crude Oil Transhipment: The marine facilities are also suited for transhipment from ULCC-VLCC to smaller tankers better fitted to serve various refinery and/or pipe terminal locations in the Mediterranean and Adriatic.

Crude and Product Storage: 8 tanks are available for incoming crude with a total capacity of 800,000 cu.m. (5 million barrels).

Semi-finished (intermediate) product storage enables the operation of plant units when upstream sections are not available for short periods and contributes to Refinery flexibility.

In particular there is large storage of fuel oil and gas oil fractions and 12 motor fuel component storage tanks.

Total intermediate storage in 27 tanks, amounting to 431,000 cu.m. (2.7 million barrels).

Finished product storage is in 38 tanks of various grades with a capacity of 825,000 cu.m. (5.2 million barrels).

A further 42,000 cu.m. (0.25 million barrels) are held in Refinery service tanks.

Jetty: Deep water is available close to the shore at the jetty side. The marine facilities consist of a finger with 5 berths having the following capabilities and restrictions:

Berth No. 6: Vessels of minimum 18,000/max. 600,000 d.w.t. Max. LOA 1,200 ft. max. draft 78 ft. For unloading crude and loading fuel oil.

Berth No. 5: Vessels of minimum 18,000/max. 250,000 d.w.t. Max. LOA 1,200 ft. Max. draft 78 ft. For unloading crude and loading fuel oil, gasoil and gasoline.

Berth No. 1: Vessels of minimum 5,000/max. 55,000 d.w.t. Max. LOA 790 ft. Max. draft 42 ft. 6 in. For unloading crude and loading all products.

Berth No. 2: Vessels of minimum 10,000/max. 30,000 d.w.t. Max. LOA 650 ft. Max. draft 36 ft. For unloading crude and loading all products except LPG.

Berth No. 7: Vessels of minimum 500/max. 3,000 d.w.t. and LPG carriers of minimum 500/max. 1,500 d.w.t. Max. LOA 320 ft. Max. draft 18 ft. For loading all products.

Somicem-Magnisi: Sea berth, stern mooring for loading crude oil – max. 22,000 g.r.t. Draft 36 ft.

Also see "Developments".

Also see "Agent's Report".

STEVEDORES: Available from Compagnia Lavoratori Portuali.

CRANES: *Heavy Lifts:* Floating cranes with lifting capacity of 20 – 94 tons at a distance of 27 m. – 12 m. are available.

MEDICAL: Medical and hospital facilities available. Vaccinations done on board. Advance notice preferred for assistance required on arrival.

TANKERS: See "Agents Report" for accomplishments required before entering the Harbour and "Berthing" for facilities.

DENSITY: 1025, however it may be reduced by heavy rain.

FRESH WATER: Good quality potable water available by barges.

FUEL: All grades available by pipe-line or barge at anchorage, max. draft 65 ft.

Suppliers Esso, Agip, I.P., Shell, Mobil and Gulf. 48 hours notice required.

GANGWAY/DECK WATCHMEN: Employment of shore watchmen advisable. Employment of shore fire guards advisable.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Shore passes given by Immigration Police.

CONSULS: Denmark Tel: 974319.
Liberia. Tel: 975341.
Norway. Tel: 977470.

REPAIRS: Not permitted to tankers while alongside refineries jetties, may be carried out, while at anchorage, subject to Harbour Master's authorisation. If repairs to engine or it will affect the proper use of engine or in any way restrict the capability of manoeuvring the ship, continuous tugboat assistance may be imposed. Light steel, carpentry and routine maintenance is available from small local shipyards. Also electronic and electrical services.

DRY DOCKS: There is one floating dock, length 105 m., breadth 17.10 m., lifting capacity 3,000 tons. Ships up to 5,000 g.r.t. can be moored alongside the dry dock for light repair operations.

REPATRIATION: No difficulties.

AIRPORT: Nearest at Catania, can be reached in 40 minutes by car. Daily flights to Rome and Milan for international connections. Weekly flights to North Europe capitals available.

TIME: GMT plus 1 hour. Summer time, last Sunday in March to last Sunday in September, GMT plus 2 hours.

HOLIDAYS: Tankers not affected. 1st January; Easter Monday; 25th April; 15th August; 8th December; 25th December.

POLICE/FIRE/AMBULANCE: Boundary and Immigration Police, Tel: 113; Police (Carabinieri), Tel: 112; Ambulance, Tel: 971122; Fire, Tel: 974777.

TELEPHONES: Situated at all berths, not for private use. No direct connection to vessels.

SHORE LEAVE: Immigration Police issues shore passes to permit the landing of the crew and passengers.

DEVELOPMENTS: South of Punta Cugno between Esso Piers and Enichem Augusta Piers a pier named Pontile Consortile has been built, by a pool of port operators.

At the present time it is not in use but authorisation to Harbour Master may be requested for mooring to perform light repairs, transhipment and waiting. The pier has 6 berths, Nos. 1, 2, 5 and 6 with depth 5.8 m. and Nos. 3 and 4 with depth 13.3 m.

North of Punta Cugno between Enichem Augusta Piers and Macet Pier a structure is under construction for dry goods and Ro/Ro, presently it is named Porto Commerciale.

GENERAL: *Garbage removal:* Compulsory service on arrival and every 24 hours thereafter.

SHIPMASTER'S REPORT: June 1982.

If landing a sick crew member Pilot will board and vessel anchors inside the breakwaters. Harbour Master and assistant boarded to check that ship's certificates all valid. All usual entry papers required except Crew Declaration and Stores list, but total quantity of cigarettes required. Crew lists on IMO Fal Form 5. Cables sent to Agents on Sundays and holidays should include Telex number in address otherwise they are not delivered until the next day.

We were anchored about 1.5 hours and the Pilot stayed on board. It was necessary to send ashore some crew members to assist with the stretcher, but they brought it back with them.

EEC Tanker Check list required.

SHIPMASTER'S REPORT: April 1985.
Radio Pratique: Send radio message, 12 hours prior to arrival to "Sanimare Siracusa".
Pilotage: Pilot boards 1 mile North of Cabo Santa Panagia and is contacted by VHF Channel 14. Call sign is "Siracusa Pilots".
Fresh Water: Water is available by barge from Augusta so advance notice required.
Repairs: Normal repairs, but no welding can be carried out alongside.
Fuel: Bunkers are taken via pipe-line when loading/discharging.
Officials: All Officials come from Siracusa (Syracuse).
Ship Chandlers: Available.

AGENT'S REPORT:
The following is a copy of a telex received from a ship's Agent in February 1980.

From: Seafox – Shipping Agents and Bunker Brokers. Head Office: Via Garibaldi, 3/5. Phones : (0931) 977470-978544. Telex: 970072 BONMAR I. Cable: Seafox Augusta Tlx. 970072. 96011 Augusta, Sicily.

We are acting as Shipping Agents in Augusta-Siracuse-Melilli (ISAB) ports and in this connection we take the liberty to advise you of new ordinance issued by Ports Authority in Augusta and Siracuse Ports in order to be able to inform through your good publication well known over the world.

Port Information:
According to instructions issued by European Economic Community No. 79/116, please be advised that Augusta Port Authority introduced a new Ordinance, to apply immediately, as follows:
Quote:

All Masters of petroleum-gas-chemical tankers, having d.w.t. 1,600 and over, with full or partial cargo or in ballast and not gas-free. Before entering or leaving Italian ports must comply with following regulations:

1. In due time, before entering territorial waters adjacent to the port, cable via Romaradio to their Agents:
   (a) Ship's name and call letters.
   (b) Ship's flag.
   (c) Length and draft.
   (d) Destination port and ETA.
   (e) Quantity and quality on board.
   (f) If ship carrying chemical products in bulk, Master's declaration to be in possession of safety equipment and construction certificate to carry chemical products in bulk, according to IMO Code.
   (g) If ship carrying chemical products in bags or liquid gas in containers, Master's declaration to be in possession of the appropriate certificate, according IMO Code.
2. On Pilot boarding vessel, Master must submit following Check List, duly filled, to the Pilot:

(a) Vessel's details:
1. Ship's name.
2. Flag.
3. Owners.
4. Port of Registry.
5. Year built.
6. Gross tonnage.
7. Length.
8. Classification.
9. Call letters.
10. Kind of propulsion.
11. Agents.
12. Propulsion apparatus-horsepower.
13. Draft forward.
14. Draft aft.
15. Draft amidships.
16. Cargo (according to cargo plan).
17. Quality.
18. Quantity.

	(b) Safety Equipment	*Good Working Order*	*Deficiencies*
(i)	Construction and technical equipment	(Yes)	(No)
	Main engine and auxiliaries	"	"
	Main rudder apparatus	"	"
	Auxiliary rudder apparatus	"	"
	Anchor apparatus	"	"

Fitness certificate to carry LPG in bulk, according to IMO Code	"	"

(d) Master and Crew on board

Description of Title and Number – issued certificates of ....
Date issued..
Place issued/country...

Master
Chief Mate
Second Mate
Third Mate
Chief Engineer
First Engineer
Second Engineer
Third Engineer
Radio Officer
Pilot on board
Remaining other crew members, deck and engine

Date ....

Master's signature or Master's Representative (if applicable)

Unquote

Please kindly instruct all Masters to comply accordingly in order to avoid delay in entering the port.

These same regulations apply for Melilli Port (ISAB Terminal) except for first part of information which all Masters have to cable directly to "Compamare Siracusa" via Romaradio in due time before arrival.

AUTHORITY: Capitaneria di Porto, Augusta 96011. *Contact:* Captain Giuseppe Lo Iacono.

BAGNOLI: 40.48 N. 14.10 E. (See Plan)

DOCUMENTS: An arrival report containing vessel's main particulars and data of certificates has to be filled in by Port Officer upon arrival.
5 Crew Lists.
5 Passenger Lists.
Store List in duplicate.
International Health Declaration.
Cargo Manifest.

PILOTAGE: Bagnoli Pilot is permanently on watch as from 0600 to 0600 hrs. Usual Pilot position is Lat. 40° 47′ 30″ N., Long. 14° 08′ 10″ E. Pilotage is compulsory for vessels over 500 g.r.t. for anchoring or entering the port. Permanent watch is maintained by pilot station on VHF Channel 9 and/or 12. Vessel requiring Pilot may also use other international signals, such as flag, morse/sound letter "G". When in port vessels to give pilot station 1 hour's notice for any service required. In the event of bad weather (Bagnoli area is mainly exposed to S.W. winds) vessels to shift out of piers or to change anchorage to Baia Roads (sheltered natural bay 3 miles from Bagnoli in a Westerly direction).

ANCHORAGE: Depth of safe anchorages in Bagnoli area and in Baia Roads ranging from 20 m. to 45 m. – sandy bottom. Anchorage is allowed in the line from the lighthouse of Nisida Island to the lighthouse of Capo Miseno.

RESTRICTIONS: Vessels can enter port at any time of day. No restriction for night departures.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique can be requested via radio cabling to Health Officer of Naples. Cable address: Sanimare, Naples.

RADIO: Naples Radio.

TUGS: Presently no tug available, if required they come from Naples. Time taken approximately 2 hours.

BERTHING: *Italsider Ore/Coal Discharging Pier:* Two berths available. Pier length 357 m. Berth accommodation length 200 m. – max. draft allowed when berthing in Westerly direction is 41 ft. 6 in. – max. draft allowed when berthing in an Easterly direction is 36 ft. with H.T. This pier is equipped with two turntable gantry cranes and conveyor belts. Ore discharging rate: 1,100 t.p.h. Coal discharging rate: 900 t.p.h. All necessary stevedoring services are performed by Italsider with their own personnel. Cranes capacity: 32 tons. Fresh water available.

Italsider Loading Pier: Equipped with 6 turntable cranes and rails – max. draft allowed on both berths is 10.5 m. Fresh water available.

Federconsorzi Discharging Pier: Equipped with a fixed gantry crane and aerial ropeway for discharging of phosphates and pyrites. Discharging rate per shift of 8 hours – 450 tons. Max. draft allowed is 5.40 m. Fresh water available.

Tide Range: Approximately 30 cm.

STEVEDORES: Available. Rate of discharge 1,500/1,700 t.p.h.

FRESH WATER: Available from pier. Rate of delivery 20 t.p.h., or by barge. Vessels at anchor supplied with fresh water by barge from Naples.

FUEL: All types available, always delivered by barge, normally oil companies require 48 hours notice.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: (For entire duration of stay). Tobacco, 50 cigarettes per crew member. Spirits: 1 bottle (opened) per crew member.

IDENTIFICATION CARDS: Required.

CONSULS: At Naples.

REPAIRS: Small repairs undertaken.

TIME: GMT plus 1 hour Winter. GMT plus 2 hours Summer.

HOLIDAYS: See "Naples".

POLICE/AMBULANCE/FIRE: Police 7602553; Ambulance 7520696, 258044 (Ospedale S. Paolo); Fire 7330210 and 7605353.

SHORE LEAVE: Allowed.

GENERAL: *Launch Hire:* Vessels waiting at anchor for their turn may hire launch for crew shore leave and relevant service performed from 0700 to 2400 hrs.

The port of Bagnoli is mainly used for the discharge of ores, minerals, coal and for the loading of steel products for account of the Italsider S.p.A., metallurgic industrial group of national interest, operating with its own shore appliances. Manufacturers of chemical products, the Federconsorzi of Naples, operate in the port of Bagnoli also with their own shore appliances.

AUTHORITY: Capitaneria di Porto di Napoli, Sezione Staccata di Bagnoli, Via Coroglio 10 Bis, Napoli. *Tel:* 7232272. *Cables:* Seziomare Bagnoli. *Contact:* Sandro Musto, Captain of the Port.

BARI: 41.08 N. 16.52 E. **(See Plan)**

DOCUMENTS: On arrival:

5 Crew Lists.
3 Provision Lists.
3 Lists of Articles in possession each Crew member.
Customs Documents.
Cargo Manifests.
Bills of Lading.
Ship's Papers.
Health Documents.
On departure:
Additional declaration of departure.

PILOTAGE: Pilot boards vessels on arrival by motor-boat near harbour entry, outer buoy. Pilotage compulsory for vessel over 500 g.r.t. inward or outward, shifting vessels from one point to another in or out of port. Pilot works on VHF Channel 12.

Pilot call: Letter "G" of International Code, Pilot attending day and night. For services from 1700 hrs. to sunset, or from sunrise to 0800 hrs. the dues are increased.

ANCHORAGE: Good anchorage in all weathers, but precautions should be taken against winds from North. Rocky bottom covered by mud. Bad holding ground. Strong range in the port when bad weather. Not allowed to anchor in fairway except in case of emergency. Anchorage usually allowed East side of Nuovo Molo Foraneo at a distance of about 1 mile from shore.

RESTRICTIONS: Max. depth at harbour entrance 40ft., width 793 ft. Depth of water at berths from 33 ft. to 40 ft.

Night berthing and unberthing is restricted for vessels exceeding 5,000 g.r.t. because of the unavailability of the tugs. Only 1 tug is available for 24 hours a day and a second tug only between 0700 – 2200 hrs. and with 24 hours advance notice.

MAX. SIZE: Maximum permissible length 800 ft. for oil carriers proceeding to oil pier. Max. draft 39 ft.

HEALTH: Masters can request Free Pratique by radio by applying to "Sanimare Bari". Free Pratique automatic for vessels coming direct from other Italian port, and "Q" flag not to be flown on entering. In event of any suspected disease or fever on board, Master should inform Sanimare Bari, not permitting anybody to board the vessel before doctor's inspection.

RADIO: Radio Roma, call sign "IAR." Bari Radio P.T. call sign "IPB" on 2182 kHz. and VHF Channel 16.

TUGS: Tugs normally join vessel outside harbour entrance. Towage service is carried out by following tug-boats belonging to "Rimorchiatori Napoletani": *Serapo* of 1,000 h.p., *Sole II* of 1,170 h.p. and *Ana Capri* of 1,000 h.p. Basic tariff is increased by 20% when the towage rope is given by tug-boat.

BERTHING: When specific side alongside berth is required by stevedores, Agents radio Master prior arrival and advise Pilot. Otherwise side alongside at Master's option after conferring with Pilot. Depth at piers 10 ft. – 47 ft. dependent location. No shore fenders alongside quays.

BULK HANDLING FACILITIES: Grain discharge by 2 suction pipes at rate of 90 to 100 metric t.p.h. each.

STEVEDORES: Important to give ETA in good time. Normal working hours: Winter time (weekdays), 0800 – 1200 hrs., 1300 – 1700 hrs. Saturdays, 0800 – 1300 hrs. Summer time (weekdays), 0800 – 1200 hrs., 1400 – 1800 hrs. Saturdays 0630–1300 hrs.

Overtime: From 0600 – 0800 hrs. the tariff to be increased 25%; 1200 – 1300 hrs., 50%; 1700 – 2000 hrs., 25%; 2000 – 0600 hrs., 70%.

For handling pieces over 1,000 kilos, increase of 50% on the tariff. For unhealthy work, increase of 30% on the tariff.

Sunday. From 2400 – 0800 hrs. the tariff to be increased 100%; 0800 – 1200 hrs., 50%; 1400 – 1800 hrs., 50%; 1200 – 1400 hrs., 100%; 1800 – 2400 hrs., 100%.

MEDICAL: Not necessary for Agents to receive advance notice of required medical attention. Hospital facilities available.

TANKERS: Not allowed to do any degassing of tanks or any kind of repairs to vessel without Harbour Office permission.

Cleaning and degassing of tanks not allowed in port. Inspection of tankers and gas-free certificate can be obtained. Only clean ballast can be discharged in port.

Diameter of load-discharge pipe-lines at oil berth are:

20 in., 16 in. and 12 in. pipe-line for crude oil; 12 in and 18 in. pipe-line for fuel oil; 8 in. pipe-line for gasoil; 8 in. pipe-line for gasoline.

Crude oil discharged to Stanic refinery from Berths No. 31 and No. 4 (Molo Foraneo) suitable for tankers up to 39 ft. draft.

Fuel and other refined products discharged at Berth Nos. 31, 32, 33 and 34.

Deballasting Facilities: There is a shore capacity for 6,500 tons of ballast water. All S. Cataldo Berths are served by a common 12 in. deballast line. On each berth a dirty product arm is used for deballasting line (partially made of concrete), the normal deballasting rate is 250 t.p.h. The maximum pressure being limited to 42 p.s.i.

For this reason it is suggested to arrive at berth with minimum safe manoeuvring ballast quantity.

No slop facilities are available.

DENSITY: Salinity 36%.

FRESH WATER: Available at all berths served with hydrants. Good drinking water supplied by Ente Acquedotto Pugliese. No barge available to carry water in the harbour and in the roads. Tugs may be used for this purpose.

FUEL: Available, 3 days advance notice required.

GANGWAY/DECK WATCHMEN: Service of watchmen is recommended: shift of 10 hours.

OPENING/CLOSING HATCHES: Normally carried out by stevedores. Opening or closing of hatches charged for work carried out during usual working hours.

CUSTOMS ALLOWANCES: 50 cigarettes only are given to each crew member out of bond on vessel's arrival. Wine is permited to be held out of bond but no spirits allowance permitted.

IDENTIFICATION CARDS: Shore leave pass is compulsory.

CONSULS:

Austria
Belgium
Bolivia
Denmark
Ethiopia
France
Germany F.R.
Greece
Liberia
Monaco
Netherlands
Norway
Portugal
Spain
Sweden
Switzerland
Turkey
United Kingdom

REPAIRS: Workshops and shipyards are capable to carry out repairs to hull and engines.

SURVEYORS: 1.There are cargo inspectors available; these can be obtained from S.G.S. Tel: 080/410333.
2. The representative of Lloyd's Register in the port is Lorusso.

DRY DOCKS: No dry docks are available at Bari. Nearest dry docks are at Taranto.

REPATRIATION: Many facilities for effecting crew changes and possibilities for arranging any necessary repatriations.

AIRPORT: Airport is located about 10 km. North of city. Served by regular airlines with flights for all countries daily.

TIME: Local time 1 hour ahead of GMT. Alterations to clocks are made from Spring to beginning of Autumn, giving 2 hours advance on GMT.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; St. Nicholas, Patron of the Town (10th May); Proclamation Day (2nd June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

Cargo work can be arranged on above days, and the stevedoring tariff increased as follows: From 2400 to 0800 hrs., increase 100%; 0800 to 1200 hrs., 50%; 1400 to 1800 hrs., 50%; 1200 to 1400 hrs., 100%; 1800 to 2400 hrs., 100%.

POLICE/AMBULANCE/FIRE: Police, 214116; Ambulance (First Aid) 444848; Fire, 212518.

EMERGENCY CO-ORDINATION CENTRE:
Bari Port Captaincy – Tel: 216860. On VHF Channel 16 from 0800 hrs. – 2100 hrs.
Bari Radio 'P.T.' on VHF (listens throughout 24 hours) on Channel 16.

STORING: See "Prelims".

1. Vessels in port can be supplied by lorries.
2. Lorries with stores for vessels at quays, apart from normal Customs requirements, (if necessary), have to be authorised to enter the port.
3. Lorries with trailers can line up on the berths alongside the vessels. The process is subjected to the commercial operations on hand and /or the position of the vessel at the berth.
4. Fork lift trucks are never used for supplying stores to ships in this port.
5. For the supply of provisions there is the company S.p.A. Cianciola – Tel: 080/235260, 235261, 235262. Telex: 810021. Cianci I P.O.B. 240 70100 Bari who may be approached for any specific requirement. The same Company also has a large area in the port, as a free zone, for storage of goods.
6. Local unloaders can be employed to help in placing goods in store on board if required and available.

BANKS: Banca Commerciale Italiana, Via Abate Gimma No. 87, 70100 Bari Tel: 080 – 216680.

Credito Italiano, Via Putignani No. 98, 70100 Bari. Tel: 080-216771.

Banco di Roma, Via Calefati No. 82, 70100 Bari. Tel: 080-235300.

TELEPHONES: No arrangements exist for placing telephone on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Expected draft increases in the near future for berthing tankers up to 80,000 tons.

AUTHORITY: Capitaneria di Porto, Bari, Corso de Tullio 1, 70100 Bari, Italy. *Tel:* 080-216860. *Telex:* 812289. *Cables:* Compamare Bari. Also VHF Channel 16. *Contact:* Carlo Stea, Port Captain.

BRINDISI: 40.39 N. 17.56 E.

DOCUMENTS:

3 Crew Lists.
3 Lists of Passengers Disembarking.
3 Lists of Passengers in Transit.
Manifests of Cargo carried, with specification of port of origin and whether for local discharge or in transit. If stowed on deck or below deck.
List of Articles in possession of each crew member, such as cameras, binoculars, portable radios, cigarettes, tobacco or any kind of cheap-priced goods.

Other Certificates required to be on board:

Certificate of Ship's Tonnage.
Load Line Certificate.
Derat Certificate.
R/T Certificate.
Safety Certificate.
Anchorage Dues Receipt (if previously paid).

PILOTAGE: Vessel approaching port should apply for Pilot by hoisting the "G" flag, if by daytime. By night-time, letter "G" will have to be signalled by Morse, to port semaphore (Signal Station) which is located under shore lighthouse showing white flashes.

Telegraphic address of pilot station is "Piloti Porto, Brindisi". No ETA required for Pilots as station not equipped with wireless apparatus. Characteristics of pilot boat: gross tonnage, 9.4; power, 65 h.p.; speed, 8 knots.

Area where Pilot boards vessel:

In good weather: 1 mile from harbour entrance.

In bad weather: (a) If vessel is heading for inner harbour and is of small tonnage (up to 3,000 tons) Pilot boat will steer in a direct line, bows pointing towards vessel, up to entrance to "outer" harbour, where Pilot will board vessel. If vessel is of higher tonnage, she will have to take a "crosswise" position so as to form a sheltered area for Pilot, about 1 mile from harbour entrance. *(b)* If vessel (tanker) is bound for outer off-shore terminal (Montedison Installation) for discharge of crude-oil, Pilot boat will endeavour to approach vessel to communicate impossibility of immediate mooring. Anchorage roads, pending possibility for Pilot to board vessel, are 0.8 miles E.N.E. of "Punta Penne" (Capo Gallo).

ANCHORAGES: Besides anchorage point described above, there exists safe anchorages in bay for vessels having draft of 9 m. (29 ft. 6 in.) and in external harbour for vessels of less than 3,000 tons (gross).

RESTRICTIONS: Tankers of over 1,500 tons gross may berth only from sunrise till sunset. Port berths are inaccessible in unfavourable winds. Passenger or cargo vessels no restrictions.

MAX. SIZE: *Inner Harbour:* Draft not to exceed 9.4 m. (30 ft. 10 in). *Outside Main Port area:* For discharging crude oil at offshore terminal, max. draft allowed 11.50 m. (37 ft. 8 in.). For discharging or loading of other refined products of Montedison Installations, depth of berths varies from 4 m. to 9 m. (from 13 ft. 1 in. to 29 ft. 6 in.).

HEALTH: Apply to "Sanimare, Brindisi" by radio, 12 hours before arrival, and not later than 4 hours before arrival, according to provisions of Health Regulations, notifying in message state of health of crew and port of origin of vessel. Procedure not required if vessel entering after calling at another port in same country.

RADIO: Vessel can communicate ETA messages to Agents through Bari Radio (nearest station) or through Rome Radio which can pick up messages from vessels at sea almost in any part of the world.

TUGS: Tug service is generally effected from Punta Riso-Faro Della Pedagne Junction, up to inner harbour. It is customary to use tugs' lines for mooring and unmooring of tankers at terminals outside main port area, in view of the peculiarity of mooring operations and the area where tugs are to operate (subject to surf, choppy seas, winds). Charge for use of tugs' lines is 20% extra on normal towing rates.

TANKERS: Crude oil discharged at offshore buoy mooring for vessels up to 37 ft. 8 in. draft.

Other tanker berths at Inner Harbour for refined products, suitable for tankers up to 28 ft. draft.

STEVEDORES: Always advisable to notify in ETA messages to Agents number of hatches vessel intends working simultaneously to arrange gangs. Normal working hours: From 0700 to 1200 hrs. and 1400 to 1700 hrs. Overtime: Weekdays, 70% increase on normal tariffs. Sundays and holidays: Work performed during normal hours, 50% increase. On overtime, 100% increase.

MEDICAL: Hospital facilities available. For any kind of medical attendance or hospitalisation, if needed, it will be helpful to have port Agents advised by radio in advance.

FRESH WATER: Almost all mooring points alongside wharves are fitted with fresh water distributing hydrants. At off-shore terminals, supply is effected by tugs.

FUEL: Types of fuel available: Bunker "C", viscosity Engler at 50° (Centrigrade), 16/20; specific weight, 0.950/0.960. Gasoil, viscosity Engler at 20° (Centigrade), 1.4; specific weight, 0.830. 48 hours advance notice for any supplies required.

FIRE PRECAUTIONS: Firemen always in attendance during loading/unloading operations by oil carriers.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CERTIFICATES: For vessels over 500 tons effecting international voyages:

(a) Passenger vessels:
  Safety Certificate.
  Radio and Radiophone Certificates (latter if included in vessel's equipment).
(b) Freighters:
  Safety Construction Certificate.
  Safety Equipment Certificate.
  Radio and Radiophone Certificates.

CUSTOMS ALLOWANCES: 50 cigarettes a day for each crew member, if vessel's stay in port exceeds 24 hours. No allowance if stay is shorter than 24 hours. Third of a bottle of spirits only.

IDENTIFICATION CARDS: Not particularly needed besides regular seaman's books.

CONSULS: Vice-Consulate of Denmark, Portugal and Netherlands, all having the same telephone number: 21123. Vice-Consulate of Spain: telephone: 21039.

REPAIRS: Only minor deck and engine repairs can be carried out locally.

REPATRIATION: Adequate facilities exist for effecting crew changes and repatriations as necessary.

AIRPORT: Distance from local airport 5 km. (3 miles). Airport regularly served by Alitalia Airline, ensuring 2 daily flights to Rome and 1 daily flight to other Italian cities, including, among others; Naples, Catania, Palermo, Cagliari, and other destinations via Rome. Direct international flights not scheduled from Brindisi.

TIME: Local time 1 hour ahead of GMT; from 29th March to 26th September, 2 hours ahead of GMT (Summer time).

HOLIDAYS: Officially recognised. Both national and religious holidays include: Sundays; New Year's Day; Epiphany (6th Jan.); St. Joseph's Name Day (19th March); Easter (Easter Monday); Anniversary of Liberation (25th April); Labour Day (1st May); Ascension, Corpus Domini (movable dates); Proclamation of the Italian Republic (2nd June); the Saints Peter and Paul Name Day (29th June); Assumption (15th August); All Saints' Day (1st Nov.); National Unity (4th Nov.); the Virgin Immaculate Conception (8th Dec.); Christmas, Boxing Day.

POLICE/AMBULANCE/FIRE: Police, 25555; Ambulance, 21310; Fire, 21222.

TELEPHONES: No current arrangements existing for placing telephones on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Under construction: 1 pier in outer harbour, which is scheduled to be 200 m. in length (219 yards) with a depth of 12 m. (39 ft. 4 in.).

Coal unloading wharf of 670 m. length to be built to accommodate 2×150,000 d.w.t. vessels. Unloading will be by 2×1,500 t.p.h. bucket unloaders.

AUTHORITY: Capitaneria di Porto – Brindisi, Via Regina Margherita, No. 1, 72100 Brindisi, Italy. *Tel:* 21022, 21023. *Cables:* Compamare Brindisi.

CAGLIARI (including Sarroch), Sardinia: 39.05 N. 09.01 E. **(See Plan)**

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
2 Provisions Manifests.
2 Manifests of Crew Personal Effects.
Cargo Manifest.
Bills of Lading.
2 Arrival Reports, completed on arrival.
Maritime Declaration of Health, completed on arrival.
Ship's Certificates including Italian Anchorage Dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 500 tons. Requested by ship's Agents. Vessels should wait in the roads for Pilot to board. International Code signals used for calling Pilot. Pilot station telephone number: 652929. Pilot boards tankers about 2 miles East of oil terminal.

Sarroch: Compulsory for all tankers. Vessels should wait in roads as follows:

G1 – (for tankers of more than 42 ft. draft) Lat. 39° 05′ 00″ N., Long. 09° 05′ 00″ E.
G2 – (for tankers of less than 42 ft. draft) Lat. 39° 04′ 27″ N., Long. 09° 03′ 15″ E.
G3 – (for tankers of less than 5000 g.r.t.) Lat. 39° 05′ 48″ N., Long. 09° 02′ 00″ E.

Pilot station telephone number 929006–929057. VHF Channel 16.

ANCHORAGE: All of the Roads are available for anchorage except where prohibited zones indicated on charts.

MAX. SIZE: Cagliari Port: Max. draft 26 ft. Sarroch, SARAS Terminal, tankers up to 380,000 d.w.t. Max. draft 68 ft. Depth of channel 75 ft.

HEALTH: Free Pratique may be requested by radio to Sanimare Cagliari between 12 to 6 hours prior to arrival advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO: Cagliari Radio operating continuously on 2182 kHz, and on 156.8 MHz.

Tankers: 48 hours' radio notice must be given, also advice of readiness on arrival.

Following information to be sent with first ETA message to Saras – Sarroch, Telex: 790169 Saraff I.

1. Quantity of clean and/or dirty ballast.
2. Quantity of slops to be discharged/kept on board.
3. Previous cargo.
4. Condition of cargo tanks i.e. inerted, gas free, etc.
5. Arrival draft.
6. Sailing draft.
7. Distances bow manifold and stern manifold.
8. Manifold size and number of loading arms required.
9. Maximum acceptable loading rate.

VHF: *Cagliari:* Harbour Master's Office, Channel 16.

Sarroch: Harbour Master's Office, Channel 16. Pilot station, Channel 9. Mooring station, Channel 6. Boat service station, Channel 8. Loading Master – Saras Terminal, Channel 14.

Also see "Shipmaster's Report".

TUGS: 6 available, of up to 4,500 h.p.

Cagliari: Normally join vessels at the port entrance.

Sarroch: Normally join tankers at anchorage points and assist berthing at Saras Jetties Terminal.

BERTHING: *Cagliari*

Berth No. 1: Length 68.0 m.; draft 14 ft.
Berth No. 2: Length 128.0 m.; draft 24 ft.
Berth No. 3: Length 227.0 m.; draft 21 ft.
Berth No. 4: Length 123.7 m.; draft 18 ft. 03 in.
Berth No. 5: Length 60.3 m.; draft 18 ft. 03 in.
Berth No. 6: Length 116.8 m.; draft 8 ft.
Berth No. 7: Length 92.6 m.; draft 16 ft. 06 in.
Berth No. 8: Length 278.6 m.; draft 23 ft.
Berth No. 9: Length 325.8 m.; draft 24 ft.
Berth No. 10: Length 328.0 m.; draft 26 ft. 06 in.
Berth No. 11: Length 203.2 m.; draft 26 ft. 06 in.

Berth Nos. 2, 3 and 4 reserved daily for passenger ships.

TANKERS: *Sarroch Saras Jetties*

P.1: draft 39 ft. 6 in.
P.2: draft 36 ft.
P.3: draft 41 ft.
P.4: draft 38 ft.
P.5: draft 36 ft.
P.6: draft 26 ft.
P.7: draft 35 ft.
P.8: not yet workable
P.9: not yet workable
P.10: draft 23 ft.

Platform Island No. 1 (for crude oil discharging only) draft 68 ft.
Platform Island No. 2 (for crude oil discharging only) draft 57 ft.

Loading Rates:

Berth Nos. 1 – 4	Crude oil	5,000 t.p.h.
	Fuel oil	2,000 t.p.h.
	Gas oil	2,000 t.p.h.
	Gasoline	1,000 t.p.h.
Berth No. 5	Fuel oil	2,000 t.p.h.
	Gas oil	800 t.p.h.
	Gasoline	500 t.p.h.
	LPG	200 t.p.h.

Berth No. 6 For Bunkering Barges and small tankers up to 3,000 d.w.t. Fuel oil, gas oil, kerosene and gasoline at slow pumping rates.

Berth No. 7	LPG	200 t.p.h.
	Fuel oil	1,000 t.p.h.
	Gas oil	800 t.p.h.

Platform island for crude oil only at 10,000 t.p.h.

MEDICAL: All facilities available at Cagliari.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No water barges, although bunker barges may be able supply small quantity fresh water in emergency only.

At times fresh water is in short supply and may not be available.

Cost of delivery of fresh water by tug is 3,000 lire per tonne.

FUEL: All grades available ex-barge only. Barges supply vessels at anchor and vessels calling for bunkers only.

Vessels calling at Sarroch for bunkers by barge are required to keep Agents closely advised of their ETA and bunker requirements. Messages confirming the vessel's ETA should be sent to Agents 72, 48 and 24 hours before vessel's arrival. Masters should note that Customs Regulations do not permit the return of bunkers to the refinery after the barge is loaded, therefore an accurate figure of bunkers required must be given in the first ETA message to Agents.

REPAIRS: Minor repairs can be handled at Cagliari. Slipway for vessels up to 400 tons.

BALLAST: The discharge of ballast by tankers can be effected at all berths at a pumping rate between 1,000 and 2,500 t.p.h. Reception of ballast ashore is into 3 tanks with total capacity of 20,000 cu.m. and 6 API separator vessels.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man, usually allowed for consumption on board while vessel in port.

IDENTIFICATION CARDS: Shore passes issued by local police.

CONSULS:

Belgium
Denmark
France
Netherlands
Norway
Sweden
United Kingdom

REPATRIATION: No difficulties.

AIRPORT: Elmas Airport situated 12 km. from Cagliari.

TIME: GMT plus 1 hour. Summertime March to September: GMT plus 2 hours.

HOLIDAYS: Not applicable to tankers. New Year's Day (1st January); Epiphany (6th January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Corpus Domini; Proclamation Day (2nd June); St. Peter & St. Paul (29th June); Assumption B.V.Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: *Cagliari:* Police Tel: 658956. Fire Tel: 652222. Ambulance Tel: 656979.

Sarroch: Police Tel: 929063. Fire Tel: 652222. Ambulance Tel: 929024.

TELEPHONE: No telephone connection on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: The new industrial port S.W. of Cagliari is still under construction. Both Meridionale and Settentrionale Moles have now been completed.

SHIPMASTER'S REPORT: October 1979 (Updated 1986).

Anchorage Restrictions: The following port regulation in force since April 30th, 1979:

Vessels calling at Sarroch for orders only, may not get permission to anchor at Golfo di Cagliari Anchorage.

Such a vessel must remain in position South of the line Cape Spartivento – Cape Carbonara.

Offence against this regulation will cause the vessel to be fully charged for harbour and light dues in connection with clearing by Immigration, Port Health, Customs and Agents.

VHF: Pilot operates on Channels 16 and 9. Agencies operate on Channel 8. Loading Master Sarroch/Saras Jetties operate on Channel 14. Call sign: "Saras Terminal".

SHIPMASTER'S REPORT: May 1981.

At the oil berths it is usual to have 4 tugs and tugs are paid by the hour, i.e. the use of a tug for 61 minutes costs 2 hours hire.

Moorings are usually 3,2,2, with head and stern lines sent first followed by springs. Require plenty of turns on the bitts for tugs.

Apparently the boatmen will not come out to the vessel if she is anchored outside the designated anchorage areas as shown on the chart unless, of course, the draft prohibits a close approach. It is frequently used for bunkering and crew changes.

To obtain fresh water from the jetty it is necessary to obtain, in duplicate, an official form from the Agent.

According to Pilot the max. size is now 250,000 d.w.t. and draft 23 m.

Harbour Master boards for, usually, at least one inspection and collects EEC check list. Vessels documents usually taken ashore for perusal by Harbour Master.

Anchorage dues are valid for one month.

AUTHORITY: Capitaneria di Porto di Cagliari, 09100 Cagliari, Italy. *Contact:* Captain Sergio Albanese, Port Commandant.

SARAS Marine Terminal, 09018 Sarroch (CA), Italy. *Tel:* (070) 900031 – 900061. *Telex:* 790169. *Cables:* Saras – Sarroch. *Contact:* Captain D. Grosso, Manager – Marine Service.

CATANIA, Sicily: 37.29 N. 15.06 E. (See Plan)

DOCUMENTS: Arrival report requested by Harbour Authorities. Also see "Augusta".

PILOTAGE: Master can communicate with Pilot on VHF Channel 16. Pilot boards at sight on harbour entry. International Code signals used to call Pilot.

ANCHORAGE: Vessel must remain on roads awaiting Pilot.

RESTRICTIONS: No restrictions on entry at night, except for tankers (either loaded or empty, as per harbour regulation). The tide at Catania is no more than 30 cm. Bar at entrance 30 ft.

MAX. SIZE: No limitation on the length and breadth but only on draft of vessel, provided same can be contained within the size of piers of Catania Harbour. See "Berthing".

HEALTH: The usual Sanitary Pratique as per all Italian ports is requested. Free Pratique obtainable by radio prior arrival sending cable to "Sanimare Catania".

RADIO: The quickest way is to address messages to "Romaradio", better if adding to the telegraphic address the telex number of Agency, so that after very short time from reception at Romaradio the message is in Agent's hands.

It is important that 72 *working* hours notice of ETA be passed to Agent.

TUGS: When Pilots are on board, they can call tugs by small radio-calling station. Very frequently the tug's Company, when seeing a large ship, join vessel at same time as Pilot. Tugs using ship's lines.

BERTHING:

Berth Nos.		*Length*	*Depth*
1 and 2	Molo Mezzogiorno, Oil berths	361 m.	30 ft. 6 in.
6	Molo Crispi, Silo berth	154 m.	30 ft.

21	„ „	111 m.	19 ft. 6 in.
22	„ „	60 m.	16 to 20 ft.

STEVEDORES: As per actual Port Labour Regulations, in order to book gangs, stowage details must reach Agency not later than 1100 hrs. of the day before ship's arrival, except for work to be done on Saturdays, Sundays and Mondays when application for gangs must be made on Friday.

The official load/discharge rate for general cargo is 50 tons per hatch per day (8 hours), but real output is higher. Increase for overtime, continuous shifts (0700–1330 hrs.; 1330–2000 hrs.; 2000–0230 hrs.). Night work, Sundays, national holidays, etc.

MEDICAL: Hospital facilities easily available. No advance notice required unless for emergency cases and for cases to be urgently treated during night and holidays.

TANKERS: 2 tanker berths are situated in line at Southern Breakwater, called "Molo Mezzogiorno". There are 3 pipe-lines, diameters of 8 in., 6 in., 4 in. No discharge facilities for tank washing.

Tankers are not allowed to berth or unberth at night.

SALINITY: Average salinity of water inside the port is the same as the average salinity of Mediterranean.

FRESH WATER: Available at nearly all quays including bunker piers.

FUEL: Bunkers available and supplied only by pipe connection at bunker pier (Molo Mezzogiorno). Max. rate 400 t.p.h.

CUSTOMS ALLOWANCES: Tobacco, for foreign ships not in coastal service in Italian Ports: 50 cigarettes per each crew member, for the first 24 hours of the ship's stay in port. Other cigarettes can be obtained for which an application to the Customs House is required. Spirits: 2 or 3 bottles per day (provided minimum 20 crew members).

REPAIRS/DRY DOCK: Small repairs can be carried out at Catania. No dry docks available.

AIRPORT: Very near important airport with regular international flights.

TIME: GMT plus 1 hour. In Summer time GMT plus 2 hours.

HOLIDAYS: Normally, during all holidays it is possible to work with extra payment.

TELEPHONES: Numbers of emergency services: Police 531905; Emergency Police 113; Fire Brigade 327702; Sanitary Office 532123; Harbour Master 531667, 531134; Pilot 531906; Mooring 531150.

DEVELOPMENTS: Ferry berth under construction. 40 ton multi-purpose container crane to be installed. With spreader it will be able to handle 20 ft., 35 ft. and 40 ft. containers and general cargo up to 45 tons by hook.

AUTHORITY: Capitaneira di Porto. Via Dusmet, Porto di Catania, Italy. *Tel:* 531667, 531134. *Telex:* 912350. *Cables:* Capitaneria di Porto-Catania. *Contact:* Comm. Antonino Petralia.

CHIOGGIA: 45.14 N. 12.19 E. (See Plan)

PORT LIMITS: Bacino Marittima and Banchina Lombardo Esterno.

DOCUMENTS:

6 Crew Lists (IMO Form).
2 Cargo Manifests.
6 Passenger Lists.
2 Crew Personal Effects Lists.
2 Stores Lists.

PILOTAGE: Not compulsory. ETA at least 24 hours prior to arrival. Pilot will board 1.5 miles E.N.E. of channel entrance. Vessels on arrival may contact Pilots by VHF (Channel 14).

ANCHORAGE: Recommended anchorage 1.5 miles North East of the entrance. All vessels must keep radio watch, specially in Winter time owing to very strong E.N.E. winds.

Anchorage in inner road available, with Harbour Master authorisation.

HEALTH: Clearance on arrival.

VHF: Harbour Master on Channel 16 from 0800 – 2000 hrs. Venice radio (PT) on Channel 16, continuously.

TUGS: Available.

BERTHING: For general cargo there are the following berths: Banchina Lombardo Esterno: Length 650 m., max. draft 21 ft. Bacino Marittima, with 3 berths available, total length 480 m., draft from 14 ft. to 16 ft. Banchina Lombardo Interno: Length 100 m., draft 14 ft. For bulk carriers (grain etc.) there are 2 mooring buoys.

Campo Boe San Felice: For ships LOA 220 m., max. draft 28 ft.

Campo Boe Perognola: For ships LOA 150 m., max. draft 21 ft.

Ro/Ro berth: Bacino Marittima South – max. draft 15 ft.

CRANES: 16 mobile cargo cranes – max. capacity 130 tons. 3 floating elevators for bulk carriers. 1 cargo crane on rails – capacity 5 tons alongside Banchina Lombardo Interno.

STEVEDORES: Working hours normally 0800 – 1200 hrs, 1400 – 1800 hrs.

MEDICAL: Hospital facilities available.

FRESH WATER: Available on the berth by hose connection. For ships on road by tug or barge, is necessary.

FUEL: Available by lighter.

REPAIRS: Routine maintenance possible.

CUSTOMS ALLOWANCES: Italian Regulations apply.

SHIPMASTER'S REPORT: August 1980.

Vessel discharged yellow corn.

Chioggia is a famous fishing port in the Southern region of the Venice lagoon. In the past few years more and more vessels with grain cargo have been directed to this port because the facilities of Venice, Ravenna, etc., are not sufficient to handle the increasing quantities of imported grain, corn, soyabean meal, etc.

Vessels with an arrival draft deeper than 28 ft. have to anchor outside the breakwater about one mile N.E. of the entrance. The depth there is 12.0 m. – 14.0 m., the bottom is muddy. The lightering operations are done by floating elevator and modern barges. It is understood that the season is good and the sea calm. The daily discharge rate with one elevator is between 3,000 and 4,000 metric tons. The elevator is not self propelled, the barges are handled by a modern pushing tug. From the vessel the barges move alongside to the inner harbour basin named "Bacino della Stazione Marittima" where they are discharged by mobile cranes into lorries.

A shipchandler is available, the quality of fresh provisions is good. The shipchandler also co-operates with "Unitor" gas and oxygen change.

Fresh water is only available by tug at outer roads and in small quantities, tug charges about U.S.$300.00 per hour.

Transportation of crew and small amounts of stores is done by the pilot boat, which charges U.S.$75.00 per trip from 0800 hrs. until 1700 hrs. Monday-Saturday, outside that time 50% more.

The pilot boat listens on Channel 14 VHF during daytime, otherwise only when there is work for the Pilot.

When vessel's draft is not more than 28 ft., shifting into the inner roads is possible, there is a place close S.W. of the castle "Forte S. Felice" with two mooring buoys for the stern and one for the bow, distance between stern buoys and bow buoy is 250 m., the depth is 10.0 m.–11.0 m.

There is one tug available, further tugs have to come from Venice.

At the inner roads fresh water is available by waterboat from Venice-Marghera, minimum of two days notice required, the quality is good. A crewboat is available and has to be arranged by the Agent, VHF is not available, the charge rate is about 30,000 (thirty thousand) Italian Lira per trip.

The nearest airport is Venice/Marco Polo Airport, taxi charges from Chioggia to Airport between 30,000 and 40,000 Italian Lira.

From the ship's documents only the certificate of measurement was required by the authorities, other forms like those required at Venice.

Doctor and hospital with X-ray facility available, giving medical reports in Italian language only.

Repair facilities are not available, have to be ordered from Venice.

AUTHORITY: Capitaneria di Porto – Chioggia, Piazza Vigo, 30015 Chioggia, Italy. *Tel:* (041) 400242, 404761. *Cables:* Compamare Chioggia. *Contact:* T. Santapaola, Port Commandant.

CIRO MARINA (Pta. Alice): 39.24 N. 17.09 E. (See Plan)

SHIPMASTER'S REPORT: November 1979.

The vessel was instructed to go to Ciro Marina to load a cargo of salt, at the time the vessel was berthed at Marina de Carrara. We realised that we did not have a chart of Ciro Marina and ordered one from Genoa. After 4 days still no chart was forthcoming, I do not think such a chart exists.

We approached Ciro Marina from the South, as close in as was considered prudent, but no sign of any harbour could be seen at the village of Ciro Marina.

Looking further North towards Pta. Alice (Al-lee-chi) a large hangar type building and loader could be seen, (this coincides with the statement in the Pilot supplement, page 78). We rounded the point and proceeded towards the loader, where dolphins could be seen. (See "Plan").

Torre Vecchia is not so noticeable when approaching from the East. (Mediterranean Pilot Vol. 2, Page 475, lines 18-22).

It was established that a Pilot should have been ordered through Crotone Pilot Station, 20 miles South of Pta. Alice. As the weather was excellent, and ascertaining that there was ample water I decided to berth the vessel, this was accomplished without any difficulty.

It is best to drop the anchor well out, as it is used to haul small ships off the dolphins to load, as the loader cannot traverse right in close. We were told there is usually a buoy moored offshore to take an offshore headline, but this had been washed ashore in the Winter. An offshore dolphin for a similar stern line is in position. (See "Plan").

I was told the loader can load up to 2,000 tonnes per hour, and is fairly manoeuvrable. With the loader placed amidships it was necessary to shift ship twice, to load right forward, and right aft.

No fresh water is available. It might be possible to get a small quantity of stores, although getting them on board would be quite a carry, the loading chute/pipe is about 300 m. long with a narrow catwalk alongside the loading belt, it is not the best way to get stores aboard.

Sailing presents no difficulties, just let go and steam away. The Pilot does not appear.

As this is an open to the sea berth it is dangerous with winds from W.S.W. through North to E.S.E., or any Northerly swell. Vessels of 14,000 tons use this "port" and large quantities of salt are exported.

References:

B.A. Chart 198.

Mediterranean Pilot Volume 2. 9th Edition 1965. Pages 474 and 475, along with supplement No. 7 – 1975.

Position: Gulf of Taranto. Lat. 39° 24.2′ N., Long. 17° 08.7′ E. (approx.).
Type of Port: Open to the sea.
Pilot: Ordered through Crotone Pilot, VHF Channels 16 and 14.
Radio Station: Crotone Radio is the nearest.
Cargo Loaded: Mineral salt.
Rate of Load: Up to 2,000 tonnes per hour.
Fresh Water: Not available.
Boatmen: Available. They stand by from arrival to departure.

AUTHORITY: Capitaneria di Porto, 88074 Crotone, Italy. *Tel:* 0962-20721, 0962-20722. *Telex:* 890083 Compcr I. *Contact:* Antonio Valentini, Commandant.

CIVITAVECCHIA: 42.05 N. 11.47 E. (See Plan)

DOCUMENTS: On arrival:

4 Crew Lists.
4 Lists Passengers in Transit.
4 Lists Passengers Disembarking.
2 Provisions Lists.
2 Lists of Crew Articles, including Tobacco, Cigarettes, Spirits, Radio, etc.
Manifest(s) and Bill(s) of Lading (non-negotiable) covering all cargo on board.

It is recommended that particular care be exercised in giving the exact weight and number of tobacco, cigarettes, spirits, paper for cigarettes, cigars, cigarillos, coffee, sugar, salt, pepper, spices, cocoa and chocolate, etc., on board, as well as bunker quantities and lube oil, thus avoiding fines in case the Customs guards in searching vessel subsequently should find any concealed.

PILOTAGE: Pilots are advised of vessel's arrival by Port Authorities and by Agents. Therefore accurate advance notice of ETA should be addressed by Master to Agents. Pilot usually boards vessel within 2 miles of port. Pilot station in port area. Pilots work on VHF Channel 14.

ANCHORAGES: Any vacant place assigned by Port Authorities, taking into account vessel's draft. If port is congested vessels anchor at roads. Pilot assistance is recommended.

RESTRICTIONS: No restrictions are imposed upon entry. With the exceptions of particular individual cases to be submitted for perusal to Harbour Authorities, vessels may berth and sail at any time, weather permitting. Only 1 tug available between 0000 – 0500 hrs.

MAX. SIZE: Max. draft 34 ft. 6 in.

HEALTH: Clearance is granted by radio; Master to cable Sanimare Civitavecchia 24 hours prior to vessel's arrival. Quarantine requirements are those prevailing in all other Italian ports.

RADIO: Communications to and from vessels are sent and received from Civitavecchia Radio.

TUGS: Tugs wait for vessel at port entrance. Tug assistance is necessary although not compulsory. Ship's lines have to be used.

BERTHING: Shore fenders keep vessel off the quay.

Berths: No. 2 for vessels up to 180 m. length, 28 ft. 6 in. draft.
No. 7 for vessels up to 160 m. length, 25 ft. draft.
No. 8 for vessels up to 240 m. length, 33 ft. draft.
No. 9 for vessels up to 130 m. length, 25 ft. draft.
No. 10 for vessels up to 220 m. length, 28 ft. 6 in. draft.
No. 11 for vessels up to 220 m. length, 28 ft. 6 in. draft.
No. 14 for vessels up to 190 m. length, 33 ft. draft.
No. 18 for vessels up to 220 m. length, 34 ft. 6 in. draft.
No. 20 for vessels up to 220 m. length, 34 ft. 6 in. draft.

SPECIALISED CARGO HANDLING FACILITIES: Berth No. 8: Grain silo of 35/40,000 tons capacity is available; this berth is equipped with 2 rail-suckers, 4 movable suckers and 1 elevator. Ore, coal, fertilisers, sulphur, etc. can be handled at Quay Nos. 2, 7, 9, 10, 11 and 14. Structures for containers not available here, nevertheless small traffic might be practicable. Ro/Ro traffic practicable. Liquid chemicals practicable. No facilities exist for LPG carriers.

STEVEDORES: To enable Agent to order gangs it is very important to provide accurate ETA in good time.

From 0800 – 1200 hrs. and from 1300 – 1700 hrs., or from 0600 – 1230 hrs., from 1230 – 1900 hrs. and from 1900 – 0030 hrs. against payment of 32.50% extra.

Saturday: From 0600 – 1230 hrs. against payment of 32.50% extra; from 1230 – 1900 hrs. and from 1900 – 0030 hrs. against payment of a further increase of 25%.

Sunday: Work can be performed at overtime rates plus 50% extra from 0600 – 1230 hrs., from 1230 – 1900 hrs. and from 1900 – 0030 hrs.

Holidays: Work can be performed at overtime rates plus 150% extra from 0600 – 1230 hrs., from 1230 – 1900 hrs. and from 1900 – 0030 hrs.

MEDICAL: Not necessary to receive advance note of required medical attention. Hospital and clinical surgery available. Master to advise in advance of particular inoculations required.

TANKERS: Max. draft allowed 34 ft. 6 in. Max. length 220 m. Tankers are not permitted to enter port before sunrise and after sunset. Diameter of discharge lines 8 – 14 in.

FRESH WATER: Drinking water and water for boilers is supplied from pier by hoses. Average pumping rate 8 – 10 t.p.h. Fresh water also available by barge, capacity 120 tons.

Shipmaster's Report: April 1980: Fresh water is always in short supply and only limited quantities supplied to vessels.

FUEL: Bunkering can be effected by means of barges and/or tank-lorries at all quays. Grades available: fuel oil and gas oil.

GANGWAY/DECK WATCHMEN: Watchmen services recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CERTIFICATES: Requirements are those prevailing in all other Italian ports, e.g. Tonnage Certificate, Safety Equipment, Load Line, Derat Certificate, etc.

CUSTOMS ALLOWANCES: Tobacco. Quantity permitted to each crew member: 50 grams to be smoked within first 48 hours. Wine and/or Spirits. 1 open bottle of spirits.

IDENTIFICATION CARDS: Required. Passes issued by local police.

CONSULS: There are no Consulates, but only Consular Agencies or Honorary Representatives for the following countries:

Finland	Tel. 23134	Portugal	Tel. 23048
France	Tel. 23048	Spain	Tel. 24304
Norway	Tel. 25207	Sweden	Tel. 23109

Nearest British Consulate is in Rome.

REPAIRS: Repairs of limited extent and importance may be carried out by 2 local workshops.

REPATRIATION: Facilities exist to effect crew changes and to arrange repatriations.

AIRPORT: Distance from airport Leonardo da Vinci (Rome) 70 km.

TIME: 1 hour in advance in relation to GMT. Clock will be advanced 1 hour in Summertime, giving 2 hours advance of GMT.

HOLIDAYS: All Sundays, 1st and 6th January, 19th March, 25th and 28th April, 1st May, 2nd and 29th June, 15th August, 1st and 4th November, 8th, 25th and 26th December, Easter Monday, Ascension Day, Corpus Domini. Holiday work is subject to the authorisation of port authorities.

POLICE/AMBULANCE/FIRE: Police, 23729; Ambulance, 23382; Fire, 23333.

TELEPHONES: Can be connected on board vessels at Quay No. 7.

DEVELOPMENTS: Breakwater under construction.

AUTHORITY: Capitaneria di Porto di Civitavecchia, 00053 Civitavecchia, Italy. *Tel:* 0766-20250/23015/22338. *Cables:* Compamare Civitavecchia. *Contact:* Technical Department.

FIUMICINO: 41.46 N. 12.13 E. (See Plan)

DOCUMENTS:

Before entering territorial waters in the vicinity of the port, tankers' Masters must, directly or by ship's Agent advise authority of the following:

Ship's name and call sign;
Length and draft;
Destination and ETA;
General nature and quantity of cargo.

Documents required:

3 Copies Crew List.
Stores manifest.
List of personal effects.
Manifest of cargo.

PILOTAGE: Vessel should await Pilot about 1.0 miles off the tanker loading platforms which are situated in the following positions:

Platform R1: Lat. 41° 45′ 13.54″ N., Long. 12° 09′ 14.54″ E.
Platform R2: Lat. 41° 44′ 44.35″ N., Long. 12° 10′ 03.58″ E.

ANCHORAGE: Vessels waiting to berth should anchor to the South of Platform R2, not less than 1 mile from the platform. The anchorage is not recommended during strong South or South-westerly winds, and in unfavourable weather conditions it is advisable for vessels to remain underway.

It is forbidden to use anchors in the near vicinity of the tanker berths, due to the presence of underwater pipe-lines. When approaching the moorings, anchors must be firmly secured in the hawse.

RESTRICTIONS: Pilotage and mooring is not carried out during hours of darkness. Unmooring possible day and night.

MAX. SIZE: R1 platform: 290,000 d.w.tonnes, 200,000 displacement tonnes, draft 51 ft.

R2 platform: 150,000 d.w.tonnes, 130,000 displacement tonnes, draft 45 ft.

HEALTH: Agent will advise "Sanimare Fiumicino", and doctor will come on board in the Roads, usually at 0900 hours.

RADIO: Advise Refinery of vessel's ETA 72 hours before arrival via Roma Radio. Confirm ETA 24 hours before arrival.

Vessels arriving for the first time at Fiumicino should also advise dimensions of vessel's manifold flange connections, as follows: distance from bow, distance from ship's side, height above deck, outside diameter, inside diameter, number of holes, distance between centre of opposite holes and diameter of holes.

Vessels should also communicate draft, cargo temperature, lifting power of derrick, voltage and type of current on board (AC/DC) and vessels loading should also advise quantity of ballast on board.

During cargo operations, the tanker will communicate by radio-telephone with the pumping station and the refinery.

VHF: Pilot station on VHF Channel 16. Listens during daylight hours only. Port Authority available 24 hours on VHF Channel 16.

TUGS: 1 × 2,330 h.p. Tug required by crude oil tankers.

MEDICAL: Local doctor and hospitals available in Rome.

TANKERS: 2 offshore mooring platforms, R1 and R2, connected to sea-lines of 16 in. (2), 20 in., 28 in. and 36 in. diameters. Loading rates 800 to 1,000 cu.m. per hour. Rate of discharge 3,000 to 4,000 cu.m./p.h.

Platform R1 for crude oil tankers.

Platform R2 for product tankers and small crude oil tankers.

Mooring: Vessel to have ready on arrival: port derrick rigged for hose handling; boat-rope, pilot ladder, heaving lines and lifebuoys on both sides; and bow stopper.

Vessel is moored by the bow about 30 to 50 m. distant from the mooring platform.

Hoses: Connecting and disconnecting hoses performed by refinery personnel, vessel to supply winchman and man the derrick. Derrick capacity to be at least 3 tons for ships loading and discharging products and 8 tons for crude oil tankers. Each platform is equipped with 2 floating hoses, about 200 m. long, which drift fully extended when berth is not occupied.

BALLAST: Raffineria di Roma can accept dirty ballast or tank washings up to a maximum of 13,000 tons. Recommended advise before arrival the quantity of ballast to be discharged. Ballast should be reduced to a safe minimum to save time at the mooring berth.

SALINITY: 25-28 grams per litre.

FRESH WATER: Supply by barge 100 tons per trip.

FUEL: Bunkers not available, only lube oil in drums can be supplied.

CUSTOMS ALLOWANCES: 40 cigarettes per day for 3 days for each Crew member.

CONSULS: All Consulates and Embassies in Rome.

REPAIRS: Small repairs can be effected but no dry dock.

AIRPORT: International airport "Leonardo da Vinci" at Fiumicino.

TIME: GMT plus 1 hour. From March 29th to September 26th, GMT plus 2 hours.

REGULATIONS: Raffineria di Roma will hold vessel responsible for consequences of any pollution caused by oil leaking or discharged from the ship. Strictest precautions to be observed.

Engine to be kept ready to leave the berth in the shortest possible time.

Propeller movements are forbidden while vessel in berth, due to presence of floating pipe-lines.

WINDS: In the Fiumicino Roads the strongest winds come from S.W., but all winds coming from S.E. to N.W. can cause storms that can be dangerous both for moored ships and anchored ships.

Northern winds, being partially weakened by the coast, are dangerous only when exceptionally strong.

Usually storms begin with S.E. winds, which then turn South-westerly reaching their maximum force; then they usually turn Northerly or North-westerly, finally weakening; this cycle can last from 3 days up to more than a week. However the above cycle does not always develop in this way, since the peculiar characteristic of this zone is the rapidity by which wind can change both in force and direction, as well as the sea possibility of becoming rough in a very short time. The stream almost always goes from S.E. towards N.W. at the speed of 0.5 to 1 knot. Owing to the Tiber's mouth, the stream can exceptionally increase in intensity, but due to the distance between terminals and shore, it has never up to now increased in intensity to such a point as to be dangerous for mooring and anchoring ships. Tides are practically negligible; in fact the maximum difference between high and low tide is about 0.40 m.

GENERAL: The refinery personnel will set up floodlights on deck but power is to be provided by the vessel as is assistance in the setting up.

A refinery representative will remain on the vessel to supervise cargo inspection, loading/unloading and surveillance. He is to be provided with accommodation and meals.

A room is to be provided for the radio connecting vessel with the refinery.

A Raffineria di Roma S.p.A. representative will, upon boarding the vessel, require a letter, stating:

(a) the minimum discharge rate of crude oil, products or ballast or the maximum loading rate;

(b) the maximum back pressure to be maintained at ship's manifold;

(c) amount of cargo requested for loading vessel.

AUTHORITY: Locamare Fiumicino, Viale Traiano 71, 00054 Fiumicino, Italy. *Tel:* (06) 6451911, 6451933. *Cables:* Locamare Fiumicino. *Contact:* Mario Macera, Il Comandante.

Operator: Fina Italiana S.p.A., Via Rossini 6, C.P. 10056, 20122 Milano, Italy. *Tel:* 7759. *Telex:* 311210 Fina I.

GAETA: 41.13 N. 13.35 E. (See Plan)

PORT LIMITS: Although not reported on nautical charts, port limits may be considered as the seaward boundaries of the compulsory pilotage area.

DOCUMENTS:

6 copies Crew List.
6 copies Passenger List.
6 copies Cargo Manifest.
3 copies Provisions Manifest (Stores List).
3 copies List of Crew Personal Effects.
2 copies Arrival Report (on form submitted by Agents).
2 copies Maritime Health Declaration.
Vaccination Certificates for sighting.
Ship's Certificates including Italian Authority dues.

PILOTAGE: Compulsory for entering Roads, docking and undocking. Seaward boundaries of compulsory pilotage area within 2 miles from Punta Stendardo, up to a line joining Punta Stendardo with Torre Scauri (line bearing about 65° from Punta Stendardo). Pilots meet vessel about 2 miles from Punta Stendardo and can be contacted by VHF (calling Channel 16, working Channel 12) 1 hour before vessel's arrival.

Advance notice to Pilots given by vessel's Agent.

ANCHORAGES: Safe anchorage can be found outside the compulsory pilotage area or, according to Pilot's instructions, inside above said area.

RESTRICTIONS: No restrictions outside the compulsory pilotage area. Inside above area vessels to keep clear from prohibited anchorage areas, sea berth facilities and mooring buoys, mooring buoys for military vessels, oil jetty facilities and mussel beds.

Also see "Berthing".

MAX. SIZE: Inside compulsory pilotage area, max. permissible length, breadth, draft, within values of 200,000 d.w.t. class VLCC.

Also see "Berthing".

HEALTH: Pratique automatic for vessels coming from ports in E.E.C. countries.

Otherwise Free Pratique granted by local Health Officer who boards ships on arrival together with Harbour Officers, between 0700 hrs. and sunset. In order to facilitate boarding by officers at anchorage or berths, it is requested that vessels have a convenient accommodation ladder/gangway ready.

RADIO: 72, 48 and 24 hours' definite notice to Agent through Roma Radio (IAR).

VHF: Port Authority, Pilots, Tugs, Oil Sea Berth, Oil Jetty and Agency Offices equipped with VHF; calling Channel 16.

TUGS: Tugs standing just inside Punta Stendardo, being called for service by the boarding Pilot. Ship's lines used.

Tug-boat assistance compulsory, for vessel over 1,600 g.r.t., for docking and undocking; stand-by tug compulsory, for vessel loading or discharging at oil jetty (but not at oil sea berth), from connection to disconnection of cargo hoses.

BERTHING: Oil sea berth for VLCCs discharging crude oil, oil jetty for tankers discharging/loading crude oil and oil products, dry cargo main quay "Caboto", dry cargo pier "Genepesca". Docking/undocking normally performed in daytime only with possible exceptions.

VLCC Sea Berth: Owned by Messrs. S.I.O.G. (Societa' Italiana Oleodotti Gaeta) for class VLCC 200,000 d.w.t. discharging crude oil. Restrictions for vessels within above d.w.t. class not yet officially issued. Max. values of d.w.t., length, draft of vessels already called:

– Max. d.w.t.: 260,000 (VLCC Athene)
– Max. length: 349 m. (VLCC Agip Lazio)
– Max. draft: 20.30 m. (VLCC Agip Lazio)

One or 2 extra tugs (in addition to the 3 existing in the port of Gaeta) may be needed for berthing larger size vessels at the sea berth, said extra tugs to come from Naples with adequate advance notice.

TERMINAL A.G.I.P.: Owned by A.G.I.P. (Deposito Costiero Di Gaeta) for tankers discharging/loading crude oil and oil products.

Restrictions:

Maximum permissible draft.......................................48 ft.
Maximum permissible distance between cargo manifolds and vessel's stern.......................................450 ft.
Maximum permissible height of above vessel's cargo manifold from sea level.......................................49 ft.

Tankers up to 60,000 d.w.t. normally berth and operate at A.G.I.P. Jetty; tankers over 60,000 d.w.t. and up to 90,000 d.w.t. may be berthed at Oil Jetty or at Sea Berth according A.G.I.P. advice; tankers over 90,000 d.w.t. will find berth at Sea Berth.

Terminal A.G.I.P. is a finger jetty with 3 berths: North Berth with restrictions as above; South Berth for vessels up to 39 ft. draft; stern berth for small coastwise vessels.

North and South Berths equipped with 4 articulated 8 in. steel pipe connections.

Dry Cargo Quay "Caboto": 106 m. long quay with max. official draft limitation of 20 ft.; vessels up to 130 m. length, drafts up to 20 ft. fwd and 22 ft. aft, are normally accommodated.

Dry Cargo Pier "Genepesca": 50 m. long pier with 1 berth each side for vessels up to 15 ft. draft.

New Dry Cargo Quay "Salvo D'Acquisto": Length 223 m., width 80.0 m., dredged depth 7.0 m.

Dry Cargo Handling: Cargo normally handled – general cargo, clay, kaolin, fertilisers, animal-feed, frozen commodities, clinker, cement, steel rounds, steel coils, aluminium ingots, etc.

CRANES: 4 mobile dock cranes available, each having max. lifting capacity 30 tons (normal working capacity 15 tons).

STEVEDORES: Compagnia Lavoratori Portuali 'G. Caboto'. Gangs ordered by Agents dealing with cargo.

MEDICAL: Physician, Dentist, Eye and other Specialists available. Hospital and Nursing Home in Formia (7 km. from Gaeta); new Gaeta Hospital operative. Inoculation service available. Vaccination Certificates issued. Extension of Derat Certificates granted.

TANKERS: See "Berthing".

BALLAST: At all berths only clean ballast can be pumped out. G.I.P. Oil Jetty equipped with system for discharging ballast ashore through 8 in. connections and a 1600 m. long 10 in. pipe-line at a rate of about 400 – 450 t.p.h.

FRESH WATER: Of excellent quality supplied to ships at all berths but not at sea berth. At sea berth or at road, fresh water can be supplied by tug-boat but expensive.

FUEL: Supplies of Bunker "C" and Gasoil can be arranged ex-installation at A.G.I.P. Oil Jetty; a minimum quantity of 200 tons is required for fuel and 100 tons for Gasoil. At dry cargo berths bunkers can only be arranged by road tanker. Bunkers not available for vessels accommodated at sea berth.

REPAIRS: Minor steel and machinery repairs currently performed by local machine shops; major repairs may be effected by personnel and equipment from Naples.

DRY DOCKS: 2 dry docks for vessels up to about 70 m. length.

SURVEYORS: Lloyd's, A.B.S. and other Classification Societies' Surveyors obtainable from Naples.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened wine/spirit bottle per man.

IDENTIFICATION CARDS: Shore passes issued by local police.

REPATRIATION: Facilities available for effecting crew changes and arranging repatriation.

AIRPORT: Nearest airports Naples (96 km.) and Rome (International airport 135 km.).
TIME: GMT plus 1 hour September to March; GMT plus 2 hours March to September.
POLICE/AMBULANCE/FIRE: Police station telephone numbers: 113 (emergency); 460031; 460474. Ambulances telephone numbers: 24361; 24461. Fire department telephone number: 460270; 460931.
TELEPHONES: Arrangements for placing telephone aboard vessels not available.
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office.
STORING: At dry cargo berths vessels may be stored by truck. At oil jetty or sea berth by motor launch or barge.
AUTHORITY: Capitaneria di Porto – Gaeta, Piazzale Cabato, 04024 – Gaeta. *Tel:* 460088. *Contact:* Ferdinando Landi, Port Commandant.

AGENT: Italnoli, Lungomare Caboto, Palazzo Albani 3, 04024 – Gaeta, Italy. Cable Address: "Italnoli – Gaeta". Telex: 68050 Italgaet. Tel. 460572, 460915. *After Hours:* 460087, 460859.

GELA: 37.04 N. 14.15 E.

DOCUMENTS:
For Maritime Authority:
Arrival Report.
Crew List.
Ship's Certificates, for sighting.
For Port Health:
Maritime Declaration of Health (1 copy).
Vaccination Certificates, for sighting.
For Customs:
List of supplies, deck and engine stores.
Cargo Manifest and Bills of Lading.
For Commissariat of Public Safety:
Passenger List (2 copies).
Crew List (1 copy).
Shore Passes for all Passengers and Crew.

PILOTAGE: Pilotage is compulsory for vessels of 500 g.r.t. and over. The Gela Pilots' Corporation, based at Ionio Street No. 2, Tel: 0933/917051, has VHF equipment (Channel 16 for calling-up; Channel 12 for working).

Requests for pilotage must be made two hours prior to ETA, and in office hours (0600 to 2000 hrs.).

The Corporation has 2 service vessels with a black hull and with the letter "P" painted in white on both sides. To call the Pilot, the signals laid down in the international signalling code must be employed.

The pilotage service is rendered up to 1 mile from the Port Island.

Vessels awaiting the Pilot must anchor 1 mile to the West of the breakwater on a bearing of 250° from the green light on the breakwater or 1 mile to the East of the same breakwater on a bearing of 160° from the red light on the breakwater.

Berthing may be effected daylight hours. Unberthing can be effected day and night.
ANCHORAGE: See "Pilotage".
RESTRICTIONS: See "Pilotage".
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique is not granted by radio but is given onboard after an accurate inspection.
RADIO: Roma Radio or Augusta Radio. Messages are forwarded quicker through Roma Radio. There is a coastal radio station at Gela.
VHF: The District Maritime Office listens on VHF Channel 16 during office hours (0800 to 2000 hrs.).
TUGS: Tug service is effected by 3 tugs stationed at the Port Island.

Use of tugs is compulsory for tankers and dry cargo vessels (dependent on g.r.t. and n.r.t.).
BERTHING: On the Port Island of Gela, the following berths are available:

6 berths on the breakwater suitable for taking tankers with a gross registered tonnage up to 30,000 tonnes and with a draft of 31 ft. 6 in. All berths are equipped to take bilge water and dirty ballast.

2 berths at the head of the pier suitable for taking vessels with dry cargo loading facilities and up to 18,000 g.r.t. with a draft of 31 ft. 6 in.

The Eastern berth is equipped with two platform trucks for handling bulk cargo, capacity 8 tons.

The Western berth does not have stationary quay equipment; mobile cranes can be made available for handling manufactured products, capacity 2.5 tons.

2 berths on the small head of the pier capable of taking tankers up to 3,000 g.r.t. with a draft of 20 ft.

1 sea berth in the buoyed area capable of taking tankers up to 80,000 g.r.t. with a draft of 42 ft.

Also see "Tankers".
TANKERS: Anic Sea Line Terminal: Situated about 1 mile off the breakwater, a crude oil discharge berth in depth of 42 ft. served by 34 in. sea-line terminating in two 12 in. flexible hoses. No slop discharge facilities. At the breakwater, Berth Nos. 1 to 6 for loading refined products and LPG can accommodate vessels up to 30,000 g.r.t. with max. draft 31 ft. 6 in. Berth Nos. 1 and 2 are used for crude oil and heavy products. Berth Nos. 3 and 4 are used for light products and gasoil. Berth Nos. 5 and 6 are used for LPG and petrochemical products.

Storage tanks situated up to about 15 m. above sea level.
STEVEDORES: Stevedoring carried out by local company. Labour must be ordered by Agent 3 – 12 hours in advance, depending on the shift requested.
MEDICAL: All assistance can be arranged by Agents. Hospital and private clinic available. Vaccinations and inoculations together with relative certificates can be carried out by the Office of Marine Health.
DENSITY: 1024.
FRESH WATER: Available at all berths against payment. Rate 10 t.p.h. Not available at Sea-Line Terminal.
FUEL: Available to vessels moored at the jetty head by means of road tanker, for small quantities only.
OPENING/CLOSING HATCHES: Optional to employ shore personnel.
CUSTOMS ALLOWANCES: As for other Italian Ports.
IDENTIFICATION CARDS: Required.
CONSULS: No local representation.
REPAIRS: Only minor repairs possible (Wood and metal work).
DRY DOCKS: None.
CLASSIFICATION SOCIETIES: None.
FIRE PRECAUTIONS: General standards of safety applicable to oil ports must be observed.
AIRPORT: No airport at Gela. Nearest airports at Catania and Palermo.
TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.
HOLIDAYS: 1st January, Easter, Lunedi dell' Angelo (Angel's Monday), April 25th, May 1st, August 15th, November 1st, December 8th, December 25th and 26th.
TELEPHONE NUMBERS: (Prefix 0933).

Maritime Authority	917755	Fire Brigade	911922
Customs	917716	Civil Hospital	930522
Maritime Health	930067	Pilots	917051
Finance Guard	930170	Tugs	911008
Public Safety Authority	930091	Boatmen	918009
Carabinieri	912868	Port Company	917775

SHORE LEAVE: Allowed.
TELEPHONES: It is not possible to have telephones placed onboard.
AUTHORITY: Capitaneria di Porto di Gela, Ufficia Circondariale Maritimo, Gela.

GENOA: 44.24 N. 08.54 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
3 Cargo Manifests.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

Tankers: All the ships whose building contract dates 1975 or whose building started after June, 1976, must have a certificate I.O.P.P. (International Oil Pollution Prevention). If not, sailing will not be granted.

All other ships built before must have onboard all anti-pollution equipment and must hold the I.O.P.P. Certificate as from October 2nd, 1984.

Also the ships whose country has not taken part in MARPOL will be inspected by Port Authorities and R.I.N.A. for obtaining sailing permit.
PILOTAGE: Pilots advised of vessel's arrival by port authority and the latter by vessel's Agent. Therefore accurate ETA recommended. Pilotage compulsory for vessels over 500 g.r.t. To contact Pilots and pilot boats, VHF Channel 12. Time of working 24 hours. Pilots board vessel at about 1 mile off port entrance.
ANCHORAGES: Anchorage beyond the meridian passing through the port light at the end of Duca di Galliera Pier is forbidden from 1st June to 15th September.
RESTRICTIONS: Tankers not usually berthed during night.

During discharging at SPM vessel should keep at all times at least 30% of her SDWT (cargo and/or ballast) on board and trim should not exceed 5 m.
MAX. SIZE: Tankers: Up to 46 ft. draft within port. No limit for tankers mooring at Single mooring platform outside the port. Other vessels: 31 ft. to 40 ft. draft. Also see "Tankers" and "Berthing".
HEALTH: Free Pratique may be requested by radio to "Sanimare, Genoa", between 12 to 6 hours before arrival, advising vessel's name, nationality, last port, number of passengers and crew and state of health on board. Pratique is automatic for vessels coming from all ports where there is no sanitary order.
RADIO: Genoa Radio, call sign ICB. Agent uses same station when cabling to vessels.
TUGS: Tugs join vessel at port entrance. Ship's line used. 42 tugs available, 600 h.p. – 6,000 h.p. Use of tugs optional except for vessels mooring to the platform or the buoy (oil discharge).
BERTHING: Pilot advises Master which side to berth. Shore fenders keep vessel off quay.
Molo Vecchio: 452 m. berthing length; 29–31 ft. permitted draft.
Silos Ponte Parodi: 200 m. berthing length; 36 ft. permitted draft.
Silos S. Limbania: 150 m. berthing length on both sides of the pier; permitted draft: 33 ft. East side, 36 ft. West side.
Ponte dei Mille: East side: 292 m. berthing length; 27–28 ft. permitted draft West side: 265 m. berthing length; 26–27 ft. permitted draft.
Ponte Andrea Doria: East side: 238 m. berthing length; 36 ft. permitted draft. West side: 233 m. berthing length; 36 ft. permitted draft.
Calata Oli Minerali: 474 m. berthing length (bow mooring); 24–36 ft. permitted draft.
Calata Stefano Canzio: 422 m. berthing length (bow mooring); 31–33 ft. permitted draft.
Calata Bettolo: 434 m. berthing length; 30 ft. permitted draft.
Ponte Rubattino: East side: 328 m. berthing length; 34 ft. 6 in. permitted draft. West side: 340 m. berthing length; 27–29 ft. permitted draft.

Ponte S. Giorgio: East side: 390 m. (will soon be in operation); 32 ft. permitted draft (will be 37 ft. 6 in.). West side: 264 m. berthing length; 30 ft. 6 in. permitted draft.
Ponte Ex Idroscalo: East side: 190 m. berthing length; 29 ft. permitted draft. Head: 190 m. berthing length; 35 ft. permitted draft. West side: 260 m. berthing length; 28–32 ft. permitted draft.
Ponte Ethiopia: East side: 255 m. berthing length; 32–33 ft. permitted draft. Head: 146 m. berthing length; 32 ft. permitted draft. West side: 399 m. berthing length; 29–31 ft. permitted draft.
Ponte Eritrea: East side: 388 m. berthing length; 29–31 ft. permitted draft. Head: 145 m. berthing length; 31 ft. permitted draft. West side: 398 m. berthing length; 29–31 ft. permitted draft.
Banchina Italsider: 500 m. berthing length; 40–44 ft. permitted draft.

Also see "Container Handling Facilities" and "Specialised Cargo Handling Facilities".

CRANES: Over 300 cranes and elevators with lifting capacities ranging from 1 to 45 tons. Over 80 self-propelling cranes with lifting capacities ranging from 10 to 45 tons. 9 floating cranes with lifting capacities of up to 210 tons.

CONTAINER HANDLING FACILITIES: Ponte N. Ronco/Ponte Canepa/Ponte Libia: The Container Terminal covers a total surface of about 250,000 sq.m., of which 230,000 sq.m. are uncovered areas for positioning containers and about 17,000 sq.m. consist of covered areas for deposit of packed goods coming from stripping and intended for stuffing of containers. Quays with a depth of 11 m. – 11.5 m. (36 ft. – 38 ft.) make it possible to berth 5 ships and modern lifting facilities enable to effect loading and unloading operations at a rate of 1 container every 3 minutes. About 5 km. of railway lines are at the disposal of the terminal for the containers marshalling.

The terminal has a stacking capacity of about 10,000 containers and handles 200,000 containers a year for 30 companies.

The Port of Genoa Authority (C.A.P.) runs the Container Terminal and sees to the integral management of the operations for unloading/loading containers.

The Port Authority renders all the services in connection with containers and cargo, and in particular:

Total planning of ship operations, included calculations of stability, draft, torsion, etc.

Checking of the conditions of containers on receiving and on delivering them, on stuffing and on stripping, and issuing of the relevant "interchanges".

Drawing up of damage reports.

Cleaning and disinfestation (when necessary) of containers.

Assistance on stowing, unstowing and on lashing, unlashing cargo inside containers.

Assistance in repairing packing.

Container sealing, labelling and weighing.

Assistance to reefer containers (plugging and unplugging to electric outlets, checking of temperatures, drawing up of "pre trip inspection certificates").

Terminal Equipment:

4 "Paceco" portainers with spreaders for 20 ft./40 ft. containers and lifting capacity of 40/50 tons.

2 gantry cranes for 20 ft./40 ft. containers with lifting capacity of 45 tons.

1 "Gottwald" mobile crane for 20 ft./40 ft. containers with lifting capacity of 36/40 tons.

11 straddle-carriers for 20 ft. containers.

13 straddle-carriers for 20 ft./40 ft. containers.

2 "Delmach" lift-trucks with spreaders for full 20 ft./40 ft. containers, lifting capacity 30 tons (plus 3 more in the near future).

11 lift-trucks (of which 2 with spreader) for empty 20 ft./40 ft. containers (plus 4 more in the near future).

32 fifth wheel tractors (plus 13 more in the near future).

33 trailers for 20 ft./40 ft. containers of which 8 tipping trailers (plus 15 more in the near future).

238 electric outlets for supplying power to reefer containers.

A 6 VHF frequencies radio system.

A large park of vehicles consisting of tractors, flatcars, fork trucks, self propelling trucks for stuffing and stripping containers.

Calata Sanita Container Terminal:

Length of Quay	525 m.
Available Operating Length	440 m.
Depth	14.5 m. (46 ft.)
Total Area	165,000 sq. m.
Stacking Capacity	4,000 TEU.
Annual Handling Capacity	200,000 TEU.
Portainer Cranes	3×45 ton Lifting Capacity
Transtainers	7×40 ton Lifting Capacity

Completion expected January 1988.

SPECIALISED CARGO HANDLING FACILITIES: See "Berthing" for max. draft.
Ro/Ro Terminals: 25 special berths at Ponte Spinola, Ponte Calvi, Ponte dei Mille, Ponte A. Doria, Calata S. Lazzarino, Ponte Colombo, Ponte Assereto, Calata San Benigno, Calata Bettolo, Calata Bengasi, Calata Tripoli and Calata Derna, 45,000 sq.m. parking areas.
Cotton: 2 warehouses at Molo Vecchio, totalling 42,000 sq.m. in area and a 85,000 bale capacity.
Grain Silos: One at Santa Limbania (65,000 ton storage capacity – 600 t.p.h. unloading capacity). One at Ponte Parodi (45,000 ton storage capacity – 450 t.p.h. unloading capacity).
Maritime Passenger Stations: One at Ponte dei Mille and another one at Ponte Andrea Doria, capable of dealing with 5,000 passengers a day.

Three stations for Ro/Ro passengers at Ponte Calvi, Ponte Colombo and Calata Chiappella.

Animal Fats and Oils Depots: Plants at Ponte Assereto, Calata Sanita and Ponte Etiopia.

144 tanks having a total capacity of up to 53,000 tons.

14 barges with a total capacity of up to 12,000 tons.

Timber Terminal: 2 berths at Ponte ex Idroscalo, 50,000 sq.m. area yard.
Coffee: A special warehouse is available at Ponte Etiopia, covering 8,800 sq.m. 50,000 sacks can be stored there.
Cellulose Terminals: 2 special berths at Ponte Eritrea and Ponte Somalia. 12,000 sq.m. of covered area.
Export-cargo Clearing Centre: Warehouse of 15,000 sq.m. equipped for the handling of 1,000 tons a day of parcels.
Wool: A special warehouse at Ponte Libia covering a 17,000 sq.m. area. 40,000 bale capacity.
Other Special Plants: Warehouses, depots, and special facilities for wine, salt, skins, bananas, coal.

TANKERS: Berths in Genoa Harbour suitable for tankers up to 750 ft. length, 34 ft. draft. Tankers discharging at Calata Sanita and Calata Olii Minerali are berthed stern to quay.

Multedo Harbour situated West of main harbour has the following jetties:

Multedo Pier – for vessels up to 588 ft. length, 31 ft. draft.
Pier "A" – for vessels up to 580 ft. length, 36 ft. draft.
Pier "B" – for vessels up to 850 ft. length, 43 ft. draft.
Pier "C" – for vessels up to 850 ft. length, 46 ft. draft.
Pier "D" – Presently accommodating tankers up to 46 ft. draft.

Discharge Rate: Maximum discharge rate for crude products:

Pier "A"	2,500/3,500 t.p.h.
Pier "B"	3,500/6,000 t.p.h.
Pier "C"	6,000/10,000 t.p.h.
Pier "D"	6,000/10,000 t.p.h.

Masters may speak direct to Pilots or Harbour Masters at Multedo Oil Berth in order to obtain latest information about berthing, etc., by calling on VHF Channel 6.

All tankers over 40,000 d.w.t. must have inert gas system fitted and working.
Multedo Inner Harbour: Cautionary Advice: The twisted course of the buoyed channel and its limited width decreasing from 700 ft. at the entrance down to 490 ft. abeam the head of Molo Multedo represent a high risk factor. Therefore a good helmsman should steer the ship and prompt engine response is required. In approaching the entrance channel do not attempt to pass between the SPM and the breakwater.

Berthing Procedure: From the pilot station, vessels approach the buoyed channel heading 036°(T) in order to pass 800 m. abeam the tower and 200 m. abeam of the new Voltri Breakwater head. Tugs are made fast at the entrance of the buoyed channel. Vessels are swung in the dredged turning area off the pier heads and backed down to the berths. The mooring operation is controlled from the pier by a Marine Terminal Supervisor (Docking Master) who communicates with the Pilot by walkie-talkie.
Calata Canzio: Cautionary Advice: The direction of approach across the West-going current, the limited width and the considerable traffic of vessels demand great caution when entering or leaving the East Entrance.

Single Buoy Mooring: The new mooring facility is located at 1,740 m. from the airport breakwater in a water depth of about 65 m., at distance of 2,250 m. from the platform and just in front of Italsider steel factory; it is linked with shore plants by a submarine pipe-line.

The new buoy can accommodate tankers up to 270,000 d.w.t., 350 m. length, 53 m. beam, 20 m. draft. This size was chosen on account of the fact that 80% of vessels coming up to the platform are under 270,000 d.w.t., whereas it can accommodate vessels up to 500,000 d.w.t.

The terminal operations are expected to take the following time:

Mooring: (from tanker arrival to pump beginning) 2 – 3 hours.

Discharge: (tankers up to 270,000 d.w.t. and discharge rate 9,000 cu.m./p.h.) 20 hours.

Unmooring: 30 minutes.

Single Mooring Platform: A steel tower, set up about 2,800 m. off the Genoa Multedo Oil Dock in water 50 m. in depth is provided for the discharge of crude oil from supertankers up to 500,000 d.w.t. Unloading capacity 14,000 cu.m./h.

A 48 in. (120 cm.) submarine pipe-line connects the tower with the terminals of all the oil companies operating at the Multedo Oil Dock.
Technical Characteristics: The tower consists of a steel structure having the form of a truncated pyramid set into the sea-bed at a depth of 50 m. and supporting the following parts above the level of the sea:

A lower platform having quarters for the accommodation of personnel or the housing of the various services, the deck being at a height of 6.335 m. a.s.l. This platform is protected by a steel structure mounted on elastic supports, with wooden fenders topped with rubber buffers. The toroidal structure, externally to the rubber buffers, is 34.20 m. in diameter. Under the impact of a vessel, the ring will shift axially for a distance of 2 m. as a result of the system of shock absorbers which support the lower platform.

An upper platform 10.335 m. a.s.l. which carries the rotating arm for berthing tankers and the connection of the floating discharge hoses. The rotating arm reaches a height of 13.882 m. a.s.l. and is fitted with:

(a) a bollard capable of withstanding a horizontal pull of 360 tons;
(b) 2 pipes 24 in. in diameter running to a double universal joint at sea level for connecting the riser of the submarine line to the floating hoses linking tower and tanker; on the rotating part of the tower, the two 24 in. pipes are fitted with cut-off valves and may be connected one to the other by means of a by-pass with a gate valve;
(c) a 5-ton service crane;
(d) a lighted beacon and radar reflector at a height of 23 m.

Floating Hoses for Crude Oil Discharge: The 2× 24 in. pipes with which the riser connects on the tower are coupled by universal joints to 2 floating hoses of 24 in. diameter, with 16 in. terminals, each hose being about 310 m. in length and consisting of 29 sections of 10.67 m., of which the last 3 are of 16 in. diameter for connecting to the ship's manifold. They are fitted with a blank flange, a Camlock rapid-closing joint and a Keystone rapid cut-off valve that will ensure perfect tightness and rapid disconnection in an emergency.

The hose connections are exactly 90° left of the bollard with respect to the mooring vessel.

Signal Lights and Fog Horn: The tower is equipped with a regulation flashing white light 23 m. a.s.l. and a fog horn.

The 2 floating hoses are marked at night by 5 red lights visible at a distance of 2 miles.

Request for Berth: Mooring at the tower is generally reserved for tankers which, owing to their size and draft, are unable to use the Multedo Oil Dock and have applied for permission to the Port of Genoa Authority Oil Dock Management.

Order of Berthing: Arriving tankers that are to work cargo at the tower and are awaiting authorisation to berth thereat must anchor in the roads.

The order of berthing is that of anchorage in the roads and, for vessels authorised to berth, according to the moment when arrival in the roads is signalled to the Port Authority's lookout station at the foot of the main lighthouse in Genoa Harbour.

Should it be impossible to communicate with the lookout station, the time when communication is established with the Genoa-Multedo Oil Dock Operations Office over VHF radio, on the frequency that will be notified as soon as possible (normally Channel 6 – 156.3 MHz), indicating the point of anchorage or the ship's position, will serve for establishing the order of berthing.

Berthing at the tower will be authorised by the Oil Dock Management upon receipt of the Master's written or radioed assurance that the ship is fully efficient and ready to proceed to berth and commence discharge. The Oil Companies that are receivers of cargoes or in anyway interested as users of the Oil Dock should begin discharge within 4 hours of completion of mooring and continue without interruption, day and night.

Saving cases of proven *force majeure,* vessels moored at the tower must restrict berth occupancy to the time strictly needed for discharge operations and for ballasting.

Berthing at Tower: Berthing at the tower will be authorised only weather permitting and must be carried out with the assistance of a Pilot. The Master may ask for the help of tugs, in the number needed to ensure the manoeuvre being executed safely.

Ships should moor using two 15 in. nylon hawsers 65 m. in length, supplied by the tower, each able to withstand a 300 ton pull. The end of each hawser is fitted with a 4.5 m. length of chain of which the last link, devoid of stud, will be made fast to the ship's bow structures for securing mooring ropes.

The section of chain outside the fairleads contains a safety element calculated for a breaking load of 200 tons.

The vessel's mooring structures: anchor plates with aperture for pin, quick release hooks, bollards, steel ropes, warping winches, etc., must be in fully efficient condition and able to withstand the stresses to which they will be subject once the mooring ropes have been made fast to them; they must furthermore allow for the ship being unmoored at any moment by the crew.

As the mooring hawsers can break for accidental or other unpredictable causes before the limit of 200 tons is reached, despite the inspection normally made before the arrival of each ship, all tankers moored at the tower must at all times have their engines ready to move at full speed.

Safety Distance Around Tower and Pipe-line: No ship or other craft may station itself, anchor, fish, or carry out underwater or other activities in the area around the tower and pipe-line, boundaries of which are:

South: parallel 44° 23′ 30″ N.
North: the coast.
West: meridian 8° 49′ 40″ E.
East: meridian 8° 49′ 20″ E.

Excepting for tankers proceeding to the tower and the craft providing harbour services and assistance, or other craft which have been duly authorised, no vessel or whatsoever craft may sail within a radius of 800 m. of the tower.

Mooring and Warping Ropes: The 2 mooring hawsers will be secured to a bollard which is part of the rotating structure of the tower and about 14 m. a.s.l. When no vessel is at berth, the 2 hawsers float on the surface, supported by red and yellow luminescent sleeves.

The ends of the hawsers are secured to 2 luminescent red buoys which support the lengths of chain that are to be made fast aboard.

Before a tanker arrives, the Port Authority's personnel will make the ends of the chain of each mooring line fast to a big, floating polypropylene rope about 80 m. in length which the vessel must pick up so that she may be slowly warped in to the tower.

Vessel will be moored with the aid of a craft suitable for operations in the open sea.

Watches, Emergency services and Master's Contacts with Personnel Engaged in Discharge: As though at anchor in the roads, vessels moored at the tower must continue to keep sea watches and retain on board the crew required to cope with any emergency manoeuvre, either for vacating the berth or to meet any other serious event involving the safety of the ship, persons and cargo.

Before commencing discharge, Masters should take steps to see that liaison ensuring rapid and reliable communication between the Oil Dock Management's representatives aboard, the Company interested with the discharge and the Master has been arranged.

Safety Measures to keep Vessel Clear of Tower: Vessels at berth must keep sufficiently clear of the outer ring of the tower to ensure that the bow bulb will not collide with the tower structures.

To this end, the Master must adopt all necessary measures and precautions and take such other steps as may be ordered by the Port Authority, including the use of a tug in order to keep the vessel at a safe distance from the tower.

Vessels needing to activate propellers in order to heat turbines must keep revolution to the minimum and run engines astern.

Hose Handling: While vessels are approaching and mooring at the tower, one of the craft will take the floating hoses in tow, arranging and keeping them in a position where they will not hinder manoeuvring.

On completion of mooring, the hoses will be brought alongside the vessel on the port side, so that the ends are level with the ship's manifold, and will be secured to the tackle of the cargo derrick in such a manner that the cargo receivers' personnel and the ship's crew may jointly hoist, connect and get the hoses ready and then begin discharge. Hoses must not be subjected to a pressure of more than 14 kg./sq. cm.

The ship's derrick should be able to lift at least 10 tons.

Stand-By Tenders During Discharge: During mooring and discharge and until sailing, the Port Authority will keep alongside or in proximity to the tower a stand-by tender of suitable size and power provided with the personnel, material and equipment that will ensure the proper functioning of the tower's facilities and provide any assistance that may be needed in the event of a spillage or other emergency.

Another smaller craft, duly equipped for the purpose, will be provided by the Port Authority for liaison between the Oil Dock, tower, tanker and tender and for transporting personnel or light materials.

The 2 craft will be equipped with continuous listening VHF radio and with anti-pollution and fire-fighting equipment.

Platform Services: The services relating to the operation of the tower's fixed and mobile facilities are under the control of the Genoa-Multedo Oil Dock Management, which exercises them through its personnel on the spot.

The employee in charge of services on the tower will be in touch, by VHF radio, with the Oil Dock Management, informing the latter how discharge is proceeding and of any abnormality and receiving from the latter such instructions as may be necessary. Locally, he will keep in touch with the ship's Master and the representative of the Company interested with the discharge in order to facilitate operations in so far as he is responsible and comply with all requests that may result in advantages and in improving safety in general.

Personnel Attending to Ship's Discharge: The Oil Company who is cargo receiver or anyway interested with the discharge and the Master, each within his own field of competence, will jointly supervise and be responsible for discharge and for connecting and disconnecting hoses.

A representative of the cargo receivers appointed for the purpose, will keep in constant touch with the company's booster station and the Oil Dock by means of VHF radio. He will act also in collaboration with the Master and the Port Authority's representative. For connecting and disconnecting hoses, the latter will make available the material and equipment provided on the tender.

Filling of Hoses With Water When Not In Use: For reasons of safety and to prevent pollution, the floating hoses must be kept full of water when not in use.

To this end, the 2 hoses are connected in the tower by means of the by-pass before the gate and non-return valves.

In agreement with the Master, the cargo receivers must drain the hoses of water before commencing discharge.

On completion of discharge, the cargo receivers must likewise flush out the hoses to remove all traces of oil, fill then with water, disconnect them, apply the blank flanges, close the Keystone cut-off valves and lower the hoses into the sea.

It is strictly forbidden:

(a) to introduce compressed air or any kind of gas into the hoses or the submarine pipe-line;

(b) to discharge the water from the hoses into the sea at the beginning of operations or that used for flushing the hoses on completion of operations.

During flushing, the cargo receivers must take all precautions against leakage or spillage of the water employed for the purpose.

Interruption of Discharge Operations for Safety Reasons: In the event of a deterioration of sea conditions, violent thunderstorms, trouble with the facilities that jeopardises safety, large scale pollution or other dangerous circumstances, the Management of the Oil Dock may, at its own unchallengeable discretion, order:

– immediate interruption of discharge;
– that the hoses be got ready for lowering into the sea;
– the adoption of all such measures as will enable the vessel rapidly to vacate the berth.

In agreement with the cargo receivers, vessels must therefore maintain a trim during discharge that will enable them to take to sea safely at any moment.

Prohibition to Pollute. Cleaning Up: Ships moored at the tower must not pollute the water with hydrocarbons, solid residues, or oil mixtures of any kind, nor effect gas-freeing or tank cleaning or transfer oil from one tank to another by means of temporary hoses or pipes slung over manholes or other tank apertures.

In the event of oil spills, the Oil Dock Management, without prejudice to the application of the penalties provided by law, will order the anti-pollution equipment of the craft standing by to come into operation at once, at the expense of whomsoever may be concerned, and the despatch of other equipment for cleaning up should it deem this necessary.

Bunkering and Victualling: Bunkers, victuals, drinking water and stores must in general be taken aboard while awaiting berth in the roads. Such operations may also be effected with the vessel moored at the tower before or during discharge (but not during ballasting) according to the procedure prescribed by the Oil Dock Management and with observance of the precautions that are ordered.

Ships and any other craft coming alongside tankers must be provided with a sufficient number of strong fenders to prevent hull to hull contact and be fitted with spark arresters on all main and auxiliary engine exhausts.

Authorisation to go Aboard: Persons needing to go aboard to do work or for other justified reasons must be provided with an authorisation issued by the Oil Dock Management.

Work on Engines: It is forbidden to vessels moored at the tower to carry out works which put the engines out of action or reduce its efficiency.

Other work which cannot be delayed may be authorised exceptionally by the Oil Dock Management at its own discretion provided certain instructions and safety measures are observed.

Transhipments: Vessels moored at the tower may carry out transhipment of their cargoes only to vessels moored in the Oil Dock, for such purposes making use of the pipe-line.

Other Regulations: Without prejudice to the regulations currently in force in the waters of the Maritime Department of Genoa, for all such matters as are not expressly provided for in the present regulations there shall be applied, to the extent to which they are applicable, the provisions of the Harbour Police and Safety Regulations for the Genoa-Multedo Oil dock, approved by order No. 10 of the President of the Port of Genoa Authority on the 30th September, 1968, the regulations for bunkering tankers in the Genoa-Multedo Oil dock, approved by decree No. 1384 of the President of the Port of Genoa Authority on the 1st September, 1966, of the Marine Services and Harbour Police Regulations approved by order No. 2 of the President of the Port of Genoa Authority on the 1st March, 1972, and the other laws and regulations in force in the Port of Genoa.

Penalties: Infringements of these regulations will be punished by application of the penalties provided in the Code of Navigation.

Safety Rules to Complied with During Stay of Tankers at Sea Terminal of Genoa-Multedo: The following are the principal safety rules that the Master is bound to strictly comply with and enforce during the stay of the ship under his command of Genoa-Multedo.

1. The main propelling machinery must be kept ready to move (standby) and there must always be available on board a sufficient number of crewmen to enable the ship to leave the berth immediately whenever ordered to by the Port of Genoa Authority (Consorzio Autonomo del Porto);
2. Vessel must have ready the accommodation ladder on starboard side and – on port side – the pilot ladder rigged forward of the poophouse;
3. Decks and surrounding waters must be properly lighted;
4. When mooring to platform anchors must never be dropped;
5. Vessel's firefighting equipment and the men in charge of its operation must always be ready for immediate action (in case of emergency). Men in drunken state must be watched and kept under supervision;
6. The ends provided with eyes of 2 strong 3.5 in./4 in. wire cables, length of which must be of 80 m./100 m. (260 ft./330 ft.) at least, must be placed hanging one fore and one aft to enable the ship to be towed out (to sea) in case of fire.
7. Unless authorised to the contrary and which will only be allowed in exceptional cases by the Oil Harbour Master, it is forbidden:
   (a) to carry out repair works, cleaning or gasfreeing of tanks or bunkers, etc.;
   (b) to carry out loading of cargo, water or other liquid products using hoses introduced through the cargo tanks lids.
8. It is strictly prohibited:
   (a) to keep fires of any kind on board, with the only exception of those for the service of ship's boilers and galleys if located in special rooms thoroughly protected against gas exhalations and far from the cargo lines;
   (b) to throw or pump overboard water ballast, bilge-water or water from any other source, that might pollute the port waters;
   (c) to cause escape of oil from the sea valves due to delay in starting the ballast pumps or any other reasons; to cause escape of oil due to leakage of pipes or valves on board; to provoke overflow of oil from cargo tanks. Accidental leakages on deck on deck must be collected into suitable receptacles and – with all precautions – poured again into the cargo tanks or carried ashore; all scuppers on the main deck and particularly those near the cargo manifolds must be plugged during the loading/unloading and ballasting operations;
   (d) the use of devices, tools and wrenches not made of non-sparking material, to connect or disconnect hoses, pipes or pipe fittings and to carry out work to any ship's equipment placed on deck or inside those spaces where the generation and/or presence of gas is possible;
   (e) to smoke on board except in those rooms approved by the Master and to throw overboard lighted matches or cigarettes;
   (f) the use of rocket signals, flares, etc.;
   (g) the use of electric hot plates, fans and other equipment which might produce sparks on deck or into those rooms having openings towards the cargo tanks;
   (h) the use of electric portable lamps and cables and of telephones not being explosion proof;
   (i) to keep open skylights, doors and hatches of spaces located in way of or near the cargo tanks;
   (l) to keep open the cargo tanks lids; to keep open Butterworth openings.

   The ship's personnel should take care that all ullage openings and gas vents are provided with spark arresters and that the latter are sound. They also should take care that the spark arresters placed on the funnels and combustion gases exhausts are sound;

   (m) shifting of steel tools, winch manoeuvring, loading and unloading of materials, connecting and disconnecting of cargo hoses during the whole period in which sampling and gauging of cargo tanks is carried out;
   (n) to carry out loading and unloading operations during storms with lightning;
   (o) the idling of pumps. Ship's personnel should immediately stop pumps that – for any reason – should idle;
   (p) the blowing of boiler's tubes;
   (q) the coming onboard of unauthorised people.
9. All engine propelled boats approaching the vessel must be provided with spark arresters on the combustion gas exhausts.
10. During shifting operations into tanks:
    (a) radio apparatus must be switched off and all aerials set to ground;
    (b) cargo lines not in use must have all valves closed and manifolds are to be blank flanged.
11. Loading of ship's stores and equipment should be carried out from the extreme poop. In case the aforesaid operations have to be carried out on deck, near the cargo tanks and should it involve the handling of heavy or metallic materials anyway, all precautions relating to the case or those each time specified by the Oil Harbour Master, should be taken.

    As a general rule the above mentioned operations are not allowed during the loading or ballasting of the ship. The crafts used for the transportation of the materials must approach the ship, stay alongside and move out without making use of the engine.
12. Tankers having on board inflammable or dangerous products, or – being empty or in ballast – having their tanks not certified gasfree, must hoist steadily and well in view, a red flag (letter "B" of the international code of signals) and by night a red light, which can be sighted from round the horizon.

Products/Chemicals:

Pier Alfa: Diameter of the connecting flange 10 in. ASA 150 with vertical face, the radius of 750 mm. from the axis of the connecting pipe at manifold is to be free from any hindrance. The distance between two centres of the 2 neighbouring pipes to manifold must be minimum 1,250 mm. A space of 1,200 mm. from the flange towards ship's rail horizontal axis is to be free of any hindrance.

West Pier: Diameter of the connecting flange 6 in. ASA 150 with vertical face. Radius from axis at least 500 mm. free from any hindrance. Minimum distance between 2 neighbouring centres at manifold 1,000 mm. Free space from flange towards ship's rail along horizontal axis at least 1,200 mm. It is understood that ships not equipped for above discharge will not be allowed to operate.

BALLAST: Facilities exist for the collection and clearance of slops by means of special barges.

STEVEDORES: *Working Hours:* General cargo: 3 shifts from Monday to Saturday: 0630 – 1300 hrs., 1300 – 1930 hrs., 1930 – 0100 hrs.

A fourth working shift is available from Monday to Friday in the period 15th March/15th November.

Coal, ore, grain: only the first 2 shifts. Italsider Pier: 24 hours' daily in 3 shifts.

MEDICAL: All medical assistance available. Advance notice required for urgent cases only.

DENSITY: Varying from 1025 to 1026.

FRESH WATER: Available direct from quay at almost all berths. Supply by lighter, minimum 20 cu.m.

FUEL: All grades available. Delivered by barge. 48 hours' notice desirable.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: First opening and last closing normally carried out by crew.

CUSTOMS ALLOWANCES: Tobacco. Customs allow a maximum of 50 cigarettes or 10 cigars, or 50 grams tobacco per person, as long as vessel stays in port. All cigarettes, cigars, etc. must be ready on arrival in a locker in order to be checked and sealed by Customs guards. Wine and/or spirits. Wine allowed any reasonable amounts. Spirits allowed 1 bottle for every 2 Crew members.

Report: May 1983: Customs Regulations – Supply of Cigarettes and Tobacco: "Please inform members of a new rule at Genoa concerning forwarding of cigarettes, which provides that they may only be sent from the Port of Registry with invoices visaed by the Italian Consul there.

At Genoa, the Master must declare cigarettes and tobacco on board, number of crew and duration of next employment, thereafter the Customs will allow 40 cigarettes each day to each crew member for the duration of the voyage.

In case there is sufficient stock on board, the Customs will not allow supply, which might cause other troubles as well, due to the fact that the truck normally carrying other provisions and stores will remain stopped at Customs until the situation with cigarettes is clear".

CARGO GEAR: Certificates must be in order, otherwise authorities may prevent vessel performing commercial operations, especially if using derricks.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

REPAIRS: All types of repairs available. Preferable have advance notice of requirements.

DRY DOCKS: 1 floating dry dock, lifting capacity up to 15,000 tons; 7 dry docks (largest dimensions 280 m. × 40 m. × 12.50 m.). Max. size 100,000 d.w.t.

REPATRIATION: All facilities available.

AIRPORT: Located at about 5 km. from town. Served by regular lines, international services.

Alitalia to Rome, Bari, Parigi, Naples; British Caledonian to London; Alisarda to Olbia; A.T.I. to Rome, Turin, Palermo, Alghero, Cagliara; Swissair to Zurich; Lufthansa to Frankfurt; Golden West Airlines to Turin, Venice and Trieste.

TIME: Local time in relation to GMT 1 hour ahead. Summer time further 1 hour ahead from March to September.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter and day after Easter; Patron Saint's Day (24th June); Assumption B.V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Holiday (26th December).

Holiday work is available at overtime rates. Generally workers not available on 1st January, 1st May and 25th December. Saturday: Work performed after 1200 hrs. is at overtime rates.

POLICE/AMBULANCE/FIRE: Police: tel. 113; 25.69.75; 26.13.95; Ambulance: tel. 59.59.51; Fire: tel. 25.25.25 – 25.80.21.

TELEPHONES: Telephones can be placed on board at cost fixed by Italian State Telephone System.

DEVELOPMENTS:

Genoa Port Docks:

Works in Progress:

Within the port of Genoa area, the more outstanding works are:

New industrial zone including the construction of a giant floating-dock in pre-stressed-reinforced concrete for vessels of up to 350,000 d.w.t. A deep water (−22 m.) 350 m. long, service pier will also be built, together with 400 m. of new quays with 11–20 m. depth alongside and 80,000 sq.m. of connected areas (completion late 1984);

Besides the above listed works, there are others worthy of mention as follows:

Medium term works:

Rectification of the Calata Gadda and Calata Boccardo quays thus allowing a more efficient use for ship repair purposes;

Long term works:

Completion of the San Benigno area arrangement works.

Voltri Dock:

Works in progress:

Seaward filling in works will be continued;

The protection breakwater will be extended 500 m. Eastward;

End-stretch of the seaward road connecting the material excavation area with the sea zone to be filled in.

Medium term works:

Voltri will consist of quays 1,400 m. long in the first stage, and 2,050 m. on completion.

5 container berths 300 m. long, 15 m. draft are planned, each terminal composed of 135,000 sq.m. of yards. They will be of the closed type – which means no outside vehicles allowed to circulate within the terminal – and will be capable of handling 100,000 TEU per year, that is 500,000 TEU total capacity per year.

The yard will be divided in zones as follows:

Operative zone, for container unloading/loading operations, adjacent to the quay;

Areas for container handling and marshalling;

Areas for reefer containers;

Parking areas for service vehicles.

The Ro/Ro terminal is planned to be 500 m. long, with adjacent yards 250,000 sq.m. in area, which will allow the parking of 2,000 trucks at the same time.

The 8 berths above mentioned will absorb 3,000,000 tons traffic of general cargo per year.

Two check-points for Customs controls are provided, each having a 60,000 sq.m. surface. One will be sited at the Eastern way out and the other at the Western way, thus allowing the service of containers and Ro/Ro traffic at minimum distance and maximum efficiency. The check-point will have space enough to park 300 trucks and straight connections with the City and National roads.

An area of 50,000 sq.m. is already used for stacking empty containers and storing trucks and trailers.

The first section, 2 container berths and 8 Ro/Ro berths will be operational in 1989.

AUTHORITY: Consorzio Autonomo del Porto di Genova, Palazzo San Giorgio, Via Della Mercanzia 2, 16123 Genova, GE, Italy.

LA SPEZIA: 44.01 N. 09.51 E. (See Plan)

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Provisions List.
1 List of Parcels.
1 Cargo Manifest.
1 Bill of Lading.
All Ship's Certificates including Italian Anchorage Dues.

PILOTAGE: Compulsory for vessels over 500 g.r.t. Pilot station situated on breakwater at entrance to Gulf. 1 hour's notice to Pilots required for shifting, sailing vessel, Pilot boards incoming vessels at Torre Scuola.

Pilot on VHF Channel 14 from 2000 hrs. – 0600 hrs. Listens 1 hour before vessel expected.

ANCHORAGE: Safe areas available in depths 25 ft. to 34 ft. Mud bottom, no tide. Tankers: If waiting berth required to anchor in Safety Zone immediately behind the breakwater. If this anchorage is occupied by 2 vessels later arrivals must anchor outside the Gulf.

RESTRICTIONS: Western entrance to Gulf is 400 m. wide with depth of 42 ft. 6 in. The dredged channel to the port is 42 ft. deep. Eastern entrance is 200 m. wide used by smaller vessels only.

MAX. SIZE: Limited only by draft; 33 ft. for the Mercantile Port and grain silos. For vessels proceeding to coal berth max. draft 30 ft. 4 in. For vessels proceeding to Enel Pier max. draft 35 ft.

Tankers up to 40 ft. draft accommodated.

HEALTH: Radio Pratique may be requested to Sanimare-Laspezia before arrival. Pratique is automatic for vessels from Ports in E.E.C. countries.

RADIO: Genoa Radio – ICB or Marina Militare ICS. Radio telephone station at Leghorn, transmitting 2591 kHz, receiving 2182 kHz.

VHF: Pilot Service Channel 14, Port Control Channel 9, Harbour Master Channel 16 (0800 – 2000 hrs.), and boat service Channel 12.

TUGS: 19 tugs available up to 1,359 h.p. For large tankers, 4 tugs usually used.

BERTHING: Primo Bacino:

Garibaldi Mole: The port basin is limited to the East by Garibaldi mole, running North – South, to the coast and for a length of 509 m. It has depths of 8 m. – 10 m. and is used for discharging cereals, paper, containers, metal products. It has open storage areas and warehouses, together with a pipe-line connecting the Industria Italiana Petroli Refinery with the oil terminal located at the head of the mole itself. The mole is used on both sides, which are equipped with fenders.

Malaspina Wharf: 200 m. long and 106 m. wide, with depth of water of 6.5 m. – 7 m. It has fenders.

Paita Wharf: 535 m. long. On its Eastern extension is a moden coal silo. On the shoulders of the wharf are areas for open storage of goods, and in the West Area there is the Ferruzzi cereals warehouse and the Carapelli edible oil store. The wharf has fenders, and on its Western extremity has an 80 m. section suitable for discharge using ship's gear. A 155 m. wharf is used for the offices of Customs and the Port Captaincy.

Italia Mole: 368 m. long, 10 m. wide, depth of water 5.5 m. – 7 m. Constructed to protect the port basin, and therefore not equipped with port equipment, it is used for berthing tugs and at its end also for commercial operations.

Currently, it is to be used for berthing the passenger ferries between La Spezia and Bastia (Corsica).

IIP Landing Stage: 200 m. long, with 13 m. depth of water. It is equipped with bollards, fire-fighting equipment and hydrants. It allows berthing, loading and discharge of 2 tankers simultaneously, having equipment operating with a suction-depression system.

Minor Berths: These are constituted by 2 small piers where medium sized tankers can moor bow-on.

Secondo Bacino:

In 1980, the Artom Wharf came into operation, being 300 m. long, with depths of water 11 m. – 13 m., used for berthing ferry boats. Furthermore, in a state of advanced construction is the Fornelli Mole, West side, (520 m. long) which will be used for container discharge. On the mole head will be constructed a specialised Ro/Ro berth (see "Developments").

Also, halfway along the Fornelli Mole it is planned to construct a general warehouse, to be operated by the Azienda Mezzi Meccanci (Mechanical Handling Enterprise) with a covered area of 5,000 sq.m.

Outer Terminals:

The port of La Spezia incorporates the terminals of four companies involved in maritime traffic. Apart from Contship, whose installation is on the Garibaldi Mole, there are, to the East of the port, the Messina, Tarros and Merzario Terminals, all with their own berths and private operational land areas.

ENEL Landing Stage: 225 m. long, it is used for berthing vessels carrying fuel for the electricity power station.

SNAM Terminal: 480 m. long, situated in the bay of Panigaglia, it is employed in the discharge of methane carriers.

SPI Terminal: This is a terminal situated in the Eastern Area of the Gulf, provided with 5 buoys, permitting the discharge of tankers. The discharged products are shipped by underwater pipe-line to the coastal storage installation and from there to the Arcola refinery.

TANKERS: Shell Pier, length 177 m., with 4 berths up to 39 ft. 6 in. depth.

SPI Buoy Terminal, situated 650 m. from San Bartolomeo shore. Vessels moor stern towards the shore. A crude oil discharge berth in depth of 11.50 m., suitable for tankers up to 30,000 d.w.t. Other oil berths at ENEL Quay, depth 35 ft. SNAM Terminal for loading situated in Panigaglia Bay. Length 498 m., depth alongside 39 ft. Berths for 2 vessels.

Safety Regulations are handed to Master on arrival and must be strictly observed. No shore steam or electricity available. At Shell Pier, no goods may be loaded from shore.

Slop discharge facilities available only at the Shell pier.

BULK HANDLING FACILITIES: Ferruzzi Grain Silos, 39,450 tons capacity, at Paita Dock. Discharge by 2 cereal suction towers with 4 pumps, overall loading/discharging capacity 400 t.p.h.

Sosimage at Garibaldi Quay grain discharged by 4 vacuum-operated intake pipes, capacity 400 t.p.h. Capacity of silos, 30,000 tons. Length of quay 220 m., depth 35 ft. Will accept vessels of 30,000 d.w.t.

Vetrocoke Cokapuania: Coal conveyor system at Paita Dock, capacity 450 t.p.h. from colliers and 330 t.p.h. from other vessels. Capacity of silos 12,000 cu.m.

Carapelli Edible Oil Store: A temporary custody customs warehouse, with a covered area of 1,200 sq.m. Tank capacity 3,500 cu.m.

Speter Paper and Cellulose Store: Situated on the Garibaldi Mole, it has a covered area of 2,480 sq.m., and a 5,000 tons stocking capacity.

ENEL: Coal handling facility with 2 grab cranes, rate 10,000 tons per day. Max. LOA 255 m. Max. beam 32 m. Max. draft 13.0 m.

CRANES:

Garibaldi Mole, West Side:

Berth No. 1: 4 bridge cranes, capacity 6 tons (hook or bucket operation).

Berth No. 2: 2 bridge cranes, capacity 6 tons (hook or bucket operation).
1 bridge crane, capacity 8 tons (hook or bucket operation).

Berth No. 3: 3 bridge cranes, capacity 6 tons (hook or bucket operation).

East Quay:

Berth No. 9: 1 crane, capacity 3-6 tons (hook or bucket operation).
2 cranes, capacity 6-12 tons (hook or bucket operation).

Berth No. 10: 1 crane, capacity 28 tons, for handling containers (Contship).

Malaspina Dock:

Berth No. 4: 2 gantry cranes, capacity 3 tons (hook only).
2 gantry cranes, capacity 3-6 tons (hook or bucket operation).

Paita Dock:

Berth No. 5: 2 overhead travelling cranes, 10 ton capacity, travel 120 m.

Berth Nos. 6 & 7: 4 jib cranes, capacity 3–6 tons (hook or bucket operation). 1 travelling bridge Goliath crane, for marble – hook only, capacity 30 tons.

Additional Cranes: 2 self-propelled cranes, (hook operation) 20 tons lifting power. 1 self-propelled crane for loading and unloading (hook or bucket operation) 40 tons lifting power. 1 self-propelled crane, 60 tons lifting power, for loading and unloading of various goods and containers.

Floating crane, capacity 110 tons, available in the Industrial Zone.

Artom Wharf in the second basin is equipped with 3 jib cranes with capacity of 20 tonnes.

STEVEDORES: Gangs to be ordered by 0700 hrs. for morning shift, and by 1300 hrs. for afternoon shift every normal day from Monday to Friday. For mechanised work the same routine is to be followed. Saturdays, morning is considered as overtime work (tariff plus 27.50%). On the afternoon of Saturday, time is considered as holidays and so are Sundays. Saturdays and Sundays shift to be ordered on Friday afternoon within 1530 hrs.

MEDICAL: All facilities available. Vaccination/inoculation can be arranged. Prior notice should be given if urgent attention required on arrival.

FRESH WATER: Available at most berths, or by barge.

FUEL: Can be taken concurrent discharge at Shell Pier and S.P.I. terminal. Supplied by barge and road tankers at other berths.

IDENTIFICATION CARDS: Shore passes issued to crew.

CONSULS: Following countries represented at Spezia: Denmark, France, Finland, Netherlands, Norway, Portugal, Sweden.

REPAIRS: Naval and civil repair yards can undertake all types of work. Divers available through Port Captain.

DRY DOCKS: Available only when not used for naval vessels: No. 5, 209.65 m. by 27.60 m.; No. 6, 210.20 m. by 23.10 m. Floating dock for 110,000 d.w.t.

TIME: GMT plus 1 hour. GMT plus 2 hours from March 29th to September 26th.

POLICE/AMBULANCE/FIRE: Police tel: 0187-35041. Hospital tel: 0187/511045.

HOLIDAYS: New Year's Day (1st January); St. Joseph (19th March); Liberation Day (25th April); Labour Day (1st May); Easter and Day after Easter; Ascension Day; Assumption B.V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

SHORE LEAVE: Allowed.

DEVELOPMENTS: 2 new berths (810 m. length) for container vessels and Ro/Ro vessels under construction at Molo Fornelli Quay with depth 13 m. Expected to be operational late 1986. 2×45 tonne gantry cranes and 2 container stacking cranes will be available.

AUTHORITY: Capitaneria di Porto, Viale Italia 4, La Spezia, Italy. *Tel:* 0187-28580.

Camera di Commercio Industria Artigianato ed Agricoltura La Spezia, 19100 La Spezia. *Tel:* 32.133/34/35. *Contact:* The President.

(INCLUDING VADA)

LIVORNO (Leghorn) 43.33 N. 10.20 E. (See Plan)

DOCUMENTS: Complete set of Manifests and B/Ls relative to cargo destined for this port. Complete set of Manifests of all cargo in transit. 3 Crew Lists. 3 Passenger Lists.

ANCHORAGE: Anywhere between 1 – 1.5 miles from breakwater.

PILOTAGE: Pilotage compulsory for all vessel's over 500 g.r.t. Sound signals for calling Pilot, 3 long blasts, or international signal "G". Pilot boards vessels 1 mile from breakwater.

APPROACHES: Navigation within the confines of the port is very tight, the radius of bends are small, channels are narrow and swinging areas cramped. Masters must, therefore, exercise extreme vigilance when their ships are navigating in the port. In particular, it must be emphasised that prompt and accurate responses are required from engines and, in turbine-driven ships, full astern requirements should be met promptly and with maximum power. Masters should inform their Chief Engineers about these requirements before the ship enters the port.

Anchors must be ready to let go.

The current outside the breakwater usually sets across the entrance, but it is variable in both speed and direction. Care must be taken to allow for the set of current when lining up the ship for the entrance.

Immediately on entering between the Diga della Vegliaia and Diga Curvilinea, the ship has to make a 70° turn to port, then navigate a narrow channel for 0.5 miles to Bacino S. Stefano where ships bound for the Nuova Darsena (Berth Nos. 10 and 11) are swung. It is very important to arrive at the Bacino S. Stefano at the slowest possible speed in order to effect a tight swing. When the wind is from the Southern semi-circle, control of the ship can become difficult and proper control of the tugs is important.

RESTRICTIONS: No night berthing for tankers; no restrictions for tankers on sailing, when empty and up to 15,000 gross tonnage according to weather conditions.

MAX. SIZE: See "Berthing".

HEALTH: To obtain Free Pratique by radio cable to "Sanimare", Livorno, advising all health particulars at least 12 hours before arrival.

RADIO: Livorno Radio generally used for communications.

Arrival Advice: Agent to make request for berthing 3 days prior to arrival for cargo vessels and 10 days prior to arrival for passenger and cruise ships. Request to be made before 1000 hrs.

Day before arrival and not later than 1200 hrs. (1000 hrs. on holidays) advise ETA (day, hour, minutes = 00.00.00); number of containers to be moved.

RADAR: None.

VHF: Livorno Radio on Channels 16 and 26. Pilots and Port Control on Channels 14 and 16 and Harbour Master on Channel 16. 24 hour service available. Ship information service on Channels 16 and 10.

TUGS: There are a total of 20 tugs (700 h.p. – 6,200 h.p.) stationed in the port. Some are steam driven, others are motor driven. It is not always possible to allocate the best or most suitable tugs to each ship due to the strict duty roster of the tug crews. Tugs employ "on the hook" towing methods using ship's lines. Only good lines should be used for this purpose. Tugs are made fast outside the breakwater to assist ships to make the 70° port turn at the entrance.

For the larger ships, 4 tugs are normally used, 2 on the hook forward and 2 on the hook aft. In some circumstances, a fifth tug may be used, connecting on the hook forward.

Pilots communicate with the tugs by VHF using portable sets they bring on board with them.

BERTHING: Depths and Lengths of Various Berths

Berth	*Berth No.*	*Length/Depth/Remarks*
Bacino Santo Stefano - North West Side:		
1. Nuova Darsena Petroli	10	Length 344 ft. tankers.
	11	Length 295 ft., depth 37 ft. for tankers with a max. length of 984 ft. Tankers longer than 984 ft. with a draft of 37 ft. 6 in. can be moored in good weather on full tide
2. Radice Nuova Darsena Petroli	11/A	Length 229 ft., depth 14 ft.
3. Piccolo Fondale	11/B	Length 360 ft., depth 17 ft. 6 in. Only for vessel of a max. length of 360 ft. Petroleum/gas oil.
4. Vecchia Darsena Petroli	12	Length 20 ft. Petroleum/gas oil/fuel oil/crude oil.
	13	Length 98 ft., depth 30 ft. 6 in. for tankers with a length between 593 ft. and 748 ft. L.P.G.
5. Darsena Toscana West Side	14	Length 984 ft., depth 37 ft. Containers.
Bacino di Evoluzione:		
1. Calata Tripoli (Dow Chemical)	16	Length 690 ft., depth 26 ft. Chemicals/Ferries.
Darsena N. 1:		
1. Calata Assab		Total Length 1,312 ft.
	17	Depth 29 ft. U.S. Navy.
	18	Depth 29 ft. Ferries.
2. Calata Gondar	19	Length 690 ft., depth 27 ft. Ferries.
3. Calata Addis Abeba	20	Length 875 ft., depth 26 ft. 6 in. Bulk Cargoes.
4. Calata Neghelli	21	Length 787 ft. depth 26 ft. 6 in. Fruit.
4. Calata Neghelli	0	Length 197 ft,. depth 20 ft. Fruit.
Canale Industriale:		
1. Calata Bengasi	22	Length 885 ft., depth 28 ft. Timber, bulk cargoes.
2. Pontile Giopescal	23	Length 328 ft., depth 20 ft.
3. Terminal C. Colombo	24	Length 1,350 ft. Depth 28 ft. 0 in. } For vessels of max. length of 610 ft. only.
4. Pontile Cledca	25	Length 262 ft., depth 18 ft. Tar, pitch, solvents.
5. Pontile Valchisone	26	Length 230 ft., depth 18 ft. Ro/Ro.
6. Costiero Italso	27	Length 220 ft., depth 28 ft. with distance barge. Vegetable oils.
7. Costiero D.O.C. (Chemicals)	28	Length 656 ft., depth 28 ft. with distance barge. Petroleum, oils, solvents, gas oil, fuel oil, latex, vegetable oil.
8. Costiero D'Alesio	29	Length 460 ft., depth 28 ft. with distance barge. Tankers.
9. Costiero Liquigas/AGIP	30	Length 656 ft., depth 28 ft. LPG.
10. Silos Ardenza	34	Length 690 ft., depth 28 ft.
11. Terminal Leonardo Da Vinci	35	Length 545 ft., depth 28 ft. Max. LOA 150 m.
12. Darsena Ugione	36	For tankers of max. length 230 ft., depth 20 ft.
Montedison	36/A	For tankers with max. length of 430 ft. and draft of 25 ft. 6 in.
	37	For tankers with a max. length of 367 ft. and draft of 20 ft.
13. Officine Meccaniche Botteghi	38	Length 490 ft., depth 18 ft.

Berth	*Berth No.*	*Length/Depth/Remarks*
Calata del Magnale:		
1. Magnale Non Operativo	39	Length 4,265 ft., depth 14 ft. Repairs.
2. Magnale Operativo Nord	40	Length 490 ft., depth 14 ft. Cement.
3. Magnale Operativo Centro	40	Length 490 ft., depth 18 ft. Cement.
4. Magnale Operativo Sud	40	Length 490 ft., depth 14 ft. Cement.
Darsena Pisa:		
1. Calata Darsena Pisa	41-42	Length 820 ft., depth 39 ft. 6 in. Bulk cargoes.
Bacino Santo Stefano - South East Side:		
1. Calata Alto Fondale	43-44-45-46-47	Length 2,505 ft., depth 35 ft.
	48	Length 195 ft., depth 18 ft. Ferries.
Bacino Cappellini		
1. Calata Orlando	49	Length 495 ft., depth 28 ft.
	50	Length 495 ft., depth 28 ft. Bulk cargoes.
	51	Length 495 ft., depth 27 ft. Bulk cargoes.
2. Calata Siena	58	Length 165 ft., depth 20 ft. Ferries.
3. Calata Punto Franco		Total length 885 ft.
	59	Depth 28 ft. Ferries.
	60	Depth 28 ft. With distance barge Draft 34 ft. Bulk cargoes.
Bacino Firenze:

210 fork-lifts and travelling cranes
125 flatcars
40 tractors, towings etc.
7 semiportal suckers for cereals discharge.

TANKERS:

Nuova Darsena Petroli Terminal:

Cautionary Advice: The berthing heads of Berth Nos. 10 and 11 in the Nuova Darsena Terminal are constructed on stone walls and their protection consists of 4 fenders.

These fenders have small energy absorption characteristics and their size and spacing afford little protection against striking the quay wall or indenting the hull due to small single point landings. Heavy landings must, therefore, be avoided and ships must dock as parallel to the berth as possible.

The Nuova Darsena Berths are exposed to Westerly winds and, therefore, ships should ensure that moorings are adequate and in good condition.

Berthing Procedures: Ships for Berth Nos. 10 and 11 are swung in the Bacino S. Stefano, making a port swing with the aid of tugs and are then backed down to berth. Ships are, therefore, always starboard side to these berths. Headlines are run out first by mooring boat and, when in position, 2 of the tugs push the ship alongside. The mooring boats at Livorno are underpowered and there is no power assistance on the jetties to heave moorings ashore. For large ships, it is recommended to use 2 mooring boats.

Fibre ropes only to be used as head and stern lines.

The shore gangway is located aft of the hose tower.

Cargo Bunker Connections:

Crude oil	4 hoses × 10 in. ASA
Dirty products	1 hose × 6 in. ASA
Gasoil	1 hose × 8 in. ASA
Clean products	1 hose × 8 in. ASA

Bunker is supplied throughout the same flow booms.

Ullaging, Temperatures, etc.: To be taken by ship's personnel prior to arrival.

Deballasting Facilities: Receiving capacity is 15,000 cu.m. The rate is about 600 cu.m.p.h.

Passing Traffic, Weather, Tide, Current: The berth is exposed to winds from the Western semi-circle. The short breasting distance and the low quay make it very important to keep a close watch on moorings during unsettled weather conditions, particularly during the later stages of discharging when the moorings will become very steep. Ships with entirely separate ballast systems may ballast simultaneously with discharging; otherwise discharging may have to be stopped to take on ballast.

Density of Dock Water: Lowest recorded 1018.

Cargo and Bunker Facilities: Crude receiving facilities consist of 1×30 in. and 1×20 in. pipe-lines. Tankage is located about 5 km. away. Average discharge rates are about 3,000 t.p.h. Fuel oils are shipped via 1×16 in. line, average loading rate 650 t.p.h. Gas oil is shipped via 1×12 in. line, average loading rate 550 t.p.h.

Freeboard Restrictions: The Port Authority will not allow the freeboard of discharging tankers to rise above the height of the firefighting foam cannons located at the berth, i.e., 14 m. above water level. Ships which cannot maintain their freeboard below this level by ballasting during discharge will have to stop discharging when the freeboard reaches 14 m. and take on ballast before resuming discharge.

Darsena Ugione Terminal:

Cautionary Advice: Darsena Ugione, located about 1 mile up the narrow and congested Industrial Canal is itself narrow and congested. Ships have to back into Ugione and the corners of the Darsena are not fully protected. The fendering on Berth No. 36A (used by larger ships), does not fully protect the berthing head and great care must be taken.

The Channel to and from Darsena Ugione and the Darsena itself is subject to silting, and therefore maximum advertised draft must never be exceeded.

Berthing Procedures: Ships bound for Darsena Ugione will proceed up the Industrial Canal with the assistance of tugs and be swung either in the Bacino di Evoluzione about 0.5 km. below Ugione or at the entrance to Ugione itself. Before backing into Ugione, the port anchor is dropped and the head and stern lines are run out by mooring boat. There is no power assistance on the shore to heave the mooring ropes to the bollards and, therefore, ships should take care not to run out too much line at once. This is especially important if wires are used. There are no good spring line leads and, therefore, head and stern and breastlines should be placed accordingly. Ships are always starboard side to Berth No. 36A.

Shore gangway is run from main deck, close to manifold.

Cargo Bunker Connection: All products are handled through 2 fully balanced hard arms having 6 in. ASA bolted connections.

Cargo, Bunkers Handled: All grades of clean and dirty products are handled at Darsena Ugione. Loading rates average between 100 t.p.h. and 500 t.p.h.

Deballasting Facilities: Ballast water is discharged ashore through 12 in. line, maximum storage capacity is 3,000 tons. Tank washings (slops) cannot be received. Discharge rate of ballast water averages 300 t.p.h., therefore, ships should arrive with minimum ballast consistent with safety.

Both Terminals:

Oil Pollution Clean-up: Facilities are available.

Fire Fighting Facilities: At both terminals, elevated foam cannons serve each berth. At Nuova Darsena, the cannons are remotely controlled.

Services: Fresh water, distilled water, laundry, and stores are available.

Repairs, Gas Freeing, Immobilisation: All kinds of ships' repairs can be undertaken at Livorno including servicing of radio, radar and echo sounders with prior notice.

Tank cleaning and gas freeing are not allowed alongside the tanker berths.

While alongside the tanker berths, the engine and steering gear must be maintained ready at all times.

Also see "Berthing".

BULK HANDLING FACILITIES: Grain: discharging rate 1,000 to 1,500 m. tons per day.

Ore and coal bulk: discharged by shore elevators at Calata Orlando, discharging rate 1,500 to 2,000 tons per day.

Cereals Silos: Silos Livornesi 28,000 tons. Silos and Tirrenian Warehouses 31,500 tons. Ardenza of Liquifarm G.I.A. 52,000 tons. Italso 32,000 ton.

BRIDGES: None that interfere with port traffic.

STEVEDORES: ETA required by Agent in order to arrange matters with stevedores at least 48 hours before arrival.

MEDICAL: It is advisable to give details of assistance required together with ETA cable. Hospital facilities available.

FRESH WATER: Fresh water available at all berths except Bacino Alto Fondale. Water barge available.

FUEL: All grades available from berth. Advance notice required 48 hours; supply subject to Owners' stem.

FIRE PRECAUTIONS: Berths at which tankers operate are equipped with monitors.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

GANGWAY/DECK WATCHMEN: Recommended, 8 hour shifts, 0600 - 1400, 1400 - 2200, 2200 - 0600 hrs.

CERTIFICATES: All ship's certificates required.

CUSTOMS ALLOWANCES: Tobacco: 50 cigarettes, or 50 grams tobacco per man for the first 24 hours. Wine and/or Spirits: only in consignment of the Master.

IDENTIFICATION CARDS: Issued by local police authorities.

CONSULS:

Colombia
Denmark
Finland
France
Germany F.R.
Greece
Liberia
Monaco
Netherlands
Norway
Peru
Portugal
Spain
Sweden
Switzerland

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: Dry docks suitable to accommodate a Liberty type ship. A small floating dry dock for vessels up to maximum of 1,500 tons.

New Graving dock 350 m. × 56 m., depth on sill 10.0 m. (For 300,000 d.w.t. vessels).

REPATRIATION: All necessary repatriations possible.

AIRPORT: Nearest at Pisa, distance about 20 km.; served by Alitalia, British Airways, Lufthansa and Air France.

TIME: Local time is 1 hour ahead of GMT, and Summer time 2 hours ahead.

HOLIDAYS: 1st January, Easter Monday, 1st May, 15th August, 1st November, 8th December, 25th December, 26th December.

POLICE/AMBULANCE/FIRE: Police Tel: 23413, Carabinieri Tel: 808002, Dept. of Customs Guards Tel: 24066, Ambulances Tel: 33333/22111, Fire Brigade Tel: 22222.

TELEPHONES: Only at some quays is it possible to place telephones on board.

SERVICES: Tank cleaning and slop facilities available. Compass adjuster available. Refuse collection.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Shore passes required.

DELAYS: No considerable delays.

AGENT: G. Fanfani & Co., via Fiume 15, Livorno. Tel: 28151 (5 lines) after hours 804347 and 801931. Telex: 500006 Cables: Fanfanico.

MANFREDONIA: 41.37 N. 15.55 E. (See Plan)

PORT LIMITS: Seaward boundaries do not exist. A vessel is considered an "arrived ship" and (subject to Charter-Party terms) laytime will commence when boarding the Pilot or dropping the anchor in the Roads.

DOCUMENTS:

5 Crew Lists.
3 Provision Lists.
1 Arrival Report.
3 Curios Lists.
Cargo Manifest (Italian Form).
Bills of Lading and ship's documents not expired.

PILOTAGE: Compulsory for vessels over 500 g.r.t. The ship's ETA is furnished to the Pilots by the Agent. VHF service around the clock on Channel 12; Pilot station to be contacted 1 or 2 hours prior the ship's arrival in the Roads. International signals are used for calling Pilot; Pilot has to be taken on board within 1 mile range from the harbour entrance but, upon ship's request, Pilot may board the vessel wherever required. The pilot boat has a black hull with a white stripe all around and the letter "P" printed on both sides of the bow. White superstructure and mast. Max. speed 8 knots.

ANCHORAGE: Boundaries according to the draft; the bottom (mud and sand) has good holding. No anchorage is suggested with heavy S.E'ly weather. See "Plan".

RESTRICTIONS: Ships carrying dangerous cargoes will only berth in daytime (from sunrise to sunset); departure is allowed at any time for all vessels.

MAX. SIZE: No restrictions on LOA or beam. The only limitation is given by the draft which is 32 ft. 6 in. for ships operating to the New Industrial Port and 21 ft. 6 in. for those operating to the old harbour. The above drafts are referred to the Mean tide condition. One more foot can be added if docking with high tide.

HEALTH: Free Pratique is granted by the Port Authorities at anchorage or at the dock. Radio Pratique may be requested, by cable via Bari Radio, to "Sanimare Manfredonia".

RADIO: For ETA and other communications with Agents, receivers, etc., Roma Radio is suggested; call sign IAR.

VHF: Port Authorities: Channel 16 from 0800 to 2000 hrs local time from October to May and 24 hour watch from June to September.

Pilots, Tugs and Mooring Gangs: Watch and working Channel 12; service continuous.

Local Agents provided with VHF equipment listen from 0800 to 1700 hrs. on Channel 9 and 12.

RADAR: The new pilot station (ready in 1986) will be equipped with radar and Pilots should be able to provide a suitable radar service and port control.

TUGS: 2 tug boats of 1,300 h.p. Usually join the vessels in the Roads, together with the Pilot. Either ship's or tug's lines are used. Towage is compulsory for ships carrying dangerous cargoes.

BERTHING: New Industrial Port: A/1 300 m., A/2 250 m., A/3 265 m., A/4 265 m., A/5 315 m. Draft at MHWS 32 ft. 6 in.

Old Commercial Port: Nos. 1, 2 and 3 together 480 m., Nos. 4 and 5 together 220 m. Draft at MHWS 21 ft. 6 in.

CRANES: Old Commercial Port: Pier No. 2 equipped with 2 cranes with a safe working load of 6 tons each.

New Industrial Port: 2 cranes Reggiane type, multi-purpose, are located on piers A/3 and A/4. Safe working load 25 tons at 40 m. spread.

BULK CARGO FACILITIES: In addition to the cranes, the new port is equipped with 3 escalators for loading fertiliser in bulk (Berth A/2) and 2 self-moving suction pumps for cereals (Berths A/1 and A/2).

The rates are: Fertiliser in bulk 3,000 tons per working day. Grain, wheat and other cereals 5,000 tons per working day. Sulphur in bulk 2,000 tons per working day. Silver sand 2,500 tons per working day (working day 0700 – 1900 hrs.).

BRIDGES: None.

STEVEDORES: Gangs arrangements made by the Agent in due time. The load or discharge rates vary depending on the type of cargo, the vessel, the type of the ship's gear, etc.

MEDICAL: Crew members must be in possession of a valid vaccination card against cholera and yellow fever when coming from countries declared infected by the international health laws.

DENSITY: The average salinity of water in the port is 1026.

FRESH WATER: Available on the quays of both ports. Watering operations carried out by hoses which are connected to the pier connections.

FUEL: Any kind, grades and viscosity delivered by trucks.

FIRE PRECAUTIONS: Towing wires hanging from the sea side forward and aft.

CONSULS: None.

REPAIRS: Small deck and engine repairs are possible.

DRY DOCK: None.

SURVEYORS: All Classification Societies are represented in Bari, 2 hours away from Manfredonia.

GANGWAY/DECK WATCHMEN: Available, but not compulsory.

OPENING/CLOSING HATCHES: Opening and closing carried out by ship's crew.

CUSTOMS ALLOWANCES: 40 cigarettes per man. 1 bottle spirits.

REPATRIATION: All facilities exist for effecting Crew changes and arranging all the necessary pratiques for repatriation.

AIRPORT: The nearest airport is Bari, 130 km. away, but the re-opening of Foggia airport, 36 km away is expected.

TIME: From the last Sunday of March till the last Sunday of September "daylight saving time" is in force. GMT plus 2 hours. For the rest of the year the standard time is used, GMT plus 1 hour.

HOLIDAYS: Cargo operations are not carried out on the following days: All Sundays, April 25th, August 15th and 31st, December 8th, 25th and 26th, and January 1st.

POLICE/AMBULANCE/FIRE: For all services dial 113.

TELEPHONE: No arrangements exist for placing telephone on board. 1 telephone booth exists on "Molo di Ponente", Old Commercial Port, for local and long distance calls. A few telephone booths on Berths A/1 and A/3 of the New Industrial Port are to be connected in the near future.

SERVICES: Compass adjusting, radar and gyro repairs. Divers available on request.

SHORE LEAVE: Crew members of all nationalities are allowed ashore.

IDENTIFICATION CARDS: Seaman's book is sufficient.

DELAYS: Delays for port congestion are very unusual, however, delays no longer than 24/48 hours are expected.

GENERAL: 2 shipchandlers are available for stores, provisions, cigarettes and spirits.

AUTHORITY: Capitaneria di Porto, Piazza Marconi, Manfredonia. *Tel:* (0884) 23871-2-3. *Telex:* 812156 Compmf I. *Contact:* Harbour Master.

MESSINA: 38.11 N. 15.34 E. (See Plan)

DOCUMENTS: If vessel comes from foreign port, whenever possible, at least 1 copy of Crew List and Passenger List to be sent some days before her arrival, so that they can be delivered to police in advance. Required on arrival:

3 Crew Lists.
1 Provisions List.
3 Lists Passengers in Transit.
3 Lists Passengers Disembarking.
1 List of Articles – new and Customs-barred in possession each crew member – cameras, binoculars, radios, cigarettes, tobacco, new articles, etc. If on inspection articles or quantities not in conformity or in excess, Master responsible; articles removed and heavy fine imposed.

Copies of Cargo Manifest also to be prepared on arrival.

If Anchorage Dues already paid and still in force, the relative receipt to be shown to the Harbour Authorities, together with other ship's papers and report of arrival to be delivered to them.

PILOTAGE: Pilotage through Messina Straits is available but not compulsory.

Vessels in transit who intend to avail themselves of optional pilotage may request a Pilot via:

a) Radio PT – Messina (IDF) on frequency 2182 kHz by radiotelephony at least 4 hours in advance.
b) The Messina and Reggio Calabria Port Captaincy telegraphically at least 12 hours in advance.
c) Through the ship's Agent.
d) By contacting the local pilot station directly by telephone 090/44483 or VHF Channel 12 at any time.

Ships requesting a pilotage service shall embark the Pilot in the following positions (which are also the boarding positions for the Port Pilots):

a) If Southbound: 3 nautical miles North of Cape Peloro.
b) If Northbound: 1.5 nautical miles S.E. of San Ranieri Light.

We wish to point out the great advantages that such a pilotage service may render to the ship, both in terms of fuel saving because it avoids the longer passage to the South of Sicily, and in terms of safety to navigation.

Also see "Italy – General" before first port and "Report" dated May 1985 below.

ANCHORAGES: Allowed outside harbour; at Paradiso's Bay, sufficient depths for safe anchorage existing. Advisable to request Pilot's assistance for indication of best anchorages.

Prohibited Anchorage: Between the parallels of 38° 12′ 58″ N. and 38° 10′ 48″ N.

RESTRICTIONS: For entering harbour during night-time ETA to be given in advance.

Also see "Italy – General" before first port and "Report" dated May 1985 below.

MAX. SIZE: Max. draft allowed: 33 ft. at passenger quay: Other berths 27 ft.

Max. length 200 – 300 m.
Tankers: Length 100 m., draft 27 ft.

HEALTH: Free Pratique automatic for vessels coming from other Italian ports and quarantine flag not to be flown on entering. From other countries usual procedure applies.

RADIO/VHF: Contact through Rome Radio, Naples Radio, Augusta Radio, or Messina Radio VHF Channel 16 or R/T 2182 kHz.

TUGS: Not compulsory. Tugs join vessels at about 0.5 miles from entrance of harbour. If tug's lines used increase of 10% on tariff.

STEVEDORES: To enable Agent order gangs important obtain accurate ETA. Latest time to order gangs: normal shift 0730 hrs. for work in the morning; 1200 hrs. for work in afternoon; night shift 1600 hrs. same day – Saturday noon or Sunday at 1200 hrs. on Saturday.

Failure to give ETA results in cost of waiting gangs, charged to vessel.

Tonnage: Per gang in 8 hours: General cargo 50 ton – cereals 80 ton.

MEDICAL: Doctor can attend sick crew members or for vaccinations. Hospitals available.

TANKERS: There is a Eurobunker station only. Small tankers from time to time discharge fuel oil, gasoline, etc. Gas freeing, tank cleaning, slops and dirty ballast reception facilities available.

FRESH WATER: Only quays have water pipe-line connections and water may be supplied day and night directly from ashore by hoses; during Summer time water may be supplied from 0600 to 1100 hrs. only. Water available at night time by boat (max. 250 tons).

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: May be carried out by the crew or stevedores.

CERTIFICATES:

Safety Certificate.
Wireless Safety Certificate.
Freeboard Certificate.
Derat Certificate.
Anchorage Duties Voucher.
Crew List.
Passenger List.
Construction Certificate.

CUSTOMS ALLOWANCES: 50 gm. tobacco for each seaman. Spirits: 0.75 bottle for all crew.

IDENTIFICATION CARDS: Required.

CONSULS:

Argentina
Australia
Colombia
Denmark
Finland
Germany F.R.
Guatemala
Netherlands
Norway
Panama
Peru
Sweden

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: One dry dock belonging to SMEB (Societa' Messinese Esercizio Bacini) can be hired. Dimensions are as follows: Length 853 ft. (260 m), breadth 118 ft. (36 m.). One dry dock belonging to Italian Navy, therefore application must be granted by the Marina Militare. Dimensions are as follows: 492 ft. × 52 ft. 7 in. (bottom), 81 ft. 6 in. × 24 ft. 8 in. (top).

REPATRIATION: No particular facilities existing; but necessary repatriation can normally be arranged.

AIRPORT: Reggio Calabria Airport – distance about 10 km. From Messina, Reggio Calabria can be reached in 15 minutes by hydrofoil boats, which run every half hour (about). Flights from Reggio Airport in Winter, 1 per day; in Summer, 2 per day.

TIME: In relation to GMT local time is an hour ahead. During Summer, from March to September, clocks are put 1 hour forward.

HOLIDAYS: Work can be arranged, provided timely notice is given, in following official holidays, paying the respective increase on normal tariff:

New Year's Day (January 1st); Easter Monday; 25th April; 1st May; June 3rd; local religious holiday; 15th August; 25th December; 26th December.

POLICE/AMBULANCE/FIRE: Police, 46830; Ambulance, 2935592; Fire, 2930222.

TELEPHONES: No arrangements exist.

SHORE LEAVE: Allowed.

REPORT: May 1985.

The following is a copy of telex from ship's Agent to Ship Operator.

Quote:

Port Orders 7 – 18/85

As from 10th May 1985 *temporarily pilotage in the Strait of Messina* is compulsory for vessels over 6,000 g.r.t. carrying petroleum products or noxious substances to the sea. Pilotage is also compulsory to vessels not carrying the above products over 15,000 g.r.t. Vessels are to inform at least 12 hours prior arrival Messina Radio call sign IDF frequency 2182 kHz and cable Port Authorities of Messina and Reggio Calabria or through their Agents the following:

International call sign.
Flag.
G.r.t. as per International Certificate.
Type of cargo/es and quantities.
CLC and IDPP certificate details.

Same information has to be given to *Messina* and *Reggio Caladria's Port Authorities* by vessels not compulsory to take Pilot at least 2 hours prior their arrival at Messina via Messina Radio or VHF/FM Channel 16.

Pilot boards vessels coming from South at 2.5 miles S.E. of Punta S. Raineri Light.

Pilot boards vessels coming from North at 3 miles North of Capo Peloro Light.

Joint Port orders No. 6/85 and 13/85 issued respectively by Reggio Calabria Maritime Direction and Catania Maritime Direction is abrogated as from 10/5/1985.

Furthermore the decree of Ministry of Merchant Marine of 8th May 1985 about the navigation in the Strait of Messina states as follows:

As from 10th May 1985 the navigation in the Strait of Messina is forbidden to vessels equal or over 50,000 g.r.t. carrying petroleum products or noxious substances to the sea as defined by the International Conventions effective in Italy.

Unquote.

Also see "General – Strait of Messina" before first port.

AUTHORITY: Capitaneria di Porto – Messina, Via V. Emanuele, Messina, Italy. *Tel:* 41896. *Contact:* Port Commandant.

MILAZZO (Sicily): 38.13 N. 15.16 E. (See Plan)

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority dues.
Vaccination Certificates for sighting.

ARRIVAL ADVICE: At least 24 hours' notice of arrival to be passed to Agent in order to obtain allocation of berth from Port Authority. Consignees-Receivers as for Charter Party.

PILOTAGE: Pilot boards 1.5 miles off the berths. International Code signals used. Pilot can be contacted on VHF Channel 12. Compulsory for vessels over 500 g.r.t. (Berthing/Unberthing).

ANCHORAGE: There are 6 anchorages for tankers over 3,000 g.r.t.

No. 1 up to 600 m. off the harbour green light – Bearing 034°
No. 2 up to 920 m. off the harbour green light – Bearing 091°
No. 3 up to 3,870 m. off the harbour green light – Bearing 097°
No. 4 up to 3,050 m. off the harbour green light – Bearing 101°
No. 5 up to 1,200 m. off the harbour green light – Bearing 036°. Not in use at present due to sea bed being fouled (April 1986.).
No. 6 up to 1,600 m. off the harbour green light – Bearing 065°

Anchoring prohibited within 1 mile of Refinery Wharves. Pilot can be used for anchoring but not compulsory.

RESTRICTIONS: All tankers are berthed and unberthed between 0600 hrs. and 2000 hrs.

MAX. SIZE: Tankers up to 420,000 d.w.t.

HEALTH: Free Pratique on board may be requested on arrival by way of ship's Agents. The procedure to obtain Free Pratique by radio is being perfected. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO/VHF: Harbour Master Authority, Mediterranea Refinery, Pilot and Tugs may be contacted on VHF Channel 12. Harbour Master Authority may be contacted also on VHF Channel 16.

TUGS: 4 tugs available, 2×2,500 h.p., and 2×1,800 h.p. Meet vessel 0.75 miles off berths. Obligatory, at least one for mooring/unmooring tankers over 3,000 g.r.t. Ship's lines used.

DRY CARGO FACILITIES: Ludovico Mazzullo Jetty, length 340 m., depth 22 ft.; Pennello Eolie Jetty, length 65 m., depth 23 ft.

TANKERS: AGIP Petroli Co.: 10 berths for Tankers, distributed in 3 Jetties as follows:

No. 1 Jetty: (West Jetty) 500 m. long, for loading/unloading, with the following berths:

Berth No. 1 (West side – Outer end) – depth 48 ft. LPG arms and lines available.

Berth No. 2 (East side – Outer end) – depth 48 ft.

Berth No. 3 (West side – Inner end) – depth 21 ft. LPG arms and lines available.

Berth No. 4 (East side – Inner end) – depth 20 ft. LPG arms and lines available. Arms: 12 in. and 8 in. – Ballast lines 2×10 in. – Cargo lines 20, 16, 12 and 10 in.

No. 2 Jetty: (Middle Jetty.) 650 m. long, for loading/unloading, with the following berths:

Berth No. 5 (West side – Middle) – depth 55 ft.

Berth No. 6 (East side – Middle) – depth 55 ft. Arms:12 in. – Ballast line 1×20 in. – Cargo lines 2×40 in. (Crude oil) – 20, 16, 12 in. (Fuel oil) – 20 in. (Gasoil) – 12 in. (Virgin Naphtha) – 10 in. (Super Gasoline) – 10 in. (Normal Gasoline) – 10 in. (Kerosine).

Berth No. 5 bis (West side – Outer end) – depth 83 ft.

Berth No. 6 bis (East side – Outer end) – depth 75 ft. Arms: 16 in. – Crude oil lines 2×40 in.

Berth No. 7 (West side – Inner end) – depth 25 ft., loading arms 6 in.

Berth No. 8 (East side – Inner end) – depth 24 ft., loading arms 6 in.

Berth No. 7 available for vessels up to 6,500 d.w.t. LPG arms and lines available.

Berth No. 8 available for vessels up to 5,000 d.w.t. LPG arms and lines available.

No. 3 Jetty: (East Jetty) 558 m. long, for loading/unloading under construction, with following berths:

Berth No. 9 (West side) – depth 45 ft.

Berth No. 10 (East side) – depth 45 ft.

Vessels berth head out. Lines run to mooring dolphin ahead and astern. Anchor is compulsory only for small tonnage tankers. Tankers may use wire ropes only on the jetty mooring hook. On the bitts may use wire ropes only if the eyes are made of manila or nylon. For tankers alongside the jetty it is compulsory to have ahead and astern, outside, wire ropes with eye.

Crude oil washing permitted.

Oilboom: Compulsory for vessels alongside the refinery jetties.

MEDICAL: All facilities available.

FIRE WATCHMEN: Compulsory for tankers alongside the Refinery Mediterranea jetties. Number of watchmen onboard is variable, according to the cargo Class ("A", "B" or "C") loading/discharging and to the tanker's g.r.t.

GANGWAY/DECK WATCHMEN: Watchmen service available. It is, however, recommended but not compulsory.

FRESH WATER: Boiler and drinking water supplied from the jetty. At anchorage by barge. Max. pumping rate 50 t.p.h.

FUEL: All grades available at Mediterranea Refinery berths, subject to prior notice. Also available at Milazzo Dry cargo harbour berths all grades available by tank or truck.

BALLAST: Ballast facilities available at Mediterranea's berths. Reception 1,000 t.p.h. No restrictions on capacity.

IDENTIFICATION CARDS: Shore passes given by local police.

TIME: GMT plus 1 hour. Summer-time: March to September GMT plus 2 hours.

HOLIDAYS: Cargo work can be arranged on every day.

REPAIRS: All types of deck/engine repairs possible. Experienced and established marine workshops available.

SURVEYORS: Cargo Surveyors and Superintendents available. Ships Surveyors and Salvage Association also available.

CUSTOMS ALLOWANCES: 50 cigarettes are allowed per man per day for the first 2 days.

CONSULS: No Consuls in Milazzo. The nearest are in Messina for the following countries: Peru, Great Britain, Argentine, Norway, Uruguay, Chile, Denmark, Germany F.R., Australia.

AIRPORT: The nearest is at Reggio Calabria where there are 3 regular flights per day. Reggio Calabria can be reached by car and by hydrofoil in about 2 hours. Catania Airport also nearby, and may be reached by car or train in about 2 hours.

TELEPHONE: Connections possible at Refinery Wharves.

GARBAGE: Boats are available, and compulsory for vessels 24 hours after arrival.

BANKS: Italian banks only.

STORING: Vessels can be stored by barge during loading and unloading.

Fork lift trucks can only be used in the commercial port.

Local riggers can be employed to assist with storing in the commercial (dry-cargo) port only.

SHORE LEAVE: Allowed but transit through the refinery area not permitted except in emergency. Boats are available for hire from wharves and anchorage to the landing pier in the Port of Milazzo. Shore passes given by local police.

DEVELOPMENTS: Coal unloading wharf of 530 m. Length and 30 m. depth to be built. Vessels of 120,000 d.w.t. will be unloaded by 2×1,500 t.p.h. bucket unloading systems.

SHIPMASTER'S REPORT: April 1986.

Vessel: 95,000 d.w.t.

With vessels this size Pilot will normally board for anchoring which operation is carried out with anchor in gear due to water depth. Usually slack down to about 2 shackles in water and then slack to 9 shackles.

Only means of getting ashore from anchorage and from the refinery jetty is by boat service which is arranged through Agent. VHF communication is very good and on berth the refinery requires VHF watch on Channel 12. Bonded stores sealed by Customs and for Liberian registered vessels will not be unsealed irrespective of vessel's length of stay.

Boat service does not operate after 2300 hrs. or if weather, in boatman's opinion, is too rough.

If American dollars are required then it is necessary to go to Messina to obtain them.

Pilot for berthing boards from pilot boat at anchor and usually requests vessel to weigh anchor before boarding. 3 tugs for berthing, 2 of which require 2 ship's ropes each, forward and aft, third tug puts up small rope amidships.

At Berth No. 5 usually starboard side to. Moorings 3, 2, 2 with head and stern lines first then springs, then breasts. Good mooring facilities with messengers and winches and berth is designed for VLCCs with shore gangway.

AUTHORITY: Ufficio Circondariale Marittimo di Milazzo, via Molo Marullo, Milazzo. *Tel:* 090-9281110.

Mediterranea-Raffineria Siciliana Petroli S.P.A., Box 154, Milazzo, Italy. *Tel:* 090-922101. *Telex:* 980025. *Cables:* Raffimed-Milazzo. *Contact:* Dott. Edeoardo Macri, Refinery Marine Superintendent.

MONFALCONE: 45.48 N. 13.32 E. (See Plan)

PORT LIMITS: A vessel is considered to be an "arrived ship" when it arrives within the anchorage zone, S.W. of Duino.

DOCUMENTS:

Arrival Report.

Crew List.

Passenger List.

Customs Documents.

Health Documents (only for vessels that are not arriving from the United States, and are not members of the West European Union).

PILOTAGE: Pilotage service is the responsibility of the Harbour Office, and is carried out by local Pilots. Pilots are not supplied with radio equipment. Pilotage service has to be requested by radio via Trieste radio station, to the Harbour Office or via VHF Channel 16. Pilotage is compulsory for vessels over 500 g.r.t. Pilot boat is equipped with VHF. Pilot boards about one mile from the entrance buoy.

ANCHORAGE: Vessels awaiting entry to the port are required to anchor between Duino and Sistiana, about 3 miles from the entrance. The anchorage provides good shelter from winds from the first and fourth quarters. The depth is approx. 12.0 m. and the bottom is mud.

RESTRICTIONS: Pilotage is effected day and night. It is not available during thick fog or when strong winds are blowing from the first quadrant. Maximum draft at high water is 27.0 ft. When current dredging operations are completed vessels up to 10 m. draft will be able to enter.

MAX. SIZE: At the ENEL Berth (berth for the discharge of coal destined for the electrical power station), vessels longer than 180 m. may not berth.

HEALTH: Pratique requested by radio via the Maritime Health Office at Trieste.

RADIO: Nearest coast station is Trieste Radio, through which all radio messages should be routed.

TUGS: Tug service is optional except for vessels proceeding to ENEL Berth, but the Maritime Authority can make service temporarily compulsory.

BERTHING: 910 m. of berthing space (6 berths) for loading and discharging various types of cargo, with a maximum depth of water of 24.5 ft., but after dredging this will be increased to 10.5 m. One berth 120 m. long for discharging cereals with maximum depth of 24 ft. The berths are served by railway branch lines.

BULK HANDLING FACILITIES: Silo berth is well equipped for discharging cereals.

CRANES: 5 heavy lift cranes on rails up to 45 tonnes capacity. 8 mobile cranes of varying capacities.

BRIDGES: There are no bridges that hinder maritime traffic.

STEVEDORES: Ordered via Agent.

MEDICAL: Hospital, doctor and vaccination facilities available.

TANKERS: The port only receives tankers with cargoes for ENEL.

DENSITY: Average 1027.

FRESH WATER: Available at all berths.

FUEL: Bunkering is by barge or by truck (capacity 20 tons).

FIRE PRECAUTIONS: Only for hazardous goods, during bunkering operations and the effecting of any work on board vessels involving flames.

CONSULS: None at Monfalcone, but available at Trieste.

REPAIRS: Minor repairs only.

DRY DOCKS: Max. size 300,000 d.w.t.

SURVEYORS: None at Monfalcone, but these may be easily contacted at Trieste.

GANGWAY/DECK WATCHMEN: Not compulsory, but available through Agent.

OPENING/CLOSING HATCHES: Opened and closed by ship's crew.

CUSTOMS ALLOWANCES: 50 cigarettes or 50 grams of tobacco available per man per day for the first two days.

AIRPORT: 5 km. from Monfalcone with connections to Milan and Rome.
TIME: GMT plus 1 hour; from 29th March to 26th September GMT plus 2 hours.
HOLIDAYS: Every Sunday, 1st January, 1st May, Easter, first day after Easter, 15th August, 1st November, 25th and 26th December. It is, however, possible to load and discharge vessels on these days by paying premium rates.
POLICE/AMBULANCE/FIRE: Police 113 or 72332; Ambulance 72249; Fire 74444.
TELEPHONES: Not available on board, numerous public telephones in the port.
SHORE LEAVE: Completely unlimited for crews of Western countries, but for crews of USSR block ships, crews must return on board by 0200 hrs., and for those of Chinese vessels by 2200 hrs.
IDENTIFICATION CARDS: Issued without any formality by the local police.
REGULATIONS: There are no special regulations.
DELAYS: Caused only by weather conditions.
BANKS: Banca Antoniana, Via F. Rosselli No. 37. Tel: 45301.
Banca Cattolica, Via Marconi No. 1. Tel: 470337.
Credito Italiano, Via Oberdan No. 5. Tel: 40061.
Banca del Friuli, Piazza Cavour No. 22. Tel: 73230.
Banco di Roma, Piazza Cavour No. 34. Tel: 45191.
STORING: See "Prelims".

1. There are no coastal fuel stores, and vessels arriving at Monfalcone are either supplied by road tanker or by fuel barges. The usage of the one or the other means is the responsibility of the Owners or Agents.
2. Supplies by barge can be effected at any time, whilst by road tanker only during non-working hours.
3. For loading and discharge, vehicles may come right alongside the berthed vessels.
4. There are no forklift trucks in use in the port of Monfalcone for unloading goods.
5. For discharge or shipment of goods, there is an accident prevention ordnance No. 07/1981 issued by the Port Captaincy of Monfalcone.

GENERAL: During the Winter, there are days of very strong winds gusting up to 110 km/h. coming from the first quadrant which sweep the port's quays. The wind tends to become strong during the night, and it is necessary to strengthen moorings.
DEVELOPMENTS: At the moment, widening and deepening works in the access channel to the port of Monfalcone are under way, and the channel will be better lit, permitting entry also during the night.
AUTHORITY: Capitaneria di Porto – Monfalcone, 34074 Monfalcone, Italy. *Contact:* Alessandro Verani, Port Commandant.

NAPLES: 40.50 N. 14.17 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report – completed on arrival.
Maritime Declaration of Health Certificate – completed on arrival.
Ship's Certificates, including Italian Authority Dues.
Vaccination Certificates for sighting.
PILOTAGE: 13 Pilots and 3 motor launches. ETA to pilot station, VHF Channels 12 and 16 or to "Compamare" on Channel 6.
ANCHORAGES: Approximately 70 anchorages, having depths ranging from 11 m. to 15 m.
APPROACHES: *Port Approaches:* Approaches to the Gulf of Naples are free of navigational dangers. Ships approaching Naples from the North are cautioned to avoid the Procida Canal, between Procida Island and Capo Miseno (1.5 miles wide) in view of the heavy traffic usually met in this area and other navigation hazards. Passing well clear West of Ischia Island is recommended. Caution is necessary because numerous fishing boats are likely to be encountered in the area, especially at night and in the early morning.
Port Operations: The port is located on the Northern shore of a natural Gulf and is well sheltered from Northerly winds, but winds from the S.W. to S.E. may affect port operations at the petroleum berths, by creating a considerable swell inside the breakwater.
Entry/Berthing: For the berthing manoeuvres, and particularly when ships swing inside the petroleum basin, it is very important that ship's engine orders are carried out accurately and promptly. The Chief Engineer should be advised in advance of importance of this.
RESTRICTIONS: 2 port entrances of which the Western is 280 m. wide, the Eastern is 250 m. wide.
Use of propellers and thruster within 20 m. of piers not allowed.
MAX. SIZE: Tankers up to 45 ft. draft.
HEALTH: Free Pratique may be requested by radio to "Sanimare Naples" between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board, Pratique is automatic for vessels coming from ports in E.E.C. countries.
TUGS: 11 tugs available as required to assist berthing.

CRANES:
Electric: 10×6 tons, 8×12 tons, 10×15 tons, 1×40 tons, 1×20 tons, 4×50 tons (Portainers), 1×45 tons (Portainer).
Floating: 1 of 100 ton (Italian Navy) and 1 of 60 ton (SEBN).

CONTAINER FACILITIES: The port is equipped with a container terminal. The facility includes: Quay of 650 m. Depth of water 12 m. – 15 m. (Bausan Quay). 2 anchorages West of Flavio Gioia Quay with a depth of water of 12 m. Container park of 110,000 sq.m. A link with the National Railway Network. 4 cranes for 20 ft. and 40 ft. containers at Bausan Quay East. A trans-European railway terminal operated by International Containers S.A. fitted with a Paceco-Vickers transtainer of 35 tons, lateral cranes of 35 tons and 7 tons, and fork-lift trucks.

There is an additional 50,000 sq.m. of container storage near the city and various private storage areas.

TANKERS: The petroleum port is located at the far East area of the port of Naples and consists of the Vigliena Pier, Calata Progresso and Progresso Pier. The petroleum port is exclusively used for handling crude oil and petroleum products at its 11 berths, and several pipe-lines connect these berths with the Naples Refinery of Mobil Oil Italiana, the plant of Mobil Chimica Italiana and the bulk plants of Agip, Esso Standard Italiana and IIP (ex-Shell Italiana) which are all located in industrial area of Naples adjoining the petroleum port at a distance not exceeding 4 miles. The maximum size of crude tankers, fully loaded, which can be accommodated at Progresso Pier is 90,000 d.w.t.

BULK HANDLING FACILITIES:
Coal: Four 6 ton units with hourly payload of 400 tons.
Cereals: Five units with hourly payload of 520 tons.
Containers: One 40 ton container bridge crane at Flavio Gioia Pier, capable of a lift every 2 minutes and 4×45 ton container bridge cranes at Bausan Pier.

FRESH WATER: Water pipe-lines are connected to all wharves and piers in Port. Water barges available.

FUEL: All grades available. Delivered by barge subject to advance notice given.

REPAIRS: All types of ship repairs can be carried out by the shipyards of S.E.B.M. and Cantiere Navale Ferbex S.p.a.

DRY DOCKS: 3 graving docks with dimensions as follows:
Length 206 m., width 21 m.
Length 335 m., width 40 m.
In addition 2 floating docks:
Length 223 m., width 37 m.
Length 228 m., width 35 m., lifting capacity 28,000 tons

OLBIA, Sardinia: 40.55 N. 09.31 E. (See Plan)

DOCUMENTS:

For Maritime Authority:
Arrival Report.
Crew List.
Passenger List.
Ship's Certificates, for sighting.

For Port Health:
Maritime Declaration of Health (2 copies).
Vaccination Certificates, for sighting.

For Customs:
List of Supplies and Engine Stores.
Cargo Manifest, enclosing Bills of Lading.

For Police:
Passenger List (2 copies).
Crew List (2 copies).
Shore Passes for all passengers and crew.

PILOTAGE: Pilots are requested by international code signals – Telegraphic address: Pilot – Olbia, at least 2 hours notice of arrival required. VHF of 15 Watts on pilot boat (Watch on Channel 16 – Working on Channels 6, 9, 12, 14) with service from 0500 hrs. till 0100 hrs. Pilot launch is wooden motor boat of 145 h.p. – speed 12 knots. Pilot boards 1 mile from lighthouse Isola Bocca. Vessels may anchor temporarily to await Pilot.

ANCHORAGE: In the Roads of Golfo Aranci.

RESTRICTIONS: Entrance kept clear for liners.

MAX. SIZE: Max. draft 20 ft.

HEALTH: Before arrival vessel to advise Agents if Free Pratique required, indicating state of health on board.

RADIO: The Port Authority listen on Channel 16 (VHF, range about 30 miles).

TUGS: 1 available, 1,910 h.p. service is optional, tug normally meets vessel in vicinity of Isola Bianca.

CRANES: 1 of 6 tons and 1 of 32 tons on rails in the inner port (at the Benedetto Brin Quay). 3 mobiles of 15 tons, 11.75 tons and 5.7 tons.

STEVEDORES: Agents require ETA 24 hours before arrival in order to arrange gangs.

MEDICAL: Hospital facilities available. Vaccinations and inoculations can be done, except for yellow fever which must be done in Cagliari.

FRESH WATER: Available in inner port and Isola Bianca.

FUEL: Available only by tank truck, subject 2 to 3 days notice.

GANGWAY/DECK WATCHMEN: Service is optional.

OPENING/CLOSING HATCHES: Work is exclusively done by stevedores.

CUSTOMS ALLOWANCES: 40 grammes tobacco per person per day. Not permitted to take tobacco out of the docks. Reasonable amount wine/spirits allowed for normal consumption on board.

IDENTIFICATION CARDS: Shore passes required.

CONSULS: No local representatives.

AIRPORT: Olbia Airport is Olbia – Costa Esmeralda, 3 km. away. Regular services with Rome, Milan, Pisa, Bologna, Cagliari and Nice (this last one in Summertime).

TIME: GMT plus 1 hour. Summertime GMT plus 2 hours from March to September.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Easter Monday; Assumption B. V. Maria (15th August); All Saints' Day (1st November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/AMBULANCE/FIRE: Police, 22380; Ambulance, 22394; Fire, 22222.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Planned to dredge entrance to 10 m. depth.

AUTHORITY: Capitaneria di Porto di Olbia, Viale Isola Bianca, 07026 Olbia, Italy. *Tel:* (0789) 21243, 21637. *Telex:* 792080. *Contact:* F. Lucido, Il Comandante.

ORISTANO, Sardinia: 39.45 N. 08.30. E. (See Plan)

LOCATION: Oristano is situated on the West coast of Sardinia in the Gulf of Oristano. Oristano is the chief town of the province of Oristano and the population is in the region of 29,000.

RESTRICTIONS: Entry/Departure, berthing and unberthing carried out in daylight hours only as the port is not equipped with leading lights or buoys.

MAX. SIZE: Martini Silo Quay – Max. draft 8.5 m.
MI.CHI.SA – Max. draft. 5.0 m.

VHF: Oristano Pilots on Channels 16 and 12.

TUGS: One tug available. Larger vessels require additional tugs which must come from Porto Torres (at high cost).

BERTHING: The port consists of 2 harbours. The outer basin being located between the 2 breakwaters and used for general cargo purposes and the inner basin being the industrial harbour. The manoeuvring area between the outer and inner basin has a diameter of 450 m. and depth of 12 m. The depth of both outer and inner basins is 12 m. The outer basin when completed will have berthing space of 1,240 m. and the inner basin (for industrial traffic) will have 2,500 m.

Soc. Chimica del Tirso: Length of berth 48 m. Berth for discharge of liquid chemicals to industries in Ottana.

Banchina di Servizio: Service berth, length 70 m., for berthing of small vessels.

Banchina Industriale – Canale W-E Silos Mangimi Martini: Length 370 m. Berth for discharging cereals. 2 suction pipes and 2 arms available.

In the near future a plant will be built to produce fodder and animal feed.

Banchina Industriale – Canale W-E – MI. CHI. SA.: Length of berth 69 m. Vessels berth to load bentonite by means of conveyor.

MEDICAL: 2 hospitals with 280 beds.

AIRPORT: Civil airport at Cagliari, Alghera and Olbia (daily connections to Rome, Milan, Naples, Bergamo, Pisa, Turin, Venice and Nice) are only 1 hour's drive from Oristano by car.

SHIPMASTER'S REPORT: 1978.
Oristano Bay has many shallows, none marked with buoys however there is an approach buoy which is presently unlit. A good anchorage was obtained 2.5 miles from the port. The Bay is completely open to the West and with a S.W. to West wind the swell builds up. The Perlite Co. loading berth is a pier and a ship berths across the 'T' end of it, the ship being parallel to the beach. The berthing part itself is 120 ft. long and the loading chute can be raised to a height of 6.5 m. – 6.8 m., depending on tide. A vessel has to move on the pier for loading in different hatches, as the chute has a fixed base. I understand that although at the time there was hardly any swell in Bay, alongside there was considerable movement. The loading rate as quoted by the Agent is 500 t.p.h. Good communications were obtained with link calls on VHF through Cagliari Radio to the Agents. The local Pilot lives in Porto Torres and boards at Torregrande. No VHF communication possible.

A new harbour is being built in the Bay as observed on the ship's radar. This consists of 2 breakwaters and a third breakwater extending at right angles across the entrance, with opening at both ends. In the Southern part of the Bay, there is a no anchoring and fishing area.

In the opinion of the Master the berth is not practical during the Winter months, as delays are caused by swell coming into the port. One vessel was at anchor for 3 days and sailed finally without loading.

SHIPMASTER'S REPORT: January 1979.
Port under construction.

This vessel (LOA 299 ft. Extreme breadth 43 ft. 9 in. draft 16 ft. 10 in.) was the fifth vessel to call at the port. We were unable to obtain Chart 3917 however, Chart 161A together with information given in sailing directions proved sufficient for the vessel to be brought to the anchorage.

Pilotage: The Pilot advises that he wishes to be embarked close to a buoy in position Lat. 39° 53′ N., Long. 08° 31′ E. which is indicated on Chart 3917. The pilot boat is a small open boat and does not have any distinctive marks. This boat would not be suitable for taking out to the 'Gulf' especially with a strong Westerly wind.

The Pilot brings the buoy astern and then proceeds on the course of approximately S.E. directly towards the harbour entrance.

Anchorage: Agent requested vessel to anchor about 2 miles off "Grande Torres".

VHF: Not available.

Radio: The Agent requested an accurate ETA as he makes arrangements for the Pilot and on seeing the vessel at the anchorage notifies the receivers by telex. This is then followed by a written Notice of Readiness of berthing.

Berthing: The grain silo berth is at the North side of "Canale Industriale" at its mid-length. This vessel swung with the aid of the port anchor and berthed starboard side alongside.

The quay is constructed of solid concrete and rises to a height of about 8 ft. above the water level. At the water line there is a ridge of about 9 in. extending along the whole length of the quay. Rubber fenders about 2 ft. in diameter are chained to the face of the quay at approximately 120 ft. intervals.

Once the vessel is alongside and against the fenders, it is protected from the concrete ridge but during berthing it would be possible to land on the projection because of the spacing of the fenders.

Bollards are also approximately 120 ft. apart except for one situated ahead of the vessel which is approximately 150 ft. from the next one aft. They coincide with the fenders.

The breakwater protects the harbour but difficulty may be experienced alongside due to swell following strong winds from a Westerly direction.

Port Facilities: Access to the vessel by road vehicle and fresh water facilities are still to be provided.

Harbour does not appear to provide any fire fighting facilities and when the grain silo is closed there is no telephone available.

It is about 10 miles by car to Oristano and the Agent's office. Half of the journey is by unmade road. There are no ship chandlers or repair facilities available in Oristano. Taxi drivers are reluctant to drive their vehicles over the rough ground and made additional high charges for the journey. The ship's agency was very helpful and went to great lengths to arrange for ship's laundry and to have water delivered to the vessel by truck. They also made some purchase of small items for the vessel.

The port of Oristano is likely to become a large complex and it must be assumed that provision of services to ships will be developed.

SHIPMASTER'S REPORT: March 1984 (Update on January 1979 report).

Our vessel LOA 191 m. arrived with laden draft of 35 ft. 5 in. to discharge a part cargo of 12,000 tonnes of grain.

Pilot station is under construction, but Pilot has (at home) VHF listening on Channel 12. So there is VHF communication with "pilot station".

Anchoring position according to Agent's cable is Lat. 39° 51.2′ N., Long. 08° 28.0′ E. and Pilot informed us by VHF when we were approaching the anchorage not to anchor further East than 1.5 miles from a line joining Cape San Marcos and Cape Frasca lights (due to our deep draft). Finally we anchored in position Lat. 39° 50.2′ N., Long. 08° 28.5′ E.

Pilot boat is still a small open boat with outboard engine, but they were expecting a new fast pilot boat in March 1984.

There is a white and red fairway buoy at approximate position, bearing from Cape S. Marcos light 063° distance 3.5 miles. The following 3 pairs of buoys green and red (red to port entering) and finally 1 red buoy. None of the buoys had lights at the beginning of March 1984.

Therefore entering and leaving the port is permitted only in daylight.

There is a tug stationed at Oristano of about 500 b.h.p., but when large vessels are expected a tug of about 5,000 b.h.p. comes from either Porto Torres or Cagliari. We were told that "large" vessels means more than 5,000 tons gross, but we could not confirm the size information. Naturally we had the assistance of both tugs in mooring and unmooring. The 5,000 b.h.p. tug made fast forward well outside the buoyed channel.

The buoyed channel has minimum depth 13 m. and the depth alongside "Martini" grain pier is 11.5 m., but in charter party draft limitation was 36 ft. SW.

Grain vessels berth port side alongside and when leaving they are swung by tugs and engine just in front of the pier as Canal Maritime is dredged to 11.5 m.

Grain Pier has good fenders but while the head of the vessel is somewhat protected by the silo, the stern is exposed to the strong Northwesterly and Westerly winds and at least 6 stern ropes, 1 breast and 2 springs aft must be passed ashore.

There is a local Shipchandler, but large orders must come from Cagliari.

Fresh water is available but very expensive and only by truck, minimum order 20 tonnes at 25,000 lire per tonne.

A new road of 6 km. connects the port with the town of Oristano.

SHIPMASTER'S REPORT: January 1985.

Vessel, LOA 148 m. Beam 22 m., visited Oristano (Lat. 39° 45′ N., Long. 08° 30′ E.), to unload maize with deepest draft 9.00 m.

Approaching: We reached pilot boarding ground/anchorage safely by steering to sea buoy at the entrance of Oristano Gulf. Sea buoy was recently installed at Lat. 39° 45′ N., Long. 08° 29′ E. (position approx.) but unlit, at night it can easily be detected by radar.

Anchorage: North: Close to sea buoy in 6 m. – 7 m. for light draft vessel. South: Close to sea buoy in 15 m. – 16 m. for deep draft vessel.

Pilotage: Pilotage is compulsory, only one Pilot at this port. ETA notice can be given 2 hours prior to arrival through VHF Channel 12 and Pilot keeps in touch with incoming vessel with his own radio. Pilot usually boards the vessel near the sea buoy and takes ship to harbour along a buoyed channel, which was also recently installed and reached both entrance breakwaters. It was installed according to IALA buoyage system (red to port) but unlit. Entry, departure and (un)berthing was restricted at night time.

Tugs: One tug only available and meets the vessel near the breakwater, ship's line was used. If Master insists on extra tug for berthing/unberthing in heavy weather, 48 hours prior notice is necessary, high cost is imposed as extra tug will come from Port of Cagliari. Master should pay special attention to (un)berthing with one tug, which is too low-powered to control a large vessel.

Manoeuvring:
- (a) Depth: Buoyed channel was dredged to 13 m. and depth of both inner and outer port is 12 m.
- (b) Buoyed channel and entrance breakwater about 200 m. wide and the inner basin entrance is 200 m. wide. Both inner and outer basins have plenty of room for turning around, diameter about 800 m.

General:
- (a) Fresh water can be supplied by truck only.
- (b) Fuel available by truck.
- (c) Provisions and bonded stores can be purchased, ship suppliers provided assorted items, price is very reasonable.
- (d) Cash advance in U.S. currency is restricted to small amounts as bank could not collect too much foreign currency.
- (e) Density 1025.

PALERMO, Sicily: 38.07 N. 13.20 E. (See Plan)

DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Authority Dues.
Vaccination Certificates for sighting.

PILOTAGE: Compulsory for vessels over 499 gross tons. Pilot station keeps listening watch on VHF Channel 12. Pilot joins vessel 1 mile off port entrance. Pilot can be requested by International Code Signals. Pilot station and every Pilot equipped with walkie-talkie VHF set. In case of rough weather pilot boat will be in the bay and will lead ships through port entrance where Pilot will be able to board.

ANCHORAGE: It is advisable to use Pilot for anchoring in Palermo Bay.

RESTRICTIONS: No entry restriction, but there is a daily ferry service from Naples arriving at about 0645 hrs. and sailing at 2030 hrs. and another ferry service four times a week (Monday, Wednesday, Friday and Sunday) arriving at about 1330 hrs. and sailing 1400 hrs. No vessel is allowed to leave or enter the port half an hour before arrival or sailing of these vessels.

MAX. SIZE: Max. draft is up to 44 ft. (13.40 m.) according to the quay. Tankers up to 15 m. draft.

HEALTH: Free Pratique may be requested by radio to "Sanimare", Palermo, between 12 to 6 hours before arrival advising vessel's name, nationality, last port, number of passengers and crew, and state of health on board. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO: Naples Radio, call sign IQH, Roma Radio, call sign IAI, Cagliari Radio, call sign IDC. Palermo Radio, call sign IPP.
VHF: Port Captain listens on Channel 16 from 0800 – 2000 hrs.
TUGS: Four tugs are available with up to 2,400 h.p. Tugs normally join vessel in the bay. Ship's lines are used.
BERTHING:

Pier	*Length*	*Maximum draft*	
	(m.)	*(ft.)*	*(m.)*
Puntone	400	44.0	13.4
S. Lucia – South side	150	37.5	11.4
Calata Marinai d'Italia 1	115	37.5	11.4
Piave – North side	325	37.5	11.4
Piave – East side	85	37.5	11.4
Piave – South side	325	37.5	11.4
Calata Marinai d'Italia 2	110	37.5	11.4
V. Veneto – North side	325	37.5	11.4
V. Veneto – South side	325	27.5	8.4
Calata Marinai d'Italia 3	115	24.5	7.4
Sammuzzo	350	26.0	7.9
Molo South/North end	380	21.0	6.4

There are 6 Ro/Ro terminals and others are planned.

CONTAINER HANDLING FACILITIES: One 30.5 ton container crane (gantry crane) with outreach of 21 m., height of spreader from quay 17.5 m.

One 42 ton container crane (gantry crane) with outreach of 33 m., height of spreader from quay 29.5 m.

One 42 ton container crane (gantry crane) with outreach of 35 m., height of spreader from quay 29.5 m.

Two 35 ton mobile container cranes with outreach of 26 m., height of spreader from quay 27 m.

One self-propelled lift 6 ton crane fitted with spreader.

One self-propelled heavy lift 40 ton crane fitted with spreader.

Three self-propelled heavy lift 31 ton cranes fitted with spreader.

Thirteen tractors; twenty-five trailer-trucks 40 ft. in length.

BULK HANDLING FACILITIES: Silos at Piave Pier with a total capacity of 30,000 metric tons; discharge rate 150 t.p.h.

Warehouses (either bonded or not) and sheds with a total area of 10,000 sq.m. and a total capacity of 72,000 cu.m.

Refrigerated warehouses with a total capacity of 9,000 cu.m.

Tanks for oils and wines (which can also be used for stockage of any other type of liquid products) with a total capacity of 5,000 cu.m., linked to docks by pipe-lines.

Open air areas for over 220,000 sq.m.

CRANES: 8 electric cranes with capacity of 15 tons, max. outreach 25 m. and min. 7 m.

4 mobile cranes with capacities of 13 – 20 metric tons.

STEVEDORES: Gangs arranged through Agent for all goods except containers; engagement of gangs can be done in two ways (option left to Agent):

For "labour by day" (0800 – 1200 hrs. and 1300 – 1700 hrs.), to be ordered at 0730 hrs., 0830 hrs., 0930 hrs., 1030 hrs. to start work respectively at 0800 hrs., 0900 hrs., 1000 hrs., 1100 hrs., and 1230 hrs. to start work at 1300 hrs.

For "shifts labour" (first shift 0800 – 1430 hrs., second shift 1430 – 2100 hrs.), to start work at 0800 hrs. or 1430 hrs. to be ordered respectively at 0730 hrs. and 1230 hrs.

Container handling, (every service, including stevedores) is provided by Ente Autonomo Del Porto (Port Authority) Palermo for two daily shifts (first shift 0700 – 1400 hrs.; second shift 1400 – 2100 hrs.).

Port labour capacity (quantity of goods, except containers, loaded in 8 hours daily work employing all stevedores available:

Fully loaded trucks and vans carried by Ro/Ro ships – 240.

Bulk cargo 1,700 tonnes.

General cargo 700 tonnes.

Port labour capacity for container handling 140 TEU per shift.

MEDICAL: Assistance will be given upon request.
TANKERS:

Oil Products and Crude Oil: Agip. Max. length 185 m., draft 32 ft., 25,000 d.w.t. Tankers drop anchors and are tied up at 2 buoys astern. Discharge rate 200–400 t.p.h.

Esso: Max. draft 15 m., no limitation for length. Vessel drops anchor and ties up at 2 buoys by stern. Discharging rate 600 – 700 t.p.h.

DENSITY: 1025.
FRESH WATER: Available at any quay and in the bay (by hoses or barges) by hose at 70 t.p.h., by barge at 80 t.p.h.
FUEL: Fuel oil, gas oil and marine diesel available at the quays and by barge.
GANGWAY/DECK WATCHMEN: Not compulsory; usually number of watchmen required depends upon the Master.
OPENING/CLOSING HATCHES: Crew usually carry out this operation.
REPAIRS: Any type of repair undertaken. Facilities are provided by Cantieri Navali Riuniti employing over 2,500 workmen. There is a building slip which can take vessels of 250 m. length. The slipway is served by cranes up to 80 tons capacity and which allows handling of prefabricated units up to 140 tons weight.

There is a plate shop capable of machining 150 tons a day and which is equipped with all the latest machinery, drilling and welding units.

The engineering workshops are also equipped with the latest types of machinery enabling total dismantling and re-assembly of engines.

DRY DOCKS: Floating dock, length 285 m., breadth 46 m., suitable for vessels up to 150,000 d.w.t.

Floating dock, length 194 m., breadth 30 m., suitable for vessels up to 31,000 d.w.t.

Graving dock, length 172 m. breadth 28 m., suitable for vessels up to 25,000 d.w.t.

Graving dock, length 370 m. breadth 68 m., suitable for vessels up to 400,000 d.w.t.

Also see "Developments".

CUSTOMS ALLOWANCES: 40 cigarettes and one opened bottle wine/spirits per man.
IDENTIFICATION CARDS: Shore passes given by local police.
TIME: GMT plus one hour. Summertime: March to September, GMT plus 2 hours.
CONSULS: Austria, Belgium, Bolivia, Brazil, Denmark, Finland, France, Germany F.R., Greece, Liberia, Libya, Malta, Monaco, Netherlands, Norway, Panama, Peru, Portugal, Senegal, Spain, Sweden, Tunisia, U.S.A.
AIRPORT: Distance from Punta Raisi Airport is about 20 km. Airport served by regular services.
REPATRIATION: Good facilities exist.
HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April), Easter Monday, Labour Day (1st May), Patron Saint's Day (15th July), Assumption B.V. Maria (15th August), All Saints' Day (1st November), Immaculate Conception Day (8th December), Christmas Day (25th December), Saint Stephen's Day (26th December).

Cargo work can be arranged on 25th April, Easter Monday, 1st November, 8th December, 26th December.

POLICE/AMBULANCE/FIRE: Police, 233333; Ambulance, 231166; Fire, 212222.
TELEPHONES: Available if required.
SHORE LEAVE: Allowed.
DEVELOPMENTS: One drydock under construction for vessels up to 160,000 tons. A terminal for ocean dry bulk cargoes will be operational within 2 years.
AUTHORITY: Ente Autonomo del Porto di Palermo, via Principe di Belmonte i/c, 90139 Palermo. *Tel:* 091-586133. *Telex:* 910377 Eporto. *Cables:* Ente Autonomo Porto – Palermo. *Contact:* Doctor Paolo Cimino, General Manager.

PIOMBINO: 42.56 N. 10.33 E. (See Plan)

PORT LIMITS: Within 1 mile of Breakwater Light.
DOCUMENTS:

3 copies of Crew List.

3 copies List of Passengers in Transit or Disembarking.

1 Customs List, including ship and crew articles (Master is responsible for any excess or shortfall).

1 copy of Manifest and B/L of Cargo Discharging.

1 copy of Manifest for Cargo in Transit.

PILOTAGE: ETA to Agent in local time (GMT plus 1 hour). Summertime March to September (GMT plus 2 hours).

Pilots embark E.S.E. from breakwater light, distance 1 mile or less according to weather conditions. Pilotage usually available at greater distance on request of ship or Agent. Being an open road, care should be taken to provide shelter to Pilot embarking/disembarking facilities, especially in Southerly winds or a swell.

Pilot ladder according to Convention Safety of Life at Sea, and EMPA recommendations.

Southerly gales may prevent Pilot from embarking or even from approaching the ship; in this case pilot boat may guide limited size vessels to sheltered water and then embark Pilot (signals by lamp or by VHF on Channel 12).

Pilotage compulsory for vessels over 500 b.r.t. for entering and leaving the port of Piombino and the port of Tor del Sale (ENEL terminal 2.5 miles East of Piombino) also for shifting in harbour waters.

Pilotage compulsory for all ships directed to anchor in a wide area affected by submarine pipe-lines (see "Anchorage").

Pilot station has 2 Pilot boats fitted with VHF, keeping watch on Channel 12.

Pilots: Corporazione Piloti del Porto di Piombino e Tor del Sale, Piazzale Premuda, 30 – 57025 Piombino (LI). Tel: (0565) 30.535 (Office); 40.580, 30.175, 40.740, 41.345 (Residences).

ANCHORAGE: Outside the harbour, East or S.E. of Breakwater Light, according to size and draft of vessel. Pilotage compulsory for anchoring within a large area situated North of Lat. 42° 53′ N., and East of Long. 10° 32′ E. until Long. 10° 37′ East. A submarine pipe-line has been laid within the said area limits, starting from the coast and running in a Southwesterly direction to the Island of Elba. Anchorage is prohibited within a distance of 0.5 miles from the pipe-line. International signals and marks are yet to be set on the pipe-line; it is expected shore signals and light buoys (2 or 3) will be in position sometime in 1987.

Instructions for anchoring in the whole area are to be requested (compulsory) to the Pilots via VHF Channel 12, pending the setting up of a Vessel Traffic Service which is expected to start in the near future, possibly operated by the Pilotage Authority (see "VTS").

RESTRICTIONS: Berthing of large vessels (50,000 d.w.t. or more) is unadvisable in darkness or bad weather. Southerly gales prevent berthing, also for smaller vessels. Severe Southerly gales may force all ships in harbour to leave berths on account of swell and proceed to sea.

No restrictions on sailing but sometimes necessary to disembark Pilot at Portoferraio (Elba Island, 12 miles). Considerable swell in harbour during gales.

MAX. SIZE: Max. draft 39 ft., length 260 m., no breadth restriction. Can accommodate vessels up to 80,000 d.w.t.
HEALTH: Free Pratique automatic for vessels coming from Continent, "Q" flag not to be flown on entering. From other countries, including Spain and Portugal, usual procedure applies. Not coming from Continent it is possible to request Free Pratique by radio to "Sanimare", Piombino, between 12 to 6 hours before arrival.
RADIO: Civitavecchia or Livorno Radio.
VTS: Vessel Traffic Service is being organised by the pilotage service and will be operated from the ancient Semaphore Station in position: Lat. 42° 55′ 21″ N., Long. 10° 32′ 33″ E. The building is described in Sailing Directions as white with quadrangular tower and signal mast. VTS will furnish information, radar assistance and radar pilotage in the approaches to Piombino, etc.

BERTHING: Deltasider – Piombino (ex-Acciaierie di Piombino). Pier equipped for quick discharging of ore 1,000 tonnes per hour, coal 800 tonnes per hour, scrap, etc. – Berth No. 4 depth 39 ft. Berth No. 3 depth 35 ft. 6 in. Other commercial berths, max. depth 29 ft., equipped with mobile crane 10 tons.

4 berths for Ro-Ro vessels, max. draft 22 ft., max. length 140 m. (priority to vessels of Sardinia Lines). 2 additional Ro-Ro Berths for limited size ferries, reserved for Elba Island traffic (mostly tourists).

STEVEDORES: To enable Agent to order gangs, it is important to radio accurate ETA. Latest time to order gangs: shift 0600 – 1400 hrs., 1700 hrs. day before, shift 2200 – 0600 hrs., 1700 hrs. same day, shift 1400 – 2200 hrs., 1100 hrs. same day. Failure to give precise ETA may result in ship losing 12 – 24 hours, and the cost of the gang not employed.

MEDICAL: Doctor and dentist can attend sick crew. Hospital facilities available.

TANKERS: Oil terminal at Torre del Sale. In the vicinity of Torre del Sale (2.7 miles East of Piombino), a small shelter-harbour has been adapted for supplying the ENEL (National Electricity Board) electric plant with combustible oil. Torre del Sale shelter harbour can accommodate small tankers (up to 2,000 d.w.t.) with draft not exceeding 14 ft. Daylight traffic only with several restrictions for manoeuvring (use of tugs compulsory, wind not exceeding 14 knots, swell no higher than 1.5 m.). Pilotage compulsory and performed by Piombino Pilots with same charges and rules as in Piombino Harbour. VHF Channel 12.

FRESH WATER: Available at any pier, by pipe-line.

FUEL: Available by barge from Livorno.

OPENING/CLOSING HATCHES: Normally carried out by crew (if stevedores, extra charge).

CERTIFICATES:

Certificate of Registry.
Load Line.
Safety Equipment.
Radio Certificate.
Derat Certificate.

CONSULS: No Consuls.

REPAIRS: Small repairs only undertaken.

SURVEYORS: Cargo Inspectors available locally or from Leghorn. Surveyors available.

REPATRIATION: It is posible to arrange repatriation.

HOLIDAYS: Cargo work can be arranged on all official holidays.

BANKS: Monte dei Paschi di Siena, Filiale di Piombino, Corso Italia 77 – 57025 Piombino. Tel: 33021, 35125. Telex: 590195 Paspio I.

Banca Toscana, Filiale di Piombino, Via Lombroso, 9/13 – 57025 Piombino. Tel: 33321. Telex: 590057.

Banca Popolare di Novara, Filiale di Piombino, Via della Repubblica, 7 – 57025 Piombino. Tel: 31345. Telex: 590320 Novbca I. P.O.Box 165.

Cassa di Risparmio di Livorno, Filiale di Piombino, Corso Italia 111 – 57025 Piombino. Tel: 34290.

EMERGENCY CO-ORDINATION CENTRE: Capitaneria di Porto – Livorno. Tel: 21362. Telegraphic address: Compamare, Livorno.

STORING: See "Prelims".

1. By truck.
2. Storing while discharging possible by barge or trucks.
3. Trucks are allowed to proceed to some berths, not all berths.
4. Forklift can be used.
5. Customs Regulations as for all Italian ports.
6. Usually not.

POLICE/AMBULANCE/FIRE: Police 31111 or 32222; Ambulance 36022; Fire 33333; Emergency call (all services) 113.

SHORE LEAVE: Allowed.

AUTHORITY: Ufficio Circondariale Marittimo, Piazzale Premuda 21, Piombino. *Tel:* (0565) 32506. *Contact:* Comandante del Porto.

PORTO EMPEDOCLE: 37.17 N. 13.32 E. (See Plan)

PORT LIMITS: The seaward boundaries of the port at which a vessel is considered to be an "arrived ship" and laytime to commence are regulated by contract.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Maritime Health Declaration.
1 Cargo Manifest.
1 Crew Declaration.
2 Arrival Reports.
1 Store List.

PILOTAGE: Pilotage is compulsory for ships with a gross tonnage of more than 500 tons.

International Code Signals and VHF Channel 16 are used to call Pilot. Pilot station telegraphic address "Corporazione Piloti – Porto Empedocle", Tel: 66035 – The Pilot boat displays International Pilot Signals. The Pilot normally boards about 0.25 miles from the port entrance.

ANCHORAGE: About 1 mile from the red light at the head of the western mole between bearings 90° and 315° in depths of about 10 m.

RESTRICTIONS: No restrictions.

MAX. SIZE: North and East Pier (1st arm): Max. draft 21 ft.

East Pier (2nd arm): Max. draft 28 ft.

HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio Pratique at present.

RADIO: No radio station, however it is possible to call "Capitaneria di Porto" (Harbour Master) operating on frequency of 2182 kHz from 0800 hrs. to 2000 hrs. local time.

VHF: Pilot station on Channel 16 (calling) and 12 (working) continuous. Harbour Master on Channel 16.

RADAR: No radar available.

TUGS: One tug available.

BERTHING: 2 quays with max. draft 21 ft. and 1 pier with max. draft 28 ft. Berths are used for loading salt, fertilisers and general cargo and discharging bulk phosphate.

Salt is loaded at a rate of 300 t.p.h (approx.) at North Pier and 800 t.p.h. (approx.) at East Pier second arm.

CRANES: 1 crane for discharging phosphates. On request it is possible to obtain cranes from outside the port for heavy goods.

SPECIALISED CARGO-HANDLING FACILITIES: The berths are not equipped for handling containers or Ro/Ro traffic. Only small quantities of chemical liquid for local industries are handled.

BRIDGES: No bridges.

STEVEDORES: There are 2 ordering times each day. The first at 0730 hrs. and the second at 1230 hrs. It is possible to order gangs outside normal working hours through ship's Agent.

MEDICAL: All facilities available. Nearest Hospital is located at Agrigento, 5 km. away.

TANKERS: No tanker facilities.

DENSITY: Salt water.

FRESH WATER: Only small quantities supplied by tank truck.

FUEL: Small quantities supplied by tank truck.

CONSULS: None.

REPAIRS: Small repairs only undertaken.

DRY DOCKS: None.

SURVEYORS: Registro Italiano Navale (R. I. Na. Agent).

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew, can be done by stevedores on request.

CUSTOMS ALLOWANCES: 40 grammes of tobacco per man. Normal daily consumption wine/spirits allowed.

CARGO GEAR: Shore gear normally used for discharging. Ship's gear used for loading phosphates.

REPATRIATION: Can be arranged through Agents.

AIRPORT: Palermo approx. 170 km., Catania approx. 200 km. Daily flights to main Italian airports.

TIME: GMT plus 1 hour. Summer time (between 29th March to 26th September) clocks advanced 1 hour.

HOLIDAYS: All Sundays, 1st January, 25th April, Easter Monday, 1st May, 15th August, 25th December (Christmas Day), 26th December, All Saints Day (1st November), Victory Day (4th November), Patron Saints (25th or 26th February).

POLICE/FIRE/AMBULANCE: Police: Tel: 66044-66124.

Fire Brigade: Agrigento Tel: 26102-20222.

Ambulance: Tel: by day 66600; by night 66858.

TELEPHONES: No telephones available for placing on board.

SERVICES: No tank-cleaning equipment, no facilities for discharge of tank-washings, no compass adjusting etc.

SHORE LEAVE: Allowed. Shore passes are issued by Immigration.

AUTHORITY: Capitaneria di Porto – Porto Empedocle, Via Gioieni 55, Porto Empedocle, Italy. *Tel:* (0923) 66640 – 68420. *Cables:* Compamare Porto Empedocle. *Contact:* Harbour Master.

PORTO TORRES (Sassari): 40.51 N. 08.24 E.

DOCUMENTS:

4 Crew Lists.
1 Passenger List.
1 Maritime Health Declaration.
1 Arrival Report.
1 Crew Declaration.

PILOTAGE: International Code Signals are used to call Pilot. Pilot station telegraphic address, Corpo Piloti Porto Torres, tel. P. Torres 514936. The pilot boats carry international pilot signals. The Pilot normally boards about 1 mile from port entrance. On request, vessel can be boarded 3 miles off port entrance. Also see "VHF".

ANCHORAGE: About 1 mile from the green light on head of West Mole in depths of 25 m.

RESTRICTIONS: The oil terminal is exposed to winds and swell from N.W. to N.E. Heavy N.E. swell may delay berthing of larger vessels. Vessels should be ready to leave the berth if necessary due to adverse weather conditions.

MAX. SIZE: Inner Port: Length 120 m., draft 7 m. Outer Port: Length 150 m., draft 8 m. West Mole: Length 150 m., draft 8 – 10 m.

ANIC Terminal: Pier A, length no limit, draft 9 m. Pier B, length no limit, draft 12 m. Pier C, length no limit, draft 15 m. Pier E, length no limit, draft 8 m.

HEALTH: Pratique is given by the Port Medical Officer who boards all vessels coming from foreign ports. No Radio Pratique at present. Pratique not required for vessels arriving from Common Market countries.

RADIO: Coastal radio station, Porto Torres Radio P.T., call sign "IZN", operating on 2182 kHz. A continuous service.

VHF: Pilots work on Channel 12. Launch service from anchorage to Oil berths work on Channel 6. It is also possible to call Porto Torres Radio on VHF Channel 16 (Calling and Safety), with continuous service on Channels 25, 26 and 27.

Captain of the Port on VHF Channels 16, 12, and 9 and 14 from 0800 – 2000 hrs.

TUGS: Join vessel about 0.5 mile from port or from ANIC Piers. Ship's lines normally used. 3 tugs available.

BERTHING: Tankers are only permitted to berth between sunrise and sunset, but may unberth at any time.

Dry-cargo vessels may enter at any time.

There are two ports, viz. New Port and Old Port. The New Port is comprised of the ANIC Jetty, and the Old Port is that area bounded by the East and West Breakwater Moles, within which are the Inner and Outer Harbours. The Inner Harbour is composed of the general cargo wharves which have in service electrical cranes up to 10 tons capacity. The Outer Harbour has oil berths at the West Mole, and general cargo berths at the East Mole in depths of up to 8.23 m.

STEVEDORES: There are two ordering times each day. The first at 0800 hrs. and the second at 1330 hrs. It is possible to order gangs outside normal working hours through ship's Agents.

TANKERS: *New Port,* consisting of the ANIC Jetty with Berths A, B, C and E and depths of water varying to allow ship drafts of between 9 m. and 15 m.

There are two lines of 20 in. and 10 in. diameter for deballasting ashore.

Old Port, the West Mole which forms the seaward limit of the (Outer) port has tanker berths in a depth of 7 m.

MEDICAL: All facilities available. Nearest hospital located at Sassari, 18 km. away.

DENSITY: Salt water.

FRESH WATER: Can be supplied in limited quantities to vessels in port and in the roads. All berths are fitted with fresh-water connections, but supply is unreliable due scarcity. Advance notice is required for deliveries by barge or from tugs.

FUEL: All grades available by pipe-line at ANIC piers. Elsewhere, can be supplied by barge, subject advance notice of 12 hours.

GANGWAY/DECK WATCHMEN: Authorised shore service available.

OPENING/CLOSING HATCHES: Normally done by crew, can be done by stevedores on request.

CUSTOMS ALLOWANCES: 40 grammes tobacco per man. Normal daily consumption wine/spirits allowed.

IDENTIFICATION CARDS: Not required.

CONSULS: No local consular representation. French and Costa Rican Consuls in Sassari.

REPAIRS: Only minor repairs can be effected locally.

REPATRIATION: Can be arranged through Agents.

AIRPORT: Nearest at Alghero-Fertilia, 34 km. away. Daily flights to main Italian cities.

TIME: GMT plus 1 hour. Summer-time, clocks advanced 1 hour between 29th March and 26th September.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); Liberation Day (25th April); Labour Day (1st May); Patron Saint (22nd May); Easter Day, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: Police tel. 514888; Fire, 31421; Ambulance, 54973. Sassari Fire Brigade, tel. 270521; Sassari Ambulance, tel. 242124.

SHORE LEAVE: Allowed. Shore passes are issued by Immigration.

AUTHORITY: Capitaneria di Porto di Porto Torres, Porto Torres, Italy. *Tel:* (079) 502258, 502159. *Telex:* 792091. *Cables:* Compamare Porto Torres. *Contact:* Giorgio Maria Pompei, Port Captain.

PORTO VESME (Sardinia): 39.11 N. 08.23 E.

(See Plan)

LOCATION: Porto Vesme Harbour is located on the S.W. coast of Sardinia (Lat. 39° 11′ 5″ N., Long. 08° 23′ 5″ E.) in the district of Portoscuso. The harbour was built exclusively to serve the Porto Vesme Industrial Complex.

Porto Vesme is an artificial harbour sheltered by two breakwaters, the one to the North giving protection against N.W. sea and the other to the South giving protection against South and S.W. seas (see "Plan"). The harbour is managed by the Sant'Antioco Maritime District Office which maintains a local branch office at Porto Vesme for this purpose.

DOCUMENTS: See "Genoa".

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t.; mooring party services are compulsory for vessels over 400 g.r.t.

The Pilotage Authority for the area is at Sant'Antioco and is equipped with a VHF radio station. A pilot motor boat, equipped with VHF radio, is stationed at Porto Vesme and is utilised for ferrying Pilots to and from ships. As a rule, Pilot services should be requested by ship's Agents, through the local branch of the Maritime District Office. Urgent requests can be made, however, directly by telephone or by VHF to the S. Antioco Pilotage Authority.

APPROACHES: The entrance channel to the harbour mouth is marked by 2 pairs of light beacons and 1 pair of light buoys and has been dredged to a depth of 14 m. (45 ft. 11 in.) along its entire length. The manoeuvring area within the harbour and the sea area alongside the Eurallumina Wharf have been dredged to a depth of 13 m. (42 ft. 8 in.).

ANCHORAGE: Small and medium-size vessels generally anchor in the area off Ghinghetta Rock (Lat. 39° 11′ N., Long. 08° 22′ E.) just outside the harbour approach channel, where depths vary from 12 m. to 20 m. (Area "A", see "Plan").

Deep-draft vessels usually prefer to await the Pilot or to anchor 2.5 miles North of Isola Piana (Lat. 39° 14′ N., Long 08° 19′ E.) (Area "B"). During settled weather periods, large-size vessels also tend to anchor off Ghinghetta Rock (Area "A"); should S.W. or N.W. gales rise while large size ships are riding at anchor in this area waiting to berth, Masters usually weigh anchor and lie either in the Gulf of Palmas (Area "C") or on the Southern side of the Island of San Pietro (Area "D"). From these anchorages, ships can subsequently either pick up the Pilot and proceed directly to port or return to ride at anchor off Ghinghetta Rock or Isola Piana.

MAX. SIZE: Max. Draft 12.0 m.

RADIO/VHF:

Station	*Mode*	*Remarks*
Cagliari Radio	Radiotelegraphy Radiotelephony VHF	Italian Post and Telegraph, available to the general public
Sant'Antioco & Carloforte Maritime District Offices	Radiotelephony 2182 kHz VHF: Channels 16 and 14	For Safety at Sea only
Sant'Antioco Pilot Office	VHF: Channel 12	
Pilot Boat, Porto Vesme	VHF: Channel 12	
Harbour tug, Porto Vesme	Radiotelephony 2182 kHz VHF: Channel 6	

TUGS: A 1,000 h.p. tug, equipped with VHF radio, is stationed permanently at Porto Vesme Harbour; if necessary additional tugs can be brought in from Cagliari Port, provided that sufficient warning is given to the ship's Agent.

BERTHING: *Mooring Operations:* A mooring service equipped with a motor boat, is available at Porto Vesme Harbour to assist ships to berth and unberth; this service can be requested either (i) through local ship Agents or the Pilotage Authority, or (ii) directly. All ships at anchor in the roadstead can contact their Agents by radio or by radio-telephone through the Italian Post Office radio-telephone network. At the same time, the Sant'Antioco Pilotage Authority, the pilot boat and the tug stationed at Porto Vesme Harbour can also be contacted directly by VHF radio or by radio-telephone for any details concerning anchorage points, estimated time of berthing or departure, and any other information relevant to ship's manoeuvre or safety while in the roadstead or at berth.

Eurallumina Wharf: The Eurallumina Wharf is provided with 2 berths.

Northern Berth: It is intended for unloading bauxite and caustic soda bulk cargoes. This berth can accommodate ships up to 92,000 d.w.t., drawing up to 12 m. (39 ft. 4 in.)

Depth alongside berth	:	13.0 m. (42 ft. 8 in.)
Length of berth	:	250 m.
Bauxite unloader	:	One "Kocks" unloader with liftable jib
Maximum free digging rate	:	Up to 1,200 tonnes/p.h.
Travel range of unloader along the wharf	:	19.5 m.
Maximum travel range of grab	:	24.50 m. from edge of wharf fenders
Maximum height of grab, in "open" position	:	17.70 m. above sea level
Operative height	:	15 m.
Minimum height of grab, in "open" position	:	10 m. below sea level

Note: It is necessary that the maximum height of the hatches coamings above sea level is kept below 14 m. during unloading operations.

Southern Berth: It is intended for loading of alumina bulk cargoes and for unloading of caustic soda bulk cargoes. This berth can accommodate ships up to 32,000 d.w.t. drawing up to 12 m. (39 ft. 4 in.).

Depth alongside berth	:	13 m. (42 ft. 8 in.)
Length of berth	:	200 m.
Alumina loader	:	One "Claudius Peters" loader with liftable and swivelling arm.
Maximum loading rate	:	Up to 1,000 tonnes/p.h.
Travelling range of loader along the wharf	:	143.5 m.
Maximum height of the loading cone	:	9.50 m. above sea level
Minimum height of loading cone	:	10 m. below sea level
Maximum extension of the loading cone from the outer side of the fenders	:	23 m.
Stowage factor of alumina in bulk	:	1 cu.m.p.tonne (36 cu.ft./long ton)

Note: It is necessary that the maximum height of the hatches coamings above sea level is kept below 9.50 m. during loading operations.

Both berths are equipped with a flexible pipe – 6 in. in diameter with ASA 150 flanges – for connection to the tanker manifolds to unload caustic soda. All ships must be equipped in order to allow the connection of the above pipe.

A dock booster station is equipped with:

1 booster pump of 275 cu.m.p.h
1 booster pump of 125 cu.m.p.h.

Any of these pumps can be switched on as an aid to the ship's pumps.

Departure: Ships are requested to leave their berths immediately after completion of unloading/loading operations. The Eurallumina Wharf Superintendent may allow extra time at berth, provided that the delay is compatible with the wharf schedule.

Operating Hours: The wharf is operated on a continuous basis, day, night, 7 days a week (holidays included).

Damage: Should damage be caused to the ship by Eurallumina loading/unloading equipment, during unloading of bauxite and caustic soda or loading of alumina, the ship's crew is requested to deliver immediately a "damage report" to Eurallumina's shift foreman on duty to debate the claim as necessary.

TANKERS: See "Berthing".

FUEL: Not available.

FRESH WATER: Available, but in short supply. Preferably vessels should arrive with sufficient water on board in order to avoid the heavy charges incurred in deliveries by tank lorries.

AIRPORT: Elmas, the airport of Cagliari, is only 1 hour by car from Porto Vesme Harbour and is connected to the major international airports on the mainland by several regular daily flights.

TIME: Local time at Porto Vesme harbour is GMT plus 1 hour, i.e. Central European Time. Summertime (GMT plus 2 hours) starts and ends, according to relevant EEC schedules.

WEATHER: *Tides:* Here, as elsewhere in the Mediterranean, the tidal range is very small; the highest tide is only 0.3 m. above the MLWS.

Currents: Since tidal currents are non-existent along the coast, the currents are exclusively wind and/or wave induced.

Wind: Prevailing wind directions are (in order of frequency): N.W. ("Maestrale", 4th quadrant) S.S.E. and E. ("Scirocco" and "Levante", 2nd quadrant) and S.W. ("Libecco", 3rd quadrant); maximum recorded wind speed: 55 knots from the N.W. direction ("Maelstrale").

Visibility: Normally excellent; during the hot Summer months, visibility may occasionally be reduced by early morning mists.

Weather-Temperature: The ambient temperature practically never drops to 0°C during the winter months and rarely exceeds 32°C during the Summer; permanent breezes in the San Pietro Channel mitigate the heat of the Summer. Relative humidity is normally 60-70%; peak values of 100% high and 20% low have been recorded, but are extremely infrequent.

The yearly rainfall varies from a minimum of 350 mm. to a maximum of 500 mm.; rainy periods are more prevalent in Autumn and Winter and at the beginning of Spring.

More detailed information can found either in Italian Sailing Directions or in those issued by other maritime countries.

GENERAL: The town of Portoscuso, situated 1 km. to the North of harbour, has both telegraph and public telephone facilities linked to the national and international telegraph and telephone networks. Excellent roads connect Portoscuso to the nearby mining town of Iglesias and Carbonia; both Iglesias and Carbonia are within easy driving distance of Porto Vesme Harbour and have hospital facilities and local branches of central government departments.

Safety Provisions: The Pilot assisting a ship for berthing at the Eurallumina wharf will give the ship's Master any local navigational information which may be required for bringing the vessel safely into port and for docking it securely alongside the wharf; the wharf is provided with numerous bollards and is protected with rugged fenders.

The ship must be well secured to the wharf according to standard nautical practice and made fast with ropes of adequate strength and in good order.

Since the local Maritime District Office is not in a position to issue regular gale/storm warnings, Masters are advised to rely on their ship's radio for weather forecasts so that, in the event of a gale warning, sufficient time will be available for them to take the necessary steps to avoid damage to the ship, to the wharf, or to port installations.

Derricks, cranes, and any other hoisting equipment on board must be stowed so as not to interfere with unloading or loading operations; derricks shall not be lowered on the side facing the wharf. On request, the ship's hoisting equipment will be placed (fully manned) at the disposal of Eurallumina.

The ship's deck and holds must be adequately illuminated after dark, so that loading and unloading of ship's equipment (grab bucket, power shovel, hose connections) can be operated correctly and so that personnel shovelling away and sweeping up bauxite in the hold and on deck may work safely and efficiently.

All access to the wharf by truck or by any other means of transport for the loading and unloading of ship's store or equipment is subject to clearance beforehand by the Wharf Superintendent and will only be permitted if the presence of vehicles on the wharf does not in any way interfere with cargo operations.

Access to and from the ship and/or wharf will normally be restricted to the ship's gangway. The gangway, which should be run out immediately after berthing, must be easily accessible at all times, safe for public use, and adequately illuminated at night. If the ship's gangway is not hinged at the root, it must be equipped with an auxiliary footbridge of about 4 m. at the lower end to reach the wharf over the fenders.

It is remembered that spills, splashes or puddles of caustic soda could be found on the wharf during the unloading operations of the product, and be a danger to people.

All persons entering the wharf area are requested to follow the marked pedestrian throughways and to keep away from any equipment which may be operating at the time, or from caustic manifolds. If, for any reason, it should prove necessary to board the ship by passing through the cordoned-off area, all possible precautions must be taken to avoid accidents and/or damage and also to avoid treading on bauxite or alumina or caustic spillages.

The Eurallumina Wharf is equipped with a built-in fire extinguishing system which, if necessary, can also be used by ships lying at berth.

On the wharf, 2 safety anti-caustic showers and 2 eye-washing devices are available; they are easily identified by green ever-lighted lamps and red painting

SHIPMASTER'S REPORT: 1975 (Updated 1984).

Harbour: The harbour is protected by two moles between which there is a wharf. A channel marked by buoys leads to the entrance.

Documents: On arrival the following documents are required.

Declaration of Health.
2 Crew Lists.
1 Copy of last Port Clearance.
1 Copy Vaccination List.
2 Store Lists.
2 Personal Effects Lists.
1 Valid Derat Certificate.
All other ship's documents.

Radio Pratique: Unavailable.

Pilotage: For ships arriving the Pilot boards at 39° 14′ N., 08° 19′ E., but in severe North-Easterly gales the Pilot will board in Palmas Bay, position 39° 00′ N., 08° 30′ E. When leaving Port the Pilot leaves the ship abeam of Ghingetta Is., 3 cables off, position 39° 11′ 05″ N., 08° 22′ 25″ E. There is no pilot vessel, the Pilot boards from a tug.

Radio: Cagliari (IDC). No VHF service for pilotage.

Tugs: Two permanent tugs of 1,750 h.p. are operating and other tugs are available from Cagliari when necessary, and advising 4 days before ship's ETA.

Mooring Boat: Available.

Depths of Water:

In the Channel	14 m.
Eurallumina Quay	13 m.
Alsar Pier	8.5 m.
Trade Quay	8.25 m.

Berthing: Eurallumina Quay (unloading point of bauxite vessels). Length 442 m. Height on surface of water 3.6 m. Large rubber sprung fenders 150 ft. apart are fixed to the quay. Double bollards 150 ft. apart.

Vessels using this quay usually berth starboard side to using the port anchor which is let go well off the berth.

Bauxite Discharging Rate: 15,000 tonnes/day. Discharging by grab.

Fresh Water: Available at the Trade Quay by tank cars. At Eurallumina Quay available at 15 cu.m./hr. (Boiler water only). No fresh water available at Alsar Pier.

Bunkers: Available by barge from Sarroch, about 70 miles from Porto Vesme.

Repairs: Limited minor repairs only and giving notice by radio. For Radio and Radar available at Cagliari.

Ship Chandler: Available advising Agent.

Consuls: No foreign representation.

Laundry: Available advising Agent.

Provisions: Fresh foods available but notice must be given immediately on arrival.

Airport: Cagliari about 90 km. from Porto Vesme. International schedule flights and domestic flights over the Italy Area.

Medical: Qualified doctors available ashore and also equipped hospitals. In emergency doctor will board ship.

Repatriation: Arrangements must be made with Agent in advance by cable or immediately on arrival.

SHIPMASTER'S REPORT: December 1984.

Porto Vesme is the name of the port and industrial complex. The local town is called Porto Scuso which may be better known to postal and telephone authorities.

Pilotage: Black pilot launch with VHF. Pilot carries portable VHF.

In strong N.W. winds Pilot requests vessels remain stationary, at pilot station, for boarding. Pilot disembarks West of Ghingetta Island, heading 340° using starboard side ladder.

Max. Size: Eurallumina Quay: Up to 12 m. draft permitted. (December 1984).

Tugs: One tug, nominal 1,400 h.p., is available at Porto Vesme. Other tugs available on order from Cagliari, etc.

Berthing: Very active rolling on Eurallumina Quay, fenders effective but strip all paint from hull. Local ships insert rubber tyres between ship and wooden faces of fenders. Long leads required on mooring lines to prevent breaking while rolling.

Fenders project at least 2 m. from wharf face, very difficult to swing gangway ashore causing delay. A brow may be more easily placed at first. Gangway or brow must have efficient rollers on ground.

AUTHORITY: Officio Locale Marittimo, Molo Centrale, Porto Vesme (Portoscuso-Cagliari), Sardinia, Italy. *Tel:* 0781-509114. *Cables:* Locamare Portoscuso. *Contact:* Harbour Master.

QUILIANO TERMINAL: 44.17 N. 08.28 E. (See Plan)

LOCATION: Terminal is located in Vado Ligure Bay in approx. Lat. 44° 16′ 48″ N., Long. 08° 27′ 42″ E. between Savona Harbour and Capo Vado.

DOCUMENTS:

2 copies Store List.
2 copies Curios List.
8 copies Crew List.
4 copies Passenger List.
Clearance, not required.
1 copy Cargo Manifest.
Health Declaration. International Health Form to be filled out by Master on arrival.

Consignee Papers:

Bills of Lading (original and copy).
Certificate of Origin (original and copy).
Ullages report at the loading port.

PILOTAGE: Also see "Mooring".

Pilotage is compulsory. Vessels proceeding to the terminal must call off Savona Harbour to pick up Pilot.

Pilot station is located 2 miles off Savona Harbour breakwater in position approx. Lat. 44° 17′ 00″ N., Long. 08° 30′ 30″ E. and maintains VHF radio-telephone service (Channel 13).

Vessels are requested to have a proper pilot ladder securely rigged and long enough to reach the pilot launch; during night-time, adequate light must be rigged overboard for the Pilot to approach the side of the vessel and safely climb the ladder.

Vessels partially loaded must have the pilot ladder rigged in conjunction with the accommodation ladder.

When the vessel is berthed, the Port Authorities require the accommodation ladder on the starboard side.

BERTHING: Tankers are only permitted to berth between sunrise and sunset, but may unberth at any time.

Dry-cargo vessels may enter at any time.

There are two ports, viz. New Port and Old Port. The New Port is comprised of the ANIC Jetty, and the Old Port is that area bounded by the East and West Breakwater Moles, within which are the Inner and Outer Harbours. The Inner Harbour is composed of the general cargo wharves which have in service electrical cranes up to 10 tons capacity. The Outer Harbour has oil berths at the West Mole, and general cargo berths at the East Mole in depths of up to 8.23 m.

STEVEDORES: There are two ordering times each day. The first at 0800 hrs. and the second at 1330 hrs. It is possible to order gangs outside normal working hours through ship's Agents.

TANKERS: *New Port,* consisting of the ANIC Jetty with Berths A, B, C and E and depths of water varying to allow ship drafts of between 9 m. and 15 m.

There are two lines of 20 in. and 10 in. diameter for deballasting ashore.

Old Port, the West Mole which forms the seaward limit of the (Outer) port has tanker berths in a depth of 7 m.

MEDICAL: All facilities available. Nearest hospital located at Sassari, 18 km. away.

DENSITY: Salt water.

FRESH WATER: Can be supplied in limited quantities to vessels in port and in the roads. All berths are fitted with fresh-water connections, but supply is unreliable due scarcity. Advance notice is required for deliveries by barge or from tugs.

FUEL: All grades available by pipe-line at ANIC piers. Elsewhere, can be supplied by barge, subject advance notice of 12 hours.

GANGWAY/DECK WATCHMEN: Authorised shore service available.

OPENING/CLOSING HATCHES: Normally done by crew, can be done by stevedores on request.

CUSTOMS ALLOWANCES: 40 grammes tobacco per man. Normal daily consumption wine/spirits allowed.

IDENTIFICATION CARDS: Not required.

CONSULS: No local consular representation. French and Costa Rican Consuls in Sassari.

REPAIRS: Only minor repairs can be effected locally.

REPATRIATION: Can be arranged through Agents.

AIRPORT: Nearest at Alghero-Fertilia, 34 km. away. Daily flights to main Italian cities.

TIME: GMT plus 1 hour. Summer-time, clocks advanced 1 hour between 29th March and 26th September.

HOLIDAYS: New Year's Day (1st January); Epiphany (6th January); Liberation Day (25th April); Labour Day (1st May); Patron Saint (22nd May); Easter Day, Ascension Day, Corpus Domini (variable date); Proclamation Day (2nd June); St. Peter and St. Paul (29th June); Assumption B. V. Maria (15th August); All Saints' Day (1st November); Victory Day (4th November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December).

POLICE/FIRE/AMBULANCE: Police tel. 514888; Fire, 31421; Ambulance, 54973. Sassari Fire Brigade, tel. 270521; Sassari Ambulance, tel. 242124.

SHORE LEAVE: Allowed. Shore passes are issued by Immigration.

AUTHORITY: Capitaneria di Porto di Porto Torres, Porto Torres, Italy. *Tel:* (079) 502258, 502159. *Telex:* 792091. *Cables:* Compamare Porto Torres. *Contact:* Giorgio Maria Pompei, Port Captain.

PORTO VESME (Sardinia): 39.11 N. 08.23 E.

(See Plan)

LOCATION: Porto Vesme Harbour is located on the S.W. coast of Sardinia (Lat. 39° 11′ 5″ N., Long. 08° 23′ 5″ E.) in the district of Portoscuso. The harbour was built exclusively to serve the Porto Vesme Industrial Complex.

Porto Vesme is an artificial harbour sheltered by two breakwaters, the one to the North giving protection against N.W. sea and the other to the South giving protection against South and S.W. seas (see "Plan"). The harbour is managed by the Sant'Antioco Maritime District Office which maintains a local branch office at Porto Vesme for this purpose.

DOCUMENTS: See "Genoa".

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t.; mooring party services are compulsory for vessels over 400 g.r.t.

The Pilotage Authority for the area is at Sant'Antioco and is equipped with a VHF radio station. A pilot motor boat, equipped with VHF radio, is stationed at Porto Vesme and is utilised for ferrying Pilots to and from ships. As a rule, Pilot services should be requested by ship's Agents, through the local branch of the Maritime District Office. Urgent requests can be made, however, directly by telephone or by VHF to the S. Antioco Pilotage Authority.

APPROACHES: The entrance channel to the harbour mouth is marked by 2 pairs of light beacons and 1 pair of light buoys and has been dredged to a depth of 14 m. (45 ft. 11 in.) along its entire length. The manoeuvring area within the harbour and the sea area alongside the Eurallumina Wharf have been dredged to a depth of 13 m. (42 ft. 8 in.).

ANCHORAGE: Small and medium-size vessels generally anchor in the area off Ghinghetta Rock (Lat. 39° 11′ N., Long. 08° 22′ E.) just outside the harbour approach channel, where depths vary from 12 m. to 20 m. (Area "A", see "Plan").

Deep-draft vessels usually prefer to await the Pilot or to anchor 2.5 miles North of Isola Piana (Lat. 39° 14′ N., Long 08° 19′ E.) (Area "B"). During settled weather periods, large-size vessels also tend to anchor off Ghinghetta Rock (Area "A"); should S.W. or N.W. gales rise while large size ships are riding at anchor in this area waiting to berth, Masters usually weigh anchor and lie either in the Gulf of Palmas (Area "C") or on the Southern side of the Island of San Pietro (Area "D"). From these anchorages, ships can subsequently either pick up the Pilot and proceed directly to port or return to ride at anchor off Ghinghetta Rock or Isola Piana.

MAX. SIZE: Max. Draft 12.0 m.

Harbour tug, Porto Vesme	Radiotelephony 2182 kHz VHF: Channel 6	

TUGS: A 1,000 h.p. tug, equipped with VHF radio, is stationed permanently at Porto Vesme Harbour; if necessary additional tugs can be brought in from Cagliari Port, provided that sufficient warning is given to the ship's Agent.

BERTHING: *Mooring Operations:* A mooring service equipped with a motor boat, is available at Porto Vesme Harbour to assist ships to berth and unberth; this service can be requested either (i) through local ship Agents or the Pilotage Authority, or (ii) directly. All ships at anchor in the roadstead can contact their Agents by radio or by radio-telephone through the Italian Post Office radio-telephone network. At the same time, the Sant'Antioco Pilotage Authority, the pilot boat and the tug stationed at Porto Vesme Harbour can also be contacted directly by VHF radio or by radio-telephone for any details concerning anchorage points, estimated time of berthing or departure, and any other information relevant to ship's manoeuvre or safety while in the roadstead or at berth.

Eurallumina Wharf: The Eurallumina Wharf is provided with 2 berths. *Northern Berth:* It is intended for unloading bauxite and caustic soda bulk cargoes. This berth can accommodate ships up to 92,000 d.w.t., drawing up to 12 m. (39 ft. 4 in.)

Depth alongside berth	: 13.0 m. (42 ft. 8 in.)
Length of berth	: 250 m.
Bauxite unloader	: One "Kocks" unloader with liftable jib
Maximum free digging rate	: Up to 1,200 tonnes/p.h.
Travel range of unloader along the wharf	: 19.5 m.
Maximum travel range of grab	: 24.50 m. from edge of wharf fenders
Maximum height of grab, in "open" position	: 17.70 m. above sea level
Operative height	: 15 m.
Minimum height of grab, in "open" position	: 10 m. below sea level

Note: It is necessary that the maximum height of the hatches coamings above sea level is kept below 14 m. during unloading operations.

Southern Berth: It is intended for loading of alumina bulk cargoes and for unloading of caustic soda bulk cargoes. This berth can accommodate ships up to 32,000 d.w.t. drawing up to 12 m. (39 ft. 4 in.).

Depth alongside berth	: 13 m. (42 ft. 8 in.)
Length of berth	: 200 m.
Alumina loader	: One "Claudius Peters" loader with liftable and swivelling arm.
Maximum loading rate	: Up to 1,000 tonnes/p.h.
Travelling range of loader along the wharf	: 143.5 m.
Maximum height of the loading cone	: 9.50 m. above sea level
Minimum height of loading cone	: 10 m. below sea level
Maximum extension of the loading cone from the outer side of the fenders	: 23 m.
Stowage factor of alumina in bulk	: 1 cu.m.p.tonne (36 cu.ft./long ton)

Note: It is necessary that the maximum height of the hatches coamings above sea level is kept below 9.50 m. during loading operations.

Both berths are equipped with a flexible pipe – 6 in. in diameter with ASA 150 flanges – for connection to the tanker manifolds to unload caustic soda. All ships must be equipped in order to allow the connection of the above pipe.

A dock booster station is equipped with:

1 booster pump of 275 cu.m.p.h.
1 booster pump of 125 cu.m.p.h.

Any of these pumps can be switched on as an aid to the ship's pumps.

Departure: Ships are requested to leave their berths immediately after completion of unloading/loading operations. The Eurallumina Wharf Superintendent may allow extra time at berth, provided that the delay is compatible with the wharf schedule.

Operating Hours: The wharf is operated on a continuous basis, day, night, 7 days a week (holidays included).

Damage: Should damage be caused to the ship by Eurallumina loading/unloading equipment, during unloading of bauxite and caustic soda or loading of alumina, the ship's crew is requested to deliver immediately a "damage report" to Eurallumina's shift foreman on duty to debate the claim as necessary.

TANKERS: See "Berthing".
FUEL: Not available.
FRESH WATER: Available, but in short supply. Preferably vessels should arrive with sufficient water on board in order to avoid the heavy charges incurred in deliveries by tank lorries.
AIRPORT: Elmas, the airport of Cagliari, is only 1 hour by car from Porto Vesme Harbour and is connected to the major international airports on the mainland by several regular daily flights.
TIME: Local time at Porto Vesme harbour is GMT plus 1 hour, i.e. Central European Time. Summertime (GMT plus 2 hours) starts and ends, according to relevant EEC schedules.
WEATHER: *Tides:* Here, as elsewhere in the Mediterranean, the tidal range is very small; the highest tide is only 0.3 m. above the MLWS.
Currents: Since tidal currents are non-existent along the coast, the currents are exclusively wind and/or wave induced.
Wind: Prevailing wind directions are (in order of frequency): N.W. ("Maestrale", 4th quadrant) S.S.E. and E. ("Scirocco" and "Levante", 2nd quadrant) and S.W. ("Libecco", 3rd quadrant); maximum recorded wind speed: 55 knots from the N.W. direction ("Maestrale").
Visibility: Normally excellent; during the hot Summer months, visibility may occasionally be reduced by early morning mists.
Weather-Temperature: The ambient temperature practically never drops to 0°C during the winter months and rarely exceeds 32°C during the Summer; permanent breezes in the San Pietro Channel mitigate the heat of the Summer. Relative humidity is normally 60-70%; peak values of 100% high and 20% low have been recorded, but are extremely infrequent.

The yearly rainfall varies from a minimum of 350 mm. to a maximum of 500 mm.; rainy periods are more prevalent in Autumn and Winter and at the beginning of Spring.

More detailed information can found either in Italian Sailing Directions or in those issued by other maritime countries.

GENERAL: The town of Portoscuso, situated 1 km. to the North of harbour, has both telegraph and public telephone facilities linked to the national and international telegraph and telephone networks. Excellent roads connect Portoscuso to the nearby mining town of Iglesias and Carbonia; both Iglesias and Carbonia are within easy driving distance of Porto Vesme Harbour and have hospital facilities and local branches of central government departments.
Safety Provisions: The Pilot assisting a ship for berthing at the Eurallumina wharf will give the ship's Master any local navigational information which may be required for bringing the vessel safely into port and for docking it securely alongside the wharf; the wharf is provided with numerous bollards and is protected with rugged fenders.

The ship must be well secured to the wharf according to standard nautical practice and made fast with ropes of adequate strength and in good order.

Since the local Maritime District Office is not in a position to issue regular gale/storm warnings, Masters are advised to rely on their ship's radio for weather forecasts so that, in the event of a gale warning, sufficient time will be available for them to take the necessary steps to avoid damage to the ship, to the wharf, or to port installations.

Derricks, cranes, and any other hoisting equipment on board must be stowed so as not to interfere with unloading or loading operations; derricks shall not be lowered on the side facing the wharf. On request, the ship's hoisting equipment will be placed (fully manned) at the disposal of Eurallumina.

The ship's deck and holds must be adequately illuminated after dark, so that loading and unloading of ship's equipment (grab bucket, power shovel, hose connections) can be operated correctly and so that personnel shovelling away and sweeping up bauxite in the hold and on deck may work safely and efficiently.

All access to the wharf by truck or by any other means of transport for the loading and unloading of ship's store or equipment is subject to clearance beforehand by the Wharf Superintendent and will only be permitted if the presence of vehicles on the wharf does not in any way interfere with cargo operations.

Access to and from the ship and/or wharf will normally be restricted to the ship's gangway. The gangway, which should be run out immediately after berthing, must be easily accessible at all times, safe for public use, and adequately illuminated at night. If the ship's gangway is not hinged at the root, it must be equipped with an auxiliary footbridge of about 4 m. at the lower end to reach the wharf over the fenders.

It is remembered that spills, splashes or puddles of caustic soda could be found on the wharf during the unloading operations of the product, and be a danger to people.

All persons entering the wharf area are requested to follow the marked pedestrian throughways and to keep away from any equipment which may be operating at the time, or from caustic manifolds. If, for any reason, it should prove necessary to board the ship by passing through the cordoned-off area, all possible precautions must be taken to avoid accidents and/or damage and also to avoid treading on bauxite or alumina or caustic spillages.

The Eurallumina Wharf is equipped with a built-in fire extinguishing system which, if necessary, can also be used by ships lying at berth.

On the wharf, 2 safety anti-caustic showers and 2 eye-washing devices are available; they are easily identified by green ever-lighted lamps and red painting

SHIPMASTER'S REPORT: 1975 (Updated 1984).
Harbour: The harbour is protected by two moles between which there is a wharf. A channel marked by buoys leads to the entrance.
Documents: On arrival the following documents are required.

Declaration of Health.	2 Store Lists.
2 Crew Lists.	2 Personal Effects Lists.
1 Copy of last Port Clearance.	1 Valid Derat Certificate.
1 Copy Vaccination List.	All other ship's documents.

Radio Pratique: Unavailable.
Pilotage: For ships arriving the Pilot boards at 39° 14′ N., 08° 19′ E., but in severe North-Easterly gales the Pilot will board in Palmas Bay, position 39° 00′ N., 08° 30′ E. When leaving Port the Pilot leaves the ship abeam of Ghingetta Is., 3 cables off, position 39° 11′ 05″ N., 08° 22′ 25″ E. There is no pilot vessel, the Pilot boards from a tug.
Radio: Cagliari (IDC). No VHF service for pilotage.
Tugs: Two permanent tugs of 1,750 h.p. are operating and other tugs are available from Cagliari when necessary, and advising 4 days before ship's ETA.
Mooring Boat: Available.
Depths of Water:

In the Channel	14 m.
Eurallumina Quay	13 m.
Alsar Pier	8.5 m.
Trade Quay	8.25 m.

Berthing: Eurallumina Quay (unloading point of bauxite vessels). Length 442 m. Height on surface of water 3.6 m. Large rubber sprung fenders 150 ft. apart are fixed to the quay. Double bollards 150 ft. apart.

Vessels using this quay usually berth starboard side to using the port anchor which is let go well off the berth.

Bauxite Discharging Rate: 15,000 tonnes/day. Discharging by grab.
Fresh Water: Available at the Trade Quay by tank cars. At Eurallumina Quay available at 15 cu.m./hr. (Boiler water only). No fresh water available at Alsar Pier.
Bunkers: Available by barge from Sarroch, about 70 miles from Porto Vesme.
Repairs: Limited minor repairs only and giving notice by radio. For Radio and Radar available at Cagliari.
Ship Chandler: Available advising Agent.
Consuls: No foreign representation.
Laundry: Available advising Agent.
Provisions: Fresh foods available but notice must be given immediately on arrival.
Airport: Cagliari about 90 km. from Porto Vesme. International schedule flights and domestic flights over the Italy Area.
Medical: Qualified doctors available ashore and also equipped hospitals. In emergency doctor will board ship.
Repatriation: Arrangements must be made with Agent in advance by cable or immediately on arrival.

SHIPMASTER'S REPORT: December 1984.

Porto Vesme is the name of the port and industrial complex. The local town is called Porto Scuso which may be better known to postal and telephone authorities.
Pilotage: Black pilot launch with VHF. Pilot carries portable VHF.

In strong N.W. winds Pilot requests vessels remain stationary, at pilot station, for boarding. Pilot disembarks West of Ghingetta Island, heading 340° using starboard side ladder.
Max. Size: Eurallumina Quay: Up to 12 m. draft permitted. (December 1984).
Tugs: One tug, nominal 1,400 h.p., is available at Porto Vesme. Other tugs available on order from Cagliari, etc.
Berthing: Very active rolling on Eurallumina Quay, fenders effective but strip all paint from hull. Local ships insert rubber tyres between ship and wooden faces of fenders. Long leads required on mooring lines to prevent breaking while rolling.

Fenders project at least 2 m. from wharf face, very difficult to swing gangway ashore causing delay. A brow may be more easily placed at first. Gangway or brow must have efficient rollers on ground.

AUTHORITY: Officio Locale Marittimo, Molo Centrale, Porto Vesme (Portoscuso-Cagliari), Sardinia, Italy. *Tel:* 0781-509114. *Cables:* Locamare Portoscuso. *Contact:* Harbour Master.

QUILIANO TERMINAL: 44.17 N. 08.28 E. (See Plan)

LOCATION: Terminal is located in Vado Ligure Bay in approx. Lat. 44° 16′ 48″ N., Long. 08° 27′ 42″ E. between Savona Harbour and Capo Vado.
DOCUMENTS:
2 copies Store List.
2 copies Curios List.
8 copies Crew List.
4 copies Passenger List.
Clearance, not required.
1 copy Cargo Manifest.
Health Declaration. International Health Form to be filled out by Master on arrival.
Consignee Papers:
Bills of Lading (original and copy).
Certificate of Origin (original and copy).
Ullages report at the loading port.
PILOTAGE: Also see "Mooring".

Pilotage is compulsory. Vessels proceeding to the terminal must call off Savona Harbour to pick up Pilot.

Pilot station is located 2 miles off Savona Harbour breakwater in position approx. Lat. 44° 17′ 00″ N., Long. 08° 30′ 30″ E. and maintains VHF radio-telephone service (Channel 13).

Vessels are requested to have a proper pilot ladder securely rigged and long enough to reach the pilot launch; during night-time, adequate light must be rigged overboard for the Pilot to approach the side of the vessel and safely climb the ladder.

Vessels partially loaded must have the pilot ladder rigged in conjunction with the accommodation ladder.

When the vessel is berthed, the Port Authorities require the accommodation ladder on the starboard side.

ANCHORAGE: For vessels awaiting berth, the anchorage area is delimited by the following coordinates:

A – Lat. 44° 17.2′ N., Long. 08° 28.6′ E.
B – Lat. 44° 17.5′ N., Long. 08° 30.0′ E.
C – Lat. 44° 16.8′ N., Long. 08° 28.6′ E.
D – Lat. 44° 17.1′ N., Long. 08° 30.0′ E.

MAX. SIZE: The berth is established for a 70 ft. draft vessel, with min. keel clearance of 15 ft., making the safe manoeuvring depth 85 ft. (26 m.).

HEALTH: In addition to 36 hours notice of ETA prior to arrival, following messages are to be sent to:

(a) "Sanimare Savona" requesting Free Pratique.
(b) "Compamare Savona" (Harbour Master's Office) giving the following information:

Ship's Name
Flag
Call Sign
Length
Drafts
Cargo grade and quantity
ETA anchorage or pilot station.

RADIO/VHF:

Master to Radio "Sarpom Quiliano"

AAA	B/Lading quantity in long tons.
BBB	Slops, quantity water percentage, tank number.
CCC	ETA Quiliano upon departure last port.
DDD	Any ETA change exceeding 12 hours.
EEE	ETA Quiliano 72 – 24 hours prior arrival.
FFF	Draft of arrival at berth.

Ship-to-Shore Communications: Ship-to-shore communications, while the ship is berthed will be by portable VHF radio units used by Sarpom Marine Terminal Supervisor only. The use of the ship's radio station (except VHF set) and/or battery charging equipment is prohibited for safety reasons during cargo-ballast transfer operations. In event of normal ship-to-shore communications failure, an emergency system will be operated.

Free Pratique. See "Health".

Radio Message: Local Agent will transmit the following standard message to all inbound vessels:

Standard Message No. 1

Master S/T ……………………

Please advise ETA draft other requirements stop please urgently inform Agent and Sarpom Quiliano:

AAA	Have 2×16 in. ASA connections ready on starboard manifold stop All other flanges to be blanked and fully bolted stop If 16 in. not available advise size manifold connection.
BBB	Have boom hoisted on starboard side able to work abreast of main cargo manifold stop Boom must have a certified lifting capacity of not less than 10 tons.
CCC	Vessel will be moored at a 7 buoys CBB using bow anchors stop Anchors must have at least 13 shackles of chain each side.
DDD	Vessel must have at least 6 wires of 150 fathoms length mounted on mooring winches on poop deck and main deck aft stop Winches must be fitted with warping drum in order to heave up and make fast to bitts terminal preventer wires of each buoy stop Synthetic tails are not accepted stop Have ready 2 synthetic lines on forecastle and three on poop deck for tugs.
EEE	Accommodation ladder to be ready on starboard side on arrival at berth for Port Authorities.
FFF	During entire stay at berth engine to be always on readiness and steam on deck kept open.
GGG	Cargo ullages temperatures and water must be taken on arrival by ship personnel in conjunction with terminal stop Have tanks depressurised in order to carry out above measurements stop Besides depressuring of individual tanks during or at the end of discharge is required to provide access for tanks inspection.
HHH	Advise maximum discharging capacity available and estimated total discharge time considering terminal maximum receiving rate of 11,000 t.p.h. stop Cargo and slop quantities with water percentage and total volume cargo grade and slop commingled stop Ballasting time.
III	VHF contact on Channel 13 must be established with pilot station as soon as possible stop.

Failing to answer above details may result in operational delays accountable to vessel.

Agent ……………………………………

Standard Message No. 2
Sarpom Quiliano Terminal

Master ……………………………………………………………………………

Your attention is drawn to the serious view taken by Terminal and Port Authorities for pollution of harbour waters by oil stop Please ensure all Crew members conversant and comply with pollution regulations stop Principle causes pollution due leaking sea valves comma overboard discharge valves and cargo/bunkering overflows stop Therefore we recommend you check sea valves and overboard discharges before arrival and review cargo/bunkering operations with Chief Officer/Chief Engineer stop Scuppers must be plugged on main and poop decks stop On arrival Sarpom Marine Terminal Supervisor will give all assistance necessary but empowered take drastic action in event contravention pollution prevention requirements.

Agent ……………………………………

TUGS: Tugs are generally stationed in Savona Harbour. In view of required time to reach the Terminal Area (about 20 minutes time in good weather conditions) sufficient notice should be given.

The principal characteristics of tugs are:

Luigi Noli: Motor, 3,000 h.p. – 50 tons bollard pull (Kort nozzle). *Fire equipment:* Equipped with "Sourbel" fire-fighting articulated arms. 1 monitor fore mast, 23 m. above sea level; 2 monitors main mast, 16 m. above sea level, water/foam range 120/90 m.

Carmelo Noli: Motor, 1,700 h.p. – 20 tons bollard pull. 1 monitor fore mast – 12 m. above sea level. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Giuseppe Piaggio: Motor, 1,600 h.p. – 17 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam range 90/70 m.

Capo Vado: Motor, 1,250 h.p. – 15 tons bollard pull. 2 monitors main mast – 9 m. above sea level. Water/foam.

Priamar: Motor, 2,500 h.p. – no monitors – fire hose only.

Riviera: Same characteristics as "Priamar".

Piemonte: Motor 2,500 h.p. – 36.5 tons bollard pull (Kort nozzle) – Variable pitch propeller – Bow thrust. Fire equipment: "Sourbel" fire-fighting articulated arms – 1 monitor on foremast 16 m. above sea level – 1 monitor on main mast 12 m. above sea level – Water/foam range 120/90 m.

Lombardia: Same characteristics as *Piemonte.*

MOORING: The vessel will be boarded before mooring operations by a Sarpom Marine Terminal Supervisor (S.M.T.S.) who is an experienced captain. He will remain on board up to the time the harbour Pilot boards the vessel for unmooring operations and he will also act as co-ordinator of all ship/shore operations, providing local advice to the Master in any emergency that may arise.

Responsibility for the safe conduct of operations on board while in berth or in the area of Terminal rests with the Master, as solely responsible on behalf of the Owners of the vessel.

Vessels will be boarded by the harbour Pilot off Savona Harbour breakwater or at anchorage. All manoeuvring of ships proceeding to the Terminal and within the Terminal area will be done in accordance with the harbour Pilot advices. Vessels will proceed subsequently to Vado Bay with a course parallel to the coast, about 1.2 miles from shore, up to the terminal area.

A starboard turn will be taken, steering on the "approaching range line", leading to the buoys field. Another range line, crossing with above line, marks the position where the starboard anchor should be dropped. With the assistance of 4 to 5 tugs the vessel then backs into the berth.

The position of anchors is assumed for vessels of 980 ft. LOA and 13 shackles in the water. The Pilot according to current information can also do anti-clockwise manoeuvring instead of above clockwise, in this case the first anchor to be dropped will be the port anchor.

It is recommended that at least the following number of shackles in the water should be used according to size of vessel:

(1) VLCCs above 150,000 d.w.t.	13
(2) Vessels 90 to 150,000 d.w.t.	11
(3) Vessels 50 to 90,000 d.w.t.	9

According to existing local weather conditions the first line to be sent out is generally on buoy N.7 or 6 (port side of vessel). The sequence of mooring operations will take place as suggested by harbour Pilot.

Vessels must be moored to the entire satisfaction of the Pilot and Sarpom Marine Terminal Supervisor and must be ready at all times to put out more lines, to take in preventer wires using messenger lines, or to adjust lines or leave the berth as required by S.M.T.S. due to any change in the weather.

The Master of the vessel shall notify the Pilot of any special conditions, difficulties or peculiarities, such as defective equipment, lines or gear, which might impose special hazards in connection with handling, mooring or discharging the vessel.

It is required that vessels test steering gear, engine room telegraph, whistle and all navigational equipment before any manoeuvre to or from the berth. The Pilot will decline to moor vessels if they are not equipped with satisfactory mooring equipment, lines, gear, etc.

The mooring boat has the following characteristics: LOA 12 m. – beam 4.20 m. – displacement 17 tons. Motor Diesel *Deutz* 150 h.p., can be overpowered up to 200 h.p.

A successful test of the boat power was carried out by towing 250 m. of two 38 mm. dia. wires at the same time.

N.B. Being an open roadstead, vessels must keep engines on stand-by during their stay in the moorings. No repairs to main engine may be undertaken in berth. Steam must be kept on deck in case an adjustment to anchor cables or mooring lines is found necessary.

The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Pilot or S.M.T.S., having in mind the hazards of the operations because of the product being discharged, weather conditions and any other circumstances requiring special care or caution.

While a vessel is moored, all the vessel's personnel and vessel's operations must comply or be in accord with the Safety Rules as per form 1–49 Mar–A–B and others handed to Master on arrival, to ensure as far as possible the safety of the ship as well as the properties of Terminal. Unsatisfactory conditions will be reported to Sarpom Marine Terminal Supervisor who is empowered to reject the ship for future calls unless the reported deficiencies have been remedied.

Note: If in the opinion of the harbour Pilot and/or Sarpom Marine Terminal Supervisor the vessel is not equipped with adequate mooring facilities, lines or gear he will so inform the ship's Master and in such event the ship shall not be brought into the mooring until facilities, lines or gear, are deemed satisfactory.

BERTH: The sea bed at the berth is firm sand overlain by 1 m. to 2 m. of mud.

The berth is a conventional buoy mooring consisting of 7 Lamgar Buoys designed for a 125 short ton load. Each buoy is equipped with a 40 mm. diameter preventer wire. Vessel is berthed with 2 anchors ahead and 7 mooring lines to buoys round the stern. Moored vessels have their bow seaward heading S.E., 155° true.

Mooring wires on ship's winches are requested at this terminal but it is recommended that the wire be not less than 1.625 in. diameter and at least 150 fathoms long, preferably 200 fathoms. Such winches must be solidly locked when in moorings; the tension feature is not acceptable. It is also recommended that the wire be secured on the drum in such a manner that it can be slipped without endangering personnel. In addition to ship wires, preventer wires are picked up from buoys and made fast to bitts; carpenter stopper is supplied by terminal.

When slipping wire has been found necessary, the mooring company launch will make every effort to recover and return it to the vessel.

DISCHARGING: Ships will discharge through 2 strings of hoses, i.e.:

String No. 1	7 lengths 35 ft.×20 in. dia.
	2 lengths 25 ft.×16 in. dia.
	1 length 30 ft.×16 in. dia.
String No. 2	8 lengths 35 ft.×20 in. dia.
	2 lengths 25 ft.×16 in. dia.
	1 length 30 ft.×16 in. dia.

The weight to be lifted on each string is about 9 tons: they are invariably taken up on the starboard side. Both headers are equipped with fast uncoupling devices.

The submarine line connected by manifold to the above strings consists of 2 lines (1×32 in. dia. 1×36 in. dia.) of about 3,470 m. length reaching the shore installations (Sarpom Depot) which has, at present, the capacity of 387,500 cu.m.

The max. discharging rate allowed is 13,000 cu.m./hr.= 81,600 bbls./p.h. with a max. pressure at ship's rail of 150 p.s.i.=10.6 kg./sq.cm.

Raising, connecting, disconnecting and lowering of the hoses will be performed by shore personnel (7 men), who will remain on board throughout discharging operations, using a special motor-boat chartered by Sarpom.

The boat is fitted with anti-oil-pollution equipment. Vessel's crew are required to assist shore personnel handling the boom winch and to carefully inspect their hose boom equipment before arrival.

It is recommended that vessels send maximum flow possible with due regard to safety, in order to expedite turn-around time, as well as to provide ballasting as quickly as possible.

N.B. The Sarpom Terminal maintains a vigorous tanker discharging safety programme. S.M.T.S. is authorised to suspend discharging operations in the event of any of the safety rules not being observed, or if any other danger is believed to exist. Tankers are expected to follow all safety regulations generally accepted and practised in the marine transport industry (IOTTSG Safety Guide).

The S.M.T.S. will advise the Cargo Officer or a responsible officer in due time when the switching of shore tanks, changes in discharging rates, etc. are required by the shore installation operations and for any emergency stop.

BALLAST: Vessels provided with segregated ballast will start ballasting as soon as possible during discharge operations. All vessels that are able to handle cargo and ballast simultaneously will be authorised to do so, after S.M.T.S. is satisfied that no sea pollution or cargo contamination might occur.

All efforts must be made to avoid the vessel remaining in completely light condition. Should a vessel neither be fitted with segregated ballast nor be able to simultaneously handle cargo ballast, S.M.T.S. in agreement with the Master may ask the vessel to stop discharge operations and start ballasting, after having inspected the tanks involved.

Ballast operations after completion of discharge must be reduced to the minimum required for safe handling of the vessel out of berth, which in fair weather conditions can be: propeller submerged and vessel trimmed 10 ft. by the stern. Ballast operation can continue at reduced speed during unmooring.

While the vessel is ballasting the S.M.T.S. in agreement with the Master will start singling-up by letting go all preventer wires and any other additional mooring lines not strictly required for a safe mooring. This, of course, taking in due consideration all weather and current conditions.

WEATHER: The bay, although sheltered from the strongest winds blowing from the fourth quadrant by high mountains coming down close to the coast, is subject to strong wind gusts from this quadrant, and the relative wind direction varies considerably in different parts of the bay at one time due to irregularities of the coastal heights.

The bay is open to Southerly winds and seas, and it is from this direction that seas and swells caused by strong wind between S.E. and South may interrupt marine operations. Delays in this area are mainly due to the impossibility of mooring a vessel under certain weather conditions than to withstand elements once she is moored. The berth current is part of the general offshore current stream and is not wind blown or tidal; its predominant direction is toward the S.W. and the maximum speed is 0.8 – 1 knots; generally currents do not exceed 0.5 – 0.6 knots. The faster currents are likely to occur more frequently during the Winter period; occasionally they reverse and set N.W. with a reduced velocity.

Tide is negligible and fog is rare.

In general, weather in the bay is seasonal. From May to October it is very good. The worst period is from October to December when winds and seas from South cause the maximum number of port closures.

From December to May the strongest winds are experienced from third and fourth quadrants but sea is usually smooth.

12 and 24 hour weather forecast data is available on request on a round-the-clock basis at the Terminal Office. In addition the Office is provided with "Murfax" type continuous long-range weather recording data, waverider receiver, and anemometer.

Broadcast weather reports for Mar Ligure, North Tirreno and Corsica are prepared by Navy Department of La Spezia and Air Force Weather Bureau. For Mar Ligure, they refer to Capo Mele (West of Vado Bay). Radiotelephone information concerning weather is also given on 2182 kHz (Genova Radio Station). Weather reports transmitted on 1722 kHz at 0135 – 0735 – 1335 – 1935 hrs. GMT.

Weather forecast covering the following 12 hours is transmitted at 0135 hrs. and 1335 hrs. GMT.

VHF-weather information can be received through Genova Radio Station on Channel 25 at same periods as for radiotelephone.

Special Gale Reports:

Wireless: After 15/18 minutes and 45/48 minutes every hour on 500/487 kHz.

VHF: On Channels 16 and 25 at same times as above.

SIP (Telephone) – Genoa Weather Report, prepared by Air Force Department at Genoa Airport, is based on the Genoa Radio information plus local information received by planes or vessels along the coast from Capo Mele to La Spezia. The report is inserted on a tape recorder and it is amended according to latest information received.

This report can be received by telephone by simply dialling 010-5605 at the following times:

from 31/5 to 26/9 at 0600 – 0900 – 1200 hrs. (forecast validity up to 2400 hrs. same day)
at 1800 – 2000 – 2400 hrs. (forecast validity up to 0600 hrs. following day);
from 27/9 to 30/5 at 0600 – 0800 – 1400 hrs. (forecast validity up to 2400 hrs. same day)
at 2000 – 2400 hrs. (forecast validity up to 0600 hrs. following day).

This report will be obtained by the S.M.T.S. through the terminal.

In case of necessity the Air Force Weather Bureau can be called by telephone (010-5604) at any time of the day or night, to obtain additional information about developments of the existing situation and forecasts.

This information can also be obtained by dialling local weather office Tel: 196.

FUEL: Bunkers are supplied by barge which moors portside alongside the vessel. Bunker requirement must be radioed to local Agent at least 48 hours in advance. For vessels expecting to arrive on Saturday or Sunday, the requirement must be forwarded not later than Thursday afternoon.

CUSTOMS ALLOWANCES: Present regulations allow each seaman to retain in his possession a max. of 40 cigarettes or the equivalent of tobacco or cigars, and 1 open bottle of spirits. The balance of all smoking items and spirits must be collected, listed and locked, and included in the Stores List.

MEDICAL: Doctors and hospital facilities are available at Savona.

CONSULS: Consulates for most nations maintain offices in Genoa (about 50 km. from Savona).

REPAIRS: Repair shops for minor repairs are available. For electronic equipment repairs, notice should be sent to the local Agent in due time.

SHORE LEAVE: Launches are sailing from ENEL Pier (located about 1 mile North of berth) and keep regular connection with tankers berthed at Sarpom's Berth.

During bad weather the service is performed from Porto Vado.

Sufficient personnel must be aboard at all times for letting go lines so that the vessel can clear the berth whenever required.

REPORT: November 1985.

Mooring: A 150 h.p. mooring boat with 5 men is usual for the mooring operation. When the ship's stern is nearly positioned, the first lines are sent out, normally to Mooring Buoy Nos. 6 and 7 on the port side. The remainder of the lines are sent to the buoys and made fast according to the Pilot's advice. The ship will be heading 155° when finally positioned.

Minimum mooring requirements:

Vessel 1,000 d.w.t.	*Ship's Lines*	*Preventers*	*Total*
150 – 250	6 wires	7 (all buoys)	13 wires
90 – 150	4 wires	6 (b1, 2, 3, 5, 6, 7)	10 wires
50 – 90	4 wires	4 (always 1/7 and 3/5 or 2/6 depending on ship's mooring arrangement)	8 wires

Synthetic lines are not allowed for mooring at Quiliano Sea Berth. Minimum diameter required for mooring wires is 36 mm. and the length of the wire should be at least 150 fathoms (274 m.). For vessels between 50,000 – 150,000 d.w.t., 2 wires should be located on poop deck winches, and the other 2 wires should be located on winches at main deck aft. Vessels of over 150,000 d.w.t. should have 4 wires on winches located on poop deck and 2 wires on winches located on main deck aft. To accommodate the shore preventers all vessels should have mooring bitts located as follows:

Vessel between 50,000 – 150,000 d.w.t.: 4 bitts on poop deck and 2 bitts on main deck aft.

Vessels over 150,000 d.w.t.: 5 bitts on poop deck and 2 bitts on main deck aft.

Vessels shall be fitted with a derrick of 10 tons SWL.

All vessels should be capable of simultaneous ballasting and cargo discharge.

Vessels are not berthed if there is more than:
1 knot current,
18 knots wind from an Easterly or Westerly direction.

Berthing: Ships are berthed assisted by tugs. Normally, 4 tugs are used for vessels up to 150,000 d.w.t. and 5 tugs for vessels over 150,000 d.w.t., 2 on the hook forward and 3 aft using ship's lines.

The Berth is approached on a range line and when in position, the starboard anchor is dropped and slacked out while the vessel proceeds to the port anchor drop position. The port anchor is then dropped and while the vessel continues its starboard swing, it is towed stern first into berth and positioned. A good spread of the anchors and sufficient chain on the bottom are essential for adequate holding power. The terminal recommends the following lengths of chain in the water.

13 shackles for vessels over 150,000 d.w.t.,
11 shackles for vessels between 80,000 d.w.t. and 150,000 d.w.t.
9 shackles for vessels between 50,000 d.w.t. and 80,000 d.w.t.

AGENCY: Sarpom does not perform any vessel agency functions. Owners of vessels calling at Sarpom Terminal must arrange their own ship's Agent.

AUTHORITY: Esso Italiana S.p.a, Viale Castello della Magliana 25, 00148 Roma, Italy. *Tel:* 59952913. *Telex:* 620830 Esso I. *Contact:* Maritime Service Dept.

RAVENNA: 44.25 N. 12.12 E. (See Plan)

LOCATION: The Port of Ravenna is located on the Adriatic coast of Italy about 50 miles South of Venice. The Ravenna-Porto Corsini Port Complex is extensive.

1. The SAROM Steel Platform (Terminal 1).
2. The SAROM Combined Buoy Mooring (Terminal 2).
3. The SAROM Oceanic Buoy 5 (Terminal 3).
4. The SAROM Rotating Platform (Terminal 4).
5. Five berths in the Inner Harbour:
   - (a) Darsena SAROM, 2 berths.
   - (b) Channel Baione Berth PIR.
   - (c) Channel Candiano, Berth ANIC lato mare.
   - (d) Channel Candiano, Berth ENEL.
   - (e) Channel Candiano, Berth CABOT.

Nos. 1 – 4 are located in the open sea E.S.E. of the Entrance Channel to Ravenna Porto Corsini about 3 and 10 miles from the coast. The berths in the Inner Harbour are reached via the narrow Entrance Channel to Porto Corsini.

DOCUMENTS:

For Maritime Authority:
Ship Safety Certificates.
3 Crew Lists.
3 Passenger Lists.

For Customs:
1 Crew List.
1 Passenger List.
Cargo Manifest.
Bills of Lading.
1 Provisions List.
1 Customs Declaration of each Crew member.

For Maritime Health:
1 Crew List.
1 Passenger List.
Derat Certificate or Exemption.
Maritime Health Declaration.

For Police:
1 Crew List.
1 Passenger List.

PILOTAGE: Ordered by Agent in advance. Contact by radio telephone: Nos. 430453 and 430204 during office hours. Cables to Piloti del Porto, Marina di Ravenna. Pilot station and both pilot boats equipped with VHF, Channels 16, 9, 6 and 12. Pilot is embarked not less than 1 mile from head of breakwater. Vessel awaiting Pilot may anchor 1.5 miles from breakwater head. This anchorage is not secure in bad weather. Vessel bound for SAROM installation, embark Pilot at least 0.5 miles from the berths. Pilot launches have black hull with white band, white superstructure, 10 m. to 14 m. in length.

ANCHORAGE: Anchorage prohibited in vicinity of submarine pipe-lines and cables. Vessels waiting for a berth may anchor at a distance more than 1.5 miles from the outer breakwater head according to their draft and subject to weather conditions.

RESTRICTIONS: Berthing and mooring at SAROM Sea Berths allowed in daylight only. Unberthing and sailing can be carried out in darkness.

Berthing day and night from entrance to San Vitale Basin. Inner port daylight berthing only. The channel to the inner port is navigable one way only. Traffic signals are displayed to indicate when channel closed to incoming vessels.

MAX. SIZE: *Inner Port:* Draft limited from 17 ft. to 17 ft. 6 in. depending on vessel's beam.

San Vitale: Max. draft 28 ft. allowed from port entrance to San Vitale Basin.

SAROM (Oil Platform – No. 1): Length not limited, max. draft 36 ft.
SAROM (Oil Berth – No. 2): Length not limited, max. draft 36 ft.
SBM Terminal – No. 3: Length not limited, max. draft 44 ft.
SAROM (Oil Platform – No. 4): Length no limit, max. draft 70 ft.

HEALTH: Pratique given by radio, on request to Sanimare Ravenna. Pratique is automatic for vessels coming from ports in E.E.C. countries.

RADIO: Messages via Ancona Radio, Venezia Radio, or Trieste Radio.

VHF: Ravenna VHF Radio Station operates on Channels 16, 25, 26, and 27.

The Ravenna Port Informer is in contact with Ships Agents and operates on Channel 9 from 0600 hrs. – 2200 hrs. every day including holidays.

TUGS: Tugs join vessel in outer port. Ship's lines are used.

There are 5 tugs stationed at Ravenna (2 of less than 1,000 h.p., 2×1,000 h.p. and 1×2,048 h.p. Voit Schneider type with 25 tons bollard pull). 4 of the tugs are equipped for fire fighting. The Harbour Authority lays down the number of tugs to be taken by each vessel according to size.

BERTHING: *Shipmaster's Report:* 1982.

It is advisable to keep vessel well secured when alongside as passing vessels have little consideration.

CRANES: Heavy lift floating crane to be located in the Candiano Canal.

STEVEDORES: To be ordered before 1030 hrs. for afternoon work, and before 1630 hrs. for following morning.

MEDICAL: All facilities available.

TANKERS:

Sea Berths:

SAROM Steel Platform – Terminal No. 1:

Cautionary Advice: Vessels moored at this terminal as well as all other Sea Berths must always keep the engines ready in order to be in position to unmoor and leave immediately in case of emergency or in case in the Master's judgment the weather conditions suddenly get worse.

General: The No. 1 Terminal consists of 2 platforms of 15 m. diameter each supported by 36 tubular piles. Installed on the platform are: a white light, flashing twice every 5 secs. and a fog horn giving 3 long blasts every 20 secs.

Berthing and Mooring: The Berth is usually approached from the North, the 2 anchors are dropped, first the port anchor then the starboard anchor, and the vessel is swung assisted by 2 tugs, and towed into position in the berth with 7-8 shackles of chain out on each anchor. Occasionally a wire may be necessary and is made fast on the port bow connected with a fixed anchor.

The stern is moored with 4 wires supplied by the terminal and connected to 4 buoys. On completion of mooring the distance between ship and platform must be about 50 ft. heading East.

Cargo Connections: Products are handled at this berth through 1×12 in. flexible hose with 12 in. ASA connection to the vessel's stern discharge flange. Maximum pressure allowed is 12 kg./sq.cm.

Ballast Facilities: None available.

Gangway: Ship's gangway or accommodation ladder should be rigged on the starboard side for Authorities.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water can be supplied by barge.

SAROM Combined Buoy Mooring – Terminal No. 2:

General: This terminal consists of 4 buoys anchored in sea bottom. Distance from No. 1 Terminal is 500 m. towards South and from coast 6,100 m. The position is Lat. 44° 28′ 14″ N., Long. 12° 21′ 55″ E.

Berthing and Mooring: The mooring must be carried out with ship's bow towards East and taking up on the stern 4 steel wires supplied by SAROM and connected with the 4 buoys. The vessel must be anchored with 7 – 8 shackles of chain (port and starboard) and the forecastle port side also must be secured with steel wire connected with a fixed anchor.

Cargo Connections: There is only 1×16 in. flexible hose (ASA) to be connected, always on port side. The position of the hose is signalled by a small red marker buoy. When mooring is completed the red marker buoy must be located on the vessel's port side 30 m. apart.

Derricks: Vessels must arrive ready with port side derrick able to hoist the flexible hose weighing 5 tons.

Ballast Facilities: None available.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

SAROM Oceanic Buoy – Terminal No. 3:

General: No. 3 Terminal consists of 1 large anchored buoy on which are installed a red light, flashing twice every 5 secs., a fog horn (letter "C" every 20 secs.) and a radar Racon code "C". Distance from No. 1 Terminal is about 4,500 m. E.N.E. and from coast 10,300 m.

Berthing and Mooring: The mooring must be carried out with ship's bow towards North, and taking up 2 steel wires supplied by SAROM, connecting the stern of the ship to the large buoy, and 4 steel wires connecting the ship to 4 small buoys anchored in the proximity of the large buoy. The 2 steel wires on the stern must be secured in order to maintain the ship about 120 m. from the buoy. Vessel must be anchored with 7 – 8 shackles of chain (port and starboard) and the forecastle port side must also be secured with a steel wire connected with a fixed anchor.

Cargo Connection: There is only 1 flexible hose with 10 in. ASA flange to be connected, always on port side.

Derrick: Vessels must arrive ready with port side derrick able to hoist the hose weighing 5 tons.

Ballast Facilities: None.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

SAROM Rotating Platform – Terminal No. 4:

General: No. 4 Terminal consists of a rotating platform elastically connected with a fixed platform supported by 6 tubular piles of 48 in. diameter.

Its position is Lat. 44° 27′ 25″ N., Long. 12° 31′ 30″ E. Distance from shore is 18,300 m. Mooring is allowed for vessels with a max. draft of about 70 ft. The platform shows a white flashing light 3 times every 15 secs., also a fog horn code "U" and Racon code "U".

Berthing and Mooring: The vessel must approach the platform up to a distance of about 120 m. One vessel's synthetic rope will be connected with the assistance of the mooring boat with the steel wire supplied by SAROM. With the aid of the steel wire heaved up by vessel, vessel will approach the platform as far as a distance of about 65 m. and there the steel wire will be made fast.

The mooring operations will be carried out only in normal weather conditions. The unmooring operations can be carried out at any time day or night. One tug will assist at the stern in order to avoid collision with the platform.

Cargo Connections: There is a floating hose with 16 in. flange (ASA) to be connected on port side manifold. Before disconnecting, the floating hose (length of about 270 m.) must be filled with water. Max. pressure 8 kg./sq.cm.

Derrick: Vessels must arrive with port side derrick of 10 tons SWL.

Ballast Facilities: None.

Gangway: Vessel should rig suitable accommodation ladder.

Bunkering: By barge.

Ullaging – Temperatures: Taken by shore personnel.

Inner Harbour:

Darsena SAROM Berth:

Location: The SAROM Berths are located in the Darsena SAROM on the South side of Largo S. Vitale, the Ponente Berth on the West side and Levante on the East side of the Darsena.

Berthing and Mooring: The Inner Harbour is entered between the breakwaters protecting the entrance to Canale Baiona. 2 tugs are usually made fast on the hook, fore and aft, when abeam of the breakwaters and assist vessels through the channel. Vessels bound for the SAROM Berths proceed farther South through Canale Candiano and are swung (using 1 anchor) assisted by tugs in the Lago S. Vitale. They are then towed stern first into Darsena SAROM and moor starboard side alongside at the Levante Berth, and port side alongside the Ponente Berth. Head and stern lines are run in by mooring boats.

Wires are not accepted, wires with synthetic tails are accepted.

Preparations: A 2 ton SWL derrick is required for hose handling, and should be ready on arrival. There is no shore gangway and the vessel should have a gangway ready on starboard side for the Levante Berth and port side for the Ponente Berth. Ullages and temperatures are taken by terminal personnel.

Cargo Handled and Connections:

Berth Levante

Clean products: 1×8 in. ASA hose 8 kg./sq.cm.

Dirty products: 1×8 in. ASA hose 8 kg./sq.cm.

Berth Ponente

Gasoline: 1×8 in. ASA hose 8 kg./sq.cm.

Gasoil: 1×8 in. ASA hose 8 kg./sq.cm.

Dirty oils: 1×8 in. ASA hose 8 kg./sq.cm.

Ballast Facilities: Ballast facilities are available for unlimited quantities. Discharge rate 400 t.p.h.

Fire Fighting Facilities: There are 3 towers with foam/water monitors.

Oil Pollution – Clean Up: Facilities available.

Services: Bunkers and fresh water are available.

PIR Berth:

Location: The PIR Berth is located on the South side of the Canale Baiona about 1 mile from the port entrance.

Berthing, Unberthing and Mooring: Berthing allowed only by daylight, unberthing not allowed after 1 hour after sunset. The harbour is entered and tugs are made fast as per Darsena SAROM Berth. Vessels bound for PIR Berth, will be berthed with starboard side alongside, therefore vessel will be swung in the Turning Basin (junction – Canale Candiano – Canale Baiona) and then backed in position by tugs.

Cargo Handled and Connections:

Clean products: 2×8 in. flexible hoses with 8 in. ASA connections 5 kg./sq.cm.

Dirty products: 2×8 in. flexible hoses with 8 in. ASA connections.

Maximum pressure allowed: 6 kg./sq.cm.

Gangway: Ships must provide their own gangway.

Derrick: A 2 ton SWL derrick required on port side for hose handling.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water are available.

Fire Fighting: System installed.

Oil Pollution – Clean Up: The terminal has a quantity of oil dispersant and absorbent.

ANIC Berth "Lato Mare":

Cautionary Advice: The ANIC Berth is located on the West side of Largo S. Vitale about 0.5 miles North of the Darsena SAROM. It is a marginal berth and ships bound to and from Ravenna pass close by, and may cause a moored vessel to surge in the berth. It is, therefore extremely important that vessels are securely moored and that the mooring lines are properly tended and watched.

Berthing and Mooring: Vessels bound for the ANIC Berth enter the harbour and connect tugs as described per Darsena SAROM Berth and are then swung in the Largo S. Vitale and berthed head out with port side alongside.

Cargo Handled and Connections: This terminal handles various classes of oils or chemicals. Both jetties have the same facilities.

Solvents: 2×4 in. ASA flexible hose. 7 kg./sq.cm.

Chemicals: 2×6 in. ASA flexible hose. 7 kg./sq.cm.

Dirty oils: 2×8 in. ASA flexible hose. 7 kg./sq.cm.

For clean oils there are also 2 rigid arms 6 in. flange ASA. Max. pressure 8 kg./sq.cm.

Gangway: Ship should rig their port side gangway.

Derrick: A 2 ton SWL derrick required on port side for hose handling.

Ullaging – Temperatures: Taken by terminal personnel.

Services: Bunkers and fresh water are available.

Ballast: None at present. In future there will be possibility of dirty ballast discharge.

Oil Pollution – Clean Up: No facilities available.

Fire Fighting Facilities: Fixed foam/water monitors and mobile fire fighting men.

ENEL:

General: This terminal is on the North bank of Canale Candiano about 1.5 miles West of junction Canale Candiano/Canale Baiona. Handles exclusively boiler oils. The terminal consists of a jetty that can accommodate vessels up to 280 m. LOA with max. draft of about 28 ft.

Berthing and Mooring: Normally 2 tugs are used, and since the vessel must be moored port side alongside it is swung in proximity of confluence of Canale Candiano/Canale Baiona and then backed into position by means of tugs.

Wires not accepted.

Cargo Handled – Connections:

F.O.: 1×8 in. ASA flexible hose. 6 kg./sq.cm.: For larger vessels.

F.O.: 1×6 in. ASA flexible hose. 6 kg./sq.cm.: For smaller vessels.

Gangway: Vessels should rig suitable gangway.

Derrick: 2 ton SWL ready on port side.

Ullaging – Temperatures: Taken by terminal personnel.

Bunkering/Fresh Water: By barges.

Oil Pollution – Clean Up: No facilities available.

Fire Fighting Facilities: 4 foam/water monitors.

CABOT:

General: This terminal is located 1 mile West of ENEL Jetty. Can accommodate vessels up to max. 128 m. LOA with max. draft of about 28 ft. Handles only aromatic oils class "C".

Berthing and Mooring: At this terminal vessels are moored with port side alongside. Vessels are backed into position after being swung in the turning basin.

Cargo Handled – Connections: Only aromatics are received at this berth. There are 2×6 in. ASA flange flexible hoses. 7 kg./sq.cm. For larger vessels 2 hoses are used, only 1 for smaller vessels.

Gangway: Vessels should rig suitable gangway.

Derrick: 2 ton SWL ready on port side.

Ullaging – Temperatures: Taken by terminal personnel.

Bunkering/Fresh Water: By barge.

Oil Pollution – Clean Up: No facilities available.

Fire Fighting Facilities: Fire hydrants, water only.

DENSITY: 1024.

FRESH WATER: Only available ex-wharf at San Vitale and at inner port piers. Barge available for deliveries to the Silos Piers and tanker terminals.

Shipmaster's Report: 1982.

Delivered by road tanker only at silo pier (Setramar) in lots of 8 tons. Cost Lire 10,000 per ton.

FUEL: Available by barge.

FIRE PRECAUTIONS: Tankers are given copy of port fire regulations on arrival. No repairs or gas freeing to be carried out without permission of Port Authorities.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

OPENING/CLOSING HATCHES: Can be performed by ship's crew or by stevedores.

CUSTOMS ALLOWANCES: 50 cigarettes per man for first day in port. Wine/spirits, allowance is made for normal daily consumption on board.

IDENTIFICATION CARDS: Shore passes given by police.

CONSULS:

Norway Tel: 24.5.47 Spain Tel: 24.0.14 Sweden Tel: 22.6.39

REPAIRS: Minor engine repairs can be effected. Floating dry-dock available for up to 1,000 tons displacement.

REPATRIATION: Can be arranged.

AIRPORT: Forli Airport situated 25 km. away, with daily flights to Rome and Milan.

TIME: GMT plus 1 hour. From May to September, GMT plus 2 hours.

POLICE/FIRE/AMBULANCE: Police, Tel: 22.4.66; Ambulance, 22.3.11; Fire, 22.2.22.

TELEPHONES: Can be installed on board at San Vitale Berths.

SHORE LEAVE: Allowed. Launch service available for vessels in the roads.

SHIP SUPPLY SERVICE: Contact: I.S.A.P. s.r.l. Impresa Servizi Ausiliari Portuali via Circonvallazione Piazza d'Armi, 74 48100 Ravenna. Service is rendered to the ships waiting at anchor in Ravenna Roads or to the tankers discharging at the refinery terminals located in Ravenna Roads.

Vessels: "Elisabetta Seconda", 17.15 m. LOA and 4.60 m. breadth. 2 engines 130 h.p. each able to transport 22 passengers.

"Francesca Romana", 17 m. LOA and 4.65 m. breadth 1 engine 240 h.p. able to transport 12 passengers.

AUTHORITY: Capitaneria di Porto Ravenna, Via Antico Squero 9, Ravenna, Italy. *Tel:* (0544) 22100, 32506, 32154. *Cables:* Compamare Ravenna. *Contact:* P. Gallerano, Port Captain.

SALERNO: 40.40 N. 14.45 E. (See Plan)

DOCUMENTS: As for all Italian ports, i.e. all ship's documents in valid condition and Arrival Reports, to be filled upon arrival with the Port Authority's representative.

PILOTAGE: Pilot station keeps watch on Channel 16 VHF from 0600 – 2000 hrs., working Channel 14.

ANCHORAGE: Position of anchorage, about 1 mile W.S.W. of green flashing light.

RESTRICTIONS: Vessel cannot enter or sail from the harbour between 2100 hrs. and 0500 hrs.

MAX. SIZE: Vessel allowed to enter port should not exceed 220 m. in length or 30 ft. draft.

HEALTH: Free Pratique not obtainable by radio. Usual formalities on berthing.

RADIO: All cables should be sent via "Napoli Radio" call sign "IQH".

TUGS: Lines must be supplied by the ship.

BERTHING: 13 berths with depths from 21 ft. to 30 ft.

CARGO HANDLING EQUIPMENT:

16 mobile cranes with capacity up to 270 tons.

80 forklift trucks with capacity from 4 tons to 37 tons.

6 dumper trucks.

Hydraulic grabs.

Specialised terminals for cars and wheeled units, containers, forest products, steel products.

Ro/Ro facilities.

Handling and storage area: 250,000 sq.m.

Equipment for loading/discharging bananas, fruit, refrigerated and frozen cargoes in cartons.

STEVEDORES: Stevedores are to be informed 24 hours prior to vessel's arrival.

MEDICAL: Medical Service should be requested in advance. Hospital facilities are obtainable.

DENSITY: Average salinity inside port is 1025.

FRESH WATER: Fresh water available at all berths, ordered through Agent.

FUEL: Bunkers may be supplied from Naples by truck or barge. If large quantities are requested supply will be effected by barge from Naples.

CUSTOMS ALLOWANCES: Only 40 cigarettes on vessel's arrival. This applies to officers and crew. The remaining stock will be sealed in vessel's bonded store.

CONSULS: No consular representatives exist in Salerno. Nearest at Naples.

REPAIRS/DRY DOCKS: No dry dock exists. Only small workshops attending minor repairs.

SURVEYORS: Lloyd's Register in Naples. Tel: (081) 323714. R.I.N.A. in Naples Tel: (081) 325644.

GANGWAY/DECK WATCHMAN: Contact Instituto La Vigile. Tel: 239928.

AIRPORT: The nearest airport is at Naples. Distance 60 km.

REPATRIATION: Crew changes and repatriation possible.

TIME: One hour ahead of GMT in Winter. Summertime (March – September) GMT plus 2 hours.

HOLIDAYS: Other than the national festivities, September 21st, a local holiday, being the Name Day of the town's Patron Saint.

TELEPHONES: Emergency phone number is: 113-112.

IDENTIFICATION CARDS: Crew I.D. cards issued by police on arrival.

GENERAL: *Garbage:* Collection is compulsory. Collected from vessels at anchor and by truck if vessel at quay.

Ship Chandler: Montanari General Ship Chandlers, Tel: (089) 237553.

Services: Radar, VHF and gyro service or repairs may be obtained through request to Agent prior to vessel's arrival.

AUTHORITY: Capitaneria di Porto Salerno, Molo Manfredi, 84100 Salerno. *Tel:* (089) 224544, 224765. *Telex:* Compsa 722559. *Cables:* Compamare Salerno. *Contact:* Harbour Master.

SAVONA (including Vado Ligure): 44.18 N. 08.29 E.

(See Plan)

PORT LIMITS: One mile from Savona Port Breakwater.

DOCUMENTS:

Arrival Report for Port Authority.
Cargo Manifest.
Provisions and Crew Personal Effects Manifest.
8 Crew Lists.
Class Certificate.
Safety Equipment Certificate.
Safety Construction Certificate.
Safety Radio Certificate.
Ship's Register – Load Line Certificate.
Derat Exemption Certificate.

PILOTAGE: Pilotage is compulsory for vessels over 500 g.r.t. Pilot ordered through Agent. Telegraphic address: Piloti Porto di Savona. Pilot launch is black with white band. To call Pilot, use flag or light signals according to International Code. For vessels bound for Savona or Vado Ligure, Pilot boards about 0.5 to 1 mile S.E. of the red light at Savona port entrance. Pilot station on VHF Channel 13 day and night.

ANCHORAGE: The Roads of Savona offer a safe and spacious anchorage. Depths of 25 m.

Important limits: it is forbidden to anchor North of bearing 270° from red light. It is forbidden to anchor East of bearing 360° from the white light between 15th May and 30th September.

Shipmaster's Report: April 1983.

In any season the limits are:

North Border – bearing 305° from red light "Frandgiflutti".

South Border – bearing 340° from Point Lat. 44° 18′ 30″ N., Long. 08° 29′ 27.5″ E.

RESTRICTIONS: Night entrance is considered for each case depending on type of mooring and vessel's draft. At Savona berths, vessels on maximum draft berth in daylight at high tide. No restrictions on unberthing.

MAX. SIZE: See "Berthing".

HEALTH: Free Pratique may be requested by radio from "Sanimare Savona" prior to vessel's arrival except for vessels coming from countries subject to sanitary control, for which the Harbour Doctor must go on board in order to expedite Free Pratique. Free Pratique is automatic for vessels entering after calling at another Italian port or any other port belonging to E.E.C. – In the event of any disease or fever contact Agents.

RADIO: Genova Radio or Roma Radio.

VHF: Pilot station on Channel 13, day and night. Harbour Master's office on Channel 16, day and night. Port Authority on Channel 13 (Tel. 80.20.21).

TUGS: Tugs join vessel in vicinity of Savona port entrance or at Vado Ligure just off the berth. Ship's line usually used. If tug line used, tariff plus 20% is charged.

BERTHING:

Inner Harbour; depth 17 ft., quay length 480 m.

Quay Nos. 1, 2, 3, 4, 5, 6, and 7, depth alongside quays min. – 23 ft., max. 32 ft., quay length 790 m.

Quay Nos. 8, 9, 10 and 11, depth alongside quays – min. 29 ft., max. 32 ft., quay length 417 m.

Quay Nos. 12, 13, 14, 15, 16, 16A, depth alongside quays – min. 23 ft., max. 36 ft., quay length 670 m.

Quay Nos. 31 and 32 (new deep water quays). Depth 51 ft. Quay Length 368 m.

Funiviaria Plant (Pier No. 22), depth 32 ft. 6 in., quay length 130 m.

Vado Ligure:

Porto Vado North, depth 34 ft., quay length 210 m.
Porto Vado South, depth 20 ft. to 23 ft., quay length 400 m.
Pier Italiana Coke S.p.A., depth 41 ft.

CRANES: The port is equipped with modern mobile cranes with the following capacities:

10 bridge cranes, capacity from 4.5 to 6 tons;
22 electric cranes, capacity from 1.5 to 20 tons;
18 mobile cranes, capacity from 15 to 150 tons;
2 mobile cranes, equipped with spreaders for handling containers.

SPECIALISED CARGO-HANDLING FACILITIES: Funiviaria Plant is equipped for quick discharging of cargoes in bulk (coals and ores) by means of 4 electric transporters capable of handling 1,100 t.p.h. It is directly connected to overhead wire railway, capable of carrying 400 t.p.h. to its storage, the capacity of which is 400,000 tons. Depth alongside 32 ft. 6 in.

Cereal Silo belonging to "Savona Silo S.p.A." with depth alongside of 35 ft. has a capacity of 60,000 cu.m., it is fitted with 2 pneumatic towers having an intake of 500 t.p.h. and one loading tower with capacity 300 t.p.h.

A 14 storey parking house capable of containing 3,000 cars. Ro/Ro terminal available.

Container terminal in Savona Basin includes an area of almost 50,000 sq.m., for the storage and the shifting of the containers.

Terminal in Savona Basin for cellulose and forest products includes 550 m. of loading quays for ocean-going vessels; roofed warehouse of over 8,000 sq.m.; 60,000 cu.m. capacity for 20,000 tons of goods; it is served by 1,600 m. of railways, 300 m. out of which are roofed; over 200 trucks available for forwarding goods by road.

Single storey warehouse for general cargoes having a capacity of 12,000 cu.m.

Vado Ligure: Pier San Raffaele is fitted for discharging and loading large vessels with cargoes in bulk (coal for the Italiana Coke S.p.A.).

South Unloading Pier: Length 160 m. Depth 41 ft. 2 slewing grabs, unloading rate 10,000 tons per day. Berth accepts vessels up to 50,000 d.w.t.

North Loading Pier: Length 128 m. Depth 30 ft. 1 loader, rate 2,000 tons per day. Berth accepts vessels up to 30,000 d.w.t.

Cereal Silo belonging to Messrs. Ferruzzi and Co. is capable of handling vessels up to 60,000 d.w.t. Depth alongside 40 ft. Storage capacity 65,000 tons; discharging rate 800 t.p.h.; re-forwarding rate 500 t.p.h.

Reefer Terminal: Length of berth 300 m. Unloading/loading plant for foodstuffs and other refrigerated cargoes at Porto Vado North. The plant consists of conveyor belts which from the holds load goods directly onto trucks, railway-cars and vice-versa. The rate is about 300 tons per line (4 lines) per shift. Packages weight: up to 35 kg. Packages size: up to 600 mm.×500 mm.×350 mm. Refrigerated storage capacity 1,600 tonnes at -2°C.

STEVEDORES: Ordered by ship's Agent, no separate ETA required.

MEDICAL: All facilities available.

TANKERS: *Esso Pier:* Length 345 m. Depth at head 33 ft. Discharge rate 1,000 t.p.h. Storage capacity 200,000 cu.m. Vessel moors to buoys and uses anchor.

Berthing and Mooring: Night berthing is not permitted.

Normally, 1 tug is used by vessels of up to 14,000 d.w.t. and 2 tugs are used for larger vessels. The tugs tow on the hook using ship's lines. 1 tug is used for unberthing.

Vessels approach the berth from a general Easterly direction and are swung off the head of the pier and backed stern first into the berth. Vessels berthing at the pier head use both anchors with about 7 shackles in the water and secure lines from the stern to 4 mooring buoys near the pier head.

Vadoil-Fertimont Pier: Length 700 m. Depth at head 39 ft. Discharge rate 700 t.p.h. Storage capacity at Vadoil 300,000 cu.m. Vessel moors using ship's anchor and 5 buoys. There is a berth along the North side for tankers unloading sulphuric acid, unloading rate 300 t.p.h.

Industria Italiana Petroli Pier: Length 420 m. Depth at head 31 ft. Vessel moors to 4 buoys. Discharge rate 800 t.p.h. Storage capacity in excess of 100,000 cu.m.

Chevron Oil Italiana Pier: length 435 m. Depth at Head 31 ft. Vessel moors using ship's anchor and 4 buoys. Discharge rate 250 t.p.h. Storage capacity 100,000 cu.m.

Berthing and Mooring: Night berthing is not permitted.

Normally, 3 tugs are used for berthing. The tugs tow on the hook using ship's lines. 1 tug is used for unberthing.

Vessels approach the berth from a general Southern position steering North. When about 500 m. off jetty head, starboard anchor is dropped. With tugs' help, the vessels are swung in order to present the stern to the head of the jetty. Port anchor is dropped. Normally 7 – 8 shackles of chain are used. The stern is moored with 2 lines on each of the 4 buoys. Vessels up to 15,000 d.w.t. can be moored, maximum draft is about 29 ft. Synthetic ropes are recommended.

Sarpom Buoyage: Approximately 1,340 m. from the Quiliano mouth there are the pipe-lines Quiliano-Trecate's buoys at a draft of 115 ft. for mooring tankers up to 260,000 d.w.t.

By means of its submarine piping they get a pumping rate of over 10,000 t.p.h. Its plant ashore contains a coastal storage from which goes a pipe-line 146 km. in length reaching the Sarpom refining mill (See "Quiliano Terminal").

DENSITY: 1025.

FRESH WATER: Can be supplied alongside the quay by hoses, rate of delivery 10 t.p.h. The cost amounts to 1,092 Lire per ton plus 6,621 Lire for the use of hose up to 50 m. long; plus 13,224 Lire for the use of hose up to 150 m. long; plus 19,863 Lire for the use of hose over 150 m. long. Possible to supply fresh water in roads, weather permitting.

FUEL: All grades available from major oil companies and supplied by barge only.

FIRE PRECAUTIONS: Tankers or vessels handling dangerous cargoes, are requested to use vigilance prevention fire service carried out by 2 men, one on board and the other ashore, supplied by the "Cooperativa S.Barbara III°" (fire brigade). No repairs or gasfreeing to be carried out without permission of Port Authority.

GANGWAY/DECK WATCHMEN: Optional, can be employed from shore if required.

HATCHES: Opening/closing hatches normally carried out by crew, on request stevedores can be arranged.

CUSTOMS ALLOWANCES: Bond sealed. 50 cigarettes or the equivalent in tobacco per person for the first day in port, wine and spirit allowance is made for normal daily consumption on board.

CONSULS:

Denmark	Tel. 28.813	Netherlands	Tel. 38.62.55
France	„ 38.451	Spain	„ 26.106
Malta	„ 26.828	Sweden	„ 20.286
Norway	„ 27.333		

REPAIRS: All types of repairs possible except drydocking.

In Savona the Classification Society is represented by the R.I.N.A. (Lloyd's Register of Shipping). The A.B.S., N.V., etc., are represented in Genoa (40 km. from Savona).

SURVEYORS: General cargo and bulk cargo Inspectors available at Savona or in case of need from Genoa. Petroleum Inspectors such as Saybolt-Van Duyn available at Siracusa with office in charge also for Savona.

Locally available only Italian Register of Shipping (R.I.N.A.) all other Classification Societies available from Genoa. The representative of Salvage Association available from Genoa.

REPATRIATION: All facilities available for crew changes, good railway connections.

AIRPORT: Genoa (Cristoforo Colombo) distance 40 km.; Milano (Malpensa and Linate) distance 210 km.; Torino (Caselle) distance 149 km.

TIME: GMT plus 1 hour. From April to September, GMT plus 2 hours.

HOLIDAYS: New Year's Day, (1st January); Town's Patron Saint, (18th March); Liberation Day, (25th April); Easter Monday; Labour Day, (1st May); Assumption Day, (15th August); All Saints Day, (1st November); Immaculate Conception Day, (8th December); Christmas Day, (25th December); Boxing Day, (26th December).

POLICE/FIRE/AMBULANCE: Police, Tel. 28.868; Ambulance, Tel. 20.104 (White Cross), Tel. 80.68.68 (Red Cross); Fire, Tel. 33.333 and 80.24.41.

EMERGENCY CO-ORDINATION CENTRE: Harbour Master, Station of Savona. Tel: (019) 386656 (Officer on duty 24 hours a day).

TELEPHONE: Can be connected on board.

SERVICES: Cleaning of holds can be carried out by "Coop. Lavoro Marina"; Tank-washing is possible only if the washing water is kept on board. Compass adjusting performed by Prof. G. Manella c/o Nautical Institute.

BANKS:

Banca D'America e D'Italia, Via Garibaldi, 5, 16100 Genova. Tel: 284141 (with automatic selection). Telex: Baigen 270023.

The above bank is a branch of Bank of America, San Francisco.

Banca Commerciale Italiana, Via Paleocapa, 121 r. Tel: 386407. Telex: 270059.

Istituto Bancario S. Paolo di Torino, Corso Italia, 90 r. Tel: 802051. Telex: 270514.

STORING: See "Prelims".

1. Vessel can be stored both by barge or truck.
2. Vessel can store from barge during loading or discharging.
3. Trucks can proceed along side at the berth only in the commercial port and not at the private piers.
4. Fork lift trucks can be used on the jetty to handle stores.
5. Goods which make up stores loaded or transhipped on vessels sailing from Savona, are considered goods in-transit or re-exportation when foreign and considered final exportation when national or nationalised goods.
6. Local riggers and on request stevedores can be employed to assist with storing.

SHORE LEAVE: Allowed. Launch service available for vessels on the roads.

IDENTIFICATION CARDS: Shore passes issued by the Immigration Office.

DELAYS: Normally no delays expected.

SHIP SUPPLY SERVICE: Provisions are supplied by the local ship chandlers who by their own motorboats can join off-shore ships (about 20 miles from the harbour).

Names and addresses are as follows:

La Naval Provveditoria, Via Quarda Superiore 3-2, 17100 Savona (Italy). Tel: 30.334. Cables: Navalprovis.

Francesco Baglietto & Figlio, Via Quarda Inferiore 40-42-44 r., 17100 Savona (Italy). Tel: (019) 21.587. After hours (019) 803987.

Montanari s.r.l., Via del Molo 3 r., 17100 Savona. Tel: (019) 25.047 – 26.749.

For vessels not alongside a quay, crew and passengers are landed by the motorboats of the following firms:

I.M.A.R.T. s.n.c. di Spezialetti – Saccone & C. Impresa Marittima Artigiana Rimorchi Trasporti, Corso Vittorio Veneto 50/10, 17100 Savona (Italy). Tel: (019) 802.537 – 28.917.

DOCUMENTS:

6 Crew Lists.
6 Passenger Lists.
Provisions Manifest.
Manifest of Crew Personal Effects.
Cargo Manifest.
Arrival Report, completed on arrival.
Maritime Declaration of Health Certificate, completed on arrival.
Ship's Certificates including Italian Anchorage Dues.
Vaccination Certificates for sighting.

PILOTAGE: Pilotage is obligatory for vessels over 500 g.r.t., both for entry and leaving from Mar Grande. The Pilot boards arriving vessels at a distance of not less than 1 mile from the lighthouse of Capo S. Vito, and leaves on sailing when the line between the S. Vito and S. Paolo lights has been passed.

RESTRICTIONS: Entry allowed day and night.

In Mar Grande, the bottom slopes gradually upwards from the mouth (more than 30 m. at the centre) to the facing coastline (about 14 m.). In Mar Piccolo, the maximum depth of 12.5 m. in the first inlet and of 9.5 m. in the second inlet which slopes upwards towards the coast.

Vessels drawing more than 16 m. must pass to the West of the light buoy with radar reflector located about 1 mile to the South of the mouth of Mar Grande and which indicates the Western limit of two areas of 17 m. and 18 m. depth.

Passage through the navigable channel: Merchant vessels whose passage necessitates the opening of the swing bridge and all foreign flag vessels must obtain authorisation to pass through the channel from the Port Captaincy. Methods of passage are indicated in the Mediterranean Sailing Directions.

Prohibited Areas: To the South of the Islands of S. Pietro and S. Paolo is an area in which transit is prohibited.

MAX. SIZE: Tankers up to 72 ft. draft may berth at buoy mooring.

Also see "Berthing".

HEALTH: Free Pratique is automatic for vessels coming from E.E.C. countries. From other countries it may be obtained via radio, by applying to "Sanimare Taranto" between 12 and 6 hours before arrival.

Yellow fever vaccinations could be arranged by calling Bari port doctor to Taranto with two days' notice.

RADIO: Vessels at sea may communicate with Taranto by the following means:

By R/T via Crotone Radio, listening continuously on 2182 kHz.

By VHF via Bari Radio, listening on Channel 16 from 0600 – 2400 hrs.

By VHF via the Port Captaincy, listening continuously on Channel 16 and the Pilot Station listening continuously on Channel 12 (Pilot service and safety only).

Tankers: Tankers carrying/or to load over 2,000 tons of petroleum products have to send a cable 36 hours in advance to "Compamare Taranto" containing the following details:

Ship	Type/call sign/name/flag/g.r.t./n.r.t./d.w.t.
Age	Age of the ship/LOA/draft fore-amidship-aft.
Arr	ETA to pilot station.
Cargo	Type/quantity of cargo on board/or to be loaded.
Fire	If vessel equipped with inert gas system and its efficiency.
Solas	Whether Safety Certificates issued according to Solas 1960 or Solas 74/Protocol 78 or Solas 74.
I.O.P.P.	Date/place/validity I.O.P.P. Certificate.
Paris	Date and place where carried out last 6 monthly inspection in European ports in accordance with Paris 1982 memorandum.
Poll	Date and place of issuance/validity of Certificate of Insurance or other financial security in respect of civil liability or oil pollution damage – not Tovalop.
Remarks	Any news concerning deficiencies to hull/engine/steering gear/safety equipment.

Tankers belonging to countries who are not signatories to the Solas 74/Protocol 78, will have to anchor in Mar Grande Roads and are subject to a visit by the authorities as per Memorandum of Understanding on Port State Control.

TUGS: 6 tugs (1,000–1,920 h.p.), available. Compulsory for vessels over 20,000 g.r.t., 2,000 g.r.t. carrying hazardous cargo and vessels which have to pass through the navigable channel.

BERTHING: *Outer Harbour:* Quay Nos. 1/2, combined length, 1,050 ft. (32 m.); max. draft, 26 ft. 3 in. (8 m.); Quay No. 3, length, 820 ft. (250 m.); max. 27 ft. 10 in. (8.50 m.).

Italsider Pier: *Eastern side* (for discharge of ore, coal, steel scrap): length, 4,456 ft. (444 m.); depth alongside 52 ft. 6 in.; max. draft allowed 50 ft. Vessels up to 200,000 d.w.t. have berthed at Italsider Jetty No. 4. Length 1,353 ft. Depth alongside 80 ft. Discharge rate for iron ore (2 Dravo unloaders) 1600–2400 m.t.p.h. Discharge throughout 24 hours.

Western side (for discharge and loading of finished goods): length, 1,566 ft. (477 m.); depth alongside 33 ft.

Safety: During Winter time, berths are subjected to heavy swell which may force vessels to leave same, as the breakwater effectively protects only the Eastern side. However, work is now in progress to lay new breakwater, which should also render safe the Western side.

Head of the Pier: Width, 448 ft. (136.55 m.); max. length of vessel, 459 ft. (140 m.) or up to 525 ft. (160 m.), subject to vessels laying at Western and Eastern sides being berthed at not less than 164 ft. (50 m.) from head of pier; depth alongside, 32 ft. 8 in., (10 m.).

Cement Pier: Max. depth is 8.50 m.; suggested max. draft 8.20 m. (26 ft. 10 in.); max. vessel length acceptable, 120 m.; rate of loading (in bulk): up to 280 mt.p.h.; (in bag): up to 35 mt.p.h.

TANKERS: *Aviation Gasoline Oil Jetty:* Tankers moor with 2 anchors and with stern made fast to 4 buoys. Connection by stern. Vessel lifting up hoses (9 in.) from the jetty (breadth 9 ft., length 1,476 ft.). Length of pipe-line from 0.5 to 1.5 miles.

Access to vessel by boat. No water or bunkers available. Max. draft 25 ft. Night crossing of Mar Piccolo up to and from jetty is not allowed.

Navy Oil Jetty: Pier, terminating in 2 quays, which may accommodate 2 vessels each. Max. draft 33 ft., hoses 300 mm. Night movements allowed.

Petroleum Pier: Exclusively used for handling petroleum products at its 4 berths and is connected by several pipe-lines with Shell Italiana Refinery, as well as with the bulk plants belonging to Agip, and Industrie Chimiche de Gaeta, which are all located in the industrial area of Taranto adjoining the petroleum port. Access to the pier is through a dock 350 m. long and 33 m. wide. The pier itself is 560 m. long.

Berth Nos. 1 and 2 (after berths), max, length of vessel, 175 m. (557 ft. 3 in.); max. draft, 9.50 m. (31 ft. 2 in.). Max. depth, 10 m. (32 ft. 9 in.). Bunkers from line, (8 in. hose, 10 in. pipe-line). Water, by barge. Loading arms, 2 of 10 in., 3 of 8 in.

Berth Nos. 3 and 4 (fore berths), max. length of vessel, 208 m. (682 ft. 5 in.); max. draft, 10.50 m. (34 ft. 5 in.); max. depth, 11.00 m. (36 ft. 1 in.). Bunkers and water, as per berths 1 and 2. Loading arms, 6 of 10 in.

Pier is fitted with 1 line for each product to be loaded (14 lines) and a 20 ft. line for ballast discharge. Any quantity of ballast may be received by the pier. Access to the pier for provisions only via boats.

Shell CBM: Shell Terminal for discharge of crude oil is situated in Mar Grande N.E. of St. Paul's Island. Distance 3,000 m., and bearing 048° from light at the head of St. Paul Breakwater. Vessels moor at Q Buoys with port anchor down. Buoys are equipped with intermittent red lights and quick-release hooks.

The hoses (2×12 in.) are signalled by marker floats and have to be lifted by vessel with derrick capacity at least 8 tons. The terminal is connected with the refinery by a 34 in. pipe-line, 5 km. long. Max. length acceptable 330 m., max. draft 72 ft., max. d.w.t. 200,000 tons.

2 tugs recommended for berthing with good weather and without North-westerly winds. Night mooring and unmooring allowed.

Agip/Anic Terminal: Vessels moor with 2 anchors and with stern made fast to 4 mooring buoys.

Maximum draft 26 ft. 3 in. (8 m.). Under rough weather conditions vessels may have to leave the terminal, position being exposed. No mooring at night allowed, while unmooring is permitted. Supplies, bunkers, water, and connections with vessel by barge.

For methanol, tank inspection is usually carried out in the roads, before berthing.

Pozzi Ferrandina SPA Terminal: 3 sea lines, the hoses of which must be lifted from the sea bottom by ship's gear. 1 sea line (6 in.) is used to load methanol and 1 (6 in.) to load soda. Third (3 in.) sea line is for water. Port side hose connection. Pipe-line length 0.25 miles.

Vessels moor with starboard anchor and made fast to 3 buoys astern and 1 port. Night movements are not allowed. Max. draft 22 ft. Max. length 85 m.

Industrie Chimiche Di Gaeta, G.I.D. Terminal: Situated further West of Pozzi Terminal, it has 3 sea lines with hoses of 6 in. and 10 in., which have to be lifted from sea bottom.

Vessels moor with port anchor and make fast to 3 buoys astern and 1 buoy forward starboard. Max. draft 22 ft. Night movements not allowed.

BRIDGES: 1 bridge in Inner Harbour. Opening times: 0020 – 0420 hrs., 0830, 1510, 2110 hrs. Opening on Agent's request to Harbour Master (24 hours' notice requested for day opening time). Max. speed in the canal, 6 knots.

MEDICAL: Civil hospital and private clinics, also military hospital and ambulance service of Italian Red Cross.

STEVEDORES: Available. Normal working from 0700 to 1500 hrs. For work performed in overtime/and/or holiday, the "Tariffs to the Workers" are increased as follows:

Day	*Shift*	*Increase*
Weekdays	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Saturday	1100–1500 hrs.	40%
	1500–2300 hrs.	40%
	2300–0700 hrs.	80%
Sunday	0700–1500 hrs.	50%
	1500–2300 hrs.	80%
	2300–0700 hrs.	100%

DENSITY: 1029 – 1031. Tides negligible. Maximum variation 1 ft.

FRESH WATER: Available at all quays from 0700 to 1700 hrs. Also available by barge of up to 190 tons capacity.

FUEL: Available by barges from Agip; Shell and Sincat. 48 hours' notice requested, aside from usual stemming. Also available at the tanker berths by pipe-line.

Lubricating Oil. Available from Shell, Mobil and Esso.

FIRE PRECAUTIONS: Performed by fire brigade and compulsory to all tankers undergoing repairs/dry docking. It is requested and paid for by the shipyard, which afterwards charge same directly to the Owners.

GANGWAY/DECK WATCHMEN: Available. Hourly cost, lire 450 per watchman used (lire 500 on Sunday and holiday).

OPENING/CLOSING HATCHES: Usually carried out by crew, but stevedores also carry out this operation.

CUSTOMS ALLOWANCES: 40 cigarettes and 1 opened bottle wine/spirits per man.

IDENTIFICATION CARDS: Required. Shore passes issued by local police.

CONSULS: Spain, France, Panama and Norway.

REPAIRS: All major repairs undertaken.

DRY DOCKS: 2 floating docks owned by Stabilimenti Navali Societa per Azioni Taranto (Telex: 860020) with dimensions as follows:

	Dock No. 1	*Dock No. 2*
Length at support level	699 ft. 8 in.	808 ft. 4 in.
Length overall	765 ft. 4 in.	869 ft. 4 in.
Breadth at support level	121 ft. 3 in.	137 ft. 1 in.
Depth	29 ft. 8 in.	27 ft. 9 in.
Lifting capacities	28,000 tons	40,000 tons

Max. draft acceptable in channel leading to the shipyard is 33 ft.

REPATRIATION: Good facilities exist.

AIRPORT: Located at Grottaglio, 20 minutes by car from the city. It is served by 4 daily connections with Rome, and 1 to Naples.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day (1st January); Epiphany Day (6th January); Saint Joseph's Day (19th March); Liberation Anniversary (25th April); Easter Monday; Ascension Day (19th May); Corpus Domini Day (9th June); Labour Day (1st May); Republic Foundation's Day (2nd June); Saint Peter and Paul's Day (29th June); Assumption Day (15th August); All Saints' Day (1st November; National Unity Day (4th November); Immaculate Conception Day (8th December); Christmas Day (25th December); Saint Stephen's Day (26th December); Town Saint Patron's Day (10th May), at Taranto.

TELEPHONES: No facilities for placing telephones onboard. Vessels in the roads may make connection via VHF radio.

SERVICES: Compass adjusting, divers, frogmen, daily refuse collection, etc. available.

Slop collection: Societa Armatoriale, Taranto provide a slop collection service for ships passing by Taranto.

The slop-ship Panda (about 16,000 cu.m.) is equipped for removal of bilge water, dirty ballast and slops, having a loading rate of about 200 cu.m./hr., with oil/water separators capable of 150 cu.m./hr.

The company's mailing address is Societa Armatoriale Sri, Corso due Mari 18, 1-74100 Taranto, Italy. Telex: 860864 (AB: diver i).

SHORE LEAVE: Allowed.

GENERAL: The port area of Taranto comprises of areas:

Mar Grande:

(a) The commercial port defined to the East by the S. Eligio Mole and to the West by the first projection (S. Cataldo Mole).

(b) The industrial port defined to the East by the second projection and to the West by the fourth projection of the industrial sector, and also to the West by Punta Rondinella, beyond Mar Grande.

(c) The oil port constituted by the I.P. Pier (this also includes Agip and Montedison), by the pipe-line terminals of Agip and Anic-Liquichimica, together with the I.P. buoyed area.

(d) The military pier of Chiapparo as far as operations of merchant vessels are concerned.

Mar Piccolo:

(a) The Cariati and Garibaldi Berths.

(b) The berths and basins of the Taranto Shipyards.

(c) The Military Aeronautical Forces Pier as far as operations of merchant vessels are concerned.

The usages of the berths in the port of Taranto, apart from various contingent arrangements made by the Port Captaincy Command, are as follows:

Commercial Port: S. Eligio Mole: For bunkering from land to vessel, for restocking bunker deposits, for embarkation of port services: Pilots, mooring gangs, fire watchmen, for the launches of Customs and Police. In relation to the requirements of the port services at S. Eligio Mole, vessels carrying various cargoes may also berth.

S. Eligio Berth: For pontoons and tugs.

Wharf No. 1 (Commercial Berth): Intended for commercial traffic.

1st projection (S. Cataldo Mole): Intended for commercial traffic.

Wharf No. 2 (between the 1st projection of S. Cataldo Mole and the 2nd Italsider projection): Intended for commercial traffic.

Industrial Port: (Partly under concession to Soc. Italsider of Genoa for the Fourth Taranto Ironworks and partly to Soc. Cementir).

2nd Italsider projection: East Side: For discharging ore and coal. Head: For discharging category C oil products; West side. For loading and discharge of metal products.

Wharf No. 3 (between 2nd and 3rd Italsider projections): For loading and discharging metal products.

3rd Italsider projection: East and West Sides: For loading and discharge of metal products. Head: For discharging category C oil products.

Wharf No. 4 (between 3rd and 4th Italsider projections): For loading bagged cement.

4th Italsider projection: East Side: For discharge of iron ore and coal, and for loading bulk cement.

Italsider Mole (new port basin to the West of Punta Rondinella): West Side: For loading and discharging metal products.

Oil Port: (Under concession to the companies I.P., Agip, Montedison and Anic-Liquichimica). For loading and discharge of oil products of all hazardous categories and chemical products.

Cariati Berth: For motorised fishing vessels and small fishing craft.

Garibaldi Berth: For fishing vessels and laid-up craft.

AUTHORITY: Il Comandante Colonello di Porto. Ministero della Marina Mercantile.

TORRE ANNUNZIATA: 40.45 N. 14.27 E. (See Plan)

DOCUMENTS and all General Information – refer to "Naples".

Arrival: An inspection is made on board by the Finance Guard (Customs Department) to check cargo documents in respect of goods and the composition of provisions on board. Then the Master of the vessel or his Representative (Ship's Agent) presents to Customs the manifest for arrived goods together with relative commercial documents. At the request of the Ship's Agent, the landing of goods is authorised on the "Discharge Copy" of the manifest which sets out each individual item to be landed.

Goods can be discharged into the Customs Warehouse or Private Warehouse to await Customs Clearance.

Departure: Prior to departure of vessel, the Customs releases a departure manifest, setting out a list of any goods in transit or destined for other Italian or foreign ports.

PILOTAGE: Pilotage is obligatory for vessels over 500 g.r.t., and is effected by 2 Pilots of the Castellamare di Stabia Corps of Pilots. Tel: 8717196. Pilots use a wooden pilot cutter 10 m. long and with a speed of 10 knots.

RESTRICTIONS: Entry permitted during daytime only for vessels in excess of 80 m. LOA.

Mainly a fishing port with few facilities for larger vessels. Reported not to be suitable for larger vessels during winter months due to frequent high winds and heavy swell within the harbour.

MAX. SIZE: Length 472 ft., draft 30 ft.

VHF: Radio station of the Port Captaincy, with VHF unit operating between 0800 hrs. and 2000 hrs., listening out on Channel 16, and working on Channel 15.

TUGS: The port has no resident tugs available; if required, they can be requested from Naples.

3 line boats available to assist with mooring.

BERTHING: *Calata Crocelle:* 1 berth only. Length 315 m. of which 200 m. is in use. Depth alongside 6 m. – 7 m. Used for commercial operations and by fishing vessels.

Molo di Levante: 1 berth only. Length 250 m. Depth 8.5 m. – 9 m. Used for commercial operations; general cargo, cereals, iron pipes, etc. 2 towers each with 2 suction pipes, rate of each tower 600 t.p.h. The silo is owned and operated by Societa Lavorazione Cereali del Mezzogiorno (Tel: (081) 8615991).

CRANES: 1×20 ton quay crane, 1×40 ton mobile crane.

CARGO HANDLING FACILITIES: 1 grain silo, capacity 60,000 tons, loading rate 1,200 t.p.h. Loading onto rail trucks or lorries by gravity using hoppers with overall delivery rate 250 t.p.h.

STEVEDORES: Working Hours: 0800 – 1200 hrs. and 1300 – 1700 hrs.

MEDICAL: Port doctor available. Hospital with 100 beds.

FRESH WATER: Available.

FUEL: Available. By tanker or barges owned by Messrs. Garolla of Naples.

WATCHMEN: Not available.

AIRPORT: Naples Airport (Capodichino) is 23 km. away, and has domestic services to Rome, Milan, Bologna, Brindisi, Catania, Genoa, Palermo, Turin, with 2 international flights per week to London.

BANKS: Banca Commerciale Italiana, Corso Umberto I 153. Tel: 8615100.

Credito Italiano, Corso Vittorio Emanuele III^{e} 307. Tel: 8615240.

Banca Nazionale del Lavoro, Via dei Mille. Tel: 8612003.

EMERGENCY CO-ORDINATION CENTRE: Comando in Capo del Dipartimento Militare Marittimo del Basso Tireno (Military Naval High Command for Lower Tyrenia), Via Santa Lucia, Naples. Tel: (081) 406244.

STORING: See "Prelims".

1. Yes, using own means of handling.
2. Yes.
3. Yes.
4. Yes.
5. See above.
6. Yes.

SURVEYORS: None.

GENERAL: The port has no Ship's Agents, Forwarding Agents, or Naval Suppliers.

Two road vehicle weighing bridges on the East Mole, one operated by Customs with a capacity of 40 tons, and one by SO.LA.CE.M. with a capacity of 80 tons.

There are ample electric train services to the rest of Italy from the town station. Torre Annunziata is connected by motorways (A3) with Naples and Salerno, and by main roads to Naples, S. Giovanni Teduccio, Salerno and Sorrento.

Post, telegraph and telephone offices are a short distance from the port in the town.

One lifeboat, 2 engined with a speed of 24 knots, 5.3 m. long, owned by the State and operated by Circomare.

There is no Fire Brigade.

The port is subject to a slow siltation process due to the River Sarno which comes into the sea 1 mile to the South.

The cross wind is from the West. The Scirocco and the Libeccio cause a strong dangerous surf for vessels berthed at the quays.

The tide brought up by the Libeccio sometimes comes right over the West Mole.

When works currently in hand are terminated, involving the construction of a small elbowed quay about 130 m. long in the West area of the port, this will supply a safe berth for fishing vessels, which will also be advantageous for the nearby Calata Crocelle, which will thus remain available for commercial operations only. There are good areas for future development.

DEVELOPMENTS: Calata Crocelle being extended by 35 m. West Breakwater being extended.

AUTHORITY: Ufficio Circondariale Marittimo di Torre Annunziata, Porto di Torre Annunziata, 80058 Torre Annunziata. *Tel:* (081) 8611855, 8622978. *Contact:* Lieut. Pietro Lafata, Port Captain.

TRIESTE: 45.39 N. 13.45 E. (See Plan)

PORT LIMITS: From Barcola (4 km. East of Capo Miramare) to Zaule, in the Muggia Bay. The roadstead is 18/24 m. deep. If Readiness is declared before 1200 hrs. laytime commences at 1300 hrs. If readiness is declared between 1200 hrs. and 1700 hrs. laytime commences at 0800 hrs. the following day. The declaration of "Readiness" is made when the ship docks at the operative pier or when the ship anchors in the roadstead.

DOCUMENTS:

For Customs:
2 Cargo Manifests.
1 Stores List.
1 Provisions List.

For Port Authorities:
Arrival Report.
2 Crew Lists.
3 Passenger Lists.

For Police:
1 Crew List.
1 Passenger List.
Shore Passes, provided by Agents.

For Port Health:
Maritime Declaration of Health.
Also see "Shipmasters Report".

PILOTAGE: Compulsory for vessels over 499 g.r.t. Location of pilot station for large tankers is in approximate position: Lat. 45° 37′ N., Long. 13° 43′ E. Call Pilot on VHF Channel 14, working Channel 10.

For smaller vessels Pilot boards in approximate position: Lat. 45° 39′ N., Long. 13° 44′ E.

ANCHORAGE: No Pilot required to anchor in roads. Normal anchorage for vessels awaiting entry is to the West of Luigi Rizzo Breakwater where the holding ground has been reported to be poor.

MAX. SIZE: Tankers up to 1,000 ft. LOA, draft 54 ft. 3 in. and 160,000 S.D.W.T. at SIOT Terminal Berth No. 3 and 1,076 ft. and 215,000 S.D.W.T. at SIOT Berth No. 4.

HEALTH: Free Pratique is granted by the Local Health Officers who board the vessels on arrival together with Port Authorities. The Pratique can also be requested by cable, addressed to "Sanimare – Trieste" and stating the port of origin, the number of crew and general health condition on board.

RADIO: Trieste Radio call sign IQX, operating continuously. Radio Telephony and/or telegraphy can be used. RTF Channels 8, 12, 16, and 500. ETA to be sent 48 hours in advance to Agent. Any change of ETA of more than 1 hour should be reported.

VHF: Harbour Master – call sign 'Compamare Trieste' on Channel 16. Also see "Pilotage" and "Tugs".

TUGS: 8 tugs available up to 3,000 h.p. 6 tugs also available up to 1,500 h.p. Tugs normally join vessel at pilot boarding station. Ship's lines used. Tug assistance is compulsory for tankers. Tugs equipped with VHF and foam fire fighting equipment. VHF working Channels 10/12.

BERTHING: Max. draft allowed at berths as follows:

Punta Franco, Vecchio, ore pier, 28 ft.; Other berths, 21 ft. Punto Franco, Nuovo, ore pier, 30 ft. silos, 31 ft. 5 in.; general cargo, 31 ft. Punto Franco, Scalo Legnami, 24 ft. Molo Martello, 30 ft., max. length of ship, 171 m. Italsider, berths, 45 ft.

Pontile Aquila, oil pier, 38 ft. Italcementi, berths, 30 ft. Vetrobel, berths, 30 ft. A.F.A., berth, 21 ft.

Mole No. 7 (Container Terminal), max. draft 52 ft.

SPECIALISED CARGO HANDLING FACILITIES: Wheat storage-bin for cereals and oil-seeds, capacity 30,000 tons, with 4 pneumatic unloaders. Auxiliary set, capacity 16,000 tons, with 3 pneumatic dockers.

Coal and ore discharge at Pier 5: 3×6 ton bridge cranes and 6×6 ton jib cranes. Discharge rate 200 tons per shift. Max. draft 9.5 m.

Coals and minerals plant, Molo V, with 7 cranes and 3 bridge cranes.

Coals and minerals plant Italsider pier with two 25-ton unloaders. Rate 400 tonnes/hr. for coal and 500 tonnes/hr. for iron ore.

Unloading, loading, alcohol and other liquid stowage plant, capacity 5,340 cu.m.

Maturity, conservation and disinfestation fruits and vegetables plant. Refrigerant, capacity 3,700 tons.

Container Terminal: Quay length 650 m., total area 20 ha. 4 rail-mounted 42 ton gantry cranes (portainer) and other modern and special installations for unloading/loading, moving and parking containers.

Roll-on/Roll-off: 3 ramps at Mole No. 7.

STEVEDORES: The working hours for the harbour operations are: 1st turn from 0730 to 1400 hrs. 2nd turn from 1400 to 2030 hrs. On Sundays and holidays the 2nd turn is limited to ferry boats, container ships, unloading/loading of live animals, and to perishable goods operations. Customers can take advantage of a possible 3rd turn in the labour days, Monday to Friday, from 2100 to 0330 hrs.

Night work, Sundays and holiday work, the 2nd turn of Saturday and the continuation of the turn is considered as overtime work.

MEDICAL: All facilities available. Preferable order in advance if required on holidays.

TANKERS: No slop discharge facilities; no repairs allowed to tankers at loading/discharge berths; no trucks or lorries allowed at Aquila Oil Pier which can only be approached by motor boats.

Restrictions: Night berthing is not permitted at the Aquila berth except for tankers under 3,000 d.w.t.

When the temperature is below 0°C, vessels calling at the Aquila berth, may, on occasions, not be berthed on account of ice layers forming on the surface of mooring buoys.

Berthing operations are also restricted at all terminals when wind exceeds 80 km./hr. (43 knots).

Cautionary Advice: The Bora is a violent Northeasterly wind, which in the Port of Trieste blows from a general East-Northeasterly direction. It is exceptionally strong from November through February and can, within a few hours, reach gale or hurricane force. The Bora is accompanied by a rise in barometric pressure and a drop in temperature, and freezing conditions can occur.

A very close watch on weather and moorings is therefore necessary at all berths in the harbour.

Tugs: Towage is compulsory for vessels over 3,000 gross tons.

Berthing Operations: Usual seamanship precautions must be taken approaching berths.

Wires are permitted after the vessel has been bonded using bonding wires.

Pilot/tug/mooring boat communications during berthing operations are carried out by walkie-talkie.

Two mooring boats are normally used.

Transalpine Pipe-line Terminal (SIOT).

The following are some of the regulations for vessels calling at SIOT.

REGULATIONS

Arrival of Vessels: No vessels may enter the SIOT port area except in strict compliance with instructions issued by SIOT.

Extraordinary Docking Conditions: Damaged vessels must report to SIOT well in advance of their date of arrival at the port area. Should SIOT consider a vessel to be unsuitable for discharge at the terminal, said vessel may be refused admission, or ordered to lay off, even after discharge operations have been started, or be admitted for discharge only on specially defined terms.

Docking and Sailing Manoeuvres: SIOT does not assume any responsibility for the docking or sailing manoeuvres of any vessel, including towage and mooring and for any pollution caused by the vessel. Pilotage and sufficient number of tug-boats with efficient power are compulsory.

Mooring Operations:

1. The right to assign a berth to incoming vessels for the discharge of cargo rests with SIOT.

2. All vessels must securely and tautly be moored at all times when at jetty. Masters' attention is drawn to the peculiar conditions of Bora wind which can blow with little warning and with extreme violence. Hawsers and mooring lines must be secured on quick release hooks and pulleys provided for the purpose.

3. Access to and from a vessel will be established by way of a SIOT gangway. The gangway will not be placed on board before the following conditions are met:

a) The vessel must be securely moored.

b) The vessel must be earthed to the jetty.

4. Access from the ship's deck to the gangway, if required, is to be provided by the vessel.

Traffic Within the Port Area:

1. Access to or from a vessel is not permitted until the vessel has been properly cleared by the appropriate Authorities.

2. Employees and Representatives of SIOT on duty must be granted access to the vessel to perform their tasks, the Master or his representatives shall furnish them with all pertinent data that SIOT may require and must give them permission to personally inspect all facilities necessary for handling cargo.

3. Passes provided by the Police must be issued by the Master to crew members and other for shore leave purposes.

4. Any person wishing to enter the SIOT port area must have in his possession a pass as prescribed by SIOT and the Authorities. Once in the port area he must report to the Pier Master for the necessary instructions regarding behaviour in the port area.

5. All traffic between the ship and shore as far as it must pass through the premises of SIOT is restricted exclusively to the tanker jetties and their access roads. Unless specially authorised no motor vehicles are allowed on the piers. All transportation will be performed by a special bus-service provided by SIOT.

Cargo Operations:

1. Before receipt of a cargo, SIOT, on behalf of the consignees will measure the contents of the tankers' cargo tanks at Trieste or may accept a measurement made prior to the arrival at Trieste and will take an average sample.

The binding determination of the quantity received by SIOT will be made by means of manual gauging in the storage tanks of Trieste Tank Farm or with the aid of automatic measuring device and according to the legal, Customs and fiscal requirements.

If the measurements in the storage tanks at Trieste Tank Farm show a difference exceeding 0.5% of the quantity in metric tons stated in the loading documents, SIOT will notify in writing the Master, if possible, advising at the same time the consignee.

2. All sea valves, overboard or other appropriate valves, isolating the cargo system from the sea, must be closed prior to the start of discharge operations and must be checked and where possible sealed. Where tankers are fitted with normal ballast system such sealed valves may only be opened with the consent of SIOT and providing alternative cargo isolating valves can be closed and sealed.

In all other cases valves must remain sealed and closed throughout discharge. Authorisation to open these valves must be obtained from SIOT prior to ballasting.

3. Discharge operations should be carried out as far as possible, without interruption and within the shortest possible time. The maximum pressure permissible on the shore gauge is 10 bar.

4. The completion of discharge shall be agreed by both, SIOT and the Master and if required by the Master or the consignee, both shall sign a "Qualified Certificate on the Petroleum Remaining On Board".

5. Should any complaint arise which may have a bearing on the quantity or the quality of the cargo, or on the discharge operations, SIOT will lodge a protest in writing, the receipt of which must be confirmed by the Master.

6. Inert cargo tanks and tank washing with petroleum:

a) Discharge of inerted ship tanks and tank washing with petroleum when agreed to by the Port Authorities will only be permitted when it is carried out in full accordance with the "Guidelines for Tank Washing with Crude Oil", latest edition, published jointly by: International Chamber of Shipping and Oil Companies International Marine Forum London.

b) In particular, inerted cargo tanks of vessels shall remain sealed and kept under positive inert gas pressure throughout the stay alongside except as required for cargo measurement and sampling.

Vessel Berth Occupancy:

1. The estimated discharge time and time for normal ballast operation shall be mutually agreed between SIOT and the Master or his authorised representative.

2. The pumping program shall be determined in agreement between SIOT and the Master. SIOT is entitled to interrupt discharging and have the berth cleared in case of emergency.

3. Upon completion of the discharge and ballast loading the vessel shall clear the berth subject to consideration of safety. Bunkering and fresh water loading, if required, shall, if possible, take place during discharge.

4. As berth occupancy time, tankers shall be allowed the running hours tabled below appropriate to the cargo quantity, Sundays and holidays included:

Cargo Quantity (1,000 tonnes)	*Max. Allowed Running Hours excl. COW*	*incl. COW*
up to 50	30	39
50 up to 100	33	42
over 100	36	45

It is expected that the unloading rate per hour will exceed 5% of the total cargo capacity of the respective vessel.

Running hours shall commence when the vessel has her first rope ashore and shall end when the unloading arms are disconnected on completion of discharge and the last rope ashore is off. If the unloading is prohibited and/or interrupted at the request of SIOT or by request of the Authorities, the running hours shall be extended by the same number of hours that the unloading was prohibited and/or interrupted unless the reason for prohibition and/or interruption is due to circumstances for which the Shipper and/or Master are responsible. Any period exceeding the above mentioned running hours requires special approval from SIOT. In exceptional circumstances SIOT has the right to request a vessel to vacate the berth.

5. SIOT will set up a list of vessels which have failed by their own fault to meet the berth occupancy time referred to above and reserve the right to refuse these vessels for future deliveries. SIOT can also refuse vessels which to SIOT's reasonable judgement may endanger its installations and/or increase SIOT's risk of liabilities towards third parties.

Special Services:

1. SIOT will provide a bus service between the berth and the entrance gate of SIOT port area, the costs of which will be charged to the ships via their Agents.

2. Connections for telephone service to ships will be provided by SIOT. This service and phone invoices will be charged through the ship's Agent.

3. Fees for any other special service rendered by SIOT to a ship, will be charged through the ship's Agent.

Safety Regulations:

1. All safety measures in the SIOT port area shall comply with the ISGOTT and the local safety regulations. In case of different requirements the most stringent ones have to be applied.

2. It is strictly forbidden within the SIOT port area to smoke, to carry any open fire or any equipment with glowing parts, or to use any fire-kindling devices or lighters other than those expressly admitted in special cases by the competent authorities or by SIOT.

3. No hot repair work is allowed whilst a vessel is alongside the SIOT jetties, unless, under exceptional circumstances permission has been granted by SIOT and the Port Authorities.

4. All other repairs whilst at the jetties, will only be permitted after consultation with SIOT and sanction obtained.

5. It is the responsibility of the vessel's Master to report a fire on his vessel to the SIOT Pier Master. The latter will inform immediately the Fire Brigade and the Harbour Master.

Every vessel is required to have a fire wire constantly adjusted to the water line forward and aft while on the berth. The ISGOTT Safety Check List shall be used on all vessels visiting the SIOT Marine Receiving Facilities. Failure to comply with this list may well cause cargo operations to be delayed.

6. Portable Walkie-Talkie sets should only be used for mooring and unmooring. It is strictly prohibited to use them during discharging and ballasting operations unless they are approved and intrinsically safe in compliance with the ISGOTT.

7. Vessels must not be immobilised without permission being obtained from SIOT and the Port Authorities.

Special Incidents:

1. Any incident affecting the safety of the vessel or jetty, any fire and serious accidents on board or caused by the vessel must be reported at once to SIOT.

2. Masters must ensure that as soon as any oil is spilt from their vessel all cargo operations will be stopped and may only resume operations if authorised by SIOT.

3. In case of imminent danger, and if the circumstances warrant, SIOT shall have the right to discontinue cargo operations and take any action considered necessary for the safety of the vessel and/or the terminal. As far as the safety of the vessel is concerned any such action shall be taken in consultation with the Master. If the danger results from the vessel the measures shall be taken at the vessel's expense. No claim will lie against SIOT for any damage resulting from any such measure taken reasonably.

GENERAL: SIOT Marine Receiving Facilities are owned and operated by SIOT (Societa Italiana per l'Oleodotto Transalpino). They are situated in Muggia Bay in postion Lat: 44° 36′ 36″ N., Long: 13° 46′ 36″ E. and fall under the administration of the Trieste Port Authority.

The Marine Receiving Facilities consist of 2 finger piers each with 2 berths, for oceangoing vessels, discharging crude oil and petrol products to the Trieste Tank Farm.

Approaches: The Marine Receiving Facilities are approached from the North Adriatic Sea. A dredged channel joins the Gulf of Trieste to the piers. The channel is 1 mile (1,852 m.) long and 200 m. wide.

It is marked by 3 buoys flashing green, 2 buoys flashing red, and 1 buoy flashing white.

Pilotage: Pilotage is compulsory.

Arriving vessels take a Pilot about 0.5 miles West of the Northern end of Luigi Rizzo Breakwater.

Anchorage: The anchorage place is indicated by the Pilots.

Normal anchorage for vessels awaiting entry is to the West of Luigi Rizzo Breakwater where the holding ground has been reported to be poor.

Communications: When within range vessels should maintain constant communications with the Agent via Radio Trieste.

Radio Trieste will provide vessels with up to date information in regard to movements and other matters possibly affecting their passage to the port area.

ETA shall be given 48 hours in advance. Any change in ETA of more than 1 hour should be reported.

Minimum Manoeuvring Draft: Pilots require sufficient ballast for safe manoeuvring. The propellors should be covered. The trim of the vessel should not exceed 10 ft. by the stern.

Water Depth: The dredged depth in the harbour approaches to the piers and the depth alongside Berth Nos. 2, 3 and 4 are not less than 17.4 m. at Mean Sea Level (MSL), at Berth No. 1, 16.9 m.

Tides: Water levels may be raised or lowered as much as 0.6 m. due to the tide in respect to MSL. Higher tide excursions are exceptional. Additionally a deviation of 0.6 m. can be expected from predicted heights due to meteorological conditions.

Tugs: There are sufficient tugs available on prior request, to assist in berthing any size of vessels.

The tugs vary in power, from 750 kW (1,000 h.p.) to 2,000 kW (2,600 h.p.)

All are equipped with VHF multi-channel communication and are provided with foam fire fighting equipment.

The tugs, tow ropes should normally be used for berthing. The number of tugs employed will vary according to the size of vessel and the prevailing weather conditions.

Berths and Max. Size of Tankers: The finger piers are orientated 067.5° – 247.5° (T) in the direction of the prevailing Bora wind. Currents do not affect the berths appreciably.

(a) Berth Nos. 1 and 2 (No. 1 finger pier 1,561 ft. = 476 m. overall length).
  Min. Size of vessel acceptable: LOA 525 ft. = 160 m.
  Min. Summer deadweight 16,500 d.w.t.
  Max. size of vessel acceptable: LOA 950 ft. = 290 m.
  Max. allowable draft at Berth No. 1 at MSL 52 ft. 6 in. = 16 m.
  Max. allowable draft at Berth No. 2 at MSL 54 ft. 3 in. = 16.5 m.
  Max. Summer deadweight 100,000 d.w.t.
(b) Berth No. 3 (finger pier 1,610 ft. = 491 m. overall length).
  Max. size of vessel acceptable: LOA 1,000 ft. = 305 m.
  Max. allowable draft at MSL 54 ft. 3 in. = 16.5 m.
  Max. Summer deadweight 160,000 d.w.t.
  Min. size: As per pier No. 1.
(c) Berth No. 4 (finger pier 1,610 ft. = 491 m. overall length).
  Max. size of vessel acceptable: LOA 1,076 ft. = 328 m.
  Max. allowable draft at MSL 54 ft. 03 in. = 16.5 m.
  Max. Summer deadweight 215,000 tons.
  Min. Size: As per Pier No. 1.

The breasting dolphins at each berth are designed to withstand the impact forces of the maximum size tankers acceptable when fully laden and approaching at a maximum angle of 2° – 3° to the berthing line at a maximum velocity of 15 cm./s. (approx. 0.25 knot).

On dolphins "A1" and "A2" of both piers there are installed red (above) and green (below) warning lights each having a visibility of 2 miles.

Crude and Product Handling Facilities: Discharge of Crude and Products is via 3×16 in. diameter articulated unloading arms at Berth Nos. 1, 2 and 3 and via 4×16 in. diameter arms at Berth No. 4.

The shore lines are 36 in. diameter up to the root of the pier: they enlarge into 42 in. diameter pipe-lines for a further 6 km. to the Trieste Tank Farm.

Discharge rates of up to about 9,000 cu.m.p.h. are possible.

Maximum permitted pressure at the shore gauge is 150 p.s.i. = 10 bar. Each pair of lines is provided with a valved cross-over near the unloading platform and all the lines are provided at shore with another valved cross-over manifold which permits the use of any idle line to unload a tanker through more than one line.

Bunkers and Fresh Water: Fuel oil and marine diesel bunkers are available at all berths through 10 in. diameter loading arms situated on each side of the discharge rack. Fresh water supplies are available at all berths and should be ordered through the Agent or the Master.

Bunker fuel is not supplied directly by SIOT and must be ordered well in advance via Agent. Bunker fuel by barges is not permitted alongside the jetties, unless under special exceptional circumstances with permission of Port Authority and SIOT. In no case bunkering by barges is permitted during ballast or ullaging of tanks.

Mooring Arrangements: See "Plan".

It is ship's responsibility to provide safe and proper mooring in order to prevent tankers drifting off the berth and exceeding the operating envelope of the unloading arms.

Mooring lines must be carefully tended to hold the vessel in position and close to the pier at all times.

2 shore breast wires are provided at Berth Nos. 1 and 2 each and 3 shore breast wires at Berth Nos. 3 and 4 each, and it is recommended that vessel should make use of them.

The mooring dolphins F and G, at each side of Pier No. 2, are combined to an arch-type mooring point, located at 10.55 m. above MSL.

A similar arch-type structure exists in axis F at Pier No. 1.

Mooring patterns and characteristics are dependent on ships' architecture and weather conditions as well as lines material.

Mooring patterns shown in the "Plan Section" have been designed as examples for standard vessels under worst experienced wind conditions.

Assuming that tankers are securely moored with mooring lines and equipment in good condition, and that moorings are properly tended, it should not normally be required to restrict the freeboard of tankers to reduce the exposed windage area when alongside the berths. However, should any limitation be considered necessary it will be arrived at by consultation between the Master and the SIOT Pier Master.

Masters' attention is drawn to the peculiar conditions of Trieste where winds can blow with little warning and with extreme violence. Attention is also directed to the "Mooring Guidelines".

Fire Protection: The fire fighting system of the Marine Receiving Facilities consists of elevated and tele controlled monitors. On the piers there are 4 monitors at each jetty. 2 monitors are located on the platform of each pier, other 2 monitors facing seawards are located each at the catwalks and 2 monitors facing shorewards are located each above the access road.

Each monitor, located at the catwalks or above the access roads, has a capacity of 6,000 litres per minute of water-foam compound mixture with a throw of 70 m.

Each monitor located on the platform has capacity of 3,000 litres per minute of water-foam compound mixture with a throw of 60 m.

The foam compound used is fluoroproteinic liquid. All monitors are independently fed with sea water by means of an electric motor driven pump, and a diesel motor driven pump.

All monitors are telecontrolled from the root of each pier.

A main line of 24 in. supplies the water on the main trestle. From the root of the piers, where are located the foam mixer stations, start 4 lines (2×8 in. and 2×10 in.) (reinforced glass fibre) located on the sea bottom. These lines supply the water-foam compound to all monitors.

Each elevated monitor is water cooled.

A 8 in. water-foam line is provided on each pier.

Besides the sea and shoreward located monitors, these lines supply 4 water-foam hydrants along each pier. 6 water-foam hydrants are on each platform.

Portable fire extinguishers, dry powder extinguishers of 10 kg. and 50 kg. capacity are available.

Further, all tugs are fitted with fire fighting monitors for water and foam. During loading and discharging operations firemen certified by local Fire Brigade are present on the pier.

Medical: Any medical requirements should be made through the vessel's Agent before or on arrival.

Only first aid facilities are available 24 hours per day at the Marine Receiving Facilities.

Internal Communications: Internal telephones are located at each pier's platform as well as external telephones on board each vessel moored alongside.

To use the ship's telephones do the following:

1. To call Terminal
   dial 30 for Pier Master
   dial 25 for Pier Master Assistant
   dial 0-82 70 03 Pier Master
2. To call Outside
   dial 0 and then the required outside number
   (also international calls are possible)
3. Ships are connected with following phones
   Berth No. 1 – Internal 21 – Outside 82 84 55
   Berth No. 2 – Internal 22 – Outside 82 84 56
   Berth No. 3 – Internal 23 – Outside 82 84 57
   Berth No. 4 – Internal 24 – Outside 82 33 70
   incoming and outgoing calls possible.
4. Telephone Operator No. 20.

Pollution: A combined system of floating and pneumatic barrier is installed. Whilst floating barriers are laid underneath the longitudinal axis of each finger pier and the main trestle, a plastic pipe with nozzles anchored with concrete weights on the sea bottom, connects dolphin B1 with dolphin A2, thus protecting Berth Nos. 2 and 3. A similar plastic pipe nozzle surrounds the sea bottom area occupied by vessels moored at Berth Nos. 1 and 4. Along each berth spot lights are installed in order to allow detection of oil spill, at night time. In the case of oil spillage, air compressors, supplying, via a 6 in./4 in. air supply system, the respective air bubble oil barrier, are started by remote control.

Air bubbles emerging from the pipes on the sea bottom form a water dam able to contain oil within the encircled area.

All expenses in connection with anti-pollution measures, skimming barges and bubble barriers included, will be totally charged to the responsible ship.

Agents: Most shipping Agents visit all vessels on arrival and several times during the duration of the vessel's stay.

The Agent's offices are all situated in the town of Trieste and Master would be well advised to ensure they have the office and the home telephone numbers of the Agent's clerk dealing with their vessels.

Transportation: SIOT provides transport from the platform to the entrance gate. Ship's personnel are recommended, to order a taxi either using the ship-shore telephone or from the watchman's office

Walking through the SIOT port area is not permitted.

Taxis and private cars are not allowed within SIOT port area.

Trieste centre is about 5 km. by road.

Crude Washing: Crude washing is allowed under the prescriptions and following the procedures contained in "Ordinance No. 928/82 – 1st June 1982", issued by the Port Captaincy of Trieste.

Copy of the above Ordinance No. 928/82 can be obtained through the Ship's Agents.

MOORING GUIDELINES: See "Plan".

In order to prevent damage to the loading arms, and possible pollution of the harbour, it is of the utmost importance to ensure that a vessel is not permitted to move off the berth and exceed the operating envelope of the unloading arms.

The advice contained in these Mooring Guidelines has the objective of ensuring that any tendency for the vessel to "drift off" and cause damage to the loading arms and pollution is avoided.

Mooring Examples: The following, as well as the mooring plans, are based on the theoretical calculations according to OCIMF standard and on worst wind conditions.

Wind loads corresponding to gusts of 92 knots or maximum winds *of 78 knots from E.N.E. (Bora) and to gusts of 65 knots or maximum winds* of 55 knots from all other directions.

*Winds of a duration of minimum 30 seconds.

All the lines considered to be wires (steel lines) with MBL (minimum breaking load) of: 83 tons (36 mm. dia.) for ships with more than 100,000 d.w.t. MBL 66 tons (32 mm. dia.) for ships with less or equal to 100,000 d.w.t.

The windage area and the tankers' architecture as used in this example, especially as far as hawse-holes positions are concerned, have to be regarded as typical for the various classes of vessels calling at Trieste, but cannot be considered always applicable.

The Masters' attention is called on the fact that these guidelines have to be regarded as examples only and must be implemented accordingly depending on quality of lines used, MBL of the same, vessel windage area as well as forecast of weather conditions.

In particular we recall the Master's attention on:

a) If lesser breaking load mooring lines are used vessels should endeavour to provide additional lines (together with any shore wires which are available), as nearly equivalent restraint capability as possible. Mixed mooring of wires and synthetic should be avoided.

b) If mixed moorings of wire and synthetic or natural fibre are used, it is important that, due to the differing elasticity of these materials, their use in the same direction of restraint shall be avoided. If possible, wires shall be used as breast lines. In addition, 2 shore breast wires are provided at Berth Nos. 1 and 2, and 3 breast wires at Berth Nos. 3 and 4, and it is recommended that vessels should make use of them.

c) The discharging arms are vulnerable to damage should vessels range or move off the berth. It is essential that a vessel is held securely alongside throughout the discharge.

Special care has to be taken in providing lines which must not have excessive elasticity to ensure sufficient transverse restraint.

d) Full steam pressure must be maintained and be available to all mooring winches throughout the period vessel is alongside.

e) As soon as a vessel is secured, brakes on all mooring winches must be secured. Winches shall not be left on automatic tensioning.

f) Masters shall ensure that mooring lines are in good condition and free of visible defects. Winch brakes or securing devices should be in efficient operating order. In case of vessels in excess of 100,000 d.w.t. winch brakes should be capable of withstanding a load of 60% of the MBL and this should be supplemented in strong wind conditions by ensuring winches are put in gear with power applied in the heave position.

g) An efficient watch must be maintained throughout the vessel's stay alongside.

h) SIOT is entitled to stop operations and/or summon tugs if it appears that vessel's movement will endanger the discharging arms, or in the absence of an alert and efficient deck watch. All pertinent expenses will be charged totally to the vessel.

Action Guidelines for Adverse Weather Conditions: The following guidelines are drawn up in order to assist SIOT's and vessel's personnel in determining the course of action to be taken during stages of weather deterioration, when wind threatens to blow the vessel off the berth.

Masters are cautioned to use them only as a guide, as the physical characteristics of individual vessels may vary according to the type of vessel and the nature of the mooring used. Any limitation considered necessary will be arrived at by consultation between the Master and the SIOT Pier Master.

Valid for All Berths and All Wind Directions:

Discharge can continue regularly in wind forces up to 7 (30 knots or 15 m./sec.).

Discharge to be stopped* if the wind is in the ranges from force 7 (30 knots or 15 m./sec.) to force 8 (37 knots or 19 m./sec.) and the cargo on board is less than 30% of the summer d.w.t.

Discharge to be stopped* independently from the quantity of cargo on board if winds over force 8 (37 knots or 19 m./sec.).

*When stopping discharge for wind conditions loading arms should be drained and disconnected, the crews and engines kept on standby and tugs alerted if necessary.

Weather Forecast: Weather forecasts are not available at the piers, but the local Meteorological Institute may provide them on a phone call. The accuracy of this service cannot be guaranteed and Masters should be alerted for conditions which may differ from those provided in the general forecast and ensure the safety of the vessel and the Marine Receiving Facilities. Masters will be aware of the fact that the prevailing wind blowing at Trieste has an E.N.E. direction, can blow with little warning and gusts can reach 100 km./h. or more in an extremely short time.

SIOT MARINE RECEIVING FACILITIES:

	Berth No. 1	*Berth No. 2*	*Berth No. 3*	*Berth No. 4*
Water depth at Mean Sea Level	55 ft. 4 in. (16.9 m.)	57 ft. (17.4 m.)	57 ft. (17.4 m.)	57 ft. (17.4 m.)
Raising or lowering of water level on predicted heights due to meteorological conditions 0.6 m.				
Maximum allowable draft (dependent on water level)	52 ft. 6 in. (16.0 m.)	54 ft. 3 in. (16.5 m.)	54 ft. 3 in. (16.5 m.)	54 ft. 3 in. (16.5 m.)
Min. size of vessel (d.w.t.)	16,500	16,500	16,500	16,500

Operator: Societa Italiana per l'Oleodotto Transalpino S.p.A., Piazza Unita d'Italia, 7, Casella Postale 544 I-34121 Trieste/Italy. Tel: 040-69 121, 040-827003. Telex: 460126. Code: Talin.

New San Sabba Terminal:

The terminal is located about 600 m. Eastward of the SIOT Pier No. 1 and is used for products discharge. It consists of a concrete finger pier, aligned in an East-Northeasterly direction with a berth on each side. Berth No. 1, facing S.E., is used for larger ships, while Berth No. 2 can accommodate vessels of up to 18,000 d.w.t.

Cautionary Advice: The breasting facilities at Berth No. 1, particularly forward, are poor and a very close watch on moorings is necessary, especially during the Bora season.

Berthing Procedures: Tugs are usually made fast with ship's lines just inside the breakwater. Ships bound for Berth No. 1 are swung seawards of the berth and backed onto the berth, dropping the port anchor with 6-7 shackles in the water and mooring starboard side alongside.

Ships bound for Berth No. 2, steer directly for the berth and moor starboard side alongside. Port anchor is not normally used for this manoeuvre, but should be ready for use in an emergency.

Gangway: There is no shore gangway, ship should rig a safe gangway.

Cargo and Bunker Connections:

Dirty products:

1 × 12 in. hard arm (ASA type), at Berth No. 1.

1 × 10 in. hard arm (ASA type), at Berth No. 2.

Clean products and gas oil:

1 × 8 in. hard arm (ASA type), at Berths No. 1 and No. 2.

Bunkers:

1 × 6 in. flexible hose at both berths.

Deballasting Facilities: There are no deballasting facilities.

Stores: By barge only.

Aquila Berth: This terminal is located on the South shore of Vallone di Muggia. The berth is aligned in a Northeasterly direction and consists of a concrete T-head type jetty with buoys for all but the spring moorings. Vessels moor starboard side to.

Berthing Procedures: The manoeuvring space off the berth is limited. 2 tugs are normally made fast on the hook, using ship's lines, when the vessel is inside the breakwater. On approaching the berth, the vessel is turned slightly to port and the port anchor is let go and slacked off to about 4 shackles. The vessel is then pushed on to the berth by the tugs, while the chain is slacked out to about 7 shackles in the water. The moorings are taken to the buoys by the mooring boat and made fast.

Gangway: There is no shore gangway and vessels should rig their own gangway.

Cargo Connections, Handling and Ballast: The Aquila refinery receives crude via the SIOT installations so only products and lubes are handled at this berth.

Dirty products are handled via 1 × 8 in. flexible hose. Clean products and gas oil are handled via 2 × 8 in. flexible hoses, and lubes and bunkers via 1 × 6 in. flexible hose. All are with ASA flange connections.

Dirty ballast can be discharged at a rate of 150 t.p.h.; maximum storage capacity is 3,500 tons.

Old San Sabba Pier:

This berth is used by small ships. Because of the very confined manoeuvring space. 2 tugs are normally used to assist vessels berthing. Ships berth port side to and the starboard anchor is used to assist in leaving the berth.

General: *Pollution:* The port pollution sensitivity is very high.

Each vessel alongside is surrounded by a floating barrier. Furthermore, the following equipment is available in the port:

3 skimming barges (speed 16 knots), 3 cu.m. capacity.

1,000 m. floating barrier.

20 tons of absorbent powder.

Fire Fighting Facilities: All berths are well equipped with high level fire fighting facilities including remotely controlled fire pumps and foam monitors. Moreover, all tugs are equipped with 2 or 3 water foam monitors.

Security: Shore leave is permitted. Shore passes are issued by the Port Captaincy and crew members' and visitors' identities are checked at the gate or boarding point.

Bunkers, Lubricants, Hydraulic Oil: Fuel and diesel oil are supplied by pipe with no restrictions on maximum quantity. Minimum quantity delivery by pipe: Fuel oil 100 tons, diesel oil 30 tons. Simultaneous bunkering and discharge is allowed.

Lubricants, hydraulic oils, etc., are generally available, but 3 days' notice is required. They are suplied in drums by barge.

Fresh Water: Drinking water is available by pipe. No restrictions on quantity.

Distilled Water: Not available.

Repairs: Repair facilities available. Immobilisation of main engine not allowed at the berths.

Allowed at roads with tug attendance.

No tank cleaning and gas-freeing facililties available.

Stores: Laundry, provisions and stores area available with advance notice.

Telephone: Can be installed on board.

Special Regulations: For vessels discharging at TAL SIOT Terminal cargo measurement and sampling may be required both before and after discharge. To facilitate these measurements and to avoid excessive venting when alongside, ships with an operating inert gas system are asked to reduce the system pressure to the safe minimum operational level (100-150 mm. WG.) immediately prior to the Pilot boarding for berthing. Detailed requirements for the safe measurement access to inerted tanks and for repressurisation and operation of the inerted gas system during actual discharge will be handed to and discussed with inerted ships on berthing.

DENSITY: 1025.

FRESH WATER: Available by pipe-line at all berths. No barges available.

FUEL: All grades available, loading rate about 250 t.p.h. 48 hours notice required. Also see "Shipmaster's Report".

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Optional, but stevedores usually perform this operation for convenience.

CUSTOMS ALLOWANCES: 50 cigarettes for each man and one bottle wine/spirits between 5 men. Only one allowance given while vessel in port.

IDENTIFICATION CARDS: Shore passes are issued by local police.

CONSULS:

REPAIRS: All kinds of hull, deck and engine repairs can be carried out by Arsenale San Marco and other yards.

DRY DOCKS: 5 dry docks available.

Shipmaster's Report: January 1985.

There is a new dry dock, located at Arsenale San Marco. Our vessel was the first to use it, our dimensions being:

LOA: 255.0 m.
Moulded breadth: 35.3 m.
Moulded depth: 19.0 m.

REPATRIATION: No facilities.

AIRPORT: 15 miles distant. Two flights daily to Venice/Milan and Rome for international connections.

TIME: GMT plus 1 hour. Summertime: GMT plus 2 hours.

HOLIDAYS: New Year's Day (1st January); Liberation Day (25th April); Labour Day (1st May); Good Friday, Easter Monday, Assumption B.V. Maria (15th August); All Saints' Day (1st November); St. Giusto (3rd November); Immaculate Conception (8th December); Christmas Day (25th December); Boxing Day (26th December); Cargo work can be arranged on the above days.

POLICE/FIRE/AMBULANCE: Police, tel. 113; Fire, 2222; Ambulance, 68888.

TELEPHONES: Can be installed on board.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Ro/Ro terminal with 70,000 sq.ft. storage under construction.

Timber yard to be extended.

SHIPMASTER'S REPORT: May 1981.

Documents/Fuel: If anchoring off Trieste for bunkers only the following are required: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations. No Pratique required if coming from Koper, Yugoslavia. Vessel does not have to pay anchorage dues.

AUTHORITY: Ente Autonomo del Porto di Trieste, Punto Franco Vecchio, Cas. Post 569, 34100 Trieste, Italy. *Tel:* 6731 (Operator). *Telex:* 460257 Eapt D; 460365 Eapt C and 460282 Eapt C (Container Terminal at Mole VII). *Contact:* Dott. Luigi Rovelli, General Manager.

Harbour Master, Riva 3 Novembre 13, Trieste. *Tel:* 630005/9 (3 lines). *Telex:* Compt TS 461181.

VENICE: 45.26 N. 12.20 E. (See Plan)

DOCUMENTS: Minimum number of ship's papers required upon arrival:

By Port Health:
- 2 copies Passenger List.
- 2 copies Crew List.

By Police:
- 2 copies Passenger List.
- 2 copies Crew List.

By Ship's Agents:
- 2 copies Passenger List
- 2 copies Crew List.
- 2 copies Cargo Manifest.

By Customs:
- 2 copies Cargo Manifest.
- 2 copies Provisions and Stores List.

PILOTAGE: Pilot boards 2 miles from breakwater. Master can contact Pilot by VHF Channel 13.

ANCHORAGE: Anchorage for large tankers will depend upon Master's discretion. However there is a good anchorage in position:

Lat. 45° 23′ 30″ N., Long. 12° 34′ 00″ E.

RESTRICTIONS: Advisable to enter during daytime and with favourable tide.

Access: North: At Lido with channel depth of 11.0 m.

South: At Malamocco with channel depth of 14.50 m. This channel at Southern end of Lido Island, first leading to San Leonardo tanker berth and then North to Marghera

Also see "Tankers".

HEALTH: Health Officer boards as soon as vessel is berthed. Pratique can be obtained by radio prior arrival. Radio request to "Sanimare Venice" through Trieste Radio.

TUGS: Tugs are available and will join vessel at breakwater and/or off Lido when proceeding to S. Nicolo. Ship's lines have to be used.

Wheel Loaders	8× 0.8 – 1.8 tons
Wheel Loader	1× 2.8 tons
Wheel Loaders	7× 3.33 tons
Wheel Loaders	8× 5.50 tons
Tractor Loaders	2× 62 h.p.

BULK HANDLING FACILITIES: Bauxite discharging at Montecatini and Molo Commerciale in Porto Marghera.

Discharge by crane grabs at rate of 2,000 tons per day at Montecatini, and 1,500 tons per day at Molo Commerciale. Vessels up to 28 ft. draft can be accommodated.

Coal discharged at ENEL jetty and Mole "A". Discharge rates 6,000 tonnes per day and 6,500 tonnes per day respectively.

CONTAINER HANDLING FACILITIES: Container and Ro/Ro facilities in the port.

Marittima: Ro/Ro Terminal at the Isonzo Quay: 2 Berths. 45,000 sq.m. marshalling area + 40,000 sq.m. under planning. 2 high capacity cranes (under planning). 2 Rail mounted gantry cranes of 30 tons capacity (under planning).

Ro/Ro Terminal at S. Marta Quay: 3 Berths. 21,000 sq.m. marshalling area (under planning). 1 Passenger Terminal (under planning).

Ro/Ro Terminal at S. Basilio Quay: 2 Berths. 1 Passenger Terminal. 21,000 sq.m. marshalling area (under planning).

Marghera:

Container Terminal at the Emilia Quay:
3 – 4 Berths (along 600 m. quayside).
1 Ro/Ro berth.
3 Portainers of 42 tons capacity.
1 Bridge crane for containers of 35 tons capacity.
2 Rail mounted gantry cranes of 35 tons capacity.
2 Side straddle carriers of 40 tons capacity.
3 Rubber-tired gantry cranes of 35 tons capacity.
7 Mobile cranes (Belotti B75) of 60 tons capacity.
5 Fork-lifts of 27.2 tons capacity.
1 Fork-lift of 12 tons capacity.
7 Tugmasters of 180 h.p.
8×40 ft. Trailers.
195,000 sq.m. stacking area.

Ro/Ro Terminal at the Friuli and Cadore Quays: 2 Berths, 57,000 sq.m. marshalling area, 7,200 sq.m. stuffing sheds.

Ro/Ro Terminal at the Aosta Quay: 4 Berths. 70,000 sq.m. marshalling area. 24,000 sq.m. stuffing sheds. 1 Passenger Terminal.

STEVEDORES: The Provveditorato al Porto Venice are exclusively entitled to manage all the commercial work in the harbour including stevedores. Vessel should en route ETA cable to Agent at least 48 hours prior vessels arrival to arrange gangs.

MEDICAL: Hospital facilities always available. No notice required in advance.

TANKERS: Tank washings cannot be disposed of inside port. Diameter of loading/discharge lines 8 in. to 12 in.

One berth for tankers at San Leonardo can accommodate vessels up to 85,000 d.w.t. Max. draft is 45 ft. 3 in. Good discharging and no back-pressure. Speedboats up to Venice take about 40 minutes.

Discharging Berths for Tankers at Porto Marghera:

Darsena IROM, length 570 m., depth 30 ft.
Esso Pier: depth alongside 26 ft.
Shell Pier: depth alongside 26 ft.

Port entrance of Malamocco, at South point of the Island of Lido, has been reopened where a canal 12 m. deep leads to Port of Marghera. This canal allows large tankers to proceed to coastal storage tanks without passing through urban centre of Venice.

Esso/IP:

Berthing: Ships bound for Darsena Esso/IP proceed along the Malamocco channel, with the assistance of 2 tugs, up to Bacino di Evoluzione No. 1 where 2 additional tugs are made fast aft. They are swung in Bacino di Evoluzione and proceed along the Canale Vittorio Emanuele stern first. They then enter Darsena Esso/IP stern first. Ships are always starboard side to Berth 3M and portside to Berth 2M and to the Esso/IP berth.

Moorings are taken ashore by mooring boats. The minimum number of mooring lines required for each berth is as follows:

Berths 2M, 3M and Esso/IP
2 head lines,
4 breast lines (2 fwd – 2 aft),
6 spring lines (3 fwd – 3 aft),
2 stern lines.

The use of wires is not permitted.

I.R.O.M. Brentelle, Berth 4B:

Cautionary Advice: This berth is located at the junction of Canale Vittorio Emanuele and Canale Brentelle. Vessels are berthed starboard side alongside. The facilities are used by I.R.O.M. for clean and dirty products. There is heavy traffic in this area and care must be taken that ship's lines are always tight. Moreover, when a ship over 3,000 d.w.t. is entering or leaving Canale Brentelle, the loading/discharging operations are discontinued and the tanker moved off the berth. Maximum draft is about 22 ft.

Darsena I.R.O.M., Berths 2M and 3M:

Berthing: Ships bound for Darsena I.R.O.M. are swung with the assistance of 4 tugs in Bacino di Evoluzione No. 1. They navigate Canale Vittorio Emanuele stern first for about 4 cables and then enter Darsena I.R.O.M. bow first. Ships are always starboard side to Berth 2M and port side to Berth 3M. Due to the heavy traffic in Canale Vittorio Emanuele care must be taken that ship's lines are always tight. Vessels up to about 18,000 d.w.t. or 20,000 d.w.t. are berthed.

DENSITY: Average salinity of water inside port 1020.

FRESH WATER: Available.

FUEL: All grades available and delivered by barge.

CUSTOMS ALLOWANCES: The Customs require from the ship a complete list in duplicate of Provisions and Stores. It is particularly important that the quantities of items such as tobacco, cigarettes, spirits, coffee, matches, pepper, salt, spices, cars, chocolate, should be given accurately. Customs Officers will supervise the issue while ship is in port. Amount of tobacco allowed out of Bond: 50 cigarettes per man for all foreign vessels except British and U.S.A. flags. 20 cigarettes per day per man on British and American flag vessels.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

REPAIRS/DRY DOCKS: There are ample facilities for repairs. Following are particulars of Venice dry docks:

Minore	*Maggiore*	*Principe*	
298.8 ft.	526.3 ft.	820.3 ft.	extreme length
58.4 ft.	79.8 ft.	117.8 ft.	breadth of entrance
1.0 ft.	1.0 ft.	3.1 ft.	height of sill above bottom dock
19.7 ft.	29.6 ft.	36.0 ft.	depth on sill at high water.

CONSULS: Following are Consulates maintaining their offices at Venice.

Argentine
Austria
Belgium
Bolivia
Brazil
Colombia
Denmark

SURVEYORS: R.I.N.A., Lloyd's Register, Germanischer Lloyd, A.B.S., Norske Veritas, N.K.K. and U.S.S.R. Register of Shipping.

AIRPORT: International Airport Marco Polo about 10 km. from Porto Marghera. Served by regular airlines.

TIME: GMT plus 1 hour. Summer Time from March to September, GMT plus 2 hours.

HOLIDAYS: The public and port holidays are the following: 1st January; 6th January; 19th March; 25th April; Monday after Easter Day; 1st May; Ascension Day; Corpus Christi Day; 2nd June; 29th June; 15th August; 1st November; 4th November; 21st November; 8th December; 25th December; 26th December.

TELEPHONES: Telephones will be placed aboard the ship.

SHIPMASTER'S REPORT: Porto Marghera. November 1979.

Pilotage: Pilot station works on Channel 13 VHF. Speaks very good English. Pilot launches are built to the same specification as the new Trinity House high speed launches, there are five in number. Black hull with white superstructure. Pilot ladder to be 3 ft. feet above the water line. Pilot boards from the rigging. In favourable weather pilot station about 0.5 miles East of the Fairway Buoy, in adverse weather conditions vessel proceeds in on leads and Pilot embarks inside the moles.

Anchorage: Good anchorage for small vessels especially during the Bora from the N.E. in 6 fathoms of water with Porto di Lido Northern Mole Light bearing 280° × 1.5 miles.

Stevedores: Port works 5 days a week in 3 shifts Monday to Friday: 1st shift 0800 to 1430 hrs.; 2nd shift 1430 to 2100 hrs.; 3rd shift 2100 to 0200 hrs.

2 shifts worked on Saturdays 0800 to 1430 and 1430 to 2100 hrs. Possible to work Sundays 0800 to 1430 hrs.

Container Berth: Berth relatively new with good fenders – room for two vessels. Two container cranes. Ample straddle loaders. Upper berth suitable for Ro/Ro if berthed port side to.

Tugs: For vessels over 100 m. in length it is necessary to engage a tug for turning.

Speed in Canal: Maximum speed through Venice and up the canal to Porto Marghera 6 knots. heavy fines can be imposed for excessive speeds.

Cash Drawn: Customs have to approve any cash drawn and it is essential that any excess must be paid back to Agent before departure. Unable to land at any other port.

Customs: When proceeding from one Italian port to another the Clearance is placed on board together with one copy of 'Manifesto di Partenza'. Most important that Master has this copy on demand at subsequent port.

AUTHORITY: Provveditorato al Porto di Venezia, Zattere 1401, C.P. No. 745, 30123 Venice, Italy. *Tel:* (041) 89820-703166. *Telex:* 410344 Portve. *Cables:* Provviporto. *Contact:* Ing. A. Baroncini. Commandante di Porto.

NOTES

Please also advise Shipping Guides Ltd.

Ivory Coast

ABIDJAN: 05.18 N. 04.00 W. (See Plan)

PORT LIMITS: The pilotage zone is limited by a circle with a 3.5 mile radius centred on the pier lighthouse of the West jetty of the entry canal.

DOCUMENTS: "All ships calling at Abidjan to discharge cargo will have to supply on arrival altogether 13 sets of cargo manifests and 4 sets of freighted manifests for each port of loading (IMO class code for all hazardous cargoes), as the administration no longer accepts reproductions of documents supplied by the Agents. Furthermore, Masters are reminded to hand to Agents on arrival, 6 crew lists, 4 stores lists, 4 bonded stores lists, 4 crew declarations, 6 passenger lists (even if nil), 5 animal lists (even if nil), 5 narcotics lists (even if nil), Arms and Ammunition List, (even if nil), 5 lists of ports of call and 1 vaccination list. Furthermore, the attention of Masters is drawn to the fact that the Customs Services are strictly enforcing the control regulations on incoming vessels and very heavy fines are imposed in cases of omission or mistakes in declarations of slop chests, stores lists etc".

All Manifests and Bills of Lading should refer to the IMO class code for hazardous cargoes.

It should also be noted that hazardous cargo found and not mentioned in above documents will have to remain on board.

Also see "Notice".

PILOTAGE: About 1 hour before arrival ships equipped with VHF shall confirm to the Pilot station, on Channel 12 or 16, their correct hour of arrival off the Roads; then the boarding time for Pilot shall be communicated. It is essential that these times are clearly understood both by ship and Pilot station.

Ships shall stay in a position so they keep across the swell and the wind which both generally come from the South and they shall put the pilot ladder on the lee side, i.e. Port if steering Eastward, Starboard if steering Westward.

Pilotage is compulsory, except for shifting alongside quays. For ships leaving harbour or shifting within harbour limits, request for a Pilot should be made at the Harbour Master's Office at least 3 hours before sailing or shifting. For a night sailing or shifting, request must be made before 1700 hrs.

Warning: when embarking Pilot, keep well clear of sandbank extending from entrance to Vridi Canal.

ANCHORAGE: Vessels may anchor on the outer road in 20 m. to 30 m. of water, firm sandy bottom, also to the South and to the West of the West jetty of the Vridi Canal.

RESTRICTIONS: Ships may enter or leave Abidjan only between certain time limits. These limits can be obtained from the pilot station on Channel 12 or from the local Agent no more than 3 or 4 days ahead of time.

MAX. SIZE: Until now the largest vessel admitted was 243 m. in length. Vessels with a length of 250/260 m. may be able to be admitted ultimately. At the present time, the maximum permissible draft is 31 ft. It will soon be increased to 33 ft.

HEALTH: Request for Free Pratique is given by the Agent to Port Health Authority, who will board vessel on arrival.

RADIO: Masters must radio through Abidjan – Radio their ETA and draft, 24 hours and again 6 hours before their arrival, to the Port Commandant (COMPORT) or in his absence, to the consignee. For a night arrival, the telegram must arrive at the station before 1700 hrs.

When at anchorage off Vridi Canal, vessels should watch for signals from Vridi Signal Station, which keeps continuous watch, and advise them regarding the time the Pilot will board their ship. Port Captain's office and Vridi Signal Station keep a permanent watch on 156.6 MHz. and 156.8 MHz. Agents may be obtained through Abidjan Radio on 2182 kHz. Abidjan Radio answers on 1813 kHz.

VHF: Channels 16 and 12 are used: 16 for security and 12 for general traffic. It is strongly advised to use Channel 12. This Channel is strictly reserved for the harbour traffic and ships wishing to talk to each other should do so on a ship to ship Channel 8.

RADAR: Installed in the Harbour Master's office. Vessels can contact port radar by calling "Comport Abidjan" on VHF Channels 16, 12 and 11, or through Abidjan Radio, which keeps watch on Channel 16.

TUGS: Tugs join vessel at the port entrance. Towing lines are provided by the tug. Tugs work on VHF Channel 8.

BERTHING:

Bananier Quay: (Banana Carrier Quay): Length 350 m., 2 berths, depth 7 m.

North Quay: Length 775 m., 5 berths (Nos. 1–5) from East to West, depth 10 m.

West Quay: 1,525 m., 10 berths Nos. 6 to 15 from North to South, depth 10 m.

South Quay: 1,145 m., 6 berths Nos. 16 to 21 from North to South, depth 11.5 m.

Roll-on/Roll-off Berth: Length 200 m. Depth 12.5 m.

A temporary Roll-on/Roll-off berth is located at the North Quay of the fishing harbour, length of the quay 350 m., depth 7 m.

A quay 90 m. long, situated on the South bank of the lagoon between the access canal and the discharge canal (Bietri Canal) extended by a system of piles, permits the mooring of vessels 140 m. long and with 26 ft. draft. This Quay is called 'Siveng Quay' and is reserved for the Company of the same name.

2 oil wharfs situated on the East bank of the access canal accommodate large vessels of more than 200 m. with a max. draft of 31 ft.

A "sea line" buoy situated off Port-Bouet can accommodate vessels having a length of 270 m., and a draft of 46 ft. and not exceeding 75,000 d.w.t. (See "Tankers").

Mooring buoys lined up in the North part of the port (Banco Bay) are used by vessels taking on timber.

The Quays of the port are not equipped with cranes, so loading and unloading operations are undertaken by vessels own gear.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: 4 Berths (No's 22, 23, 24 and 25) each 200 m. length are in service. A study with regard to equipping these quays with gantry cranes is being undertaken. The area of the container park is 60,000 sq.m. Loading and unloading of the containers is by ship's gear. Transport on the quays is made by trailers.

Ro/Ro berth: This berth has a park of approximately 40,000 sq.m.

Details of the ramp of the temporary berth, situated on the North quay of the fishing harbour are as follows: Width 17 m., height above chart datum 1.5 m., permissible loading 20 tons by pulley. The height of the quay above datum is 1.8 m.

Vessels arriving with cereals destined for "Grand Moulins D'Abidjan" are received at Berth No. 1, or they are given a berthing priority. Handling is by means of suckers and conveyor, average rate of discharge 150 t.p.h. The capacity of the silos is 30,000 tons. The "Grand Moulins" are also equipped to load pellets in bulk at this berth. They can also receive cereals for third parties; in this case the transporting vessel still benefits from the mooring priority.

The handling companies Transafric and Socopao are also equipped with suckers (Vigan pumps) for discharge of cereals. Evacuation is then made either by tipper lorries (Transafric) or by direct discharge under hangar (Socopao). The vessels are then directed to the ordinary berths and do not benefit from any mooring priority. The rates of discharge are in the order of 50 to 70 t.p.h.

Palm oil is usually taken on board at Berth No. 16 where 2 pipe-lines come from the oil depots. The diameter of these pipe-lines are 4 in., and the flow rate is 250/280 t.p.h. Vessels mooring at this berth do not have priority. These oils may be taken on board at any other berth by tankers.

Wine in bulk is also received at the ordinary berths and also discharged by tankers.

The timber yard is situated in the North part of the port. It is bordered by a quay of 380 m. from which the timber is put in the water or loaded on barges before being towed to the vessel on which it is to be loaded. The equipment of this park (yard) is as follows: 1 gantry crane of 20 tons and 1 of 10 tons, 1 derrick of 20 tons, 3 fork lifts of 16 tons, 1 fork lift of 7 tons.

The park for discharged timber is situated between the West quays and the fishing port; it is bordered by a quay of 350 m. called "Quai de Chalandge" (Lighterage Quay), depth 2.5 m. The equipment for this park comprises: 5 fork lifts of 10 tons and 1 of 12 tons.

The port has 2 floating cranes: one with 150 tons capacity and one of 25 tons capacity.

Mooring of tankers at the wharves of the Vridi Canal is made at slack water and departure at the end of high tide. It is also to be noted that, in spite of reinforced moorings, the mooring to these wharves is sometimes rendered impossible because of the heavy swell which builds up in the canal.

Prime materials for manufacture of fertilizers are received in bulk at the "Siveng Quay" where discharge is by derricks and suckers.

The banana carrier quays are provided with air conditioned and stocking hangers as well as necessary equipment for loading.

SOGIP Shipping: Private quay for fishing vessels. Cold room with capacity of 2,200 tonnes at −20°C.

TANKERS: (Also see "Berthing".)

Shipmaster's Report: The Sea Line Berth at Port Bouet near Abidjan.

(a) Introduction: Vessel ordered to part discharge 21,000 tons of crude. With a max. draft of 48 ft. 6 in., this was the largest vessel to use these facilities; the previous largest being about 60,000 d.w.t. (1973).

(b) Approach from sea: Coast line is low with few distinguishing marks. Outline picked up at about 18 miles range (using Marconi Raymark), at about the same time as 100 fathom line was crossed. Coast is very steep-to with a pronounced rift in sea bed leading to canal entrance in Abidjan.

(c) Anchorage: Vessel anchored about 2 miles from sea line terminal at Port Bouet. The usual anchorage is to West of canal, which would permit a more suitable approach to the berth.

(d) Berth: The sea berth is situated about 1 mile S.S.E. of Port Bouet light. According to chart prepared by terminal authorities Societe Ivoirienne de Raffinage (SIR), the depths of water in the berth are 16 m. aft and 19 m. for'd, at chart datum. Members of the diving team and terminal representatives are of the opinion that there is greater than 1 m. more water than indicated; this is backed up by observed soundings of for'd depth of 21 m., with a rise of tide of 0.5 m.

Moorings consist of four 6 in. shore wires from buoys aft; 4 similar wires for'd, 2 from buoys, 2 from the sea bed; both anchors are used with about 8 or 9 shackles of cable on each.

Hoses are connected on port side, 2×12 in. leading to a 1×24 in.×5 km. sea line. Back pressure is limited to 7 kg./sq.cm. (about 100 lb./sq.in.). Berth is aligned to head into the prevailing Southwesterly wind. Unfortunately this places the vessel beam on to the current which is unpredictable in both magnitude and direction. After 9 years' experience at the berth, the diving team are unable to predict for a particular time if the current will run at all, or in what direction or at what strength. Current velocities of up to 2.5 knots are normal. If the current starts to run at this strength at an early stage of a berthing operation it is probable that the operation will have to be abandoned.

(e) Berthing: Approach to the berth is made on a heading of 145° in line with buoys A and B on SIR chart. During much of the approach the vessel is within 5 cables of the shore, but, with one exception, the depth of water is adequate.

When the vessel was between 1 and 2 ship's lengths from buoy A, in Grid reference position 579.030 393.280 on SIR chart, the under keel clearance was 15 ft., for several minutes. There was a very low, barely discernable, swell running, but the approach to the berth runs with this swell directly abeam, causing the vessel to roll an estimated 5°; the effect of this was to give a min. bilge clearance of 10 ft.

Berthing operation is routine, with some shore labour assisting with wires. No carpenters' stoppers are provided for wires, but two each end can be made fast on to the storage drums of the winches.

(f) Discharging: Limiting back pressure maintained by two cargo pumps running at 1,200 r.p.m. Discharge rate achieved was 2,237 t.p.h., which is usual for this berth.

(g) Bunkering: Bunkers are available in the berth in amounts greater than 500 tons. As bunkers are taken via the same sea line as cargo is discharged, the operation is somewhat clumsy and time consuming: crude in the sea line is displaced by fuel oil; the hose is shifted to bunker connection; bunkers are taken; the hose is re-connected to cargo manifold; the fuel oil in the sea line is displaced by crude oil. This sequence of operations took a total of eight hours. If a total discharge was planned, it might be advisable to take bunkers in the middle of the discharge, in order to obviate the need to use stripping pumps to displace the fuel oil in the sea line, amounting to some 1,200 tons.

Notice: *Information for the attention of the Masters of tankers mooring at the S.I.R. sea-line of Port Bouet:*

The conditions at this sea-line necessitate the presence on board of the following personnel during operations of mooring and connection of the hoses.

1 Superintendent who combines the duties of: Mooring Master, Loading Master and chief diver.
2 Divers who also assist in the mooring and the connecting operations.
2 Seamen for the refinery's launch.
2 Assistants for the mooring and connecting operations.

These personnel will be present until pumping starts. We would be glad if you would provide meals for them during this period (from 8 to 12 hours normally).

Usually the Superintendent and the refinery's representative eat in the officers' mess and the rest in the crew's mess.

Once pumping has started the following personnel stay on board. The Superintendent; the refinery's representative; 2 seamen; 1 assistant.

We would be grateful if you can provide cabins and meals in the officers' mess for the Superintendent and refinery's representative and sleeping quarters and meals for the 3 other persons until the tanker's departure.

The refinery's launch the "Sirius" helps during the mooring and connecting operations and serves as a liaison launch between the tanker and the refinery. Would you reserve a mooring berth on the starboard side of the tanker with pilot's ladder for access aboard? The mooring ropes are provided by the refinery and should be reserved for the launch "Sirius". The Agent's launch or any launch other than the "Sirius" should moor forward of this berth and should be provided with its own pilot's ladder.

We thank you in advance for your kind cooperation in this matter and wish you a satisfactory stay on the sea-line.

Signed: General Manager, Societe Ivoirienne de Raffinage.

STEVEDORES: Gangs must be ordered before 1700 hrs. on the previous day.

MEDICAL: All medical services and hospitalisation can be arranged without difficulty. Crew members are obliged to have valid certificates against yellow fever.

DENSITY: Varies from 1025 in January to 1000 in November.

FRESH WATER: Supplied from the quay at the rate of 40 t.p.h. per hydrant. Can be supplied by barge.

FUEL: 1500 secs. fuel available from Abidjan Refinery. Advance notice required.

WATCHMEN: Services of shore watchmen are recommended. See "Notice".

HATCHES: Normally opened and closed by stevedores.

CUSTOMS ALLOWANCES: Each man allowed to retain 200 cigarettes and 1 bottle of alcohol.

IDENTIFICATION CARDS: Should be carried by crew going ashore.

CONSULS: The following countries are represented locally:

Algeria
Argentina
Austria
Belgium
Benin
Brazil
Canada
Central African Rep.
Chile
Colombia
Congo
Denmark
Egypt
Ethiopia
Finland
France
Gabon
Germany F.R.
Ghana
Guinea
Guinea Bissau
India
Israel
Italy
Japan
Korea
Lebanon
Liberia
Mali
Mauretania
Morocco
Netherlands
Nigeria
Norway
Poland
Romania
Senegal
Spain
Sudan
Sweden
Taiwan
Tunisia
U.S.S.R.
United Kingdom
U.S.A.
Upper Volta
Vietnam
Yugoslavia
Zaire
Zambia

REPAIRS: All types of repairs can be effected. There is a floating dock with lifting capacity 2,000 tons.

REPATRIATION: Can be arranged.

AIRPORT: Local international airport with connections to all parts of the world.

TIME: GMT. No alterations during the year.

HOLIDAYS: 1st May and 7th December no work can be carried out. Other holidays which may be worked at overtime rates are: 1st January, Easter Monday, Whit Monday, Ascension Day, 1st November, Christmas.

POLICE/FIRE/AMBULANCE: Police, tel. 35.57.57; Fire, tel. 238/82; Ambulance, tel. 238/82.

TELEPHONES: Can be connected on board if requested for vessels moored at quays No. 1, 2, 4 and 5.

SHORE LEAVE: Allowed without restriction. See "Notice".

DEVELOPMENTS: The port extension project of the Locodjro site (West bank of the Bay of Banco) to be constructed. Facilities to include container terminal, mineral terminal, additional fishing port, clinker berth and additional general cargo berths. 2×40 ton gantry cranes to be installed in 1986.

NOTICE: Agent's Notice to Masters: 1986.
REF: DOCUMENTS – SECURITY – WARNINGS.

In order to comply with the various local regulations and meet the different Port of Abidjan Authorities requirements, we give below, the necessary instructions, information and warnings.

(A) *Documents:*

Upon arrival you will have to hand over the following documents to the corresponding authorities:

1. *To the Agent:* 4 Crew Lists, 4 Ports of Call Lists, 4 Passenger Lists, 1 Store List, 1 Animal List, 1 Crew Declaration List, 1 Drugs List,
   1 Arms and Ammunition List, 2 full sets of Inward Manifests.
2. *To the Customs Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Store List, 1 Crew Declaration List, 1 Drugs List, 1 full set Inward Manifest.
3. *To the Police Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Arms and Ammunition List.
4. *To the Health Officers:* 1 Crew List, 1 Ports of Call List, 1 Passenger List, 1 Animal List, 1 Vaccination List.
5. *Remarks:* We must stress that all these above documents must be correctly and accurately completed, your attention is especially drawn to the documents given to the Customs Officers: Store List, Crew Declaration List, Drugs List, which will be thoroughly checked and any discrepancies could lead to heavy fines to the vessel.

   Customs Regulations require that any item which is not absolutely necessary to the functioning of the ship must be declared. This concerns mainly any television, radio, video, or other electrical apparatus belonging to the ship which have to be mentioned on the Store List together with all items usually declared.

   Also for exchange control operations, Customs require that any amount of foreign currency which is either personal to a crew member or belonging to the ship's funds in excess of CFA150.000 per man (approx. US$335.00) must be declared on the Provisions or Crew Declaration List.

(B) *Security:*

Your are hereby advised that security wise, Abidjan Port is quite unsafe these days, and Master must protect his ship against the following:

Robberies and Pilferage of Cargo and Vessel Property: Police Officers watch is compulsory on vessel discharging foodstuffs. However, additional watchmen (private or police) are recommended to avoid robberies and pilferage of cargo. Please discuss this matter with your Agent who can order the necessary watchmen at your request and for your account.

It is further recommended to keep all cabins closed and keep a watch at the entrance to the living quarters.

Prostitution: Even though they are not allowed to enter the port area, prostitudes board vessels either from shore or lagoon side.

You are hereby informed that such practices are strictly prohibited and vessel will be prosecuted and fines levied by police in case prostitutes are found on board your vessel.

(C) *Warnings/Smuggling:* We draw your attention on the strictness of the local Customs Regulations and hereby warn you and your crew of the heavy risks taken in case of any attempt at smuggling.

We strongly warn crew members not to deal with anyone trying to sell local produce (such as cocoa or coffee) or to buy any part of your cargo or personal effects (such as radios, televisions, videos, watches, sugar, rice, fish, etc.). Please note that some of these "dealers" are "Agent Provocateurs" and the Customs usually prosecute the vessel with fines out of all proportions.

You are also reminded that crew members are not allowed to carry in and out the port any personal effects or provisions of any value.

SHIPMASTER'S REPORT: October, 1983.

Documents: Customs are very strict on Crew Declaration and Crew Lists. Fines in case of differences are very high.

In case you are notified of a fine you should contact your P and I Club through your Agent.

Yellow Fever Certificates not compulsory.

Anchorages: Many ships that have had to anchor inside the harbour have been boarded by armed thieves – it is preferable to wait 30 miles off coast drifting rather than anchoring inside harbour waiting for berth.

Radio: "Comport" must be advised 24 hours prior to arrival. Arrival/departure is governed by Vridi Channel. Navigational opening times advised by Agent. Inward bound ships are advised to arrive 30 minutes after advertised opening times as outward ships have Pilot Priority.

Berthing: Max. draft at Banana Loading Pier is 7.5 m. We always berth port side to using starboard anchor. 140,000 boxes fruit usually loaded in a 40 hour working period. Labour works as cargo is available. For bananas/pineapples, holds are pre-cooled to +8°C for survey.

Average rate of general/frozen cargo discharge at General Cargo Piers is max. 15 t.p.h. depending on transport available.

Fresh Water: No difficulties at General Cargo Quays, but only available at Banana Quay by barges (whose services are unreliable). Always preferable to give as much notice as possible.

Watchmen: 2 ships' watchmen on duty at night plus 2 shore watchmen. The latter are regulars appointed by Ship's Master.

Regulations: Please note that security net under gangway is compulsory. The lack of it would result in a heavy fine from the Port Authority.

If unauthorised persons are allowed on board this may result in heavy fines by the Port Authority.

Crew Safety: It is always more advisable to take a taxi when proceeding ashore.

It cannot be too stongly emphasised that NO person should venture ashore on his own either by day or night.

SHIPMASTER'S REPORT: February 1985.
Customs: It is advisable to declare all valuable goods such as television sets, video-recorders, video tapes, radios and binoculars, also soft drinks and beer, as it is common for Customs to impose fines of $1,000 – $2,000 if incorrect declaration is made.

The Ship's Stores List/Provisions List must also be correct otherwise fines will be imposed.

AUTHORITY: Port Autonome D'Abidjan, BP. V85, Abidjan, Ivory Coast. *Tel:* 32-01-66. *Telex:* Comport 674. *Contact:* Director General.

AGENT: Socopao Cote d'Ivoire, 01 B.P. 1297, Abidjan 01. Tel: 32-02-11. Telex (Shipping): 23562. Cables: "Freight Abidjan". FAX: 32-92-05.

ESPOIR (Floating Storage Unit): 05.04 N. 04.26 W.

(See Plan)

PORT LIMITS: See "Plan".

Lay time will commence upon vessel being all fast.

DOCUMENTS: See "Abidjan".

PILOTAGE: The services of a Berthing Master are arranged by Agent and provided by Phillips Petroleum Co. (PPC).

Berthing Master boards approx. 3 miles from FSU.

ANCHORAGES:

Tanker Anchorage:

A. Lat. 5° 09′ 30″ N., Long. 4° 22′ 00″ W.
B. Lat. 5° 10′ 00″ N., Long. 4° 17′ 00″ W.
C. Lat. 5° 08′ 00″ N., Long. 4° 17′ 00″ W.
D. Lat. 5° 07′ 30″ N., Long. 4° 22′ 00″ W.

Anchoring Prohibited:

E. Lat. 5° 05′ 00″ N., Long. 4° 31′ 30″ W.
F. Lat. 5° 05′ 00″ N., Long. 4° 24′ 30″ W.
G. Lat. 5° 00′ 30″ N., Long. 4° 24′ 30″ W.
H. Lat. 5° 00′ 30″ N., Long. 4° 31′ 30″ W.

RESTRICTIONS: Mooring of a ship will not take place during dark hours – mooring will not take place if conditions are judged unfavourable by ship's Pilot, "Phillips Enterprise" Master or Terminal Superintendent. Mooring will not take place until after satisfactory completion of ship's safety inspection by Terminal Representative.

Also see "Berthing".

MAX. SIZE: Max. LOA 925 ft. Depth 280 ft.

HEALTH: See "Abidjan".

RADIO: All vessels destined to load crude oil at the Espoir Terminal are required to advise the Terminal Operator of their ETA (Estimated Time of Arrival) at the Terminal designated anchorage area 5 days, then 72, 48, 24 and 12 hours prior to their arrival. The 5 day's notification need only be given if the current sea passage of the vessel is in excess of 2 weeks' duration.

The 72 hour notification must include the following:

1. Exact ETA (local time and date).
2. Quantity of cargo required – in barrels.
3. Number and size of manifolds and reducers ASA 150.
4. Distance from bow to manifold and stern to manifold.
5. Length of flat side.
6. Minimum speed and equivalent RPM.
7. Confirm 5 mooring lines forward and 5 mooring lines aft (mooring lines should be minimum 11 in. with adequate chafing protection).
8. Advise arrival and departure draft and trim.
9. Any requirements needing early attention.
10. Confirm inert gas system operating correctly and that vessel will maintain a maximum oxygen content of 8% in the tanks throughout berthing, deballasting, loading and unberthing operations.

The 48, 24 and 12 hour notification need only specify the latest ETA, plus any amendment to the details already advised under the 72 hour notification. After the initial notification has been made, any change in ETA of more than 12 hours must be immediately advised to the Terminal Operator.

ETA messages can be routed as follows:

1. Phillips Base/Abidjan – VHF Channels 19, 20 and 24.
2. Phillips Base/Abidjan – Landline Telex: 22681 and 22682.
3. Phillips Base/Abidjan – HF SSB (voice)
   Ship transmits 4139.5 kHz
   Ship listens 2008.0 kHz
   Sel code 20947.
4. "Phillips Enterprise"/Espoir Terminal – VHF Channel 6.
5. "Phillips Enterprise"/Espoir Terminal – Telex via Inmarsat 00-581-1242511. Answerback 1242511 DTSI X.
6. "Phillips Enterprise"/Espoir Terminal – Telephone via Inmarsat 00-871-1242511.
7. Abidjan Radio (TUA).

VHF: FSU is equipped with VHF radio. Normally uses Channels 16 – 11.

VHF Channel 11 will normally be used between the storage vessel and the offtaking vessel during operations. The Berthing Master may designate another Channel if necessary. The Berthing Master will supply portable sets equipped with this Channel for inter-vessel use.

Communication During Loading Operations: As a general rule, medium and high frequency radio-telegraph and radio-telephone systems are to be shut-down during cargo transfer and deballasting. For more information, consult the OCIMF/ICS Ship-to-Ship Transfer Guide (Petroleum).

Inter-vessel Communications Failure: If inter-vessel communications fail during any part of the operation (mooring, deballasting, cargo transfer, unmooring), the vessel affected shall sound the International Signal "K" on her whistle and cargo operations, if in progress will be stopped until normal communications are re-established.

Aircraft Frequencies: Those vessels fitted with aircraft VHF frequencies when expecting helicopters, will make radio contact prior to their approach on 126.40 kHz. At this time operational advice will be exchanged such as permission to land and or information on hoists etc.

TUGS: 1 supply vessel and 1 twin screw/bow thruster tug of 30 ton bollard pull will assist during mooring. Tug normally joins the vessel 3 miles N.E. of Terminal.

BERTHING: The "Phillips Enterprise" (230,000 d.w.t. VLCC) located in position Lat. 05° 04′ 03″ N., Long. 04° 25′ 32″ W. is a permanently moored tanker used as a floating loading, storage and off-loading facility. Vessel is moored stern first to a buoy via a rigid arm, free to weathervane 360°. Off-loading ships are moored alongside port side to port side. Fenders are provided by "Phillips Enterprise".

Depending on ship size, offtake tankers will moor with minimum 6 head/stern lines and double wire springs with nylon tails. FSU provides 2 polyprop lines fore and aft.

The following sets forth guidelines on weather conditions under which berthing or unberthing operations may take place during PPCoIC loading operations. On many occasions, there may be circumstances or a combination of circumstances which may or may not preclude berthing or unberthing operations. In these circumstances, good judgment should be used by the Master, under the Berthing Master's advice to decide the action to be taken.

For Berthing: The berthing manoeuvre normally should NOT be attempted when any of the following parameters are reached:

1. Winds, Waves and Swell from the Same Direction
   (a) Wind velocity 30 knots or more.
   (b) Wave height 10/12 ft. or more.
   (c) Swell of short or average length, height 10 ft. or more.
2. Winds, Waves in Different Direction to Swell
   (a) Wind velocity 15 knots or more.
   (b) Wave height 5/6 ft. or more.
   (c) Swell of short or average length, height of 5 ft. or more.

For Unberthing: Whenever either of the following parameters is reached or exceeded, then vessels should normally be unmoored.

(a) Wind 35 knots or more.
(b) Wave height 10 ft. or more, or when cross-wind or swell is causing undue working of the mooring lines.

Immobilisation of engines not permitted.

LOADING: The "Phillips Enterprise" is equipped with 1×16 in. hose string. Manifold connection from ship should be 16 in. ASA 150 lbs.

Transfer operations are to be made in strict accordance with ICS/OCIMF Ship-to-Ship Transfer Guide and Espoir Terminal Regulations and Information Handbook.

Crane: One hose handling hydraulic crane on the "Phillips Enterprise". Ship's port manifold boom required to complete rubber hose connection for discharging.

BALLAST/POLLUTION: No dirty ballast facilities. Only clean ballast from segregated ballast tanks is to be discharged. The offtaking vessel's Master and the Loading Supervisor of the Espoir Terminal vessel should assure themselves that such ballast is clean. Vessels calling at the Espoir Terminal must be members of the TOVALOP agreement. Valid certificate of membership must be on board the vessel.

MEDICAL: In case of emergency medical attention, the following information should be sent to the Agents:

1. Name, rank, nationality and passport number.
2. Method of travel and port of disembarkation.
3. Specify general symptoms and any particular requirements.

DENSITY: Salt.

FRESH WATER: Not available.

FUEL: Not available.

FIRE PRECAUTIONS: Transfer operations are to be made in strict compliance with the ICS/OCIMF Ship-to-Ship Transfer Guide and Espoir Terminal Regulations and Information Handbook, a copy of which is given to the off-loading tanker prior to the mooring operation.

EMERGENCY CO-ORDINATION CENTRE: Phillips Base/Abidjan for any emergency situation arising from the conduct of lifting operations at the Espoir Terminal.

REPAIRS/SPARES: Whenever it is necessary to send ashore ship's equipment, deck/engine machinery, spare parts, etc., for repairs or transhipment, the Agents must be advised 24 hours in advance in order to file with the Customs in sufficient time before the parts arrive. In addition, a letter from the Master, addressed TO WHOM IT MAY CONCERN, giving all details on the parts, etc. should be attached to the respective cases.

SHORE LEAVE/REPATRIATION: Shore leave is not allowed for crews while in the cargo transfer area; however, crews are allowed to be repatriated or to go ashore for medical attention. In case of repatriation, the Master must send a message to his Agent at least 24 hours prior to the crew member's arrival ashore indicating:

1. Name, rank, nationality and passport number.
2. Way of travel from the loading area to shore, i.e., loading vessel's name, helicopter, supply boat, etc., and port of disembarkation.
3. Final destination and the reason for disembarkation e.g., repatriation, to doctor or hospital.

SAFETY: *Emergencies:* The Emergency Signal will consist of a series of short rapid blasts on either ship's whistle or siren. This signal will apply through any part of the operation. All pumping must stop and the full resources of the ship directed to deal with the emergency.

Special Signals: Both vessels engaged in the oil transfer operations will display the lights and shapes required by the International Regulations for Preventing Collision at Sea, 1972 or any subsequent amendments.

Weather: Available local weather forecasts, supplemented by shipboard facsimile weather records and area weather reports from the Abidjan Office should be checked before and throughout the operation.

Gangway Safety Net: If a gangway between vessels is used, a safety net must be rigged underneath the gangway between both vessels at all times.

Emergency Towing Wires: Emergency towing wires shall be properly rigged on the starboard side of the off-taking vessel, forward and aft. These wires are to be kept near the water surface at all times.

Deck Watch: A Deck Watch on mooring must be maintained by both vessels and the bow of the off-taking vessel should not be allowed to fall off.

GENERAL: *Helicopters:* Helicopters will not be used for the transfer of personnel or materials to and from the terminal area during the period vessels are mooring or unmooring.

The landing of helicopters on vessels engaged in the ship-to-ship transfer is expressly forbidden unless previously authorised by PPCoIC. If permission is granted, arrangements and advice to the interested parties will be co-ordinated by the PPCoIC Office in Abidjan.

Whenever a helicopter is sent to the loading area, the Master of the vessel to which it is dispatched will, before its departure, be advised by PPCoIC Abidjan, of the helicopter's ETA at the vessel along with any relevant information necessary. Any oil transfer operation will cease 30 minutes before its arrival.

Vessels fitted with radios, on frequency 126.40 kHz should attempt to make radio contact with the helicopter before its arrival.

Notice of Readiness: The off-taking vessel should on arrival at the "Designated Anchorage Area", tender Notice of Readiness (N.O.R.) through the Loading Supervisor on duty who will acknowledge receipt as per terms and conditions of the Charter Party. If no Loading Supervisor is on duty at the time, then consideration may be given to tendering N.O.R. by radio through vessels Agent.

Bills of Lading: After the cargo transfer operation has been completed and the cargo quantity determined, Bills of Lading will be prepared by the designated shipping Agent or in his absence by the Terminal Operator, in accordance with Appendix A of the Crude Oil Lifting Procedures.

AUTHORITY: Phillips Petroleum Company – Ivory Coast, 01 B.P. 3857, Abidjan 01, Ivory Coast. *Tel:* 32.16.14 (Ext. 505). *Telex:* 22681, 22682. *Cables:* Philivco, Abidjan. *Contact:* C. J. Head, Marine Superintendent.

SAN PEDRO: 04.44 N. 06.38 W. (See Plan)

LOCATION: The Port of San Pedro is located at the old mouth of the river bearing the same name. The river has been diverted and now comes into the sea to the East of the hill on which a light is located.

DOCUMENTS:

3 copies Crew List.
3 copies List of Ports of Call.
1 copy Passenger List.
1 copy Declaration of Arms and Ammunition.
3 copies Kroo List.
1 copy Health Declaration.
6 copies of Manifest.
2 copies Bills of Lading.
3 copies List of Hazardous Cargo, disembarking or in transit.

APPROACHES: *In Clear Weather:* The first recognisable Port characteristics are:

1. The lighthouse to the N.E. of the Port on a hill (Lat. 4° 44′ 55″ N., Long. 6° 36′ 00″ W.) – which is a four-sided pylon 26.8 m. high on the top of which is a square metal shelter with horizontal red and white stripes and on its middle part on the Southern side is a white sphere. The height of the light is 160.3 m.

2. Hertzien Relays: Cylindrical telecommunications tower, grey in colour and 59.3 m. high. It is located 1,100 m. – 268° from the light of the Eastern Jetty on a hill dominating the Port. Its height in relation to sea level, is 127 m. At the top of it is a metal aerial mast.

In Misty Weather: There is an aeronautical radio beacon (Lat. 4° 46′ 12″ N., Long. 6° 38′ 58″ W.) operating during the day from 0730 hrs. to 1830 hrs. and at night on request (frequency 330 A1 call sign "SAP".). The request for night operation must be made to ASECNA at Abidjan.

PILOTAGE: Pilotage is compulsory for entering and leaving and for moving within the pilotage limits, defined by a circle of 4 miles radius centred on the base of the Western Jetty (Pointe Quiquerez).

All vessels wishing to enter the pilotage area of the Port must send at least 24 hours prior to arrival, a telegram or a telex stating ETA, overall length, draft, nature and tonnage of goods to be loaded or unloaded.

The telegram or telex should be sent for the attention of the Port Commandant, or otherwise to the Consignee.

The pilot boat is a cutter which has a black hull and white superstructures marked "Pilote San Pedro". The usual summoning signals for the Pilot are also supported by 2 long and 1 short (G) audible signals on the siren.

Pilotage is available day and night for leaving the port and for movements at the quay. Berthing at the buoys only possible during daylight hours. Departures are announced at the daily port conference.

Pilot service not available 24th & 31st December (1800 – 0800 hrs.).

Three hours before sailing, the ship's Agent must confirm or modify the time for sailing as is expected.

The vessel must confirm again its departure 1 hour before sailing (by VHF or by any other means if the vessel does not have VHF).

RESTRICTIONS: Tides impose no restriction. However vessels drawing 34 ft. (the authorised maximum) operate during HW to facilitate their movements.

MAX. SIZE:

Berth	*Max. LOA* (m.)	*Max. Draft* (m.)
Oil Berth	90	5.5
Berth No. 1	155	10.5
Berth No. 2	200	10.5
Berth No. 3	190	10.2
Berth No. 4	195	10.5
Berth No. 5	140	10.5
Berth No. 6	150	8.5
South Quay	150	8.5
West Quay	586	10.5

RADIO: Vessels anchored can communicate with the Port Captaincy on VHF (Channel 16 and 12 with permanent watch). There is permanent radiotelephone watch on 2182 kHz, as well as communication by light signals.

TUGS: One tug of 1,300 h.p.

BERTHING: The port protection structures comprise of a Western breakwater 265 m. long and a breakwater to the East of 145 m. length. Access is by means of a 120 m. wide channel dredged to 12.50 m. The entrance passage is 200 m. wide. A heading of 291.5° leads to the port.

The channel gives access to a manoeuvring basin of 400 m. diameter dredged to 11.8 m. depth.

South Quay: Length 155 m., depth 9 m.
West Quay: Length 181 m., depth 11 m. and 405 m., depth 12 m.
Service Quay: Length 109 m., depth 4 m.

There are 5 loading points at buoys for loading timber: 2 to the North of the Western Quay, and 3 to the North of the Eastern Breakwater, which can take vessels with a maximum length up to 140 m. at 3 buoys and 200 m. at 2 buoys. Depth 11 m.

Cement Handling Berth: Length 200 m. Vessels berth against dolphins and secure to buoys fore and aft. Depth of water 11 m.

There is also inside the Port a small tanker berth for vessels not exceeding 100 m. on the Eastern Breakwater. The areas located to the North and East of these berths are used for storing timber.

Also see "Max. Size".

STEVEDORES: Work around the clock.

MEDICAL: There is a hospital with limited facilities at San Pedro. For serious cases, patients are taken by medical plane to Abidjan (which is 1 hour's flight away).

EQUIPMENT: No quay cranes, cargo handled by ships gear.

One mobile crane, capacity 60 tons. One 30 ton "Challenger" for handling containers. Lighters of 200 ton and 300 ton capacity.

FRESH WATER: Available at the quays, rate 30 t.p.h. Also available at the buoys by barge, capacity 300 tons, rate 25 t.p.h.

FUEL: Available alongside at the quays by road tanker.

CONSULS: France.

REPAIRS: There are several workshops for effecting small repairs.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

AIRPORT: Daily air link with Abidjan

TIME: GMT.

HOLIDAYS: *Public:* December 7th, (Independence Day); May 1st, (May Day).

Legal Holidays: The following legal holidays are considered public holidays with pay unless they fall on a Sunday:

January 1st; End of Muslim's Lent (Ramadan); November 1st, All Saints' Day; Ascension Day; Assumption; Easter Monday; Whit Monday; December 25th.

It should also be noted that when December 7th and May 1st fall on a Sunday the following day is considered a public holiday. The same when December 7th falls on a Tuesday or Friday, the preceeding or following day is considered holiday.

POLICE/AMBULANCE/FIRE: Police Tel: 71-13-43; Ambulance Tel: 71-10-25; Hospital Tel: 71-11-21 and 71-16-01.

GENERAL: *Tides & Currents:* The maximum tidal range is 1.5 m. (about half an hour ahead of the tidal times at Abidjan).

The slight S.W'ly current at the Port entrance of 0.5 to 1 knot is negligible inside the Port.

There is a slight tidal rip at the South Quay. But in the whole port and particularly at the South Quay, there is a considerable undertow between the months of June and September.

Weather: The tropical climate with tradewinds is rather mild (maximum 30°C, minimum 20°C, the absolute minimum being registered in January 15°C).

The rain seasons go from May to August; the region is irrigated by tornadoes from April to May and September to October. The average rate of rainfall reaches 1,600 mm./year.

Fresh Food: Only available in small quantities.

Roads: A tarmacadam road connects with Abidjan, distance 450 km.

Port Officials: The Port Captaincy, the pilotage and tug control are all in the Captaincy building which is a two storey structure, raised on a circular dias located at Pointe Quiquerez. The Customs are within the Port to the South of the Western Quay.

DEVELOPMENTS: By 1990 in order to cater for increased exports and imports, the Port will have 4 anchorage points and 7 quay berths, one of which will be multi-purpose. This will involve extending the Port to the North and enlarging the Northern Dock, creating an Inner Port, extension of dredging, creation of open storage areas and construction of quays. In all, the plan, from a long term aspect, is to have 10 km. of quay, 500 hectares of port industrial area and 200 hectares of commercial areas.

AUTHORITY: Port Autonome de San Pedro, B.P.340, San Pedro, Ivory Coast. *Tel:* 71.20.80 or 71.16.61. *Telex:* 99102 Comport-CI. *Cables:* Comport San Pedro. *Contact:* Harbour Master (VHF Channel 16 or 2182 kHz). *Tel:* 71-16-85.

AGENT: See "Abidjan".

Jamaica

KINGSTON: 17.59 N. 76.50 W. (See Plan)

PORT LIMITS: The area of the sea to the Northward of the Palisadoes extending from Harbour Head to Port Royal and a straight line from Port Royal to the jetty at Small Point.

Charts: General Chart of Jamaica No. 446. Kingston Harbour No. 454.

DOCUMENTS:

For Customs:
2 Crew Declaration
Clearance from the Last Port of Call.
1 Ship's Register, i.e. Ship's Information.
2 Stores Lists.
2 Dangerous Cargo Lists.
International Certificates of Vaccination for each Crew Member.

For Immigration
2 Passenger Lists.

For Agent
Bills of Lading covering all cargo on board.
2 Crew Lists.
2 Stores Lists.
5 Manifests.
Ship's Register, Safety Certificate and Load Line Certificate.

For Quarantine
1 Crew List.
Maritime Declaration of Health signed by Master.
1 Derat Certificate.
International Certificates of Vaccination for Crew Members.

PILOTAGE: Pilotage is compulsory. A minimum of six (6) hours advance notice from the Master or Agent for the services of a Pilot. Pilots usually board the vessel two (2) miles S.E. of Plumb Point Lighthouse or East Middle Ground Buoy.

VHF contact with the pilot office is made through Channel 11.

ANCHORAGES: There are 5 anchorages namely A, B, C, D and E which are reserved. Reservation for the use of these anchorages should be made through the Harbour Master.

The 5 reserved anchorages are:
A. 210° Distant from R.C. Cathedral Dome 12.2 cables.
Position: Lat. 17° 57′ 17″ N., Long. 76° 57′ 12″ W.
B. 186.5° Distant from R.C. Cathedral Dome 10.9 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 47′ 12″ W.
C. 162.5° Distant from R.C. Cathedral Dome 12.1 cables.
Position: Lat. 17° 57′ 14″ N., Long. 76° 46′ 40″ W.
D. 118.5° Distant from R.C. Cathedral Dome 28.4 cables.
Position: Lat. 17° 57′ 00″ N., Long. 76° 44′ 30″ W.
E. 124° Distant from R.C. Cathedral Dome 24.4 cables.
Position: Lat. 17° 57′ 07″ N., Long. 76° 45′ 00″ W.

In addition there is unlimited anchorage space available toward the Eastern end of the Harbour.

Entry – Day or Night.

RESTRICTIONS: Entry – day or night. Rise and fall of tide, average range 10 in., occasionally 16 in. Strength of current in harbour 1.5 knots (in some places). Main direction and average speed of prevailing winds E.S.E. 20 m.p.h. Months of max. rainfall (i) April/May, (ii) Sept., Oct. and Nov. Hurricane period June 15th – November 15th.

MAX. SIZE: Recommended max. draft into Port Royal 40 ft. for vessels of unlimited size. Main ship channel max. recommended draft of 36 ft. 6 in. and is 800 ft. wide at its narrowest point. Depth 39 ft. at MLW. Newport West has recommended draft of 32 ft. 6 in. with a turning basin of 1,500 ft. Esso Terminals has recommended max. draft of 34 ft. 6 in. Max. recommended draft of 32 ft. 6 in. to proceed Eastwards, from Esso Terminals, in harbour to anchorage or berths. Newport East has max. recommended draft of 27 ft. 6 in.

HEALTH: See "Documents".

Radio Pratique may be granted.

Crew not allowed to take fruit ashore.

Pratique Procedure: The Customs Officer who boards the vessel to check all documents will after he has placed excess tobacco and liquor under bond indicate to the Master when Pratique has been granted.

If a vessel obtains Pratique at Kingston, automatic Pratique granted to proceed to any other port in Jamaica.

RADIO: Cable Agents giving ETA, Draft, Passengers (if any), cash required. Call sign "KNRDO 6YI".

Tankers: ETA messages to state arrival time at Pilot Station, maximum draft on arrival, last port(s) of call, number of crew, date Derat Certificate expires, confirm crew possess valid vaccination certificates, cash, stores and laundry requirements, details of diseases if any and request Radio Pratique.

VHF: VHF Channel 16 – Kingston Radio. VHF Channel 11 – Pilotage.

TUGS: Available and compulsory for berthing and unberthing. Two tugs of 2,800 h.p. Tugs join incoming vessel near berth. In case of emergency tug joins vessel wherever requested by Master. Tugs on VHF Channel 16 (24 hours). Usually ship's lines used, but if tug's lines used there is no extra cost.

BERTHING: At the Public Wharves there are 11 existing berths and their specifications are as follows:

Berth No.	Length	Depth	Max. Draft
No. 1	525 ft.	25 ft.	22 ft. 6 in.
No. 2	600 ft.	30 ft.	27 ft. 6 in.
No. 3	600 ft.	33 ft.	30 ft. 6 in.
No. 4	600 ft.	34 ft.	31 ft. 6 in.
No. 5	600 ft.	33 ft.	30 ft. 6 in.
No. 6	600 ft.	32 ft.	29 ft. 6 in.
No. 7	600 ft.	33 ft.	30 ft. 6 in.
No. 8	600 ft.	31 ft.	28 ft. 6 in.
No. 9	600 ft.	34 ft.	31 ft. 6 in.
No. 10	600 ft.	39 ft.	36 ft. 6 in.
No. 11	600 ft.	39 ft.	36 ft. 6 in.

In the immediate vicinity of these berths the clear turning is 1,500 ft.; elsewhere there is adequate swinging room for the largest vessel. At Berths 1 – 8 there are the following:

4,725 ft.	of berth frontage
467,000 sq. ft.	transit shed
3,247,000 sq. ft.	of open storage
67,000 sq. ft.	of cold storage

Tractors, cranes and forklifts are used to move cargo from ship's side.

Ro/Ro facilities are located at Berth No. 1, where there is an 80 ft. concrete ramp. There is a floating barge/ramp at Berth No. 8. Full container facilities are available at Berths 9, 10 and 11; and in addition there are approx. 50 acres of terminal area with storage space for 5,000 containers and a Container Freight Station of 45,000 sq. ft.

There are no specialised berths on the public wharves for handling bulk cargo. However, when necessary, consignees make their own discharging and storage arrangements.

Dangerous Cargo: 1. Vessels wishing to transit any Jamaican Port with dangerous cargo/goods on board are required through the Master or Agent to apply to the Harbour Master for permission to make such a transit.

The application should be made not less than 48 hours before the vessel's ETA and must include:
(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The port for which the cargo is destined.

2. Vessels loading dangerous cargo for intended discharge in a Jamaican port must before loading such cargo apply to the Harbour Master for permission to go alongside for the purpose of discharging same. The application must include:
(a) The I.M.O. number assigned to the cargo as per I.M.O. Dangerous Goods Code;
(b) The volume of the cargo;
(c) The nature of the cargo and storage;
(d) The name of the intended port of discharge.

Equipment: Four Portainer Cranes (40 ton), 9 Karrilifts, Heavy Forklifts (max. 32 ton), for handling empty containers and several Tractors and Chassis.

The 4 Portainer Gantry Cranes are capable of moving 20, 35 and 40 ft. containers at a rate of 30 an hour; the 9 Karrilifts can handle similar size containers.

Developments: Rails on Berth 11 have been extended by 200 ft. Adjacent to this extension it is proposed to erect a 100 ft. berthing platform for handling Ro/Ro vessels.

STEVEDORES: To enable Agent order gangs important to obtain accurate ETA from vessels. Time: 1200 hrs. the working day before vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs., 2100 – 0500 hrs. Saturdays, Sundays and public holidays attract premium rates.

Stevedores normally rig and open, but crew open McGregor hatches. All necessary gear supplied by stevedores except rain tents and special lifts requiring special gear, which vessel must supply. Average unloading rate 10/15 tons per gang hour for general cargo.

BULK HANDLING FACILITIES: *National Gypsum & Quarries Limited:* National Gypsum and Quarries Limited operates a wharf at Harbour Head for the export of gypsum rock only.

There are 3 steel and concrete dolphins and 1 wooden dolphin. The concrete and steel dolphins are the principal docking structures. They are 161 ft. apart. The min. draft currently available is 26 ft., but this could be increased at short notice to 29 ft. Vessels of 440 ft. length and 64 ft. beam are normally loaded. Bulk rock loading facilities capable of loading crushed gypsum at an average rate of 700-1000 t.p.h. are available.

Wherry Wharf Limited: Wherry Wharf Limited maintains a pier at Newport East for loading and unloading lumber, corn and animal feed ingredients.

The wharf is 200 ft. long with a depth of 29 ft. It has a free-flow access road and a 200 ft.×60 ft. apron.

Shell Company (W.I.) Limited: Shell Company (W.I.) Limited has bulk cargo facilities at Harbour Head used primarily by Jamaica Flour Mills.

MEDICAL: Agents to be advised before arrival of vessel if emergency medical attention required. Hospital facilities available. If inoculation required Master to advise Agents prior arrival of vessel.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. Gas free certificate required for tankers laying alongside Public Wharves in Kingston.

Texaco Caribbean Inc.: Texaco Caribbean Incorporated operates 1 wharf which is situated at Harbour Head and is known as the Eastern Terminal. The jetty is 325 ft. long and will accommodate vessels up to 18,000 tons (gross). Max. draft at low tide is 28 ft. Berth is used for receival of bulk petroleum products and for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil. No packaged goods are handled at this berth. Fresh water supplies are available.

Esso Marketing Terminal: Max. length of vessels 600 ft. Max. safe draft –31 ft. Draft forward restricted to 28 ft. only with vessel moored portside alongside. Both day and night berthing possible. Fresh water is available. Bunkers available here are Heavy Fuel Oil (Bunker C), Marine Diesel, Marine Gas Oil and a wide range of intermediate bunkers.

Esso Refinery Marine Dock: Max. length of vessels 743 ft. Max. safe draft 36 ft. 6 in. Fresh water is available and day and night berthing possible. The Esso Refinery Pier is used for receiving crude petroleum from tankers as feed stock for the Refinery through a 20 in. under sea pipe-line. A wide range of finished products is also delivered into tankers for export as well as for discharge at other ports on the island.

Esso Refinery Dry Cargo Dock: Max. length of vessels – 400 ft. (Freighters) and 475 ft. (Tankers). Drafts alongside vary from 25-27 ft. Draft forward restricted to 17 ft. 6 in. with vessel moored portside alongside only. Fresh water is available. This dock is used for loading and unloading packaged and drummed lubricating oil on freighters for export to various countries throughout Central America and the Caribbean.

Other materials exported here are lubricating oil in bulk and various grades of asphalt in drums.

DENSITY: Average density 1026.

FRESH WATER: Fresh water available at berth. Average rate of delivery 20 t.p.h.

FUEL: All grades (viscosities) available. At least 2 days' advance notice required.

Bunkering Depot – Newport West: The Shell Company (W.I.) operates bunkering facilities at Newport West.

A hydrant system with outlets at each berth provides a complete range of bunkers.

Esso bunkering facilities are available at Newport West. Pipe-lines run from the nearby Esso Kingston Terminal to the berth at Newport West providing Heavy Fuel Oil and intermediate ranges of bunkers. Marine Gas Oil is also available Monday through Friday by tank truck.

Texaco Caribbean Incorporated also has facilities for bunkering vessels with Gas Oil, Marine Diesel and Fuel Oil.

FIRE PRECAUTIONS: Fire boat available equipped for fighting harbour fires 24 hours per day. Also equipped fire engines situated within easy reach of docks available 24 hours a day.

GANGWAY/DECK WATCHMEN: Services of watchmen are recommended.

OPENING/CLOSING HATCHES: Hatches covered by Pontoon and Hatch Boards opened and closed by stevedores. McGregor hatches handled by crew.

CERTIFICATES:

Safety Certificate.
Ship's Register.
Load Line Certificate.
Test Certificates for derricks and cargo handling gear.

CUSTOMS ALLOWANCES: Tobacco, 2 oz. tobacco in any form (2 oz. pipe tobacco or 40 cigarettes) per day. Wine and/or spirits, 6 oz. or 0.5 reputed pint of spirit per day. 1 pint wine allowed Master and Officers only or as stated in the Articles under flag they fly.

CARGO GEAR: The usual certificates covering testing and inspection of all gear and equipment as required under Docks Regulation 1934 of Great Britain or by International Labour Organisation, will be acceptable.

IDENTIFICATION CARDS: No Identification Cards required.

CONSULS: Consuls not available on Saturdays and Sundays, except by special request.

REPAIRS: Minor deck and engine repairs possible by 2 firms. Pre-advice of 3 days recommended.

DRY DOCKS: Dry dock facilities available.

SURVEYORS: Lloyd's Register, A.B.S., B.V., G.L., Det Norske Veritas.

REPATRIATION: Facilities available for effecting crew changes.

AIRPORT: Norman Manley International Airport – approximately 10 miles – served by many airlines.

TIME: Local time is GMT minus 5 hours.

HOLIDAYS: Days when work is performed only on overtime rate: New Year's Day; Ash Wednesday; Easter Monday; National Heroes Day (third Monday in October); Boxing Day. Days when ports closed, no work performed: Good Friday; National Labour Day (May 23rd); Independence (first Monday in August); Christmas Day.

POLICE/AMBULANCE/FIRE: Emergency tel. numbers: Police 116; Ambulance 110; Fire 110. Commissioner of Police 79858–0. Radio Control Room 81261–2. Fire Brigade 22121. Fire Boat Station 27018.

TELEPHONES: Arrangements exist for placing telephones on board. The Jamaica Telephone Company to be advised by Agents 2/3 days before vessel arrives.

SERVICES: Compass adjusting services available. Although routine repairs to radar, radios and other electrical equipment are possible, technical services generally limited.

SHORE LEAVE: Crew members allowed on shore after vessel cleared by Immigration. Vessels arriving from some countries require special Government approval before shore leave permitted, but no restrictions are normally placed on vessels arriving from Western European, American or African countries.

REGULATIONS: Dogs are not permitted to land unless they have undergone quarantine or are imported from United Kingdom.

DELAYS: Normally there are no delays to vessels calling at the port.

GENERAL: *Ship's Chandlers:* 3 ship's chandlers available.

Communications: Regular air services daily to London, New York and other European and American cities, and is therefore in excellent position to offer emergency facilities to vessels requiring urgent spares, crew replacements, etc. Vessels can anchor at Port Royal close by airport.

Customs: Vessels are searched thoroughly by Customs for *firearms* and contraband. Masters are held responsible by Customs for security of bonded stores, etc. Masters are therefore alerted to check security arrangements and to keep watch on bond whilst in port.

AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, P.O.Box 474, Kingston, Jamaica. *Tel:* 922-0290/8. *Telex:* 2386 Portops Jamaica.

MONTEGO BAY: 18.30 N. 77.56 W. (See Plan)

DOCUMENTS, PILOTAGE and all general information: refer to "Kingston".

ANCHORAGE: There is one anchorage in Montego Bay which must be booked through the Harbour Master in Kingston. Depth 5 to 6 fathoms.

RESTRICTIONS: Entry – day and night. Rise and fall of tide, average range 10 in. No current in harbour. Main direction and speed of prevailing wind, N.E., 10 m.p.h. Subject in January-February to occasional 2 – 3 day spells of squalls with driving rain known as Northers which makes lying at the anchorage uncomfortable, but there is virtually no swell alongside the berths.

MAX. SIZE: Unlimited water at anchorage. The 1,500 ft. long 400 ft. wide straight channel has a min. depth of 34 ft. MSL, as does the 1,600 ft. diameter turning basin.

CLEARANCE: Customs, Health, Immigration Offices are maintained at the port.

BERTHING:

Montego Freeport is a new port developed with 3 berths operated by Montego Wharves Limited.

Berth No. 2 – 600 ft. long, 34 ft. min. depth alongside, 7.5 ft above water line.

Berth No. 3 – 588 ft. long, 25 ft min. depth alongside, 6.5 ft. above water line.

Berth No. 4 – 387 ft. long, 25 ft. min. depth alongside, 6.5 ft. above water line.

These berths are reached through a 1,500 ft. long straight channel 400 ft. wide dredged to a min. depth of 34 ft. There is 23,000 sq.ft. warehouse and an 87,000 cu.ft. cold storage facility adjacent to berth 2 with a wharf apron of 75 ft. Berths 3 and 4 are designed for Roll-on/Roll-off with 13 acres of bonded storage space adjacent. Berth 4 is used principally by cruise ships and is connected to a 5 acre duty free shopping complex by a 200 ft. long tree-lined walkway.

Montego Freeport Limited intends to build Berth No. 1 in the next few years which will be a continuation of Berth No. 2, creating 1,300 ft. of continuous berth face with ample space behind for expansion. The cold storage is planning on doubling its capacity.

STEVEDORES: The Port is open 24 hours of the day. To enable Agents to order gangs, it is important to obtain accurate ETA from vessels. Time: 1200 hrs. the day before the vessel arrives. Shifts: 0700 – 1400 hrs., 1400 – 2100 hrs. Mondays to Fridays with option to extend the first shift to 1700 hrs. at single time; 0700 – 1200 hrs. Saturdays, thereafter at overtime. Details can be obtained from Montego Stevedoring Limited, P.O. Box 303, Montego Bay.

TANKERS: No specific requirements applicable to oil carriers. Reducers available to fit 12 in. – 4 in. load/discharge lines. Slop (residue) discharge facilities available taking maximum 500 gallons. One tanker berth, Berth No. 2 minimum depth alongside 34 ft. MSL. Gas-free Certificate required for tankers laying alongside.

DENSITY: Average density 1026.

FUEL: All grades (viscosities) available. At least 4 days notice required.

FRESH WATER: Can be supplied from the dock. 30 t.p.h.

MEDICAL: All facilities at St. James's Hospital. Advise Agent in advance.

SECURITY: Under the jurisdiction of the Montego Bay Police and also 24-hour patrols in the port area by private security guards.

CONSULS: No consular offices in Montego Bay. See "Kingston".

FIRE PRECAUTIONS: Equipped fire engines situated within easy reach of docks 24 hours per day.

IDENTIFICATION CARDS: Recommended for crew.
REPAIRS: There are no dry dock facilities, but minor repairs can be effected alongside.
AIRPORT: 5 miles from port. Donald Sangster International Airport served by regular airlines.
POLICE/AMBULANCE/FIRE: Police, Tel: 119; Ambulance, Tel: 110; Fire, Tel: 110.
AUTHORITY: Montego Freeport Limited, P.O.Box 303, Montego Bay, Jamaica. *Telex:* 5329 Moport.

OCHO RIOS: 18.25 N. 77.07 W.

REYNOLDS PIER

GENERAL: Reynolds Jamaica Mines act as Agents for all cargo vessels using the pier at Ocho Rios. *(a)* Tel. Ocho Rios 603. *(b)* Cable address is "Mines" Ocho Rios, Jamaica. *(c)* 72 hour and 24 hour ETA requested. *(d)* Radio telephone 2738 kHz open when calls expected at 0700, 1100, and 1500 hrs. local zone time.
PILOTAGE: Compulsory. Pilot meets vessel 1 mile N.E. of Sea Buoy. On rare occasions when a local Pilot is not available expenses and detention must be paid for an outside Pilot.
MAX. SIZE: Max. LOA 850 ft. Depth alongside pier 38 ft. Recommended draft 35 ft.
FRESH WATER: 50 c. per ton supplied from pipe-lines on the pier.
FUEL: Bunker "C" Fuel Oil – daily prevailing rate Kingston Harbour. Diesel Fuel Oil – per oil company suppliers Kingston.
REGULATIONS: (1) If any Master of any vessel or any other person shall throw or deposit, or permit to be thrown or deposited *(a)* any rubbish, earth, mud, stone, sand, ballast or other similar matter; or *(b)* any oil or mixture containing oil or oil residues, in any channel leading into or out of any harbour, or in any place within the limits of any harbour other than such place therein as shall be set apart for such purpose he shall be liable to a penalty not exceeding one thousand dollars.

(2) No siren or steam whistle shall be sounded on any vessel in any harbour except for the purpose of making signals as laid down in the regulations for preventing collisions at sea, provided that any vessel may sound one warning blast of not more than five seconds duration before sailing. Any person committing a breach of the rules is liable for a penalty not exceeding 1,000 Dollars.
CARGOES: The Reynolds Jamaica Mines Pier is occupied about twice each week by ore carriers for 8 to 12 hours and about twice a month by sugar ships for indefinite periods.

CRUISE SHIP PIER

LOCATION: Lat. 18° 24′ 26.4″ N., Long. 77° 06′ 44.3″ W.
PILOTAGE: Compulsory.
ANCHORAGE: Anchorage can be arranged depending on length and draft of vessel.
MAX. SIZE: Max. LOA 650 ft., depth alongside pier is 35 ft. (MLW). Recommended draft for vessel 35 ft.
TUGS: Not available.
CLEARANCE: Customs, Health and Immigration Offices are maintained at Port.
BERTHING: Used principally by cruise ships.
FRESH WATER: Fresh water available.
SECURITY: 24-hour patrols in Port area by private security guards. There is also a Police Post in the Terminal Building.
IDENTIFICATION CARDS: Recommended for crew.
AUTHORITY: Port Authority of Jamaica, 15-17 Duke Street, Kingston, Jamaica. *Tel:* 92-20290/8. *Telex:* 2386 Portops Jamaica.

AGENT: Lannaman & Morris (Shipping) Ltd., P.O. Box 2, Kingston 15. Tel: 92-37653. Cable Address: "Seahost Jamaica". Telex: 2242 Seahost Jam.

PORT ANTONIO: 18.11 N. 76.27 W. (See Plan)

SHIPMASTER'S REPORT: June 1983.

DOCUMENTS: See "Kingston".
PILOTAGE: Compulsory. 24 hours' notice to be given via Agent.

The Pilot boarded from a small outboard motorboat about 2 miles N.E. of Folly Point. There is a VHF but on this occasion it was not working. The Pilot identified himself by flashing the word 'Pilot' by light.

Ladder normally required on the starboard side on arrival and port side on departure.

The Pilot is extremely competent and experienced.
ANCHORAGES: No anchorage outside harbour due to depth of water.
MAX. SIZE: Banana Pier (Boundbrook Wharf): LOA 511 ft. 2 in., beam 70 ft., draft 25 ft.
HEALTH: Quarantine examination when alongside.
RADIO: Kingston Radio.
VHF: Pilot uses Channel 16 (not operational June 1983).
TUGS: None available or required.
BERTHING: *Boundbrook Wharf:* The entrance channel (0.65 miles long) is very narrow, all navigational lights were lit. Least depth 29.5 ft. Rise of tide, 1 ft. 4 in. When clear of the channel the ship is headed towards the South end of the wharf and the port anchor let go in such a position that, when the ship is alongside, 7 shackles of cable will have been veered. When approaching the wharf the cable is used to swing the ship.

A boat takes the headrope to a bollard on the South face of the wharf. When the ship has swung sufficiently the boat then takes the stern rope to a bollard on the North face.

The pier is only 300 ft. long, it may be necessary to use a pilot ladder for access to the vessel should the stern overhang the pier. Vessels can berth and unberth 24 hours a day.

In the summer months the winds are generally light and from the South but in the winter they are Northerly and strong with a consequent swell in the harbour and, in those conditions it is considered that berthing at Boundbrook wharf would be difficult.

When unberthing, moorings are singled in to one stern rope to the North face of the wharf. The ship is then moved, whilst still alongside, so that the North knuckle of the wharf is abreast the lower gangway platform, it is necessary to have a fender handy in this position. The anchor cable is then hove in swinging the ship's head off the wharf. At the same time a steady strain is maintained on the stern rope so that the ship pivots about the knuckle and the stern swings into the cut on the North side of the wharf. When nearly at right angles to the wharf the engine is moved ahead with the rudder to starboard thus swinging the stern clear of the knuckle, the stern rope is cast off and the anchor weighed so that the ship moves clear of the wharf and continues to swing to port so as to be heading more or less for the channel.

The Pilot disembarks in a position abeam of Folly Point with the ship's head North.
CRANES: None. The pier is fitted with portable conveyors for loading bananas through side doors. Ship's gear is not required for rigging conveyors.
SPECIALISED CARGO HANDLING FACILITIES: Boundbrook Wharf used solely for loading bananas. No facilities for Ro/Ro vessels. Forklifts available for handling of pallets of bananas. However, there is inadequate storage space for palletised cargo.
STEVEDORES: Adequate numbers for loading bananas.
MEDICAL: Doctor and hospital available.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Not available.
CONSULS: Nearest Consuls at Kingston.
REPAIRS: Small repairs can be undertaken.
DRY DOCKS: None.
SURVEYORS: Nearest Lloyd's Surveyor at Kingston.
AIRPORT: At Kingston.
GENERAL: *Provisions:* Small amounts of fresh provisions available. No groceries or meat available.
Laundry: No service available.

PORT ESQUIVEL: 17.53 N. 77.08 W. (See Plan)

GENERAL: Vessels proceed through a dredged channel approximately 1.5 miles long with a minimum depth of 39 ft. The wharf is situated in a basin at the inner end of the channel and can take vessels up to 650 ft. long with a maximum draft of 36 ft.
DOCUMENTS:
6 Crew Lists.
6 Passenger Lists.
Customs Documents:
4 Stores Lists.
Crew's Manifest of Declaration outside of Personal Effects.
4 Load Line Certificates.
4 Small Parcels Lists.
4 Customs Clearance from last port of call.
Fire Arms List.
Narcotics List.
List of live animals and meats on board vessel.
Health Documents:
International Certificate of Vaccination of all Crew members.
Maritime Declaration of Health.
Crew's Declaration of Health.
6 Manifests.
4 Bills of Lading.
Ship's Documents:
3 Stowage Plans of Cargo.
2 Deadweight Surveys (Bulk carriers only).
Charter Party and any other specific documents of instructions relating to the loading or discharging of cargo.

Also see "Shipmaster's Report".
PILOTAGE: Pilotage compulsory. Compulsory pilotage limit 2 miles to seaward of line drawn from Polink Point to Bare Bush Cay to Portland Cay to Portland Point. Cable advice 48 and 24 hours ahead of vessels ETA at pilot station must be sent to vessel's Agent at Kingston, Jamaica.

One pilot boat *Silver Spray,* launch equipped with ship-to-shore radio communication: (One General Electric VHF – FM 30-watt output multi-channel set).

VHF shore set manned 24 hours per day. Contact with Port or launch can be made on three international Channels – 16, 2 and 6.

Also see "Shipmaster's Report".
ANCHORAGES: *(a)* Seaward to East of pilot station, depth in excess of 38 ft. *(b)* Leeward of Pigeon Island – depth 38 ft. min. *(c)* Eastward of entrance of main channel – depth 38 ft.
RESTRICTIONS: Restriction of permissible draft to max. of 36 ft MSL.
MAX. SIZE: Max. permissible length 650 ft. and draft 36 ft.
HEALTH: Pratique procedure requires presentation of undermentioned health documents: *(a)* International Certificate of Vaccination of all crew members. *(b)* Maritime Declaration of Health. *(c)* Crew's Declaration of Health. In event any suspected communicable disease or fever on board, Master required to advise Agents in advance.
RADIO: JAMINTEL "KNRDO 6YI".
TUGS: Pilot boat will be on standby during berthing operations of all vessels to assist in placing ship's lines on to pier if requested by the Pilot.

BERTHING: *Western Berth:* Bulk loading alumina – vessels max. length 630 ft., breadth of 92 ft., max. draft 36 ft. Length of Bulk Wharf 630 ft. Depth of water 39 ft. MSL. Average tide 12 in.

Minimum depth of water in Channel and/or approaches 39 ft. MSL. Bulk alumina vessels still given priority on Western Berth.

Eastern Berth: General Cargo – max. length of vessel 650 ft., breadth 60 ft., max. draft 36 ft. Length of General Cargo Wharf 950 ft. Depth of water 39 ft. MSL. Average tide 12 in.

Equipment available:

(a) Shiploader – Travelling Gantry Type – part of conveyor system for loading bulk alumina only.

Max. travel 415 ft. – maximum outreach for loading purposes 48 ft. Clearance height from wharf level 28 ft. from water level 35 ft. Rate of loading per hour = 1,000 long tons.

(b) One Galion crane and one 660 P & H crane. Forklift trucks. Launch service.

There is no extra charge for the use of shore equipment during overtime hours and will remain at a flat rate for all hours worked.

SPECIALISED CARGO HANDLING FACILITIES: Eastern and Western berths equipped to handle receival of bulk cargoes, e.g. grain, soya meal, soya beans, salt, sulphur, etc., by using shore crane with grabs, vessel discharging by grabs. Bulk liquid chemicals handled as shown under "Tankers". Additional berth on Southwestern shoreline now being used to handle small bulk grain, soya meal and soya bean carriers, and can be utilised for handling of Ro/Ro traffic and containerised cargo.

STEVEDORES: Cable advice to Agents in Kingston, Jamaica, 48 and 24 hours ahead of vessel's ETA at pilot station for arrangements to provide stevedore and dock labour.

MEDICAL: Agents to be advised 48 hours ahead of vessel's ETA pilot station of medical attention required, details of inoculations, vaccination/fever certificates, etc. Free ambulance service provided. Nearest hospital approximately 15 miles.

TANKERS: Both sides of pier equipped to handle receival and delivery of Bunker "C" oil, caustic liquor, sulphuric acid and molasses. Diameters of the load/discharge lines are:

Bunker C Oil	8 in.
Caustic liquor	10 in.
Sulphuric acid	4 in.
Molasses	12 in.
Water	4 in.

Max. permissible draft 36 ft. below MSL.

Note: For vessels loading and discharging fuel oil and caustic/liquor max. length 650 ft., breadth 92 ft., max. draft 36 ft.

DENSITY: 1025 subject to slight variation during heavy rainfall.

FRESH WATER: Max. of 300 metric tons available. Delivery made from storage tank at a rate of 40 to 50 metric t.p.h.

FUEL: Bunker "C" fuel oil is available from dock. Application to be made to Shell Company (W.I.) Ltd., through ship's Agent for supply of bunkers. Pumping rate approx. 130 metric t.p.h.

Specification:

(i) API 9.0 min – 10.0 max.
(ii) Ash percent wt. 0.12 max.
(iii) Flash point pmcc 150°F. min.
(iv) Viscosity SSF at 122°F. 120 min. – 200 max.
(v) Pour point 60°F. max.
(vi) Vanadium ppm 475 max.

FIRE PRECAUTIONS: Strategically located fire hydrants throughout port and on pier. No special precautions apart from "No smoking" rule. One fire truck located at Port Esquivel.

GANGWAY/DECK WATCHMEN: Service of watchman optional but not necessary. During time vessel is in port there is Customs guard on pier and strict security measures are carried out by port Security Force on personnel entering or leaving port compound which is surrounded by a chain-link security fence.

OPENING/CLOSING HATCHES: For bulk alumina vessels, opening and closing of hatches is done by crew members. For general cargo vessels, opening and closing of hatches may be done by crew members or on request to Agents, by stevedores.

SHIP CERTIFICATES:

Load Line Certificate.
Registration Certificate.

CUSTOMS ALLOWANCES: Tobacco: Each crew member including ship's officers, normally allowed by local customs authority 2 oz. of tobacco or 2 pk. of 20 or 25 cigarettes per day released from bond. Wine and/or Spirit: No limitations to use of wine on board. For spirits each crew member is allowed a part bottle per man.

CARGO GEAR: Local Agents provide necessary cargo gear. These are tested every 6 months in accordance with Factory Law and certificates issued for respective maximum lifting capacities.

IDENTIFICATION CARDS: Not necessary as the Passport will serve this purpose. Also see "Shipmaster's Report".

CONSULS: No consuls are available. Consular Offices are located in Kingston approximately 30 miles away.

REPAIRS: Limited repairs may be undertaken.

DRY DOCKS: None.

REPATRIATION: Upon request, local Agents arrange crew changes and any necessary repatriation.

AIRPORT: Norman Manley International Airport approximately 40 miles away.

TIME: GMT minus 5 hours.

GENERAL: Port normal working days Monday-Friday 0800 – 1630 hrs. Overtime in excess of 8 hours per day or 40 hours per week, Monday-Friday at time and a half normal rate; Saturday between midnight and midnight time and a half normal rate, double time for hours worked on Sundays and two and one half times for hours worked on public holidays, between midnight and midnight. Rail facilities exist on Western side of the pier. Distance from fender to centre of rail line 17 ft. 9 in. Ship chandlering or any other requirements may be acquired through local Agents.

HOLIDAYS: New Year's Day (1st January); Ash Wednesday (in accordance with calendar); Good Friday (in accordance with calendar); Easter Monday (in accordance with calendar); Labour Day (23rd May); Independence Day (first Monday in August); National Heroes Day (third Monday in October); Christmas Day (25th December); Boxing Day (26th December). These holidays are sometimes subjected to change in accordance with Government Proclamations.

1. No work is carried out on Good Friday and Christmas Day.
2. Work on vessels loading bulk alumina and discharging Bunker C oil and caustic liquor is usually carried out on other public holidays.
3. For general cargo vessels work is optional on public holidays except Good Friday and Christmas Day, and only carried out on Master's request or in accordance with Terms of Charter Party.

POLICE/AMBULANCE/FIRE: Old Harbour Constabulary Tel: 983-2255; Old Harbour Fire Brigade Tel: 983-2276. Port Esquivel also has its own fire brigade. An ambulance service is available for any crew member requiring medical attention. Several qualified doctors within a 6-mile radius of port. There is also a fire station.

TELEPHONES: Facilities do not exist for placing of telephones on board ship other than Magneto telephones. Telephones mounted on both sides of pier for easy access. International telephone services available and scale of rates is as per schedule listed in Jamaica Telephone Company's Directory.

SERVICES: Special services are limited. Arrangements can be made through vessel's Agents for the port or local contractors to undertake these jobs.

SHORE LEAVE: Crew members usually granted shore leave by Immigration Authority for period vessel remains in port. Immigration Authority can, however, withdraw permission of shore leave to any individual crew member who, in their opinion, may be a security risk.

REGULATIONS: No unusual regulations.

DELAYS: The normal delays in berthing, loading or discharging or bunkering can be expected when the two berths are occupied.

SHIPMASTER'S REPORT: November 1986.

Pilot: The pilot station is off Buoy Nos. 1 and 2, however, Pilot normally boards off Port Esquivel Fairway Buoys. Only at the request of the ship's Master, will the Pilot board at pilot station, which might be the case when no proper charts are on board.

Entrance to Portland Bay, through the fairway, proved not to be difficult, as the leading line on Pigeon Island was very useful and all the buoys were in place (and all alight).

Made entrance, as well as departure, during daylight. The front leading light tower on Pigeon Island proper was visible, however, the rear leading light structure on the reef, North of Pigeon Island, was less discernible, due to the chimneys of the power plant on the main shore.

Formalities: Papers required:

Customs:

1 Clearance from Last Port.
1 Stores List.
1 Crew's Effects List.
1 Crew Cigarettes/Liquor List.
1 Crew List.

Quarantine:

1 Maritime Declaration of Health. (Preferable on Jamaica Form, otherwise on International Form.)
1 Vaccination List.
1 Crew List.
1 Ship's Declaration on Meat and Livestock. (On Jamaica Form, otherwise on self made form).

Agents:

2 Crew Lists.
1 Stores List.
1 Crew's Personal Effects List.
Manifests and other available cargo papers.

Both the Agent and the Custom's Officer require the date of expiry of the International Load Line Certificate only. No copies of said Certificate were required.

No ship's papers (Certificates) were taken ashore for presentation to the Authorities.

All the Authorities were very friendly and with all the required papers ready upon arrival, clearance was obtained within 15 minutes of boarding.

A paper had to be signed that 3 meals a day (and also a midnight snack) had to be provided for 1 Custom's Officer. However, the Custom's Officer made no use of this.

Bonded stores are placed under seal.

Identification Papers: Not required to take passport ashore. Crew members wishing to go ashore will be given a shore pass at the gate. A copy of the ship's crew list is posted at the gate by the Agent. The shore pass will be collected on returning from shore to the vessel.

AUTHORITY: *(a)* Alcan Jamaica Company, Port Esquivel. A division of Aluminium Company of Canada Limited (Inc. in Canada), P.O. Box 2, Old Harbour, Jamaica, West Indies. *Tel:* 983-2289. *Cables:* Esquivel, Kingston, Jamaica. *Contact:* E. N. Harding, Operations Manager.

(b) Port Authority of Jamaica, 15-17 Duke Street, Kingston, Jamaica. *Tel:* 92-20290/8. Telex: 2386 Portops Jamaica.

PORT KAISER: 17.52 N. 77.37 W.

DOCUMENTS:
6 Crew Lists.
4 Stores Lists.
Declaration of Crew Personal Effects.
Customs Clearance from Last Port.
Maritime Declaration of Health.
Vaccination Certificates for all crew members.
Cargo Documents.

PILOTAGE: Compulsory. Pilot boards about 1 mile seaward of the jetty. International Code Pilot Signals used.
ANCHORAGE: Recommended 1.5 to 2 miles off end of finger pier from South to S.W.
MAX. SIZE: Tankers up to 40 ft. draft.
HEALTH: Pratique granted by Customs Officers who board on arrival, after Master has completed Maritime Declaration of Health, and Crew's Declaration of Health. All crew members require valid Vaccination Certificates. In event of suspected disease or fever on board Agent should be advised full particulars by radio before arrival.
RADIO: "KNRDO 6Y1."
TUGS: None available.
BERTHING: Tanker berth at the end of a finger pier. Pier head is adequately fendered and a holding off buoy is utilised if necessary because of swell. Vessels berth portside to the jetty. Both anchors used.

Finger pier is 610 ft. long. The berth is being dredged to 50 ft. depth.
TANKERS: Fuel and gas oil discharged, 8 in. hoses. No slop facilities.
DENSITY: 1025.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS ALLOWANCES: 25 cigarettes and part bottle spirits per day per man.
CONSULS: Nearest at Kingston.
SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT: October 1978.
Documents:
6 Crew Lists.
3 Store Lists.
2 Curio Lists.
1 Vaccination List.
1 Maritime Declaration of Health.
Load Line Certificate.
Derat Certificate.
Clearance from Last Port.
4 Notices of Readiness.

Pilotage: Pilot available and compulsory. Pilot station 1 mile S.W. of Pier.
Restrictions: Day and night berthing possible.
Max. Size: LOA, 650 ft. Beam 90 ft. Max. draft 36 ft.
Tugs: No tugs available. In an emergency nearest tugs at Kingston.
Berthing: Length of pier 700 ft. 1 shiploader, max. outreach 90 ft. and max. clearance under loader 46 ft. 2 chutes load 1 hatch (port and starboard). Loader movable along dock for 600 ft. Max. loading rate 1,100 short t.p.h. or 25,000 tons daily for bulk carriers. Loading carried out 24 hours a day.

Berth not very satisfactory in heavy swell and ship's side rails are very prone to damage when loaded as large fenders (tractor tyres doubled up) hang over main deck and damage rails. Stevedores refuse to accept this damage.

Vessel only broke 1 mooring rope. Shore gangway used, of light aluminium construction which must be tended throughout. A hazard to get ashore or onboard.

When strong Westerly current running and Easterly winds blowing, Pilot informed me that it sometimes takes up to 7 hours to berth ships. When very heavy seas running, it is best to leave berth and return when weather improves.
Medical: 2 hospitals at Mandeville but seamen usually sent to Nursing Home.
Tankers: Fuel oil, diesel oil, sodium sulphate, caustic soda and sulphuric acid handled at the tanker berth.
Density: 1025 – 1026.
Fresh Water: Not available.
Fuel: Not available.
Time: GMT minus 5 hours. Except during Daylight Saving Time GMT minus 4 hours.
Repatriation: Reliefs and repatriation can be arranged through Kingston which is about 87 miles away by road. Reliefs flying out through Miami all lost their luggage for a while as it was booked right through to Jamaica. Advisable to book luggage to Miami, collect and clear through Customs and then re-check it in. U.S. visa also required even for transit through U.S.A.
Current: Usually Westerly at 2.5 to 3 knots.
Tidal Range: 1.5 ft.
Publications/Charts:
B.A. 260 Pedro Bank to the South Coast of Jamaica.
B.A. 258 Ports and Anchorages on the South Coast of Jamaica.
B.A. 446 Jamaica.
USA 26124 Portland Bight to Great Pedro Bluff (with plan of Port Kaiser).
NP 70 West Indies Pilot (N.W. Part) Vol. 1 with Supp. No. 4.

Tugs: The current runs at right angles to the steel girder type berth on stilts and makes it difficult to get the stern alongside so a powerful tug would have been of great assistance.
Working Hours: Office hours 0800 – 1600 but 24 hours when vessel in port.
Officials: Customs, Quarantine and Immigration Officials boarded on arrival. The Quarantine Official lives on board whilst vessel in port to ensure nothing is thrown into the sea.
Survey: Holds surveyed before loading for cleanliness and Certificate of Cleanliness issued. Draft survey taken before and after loading (6 ft. swell and rough seas at the time).
Laundry: Can be arranged but takes 2 – 3 days.
Provisions: Fresh provisions available from nearest country market at Mandaville. Market days – Wednesday, Friday and Saturday. Main stores can be ordered from Kingston but very expensive and trucking charge $150.
VHF: Channel 16 said to be monitored in Agents office at Port Kaiser, pilot boat and Dock Office Port Kaiser but not able to make contact when inward bound.

AUTHORITY: Port Authority of Jamaica.

PORT RHOADES, Discovery Bay: 18.29 N. 77.24 W. (See Plan)

DOCUMENTS:
5 Crew Lists.
2 Stores Lists.
1 Customs Clearance from last port.
2 Declaration of Crew Personal Effects.
1 Maritime Declaration of Health (available on arrival).
Vaccination Certificates for all crew members.
1 Copy of each cargo document.

PILOTAGE: Compulsory. ETA's should be cabled to "Kaisbaux Discovery Bay", 48, 24, and 12 hours before arrival.

Pilot will board vessel on arrival 2 miles outside channel, if berth is available.
ANCHORAGES: No designated anchorage. If berth is occupied, vessels will remain within a 3-mile area of the channel until berth is available. Docking instructions are given by VHF.

The area around the harbour to a depth of 60 m. is a marine reserve for study. Positively no anchoring on surrounding reefs.
RESTRICTIONS: Entry may be at any time of day or night throughout the year.
MAX. SIZE: Max. permissible length, 700 ft.
Max. permissible breadth, 92 ft.
Max. permissible draft, 37 ft. 6 in.
PRATIQUE: Pratique inspection and clearance given on berthing. Notify "Kaisbaux, Discovery Bay" as soon as possible before arrival full details of any suspected disease or fever on board.

There is no Radio Pratique.
RADIO: Route all ETA's and cables via Kingston Radio or nearest radio station.
VHF: Channel 16, 24 hours a day. Channels 12, 13, 26 and 28 also available. Range 30 miles.
TUGS: None available. Pilot launch will assist in taking ship's lines during docking if required.
BERTHING: One finger pier, (Position 18° 28′ 45″ N., 77° 24′ 20″ W.) adequate fenders, used by bauxite ships and tankers alike.

Ships loading bauxite must dock with the top of the hatch covering of the first hold to be loaded not more than 35 ft. above sea level.

Bauxite loading rate 4,000 t.p.h.

All loading hatches to be opened for inspection if weather permits.

Gangway to be rigged ready for lowering immediately on berthing. safety net must be attached to the gangway.

Hawse pipes to be securely sealed as soon as berthing is completed. Draft reading and other ladders are to be kept hauled up at all times while the ship is berthed.

Rat guards to be installed on lines at all times when at berth. Washboards are to be installed over starboard wing tank outlets, so as not to discharge on pier.
STEVEDORES: All arrangements are made by Kaiser Bauxite Company for unloading/loading any general cargo.
MEDICAL: Medical facilities and hospital available in the vicinity.
TANKERS: Two fuel lines, hose 8 in. (pipe-line 12 in.) diameter. Back pressure 150 lb. One gas oil line, hose 8 in. (pipe-lines 6 in.) diameter. Back pressure 150 lb.

Tankers use same berth as bauxite vessels. It may be necessary at times for tankers to wait on bauxite vessels loading, or arriving, and tankers may have to vacate the berth before completion of discharging to make way for bauxite vessels which have absolute priority.
DENSITY: 1025.
FRESH WATER: Available.
FUEL: Not available.
FIRE PRECAUTIONS: Usual non-smoking precautions with respect to tankers. Portable fire extinguisher available on pier.
GANGWAY/DECK WATCHMEN: To be provided by vessel.
OPENING/CLOSING HATCHES: To be done by ship's crew.
CERTIFICATES:
Load Line Certificate.
Registration Certificate.
Derat Exemption Certificate.

CUSTOMS ALLOWANCES: Tobacco: Each crew member, including officers, normal allowance 2 oz. tobacco or 2 packets of 20 cigarettes per day released from bond. Wine: no limitations on use of wine on board. Spirits: Officers only are allowed part bottle.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest Consuls are in Kingston, 80 miles distant.
DRY DOCKS: No facilities in Jamaica for other than the smaller types of vessel (e.g. tug).
REPATRIATION: Can be arranged through ship's Agent.

AIRPORT: Montego Bay, 40 miles away; Kingston, 90 miles away. Both are international airports, with several scheduled flights per day to U.S.A. and Europe.
TIME: GMT minus 5 hours.
TELEPHONES: No arrangements for ship-board connections.
GENERAL: *Buoyage:* IALA system "B".

SHIPMASTER'S REPORT: March 1984.

SatCom has been used successfully in giving the 48, 24 and 12 hour ETAs.

Call on Channel 16 VHF when 20 miles off.

Pilot will board about 1.5 miles to the N.E. of the entrance. Some Pilots do not like to dock vessel at night and delays may be encountered.

If awaiting berth drifting 8 – 12 miles off to the N.N.E. seems to be the most satisfactory. There is about a 0.5 knot West drift depending on weather conditions.

This vessel has a 93.2 ft. beam and is loaded without difficulty but a close eye must be kept so as not to get a starboard list that will be very hard to correct.

When docking, the approach will be at right angles to the dock. At about 200 yards away the port anchor will be let go and 2 lines sent to the farthest inshore bollard at the head of the dock. The vessel will then be worked alongside using small kicks ahead until it is fast alongside, starboard side too. All vessels dock starboard side in a very sheltered berth. When fast alongside there will be 6 – 7 shackles out on the anchor. When making the approach have the 2 headlines married with a gantline and the pilot boat will have an easier time. Docking with strong offshore winds can be very difficult.

When departing the vessel heaves up on her anchor pulling herself in to the channel. Care must be taken not to speed so as to squat the vessel when going out loaded, especially in swells. There have been reports from other Masters of touching bottom in the channel and the divers in the local marine laboratory have confirmed anti-fouling paint on the reefs on the channel bottom.

Limited diving work can be arranged through Kaiser from the Marine Laboratory located in Discovery Bay.

Port officials are very friendly and helpful. Vessels bound for the States must keep a sharp watch for stowaways and smugglers.

AUTHORITY: Kaiser Bauxite Company, Discovery Bay, P.O., St. Ann, Jamaica, W.I. *Tel:* 973-2221/5. *Telex:* 7404. *Cables:* Kaisbaux. *Contact:* I. K. Pengelly, Shipping Superintendent.

SALT RIVER: 17.50 N. 77.10 W.

DOCUMENTS: Health Certificate. Crew List. Manifest. Bills of Lading and other ship's papers for cargo shipped, prepared by Wisco Wharves Limited, a subsidiary of The West Indies Sugar Company Limited.
PILOTAGE: Latest 12 hours prior arrival off pilot station. Cable "Monymusk Lioneltown" giving name of vessel, ETA, date of arrival. Pilotage – optional, Barebush Cay; Compulsory, Pigeon Island; pilot boat at Salt River.
ANCHORAGE: Lat. 17° 49.58′ N., Long. 77° 08.40′ W.
RESTRICTIONS: No restrictions.
MAX. SIZE: Draft 30 ft.
HEALTH: Customs grant Pratique.
RADIO: Cable Agents via Kingston Radio/6YI.
TUGS: Not applicable.
BERTHING: No berthing facilities.
STEVEDORES: 48 hours notice prior arrival of vessel. Commodity bulk sugar. Loading rate approximately 1,800 tons per day.
MEDICAL: No advance notice required.
FRESH WATER: Can be arranged if given sufficient notice.
FUEL: None available at port but can be arranged.
GANGWAY/DECK WATCHMEN: Customs guards.
OPENING/CLOSING HATCHES: Normally done by crew.
SHIP CERTIFICATES: Registered Tonnage Certificate on first call. Master's and Chief Engineer's Certificates of Competency, also Load Line Certificate.
CUSTOMS ALLOWANCES: Tobacco, determined by Customs. Wine and/or Spirit, determined by Customs.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Not possible.
REPATRIATION: Can be arranged.

NOTES

Please also advise Shipping Guides Ltd.

Japan

GENERAL:

RADIO PRATIQUE: Procedures to obtain Radio Pratique:

A. *Sanitary Certificates:*

a. A vessel intending to obtain Radio Pratique should apply for issuance of Sanitary Certificate to Quarantine Office through Agents.

b. Accepting the application, Quarantine Officers will attend the vessel for Sanitary Inspection while the vessel is in the port in exactly the same manner as the inspection of derat.

c. When the vessel has passed the Sanitary Inspection, the Quarantine Officer will issue the Sanitary Certificate and give the Issuance Number to the Master. But in general respects, the inspection is rather severe.

d. The Sanitary Certificate is valid in all ports of Japan, and its term of validity is only for one year.

B. *Application for Radio Pratique:*

a. When the Master requires Radio Pratique, he should cable the Head of the Quarantine Station via Agents in accordance with the quarantine rule which stipulates that it must be done within 36 hours to 12 hours prior to the respected arrival port.

b. The items to be reported by cable are enumerated in clause (f) hereunder.

c. When Agents receive the telegram from the Master, the Agents submit the Radio Pratique Application Form together with a copy of the cable sent by the Master.

d. After checking and inspecting all telegrams and papers submitted by the Agents, the quarantine authorities will grant the Radio Pratique if everything is in order and issue the Free Pratique certificate and term of validity.

e. The Master who has received the cable advising issuance of the Free Pratique from the Authorities should submit the necessary documents, Crew List and Passenger List to the Authorities on his arrival.

f. ★Items to be reported by cable to the Authorities are as follows:

(1) Notification that this cable is the information provided by Item-2, Clause-17 of the Law concerned. This identification should be noted on the top of the body as abbreviation of "RPM".
(2) Name and nationality of the vessel (the item is unnecessary in this cable).
(3) Full number of Sanitary Certificate indicated with a number of seven (7) figures.
(4) Name of port of departure and its date.
(5) Name of ports of call and sailing date during 15 days before arrival.
(6) Name of port and ETA at destination of the vessel.
(7) Derat Certificate – name of the authorities issued, date of issue and kind of derat.
(8) Number of crew and passengers.
(9) Whether or not the vessel had transferred any passengers and/or goods from another vessel or aircraft on her voyage during 15 days before arrival. In case this is affirmative, details of which should be described.
(10) Whether there are any patients onboard or not, taken ill during 15 days before the arrival. In case this is affirmative, detailed conditions of illness must be given.
(11) Whether there has been any death of persons (with the exception of deaths caused by accident) during 15 days before arrival, and if this is affirmative, details of it, i.e. name and age of the person and/or present condition of the person.
(12) Whether rats were caught and whether there was any danger of the outbreak of black plague, and whether or not rats died abnormally.
(13) Whether there is or not goods on board tainted by any virus of quarantine epidemics.
(14) Whether or not there is a doctor on board.
(15) Name of Master of the vessel.

★*An example for Cable:*

POLLUTION: Effective 1975, the Marine Pollution Prevention Law requires any tanker of 150 tons gross and above which is loaded with an oil cargo to have materials for oil removal either on board, or aboard escort boats, or at a depot base. Depot bases are understood to have been established, and in this connection Owners, Time Charterers, or Masters are strongly recommended to contact their Agents at least 10 days prior to vessels' arrival Japan.

CREW JOINING:

Requirements of Travelling Documents to Japan for Crew/Superintendent:

Crew Joining vessel

Max. Stay ashore	Travelling Document	Visa	Remarks
(1) Ordinary Case			
within 5 days	Seaman's Book or Passport	No	Special Landing Permit issued but valid for crew travelling direct to port where crew join ship.
over 5 days	Passport	Req'd	See names of Countries for which visa exempted
(2) New building			
within 30 days	Seaman's Book or Passport	No	See (1) Remarks
over 30 days	Passport	Req'd	See names of Countries for which visa exempted
(3) Purchase/Delivery			
Crew arrival before ownership changed within 10 days	Seaman's Book or Passport	No	Max. 10 days stay ashore permitted subject to Agents' submission of Sale of Contract and Export Licence. See (1) Remarks
Crew arrival before ownership changed over 10 days	Passport	Req'd	See names of Countries for which visa exempted
Crew joining ship before ownership changed	Passport	Req'd	See names of Countries for which visa exempted
Crew arrival after ownership changed		Same as (1)	Ordinary case
Superintendent			
(4) All cases			
	Passport	Req'd	See names of Countries for which visa exempted

Names of countries for which visa not required:
Within 30 days New Zealand.
Within 90 days Argentina, Bangladesh, Belgium, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, Dominican Republic, El Salvador, Finland, France, Greece, Honduras, Iceland, Iran, Israel, Italy, Luxembourg, Malta, Netherlands, Norway, Pakistan, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Tunisia, Turkey, Uruguay, Yugoslavia.
Within 180 days Austria, Federal Republic of Germany, Ireland, Mexico, Switzerland, United Kingdom.

Remarks: The above schedule is made out by Dodwell Tramp Agencies on general understanding with Immigration Authorities. However, the above details are not expressly stated in the text of the law but based on Immigration Control Order Article 16 which reads:
Article 16. Permission for landing for Re-shipping.

1. The Immigration Inspector may, in case an alien crewman desires to pass through Japan in order to re-ship on board another vessel in another port of entry in Japan, upon application of the carrier operating the vessel on which the alien crewman has arrived, and in case the alien crewman desires in order to become a crewman of a vessel in Japan, to land from another vessel, etc. and pass through Japan, upon application of the carrier operating the vessel in Japan, permit the landing for re-shipping respectively.

2. In case the permission provided for in the preceding paragraph is given, the Immigration Inspector shall issue a permit for landing for re-shipping to the crewman concerned.

3. In case the permission provided for in paragraph 1, is given, the Immigration Inspector may impose upon the crewman such restrictions regarding period of stay in Japan, route to be followed in transit, and any others which he may deem necessary in accordance with Ministry of Justice Ordinance.

In view of the foregoing, the contents of the schedule is not absolute and may be altered. In order to ensure that crew members are permitted to land Japan to join ships, please send Agent information well in advance on personal data of crew member such as Full Name, Rating, Date of Birth, Passport or Seaman's Book Number together with Flight No. and Ship's ETA/calling port.

PILOTAGE: *Compulsory Pilot waters surrounding Japan:* Pilot compulsory ports, channels and straits:
I-A. Harbour: Vessels over 300 G/T. Hibikinada, Kawasaki, Kobe, Kokura, Moji, Naha, Sasebo, Shimonoseki, Tobata, Wakamatsu, Yawata, Yokohama, Yokosuka.
I-B. Harbour and Bay: Vessels over 10,000 G/T. Chiba, Funabashi, Kisarazu (Kimitsu), Tokyo and Tokyo Bay, Mizushima.
II. Channels and Straits: Vessels over 10,000 G/T. Kanmon Kaikyo (Strait), Uraga Suido (Channel), Akashi Kaikyo (Strait), Bisan Seto, Kurushima Kaikyo (Strait). (Large vessels, oil tankers, liquefied gas tankers and vessels carrying dangerous cargo should arrange for watching-boats to guard their course until their safe navigation is confirmed even after they leave the traffic route.)

The Maritime Safety Agency has requested that all foreign flag vessels and vessels carrying dangerous cargo employ Pilots in order to maintain the safety of shipping traffic in the above-mentioned waters surrounding Japan.

The Agency has also requested that vessels take Pilots on board when they navigate the Irago Suido and Yura Seto (Tomogashima Suido).

SAFETY: The following telex was received from Japan regarding safety regulations for LPG carriers at Japanese ports.
Quote:
The Receiving Terminal Clause (LPG Tankers).

In order to prevent marine pollution by oil and ensure safety in cargo operations, Owner, Master and Crew shall abide by international and/or national laws and regulations.

Especially at discharging port(s) in Japan, Owner, Master and Crew shall observe "Marine Pollution and Marine Disaster Prevention Law" and other relevant law(s).

Moreover, Owner, Master and Crew are strongly requested to observe and/or take actions in accordance with the clauses stipulated hereunder.

(a) Before arrival at the first discharging port, the vessel shall complete undermentioned operations:

1. The following pumps and lines shall be flushed and kept clean:
   Vessel's pumps: fire pump and G.S. pump
   The lines: bilge lines in engine room
   fire lines and G.S. lines.
2. Reliquefaction units shall be checked to see whether they are in good working condition.
3. Cargo handling equipment on board shall be tested in accordance with the instructions given by Charterer; especially, the pressure test of cargo and vapour lines shall be done with a pressure of more than 5 kg./sq.cm. Lubricating lines for cargo pumps (if equipped) and other lines connected with above mentioned lines shall be tested at working pressure prior to the vessel's arrival at the discharging port.
   Safety valves of cargo tanks and cargo lines shall be checked to see whether they are in good condition.
4. Upper deck shall be kept clean and free from oil.
5. The faces of manifolds for connecting with shore lines shall be kept clean.
6. Mooring winches, derricks, cargo control equipment and engine (main engine, generator, boiler, etc.) shall be checked to see whether they are in good working condition.
7. Vessel shall send the Charterer the result of the operations stipulated in this clause (from items (a)-1 to (a)-6) by radio in accordance with Charterer's instructions 3 days or more prior to ETA at the first discharging port.

(b) During berthing operation and while the vessel is alongside the pier, the vessel shall comply with the terminal safety regulations hereunder:

1. While the vessel is alongside the pier, the following work shall be prohibited:
   i. Transferring of bunkers.
   In a case of emergency, however, such work shall be done after obtaining permission from the terminal representatives by checking the work to be done.
   ii. The operations for which fire is used and those which are likely to cause fire.
   iii. The work which will make the vessel unable to move under its own power.
2. During cargo operation, necessary numbers of watchmen for ensuring safety shall be on deck, besides Officers on duty, so that they may watch the vessel and the adjacent areas to eliminate any type of accident.
3. While the vessel is in port, the boil off gas shall not be exhausted.
4. The pressure of the lubricant oil at the stern tube after seal shall be kept lower than that of sea water outside the vessel.
5. While the vessel is alongside the pier, gas detection shall be made at regular intervals in the following places:
   i. Around the valves of each tank dome.
   ii. Around the manifolds.
   iii. Around the compressor room.
   The Crew of the vessel shall be prepared for cargo leakage and/or gas leakage which might happen aboard the vessel.

(c) If there is any indication of cargo leakage and/or gas leakage during cargo operation, the vessel shall stop all pumping operations and notify the Terminal Representatives and/or Charterer's Supervisor(s) to that effect.

The vessel shall not resume cargo operation unless a thorough investigation is made, appropriate remedies are taken, and permission from the Terminal Representatives is obtained.

When Charterer sends their Supervisor(s) to the vessel to check vessel or to assist cargo handling operation in the case of ssity, Owner, Master and Crew shall agree to cooperate or them.

nes, however, the full responsibility for cargo operation with the vessel.

nd the Safety Marine Supervisor(s) to the vessel sel's cargo operation at all times and he or they sted to attend the meeting for securing safety commencement of cargo operation.

3. Individual information . . . The number of anchoring vessels at 10 minutes to every hour will be informed in English and Japanese by VHF (Call by Channel 16, communicate with Channel 14 or 22) or telephone (Telephone Number: 0468-43-8622-8624) upon request of vessels.

Anchoring vessels in Tokyo Bay are requested to pay careful attention to the following subjects when stormy weather such as a typhoon is expected.

– Anchoring vessels are requested to keep watch continuously on VHF Channel 16.

– Vessels should keep the main engine on standby-by at all times.

SHIPMASTER'S REPORT: August 1978.
It is possible to have the latest changes in ETA relayed by VHF to Inland Sea Pilot stations, for:

1. Wadamisaki via Kobe Port Radio on Channel 16, call "Kobe-Port", or Osaka Port Radio on Channel 16, call "Osaka-Port".
2. Sekisaki via Oita Port Radio on Channel 16, call "Oita-Port".
3. Hesaki, via Shimonoseki Port Radio on Channel 16, call "Shimonoseki Port".

These stations are very co-operative and they immediately give the latest information concerning boarding-time and place, as well as requirements concerning the pilot ladder.

AIOI: 34.46 N. 134.28 E. (See Plan)

PORT LIMITS: A line drawn between Kama-Saki and Kane-Ga-Saki defines the seaward limit of the port.

DOCUMENTS:
Ship's Register.
2 Voyage Memorandum (List of ports of call).
Last Port Clearance.
3 Crew Lists, including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc., (only at first port of call in Japan).

Ship's Agents will prepare: Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all inland sea ports. Pilotage compulsory for vessels of 10,000 g.r.t. and over, and recommended for smaller vessels in view of number of islands and difficult channels causing navigational hazards. Pilots obtained from one of three pilot stations dependent upon vessels last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position 34° 34.09′ N.; 135° 11′ E. Telegraphic address: "Anjin Kobe".
2. Sekisaki, 3 miles South of Sekisaki lighthouse. (Vessels transitting Bungo Channel.) Position 33° 13′ N.; 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki pilot station.
3. Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position 33° 56′ 24″ N.; 131° 03′ 12″ E.

Aioi Dock Master not licensed to pilot vessels from outer harbour and boards at anchorages outside Aioi Bay.

ANCHORAGES: 9 anchorages outside Aioi Bay and 2 anchorages inside the Bay as follows:
North: True bearing 342° from Kasamatsu Iwa, distance 1,340 m.
South: True bearing 335° from Kasamatsu Iwa, distance 860 m.

MAX. SIZE: See "Berthing".

HEALTH: Pratique to be obtained at another Port prior arrival Aioi.
At first port of call in Japan, vessel must obtain Free Pratique. Quarantine officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agents prior to arrival and close all soil pipes before entering port.

TUGS: Normally join vessel at anchorage inside Aioi Bay. Tug's lines always used without charge.

BERTHING:

Wharf No.	*LOA (m.)*	*Max. Draft at LW (m.)*
1	266	7.0
2	175	5.5
3	Usually not used	
4	284	5.5
5	100	5.5
6	Usually not used	
7	340	7.0
8	340	5.5
9	290	6.5
10	340	5.5
11	230	5.5
12	350	7.5

RADIO: Recommended Master communicates with Agents through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.
MEDICAL: Full hospital facilities available without prior notice.
TANKERS: Must be fully gas-freed before entering the port. No facilities for tank cleaning or gas freeing in the port. Barge for slop disposal can be arranged by Agents.
DENSITY: Average 1025/1026 Winter, and 1018/1020 Summer.
FRESH WATER: Available from jetty/dock.
FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at max. 7 days prior notice.
CUSTOMS ALLOWANCES: Only allowed cigarettes for personal use, but no spirits.
CONSULS: None.
DRY DOCKS:

Restrictions: Vessels may anchor any time day or night. Draft and trim to be adjusted to enter dry dock per dockyard recommendation as follows:

Name of Dock	*Max. Draft at L.W.*	*Max. Trim*	*Min. Trim*
No. 1 D.	5.50 m.	$\frac{L(m)}{200}+1.50$ m.	$\frac{L(m)}{200}+0.10$ m.

REPAIRS: Dockyard port. All repairs available. Specialist technicians obtainable from Kobe/Osaka area.
SURVEYORS: Lloyd's Register, N.K.K. and A.B.S. have offices in the I.H.I. Shipyard. Other surveyors available from Kobe.
AIRPORT: Osaka (Itami).
TIME: GMT plus 9 hours. Permanent.
POLICE/AMBULANCE/FIRE: Police 110 or Aioi 2–0740; Ambulance/Fire 119 or Aioi 2–7128.
EMERGENCY CO-ORDINATION CENTRE:
Marine Safety Agency, Himeji Branch office: Tel: 0792 - 34 - 1016.
Marine Safety Agency, Kobe Office: Tel: 078 - 331 - 0111. Call sign: JGD/Kobe Hoan.
TELEPHONES: Placed aboard at IHI shipyard.
SERVICES: No special services at Aioi, but available from Kobe/Osaka.
SHORE LEAVE: There is no restriction on crew's shore leave if they carry shore pass issued by local immigration office.
AUTHORITY: Kamigori Doboku (Public works) Office, 500 - 5, Aza Maruogami, Kamigori, Kamigori-Cho, Ako-Gun, Hyogo Pref. *Tel:* (07915) 2 - 0083.

AGENT: See "Himeji"

AKITA: 39.45 N. 140.03 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 5 Crew Lists including Passport Numbers.
- 5 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration. 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Ships Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Not compulsory but recommended, available daylight only. Boards at 39° 46′ N., 140° 00′ E. (1 mile 270° from Akita lighthouse) or off Funakawa 1 mile 140° from breakwater end light if required. 2 Pilots board if ship's gross tonnage exceeds 18,000. Cost 180% of pilotage.
ANCHORAGE: Off Akita, 2 miles 270°-280° from Akita Lighthouse. Depth exceeds 20 m. Bottom – soft clay with mud. No buoys.
RESTRICTIONS: Pilot available daylight only.
MAX. SIZE: See "Berthing". Min. depth at extreme low water – In fairway – 10.0 m. At Anchorage – 20.0 m.
HEALTH: Officers stationed at Funakawa. Quarantine anchorage 39° 51′ N. 139° 53′ E. When impossible to inspect at Funakawa, i.e. during bad weather, attends off Akita.
RADIO: Niigata Radio when ship coming from South. Sapporo Radio when ship coming from East/North. Choshi Radio if long distance.
VHF: VHF Channel 16 – 156.8 MHz. VHF Channel 12 – 121.5 MHz. Operated by Regional Maritime Safety Headquarters (Harbour Master).
TUGS: 1 tug 2,000 h.p. available owned by local government. 5 tugs (250 – 1,200 h.p.) available, privately owned.
BERTHING:

STEVEDORES: Working time 0830–1630 hrs. every day.

Phosphate rock in bulk: 200–270 t.p.h. by shore crane, 50–70 t.p.h. by ship's gear.

Grain in bulk: 150–170 t.p.h. by shore crane, 40–60 t.p.h. by ship's gear.

Logs/lumbers: 200,000 BM per gang per day (Nanyozai), 80,000–100,000 per gang per day (Beizai).

Potash in bulk: 150–180 t.p.h. by shore crane, 50–60 t.p.h. by ship's gear.

Fertiliser in bag: 250–300 tons per day per gang.

Zinc concentrate in bulk: 140–160 t.p.h. by shore crane. 40–60 t.p.h. by Ship's gear.
MEDICAL: Hospital and treatment available.
TANKERS: See "Berthing".
DENSITY: 1020–1021. Tidal range 20/30 cm.
FRESH WATER: Available at every wharf. Rate 30 t.p.h.
FUEL: Domestic bunkers available. If bonded bunkers required, brought from Hakodate, Niigata.
GANGWAY/DECK WATCHMEN: Not compulsory, but available if required.
OPENING/CLOSING HATCHES: Stevedores open and close hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting charges.
CERTIFICATES: Ship's Register to show Customs Inspector to check ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear maintenance seems poor.
CUSTOMS ALLOWANCES: Only 50 cigarettes to take ashore. No spirits.
CONSULS: No Consuls, but 2 notary public offices.
REPAIRS: Minor repairs only.
REPATRIATION: Possible.
AIRPORT: Flights to Tokyo/Osaka/Sapparo 1–4 times per day. 20 km. from port.
TIME: GMT plus 9 hours. No alterations during year.
HOLIDAYS: Local holidays: January 2nd, 3rd, August 13th, 14th, December 30th, 31st. 1st, 3rd and 5th Sunday of each month also non-working.
POLICE/AMBULANCE/FIRE: Contact through Agents.
SERVICES: Provisions – Available. Hold Cleaning – Available. Surveyor – Available from Niigata.
SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days.
AUTHORITY: Akita Port Administration Office, 7-1 Nishi 1-Chome, Tsuchizaki Minato, Akita City. *Tel:* (0188) 45-2021/0042/0652.

AMAGASAKI: 34.42 N. 135.24 E. (See Plan)

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.
PILOTAGE: Usual for Pilot to embark at Kobe (Wada Point); however, if Master does not require a Pilot between Wada Point and Amagasaki, Pilot embarks off Amagasaki.

Cables: "Hanshinpilot Osaka" and "Hanshinpilot Kobe". One day's notice ETA required. Telephone through VHF. 3 Pilot boats at Osaka and 6 boats at Kobe with wireless communication with pilot station. Pilot boards Kobe, Wada Point (Kobe quarantine anchorage). Amagasaki, 2.5 – 3 miles off Amagasaki. In case bad weather unable to take Pilot. Safe Pilot ladder required. Vessel waits for Pilot at anchorage as above.

ANCHORAGE: No quarantine anchorage; quarantine inspection only available at Kobe (Wada Point). Safe anchorage (approx.) position 34° 39′ 30″ N., 135° 20′ 18″ E. Draft 12.8 m.
RESTRICTIONS: Pilot not available after sunset.
MAX. SIZE:

	Kobe Steel Works (Ohgimachi Wharf)	*Kobe Steel Works (Ohama Wharf)*
Max. LOA	230.0 m.	176 m.
Max. breadth	No Limitation	No Limitation
Max. draft	11.70 m.	10.4 m.
	Public Wharf	
Max. LOA	176.21 m.	
Max. breadth	No Limitation	
Max. draft	10.0 m.	

Daikyo Oil Jetty. Max. LOA 198 m., beam no restrictions, max. draft 10.6 m.
HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.
RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically West bound vessel to contact Choshi and North bound to contact Nagasaki Radio respectively.
TUGS: 1 tug × 2,200 h.p. Additional tugs available from Kobe. Tug usually joins vessel at anchorage off Amagasaki. Tug's line used for operation free of charge.
BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.
Public Berths:

No. 1	Length 165 m.	Depth 9.0 m.
No. 2	Length 150 m.	Depth 9.7 m.
No. 3	Length 180 m.	Depth 10 m.

Kobe Steel (Ohama): Max. d.w.t. 25,000. Berth length 364 m. Depth 10.4 m. Products handled, ore and coal. 3 cranes×200 t.p.h.
Kobe Steel (Ohgimachi): Max. d.w.t. 35,000 or 55,000 with part load. Berth length 220 m. Depth 11.7 m. Product handled, coal. 3 cranes× 300 t.p.h.
CRANES: 3×10 ton cranes at the public wharves.
TANKERS: Daikyo Oil Jetty suitable for up to 33,000 d.w.t. Discharge rate 1,500 t.p.h. through one 10 in. pipe.
STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Overtime surcharges 1700–1900 hrs. 50% additional of basic stevedorage; 2100–0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

Berthing at Sea Berth: Berthing is limited to daylight hours only. Vessels always berth with the bow towards the N.E. end of the berth. In the normal berthing manoeuvre the vessel is brought parallel to the berth, at a distance of about 200/300 m., and then warped alongside. While approaching the berth, Pilots check the speed with shore targets and radar distance. Vessel is required to maintain the 3 cm. radar in operation. When coming alongside, speed is monitored by a Sonar doppler installed at the berth. The Pilot is advised by walkie-talkie if the berthing velocity exceeds the safety limits. The speed of approach for vessels up to 260,000 d.w.t. must be less than 15 cm./sec.

When berthing, sliding along the berthing dolphins should be avoided so as not to damage the rubber cell fenders.

The normal mooring configuration is:

4 head lines
3 breast lines forward
3 back springs forward
3 back springs aft
3 breast lines aft
4 stern lines

It is advisable to have ready a certain number of synthetic ropes. The breasting dolphins are located quite close and the breasting lines are short and are at a steep angle.

A Terminal Port Captain remains on board during the entire operation and should be consulted with regard to mooring arrangements. Caution should be exercised for wash caused by passing ships.

Close co-ordination is maintained between the Terminal and the shore throughout the operation.

No repairs are permitted alongside. IOTTSG Safety and Pollution check lists are strictly observed.

Operator's Report: 1983.

Keiyo Sea Berth (Discharging Terminal): Operated by Keiyo Sea Berth Co. Ltd.

Terminal operates 24 hours per day, 7 days a week. Ships moored and unmoored daytime, weather or other circumstances permitting. Terminal will not be closed due to any holidays.

Location: Lat. 35° 30′ 30″ N., Long. 139° 56′ 25″ E.

Pilotage: Compulsory.

Anchorage: 236°, 5,000 m. and 305°, 3,200 m. off from centre of Keiyo Sea Berth.

Restrictions: Max. draft 19.2 m. but vessels whose draft exceeds 18 m. are tide controlled (full flood required when ships made fast).

Berthing: West Berth, starboard side alongside. East Berth, port side alongside.

Cargo Rates: Maximum rate 12,000 kl./hr. Maximum pressure 9 kg./sq.cm. at manifold.

TIME: Japan Standard Time (135° E.) = GMT plus 9 hours. Permanent.

HOLIDAYS: New Year's Day (January 1st); Attaining the Age of Maturity Day (January 15th); State Foundation Day (February 11th); Vernal Equinox Day (March 21st); Birthday of Emperor (April 29th); Constitution (May 3rd); Children's Day (May 5th); Respect Day for the Aged (September 15th); Autumnal Equinox Day (September 24th); Gymnastic Day (October 10th); Civilisation Day (November 3rd); Labour Thanksgiving Day (November 23rd). Cargo work can be arranged at 50 – 100% extra on basic cost.

POLICE/AMBULANCE/FIRE: Police Tel: 110, Fire and Ambulance 119.

TELEPHONE: Facilities for placing telephones on board only at Chuo Pier.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extensions possible if ship stays longer.

DEVELOPMENTS: New coal terminal under construction for vessels of 60,000 d.w.t. Depth alongside 14 m.

AUTHORITY: Chiba Port Administration Office, 6-1, Chuoko 1-chome, Chiba City. *Tel:* (0472) 46-6201.

AGENT: Sub-Agent of Dodwell & Co. Tokyo. Chiba Kaiun Sangyo Co. Ltd., 1-20, 3-Chome, Suehiro, Chiba. Cable: Chibamarine, Chiba. Tel: Chiba (0472) 61-3361. Telex: 03722-230.

ETAJIMA: 34.11 N. 132.29 E. (See Plan)

OPERATORS: C.I. Oil Terminal.

LOCATION: Name of berth, C.I. Oil Terminal. Position: Lat. 34° 11′ 30″ N., Long. 132° 29′ 00″ E.

DOCUMENTS:

Certificate of Registry.
Safety Equipment Certificate.
Derat Exemption.
Clearance from Last Port.
10 Crew Lists.
2 Crew Customs Declaration (Japanese Form).
4 Stores Lists.
5 Slop Chest Lists.
1 Quarantine Declaration.

PILOTAGE: Compulsory. Pilot boards in Bungo Channel 3 miles South Seki Saki Lighthouse. Pilot station (Lat. 33° 13′ N., Long. 131° 54′ E.) equipped with light signal – no VHF. Pilot remains on board during Pratique operations – also see "Tankers".

ANCHORAGE: See "Restrictions".

RESTRICTIONS: Controlling depths (MLW) are as follows: entrance 20 m.; channel 17 m.; anchorage 17 m.; berth 15 m.; The mean tidal range is 3 m. Nature of bottom is mud. Velocity of current: entrance 1 knot; channel 1.5 knots; anchorage 0.5 knots; berth 0.5 knots. Vessels may berth at any stage of the tide during the day.

MAX. SIZE: 30,000 – 80,000 d.w.t. Max. LOA 185 m. – 273 m. Depth 15.5 m. Max. draft 14.0 m. according to tidal conditions.

HEALTH: Available during daytime only in Kure or Iwakuni Quarantine Anchorage. Quarantine Officers inspect galley, pantry and food stores. Pilot ladder used for boarding.

RADIO: Shimonoseki – Kobe.

TUGS: Five available and advised for berthing and unberthing. One forward and one aft, 3,000 h.p.

MEDICAL: Doctor available.

TANKERS: Pilot berths/unberths vessel.

It is dangerous to navigate at night.

Moorings: Forward	3 headlines	Aft 3 sternlines
	2 breast lines	2 breast lines
	2 spring lines	2 spring lines

Connections: 2×12 in. connected and disconnected by shore gang booms not necessary. Max. pressure required by shore is 7 kg./sq.cm.

Pumping Rate: 5,000 k/l per hour expected.

Pipeline: Length 131.6 m.; 2×24 in.

Gangway: Pilot ladder used as not sufficient room for gangway.

Pollution: Berth is closed by floating pollution retain. Dimension 320 m.×56 m.

Ballast: During ballast operations shore personnel remain on board to check for dirty ballast and a motor-boat watches for same purpose. There are no slop tanks or facilities for dirty ballast ashore.

Storage Capacity: Crude oil, 22,000 k/l × 5 tanks; 21,300 k/l × 3 tanks; (total crude oil 173,900 k/l).

DENSITY: Summer 1020, Winter 1025 average.

FRESH WATER: Available, any quantity, by water barge from Kure, 4 days' notice required.

FUEL: Available.

FIRE PRECAUTIONS: Standard regulations.

REPAIRS: Facilities available – shore steam and electricity available.

DRY DOCKS: Available, lifting capacity 500,000 tons.

STORES: Laundry and provisions available.

CUSTOMS ALLOWANCES: 200 cigarettes, 1 open bottle of spirits and some beer.

Customs Officers inspect crew cabins.

AUTHORITY: C.I. Oil Terminal Ltd., 5-1, Kita-Aoyama, 2-Chome, Minato-Ku, Tokyo, Japan. *Tel:* Tokyo 03-497-8147. *FAX:* Tokyo 03-497-8144. *Contact:* M. Suzuki, Director.

Etajima Oil Supply Terminal, 3639-3 Etajima-Cho, Aki-Gun, Hiroshima, Japan. *Tel:* (0823) 42-3131/5.

FUKUYAMA: 34.29 N. 133.26 E. **(See Plan)**

Located on central Northern coast of Setonaikai (Inland Sea) and on border of Hiroshima Prefecture and Okayama Prefecture.

DOCUMENTS:
Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 copy Voyage Memo (last 3 months).
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio and/or Choshi Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of two pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.
Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 07.54′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Moji". In event bad weather, recommended vessels proceed shelter as near as possible having due regard to safety, to Sekisaki pilot station.

APPROACHES: Main approach channel (leading to raw material discharging berths and pipe loading berth). Depth 16 m. (52 ft. 6 in). Width 350 m. (1,148 ft.). Distance from quarantine anchorage to "A" berth, 9,500 m.

Pilot undertakes berthing vessels at "A", "B", "M" or "L" berths, with draft up to 16 m. Vessels drawing over 15.5 m. may berth at high tide.

Branch channel (leading to loading berths except pipe berth). Depth 11 m. (36 ft.). Width 300 m. (984 ft.). Distance from quarantine anchorage to Export berth No. 1: 11,500 m.

ANCHORAGES: Quarantine anchorage position: Lat. 34° 22.5′ N. and Long. 133° 26.3′ E., an area of 750 m. radius.

RESTRICTIONS: Inland Sea (Setonaikai):

1. *Akashi Strait and Bisan Seto:* All vessels, over 200 m. LOA shall navigate on Bisan Seto in daytime only and also vessels over 250 m. LOA have to have an escort boat when navigating on Akashi Strait and Bisan Seto respectively in accordance with the Maritime Regulations. Permissible draft on arrival 16 m., but 12 m. on departure.

2. *Kurushima Strait:* The vessels, over LOA 200 m. shall navigate on Kurushima Strait at slack water in daylight and vessels over LOA 250 m. and up to 300 m. have to have an escort boat when navigating on Kurushima Strait.

The draft restrictions are as follows: The permissible draft for LOA from 200 m. up to 250 m. shall be less than 13 m. and LOA from 250 m. up to 300 m. shall be less than 11 m.
Escort Boat: 2 escort boats with VHF available. Max. speed 24 knots, cruising speed 18 knots.

MAX. SIZE:

Berth	*Max. LOA (m.)*	*Max. draft (m.)*
"A"	305	16.0
"B"	285	16.0
"F"	180	11.0
"E"	210	13.0
"L"	350	16.0

Also see "Berthing".

HEALTH: Radio Pratique available. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

TUGS: 5 tugs (3,200 h.p.) available in the Fukuyama Harbour. Additional tugs are available from other Inland Sea terminals.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Berthing/unberthing not carried out during hours of darkness.

Steel Product Loading Berths:

Name	*Berth No.*	*Length (m.)*	*Depth (m.)*	*Capacity (d.w.t.)*	*Cranes (tonnes)*	*Remarks*

Nippon Kokan K.K. – Fukuyama Works. Private Berths.

Raw Material Berths (Discharging Berths).

Berth	*Length and depth in metres*	*Max. size of vessels acceptable in d.w.t.*	*Cargoes discharged*	*Remarks*
"L"	315 17.3	200,000	Coal and Ore	2 gantry cranes each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"M"	250 17.0	200,000	Coal and Ore	Iron Ore 1,200 tons with 1 crane. Coal 800 tons with 1 crane.
"A"	300 17	150,000	Coal and Ore	4 gantry cranes (available for both "A" and "B" berths) each with 1,500 t.p.h. discharging capacity. Average discharging rate per hour:
"B"	280 16	100,000	Coal and Ore	Iron Ore 950 tons with 1 crane. Coal 700 tons with 1 crane. Normally 2 cranes are used for a vessel
"E"	210 14	75,000	Mainly Coal	2 gantry cranes each with 750 t.p.h. discharging capacity. Average discharging rate: Coal 600 t.p.h. with 1 crane.
"F"	180 11	20,000	Mainly Coal for coastal vessels	2 level-luffing cranes each with 300 t.p.h. discharging capacity. Average discharging rate: Coal 500 t.p.h. with 2 cranes.
"S"	249.5 12(max.draft)	35,000	Pig Iron and Scrap for discharging and loading	3 level-luffing cranes each with 15 tons lift capacity. Average discharging rate per hour: Pig Iron 350 tons with 3 cranes. Scrap 300 tons with 3 cranes.

STEVEDORES: Stevedores available at all times for loading steel products and discharging raw materials.

For a berth term contract on loading, at least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA.

If stevedores cannot commence loading at time notified by the Agents, the orderers must pay for waiting time. Discharging for all raw materials is on "Free In/Out" basis. Therefore, stevedorage is to receivers account. Loading/unloading is carried out by shore cranes. Ship's gear is not used.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound, to contact Nagasaki Radio respectively.

VHF: "Fukuyama Port Radio" on Channel 16 (0600 – 2000 hrs.).

MEDICAL: No advance notice required except on Sundays, holidays and in an emergency.

DENSITY: Summer 1016 – 1022. Winter 1025. The density not much affected by tide, which is maximum 3.84 m.

FRESH WATER: Available at any berth. Supply capacity about 11 t.p.h. Water barge also available, capacity 150 tons.

FUEL: Bunkers by lighter from Kobe, Mizushima, Tokuyama or Moji area. Advance notice required.

GANGWAY/DECK WATCHMEN: Not specially required unless valuable cargo on board. Steel Mill's guard are on watch at all gates.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches for loading steel products. Charge is assessed according to tariff. Recommend request stevedores for this work unless crew can complete it before berthing. For discharging raw materials opening/closing hatches must be carried out by ship's crew before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 60 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Only minor repairs.

DRY DOCK: None. Available at Innoshima or Mukayima and Tsuneishi.

REPATRIATION: Possible.

AIRPORT: Nearest airport is Okayama (70 km.), but Tokyo and/or Osaka are preferable due to convenience of traffic.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Report to Guardmen's office located at Middle Gate of Nippon Kokan.

TELEPHONES: No arrangements for placing telephone on board. Private telephones connecting with offices in the compound of the Fukuyama Works are placed at each of the raw material berths.

For vessels alongside export berths, private telephone available at foremen's office located on berth.

GENERAL: Fukuyama is a local and new port, developed along with the expansion of Nippon Kokan, Fukuyama Steel Works.

Ship repairs (except small ones) for machinery, radio, radar, etc., are all arranged by firms located in Tokyo, Osaka and Kobe.

SERVICES: Hold cleaning.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days.

AUTHORITY: Fukuyama Public Works Office, 286-2 Miyoshi-Cho, Fukuyama City, Hiroshima Pref. *Tel:* (0849) 21-1311.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo, Nissan Senpaku Ltd., Port Bldg., 1, Kokan-cho, Fukuyama-shi, Hiroshima-ken. Cable address: Nissan Fukuyama. Domestic Telex: 6436-11; 6436-12 Nissan J. Tel: Fukuyama (0849) 41-0535.

FUSHIKI: 36.49 N. 137.03 E.

DOCUMENTS:

Ship's Register.
Last Port Clearance.
6 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 2 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Pilot available any time during daylight. Not compulsory. No telegraphic address of pilot station, therefore, direct advice to local Agent always required. Pilot meets vessels 029°, 2 miles off leading light, thence takes vessel to Quarantine Anchorage ground. Due to many fish-nets on both sides of fairway if requiring to come into Quarantine Anchorage without taking Pilot, necessary to advise Agent in advance. In case of bad weather and need to await outside port, recommend cruising in Toyama Bay until sea abates. Bay area too deep to anchor and also danger of fish-nets. When approaching position for Pilot, give exact ETA to Agent by using Niigata Radio and/or VHF to Fushiki Harbour Master. Small wooden pilot boat painted yellow. No particular light or sound signals required.

ANCHORAGE: Safe at all seasons with depth from 8 m. to 11 m. Sand and clay bottom. Room at anchorage for at least 6 vessels over 5,000 gross tons.

RESTRICTIONS: Pilot not available during darkness. No restrictions on tide, because small tide in all seasons. If draft over port limitation, vessel enters port after making adjustment by lightening in Outer Harbour.

MAX. SIZE: Length 180 m., draft 31 ft. in Summer and 30 ft. in Winter. However, depth of port not always definite, being a river port and dredging operations always carried out to keep depth all year round. Tidal range is maximum 0.45 m. Dredging to 10.0 m. depth underway.

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case, of infectious disease within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: (Also see "Pilotage".) Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Tugs normally join vessel at port entrance, but sometimes in Outer Harbour for large vessels. Narita-Maru (2,060 h.p.) and Nihonkai-Maru (1,800 h.p.) provide lines, free of charge and Raicho-Maru (760 h.p.) uses ship's line. Used only when Pilot on board.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Left No. 5 Wharf	90			1,000	
Right No. 1 Wharf	220			2×3,500	1×5 T
Right No. 2 Wharf	220			2×3,500	
Right No. 3 Wharf	185			15,000	1×8 T
Right No. 4 Wharf	175			10,000	
Right No. 5 Wharf	130			5,000	

Note: Depth becomes shallow with every rainfall. Therefore, recommended to contact the port authorities prior to vessel's call. See "Max. Size".

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agents, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average density between 1015 and 1019 in all seasons.

FRESH WATER: Available, from left Wharf No. 1, 2 and 3, average 45 t.p.h. In other berths, to be supplied by barge, average 50 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. Bunkers will be lightered from the nearest bunker port at maximum 7 days' prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Minor repairs only.

DRY DOCKS: No dry docks. Nearest available in Toyama.

REPATRIATION: Possible.

AIRPORT: Toyama Airport about 35 km. distance. 2 regular services a day. ANA only.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: 1st May and New Year's Day.

POLICE/AMBULANCE/FIRE: Police, Fushiki Police Station, Takaoka (0766) 44-1500; Ambulance, Fushiki Fire Station, Takaoka (0766) 44-1122; or 119; Fire, Fushiki Fire Station, Takaoka (0766) 44-1122.

TELEPHONES: No facilities for placing telephones on board.

SERVICES: Hold cleaning available.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

DEVELOPMENTS: Right No. 4 Wharf reconstructed, now 175 m. long, 10 m. deep, also Right No. 5 Wharf, 130 m. long, 7 m. deep. Left No. 1 Pier under reconstruction, when completed will be 185 m. length, 10 m. depth. Left No. 2 Pier to be reconstructed and completed to same size as Left No. 1.

AUTHORITY: Fushiki Port Administration Office, 5-15, Fushiki Minato-machi, Takaoka City, Toyama Pref. *Tel:* (0766) 44-0277.

AGENT: Sub-agents of Dodwell & Co. Ltd., Toyko. Fushiki Kairiku Unso Co. Ltd., 6-6, Fushiki-Minato-machi, Takaoka-shi, Toyama-Ken. Tel: Takaoka (0766) 44-130019. Telegraphic address "Fushikikairiku Fushiki". Telex: 05155-571/572.

HACHINOHE: 40.33 N. 141.33 E. **(See Plan)**

DOCUMENTS:

5 Crew Lists including Passport Numbers.
4 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage (only first port of call in Japan).
1 Maritime Declaration of Health (for Quarantine on specific form).
1 Vaccination List of Crew (for Quarantine).

Ship's Register and Port Clearance from previous port (Presentation only). Ship's Agent will prepare Inward/Outward Declaration, Cargo Manifest for discharge and Cargo Manifest in transit using specific forms.

PILOTAGE: Not compulsory but arrangeable at Master's request. Pilot is generally arranged by Agent if Master requires, and vessel has to inform Agent ETA at latest 24 hours before arrival. Pilot comes on board from tug which flies flag "H". Tug has no facility to communicate with vessel, therefore vessel must constantly keep in close communication with Agent in order to advise Pilot.

When vessel approaches Hachinohe, VHF (Channel 16) belonging to Harbour Master is available for communication with Agent and Pilot.

Pilot boards at vicinity of Quarantine Anchorage (Lat. 40° 33′ N., Long. 141° 33′ E.). Pilot operates from 0630 hrs. till sunset.

ANCHORAGES: Open sea anchorage with a sandy bottom. Depth of water 12 m. – 16 m.

RESTRICTIONS: Pilot arrangeable only in daytime for entry.

MAX. SIZE: See "Berthing".

HEALTH: At first port of call in Japan, vessel should obtain Free Pratique, thus unnecessary further Pratique procedure at another port in Japan.

Quarantine Inspector boards vessel on arrival at Quarantine Anchorage (005.5°, 2,790 m. from Northern Breakwater Light) but occasionally boards upon berthing unless berth congested.

Master should submit to the Inspector the Maritime Declaration of crew, Vaccination List of crew, Vaccination Cards and Derat Exemption Certificate.

In case of vessel coming from an infected area, Master to report health condition of crew and passengers, number of crew and whether supplied with any provisions or water, also names of crew or passenger landed there.

If there is sick person on board, Master to report to quarantine office the illness condition in detail through ship's Agent thereafter Master should obey instructions of quarantine office.

RADIO: Masters' telegrams from Westbound vessel via Choshi Radio and Northbound vessel via Nagasaki Radio are passed on to Agents.

Call sign: Choshi Radio JCS, JCT, JCU and JDC
Nagasaki Radio JOS, JOT, JOU and JDB.

VHF: VHF available but it belongs to Harbour Master (Channel 16). If no emergency in effect, Harbour Master will pass simple messages to Pilot, Quarantine or tugs.

RADAR: No shore radar service however harbour tug-boat is equipped. Consequently tug-boat has been used by Quarantine and Pilot in foggy season.

TUGS: Pilot boards from tug-boat in vicinity of Quarantine Anchorage and escorts the vessel to inner harbour. Tug-boats always supply tug line free of charge.

BERTHING: In addition to berths mentioned below there are facilities with lesser depths for small vessels.

Public Wharves: Controlled by Aomori Pref.

CRANES:

Name of berth	Crane	Nos.	Capacity (in case of Zinc concentrates)	Max. height
Hattaro B-berth Hattaro C-berth	Unloader	2	Each 315 K/T per hr.	14 m.
Hattaro E-berth	Unloader	1	630 K/T per hr.	19 m.
Hattaro F-berth Hattaro G-berth	Mobile tower crane	2	Each 100 K/T per hr.	6 m.

No heavy-lift facilities.

STEVEDORES: Stevedores arranged upon receiving Master's ETA information.

Main Cargo	Rate of works (average)	
Nickel Ore	6,000 K/T per day	Discharging
Zinc Lead Concentrates	3,000 K/T	"
Logs	2,100 CM	"
Woodchips	10,000 K/T	(24 hrs. work)
Canned goods	230 K/T	Loading

MEDICAL: 3 General Hospitals and Medical Specialists available. No advance notice required unless urgent.

TANKERS: See "Berthing".

DENSITY: About 1025.

FRESH WATER: Available from wharf and water barge. 50 t.p.h. by barge and 40 t.p.h. from wharf. Basic cost water barge ¥370.– per k/t. at wharf (Hydrant) ¥195.– per k/t.

FUEL: All grades of domestic oil obtainable by oil barge. Bonded oil being brought from Yokohama, Chiba, Kashima, Sendai and Tomakomai with sufficient notice beforehand.

CONSULS: None.

REPAIRS: Minor repairs possible.

DRY DOCKS: Only for small vessels in 1,000/2,000 tons G.T. class, 2 dry-docks and other floating dock.

SURVEYORS: No Classification Society at this port except Marine Surveyor "Nippon Kaiji Kentei Kyokai" licensed by the Japanese Government. Surveyors of NK, Lloyd's, ABS and NV normally come from Hakodate, Tokyo or Yokohama.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Ship's option.

CUSTOMS ALLOWANCES: Customs allow 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: See "Cranes".

REPATRIATION: All facilities available for crew changes.

AIRPORT: Misawa Airport, distance Hachinohe/Misawa about 50 km.

TIME: GMT plus 9 hours.

HOLIDAYS: Official holidays; New Year's Day (1st Jan.), Adults' Day (15th Jan.), Foundation Day (11th Feb.), Vernal Equinox Day (21st Mar.), Emperor's Birthday (29th Apr.), Constitution Memorial Day (3rd May), Children Day (5th May), Respect-for-the-Aged Day (15th Sept.), Autumnal Equinox Day (23rd Sept.), Health & Sports Day (10th Oct.), Culture Day (3rd Nov.) and Thanksgiving Day (23rd Nov.).

Work can be arranged on above days except New Years' Day but can not arrange 2nd & 3rd Jan., May Day (1st May), Hachinohe Festival (21st Aug.), Stevedores Year End Holiday (31st Dec.) and 1st, 3rd and 4th Sunday of every month.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance and Fire 119.

TELEPHONES: It is not possible to place telephones on board.

SERVICES: Marine Survey, Tally, Hold Cleaning (Cargo vessels), Notary Public.

SHORE LEAVE: Immigration issue shore-passes for ship's stay if crew have valid Passport or Seaman's Book (Valid 3 days, with possible extension).

IDENTIFICATION CARDS: Not required.

REGULATIONS: Vessel may sail anytime.

DELAYS: No delay normally but sometimes due to congestion of a specific berth.

DEVELOPMENTS: Fairway in Hattaro Area including Hattaro E-Berth will be dredged to −13 m. in future and Hattaro D-Berth to be constructed together with large shore-crane, also Hattaro Pier No. 2 is being planned and will be constructed in the vicinity of Hattaro F&G-Berth. Moreover two long breakwaters will be constructed outside the harbour, however this is presently under negotiation with Fishermen's union in respect of fishery. (Length of Breakwater 3,700 m.).

SHIPMASTER'S REPORT: 1975

Pilotage: Compulsory. The Quarantine Anchorage is position Lat. 40° 32.9′ N., Long. 131° 32.7′ E., bounded by a circle radius 2.5 cables. In view of the considerable new development vessels should obtain Japanese chart No. 65 if possible. Vessels navigating on B.A. charts can be met by Pilot at a position 2 miles North of Same Kaku Lighthouse, by prior arrangement.

Restrictions: Vessels may sail any time.

Max. Size: Draft 9.5 m. LOA 170 m. breadth no restriction (June 1975).

Health: Radio Pratique can be obtained by all vessels holding valid Japanese Sanitary Inspection Certificate. (This rule applies to all Japanese Ports).

Tugs: A number of tugs are available.

Berthing: A number of new berths are now available. Dredging is in progress and available drafts can be expected to increase.

Airport: Two flights per day.

Developments: Reclamation, expansion, dredging etc., in progress.

AUTHORITY: Hachinohe Port Administration Office, 1 – 131 Kitanuma, Kawaragi, Hachinhoe City, Aomori Pref., Japan.

AGENT: Narasaki Sangyo Co., Ltd., Hachinohe Branch, 10-4, Aza Kaigan, Oaza Kawaragi, Hachinohe-shi, Aomori-ken. Cable Address: Narasaki Hachinohe. Telex: 0822960 Nara J. Tel: (0178) 20-1651.

HAKATA: 33.36 N. 130.24 E. (See Plan)

DOCUMENTS:

Customs: When vessel arrives direct from foreign port, Customs Officials will board vessel for search. The following documents are to be submitted.

Crew List, Passenger List, Store List, Manifest of Crew Personal Effects (must be signed by individual crew member), Arms and Ammunition List, Narcotics List, List of Ports of Call on Current Voyage, Discharging Cargo Manifest, Through Cargo Manifest, Declaration Inward/Outward (Form No. C2000).

The following will be checked on board:

Ship's Registry, Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will not attend on board, except special case. The Master or Agents are to attend at Customs House for entry formalities with the following documents:

Discharging Cargo Manifest, Through Cargo Manifest, Declaration Inward/Outward, Ship's Registry, Last Port Clearance, Documents entrusted with the Master at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

Immigration: Immigration Officials board vessel on her arrival in port to examine passports, discharge books and/or other equivalent travel documents and provide a 72-hour landing pass for crew members and passengers. 1 copy each of Crew List and Passenger List are required by them. Providing vessel's Agents with a Crew List beforehand will be a great help in expediting immigration business on vessel's arrival. When vessel stays in port more than 72 hours, the landing passes will be extended every 72 hours on application.

In the event that crew members, without entry visas, are to be landed for repatriation or transfer, Immigration will not permit their landing unless passage, by either sea or air, ensuring the prompt departure from Japan (within 72 hours) of these men have been booked, or unless the vessels to which they are to be transferred, arrive in Japan within 5 days.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at Quarantine Anchorage; position Lat. 33° 38′ N., Long. 130° 19′ 30″ E. Request for Pilot made through ship's Agent, Master reporting ship's ETA by radio giving accurate time of arrival at least 24 hours prior arrival, also any subsequent change. Pilot on VHF Channel 16, 11 and 12. In the event of rough sea, harbour tug-boat will be used.

Shipmaster's Report: 1982

The Hakata Pilot is available on request off Genkai Island (Lat. 33° 42′ N., Long. 130° 15.5′ E.).

ANCHORAGE: No anchorage in port.

RESTRICTIONS: No restrictions if vessel in Free Pratique and draft less than 10 m. No tide.

MAX. SIZE: No restrictions of length, breadth. Draft 11.10 m.

HEALTH:

(a) Quarantine Station: Sea area surrounded by the following lines:

1. The line connecting between the top of the Nokono-Shima and point "A" which is located on the sea in the direction of 90° and at the distance of 2,540 m. from the top of the Nokono-Shima. (The parallel of 33° 38′ 00″ N.)
2. The line connecting between point "A" and point "B" which is located on the sea in the direction of 000° and at the distance of 1,750 m. from point "A". (The Longitudinal line of 130° 20′ 00″ E.).
3. The line drawn towards the Nokono-Shima in the direction of 270° from point "B". (The parallel of 33° 37′ 06″ N.).
4. The coast line of the Nokono-Shima.

The centre of the Quarantine Anchorage: Lat. 33° 37′ 30″ N., Long. 130° 19′ 30″ E.

(b) Quarantine service is rendered from sunrise to 1 hour before sunset.

(c) "Q" flag should be hoisted until Free Pratique is granted.

(d) When vessel arrives from plague infected or suspected area within 10 days after she left such place, a 24-hour special quarantine is required. All sanitary scuppers must be closed and garbage not thrown overboard after vessel reaches 60 miles off inland sea areas.

(e) Radio Pratique is applicable.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi and Northbound to contact Nagasaki Radio respectively.

VHF: Hakata Port Radio on Channels 11, 12, and 16. Power 50 watt. 24 hour operation.

TUGS: 2×2,400 h.p. and 1×2,600 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew. Normal working hours: 0800 to 1700 hrs.

Overtime work is possible by applying to Customs at the following fees:

0000–0500 hrs.	350 Yen per hour
0500–0830 hrs. 1700–2200 hrs. and Sundays and Holidays	300 Yen per hour
2200–2400 hrs.	350 Yen per hour

No work can be arranged for on 31st December to 3rd January.

MEDICAL: No advance notice required unless urgent.

DENSITY: About 1024.

FRESH WATER: No water barge available. Hydrants: at Central, Hakozaki and Suzuki Pier. Rate of delivery: 30 t.p.h.

FUEL: Bonded bunker oil is not available at this port, but is to be lightered from other port. An adequate notice should be given to the suppliers in order to avoid delay in replenishment. The rate of delivery from oil barge is 80 – 100 t.p.h.

American Consulate General, Fukuoka Tel: 092-751-9331
Republic of China Consular Agency, Fukuoka Tel: 092-761-3458
Republic of Korea Consulate General, Fukuoka Tel: 092-771-0461

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

REPAIRS: Local workshop (fishing-boat repairs) available only for small repairs, so Agent for ocean-going vessel in Hakata arranges repairs from Moji or Tobata.

REPATRIATION: Possible.

AIRPORT: Fukuoka Airport: Distance: about 20 minutes from Hakata Port by car. JAL Domestic regular airline for Tokyo and Osaka. ANA Domestic regular airline for Tokyo, Osaka. Also, Cathay and JAL airlines for Taipei, Hong Kong 4 times a week. Korean and JAL airlines for Seoul and Pusan daily except Sunday.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police/Ambulance Tel: 110; Fire 119.

TELEPHONES: May be placed on board if 7 days notice given.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 15 days, but 7 days extension possible if ship stays longer, good for any Japanese port.

AUTHORITY: Hakata Port and Harbour Bureau – Fukuoka, 13-13, Sekijo-Machi, Hakata-ku, Fukuoka-city, Japan. *Tel:* (092) 291-0561.

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Not compulsory, but in practice is necessary. Pilots available 24 hours a day and vessels able enter and leave port day and night. Pilots board about 1.5 miles S.W. of Breakwater Lighthouse. Pilot boat is small boat carrying flag "H".

The limit of Hakodate Piloting District is the sea area surrounded by a line drawn from Obana Misaki to Kattoshi Misaki and the coastline.

ANCHORAGES: Quarantine Anchorage outside breakwater and care should be taken not to foul fishing nets. Good anchorage inside breakwater at East side of section 3 – depth 11 m. to 13 m.

RESTRICTIONS: Quarantine and Customs business between 0800 and 1700 hrs. only.

MAX. SIZE: Tankers up to 75,000 d.w.t. at SBM. Max. draft 14.5 m. Max. LOA 260 m.

Also see "Berthing".

HEALTH: Radio Agent for Free Pratique not less than 12 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio, vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.

If a vessel has on board any case, or any suspected case of infectious disease, within 15 days of arrival.

If a vessel does not possess a valid Derat or Derat Exemption Certificate.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 1×500 h.p., 2×800 h.p., 1×1,100 h.p., 1×2,000 h.p. and 1×3,200 h.p. Tug line generally used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agents mainly by radio.

Berth	*Length* (m.)	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (g.t.)
North Wharf (North Side)	130	7.0	6.5	3,500
Central Wharf				
(North Side No. 1)	171	9.0	8.5	8,000
(North Side No. 2)	165	9.0	8.5	8,000
(South Side)	133	8.0	7.0	6,000
Bandai Wharf (Front Side)	185	9.0	8.5	8,000
(South Side)	130	7.5	7.0	6,000
No. 1 Buoy		9.0	8.0	8,000
No. 2 Buoy		10.0	9.5	10,000
No. 3 Buoy		10.0	9.5	10,000

CRANES: Hakodate Dock own 1×200 ton and 1×50 ton floating crane.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agents to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. (50% additional of basic stevedorage) 2100 – 0500 hrs. next morning (130% additional) Sundays/holidays (60% additional).

MEDICAL: No advance notice required unless urgent.

TANKERS: *Single-Buoy Mooring:* Asia Oil Company, sea berth suitable for up to 75,000 d.w.t. and max. draft 14.5 m. at Imodco Buoy.

Position: Lat. 41° 48′ 08″ N., Long. 140° 40′ 57″ E.

Soundings: At site 15.5 m. In approaches to site, more than 15.5 m. The approach to terminal is free from obstructions.

There is one 20 in. crude line running 2,000 m. from shore to the buoy, and about 500 m. from shore line to the storage tanks.

Mooring: There is no night mooring. Unmooring is carried out from 0600 till 2400 hrs., and may be done by the Master of the ship without a Pilot.

A mooring/unmooring gang is provided for by Agent. Two launches and one tug are in attendance at the mooring. One launch will keep the hose clear while the other handles the lines. The tug is standing by and only pushes against bow or near the stern to keep the head of the vessel in position whilst mooring.

At least 6 good mooring lines are required, preferably each line to its own bollard. The lines are run single to the buoy. The position of the ship's bow from the buoy is about 40 m., when the distance from the buoy to ship's manifold is about 360 ft.

When mooring, it is requested that the propeller is completely stopped or otherwise turned astern.

Both bow anchors are to be hove well up in the hawse pipe and properly secured before reaching the buoy. Anchors are never to be used while on the buoy. They may foul the buoy's mooring cables and pipe-line on the bottom if released.

Floating Hose: There is one set of 12 in. floating hose for the discharge of crude only. The floating hose is about 600 ft. long from the buoy's manifold. The last two lengths are floating in doughnut-shaped plastic floats. The end is marked with an unlit marker buoy.

The hose connections are always made to the port manifold and are lifted with ship's gear. The hose when full of cargo and equipment weighs over one and a half tons. Information is required of the distance from ship's bow to ship's manifold, and the distance from ship's side to ship's manifold prior to arrival.

Standard flanges are used on the hose. OD 19 in. diameter of bolt-circle 17 in. with 12 bolt-holes size 0.875 in.

Discharging: The discharging should be arranged in such a way as to be able to take sufficient ballast into ship's tanks, when about half way during discharge; to be able to get the ship's head down to prevent the vessel from veering too widely, and run over the hose near the buoy, in case of unfavourable conditions.

Maximum allowed back pressure by shore is about 10 kg./sq.cm. During the discharge the main engine must not be immobilised as it may be used to keep the vessel clear of the buoy.

Stand-by Men: While on the buoy, the vessel will be required to provide sleeping quarters for four men, this includes the foreman who will remain on board throughout the entire operation. It is requested that the discharge officer be provided with meals. The other men are supplied with food from shore.

Discharge Rate: 1,800 k/l per hour.

DENSITY: Average 1025.

FRESH WATER: Available at piers ex-hydrants and by barge at anchorage. Supplier, Hakodate Municipal Office.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

Fuel supplies for Hakodate are generally lightered from Tokyo Bay area and delays can be caused by weather conditions.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommended request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Custom Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: None.

REPAIRS: Hakodate Dockyard Co., undertakes hull and engine repairs.

DRY DOCKS: No. 1. Capacity 15,000 g.t., length 180 m., breadth 22.45 m. depth 6 m. No. 2. Capacity 9,000 g.t., length 140 m., breadth 8 m., depth 6 m.

AIRPORT: Distant 20 minutes by car.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119.

TELEPHONES: Arrangeable on board.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Port and Harbour Bureau, Hakodate City, 4-19 Suehiro-cho, Hakodate City, Hokkaido. *Tel:* (0138) 22-3101.

AGENT: Sub-Agents of Dodwell & Co., Tokyo. Narasaki Sangyo Co., Ltd. c/o Kyoei Unyu Co., Ltd., No. 5-22, Kaigan-cho, Hakodate, Hokkaido. Cable address: "Funekyoei Hakodate". Domestic Telex: 09925-64. Tel: Hakodate (0138) 42-4121.

HIBIKINADA: 33.57 N. 130.50 E. (See Plan)

LOCATION: The port of Hibikinada is located in position Lat. 33° 56.7′ N., Long. 130° 49.9′ E. and is only protected by a breakwater. It has no other shelter and is exposed to strong winds from the North. The strongest winds are from the NW and if accompanied by swell, causes a dangerous surge in the port.

PILOTAGE: Kanmon Strait and Harbour Pilotage Association.

Pilotage compulsory. Pilot boards inbound vessel at Mutsure: Lat. 33° 58′ 30″ N., Long. 130° 52′ 48″ E. or at He Saki: Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: *Coming from West:* Mutsure Anchorage: Lat. 33° 59.5′ N., Long. 130° 51.7′ E. Depth 23 m.

Coming from East: He Saki Anchorage: Lat. 33° 56′ N., Long. 131° 03′ E. Depth 12.5 m.

If gale force winds blowing, it is possible with Coast Guard permission to shift to Mutsure Anchorage.

RESTRICTIONS: Berthing and unberthing only during daylight hours. Berthing undertaken at slack water only. Unberthing at any stage of the tide.

Vessels are permitted to transit Shimonoseki with a max. draft 30 ft. 6 in. at anytime and with a max. draft of 32 ft. 10 in. at HW. Also see "Report".

Controlling Factors:

	Controlling Depth (MLW) (m.)	*Mean Tidal Range (m.)*	*Velocity Current (knots)*	*Nature of Bottom*
Entrance	20	1.0	3 max.	Mud
Channel	13.5	1.0	3 max.	Mud
Anchorage	21	1.0	3 max.	Mud
Berth	13.5	1.0	nil	Mud

MAX. SIZE: *Wharf A-1:* Max. LOA – 350 m. Max. draft 13.0 m. Max. 150,000 d.w.t. Beam of vessel determined by hatch width.

HEALTH: Radio Pratique available if vessel in possession of valid sanitary certificate.

RADIO: Nagasaki Radio "JOS" and Choshi Radio "JCS".

VHF: "Shimonoseki Port Radio" and "Kitakyushu Port Radio" on Channel 16. Working frequency for berthing information is Channel 14.

TUGS: There are 3 tugs available each 3,500 h.p. Use of all 3 tugs is advisable when docking and undocking.

BERTHING: Vessels always dock port-side-to. Ship's gangway used.

Vessel berthed at A-1 Wharf. Heading 247° true. Max. LOA 350 m. Max. draft 13 m. Depth at LW 13 m. Beam of vessel determined by hatch width. Cargo handled coal.

Moorings: FORWARD: 3 headlines, 1 breast line, 2 springs.

AFT: 3 stern lines, 1 breast line, 2 springs. Vessel berths against spring roller fenders.

Cranes: 3 unloaders available, 2 × 34 ton capacity and 1 × 45 ton capacity.

MEDICAL: Doctor available.

FRESH WATER: Available.

FUEL: Available (No oil barges available).

REPAIRS: Possible.

DRY DOCK: Available.

SERVICES: Laundry and provisions available.

CHARTS: BA 1578, BA 532, BA 127.

DEVELOPMENTS: Port will reclaim land of 590 ha. for redevelopment, industrial use, and for waste disposal. 2 berths on the domestic trade quay will also be improved.

REPORT: June 1985: It was found that, whilst the weather was severe and from a North/Northwesterly direction it was not abnormally severe. Had the vessel been able to moor in a symmetrical fashion, she would have been in no difficulty.

The berth was extended in 1976 to accommodate two vessels simultaneously. As a result, the vessel that moors to the Eastern end of the jetty can, depending upon the size of the two vessels on the jetty, overhang with their after end. The effect of this, as can be seen from the plan, is that vessel has nowhere to put out proper stern mooring lines except to a shore mooring post (see "X" on "Plan"). On our vessel, the mooring lines were in the order of 130 m. long, and some four times the length of the headlines. It is well known that mooring lines should be symmetrical at either end of the vessel.

The only place for the larger vessel on the "Plan" to moor safely is some 50/60 m. ahead of her diagrammatical position. It is, of course perfectly feasible for a vessel to moor ahead of that shown in the plan. If this was the case, we would consider her to be perfectly safe.

AUTHORITY: Kitakyushu Port and Harbour Bureau, 2-7 Nishi-Kaigan 1 Chome, Moji-Ku, Kitakyushu City, 801 Japan. *Tel:* (093) 331-1331, (093) 321-5941. *FAX:* (093) 321-5915.

HIMEJI (including Hirohata, Shikama, Mega and Aboshi): 34.47 N. 134.41 E. (See Plan)

DOCUMENTS:

Ship's Register.
Last Port Clearance.
3 Crew Lists including Passport Numbers.
3 Passenger Lists.
1 Store List.
1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: See "Kobe". Vessels take Inland Sea Pilot off Wada, Hesaki or Sekisaki; or from ports of Inland Sea. No exact pilot station and no checking point at port of Himeji (Mega, Shikama, Hirohata and Aboshi) but Agents arrange Pilot when vessel approaches upon receiving cable giving 24 hours advance notice. Pilot boarding positions as follows: Mega Lat. 34° 44′ N., Long. 134° 42′ 15″ E. Shikama Lat. 34° 45′ N., Long. 134° 39′ E. Hirohata Lat. 34° 44′ N., Long. 134° 37′ E. Aboshi Lat. 34° 44′ N., Long. 134° 34′ 10″ E.

No strict location of anchorage for vessel awaiting a Pilot in Himeji area, but should be as close as possible to port according to draft and communication.

ANCHORAGE: No strict boundary areas for anchorages. Anchor as close as possible to the port according to draft.

RESTRICTIONS: At ports of Mega, Shikama and Aboshi, no Pilot boarding between sunset to sunrise. Hirohata Pilot will board from sunrise to 2200 hrs. for vessels less than 10,000 d.w.t. for entry, and less than 15,000 for departure, for Pier Nos. 4, 5, 6, 7, 9 and 10 but other berths only from sunrise to sunset.

MAX. SIZE: Draft restrictions as follows:

Mega 11.80 m., Shikama 10.0 m., Hirohata 13.0 m. (80,000 d.w.t. or 110,000 d.w.t. part load) for Central Pier, 7.50 m. for Kamota Pier (Pier Nos. 1 – 7), 9.45 m. for Tsuruta Pier (Pier Nos. 10 – 14). 16 m. (160,000 d.w.t. or 270,000 d.w.t. part load) for No. 18 Pier. Aboshi 9.0 m.

Sea buoy mooring, max. draft 19.2 m. Max. 254,000 d.w.t.

HEALTH: No Quarantine Office at Himeji. At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards. Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Tug(s) normally join vessel when approaching, or at anchorage. Always use tug's lines without charges.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

Berth	*Wharf length*	*Max. LOA*	*Max. Draft*

Pier No. 18	300 m.	320 m.	16.00 m.
Oil Berth	140 m.		7.50 m.
Buoys			9.50 m.

CRANES:

Hirohata:

Central Quay No. 8 – 9: 2×25 ton, 1×38 ton.
Kamoda Quay No. 3 – 7: 2×9 ton, 2×5 ton.
Yumesaki Quay: 1×20 ton, 2×10 ton, 1×20 ton.
Tsuruta Quay No. 10 – 12: 4×9 ton.
Higashimaha Quay: 1×20 ton, 2×30 ton.
Genkyo Quay No. 18: 2×45.5 ton.

Shikama:

2×5 ton and 1×10 ton at Public Wharves (Nos. 1 – 7).

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. 60% additional of basic stevedorage; 2130 – 0830 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

TANKERS: Idemitsu Kosan Co. Ltd., Himeji Oil Jetty where 1 berth only and max. draft 11.8 m. allowed. Shore discharging facilities 3×12 in. diameter hose connections which connect to 18 in. diameter line for tank hoses. Acceptable max. 5 kg/sq.cm. on hose gauge, discharge rate abt. 2,000 l/t per hour.

Note: Idemitsu Kosan Co. Ltd., Himeji, require following information prior to arrival for smooth berthing and connecting hoses: Height from sea to deck; Length from vessel's side to underneath of hose connections; Height from deck to connection of line; Diameter of connection.

Operator's Report: 1983.

Idemitsu Kosan Hyogo Sea Berth (Discharging terminal) is operated by Idemitsu Kosan Co. Ltd.

SBM Berth. Berthing equipment to OCIMF standard.

SBM operates 24 hours per day, 7 days a week. Ships moored and unmoored at daytime, weather and other circumstances permitting. SBM will not be closed due to any holidays.

Area around the SBM with radius of 410 m. is an open port for Customs' Regulations. Therefore supplies, disembarkation, etc. should be handled by related regulations.

Location: Lat. 34° 42′ 37″ N., Long. 134° 39′ 54″ E.

Pilotage: Not compulsory.

Anchorage: Himeji port is not an open port. Ships can anchor at the following points.

Point "A" Lat. 34° 42′ 58″ N., Long. 134° 39′ 02″ E., depth 21 m.
Point "B" Lat. 34° 42′ 10″ N., Long. 134° 40′ 48″ E., depth 21 m.
Point "C" Lat. 34° 41′ 30″ N., Long. 134° 41′ 00″ E., depth 23 m.

Anchorage "A" and "B" are for tankers of less than 18.5 m. draft.

Restrictions:

(a) Berthing Master comes on board 3 miles South from the line joining Kurakake Id. and Kami Id.

(b) Ship's Master has to arrange tug boats both sides and aft (total of 3 tugs).

(c) Ship proceeds at moderate speed taking into consideration tide and wind and any other circumstances. When approximately 1,000 m. from SBM vessel reduces her speed to avoid risk of touching SBM.

(d) Ship has to stop completely 200 m. from the SBM.

Max. size:

Maximum draft 19.20 m.
Maximum d.w.t. 254,000 tons

Berthing:

From bow to manifold 145 m.-186 m.
Derrick capacity SWL in excess of 10 tons.

Mega:

Berth	*Depth* (m.)	*Pipe-Lines*
Idemitsu Jetty No. 1 – Berth No. 1 – No. 4	5.0 – 7.0	4×8 in.
Idemitsu Jetty No. 2 – Berth No. 5	7.0	8 in.
Idemitsu Jetty No. 3 – Berth No. 6	12.2	12 in. and 8 in.
Idemitsu Jetty No. 4 – Berth Nos. 7 – 8	7.0	2×8 in.
Idemitsu Jetty No. 5 – Berth No. 9 – No. 12	5.0 – 7.0	4×8 in.
LPG Jetty – Berth No. 22	6.0	4 in. and 2 in.
Monoageba	6.0	—
Sea Berth	19.0	—
Kanden LNG Jetty	14.0	—

DENSITY: Average density between 1025 and 1026 in Winter season and 1018 and 1020 in Summer season.

FRESH WATER: Idemitsu Oil Jetty, Shikama Public Pier and Hirohata Pier able to supply fresh water from shore, but *No Water Barge available at Port of Himeji* therefore not able to supply fresh water at Satetsu Pier (Shikama), Shikama Buoy, Aboshi Buoy or outside anchorage.

Port	*Average rate of delivery*
Mega	20 – 30 tonnes/p.h.
Shikama	25 – 30 tonnes/p.h.
Hirohata	15 – 20 tonnes/p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passenger or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CARGO GEAR: See "Certificates" but no special requirements.

CONSULS: No consuls at Himeji, Shikama or Hirohata.

REPAIRS: Most minor deck and engine repairs available at port of Himeji; in case special technician required, should be called from Kobe.

DRY DOCKS: No dry dock available at port of Himeji. Nearest dry dock Ishikawajima-Harima Heavy Industries Co. Ltd., Aioi, who have following dry docks. Also see "Aioi".

REPATRIATION: Possible.

AIRPORT: About 60 km. to Itami Airport. Regular services.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

HOLIDAYS: At Aboshi, no work on 1st and 3rd Sunday. At Shikama, shore crane, no work on 1st and 3rd Sunday but gangs available for discharging and loading.

POLICE/AMBULANCE/FIRE: Police (Shikama) Tel: 35-1441; Ambulance (Shikama) 119 or 35-0119; Fire (Shikama) 119 or 35-0119.

TELEPHONE: No facilities for placing telephones on board.

GENERAL: No quarantine available at port of Himeji, therefore pratique to be obtained at other ports.

SERVICES: Tally, laundry, daily provisions by ship chandler available locally. All other service from Kobe or Osaka.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for 9 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Himeji Port Administration Office, 294, Suka, Shikama-ku, Himeji City, Hyogo Pref. *Tel:* (0792) 35-0176.

AGENT: Sub-agents of Dodwell & Co., Tokyo. Shikama Kaiun Co. Ltd., Minato-machi, Shikama-Ku, Himeji-shi. Tel. Himeji (0792) 35-0912. Telegraphic address "Shikamakaiun Himeji". Telex: 05772211 Sikama J.

HIROSHIMA: 34.20 N. 132.25 E.

DOCUMENTS: See "Yokohama".

PILOTAGE: Inland Sea pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits). Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

Hatsukaichi Dolphin No. 3	200	9.0
Hatsukaichi Dolphin No. 4	200	9.0

CRANES: 6 floating cranes, 40 ton – 450 ton.

STEVEDORES: Working hours: 0830 – 2100 hrs.

TIDES: Max. (spring tide) 3.9 m. Min. (neaps) 0.57 m.

Rate of current at flood tide generally 0.25 knot to N.E.; 0.5 knot at ebb tide to S.W. South area of Togeshima and Kannonsaki 0.25 knot at flood to S.S.E., and 0.5 knot at ebb tide to N.N.W.

FRESH WATER: By water barge (capacity: 330 tonnes available). Additional charges made for overtime i.e. after 1700 hrs., and Sunday, holidays and Saturday afternoon.

FUEL: Most grades of domestic and bonded oil available, delivered by barge.

CONSULS: No consuls in Hiroshima. Nearest Osaka or Kobe. Marine note of protest can be attested by local notary public.

REPAIRS: All types of deck, electrical and engine repairs.

DRY DOCKS: Largest dry dock Taibi Dry Dock, Mitsubishi-Hiroshima Works, length 154 m., breadth 22.00 m., 10,300 g.r.t. Kanawa Dry Dock and Ujina Dry Dock available for 3,500 g.r.t. and 1,500 g.r.t. respectively.

AIRPORT: Hiroshima Airport. Only domestic airlines every hour to Osaka and Tokyo.

POLICE/AMBULANCE/FIRE: Police (for emergency) 110; Ambulance 119; Fire 119.

TELEPHONE: No arrangements for placing telephones on board.

SERVICES: Any navigational apparatus can be serviced on request, Cargo holds cleaning services can also be carried out, but tank-cleaning and other services are to be arranged from Kobe.

REGULATIONS: Many seaweed and oyster beds near anchorages, therefore oil pollution precautions strictly observed.

AUTHORITY: Hiroshima Port Administration Office, 1308-2, Ujina Kaigan 2-chome, Minami-ku, Hiroshima City. *Tel:* (082) 251-7117.

AGENT: Sub-agents of Dodwell & Co. Ltd., Tokyo. Naigai Unyu Co. Ltd., 23-36, 2-chome, Kaigan-dori, Ujina Hiroshima-shi, Hiroshima-ken. Cable address: Naigai Hiroshima. Domestic Telex: 0652-963 Naigai Hir. Tel.: Hiroshima (0822) 54-2421.

HITACHI: 36.30 N. 140.37 E.

DOCUMENTS: and all general information, refer to "Onahama".

PILOTAGE: Not compulsory. Pilot boards in approximate position Lat. 36° 28′ 13″ N., Long. 140° 38′ 40″ E. (Quarantine Station). Pilot not available after sunset.

MAX. SIZE: Draft 8.50 m. limited by channel depth.

PRATIQUE: Radio Pratique not available. Formalities carried out at Quarantine Station. (See "Pilotage").

TUGS: 1 × 1,200 h.p. available. A 2,000 h.p. tug will be brought from Kashima if required.

BERTHING:

HOSOSHIMA: 32.25 N. 131.41 E.

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Store List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agent will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Telegraphic address of pilot station "Pilot Hososhima". 48 and 24 hours' advance notice of ETA required, and any change in ETA. Pilot boards at Hososhima Quarantine Anchorage location, Hosohima Lighthouse N.E. 1 mile off, position Lat. 32° 25′ 50″ N., Long. 131° 41′ 53″ E.

ANCHORAGE: Refer Japanese Chart No. 1223 (Ozue-wan and Hososhima-Ko).

RESTRICTIONS: Strictly no entry after sunset or departure after 2200 hrs.

MAX. SIZE: Max. permissible LOA 170 m., draft 31 ft. 10 in. (9.7 m.)

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel to contact Choshi and Northbound to contact Nagasaki Radio respectively.

TUGS: Join vessel in position Lat. 32° 26.5′ N., Long. 131° 39.5′ E. Tug's lines to be used. 2 tugs, 1×1,100 h.p. and 1×760 h.p.

STEVEDORES: At least 24 hours' prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gears not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1630 – 2130 hrs. (60%) additional of basic stevedorage; 2130 – 0500 hrs. next morning 130% additional; Sundays/holidays 100% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Average 1025 in Winter, 1020 in Summer, subject to weather and tide current.

FRESH WATER: Available from dock, 20/30 t.p.h.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest stock ports at maximum 7 days' prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. Cost per hour per gang depending on type of cargoes. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's register to show Customs Inspector ship's registered gross and net tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: No local representatives.

REPAIRS: None.

REPATRIATION: Possible.

AIRPORT: Nearest, Miyazaki Airport about 2 hours drive from Hososhima. JAL and ANA lines.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police 110; Ambulance 119; Fire 119. Public telephone booth available near by the berth.

TELEPHONES: No facilities for placing telephones on board.

SHORE LEAVE: Local Immigration Officers issue shore pass valid for 15 days when Hososhima is first port of call in Japan.

AUTHORITY: Hososhima Port Administration Office, No. 17371-2 Shinkai, Hichiya, Hyuga City, Miyazaki Pref., Kyushu, Japan. *Tel:* 09825-2-5366. *Cables:* Port Authority Hyuga. *Contact:* Mr. Ogata.

AGENT: Sub-Agents of Dodwell & Co. Ltd., Tokyo. Hakko Unyu Co. Ltd., No. 731, Kaigan-dori, Hososhima, Hyuga-shi, Miyazaki-ken (883). Cable Address: "Ringer Hyuga". Domestic Telex: 0776677 HakkoHJ. Tel.: Hyuga (09825)2-2185.

IHO: 34.45 N. 134.46 E.

NO VESSELS CALLING AT THE PRESENT TIME – FACILITIES NOT IN USE SINCE 1973.

DOCUMENTS:

- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords, etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in transit using specific forms. Therefore ship's Agents should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from 1 of 3 pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication available with Inland Sea Pilot Stations. Also see "Shipmaster's Report" before first port.

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 14″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Closed Port. Agent will arrange anchorage position for discharging, with Authorities, but usual position Iho Signal Station, bearing 215° distant 3,000 m. (Signal Station Lat. 34° 44′ 58″ N., Long. 134° 46′ 12″ E.).

HEALTH: Pratique must be obtained at another port before calling Iho.

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: Not required. Discharging at Outer Anchorage.

TANKERS: Port is operated for oil discharging only. Discharge is into barges through 6 in. hoses at either side of vessel.

DENSITY: Average density is between 1025 and 1026 in Winter season and between 1018 and 1020 in Summer season.

FRESH WATER: Not available.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunker will be lightered from the nearest stock ports at maximum 7 days prior notice.

REPAIRS: Not available.

DRY DOCK: Nearest dockyard at Aioi.

AIRPORT: Nearest airport at Osaka.

TIME: GMT plus 9 hours, no alterations.

POLICE/AMBULANCE/FIRE: Police tel. 07944/2-3377; Ambulance, 119 or 2-2101; Fire 119 or 2-2101.

SERVICES: None. Nearest services available at Kobe/Osaka area.

AGENT: See "Himeji".

IMABARI (Imahuru): 34.04 N. 133.00 E. (incl. Mategata). (See Plan)

DOCUMENTS:

1. Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

2. Sekisaki, 3 miles South of Sekisaki Lighthouse. (Vessels transitting Bungo Channel), Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible having due regard to safety, to Sekisaki Pilot Station.

3. Hesaki, at East side of Kanmon (Shimoneseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: Anchorage outside breakwater, sufficient water, but on account fast current deemed not safe anchorage. Anchorage inside breakwater generally shallow, and sea area narrow for large vessels. To discharge logs only Temposan Wharf available for vessels alongside berth where holding ground is good and depth of water is 7.50 m.

Vessels drawing over 7 m.: vessel can enter Mategata (open road) deemed to be most fitted place for vessels entry to discharge logs. Port of Mategata faces Aki-Nada and located near West entrance of Kurushima Channel; Lat. 34° 06′ N., Long. 132° 55′ E., where holding ground good and depth of water 12 m. – 20 m. is kept.

RESTRICTIONS: No entry after dark.

MAX. SIZE: Temposan Wharf length 110 m., breadth no limit, draft 7 m. Mategata (open road) length no limit, breadth no limit, draft 10 m.

HEALTH: At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination Cards and Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which cover all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 6 tugs available, 1,050 h.p. – 4,000 h.p. Temposan Wharf: join vessel at sea anchorage, using tug's line with charge. Mategata (open road): no tug required in normal conditions.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio. Also see "Max. Size".

	Section	*Length (m.)*	*Depth (m.)*
Kurashiki Wharf:			
	1	165	9.0
	2	140	7.5
	3	180	5.5
	4	270	5.5
Toryu Wharf:			
	1	180	5.5

CRANES: Floating crane available from Kure.

STEVEDORES: At least 24 hours prior notice excluding Sundays and holidays required in order for Agent to arrange stevedores. Vessel must constantly keep her Agent advised of ETA. If stevedores cannot commence loading/unloading at time notified by the Agent, the orderers must pay for waiting time. If cargo gear not rigged on berthing, stevedores will do same for ship's crew at additional cost. Overtime surcharges 1700 – 1900 hrs. 50% additional of basic stevedorage; 2100 – 0500 hrs. next morning 130% additional; Sundays/holidays 60% additional.

MEDICAL: No advance notice required unless urgent.

DENSITY: Temposan Wharf 1015. Mategata 1015.

FRESH WATER: Fresh water available by barge from Onomichi.

FUEL: All grades of bonded bunkers are stocked in Tokyo Bay, Ise Bay, Osaka Bay and Kanmon Port. At all other ports bunkers will be lightered from the nearest bunker stock ports at maximum 7 days prior notice.

GANGWAY/DECK WATCHMEN: Not specially required unless passengers or valuable cargo on board.

OPENING/CLOSING HATCHES: Stevedores carry out opening and closing hatches. If any time lost by ship's crew doing this work, stevedores charge ship for waiting. Recommend request stevedores for this work unless crew can complete it before berthing.

CERTIFICATES: Ship's Register to show Customs Inspector ship's registered gross and nett tonnages. Valid Cargo Gear Certificates sometimes required by stevedores when cargo gear's maintenance appears to be poor.

CUSTOMS ALLOWANCES: Only allowed 50 cigarettes to take ashore but no spirits.

CONSULS: See "Kobe".

REPAIRS: Only minor repairs.

DRY DOCKS: Not available at this port, the nearest ones are Kawasaki Heavy Industries Ltd., Sakaide; Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima; and Mukaishima; dimensions of these docks as follows:

Kawasaki Heavy Industries Ltd., Sakaide. Dock No. 2 for 500,000 d.w.t. vessel. 450 m.×72 m.×12.3 m. It is not in action yet for ships to repair. Only used presently for shipbuilding and after services.

Hitachi Shipbuilding & Engineering Co. Ltd., Innoshima Dock, Dock No. 1 for 20,000 d.w.t. vessel. 175 m.×25.62 m.×9.10 m. Dock No. 3 for 130,000 d.w.t. vessel. 282.50 m.×47 m.×11.33 m.

Hitachi Shipbuilding & Engineering Co. Ltd., Mukaishima Dockyard, Dock No. 1 for 3,000 d.w.t. vessel. 86.18 m.×13.60 m. ×6.80 m. Dock No. 2 for 8,500 d.w.t. vessel. 125 m.×18 m.×7.40 m. Dock No. 3 for 25,000 d.w.t. vessel. 175 m.×29 m.×9 m.

REPATRIATION: Possible.

AIRPORT: No airport. Nearest airports are Matsuyama and Takamatsu where are All Nippon Airways.

TIME: GMT plus 9 hours. No alterations made to clocks during year.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance 119; Fire 119.

TELEPHONES: No facilities for placing telephones on board.

GENERAL: Mategata is a closed port. To conform with regulations, vessel obtains permission from Shikoku Maritime Bureau to enter.

Customs request vessels calling Mategata to obtain permission to enter at preceding port of call by paying charge at same rate of tonnage dues prior to arrival of vessel. Application undertaken by Agent.

No quarantine available. Nearest station Matsuyama. No Immigration. Officer comes from Niihama.

SERVICES: None.

SHORE LEAVE: Local Immigration Offices issue shore pass valid for only 3 days, but 3 days extension possible if ship stays longer.

AUTHORITY: Imabari Port Administration Office, 2 Katahara-cho 1-chome, Imabari City, Ehime, Pref. *Tel:* (0898) 22-4120.

AGENT: See "Matsuyama".

IMARI: 33.18 N. 129.49 E.

PILOTAGE: Pilots are available. Boarding stations at 33° 26.4′ N., 129° 42.7′ E. and quarantine anchorage, see "Health".
RESTRICTIONS: Entry/departure possible day and night.
HEALTH: Formalities will be carried out at anchorage. Quarantine Station is 096° 1,300 m. (200 m. circle) from Uranosaki Lighthouse in position 33° 20′ 06″ N., 129° 48′ 32″ E.
TUGS: 1×2,000 h.p. Additional tugs available from Sasebo and Nagasaki.
BERTHING:

Name	*Depth* (m.)	*Permissible Draft* (m.)	*Capacity* (d.w.t.)
Buoy No. 1	10.0	8.0	15,000
Buoy No. 2	12.0	10.0	30,000
Buoy No. 3	14.0	12.0	60,000
Kubara Wharf	10.0	8.0	10,000

STEVEDORES: 12 gangs available for logs.
TANKERS: LPG tankers – see "Shipmaster's Report".
FRESH WATER: Available from barge only (capacity 180 tons).
FUEL: Domestic oil is available; bonded oil will be brought from Moji or Nagasaki with sufficient notice, when required.
REPAIRS: The shipyard is capable of carrying out all kinds of fitting-out and repair work.

SHIPMASTER'S REPORT: November 1984.
Location: The terminal is a fairly new facility situated deep within Imari Bay on the N.W. coast of Kyushu – some 12 miles or so North of Sasebo. It is owned by Kyushu L.P.G. Fukushima Terminal Company Limited and was built in August 1982.

It is used solely for LPG discharge and there is a coastal tanker loading berth immediately adjacent.
Approaches: BA. 1527 is the only British chart to cover the area from the South and is barely adequate. Japanese charts 166 and 1256 will give a better indication of the geography of the bay and immediate approaches.

On this occasion we arrived from the Arabian Gulf and chose to approach to the East of the Goto Retto, through Aizaki Seto and thence North to pass between Azuchi O Shima and Taku Shima, i.e. through Oshima Seto.

Navigation presents no problem with the high land providing excellent radar returns. Because of the strong tidal streams it will be necessary to time the passage of Aizaki Seto on the flood; if this cannot be managed then passage through to the East of Eno Shima is recommended.

There are the usual huge concentrations of fishing vessels in the area and, on arrival, the Pilot advised strongly against attempting another passage of Oshima Seto. (We had transited on a Sunday morning and the passage was entirely clear. On departure, however, it was thick with fishing vessels). A passage to the North of Azuchi O Shima is therefore recommended.

From Safety Regulations:
- (i) Master should proceed carefully in Imari Bay to prevent grounding in shallow water (from Aoshima S.E. 1.3 miles, depth 12.4 m. – 13.8 m., Nohtori Asase depth 15.5 m.).
- (ii) Under keel clearance shall be kept to more than 10% of maximum ship's draft.
- (iii) Entering bay is prohibited under the following conditions:
  1. Wind force is forecasted to increase to more than 10 m./sec.
  2. Wave height is forecasted to be more than 1.0 m.
  3. Visibility is forecasted to decrease to less than 1.0 mile.
- (iv) Boil-off gas blowing is prohibited in Imari Bay.
- (v) Master shall be requested to proceed through Imari Bay during period from sunrise to sunset.
- (vi) Master will be requested to keep ship's speed less than 8 knots while proceeding in Imari Bay.
- (vii) The vessel should keep a good lookout by radar and sight.

Pilotage: Pilot compulsory for LPG tankers over 10,000 gross tons. The pilot boarding position is 33° 29′ N., 129° 40′ E., although this is not marked on the BA charts. The Pilot boarded from a tug and required the pilot ladder 2.0 m. from the water. Boarding daytime only. The vessel is then escorted to her berth by 2 or 3 tugs, one of which stations itself over a shoal (12.0 m.) patch within the bay as a marker. There is a 4 knot speed restriction in this area. Pilot guarded Channel 16 and worked Channel 6 VHF.

Length of pilotage about 1.5 hours to quarantine anchorage and thence to berth.
Restrictions: See "Approaches" and "Berthing".
Max. Size: 70,000 d.w.t., max. draft 15.5 m.
Health: If the vessel has a valid Sanitary Certificate the quarantine anchorage may be dispensed with and the vessel will be cleared alongside.
VHF: See "Pilotage".
Tugs: See "Pilotage".
Berthing: Vessels may berth either side alongside although they prefer to berth port side to, presumably to save time on arrival. Local regulations prohibit the connection of cargo lines after sunset.

Normal mooring configuration of 3, 3, 2, with lines on quick release hooks. Mooring boats in attendance.

A shore gangway is provided, length 15 m., extension ability 5 m. – 9 m., can operate to 33° above horizontal and to 17° below horizontal.

The following restrictions apply to berthing:
1. Max. wind force allowed: less than 10 m./sec.
2. Max. wave height allowed: less than 1.0 m.
3. Visibility allowed: over 1.0 sea mile.
4. Max. docking speed allowed: less than 10 cm./sec.
5. Max. docking angle allowed: less than 6°.

From Safety Regulations:
1. Should be port side alongside in principle.
2. Should use tugboat for berthing and unberthing.
3. Should keep berthing speed less than 10 cm./sec., berthing angle less than 6°.
4. Should use line boat for berthing.
5. When coming alongside berth, the ship's manifold to be used shall be clearly marked with "Flag N" so as to be easily distinguished by the Terminal Berth Master on the jetty.
6. Should be careful not to damage the berth facilities.

Discharging: Normal cargo survey procedure. However, the shore carry out their own determination of cargo S.G. and will use this figure for their own calculations.

Normal Japanese Safety Inspections and procedures. There is supposed to be a 4 hourly safety check throughout discharge.

The discharge presented no problems with a rate of 1,200 t.p.h. being achieved with 4 pumps.

A back pressure of 3.0 bar was stipulated but we worked constantly at about 3.2 bar without any complaint, tonnage rate apparently being their main consideration at the time.

Chiksans are purged with Nitrogen on completion.
Cargo Operation Specifications:

	Propane (Liq.)	*Propane (Vap.)*	*Butane (Liq.)*	*Butane (Vap.)*
Receiving capacity (cu.m./hr.)	2,000	2,700	2,000	2,300
Allowable max. pressure kg./sq.m.	10	10	10	10
Allowable temperature (°C)	−45	−45	−10	−10
Hose flange size from		All 150 ASA		
shoreside (inches)	12	10	12	10

Remarks: Unloading cargo operation of Propane and Butane shall be carried out at the same time.
Chiksan Arm Arrangements: From left to right looking shoreward: Propane vapour, Propane liquid, Butane liquid and Butane vapour.

This being the usual Japanese configuration of V.L.L.V. with dedicated lines.
Shore Vapour Blower Capacity:
Propane: Max. pressure 2,400 mm. Aq.
Max. quantity 5 t.p.h.
Butane: Max. pressure 2,400 mm. Aq.
Max. quantity 5.8 t.p.h.

Shore Tank details:
for Propane: Tank capacity 40,000 tons×2
Tank pressure 0.15 kg./sq.cm.
Tank temperature −45°C
for Butane: Tank capacity 40,000 tons×2
Tank pressure 0.15 kg./sq.cm.
Tank temperature −10°C

Nitrogen Supply:
Tank capacity: 27 cu.m. (in liquid)
Supply rate: 3,000 cu.m./hr.
Flange size: 1.0 in.
Flare capacity: 3,500 cu.m./hr.×1
Communications: Communication is by means of a telephone placed on board in the CCR. Level of English rather poor and an Agent is invariably in attendance to assist.
Ship's Tel. No.: 380.
Shore Cargo Control Room Tel. Nos.: 350, 351, 352.
Fresh Water: Available from the berth but a minimum of 7 days' notice was quoted for this service.

Tank capacity 350 cu.m, supply rate 17.5 cu.m./hr., Hose flange size 2.5 in.

Water may also be taken by barge (prohibited during cargo operations).
Fuel: Available by barge and must be taken at anchor.
Repairs: The main engines and other equipment for ship's manoeuvring shall be in an operable condition and in a state of immediate readiness while alongside the berth.

There are a number of contractors available for minor repairs, with the usual restrictions on hot work and the movement of large metal objects. There is a large shipyard within the area which could presumably handle emergency repairs.
Surveyors: Nearest Lloyd's Surveyors are at Nagasaki and Moji.
Gangway/Deck Watchmen: Whilst alongside at the terminal berth, responsible member of crew shall be stationed at the ship's gangway to advise visitors of safety regulations and to check visitors and crew members.
Storing: Stores may be loaded from the quay but not whilst working cargo.
Shore Leave: Ship's crew and visitors shall take the route through the terminal shown on the map in the terminal information booklet.

Ship's crew should carry Landing Permit which is issued by Japanese Immigration Officer.

No smoking shall be allowed in the terminal.

When taking photographs of the terminal, permission should be obtained from the Terminal Representative.
Regulations: Following are extracts from the Terminal Safety Regulations.

Cargo handling operation shall be stopped and the vessel shall be shifted to a safe anchorage under such conditions as follows:
1. When Harbour Master or Maritime Safety Agencies order ship's Master to shift vessel.
2. Wind force is forecasted to increase to more than 15 m./sec.
3. Wave height is forecasted to be more than 1.0 m.
4. Visibility is poor (less than 200 m.).
5. Thunderstorm is forecasted to be approaching.
6. When LPG vapour accumulation is present on the deck.
7. When a fire occurs either on the vessel or in the vicinity.
8. When warning of approaching tidal wave is received.

Smoking shall be prohibited onboard when Chiksan arms are being connected or disconnected.

Fire wires shall always be lowered to sea level over the off-side bow and quarter to enable tugs to connect up rapidly in an emergency.

Lubricant pressure of stern tube shall be maintained lower than sea water pressure.

AUTHORITY: Imari Doboku (Public Works) Office, 122-4 Shinten-Cho, Imari City, Saga Pref., Japan. *Tel:* (09552) 34151.

INNOSHIMA: 34.17 N. 133.11 E.

DOCUMENTS:
- Ship's Register.
- Last Port Clearance.
- 3 Crew Lists including Passport Numbers.
- 3 Passenger Lists.
- 1 Stores List.
- 1 copy Voyage Memo (last 3 months).
- 1 Declaration of Crew's Baggage, i.e. tobacco, wine/spirits, camera, wrist-watch, radio, firearms/swords etc. (only at first port of call in Japan).

Ship's Agents will prepare Inward/Outward Declaration, 1 Cargo Manifest and Cargo Manifest in Transit using specific forms. Therefore ship's Agent should be provided with necessary information about details of cargoes in advance.

PILOTAGE: Inland Sea Pilotage should preferably be arranged through Agent by cable via Nagasaki Radio giving 72 hours' notice. Urgent correction of ETA outside business hours should be cabled direct to pilot station. Inland Sea Pilot Association covers all Inland Sea ports. Pilotage compulsory for vessels over 10,000 g.r.t. Pilots obtained from one of three pilot stations dependent upon vessel's last port of departure and at Master's discretion. Pilotage available throughout 24 hours and 72 hours' advance notice preferred, thereafter advising any alterations. Most Inland Sea Pilots also act as Harbour Pilots up to berth or anchorage at destination.

Note: VHF communication with Inland Sea pilot stations. Also see "Shipmaster's Report" before first port.

Wadamisaki, at entrance to Kobe (vessels transitting Kii Straits) Position Lat. 34° 34.09′ N., Long. 135° 11′ E. Telegraphic address "Anjin Kobe".

Sekisaki, 3 miles South of Sekisaki Lighthouse (vessels transitting Bungo Channel). Position Lat. 33° 13′ N., Long. 131° 54′ E. Telegraphic address "Anjin Saganoseki". In event bad weather, recommended vessels proceed for shelter as near as possible, having due regard to safety, to Sekisaki Pilot Station.

Kanmon Pilot boards at Mutsure (Lat. 33° 58′ 15″ N., Long. 130° 53′ 43″ E.) for passing Shimonoseki Strait to Hesaki where Pilot will be changed to Inland Sea Pilot.

Hesaki, at East side of Kanmon (Shimonoseki) Straits. Position Lat. 33° 56′ 24″ N., Long. 131° 03′ 12″ E.

ANCHORAGE: No. 1. 14 m. deep, 1.4 miles off Hyakkan Island 180°. No. 2, 9 m. deep, 1.5 miles off Hyakkan Island 290°.

RESTRICTIONS: In general, mooring/unmooring and/or dry-docking in-and-out carried out in daytime only.

MAX. SIZE:

	Length	*Breadth*	*Draft*
(1) For mooring only	320 m.	× 50 m.	× 7 m.

(2) Max. draft for entering port: 9 m.
(3) Max. draft for mooring: 5 m. – 7 m. according to quay.

Current is N.E. at high tide, and S.W. at low tide at max. 2.5 knots.

HEALTH: In event vessel proceeding Innoshima direct from foreign port, vessel to receive Pratique at Quarantine Anchorage Kobe or Saganoseki (Lat. 33° 15′ N., Long. 131° 52′ E.) or Mutsure (Lat. 33° 59′ N., Long. 130° 53′ E.).

At first port of call in Japan, vessel must obtain Free Pratique. Quarantine Officers will attend vessel only from daylight to sunset and Master to show all Vaccination cards, Derat Exemption Certificate. In case vessel arrives from cholera-infected area within 10 days, Master must advise crew and passengers' health condition to respective Quarantine Office through ship's Agent prior to arrival and close all soil pipes before entering port.

RADIO: Recommended Master communicates with Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If specifically Westbound vessel, to contact Choshi, and Northbound to contact Nagasaki Radio respectively.

TUGS: 6 tugs available, 320 h.p. – 3,500 h.p. Ship taken into port by Dock Master who joins ship at anchorage with tug-boat. Usually tug's lines used.

BERTHING: No specific requirements. Pilot boarding time will be notified by ship's Agent mainly by radio.

KAGOSHIMA: 31.35 N. 130.33 E.

DESCRIPTION: Port situated in Kagoshima Bay, the Southern part of Kyushu and consists of 6 sections as follows:

Old Harbour (Honko): Divided into Inner Harbour sheltered by breakwaters which can accommodate up to 3,000 tonners, and Outer Harbour, (open roads) where large size vessels lie at anchor.

New Harbour: Adjacent to Main Harbour on the South. This section also sheltered by breakwaters and a 10,000 tonner can be accommodated.

South Harbour: Located about 6 km. away from old harbour on South side and used for small coasters.

Lumber Harbour: Located about 7 km. away from old harbour on South side and used for log carriers, a 15,000 tonner can be accommodated.

DOCUMENTS:

Customs: When vessel arrives direct from foreign port, Customs Officials board for search. Following documents to be submitted:

Crew List.
Passenger List.
Manifest of crew personal effects (must be signed by individual crew member).
Store List.
Arms and Ammunition List.
Narcotics List.
List of ports of Call on current voyage.
Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.

Following will be checked on board: Ship's Registry; Last Port Clearance.

When vessel comes from Japanese port, Customs Officials will not attend on board, except in special case. Master or Agents to attend Custom House for entry formalities with following documents:

Discharging Cargo Manifest.
Through Cargo Manifest.
Declaration inward/outward.
Ship's Registry.
Last Port Clearance.
Documents entrusted with the Master by Customs at previous port.

On vessel's departure, a clearance is issued by Customs, after confirming payment of tonnage dues.

PILOTAGE: Not compulsory, but necessary unless Master well acquainted with locality. Pilot embarks at quarantine anchorage (see "Health"). Request for Pilot made through Agent. Master to report by radio accurate ETA at least 24 hours prior to arrival.

ANCHORAGE: Ample good holding anchorage available in Outer Harbour. Depth: Over 9 m.

RESTRICTIONS:

HEALTH: Radio Agent for Free Pratique not less than 5 hours and not more than 36 hours before arrival, advising full details of vessel and health conditions on board. When Free Pratique is granted by radio vessel will be required to submit the following documents to Quarantine Officer on arrival:

Maritime Declaration of Health.
Crew List.
Passenger List.

The following vessels will not be able to get Radio Pratique:

1. A vessel that has been in contact with an infected area or a suspected infected area within 15 days of arrival.
2. If a vessel does not possess a valid Derat or Derat Exemption Certificate.

Quarantine:

(a) Quarantine Station: Sea area within radius of 1,000 m. from centre, position Lat. 31° 33′ N., Long. 130° 35.5′ E.

(b) Quarantine service rendered from sunrise to 1 hour before sunset.

(c) "Q" flag should be hoisted until Free Pratique granted.

(d) When vessel arrives from plague-infected or suspected area within 10 days after she left such place, 24-hour special quarantine required.

All sanitary scuppers must be closed and garbage not thrown overboard after reaching 60 miles off Japanese coast.

RADIO: Recommended Master contacts Agent through Choshi Radio or Nagasaki Radio which covers all ports in Japan. If Westbound via Chosi and Northbound to Nagasaki respectively.

TUGS:

"Wakashio Maru No. 2"	twin diesel vessel 3,200 h.p.
"Kinko Maru"	twin diesel vessel 3,000 h.p.
"Sanko Maru"	twin diesel vessel 3,000 h.p.

BERTHING: No specific requirements. Pilot boarding time will be notified by Agent mainly by radio.
